He was married three times and had a large family. Agrippa died in 1535 at the age of forty-nine in Grenoble. It's ironic that his body was buried at a Dominican monastery, the religious order that accused him of heresy and hated him the most.

*Agrippa could also be considered one of the world's first supporters of feminism. He strongly believed in the equality of women and advocated their rights. In 1532, he published an article entitled "The Nobility of the Female Sex and the Superiority of Women over Men."

Agrippa's Books on Magic and Philosophy

In terms of magic, Agrippa's most significant and lasting accomplishment was the publication, in Latin, of his works on occult philosophy or magic. The first volume, *De Occulta Philosophia* (Of Occult Philosophy) was published at Antwerp in 1531. It's very likely that Agrippa himself paid for the cost of this first printing. Two years later, in 1533, all three volumes of his writings were published at Cologne under the title *De Occulta Philosophia Libri Tres* (Three Books of Occult Philosophy).

Agrippa believed that the magic being practiced in his time wasn't pure; he felt it had been corrupted over the years. He also believed that by using our minds alone we would not be able to understand or discover the mysteries of the universe and its spiritual truths and revelations. He felt that magic in its original form would give one the ability to do this. For him, magic was the highest and most sublime form of wisdom. Because he believed that much superstition had contaminated the original and true magic, restoring it to its original state was his primary aim. The end result was the *Three Books of Occult Philosophy*.

Each of the three books had their own theme. Book one was on natural magic; book two was on celestial magic; and book three was on ceremonial magic. He had written the entire work in his earlier years (approximately 1509–1510) and continued to revise and enlarge it up until it was published. (Apparently it had been circulating in an unfinished state in Europe, including the Low Countries, since 1510.)

Agrippa emphasizes that occult philosophy is indeed magic. He uses the title "Occult Philosophy" instead of the word *magic* and says that the reason he chose this title was because he didn't want to offend anyone (most likely the Church, which was fomenting the Inquisition and which he always had to stay one step ahead of). He

Figure 4.2. *Three Books of Occult Philosophy*, 1651,
by Henry Cornelius Agrippa

had been accused of being a sorcerer, and the publication of this book was delayed due to the efforts of the Dominican monks. This religious group seemed to be a thorn in Agrippa's side for most of his life. They eventually convinced the emperor to sentence him to death, but he fled from Germany to France to escape this fate.

The *Three Books of Occult Philosophy* was first translated into English in 1651.

This work was really an encyclopedia or compendium of almost all of the occult knowledge at that time, which Agrippa had collected from many early and ancient sources. It was not a how-to book since it didn't give directions on how to do ritual magic, but it contained all of the theory that backed up the validity of ritual magic. With a little insight and cross-referencing, one could figure out how Agrippa envisioned the rituals to be practiced. As stated earlier, after publica-

tion, it quickly became the definitive reference text for anyone wishing to practice magic, including Dr. John Dee. With its publication, information on magic was now available to people throughout Europe, and there was a tremendous surge of interest in the subject. The book was a great success, and as you might suppose, the Church was not pleased.

It's interesting to note that one of Agrippa's mentors in the study and practice of magic was an abbot at a Benedictine monastery by the name of Johannes Trithemius. Trithemius was an author who not only wrote about theology and ecclesiastical subjects but also about magic and other esoteric concerns. He was especially interested in alchemy and the philosopher's stone, which is a legendary object that can supposedly change base metal into gold. (Some believe that this stone is the Fountain of Youth and can even grant immortality.) Agrippa visited Trithemius at the Monastery of St. Jakob at Wurzburg sometime around 1509–1510 and gave him a manuscript copy of his book. Trithemius was very pleased with Agrippa and his work, and Agrippa acknowledged Trithemius at the beginning of the book.

It should be noted that in 1655 a book was published in English that claimed to be Agrippa's fourth book of occult philosophy. It appeared to be a very practical how-to book on magic and, as such, rounded out his first three books (which were conceptual in nature). This book was entitled *Henry Cornelius Agrippa His Fourth Book of Occult Philosophy, of Geomancy, Magical Elements of Peter de Abano, Astronomical Gedomancy, The Nature of Spirits, Arbatel of Magic*. In fact, as you can see by the title, it was really a composite of several authors, including Peter de Abano and Geog Pictorius Villinganus. Its chapter entitled "Of Occult Philosophy or of Magical Ceremonies: The Fourth Book written by Henry Cornelius Agrippa" was mostly like written by a later author using Agrippa's name and drawing upon the information contained in his three earlier works. Most scholars believe that the chapter "of Geomancy" was indeed written by Agrippa himself and that it had never been published before.

Irrespective of who wrote this fourth book, it's very valuable in that it describes how the magic that Agrippa wrote about could be practiced. (I have a facsimile edition as well as the original scans from the first English edition, and I find it to be a very interesting resource.)

Agrippa's philosophy of magic was very logical. He didn't believe the magician should be servant to or be enslaved by the higher spiritual beings (angels, demons, spirits, for example), but that these beings should render service to the magician. Thus, the magician was master, and they were the servants. An experienced and knowledgeable magician would know how to conjure up and control these forces. Also, Agrippa realized that not all the information, knowledge, and secrets of magic should be revealed to everyone but only those worthy of practicing it. He even stated that only the wise and discerning could understand and discover its true secrets; magic could be dangerous in the wrong hands, like putting dynamite into the hands of a child. Even though he realized that the magician could use magic in a selfish way, he believed it was meant to be used to discover ultimate truth and divine knowledge.

He also believed that, in the past, not all secrets and information pertaining to magic had been committed to writing but that the most important secrets had been passed orally from master to student. In addition to researching ancient books and manuscripts, he searched out the wisest and most knowledgeable magicians of his day from whom he endeavored to collect the oral traditions of magic that had been passed down to them.

Agrippa also believed that the structure of the universe was orderly and based on hierarchies or archetypes. At the top of this hierarchy is God, whose attributes are initially manifested before descending down through the lower spheres as archangels, high angels, low angels, and the lower spiritual realms, culminating in the physical realm (as discussed in chapter 1). The lower realms or worlds are reflections of the higher (as above, so below).

The following is a diagram of the hierarchy as Agrippa envisioned it:

God (chief worker)
 Angels
 The Heavens
 The Stars
 The Elements
 Animals
 Plants
 Metals
 Stones

This series of descending manifestations allows God to convey his virtues and powers upon us.

He goes on to say that there are threefold worlds: elementary (earthly or physical), celestial (related to the planets and stars), and intellectual (a spiritual world of angels and higher beings). Each specific type of magic is related to each of these worlds. His books correspond to each of these realms. Book one, on natural magic, corresponded to the elementary realm; book two, on celestial magic, concerned itself with the planets and the stars; and book three, on ceremonial magic, related to the intellectual world, which was comprised of angels and higher beings. Agrippa also emphasized that every inferior world or being is governed by its superior. He believed that, by controlling the superior, one could control the inferior, which in a sense is the basis of all magic.

Agrippa believed that both good and evil angels exist in these higher spiritual realms and that the magician can control both types. The key was to know their true names and characteristics (colors, sigils or signs, properties, etc.) in order to properly invoke and communicate with them. This is a key factor in angelic magic.

He also held that it was essential to raise the mind to the presence

of God. This attitude is very important in *any* magical operation. Since God is the ultimate power, the reliance on him is of the utmost importance. Agrippa believed that the mind should be as free as possible from things of the physical world and should rise up toward God and higher spiritual thoughts. At the end of book three he states this principle:

To conclude, in all businesses, put God before your eyes, for it's written in *Deuteronomie* When you shall seek the Lord your God, you shall find him. Whence we read in *Mark*, That whatsoever ye shall desire and pray for, believing that you shall receive it, it shal come to pas for you; . . . also the fervent prayer of a righteous man prevaieth much: . . . but take heed in your prayers, least that you should desire some vain thing, or that which is against the will of God; for God would have all things good: neither shalt thou use the name of thy God in vain, for he shall not go unpunished, who taketh his name for a vain thing: be abstemious and give alms, for the Angel saith to *Tobiah*, prayer is good with fasting and alms; and we read in the book of *Judith*: Know ye, that the Lord will hear your prayers, if ye shall persevere in fastings and prayers in his sight.¹

There are some very important points to be learned in this statement by Agrippa, and every magician should take heed of them. As stated earlier, prayer is very important and essential to magic, and no magical operation should begin without it. Agrippa makes it very clear that God is the source of all things and everything descends from God. Without the power and presence of God, nothing will be successful or safe. A magician can perform great feats and acquire godly wisdom and knowledge if God is present with him.

Agrippa says at the beginning of the book that if you seek the Lord, you will find him. Agrippa himself gave us this important caveat: "but take heed in your prayers, least that you should desire some vain thing, or that which is against the will of God." Dr. John Dee and Agrippa

agree 100 percent on this, and all magicians should follow their advice. Agrippa says that

Magick is a faculty of wonderful virtue, full of most high mysteries, containing the most profound contemplation of most secret things, together with the nature, power, quality, substance, and virtues thereof, as also the knowledge of the whole nature, and it doth instruct us concerning the differing and agreement of things among themselves, whence it produceth its wonderful effects, by uniting the virtues of things through the application of them one to the other, and to their inferior suitable subjects, joying and knitting them together thoroughly by the powers of vertues of the superior bodies. This is the most perfect and chief Science, that sacred and sublimer kind of philosophy, and lastly the most absolute perfection of all most excellent Philosophy.²

This statement is a mouthful, and if you reread it carefully you will realize that Agrippa covers all the major points of magic, what it is and what it is not. This is one of the most concise and descriptive definitions of magic that I've ever read. It's also accurate in that it defines what magic, in its ideal state, should be. This is the magic that the ancients practiced and what Agrippa wanted to rediscover for his time.

I would like to take some of the points above about magic that Agrippa mentions and list them below. I've modernized the English and made the phrases more concise.

Magic:

- is full of wonderful virtues
- is full of most high mysteries
- contains the most profound contemplation of most secret things
- produces wonderful effects
- unites the virtues of things
- is the most perfect and chief science

Figure 4.3. Eighteenth-century sealed relic, which has never been opened. It might likely contain a piece of the true cross or a fragment of a saint's bone.

- contains sacred and sublime philosophy
- is the most absolute perfection of all the most excellent philosophy

This is the type of magic that God and the angels originally gave humanity, and it is the magic of the ancients. This is the type of magic that Agrippa wanted to restore and bring back to the world. Did Agrippa actually experience these spiritual and sublime states using magic? We know he mentioned to a close friend that he never enjoyed the mystical experience of oneness or union with God that he sought, but perhaps he experienced it later in his life. Unfortunately, unless new information comes to light, we will never know. What's important to acknowledge is that, although Agrippa may never have had this kind of experience for himself, he believed that human beings were entitled to it and should make the achievement of it a focus of their lives.

It's interesting that in today's world one has to be a specialist in a certain field in order to "make it." However, no one person can be an expert in everything. Yet Agrippa argued that the opposite was true. He told people that it was more important to have a general knowledge of *all* things rather than to concentrate on just one area. This represents the idea of the Renaissance man who manifested many talents—that of artist, scientist, or philosopher or several of these, for instance.

Agrippa also strongly urged his students to read and study the Bible. He believed it was essential to make this a priority. It's significant that he wrote a paper defending the proper veneration of the relics of saints. (Please see plate 8 of the color insert for a collection of relics.)

There appears to be one inconsistency in Agrippa's life, which I would like to discuss briefly. In 1531 he published a book entitled *De incertitudine et vanitate scientiarum et artium, atque excellentia verbi Dei declamation* [*The Vanity of Arts and Sciences*], in which he appeared to retract his book on occult philosophy. (Please see plate 9 of the color insert.)

There are several possibilities as to why he did this. He knew he was being watched by agents of the Inquisition, and perhaps this was a ploy to get them off his back. If arrested, he could say he had recanted his work. On the other hand, I believe there is no real inconsistency between these two works. He believed in the reality of magic, and he was alluding to that by saying, in *The Vanity of Arts and Sciences*, that the only acceptable use of magic is to find God. Everything else is vanity.

This will be debated for centuries, but I believe my explanation is reasonable. Agrippa was a Christian and was always very careful in stating that it was wrong to get involved with demons or evil spirits. His use of magic was always for the highest purposes. He stated that a person practicing magic must have faith and a proper attitude toward God. He also said what everyone has been saying for centuries: Magic can be used for good or evil, and a person's belief and faith in God will keep

him or her from going in the direction of evil. The attitude, belief, and viewpoint of the magician are important factors in keeping him safe from harm:

. . . for holy Religion purges the mind and makes it Divine, it helps nature, and strengthens natural powers, as a Physician helps the healing of the body and a Husbandman the strength of the earth. Whosoever therefore, Religion being laid aside, do confide only in natural things are likely often to be deceived by evil spirits; but from the knowledge of Religion, the contempt and cure of vices arises, and a safeguard against evil spirits. . . .^{3*}

As we know, God told Solomon that he could ask for anything, and it would be given to him. Solomon asked for wisdom:

In that night God appeared to Solomon, and said to him, “Ask what I shall give you.” And Solomon said to God, “You have shown great and steadfast love to David my father, and have made me king in his place. O Lord God, let your word to David my father be now fulfilled, for you have made me king over a people as numerous as the dust of the earth. Give me now wisdom and knowledge to go out and come in before this people, for who can govern this people of yours, which is so great?” God answered Solomon, “Because this was in your heart, and you have not asked possessions, wealth, honor, or the life of those who hate you, and have not even asked long life, but have asked wisdom and knowledge for yourself that you may govern my people over whom I’ve made you king, wisdom and knowledge are granted to you. I will also give you riches, possessions, and honor, such as none of the kings had who were before you, and none after you shall have the like.” So Solomon came from the high place

*I’ve edited this quote for easy reading.

at Gibeon, from before the tent of meeting, to Jerusalem. And he reigned over Israel.

2 CHRONICLES 1:7–13

I hope we all have the spiritual discernment to ask for wisdom also. You can see how different this approach is to magic than what we saw of the practice of magic in the cultures of the Egyptians, the Mesopotamians, the Greeks, and the Romans. Magic had certainly degenerated from its true purpose, and you can see why Agrippa wanted to restore it to its original purity and spiritual essence. This was a mighty task. It was not finished by him but by Dr. John Dee years later. Dr. Dee, through his angelic communications, brought a specific practice to the world.

HE SPOKE TO ANGELS— THE LIFE OF DR. JOHN DEE

He had a very fair, clear complexion; a long beard as white as milke. A very handsome man. . . . He was a great peace-maker. . . . He was tall and slender. He wore a gowne like artist's gowne, wit hanging sleeves, and a slitt. A might good man he was.

A DESCRIPTION OF JOHN DEE FROM
BRIEF LIVES, CHIEFLY OF CONTEMPORARIES,
SET DOWN BY JOHN AUBREY, BETWEEN
THE YEARS 1699 AND 1696

The magic that I will be teaching you is based on the angelic communications of Dr. John Dee. It's not the type in which angels and demons are summoned, controlled, and used to carry out your bidding, but the type in which you enter higher spiritual realms or dimensions (called Aethyrs or Heavens) and communicate with the good resident angels in each realm. Dr. Dee's sole purpose in contacting the angels was for spiritual knowledge, enlightenment, and wisdom.

I always liked the name Dr. John Dee because it is so similar to mine. When I was a professor, "Dr. D." is what my students usually

called me. John Dee was born in London on July 13, 1527. His father, Rowland Dee, held an appointment at the court, and his mother, Johanna Wilde Dee, was descended from nobility. It's interesting that Nostradamus also lived at this time (1503–1566). It's not known if he and Dee ever met.

Figure 5.1. A portrait of Dr. John Dee

As a child, Dee attended the Chantry School at Chelmsford and was well educated in mathematics, grammar, and Latin. He eventually matriculated to St. John's College at Cambridge in 1542 at the age of fifteen, from which he graduated in 1545 with a bachelor's degree. At the close of the same year, he was selected as one of the original fellows at Trinity College and also appointed "Under-Reader" in Greek. He became a skillful astronomer, taking "thousands of observations of the heavenly influences and operations" and published this information in an ephemeris. He stated that, while at college, he only got about four hours of sleep a night, due to his persistent studying.

There is a very interesting story about him while he was a student at Cambridge. He was involved in a Greek play, the *Pax* by Aristophanes. He used his skills and ingenuity to build a large mechanical beetle, which gave the actual impression that it could fly with a person sitting on top of it. These theatrics had never been seen before, and they stunned the audience who couldn't believe that the beetle's flight was accomplished solely by physical means. They felt that some supernatural method, in other words, magic, must have been involved. From this time on, many viewed Dr. Dee as a sorcerer; this label stayed with him the rest of his life.

Dee left England for the first time in 1547 to meet with scholars and professors of science and mathematics at Dutch universities. He also spent several months in the Low Countries meeting with famous individuals, including Gerard Mercator, Gemma Frisius, Joannes Caspar Myricaeus, Antonius Gogava, and other well-known scientists, inventors, and scholars. When he returned to England, he brought with him two great globes manufactured by Mercator and some newly invented astronomical apparatuses. Dee entered Cambridge to study for his master's degree, and in 1548 he left for the University of Louvain in Belgium to continue his studies, for which many believe he was awarded a doctorate degree. He was extremely popular in Paris, and the frequent lectures he gave were standing room only. He returned to England in 1551 and authored several papers.

Mary Tudor (universally known as Bloody Mary) ascended the throne in 1553 and became Queen Mary. Several years later, in 1555, Dee was arrested on charges of conjuring spirits and heresy. Fortunately, he only served a few months in prison; the charges were dropped and he was exonerated. He soon began a friendship and correspondence with Princess Elizabeth and also cast her horoscope. When Princess Elizabeth became queen in 1558, she asked Dee to calculate the most propitious date for her coronation. He had become her most trusted adviser.

One of Dee's visions was to create a state library of books and manuscripts. He presented a proposal to the queen entitled *A Supplication for the recovery and preservation of ancient writers and monuments*. Unfortunately, nothing came of Dee's proposal, so he decided to continue to collect and expand his own large library of books and manuscripts until it was one of the largest private libraries in Europe. It was estimated that Dee's library contained over four thousand volumes.

Another interesting story concerning Dee involves an accusation of him practicing magic. A wax image of the queen with a pin stuck through it was discovered lying in a field. The entire court was up in arms and believed someone had done this to cast a death spell on the queen. Dee was summoned immediately by Elizabeth and the court. He convinced them he had nothing to do with the incident and that it was probably just some practical joke. He allayed their fears and they accepted his explanation. This is a good example of how Dee was respected by the queen and how she valued him; she kept him close for this reason.

The queen referred to Dr. Dee as "her eyes," and some speculate that in his travels all over Europe, he may have acted as a spy for her. He was one of the top cryptographers of the time, and it would have been natural for him to spy on other countries and send cryptic messages back to the court and the queen. As pointed out by Richard Deacon in his book *John Dee, Scientist, Geographer, Astrologer, and Secret Agent to*

Elizabeth I, in their private correspondence, Dee signed his name with two circles representing his eyes and a sideways upside-down elongated seven. (Was Dee 007 the first James Bond?!)

In 1558, Dr. Dee authored a book on astronomy entitled *Propaedeumata Aphoristica*. It was a sophisticated approach to astronomy, integrating several fields of study including geometry and mathematics. In 1563, he traveled to Switzerland, Hungary, Italy, and Antwerp to visit universities and other scholars.

Dr. Dee was a very prolific writer and an expert on almost every major area of the arts and sciences. He was considered England's greatest and most famous scholar whom many other scholars from all over Europe visited; to them, he availed his great library of rare books and manuscripts. He also received many invitations from different emperors to stay in their country and be well supported, but he declined these because he didn't want to leave his beloved England.

Dee is noted for advancing the fields of mathematics, cartography, navigation, cryptology, astronomy, and medicine, as well as many others. He is probably most famous for writing the preface for the first English edition of *Euclid's Elements of Geometry* (1570). In this introduction, which is quite lengthy, he attempted to show that the sciences, theology, and philosophy are all related and that their unifying factors are mathematics and geometry. Instead of trying to separate each category of learning, as many did at the time, Dr. Dee attempted to integrate them into a whole.

He also gave many illuminating lectures on Euclid's geometry at universities all over Europe. Some attribute the revival of mathematics during the Renaissance to him. He also played a major role in the scientific revolution of that time, training many famous English explorers in navigation and cartography with his own state-of-the-art navigational equipment. Many explorers came to him for lessons in the use of his navigational equipment, and in 1577, he published *General and Rare Memorials Pertaining to the Perfect Art of Navigation*. He also coined the term *British Empire* and advocated the expansion of the kingdom.

Dee was very much interested in the calendar and wrote a detailed paper on reforming the Gregorian calendar.

Dee eventually moved to his mother's house at Mortlake on the Thames. He expanded the home so it could house his large library, laboratories, workers, and servants. His first book was published in 1564 and was entitled the *Monas Hieroglyphica*. It was a very odd combination of mathematics, geometry, the Kabbalah, and alchemy—full of occult symbols and mathematical relationships between these strange figures. Very few have understood it. In fact, Dee himself hinted that a key was needed to unravel its mysteries. What this key is remains unknown. Dee claimed that he wrote and completed this work in thirteen days in January of 1564. I believe it would be impossible to complete this work in such a short amount of time. My speculation is that Dee may have executed this work by automatic writing or had help from some spiritual source. If and when the key to this work is discovered, I believe wonderful secrets and mysteries will be revealed.

Dee was married three times. His first wife, Katherine Constable, whom he married in 1565, died in 1574. He was married a second time in 1575 to a woman whose name has not come down to us; she died the following year. He and his third wife, Jane Fromond, were married in 1578. She gave him at least eight children (some say nine or ten). She died of the plague in 1605, only three years before Dee's death. Dee actually named one of his daughters, Madami, after the name of one of the angels he was communicating with. This demonstrated his belief and respect for the angels. (What father would name his daughter after something that was not good and loving?)

Dr. Dee's Later Years

After Dee turned fifty, he started to spend more time studying and researching the occult and developed an obsession with contacting the angels. Like Agrippa, he believed that one couldn't find the answers to

the highest mysteries through academic learning but only by spiritual experience and contact with higher spiritual beings.

Dee's most cherished book was Agrippa's *Three Books on Occult Philosophy* that, as I stated previously, he always kept near him during any magical operation. In fact, he had several copies of Agrippa's book in Latin, which were the editions published in 1531 and 1533. I believe these Latin versions served as his manuals for angelic communications, at least during his initial experiments in trying to contact the angels. Unfortunately, he had little success with these early efforts.

Also, as he admitted, he was not very good at scrying. He does record in his diary two successful attempts at this, however. One occurred in May of 1581 in which he saw an angel in one of his crystals. Then, in November of 1582, he saw the angel Uriel who gave him a crystal and told him this would help him see the spirits and angels of the heavenly realms. Dee had hired several different scryers, who he believed had the gift; they tried to contact the angels for him. He was not really satisfied with any of them until he met Edward Kelley (formerly Edward Talbot?) in 1582. Kelley was born in 1555 and died in 1595.

Kelley was an interesting character. Rumor had it that part of one or both ears had been cut off as a punishment for counterfeiting coins. He may have also changed his name from Kelly to Talbot at one time, but no one is certain of this. He was mainly interested in alchemy, not angelic communications, and in fact, he wrote on this subject. Kelley's motivation in meeting Dee was to consult with him on his alchemical experiments, in which he was attempting to transform base metals into silver and gold. Dee was not interested in alchemy at that time but, wanting to pursue angelic communications, he needed a talented and gifted scryer. Kelley definitely had the gift for scrying, and he and Dee soon became successful at invoking and communicating with the angels. Kelley's tool was a quartz crystal ball; Kelley could clairvoyantly both see and hear the angels in the crystal.

*Engraved on steel by P. Thompson & Co.
 Millions of Spiritual Creatures walk the earth
 Unseen both when we wake and when we sleep*

Plate 1. A very rare hand-colored plate from Raphael's *Familiar Astrology*, which was published in 1849. This book is a composite of many articles on astrology, magic, alchemy, and divination. Its caption, stating that millions of spiritual creatures walk the earth unseen, illustrates the principle of magic.

Plate 2. Another rare plate from Raphael's *Familiar Astrology* illustrates the stereotypical magician conjuring up spirits, entities, and beings.

Plate 3. In the Catholic Church, the Exposition of the Blessed Sacrament resembles a drawing from ancient Egypt showing the priests worshipping the sun god. The sun god in the illustration looks exactly like a monstrance (the stand holding the host) used in the Exposition of the Blessed Sacrament. (From *The Two Babylons* by Alexander Hislop)

Plate 4. Crystal balls are the most common object used for scrying. Dr. John Dee had a crystal ball about the size of this one, which is two inches in diameter. It was placed on his magic table and Edward Kelley used it for scrying.

Plate 5. The remains of an ancient Hebrew prayer book. Notice there are additional leaves sewn into the covers.

Plate 6. An ancient cylinder seal (left), dated to approximately 3000 BCE, with magical patterns. It's very rare in that it was made with quartz crystal, which was typical of seals that were used as a talisman or for magic. They were rolled onto clay to produce a pattern like the one shown here at right.

Plate 7. A very early Christian ring with the IC XC and two letters, one above and one below, which was probably an abbreviation for a magical inscription used for the protection of the wearer. It dates back to approximately 400–500 CE. The stone is a bloodstone, symbolizing the crucifixion of Christ; when he was dying, his blood dripped on a stone and it became a bloodstone.

Plate 8. A collection of first-class relics (containing a body part such as a bone or some hair) of different saints

Th. Kneller fecit.

*Behold the figure of that man of Parts
who dive'd into the Secrets of all Arts,
A Second Solomon, the mighty Hee,
That try'de them all, and found them Vanity.*

THE
VANITY
OF
ARTS
AND
SCIENCES.

Henry Cornelius Agrippa, Knight,
Doctor of both Laws,
Judge of the Prerogative-Court,
AND
Counsellour to Charles the Fifth,
Emperour of Germany.

ECCLES.

Vanity of Vanities, all is Vanity.

LONDON.

Printed by R. E. for A. B. and are to be sold by C. Blount,
at the Catherine-Wheel at Charing-Cross. 1634.

Plate 9. The title page of *The Vanity of Arts and Sciences* by Henry Cornelius Agrippa

Plate 10 (opposite). The author John DeSalvo holding a copy of a scan from one of the pages of the tables from the Book of Enoch. The original tables are in the British Library; this copy is used with their permission.

Plate 11. Enochian is read from right to left like Hebrew. In this illustration, reading from right to left gives you the name BAPPOMGEL.

Plate 12. These objects were re-created from ancient drawings showing the Egyptian rods that the Pharaohs held. Their purpose was to balance the body and spirit.

Plate 13 (left). A large crystal from the altar of the late Nick Nocerino, one of the leading researchers and authorities on crystal skulls. It is thought that holding crystals in your hands helps to balance the energies of the body.

Plate 14 (below). Crystal skulls have also been used for scrying. This crystal skull was given to the author by the late Nick Nocerino, founder of the Society of Crystal Skulls, who believed that crystal skulls are intricate computers that can be activated by the use of color and sound.

Dee and Kelley were invited to Poland by the Polish prince Albertus Laski, who had a keen interest in their angelic communications. Dee, Kelley, and their families left for Poland in 1583. While there, some of the more important angelic information was received by Kelley and Dee. After leaving Poland, they traveled the continent, eventually returning to England in 1589. It was very unfortunate that just after Dee left for Poland, a mob—who obviously didn't like him and believed he was a sorcerer—broke into his home and destroyed his scientific equipment and many of his rare books and manuscripts.

During his lifetime, Dr. Dee had constant skirmishes with the Church and its high-ranking officials because of his spiritual beliefs. It's a shame that whenever a new idea is put forth that upsets the status quo, there is persecution of the originator. Even today, if new research or discoveries conflict with the currently accepted ideas in academia, the innovator becomes an outcast and is subject to humiliation.

It was no different in Dee's time; back then you could lose your life as a result of the Inquisition. Some readers may be familiar with *Foxe's Book of Martyrs*, which is John Foxe's (1517–1587) detailed survey of the history of Christian martyrs. This book highlights the sufferings and torture of the English Protestants under Queen Mary. The first edition was published in 1563, and there were several later editions. Dee is mentioned in the book as a great conjurer. Most churches had copies of this book, and it must have really bothered Dee to be slandered all across the country. He protested to Foxe, and in the 1567 printing, all mention of him was removed from the book. Even though Dee was successful in purging his name, however, the damage had been done, and he was still labeled a conjurer by most of the general public. This may have led him to do something drastic, as I will soon discuss.

In 1595, Edward Kelley died, and Dee lost his colleague and closest friend. Kelley had been living in Prague and conducting alchemical experiments for Emperor Rudolph. It appears that Kelley had never succeeded in transmuting base metal into gold, and the emperor finally lost

patience with him and threw him into prison in a castle. He died while attempting to escape the castle.

Dee's other most intimate friend, Queen Elizabeth, died in 1603. When she passed away, Dee lost the one person who had always protected him from bogus accusations of heresy and sorcery. It's important to note that she was not only a queen and benefactor to Dee, but a close personal friend as well. I'm sure her death was a terrible blow to him and hard for him to overcome. He now was seventy-six years old and alone, with no protectorate and many enemies who were willing to falsely accuse him. Adding to this, King James, who succeeded Elizabeth, seemed to take a more aggressive and serious view of witchcraft and sorcery. James was the author of three books on demonology, which was about witches who had confessed to the crime of witchcraft. These volumes eventually became an important reference book for witch hunters. James was a believer in the ability of witches to summon the devil and make pacts with him.

When Parliament met in 1604 during James' first year as king, he urged its members to enact new and more stringent laws banning witchcraft. This recommendation was referred to the bishops, who modified and edited it before approving it later that year.

Dee decided to go on the offensive. On June 5, 1604, he petitioned King James in the strongest of terms

to cause your Highnesses said servant (John Dee) to be tried and cleared of that horrible and damnable, and to him most grievous and damageable slander, generally, and for these many years last past, in this kingdom raised and continued, by report and print against him, namely that he is or hath bin a conjurer or caller or invocator of devils.

He explained that he had previously published his arguments against such accusations and that should have rested his case. He was now offering himself to be tried under penalty of death. In his own words:

yea eyther to be stoned to death, or to be buried quicke, or to be burned unmercifully, if by any due, true, and just meanes, the name of conjuror, or caller, or invocator of Divels or damned Sprites, can be proved to have beene or to be duely or justly reported and told of him (as to have been of his doing) were true, as they have been told or reasonably caused any wondering among or to the many-headed multitude, or to any other whoseever else.

He ends his petition with “a great and undoubted hope” that the king will “soon redress his farder griefs and hindrances, no longer of him possibly to be endured, so long hath his utter undoing, by little and little, beene most unjustly compassed.”¹

Unfortunately, or perhaps fortunately for him, parliament ignored his petition. They must have felt that this old man, who had been harassed so much in his life, was harmless and posed no real threat to the kingdom. King James also ignored his request, and never again was Dee accused of heresy. He lived out the rest of his life in poverty, attended only by his daughter Katherine. He expected to receive money for some previous appointments, but this money never materialized. He even attempted, during his last years, to find buried treasure, possibly by using angelic communication or other means. He paid his expenses by selling rare books from his library, and this must have broken his heart.

He died at Mortlake on March 26, 1609, and was buried at the Church of St. Mary the Virgin. Shakespeare kept the name of Dee alive by writing Dee into his play *The Tempest* as the magician Prospero. This play was first performed in 1611, two years after Dee’s death. His life seems to have been similar to the lives of so many others who are ahead of their time.

The following is excerpted from Dee’s letter to the Archbishop of Canterbury, written in approximately 1594 but not published until 1604, in which he defends his study of magic and other subjects:

Before the Almighty our GOD, and your Lordships good Grace . . . that with all my heart, with all my soul; with all my strength, power and understanding (according to the measure thereof, which the Almighty hath given me) for the most part of the time, from my youth hitherto, I've used and still use, good, lawful, honest, Christian and divinely prescribed means to attain to the knowledge of those truths, which are meet, and necessary for me to know; and where-with to do his divine Majesty such service, as he hath, doth, and will call me unto, during this my life: for his honor and glory advancing, and for the benefit, and commoditie publique of this Kingdome; so much, as by the will and purpose of God, shall lie in my skill, and ability to perform: as a true, faithful, and most sincerely dutifully servant, to our most gracious and incomparable Queen Elizabeth, and as a very comfortable fellow-member of the body politique, governed under the scepter Royal of our earthly Supreme head (Queen Elizabeth) and as a lively sympathicall, and true symetricall fellow member of that holy and mystical body, Catholiquely extended and placed (wheresoever) on the earth: in the view, Knowledge, direction, protection, illumination and consolation of the Almighty, most Blessed, most holy, most glorious, comajesticall, coeternall, and coessentiall Trinity: The Head of that Body, being only our Redeemer, Christ Jesus, perfect God, and perfect man. . . .²

Dee really tried to make the point that everything he had accomplished, written, and taught was done as a result of his faith in God, Jesus Christ, and the Church. He is adamant about this and leaves no stone unturned in his plea. I don't believe that Dee wrote this to escape the Inquisition. Nor was it just a political ploy; he had already offered himself to be tried by King James. This is consistent with his view of magic. Magic is of God, of Jesus Christ, and is aligned with the teachings of the Church. Dee always believed this and never for one moment in his life thought that he was doing anything that had not been ordained by God. We will also see in the next several

chapters that his angelic magic is consistent with his statement quoted above.

I would like to speculate about an aspect of Dee's life that, as far as I know, no one has addressed. I mentioned that, during his last years, he attempted to find buried treasure using angelic communications or other means. The question arises: what could these other means be? I don't think Dee would have used the angels to help him find buried treasure because he would have felt that these angelic communications were of God and very holy. To use them for such a selfish and materialistic purpose would be wrong. I really think he would have looked for another method. That's my opinion, and the more one reads about Dee and studies his life, the more sense this makes.

What could these other means for finding buried treasure have been? Given that Dee experimented with many occult techniques of the time, it's highly probable that he may have been a practitioner of dowsing.

Many people think of dowsing as a method of locating underground water, but it's actually a type of divination, during which the dowser uses a device like a stick or a swinging pendulum to locate underground water, minerals, or treasure. Some think it works through some unconscious force. Others think it works by psychic force, either from spirits,

Figure 5.3. An ancient Egyptian alabaster papyrus amulet (1500 BCE) that may have been used for dowsing or divination

angels, or some unknown energy. Whether you believe in the power of dowsing or not, there is compelling evidence to show that some people do have a gift for this type of divination. Would Dee have used this method of divination to try to find buried treasure? Even though I don't have definitive proof, I believe the answer is yes.

I didn't realize that one of my heroes, Albert Einstein, was interested in dowsing and experimented with it, even though he believed it had a natural explanation. Here is an excerpt from one of his letters dated February 15, 1946:

I know very well that many scientists consider dowsing as they do astrology, as a type of ancient superstition. According to my conviction this is, however, unjustified. The dowsing rod is a simple instrument that shows the reaction of the human nervous system to certain factors which are unknown to us at this time.³

The Importance of Spiritual Protection

Discussing pendulum divination gives me the opportunity to broach something very important that anyone who does any occult practices, including magic, should be aware of: people doing occult practices always need to protect themselves from negative energies and beings. Once you open yourself up to the spiritual world and are unprotected, you could come under attack by these negative influences. Protection is of the utmost importance. In the chapter that presents instructions for Enochian Meditation, I will be teaching you one of the oldest and most powerful forms of magical protection. It's called the Lesser Banishing Ritual of the Pentagram (LBRP) and only takes a few minutes to do.

Protecting yourself from negative influences is necessary whether you're performing ritual magic, or using a pendulum for divination, or are involved in ghost hunting. I was not aware of the need for this precaution until I conferred with some well-known ghost hunters. I had

been experimenting with electronic voice phenomena (EVPs), that is, trying to record the voices of ghosts on digital recorders. I achieved some results at first, but I felt like I was leaving myself open to unwanted energies. When I consulted with my ghost-hunting friends, they told me to always employ spiritual protection when involved in any type of paranormal research, from ghost hunting to spiritualism to magic.

They explained that members of their team always protect themselves whenever they go to any haunted place to do their work. One of the team members told me that she visualizes a white light around her. (I will be teaching this technique to you later.) I now personally use both the White Light Visualization and the LBRP together. As a result, I feel that I have added protection and never worry about negative entities or influences. I always perform these types of protection before and after any occult techniques or experiments.

We don't have any indication from Dee's diaries that he used any special form of protection such as the LBRP or the White Light Visualization. There is also no indication that he used the "License to Depart"—words that are said aloud to make sure all the spirits leave at the end of a session. (This is also covered later in this book.) What he did do was recite very long and intense prayers, especially a recitation of the psalms and prayers to God. I feel that this was just as good in that he called on the powers of God and the good angels to protect him.

The method of protection you use is up to you, but I still strongly recommend the LBRP for whatever occult practice you do. The LBRP is so ancient that we don't even know where and when it originated. It's commonly used by most magicians today to open and close all magical ceremonies. Even if I'm not performing any magic rituals, I try to do the LBRP on a daily basis to purify and cleanse my atmosphere.

An Intriguing Discovery

I will end this chapter with one of my favorite stories regarding the preservation of Dee's manuscripts. Fortunately, since Dee took copious notes and kept several diaries, we have much original source material from his own pen. A fascinating story is how, fifty-four years after he died, some unknown manuscripts of his were discovered. Some time after his death, furniture from his home at Mortlake was sold. Over the years, these items made their rounds from one owner to another. (I doubt the owners knew that it was the furniture of the famous Dr. Dee.) A most interesting piece, a wood chest measuring about four-and-a-half-feet long, would have had several different owners until something extraordinary was discovered about it by its last owners, Robert and Susannah Jones. They bought the Dee chest in approximately 1643, and it remained with them for the next twenty years. In or about 1662, they decided to move the chest to a new place in their home, and when picking it up and moving it, they heard something rattle inside.

Robert Jones explored the bottom of the chest with a piece of iron and found a crevice that opened up to a secret compartment. Inside this secret drawer were unknown manuscripts of Dr. Dee and a rosary chaplet made of olive wood. Unfortunately, the Jones didn't realize the significance of what they had found, and the maid used some of the manuscript to wrap pies in and light fires with. (I shudder to think how many manuscripts were destroyed by the Jones' maid. Some have estimated that a half-dozen manuscripts of Dee's were lost to the world forever.) Robert and Susannah eventually realized that the remaining manuscripts in their possession might be valuable and removed them to a place of safekeeping.

Several years later, Robert died and Susannah married Thomas Wale, who was a good friend of the well-known antiquarian scholar and book collector, Elias Ashmole. (Ashmole was also a Freemason and very interested in the occult and metaphysics.) Robert decided to show

Ashmole the papers. Ashmole realized their importance at once and obtained them from Robert, eventually passing them on to the British Library. (Ashmole's antiquarian collection, in fact, makes up a significant part of the British Library today.) Due to Ashmole's insight and generosity, we now are privy to these previously unknown manuscripts of Dr. John Dee, which are highly significant to the world of magic and may otherwise have been lost to the world.

I would like to briefly comment on some of the specific manuscripts found in the chest. The first four contain Dee's angelic magic system and were published by Robert Turner in 1986 and 1989. The last one, *The Five Books of Mystery*, comprises Dr. Dee's spiritual diaries from the years 1581 to 1583. It was published by Joseph H. Peterson in 2003. The manuscripts found in the chest include:

1. Forty-eight *Claves Angelicae* (Forty-eight Angelic Keys)
2. *Liber Scientiae Auxilii et Victoriae Terrestris* (The Book of Knowledge, Help, and Earthly Victory)
3. A Book of Invocations
4. *De Heptarchia Mystica* (The Mysteries of the Sevenfold Kingdom)
5. *Mysteriorum Libri Quinque* (Five Books of Mystery)

The first book of Dr. Dee's, "The Forty-eight Keys or Calls," is the one I will be focusing on and developing our Enochian Meditation from. It consists of basic invocations dictated in the Enochian language to Dee and Kelley by the angels. The angels also gave them the English translation for each Call.

The second book, "The Book of Knowledge, Help, and Earthly Victory," contains a set of tables that give information related to the last thirty of the forty-eight Angelic Calls (the Calls of the Thirty Aethyrs). It gives the name of each Aethyr, the names of the governors (angels) of each Aethyr, the parts of the earth associated with each one, the symbol or sigils associated with each governor, and the ruling kings and tribes of Israel of each area.

The third book, “A Book of Invocations,” written in Latin, is comprised of invocations for the angels who rule over the four quarters of the earth. The angels’ names are derived from a table composed of squares with a letter in each one.

The fourth book, “The Mysteries of the Sevenfold Kingdom,” is basically planetary invocations of good angels. There are a total of forty-nine angels (seven Kings, seven Princes, and thirty-five lesser angels), which are placed in a table called *Tabula Angelorum Bonorum* 49 (The Table of Forty-nine Good Angels).

The fifth book, “Five Books of Mystery,” contained Dee’s spiritual diaries from March 1582 to May 1583 and documented his first angelic communications during that time.

Dee received much information from the angels, but did he not receive instructions on how to use or apply the information. We will only be using the last thirty of the forty-eight Angelic Calls (the Calls of the Thirty Aethyrs) for our Enochian Meditation.

6

THE ANGELIC MAGIC OF DR. DEE

I would now like to address the type of magic that Dr. Dee was given by the angels and the specific type that you will be practicing. As discussed earlier, some types of Enochian Magic allow one to summon specific angels and demons. I believe this type of magic has risks and dangers and isn't always a path toward God. I will not be teaching this form of magic but rather the Enochian Magic, which allows one to move toward God and enter higher spiritual dimensions.

Why was this information (about evil angels) given to Dee from the angels in the first place, and did he believe it was permissible for a magician—at certain times or under certain circumstances—to conjure up evil spirits? These questions don't have a simple answer. In general, it's apparent that Dr. Dee only attempted to contact and communicate with the good angels. This can be seen and illustrated in his angelic communications, in which he questions the angels to determine if they are from God and also tests them to see if they are evil. Whenever evil spirits show up, he is quick to identify them and attempts to get rid of them expeditiously.

He also is very hard on Edward Kelley when he suspects that Kelley had been practicing some form of black magic on the side. (The angels also chastised Kelley for this.) In Dee's diaries, there are no indications

that he wanted to conjure up or communicate with evil angels; this would go against his entire philosophy. He was a very pious and spiritual man, and his entire purpose for communicating with the angels was to obtain the wisdom and knowledge of God and understand spiritual mysteries.*

The most important question is: why did the angels give this information to Dr. Dee and thus to the world? To be honest, I don't know, but I *can* speculate. I believe the angels have an obligation to reveal *all* available information pertaining to a spiritual revelation or spiritual communication. They don't have the authority to decide what to give and what not to give. We have free will, which we can use to make choices about what to do with what we're given.

Perhaps the answer to this question is that all religious and sacred writings seem to tell the same story: with the sacred information given, human beings, with their free will, can either move toward the light or to the dark side; they can use this information for good or for ill.

I'd like to make an important point about the actual practice of magic, which is sometimes overlooked. For a novice, it might appear that the instructions and procedures for carrying out a ritual are very specific, almost like a cookbook recipe. This observation is essentially correct and seems to place magic in the category of science. It's not unlike a chemical experiment in that you obtain specific chemicals, mix measured amounts of them together, heat them up, distill them, and then separate the products. This may seem to make magic a dry procedure for the beginner, but that's only half of the story because, in actual fact, magic is both a science and an *art*.

For any type of new practice, you need a basic framework to start with; otherwise there would be no order, and chaos would ensue. But just because you initially have a framework doesn't mean you always need

*We have to be very thankful to Dee for keeping such good notes. In fact, he kept several diaries, one for his magical works and one for his daily life. It's amusing that in his daily diary, he would make a note (a cryptic symbol) when he had intercourse with his wife! I'm sure he would have been shocked to think that some four hundred years later, when his diaries were published, the entire world would know about his sex life because someone had figured out what that symbol meant!

to stay within it. You can improvise and improve on the basic structure of your ritual as time goes on. This creative improvisation constitutes the artful half of the creation of magic. To be a successful magician you need creativity, intuition, and the drive to explore new frontiers. As an artist, your canvas is the spiritual realm.

I always suggest that, at the beginning of your work, you stay within the basic framework until you learn the ritual by heart and feel comfortable with it. That's standard advice for learning any new system, and that's exactly what Dr. Dee did. His framework or standard was Agrippa's *Three Books of Occult Philosophy*. He followed Agrippa's rules and procedures until he made contact with the angels, and then it was a whole new ballgame. The angels instructed him how to stay in contact with them, and they also told him what they wanted him to do in order to be able to receive the Enochian language and the Calls for the Aethyrs from them.

The Calls that they gave Dee and Kelley were invocations that, if repeated, would act like keys to open up specific Aethyrs or heavenly realms. Once an Aethyr was entered, its resident angel could be contacted. Dee and Kelley were given the specific Calls for each of the Aethyrs and the names of the resident angels of each. What's strange is that the angels explained very little in the way of details about the actual procedures for *using* the Calls. They only told Dee and Kelley that the Calls opened up the Aethyrs or Heavens.

Why give this information and not give detailed explanations? Maybe *we* need to work out the details and applications for ourselves. Maybe this information was only to be used in the future by someone who could figure out how to apply it in a specific way. Maybe the information would be given later, but Dee and Kelley broke off the angelic communications before it could be given. We can speculate all we want to, but at the end of the day, we don't have a definitive answer. That's why, based on Dee's information, so many different procedures by so many different magical groups have been developed.

The important point here is that there is more to be discovered and unveiled in the magic that Dee was given, especially with regard to

how to use the Enochian Calls. I believe that this information remains hidden in Dee's diaries. What's important to remember also is that we don't possess *all* of Dr. Dee's diaries. We know for a fact that some were destroyed, some may have been lost, and some may still be hidden.

Maybe someone in our own time will unveil or discover the information that Dee was not yet aware of. *You* can explore these hidden spiritual realities, invoke the angels of the Atheyrs, and perhaps discover some hidden secrets yourself! This is a very real option for anyone embarking on the practice of Enochian Magic.

What the Angels Told Dee

We know that the angels told Dr. John Dee that the information they were conveying to him was the information or magical workings that God had previously given to the famous Enoch of the Bible. The Bible says that Enoch never died but was taken up to heaven by God:

When Enoch had lived 65 years, he fathered Methuselah. Enoch walked with God after he fathered Methuselah 300 years and had other sons and daughters. Thus all the days of Enoch were 365 years. Enoch walked with God, and he was not, for God took him.

GENESIS 5:21–24

The angels told Dee that this language was also the language that Adam and Eve had been given by the angels. This would have been the original language of humankind, which named everything by its true name or essence. As we have learned, to know the true name of something was to give one power over it. Given this, we can understand why Dee was so excited about learning this original language.

The angels told Dee the story of the fallen or wicked angels and how they came to earth and gave humans evil, or black, magic. The angels related to Dee and Kelley that this type of magic should never be used by them. They concluded by telling Dee that he would be the messenger

or revealer of the lost knowledge of Enoch. In a sense, he would be the second Enoch. The following are some excerpts of the angelic communications regarding Enoch and Dee's role:

. . . The Lord appeared unto Enoch, and was mercifull unto him, opened his eyes, that he might see and judge the earth, which was unknown unto his Parents, by reason of their fall: for the Lord said, Let's shew unto Enoch, the use of the earth: And lo, Enoch was wise, and full of the spirit of wisdom. . . .

And after 50 dayes Enoch had written: and this was the Title of his books, let those that fear God, and are worthy read.

But behold, the people waxed wicked, and became unrighteous, and the Spirit of the Lord was far off, and gone away from them. So that those that were unworthy began to read. And the Kings of the earth said thus against the Lord, What is it that we cannot do? Or who is he, that can resist us? And the Lord was vexed, and he sent in amongst them an hundred and fifty Lions, and spirits of wickednesse, errour, and deceit: and they appeared unto them: For the Lord had put them between those that are wicked, and his good angels: And they began to counterfeit the doings of God and his power, for they had power given them so to do, so that the memory of Enoch washed away: and the spirits of errour began to teach them Doctrines: which from time to time unto this age, and unto this day, hath spread abroad into all parts of the world, and is the skill and cunning of the wicked.

Hereby they speak with the Devils: not because they have power over the Devils, but because they are joyned unto them in the league and Discipline of their own Doctrine.

For behold, as the knowledge of the mystical figures, and the use of their presence is the gift of God delivered to Enoch, and by Enoch

his request to the faithfull, that thereby they might have the true use of God's creatures, and of the earth whereon they dwell: So hath the Devil delivered unto the wicked the signs, and tokens of his error and hatred toward God: whereby they in using them, might consent with their fall: and so become partakers with them of their reward, which is eternal damnation.

These they call Characters: a lamentable thing. For by these, many Souls have perished.

Now hath it pleased God to deliver this Doctrine again out of darkness: and to fulfill his promise with thee, for the books of Enoch: To whom he sayeth as he said unto Enoch.

Let those that are worthy understand this, by thee, that it may be one witnesse of my promise toward thee.

Come therefore, O thou Cloud, and wretched darkness, Come forth I say out of this Table: for the Lord again hath opened the earth: and she shall become known to the worthy.¹

It's clear that the angels intended Dee to be the new Enoch and the revealer of this wisdom to the world again. I believe this message holds relevance for us today because perhaps it's the method that we need to employ in order to rediscover our true being and our relationship with God. Maybe God's magic will bring us back into the presence of God—it will establish our true relationship with him and the universe.

Dr. Dee's Method of Spiritual Protection

I would like to reiterate an important point that will be applicable to us when we carry out our own magical technique. Dee began all his angelic communications and sessions with intense prayer and sometimes the

reading of several psalms. I want to emphasize this since most modern magic practitioners don't do this, and it's my strong belief, as I've stated elsewhere in this book, that it's an essential part of the process. Here are some quotes from the spiritual diaries of Dr. Dee regarding prayer before and after his rituals:

After our prayers of the 7 Psalms, and my particular invitation and calling for God his help, and the ministry of his good angels. . . .²

The seven psalms are the seven penitential psalms that are recited during Lent. They are Psalm 6, 32, 38, 51, 102, 130, and 143. I strongly recommend the recitation of some psalms, or at least one psalm during your Enochian Meditation; examples are given in the box on pages 95–96.

We presented our selves, ready for instruction receiving, and presumed not to call my good Minister spiritual, but by humble prayer referred all to God his good pleasure.³

In the above statement, Dr. Dee reaffirms his humbleness before God and his reliance on God's will for initiating the angelic sessions.

Very long I prayed in my Oratory and at my Desk to have answer or resolutions of divers doubts which I had noted. . . .⁴

I made long, and often prayers of thanks-giving, calling for grace, mercy, and wisdom: with such particular instructions as I had written down the doubts requiring light, or resolution in them.⁵

After our divers prayers and contestation of our humility. . . .⁶

These statements by Dee show that he didn't just make short prayers to get them out of the way as many of us do (such as when we

say grace before meals). He took prayer seriously and reverently, and he specifically states above that he prayed for a very long time and often. He would also use prayer when wicked or evil angels tried to upset the angelic communications.

But I held on to pray divers Psalms, and at length against the wicked tempters purposely.⁷

Recommended Psalms (AV)

Please use whichever version of the Bible you feel most comfortable with. I usually read these parts of the following two psalms. Dee always began his angelic sessions with prayers and a reading of the psalms. He usually selected one or more of the penitential psalms (6, 32, 38, 51, 102, 130, and 143).

Psalm 51:1–15. Create in Me a Clean Heart, O God

Have mercy upon me, O God, according to thy lovingkindness:
according unto the multitude of thy tender mercies blot out my transgressions.

Wash me thoroughly from mine iniquity, and cleanse me from my sin.

For I acknowledge my transgressions: and my sin is ever before me.

Against thee, thee only, have I sinned, and done this evil in thy sight:

that thou mightest be justified when thou speakest, and be clear when thou judgest.

Behold, I was shapen in iniquity; and in sin did my mother conceive me.

Behold, thou desirest truth in the inward parts: and in the hidden part thou shalt make me to know wisdom.

Purge me with hyssop, and I shall be clean: wash me, and I shall be whiter than snow.

Make me to hear joy and gladness; that the bones which thou hast broken may rejoice.

Hide thy face from my sins, and blot out all mine iniquities.

Create in me a clean heart, O God; and renew a right spirit within me.

Cast me not away from thy presence; and take not thy holy spirit from me.

Restore unto me the joy of thy salvation; and uphold me with thy free spirit.

Then will I teach transgressors thy ways; and sinners shall be converted unto thee.

Deliver me from bloodguiltiness, O God, thou God of my salvation: and my tongue shall sing aloud of thy righteousness.

O Lord, open thou my lips; and my mouth shall shew forth thy praise.

Psalm 104: 1–9. O Lord My God, You're Very Great

Bless the LORD, O my soul. O LORD my God, thou art very great; thou art clothed with honour and majesty.

Who coverest thyself with light as with a garment: who stretchest out the heavens like a curtain:

Who layeth the beams of his chambers in the waters: who maketh the clouds his chariot: who walketh upon the wings of the wind:

Who maketh his angels spirits; his ministers a flaming fire:

Who laid the foundations of the earth, that it should not be removed for ever.

Thou coveredst it with the deep as with a garment: the waters stood above the mountains.

At thy rebuke they fled; at the voice of thy thunder they hasted away.

They go up by the mountains; they go down by the valleys unto the place which thou hast founded for them.

Thou hast set a bound that they may not pass over; that they turn not again to cover the earth.

Conducting an Enochian Ritual

In Dee's early conferences with the angels, they instructed him how to construct certain ritual equipment for their communications and for what he would need:

- a holy table
- a special emblem, called the *Sigillum Dei Aemeth*, which bore the names of the angels on it)
- seven symbols or talismans, called the *Ensigns of Creation*, to be placed or drawn on the holy table
- a breastplate with symbols on it that was worn about the neck
- a magic ring with the name *PELE* on it, which means "he who works wonders"
- four small emblems, which were placed under the legs of the holy table to insulate it from the ground

While Kelley peered into the crystal ball to see and hear what the angels were saying, Dee acted like a scribe, recording all that Kelley observed.

Other Occult Societies and the Enochian Calls

If we move ahead in time, we discover that some of the most well-known magical societies incorporated the Enochian Calls into their magical systems. The founders of the Golden Dawn in the late nineteenth century, S. L. Macgregor Mathers and Wynn Westcott, tried to create or generate a practical way to use Dee's magic in a systematic way. They synthesized a unique approach and, for the most part, they were successful. The only problem was that some of the information they used was inaccurate and their rituals were saturated with procedures made up by them; these rituals had never been part of Dee's angelic communications. That's why I believe we need to go back to Dee's original

Figure 6.1. This is a copy of a scan from one of the pages of the Dee diaries, held by author John DeSalvo. The original diary is in the British Library; this copy is used with their permission.

source material, his diaries, and minimize the amount of material that was added later.

One of the most famous practitioners of angelic or Enochian Magic was Aleister Crowley. He also synthesized a working system based on Dee's information. What he produced was very interesting and coherent, but again, much of the procedures and rituals were of his own invention. He is also known to have entered and explored all thirty Aethyrs. (I will discuss his experiences in a later chapter.)

Today, everyone talks about angels and being able to communicate with them. You can call a 900 number and get information from someone who talks to angels, and there are books too numerous to mention that explore angelic communications. I'm not saying this is bad because this accessibility increases our awareness of the spiritual world and the world of the angels. However, most of these tools and rituals are created by the respective author or practitioner. The reason I wrote *this* book was to present a magical system, or should I say an angelic or Enochian magical system—which is based solely on what Dr. Dee was given by the angels over four hundred years ago—with very little embellishment. (In fact, I point out the embellishments, so feel free to eliminate them.)

The Enochian Calls, as we will see, are much different than the grimoires of medieval times. The magical grimoires were based on a work called the Keys of Solomon, which allegedly was a manual of how King Solomon invoked and controlled angels and demons. These grimoires (basically a textbook of magic), used the divine names of God and the names of angels to control and command angels to do the magician's bidding.

Dee's Enochian Magic is quite different. For example, there are no Hebrew names of God in the Angelic Calls themselves and no specific names of the angels such as Gabriel, Raphael, and others. Instead the Calls only have descriptive names of the angels (powerful, majestic, etc.). Also, the Calls are more like statements and properties of God and the angels, rather than requests or demands. When using the grimoires, the magician usually decided when to initiate or terminate a session. Not so

with the Dee angelic communications. The angels themselves decided when to start or end a session.

A Scientific Theory of How It Works

Finally, I would like to address what I believe is the scientific basis of Enochian Magic. Enochian Magic works, but not as a result of the imagination working overtime or the wishful thinking or subconscious activity of the magician. Enochian Magic is real, and the Aethyrs and angels are real worlds and real beings.

My theory as to why and how it works is the following: I believe that our brains—most likely our cortical areas, which are responsible for our higher brain functioning and the interpretation of our sensory input (sight, sound, touch, taste, and smell)—are also responsible for receiving psychic information. Although it's believed that we use less than 10 percent of our entire brain, no one knows for sure exactly what this percentage is. Perhaps some part of this unused part of our brain is used for psychic transmission and reception.

I believe there are undiscovered cortical regions, which code for and are receptors of psychic phenomena, in the same way that our retinas enable us to see by functioning as receptors of light rays. We're capable of entering each Aethyr when that brain area becomes activated as a result of reciting a Call. In so doing, we also become aware of the angels residing in that region. The pineal gland, which is a structure in the direct center of our brain that many cultures claim is a psychic center, may also house psychic reception centers.

In Eastern meditation, a verbal mantra is employed as part of the practice. It's a resonating sound, which causes changes in the nervous system. That's why the meditating individual relaxes and enters a deep trance and an altered state of consciousness. The same is true of the Enochian Calls. They are like long mantras, which stimulate specific areas of the brain responsible for the awareness of each of the thirty Aethyrs and their angels.

I hope that this theory can be eventually tested by measuring activity in the magician's cortical areas while he or she is experiencing an Enochian Meditation and entering the Aethyrs. Such a clinical study would indeed show whether or not specific regions of the brain are activated with each Call. If these areas can be identified and mapped, we certainly would have some interesting neurophysiological verification of Enochian Magic and how it works! This exciting neurophysiologic research could also produce incredible breakthroughs in research involving altered states of consciousness.

Until we can demonstrate that Enochian Magic has a scientific basis, we're only left with what we can experience. I believe the specific technique that I'll be teaching you has the greatest potential for you to be successful in opening up these dormant centers in your brain and allowing you to explore these Heavens or Aethyrs for yourself.

7

THE TRANSMISSION OF THE ENOCHIAN TABLES AND THE FORTY-EIGHT CALLS

What exactly are the forty-eight Enochian Calls or Keys, how do we use them, and how were they transmitted to Dee and Kelley by the angels? We must keep in mind there were two types of information transmitted to Dee and Kelly. The first was a set of so-called tables that contained grids of letters and numbers (that were sometimes used to generate the Calls): the second were the Calls themselves.

The angels said that the tables comprised the most important book ever given to humans; it has been called the “Book of the Speech of God.” This book, they were told, would restore the knowledge that God originally gave humans. The angels also imply that the restoration of this information may have something to do with the end times, and this restoration of information may be responsible for bringing in a new era or age to our planet. Here are some extracts of the angel’s words regarding these tables, which I’ve modernized where appropriate:

In those Tables are contained the mystical and holy voices of the angels: dignified . . . which pierceth Heaven, and looketh into the Center of the Earth: the very language and speech of Children and

Innocents, such as magnify the name of God, and are pure. . . . These Tables are to be written, not by man, but by the finger of her which is mother to Virtue. . . . These things and mysteries are your parts, and portions sealed, as well by your own knowledge, as the fruit of your Intercession.¹

Oute of this, shall be restored the holy bokes, which have perished euen from the begynning, and from the first that Liued. And herin shall be deciphered perfect truths from imperfect falsehode, True religion from fals and damnable errors, . . . which we prepre to the vse of man, the first and sanctified perfection: Which when it hath spread a While, THEN COMMETH THE ENDE.²

These tables were quite large. In fact, each table was composed of forty-nine rows and forty-nine columns. This yielded 2,401 empty squares or cells ($49 \times 49 = 2,401$). Each of these cells was filled in with a letter or a number or was left blank. The angels communicated to Kelley the exact letter or number to place in each of these empty cells or squares. These were communicated by the angels in Latin, not Enochian, and were written into the chart by Kelley in Latin (which is the same as the Roman alphabet we use today). This is a deviation from the established routine because just about all the diaries and other angelic communications involving Dee and Kelley appear to have been written in the hand of Dr. Dee. (I believe that Dee had his own handwritten copies of the tables; please see the epilogue for further discussion of this point.)

The final product was ninety-five tables* (each containing 2,401

*Something very interesting happened to me in the course of my research, with regard to the tables. There are ninety-five original tables in the British Library, but what does not jive is that the angels refer to these tables as the set of “forty-nine tables,” and in actual fact, we only access forty-eight tables. How do we go from ninety-five to forty-nine to forty-eight? Of course, I had to look into the matter. It took a little legwork and some more analytical thinking, but I resolved the conundrum and felt like Sherlock Holmes in so doing. It was a very exciting moment for me, but because it’s a discussion that is not entirely germane to our general discourse—but *does* make for interesting reading—I have included it as appendix A in the back of the book for those who are as curious as I was about this matter.

cells filled with letters or numbers). Multiplying 95 by 2,401 gives 228,095 spaces. Thus, the angels had to specify over two hundred thousand letters or numbers to fill each of the empty cells. (Actually it was less than that since in some of the tables, only every other cell was filled in. In general, however, we're talking about a large number of letters and numbers to be transmitted from the angelic world to our world.)

The other issue was that the angels told Dee and Kelley that they had to complete these tables in forty days, which they actually did. The task commenced on March 29, 1583, and culminated on May 6, 1583, exactly thirty-nine days after they had first begun.

The angels also instructed Dee and Kelley to eventually rewrite the tables, replacing the Latin letters with the Enochian equivalent of those letters. (The angels had given Kelley and Dee a translation key between the Enochian and Latin; please see figure 7.1 on page 112.) It appears, however, the Kelley and Dee never undertook to translate the Latin to Enochian, or if they did, the location of these tables (if they still exist) is unknown.

How did the angels convey to Dee and Kelley the letters that fill in the grids of the tables? At first, it appears that an angel pointed to a letter (found on the set of tables in the Book of Enoch that the angel held) with a rod, and at the same time, the angel also pronounced the letter. Kelley "saw" the letter and also "heard" the pronunciation and then wrote it down. It's interesting to note that Leonardo da Vinci said that angels can't speak or make sounds since air must be moved in order to do this. In accordance with this, it seems likely that Kelley saw and heard the Calls psychically and not through physical emanations.

Later, in order to speed up the process, the angels didn't pronounce the letters but only pointed to them with the rod, at which point Kelley would say them out loud. It's interesting that Kelley couldn't read the letters until some supernatural fire or energy flashed into his head and he went into some kind of trance. This happened many times during the transmission of the tables. When the energy left his head, he came out of the trance. In Dee's diary is a description of this:

A voyce: Read.

[Edward Kelly] EK: I cannot.

Dee: Then there flashed fire upon EK agayne.

A voyce: Say what thow thinkest.

EK: My hed is all on fire.

A voyce: What thow thinkest, euery word, that speak.

EK: I can read all, now, most perfectly.

Kelley went on to read the letters that the angel pointed to and, at the end of the session, came out of the trance state.

Dee: The fire cam from EK his eyes, and went into the stone agayne.

And then, he couldn't perceyue, or red one worde.³

The Generation of the Calls from the Tables

After the tables were assembled, the next step would be to generate the forty-eight Enochian Calls from them. How was this done, exactly? We have more specifics about this since Dee recorded more details about this procedure in his diary. The angel who appeared in Kelley's crystal had his set of tables and would point to a specific grid location on one of the tables. Kelley would observe that letter or number and the location and give this information to Dee, but not simply by its row and column but by some cryptic numbers and descriptions. No one has been able to figure out what these cryptic numbers and descriptions mean. Dee, using these descriptions, would find the correlating position on his copy of the tables and then write that number or letter down.

What did these numbers and descriptions refer to? Let's look at some of these strange directions, with numbers too large to indicate grid coordinates, which Kelley gave to Dee. Here is an example of the exact words the angels used in specifying a grid location:

The exact Center excepted.

A (Two thousand and fourteen, in the sixth Table, is) D

86. 7003. In the thirteenth Table is I.

A In the 21th. Table. 11405 downward.

I In the last Table, one lesse then Number. A word, Jaida you shall understand, what that word is before the Sun go down. Jaida is the last word of the call.

85. H 49. ascending T 49. descending, A 909. directly, O simply.

H 2029. directly, call it Hoath.⁴

Dee was a cartographer and cryptologist, and when he returned to England, he brought with him two great globes manufactured by Mercator. Perhaps the large numbers and strange descriptions were geographic coordinates (latitude and longitude). Perhaps some other cryptic method was used, relating to some other kind of coordinates. No one has been able to figure this out yet.

In any event, after the angels located the letters or numbers for Kelley and Dee using this strange method, they abandoned it to use a simpler procedure, in which they gave Dee and Kelley the letters or numbers directly, pointing to them on the table or on one of the aforementioned globes that had letters on them. It is interesting that the angels only used this method with the strange coordinates for the first nineteen words of the First Call only. They obviously didn't think it was necessary to continue with this tedious and confusing method. They then used the following method, as explained by Kelly:

He hath a rod or wand in his hand, almost as big as my little finger: it's of Gold, and divided into three equal parts, with a brighter Gold than the rest. He standeth upon his round table of Christal, or rather Mother of Pearl: There appear an infinite number of letters on the same, as thick as one can stand by another. The table is somewhat inclined on one side: he standeth in the very middle. . . .⁵

He smit the round Table with his rod; and it whirled about with a great swiftness. Now that which before seemed to be a circular and plain form, appeareth to be a Globe and round Ball; corporal, when it turneth. . . . He striketh the Table now, and though the body seem to turn, yet the Letter seem to stand still in their places. . . . Read backward. . . .⁶

The angels also gave Kelley an English version of all the Calls by the following method:

And now Nalvage [the angel] is on the top of the Globe, and his seat remaineth in the former manner of fire. Now Nalvage holdeth up his right hand, and the same seemeth to be many hands. There is on one of his fingers an I. It vanisheth away; and so on divers fingers are words as follow. I Reign over you saith the God of Justice. . . .⁷

For another Call, Kelley describes again how the English version is given:

Now he holdeth up many hands and fingers as before, and on the very end of the fingers distinctly these parcels [of words] appeared in English.⁸

Also, and as mentioned previously, the angels initially spelled out the Calls in reverse order because, according to them, the Calls were so powerful that they didn't want to cause any supernatural event to upset the transmission process:

Nalvage: Also in receiving of the calls, this is to be noted: that they are to be uttered of me, backward: and of you, in practice, forward.

Dee: I understand it, for the efficacy of them; else, all things called would appear: and so hinder our proceeding in learning.⁹

Beginning at the fifth key to the last one, they abandoned the reverse order procedure and, in order to speed up the process, gave Kelley and Dee the Calls in the direct letter sequence in which they were to be read.

As we know, Dee noted the pronunciations of the Calls in the margins of his diaries. But where did Dee get the information about *how* the Enochian Calls (constructed from the dictated letters) were to be pronounced? Did he just guess or was this specific information revealed to him by the angels?

I think that this information on the proper pronunciations came directly from the angels. I searched throughout the sections on the transmission of the Calls and found a statement that I believe proves this. On page 95 of Casaubon's book, the angel is transmitting the words of one of the Calls to Kelly. At one point, the angel gives Kelly the word *Amiran*. Then the angel tells Dee to "sound your word." Dee then says, "Amiran."

It appears that the angel then pronounces the word to Kelly to indicate the *proper* pronunciation. Kelly says, "He pronounceth the I so remissely, as it is scare heard, and in the pronouncing of the whole word he seemeth not to move his lips." Whether all the Enochian words were verified like this remains unknown. It is possible the ones that Dee did not pronounce properly, as in the example above, were corrected right away by the angel.

I've used all of the information from the diaries and the marginal notations to put together what I believe is the most accurate pronunciation of the Calls used to open the thirty Aethyrs or Heavens. (Please refer to the accompanying CD for these pronunciations.) The angels Gabriel, Mapsama, and Nalvage made some very powerful comments about these forty-eight Calls. One of the most powerful angelic statements in all of the Dee diaries was that these keys are treasures worth more than the frames of the heavens:

Gabriel: Thus hath God kept promise with you, and hath delivered you the keys of his storehouses: wherein you shall find (if you enter wisely, humbly, and patiently) Treasures more worth than the frames of the heavens.¹⁰

We have other statements from other angels about the Calls:

Mapsama: God hath opened unto you, his Judgment: He hath delivered unto you the keyes that you may enter; But be humble. Enter not of presumption, but of permission. Go not in rashly; But be brought in willingly: For many have ascended, but few have entred.¹¹

Nalvage: It's the sense in your tongue of the holy and mystical Call before delivered: . . . Wherein, they will open the mysteries of their creation, as far as shall be necessary: and give you understanding of many thousand secrets, wherein you're yet but children; for every Table hath his key: every key openeth his gate, and every gate being opened, gives knowledge of himself of entrance, and of the mysteries of those things whereof he is an inclosure. Within these Palaces you shall find things that are of power. . . .¹²

The angel Nalvage also said:

Unto this Doctrine belongeth the perfect knowledge and remembrance of the mysticall Creatures.¹³

The transmission of the forty-eight Calls from the tables began in April of 1584 and was completed around July of that same year.

In reality, there are forty-nine Calls, but only forty-eight Calls were given to Dee and Kelley. The First Call was never given since the angels said that it was to be only of God; it was too powerful and sublime for humans to know or comprehend. The angel Nalvage explains why the First Call was not given to them:

I finde the Soul of man hath no portion in this first Table. It's the Image of the son of God, in the bosom of his father, before all the worlds. It comprehends his incarnation, passion, and return to judgment: which he himself, in flesh, knoweth not; all the rest are of understanding.¹⁴

The Nineteenth Call

We will only be using the last thirty of the forty-eight Calls in our meditation. The angels transmitted eighteen Calls to Kelley and Dee, and when they came to the nineteenth, they made it clear that this Nineteenth Call was to be used only to generate the thirty additional Calls. They also made it clear that the thirty additional Calls were the ones to be used to enter the thirty Aethyrs.

Thus, many occultists divide Enochian Magic into two branches: the elemental that uses the first eighteen Calls and the aethyral that uses the thirty Calls of the Aethyrs.

Here is a translation of the Nineteenth Call:

English Translation of the Nineteenth Call (Thirty Calls of the Aethyrs)

O you heavens which dwell in the First [or Second, Third, Fourth, or whichever Aethyr you are exploring] Air are mighty in the parts of the earth and execute the judgments of the highest to you. It's said, behold the face of your God, the beginning of comfort whose eyes are the brightness of the heavens, which provided you for the government of the earth, and her unspeakable variety, furnishing you with a power, understanding to dispose all things according to the providence of him that sitteth on the holy Throne, and rose up in the beginning saying, the earth, let her be governed by her parts; and let there be division in her, that the glory of her may be always drunken

and vexed in itself. Her course, let it run with the Heavens, and as a handmaid. Let her serve them one season: Let it confound another, and let there be no creature upon, or within her the same. All her members let them differ in their qualities, and let there be no one creature equal with another. The reasonable creatures of the earth, or Man. Let them vex and weed out one another, and the dwelling places, let them forget their names, the work of man and his pomp: Let them be defaced his buildings, let them become caves for the beasts of the field, confound her understanding with darkness, for why? It repenteth me I made man one while let her be known, and another while a stranger, because she is the bed of a harlot and the dwelling place of Him that is fallen. O you havens arise, the lower heavens underneath you, let them serve you. Govern those that govern, cast down such as fall, bring forth with those that increase, and destroy the rotten. No place, let it remain in one number. Add and diminish until the stars be numbered; arise, Move, and appear before the Covenant of his mouth, which he hath sworn unto us in his Justice. Open the mysteries of your Creation, and make us partakers of undefiled knowledge.

The Enochian Alphabet

Now, let's look briefly at the Enochian alphabet, which consists of twenty-one characters. The angels tried to guide Kelley in drawing this Enochian alphabet but were not successful. Therefore, they did the following. The angels caused the Enochian characters to appear on Kelley's paper in a light yellow color. Kelley would then take his pen and trace the letters. Once done, the yellow glow would disappear, and Kelley was left with his ink tracing.

One of the reasons (there are possibly more) that the angels gave Kelley and Dee this alphabet was so that they could translate the letters

Figure 7.1. The twenty-one characters of the Enochian alphabet. This alphabet, which Kelley traced, appears on the last page of the Book of Enoch (i.e., the tables). I've redrawn these letters with our alphabet on top and the name of each letter underneath.

and numbers in the tables into Enochian, as they instructed. However, and as we know, this apparently was never done. Language experts, who have studied the Enochian words, concluded that the Enochian language has a grammar and syntax all its own.

One character (that looks like a Z) represents a different English letter by putting a dot next to it. Also, four of the letters represent more than one English letter. Thus, we have equivalents for all twenty-six letters of the English alphabet. Anything written in these characters can be translated into the English alphabet. Enochian is read from right to left like Hebrew. For example, the Enochian word shown in plate 11 of the color insert can be translated into English as BAPPOMGEL. (If you want to have some fun, try constructing your name with the Enochian alphabet!)

Now let's get back to the Calls. As we now know, eighteen Calls were initially given to Kelley and Dee. It was then made clear to them that the Nineteenth Call would be unique in that it was only to be used to generate thirty additional Calls. It was these thirty additional Calls that would be used to enter each of the thirty Aethyrs or heavenly realms. Thus, the first eighteen Calls plus the thirty Calls generated from the nineteenth would total forty-eight individual Calls ($18 + 30 = 48$).

The Generation of the Thirty Calls

How the thirty Calls were generated from the Nineteenth Call is very simple. One word, at the third place in the Nineteenth Call, was changed thirty times. This third word was the specific name of one of the thirty Aethyrs or Heavens that the Call would open up. Thus, each of the thirty Calls of the Aethyrs are identical except for one word.

Let me give an example. The first two words of the Nineteenth Call are "Madriax dspraf." The third word is the specific name of one of the thirty Aethyrs. The name of the First Aethyr is "LIL," the Second is "ARN," and so on. So if you were going to generate the Call for the First

Aethyr, you would say: “Madriax dspraf LIL . . .” and continue with the rest of the Call. To generate the Second Call, you would substitute the name of the Second Aethyr, which is ARN, in the third place; thus, “Madriax dspraf ARN . . .” The rest of the thirty Calls are generated the same way—by substituting the name of the specific Aethyr in the third place of the Nineteenth Call.

As we know, each Aethyr is ruled or governed by specific angels called governors. The angels had given Dee and Kelly the names of the ninety-one governors of the Aethyrs about two months earlier on May 21, 1584, by pointing to the letters on the table or on the globe:

EK: Now he standeth on the top of the Table.¹⁵

I assume that the angel is either pointing to the letters on the table or on the globe as he usually does.

Each Aethyr has three governors except for the thirtieth, which has four. Thus, we have a total of ninety-one angels, or governors, ruling the thirty Aethyrs ($4 + [29 \times 3] = 91$). These angels or governors are sometimes called princes. The angels have said that each Aethyr is divided into three areas or parts, and each of the three parts is ruled by one of the three governors of that Aethyr (except for the Thirtieth Aethyr, which is divided into four parts and has four governors). The angels also point out that each of the ninety-one areas comprising the thirty Aethyrs corresponds to or has a relationship with a specific location on earth.

The angels gave more specifics regarding these governors. The ninety-one governors are spirits of the air element. Also, their powers are not all equal, and their mansions or realms are not all alike. They are ruled by the twelve tribes of Israel, who are, in turn, ruled by the seven angelic beings before the throne of God. This is explained by the angel Nalvage:

Those 30 are the Calls of . . . Princes and spiritual Governours, unto whom the Earth is delivered as a portion. These bring in and again . . . Kings and all the Governments upon the Earth, and vary the

Natures of things: with the variation of every moment; Unto whom the providence of the eternal Judgment is already opened. These are generally governed by the twelve Angels of the 12 Tribes: which are also governed by the 7 which stand before the presence of God. Let him that can see look up; and let him that can hear [sic], attend; for this is wisdom. They are all spirits of the Air: not rejected, but dignified; and they dwell and have their habitation in the air diversely, and in sundry places: for their mansions are not alike, neither are their powers equal. Understand therefore, that from the fire to the earth, there are 30 places or abidings: one above and beneath another: wherein these aforesaid Creatures have their abode, for a time.¹⁶

Books on Enochian Magic contain the specific name of each Aethyr, the governors of those Aethyrs, the regions on earth associated with each governor, the tribe ruling each governor, and the angel of the presence ruling those angels of the tribes. Some tables also give the number of ministers under each angel of the tribe, the compass direction where each angel of the tribe resides, and the name of the angelic kings ruling the twelve tribes. We will not be concerned with most of this information but only the names of the governors and the specific Aethyrs that they rule. (If you're interested, Lon Milo DuQuette's book, *Enochian Vision Magick*, contains all of this information.)

Now that Dee had the forty-eight Angelic Calls, which included the thirty Calls of the Aethyrs, what did he do with them? There is no indication that he actually practiced angelic magic and used the Calls to enter the Aethyrs and communicate with the governors of each Aethyr. There are some statements by the angels that seem to imply he was not supposed to use any of this until they gave him permission or the time was right. Some scholars believe this knowledge was meant for a future time or generation. Others believe he did practice it and either didn't record it in his diaries, or these diaries were lost or destroyed. I personally believe Dee practiced this type of magic, especially later in

his life, and that he did explore the Aethyrs and communicated with the governors.

I find it interesting that the angels in the above quote say that their powers are not equal and their mansions are not alike. This is important in our meditation since we will discover that each governor has a unique presence, which I call a flavor. Also, the mansions have different locations within each Aethyr. It's known by magicians and occultists that there are spirits of the different elements: fire, air, water, and earth. For some reason, all of the ninety-one governors of the thirty Aethyrs are comprised of the element of air.

As we know, the angels further explained to Dee that the thirty Aethyrs or spiritual worlds surround our physical realm. Each one penetrates higher and higher into the spiritual realms toward God. It's the goal of humans to traverse these Aethyrs, starting with the lowest and moving to the highest. The angels called the lowest, most physical Aethyr (the closest one to the earth) number thirty. As one moves higher into the spiritual dimension, one approaches "one," which is the highest spiritual Aethyr one can enter, and this is the closest one to God.

A word should be said about the first eighteen Calls, which we won't be using. We really don't know for sure what they activate or who they invoke, but since the time of Dee, many magical groups and practitioners have formed their own theories about this. It does seem that these eighteen Calls are associated with accessing the unseen elemental world (the unseen spirits associated with the elements of fire, air, earth, and water) and are used to contact the angels and spirits residing there.

If you would like to learn more about this, I would again refer you to Lon Milo DuQuette's book.

Let's now move on to the actual practice of the Enochian Meditation.

8

HOW TO PRACTICE THE ENOCHIAN MEDITATION— A PRACTICAL GUIDE

This chapter will be your instruction manual on how to carry out your own personal Enochian ritual or, as I prefer to call it, the Enochian Meditation. You will learn its proper preparation, how to perform it, and the procedure to properly end it. You may want to read the entire book before you begin this meditation so that you will understand all of the variables involved. On the other hand, you may be more open and not want to be influenced by reading the experiences of others before you try it for yourself. You decide.

Specifics on the Enochian Meditation

Why do I use the term *meditation* instead of *ritual*? I personally don't like the word *ritual* since it conjures up individuals in black robes using lots of elaborate equipment. I don't believe my technique fits into this category—it's essentially a magical meditation. Thus, I believe it's best described as the Enochian Meditation since, after all, it's a meditation using Enochian Magic. I will continue to refer to it as Enochian Meditation, or EM for short.

In my thirty years of spiritual searching and after having read hundreds of how-to books on meditation, psychic development, contacting your guardian angel, astral projection, psychometry, magical path working, and scrying (to name just a few subjects), I've never found any psychic or magical technique that really worked for me, except for the technique described in Lon Milo DuQuette's book, *Enochian Vision Magick*. I think the basic problem is that many of the techniques in the how-to books are just too complicated, take too long to learn or develop, and require props and apparatuses. I've tried many of the Golden Dawn and OTO rituals on my own and have bought books on popular or do-it-yourself magic and tried their techniques as well. I've also received personal guidance by several experienced magicians. All in all, except for a few isolated instances, I didn't achieve any significant or notable results with any of these methods.

Most people want something that's easy to do and effective right away. That's why I developed the Enochian Meditation technique. It uses no ritual equipment or props, except this book and a candle (which is optional). You should be able to accomplish the process in about thirty to forty minutes and, hopefully, get results the first time you do it. I had results my first time and continue to get results almost every time I do the technique.

I know that not everyone may experience the same outcome. No technique will be 100 percent successful for every reader, but I do believe my technique has a higher probability of working than any other magical technique available. I also believe that simplicity is the key to any successful technique, and given this, I don't think I could have developed a simpler or more efficient process.

Simplicity seems to be a universal theme in the field of science. Physicists believe that, if a unified field equation is ever developed (an equation that mathematically describes all the forces in nature, large and small, such as gravity and quantum mechanics), it will be a short and simple one. Most of the greatest equations in physics and mathematics are simple and elegant. I'm thinking specifically of Einstein's General

and Special Theory of Relativity, Newton's equations, and Maxwell's equations, to name just a few. Get a good general physics book, look these up, and you will see what I mean.

The greatest equation with the greatest simplicity is the Pythagorean Theorem. As you may recall from high school math, this theorem dictates that the square of the length of the hypotenuse of a right triangle equals the sum of the squares of the lengths of the other two sides. Pythagoras was also a mystic, and it's no wonder that he's credited with the discovery of this simple and most important relationship in geometry. Lon Milo DuQuette, an authority on Enochian Magic who wrote the foreword to this book, told me that even if you have almost no ability for magic, you can get results with Enochian Magic; it's that powerful!¹ That was good news for me since I've always felt that I fit in the "no ability for magic" category. He also told me that in his many years of using Enochian Magic, he had never experienced any negative side effects from practicing it.

I've been doing Transcendental Meditation for more than thirty years, and the first time I performed the Enochian Meditation, I experienced a more profound and deeper trance than I ever had experienced while doing TM. I was once monitored with physiological equipment during my TM meditation, and the equipment documented a drop in my heart rate, body temperature, lowering of brain wave amplitude, and other physiological effects consistent with deep rest and a lowering of the body's metabolism. It has also been shown that TM produces an increase in alpha brain wave activity, signifying deep rest and relaxation. This is a unique state and doesn't usually happen in sleep, hypnosis, a coma, or any other known state of consciousness.

In fact, I feel I go into a much deeper state, more quickly, with the Enochian Meditation. I've not had my physiological variables measured during a Enochian Meditation, but I hope to be able to test this in the near future. I continue to use both Enochian Meditation and Transcendental Meditation; each one has a different value for me.

The Enochian Meditation also seems to give one an unusual

amount of energy. You may go into the meditation a little tired or fatigued and come out of it refreshed and full of energy. This makes sense because you're touching the source of your being, which is God. It renews you and energizes the physical, mental, and spiritual bodies of which you're comprised. It makes sense that, if you're contacting your deepest spiritual being, it will reflect in other realities, in the mental and physical worlds. Remember the saying "as above, so below"? I like to rephrase it like this: "as in our inner spirit body or innermost being where God dwells, so in our physical and mental bodies."

Anyone with psychological problems should not attempt to perform magic. Too many people have gotten into trouble this way. They should first resolve their issues with the help of a licensed psychologist or psychiatrist. You must have a stable mind and, in a sense, a normal psyche to do magic. In fact, Israel Regardie, one of the most famous of the Golden Dawn magicians, felt that someone should undergo a long period of counseling before they even begin the practice of magic.

I've mentioned that some of the most common experiences of God's Meditation are the feelings of peace, calm, and balance. I think balance is the key to spiritual enlightenment. When we're balanced—physically, mentally, and spiritually—we escape the bounds of time and creation and exist in the timeless presence of God. The Eastern religions call this liberation or the attainment of nirvana. The Buddha called it "The Nothingness." In Zen, it's referred to as absolute stillness. Some in the West call it cosmic consciousness. Other religions have different names for this experience.

It's really a balance between positive and negative. Visualize a seesaw with positive on one side and negative on the other. The goal is to be in the center, at the fulcrum, detached and free from the bonds of space and time. I believe God is at the center of this fulcrum, and when we're perfectly balanced, we're one with him and have reached our spiritual goal. Through the ages, many techniques have been developed to

achieve this balance; these include meditation, contemplation, prayer, yoga, Zen, and numerous other religious, mystical, and occult practices. (Please see plates 12 and 13 of the color insert for illustrations of balancing tools.)

I believe magic is one of the best and most natural God-given means to accomplish this balance, and that's why I wrote this book. The meditation contained herein attempts to recreate this balance for its participants. As we go through the thirty Aethyrs, perhaps each one will balance a certain aspect of our spiritual nature. Could it be that the goal is to center ourselves in all these Aethyrs and balance all of them simultaneously? As each Aethyr becomes balanced, we move closer to the point where only God is present.

I need to reiterate a primary theme expressed throughout this book. The purpose of magic—and, in my opinion, its only purpose—is to experience God and his good angels, to become close to him, and to experience his love, presence, and light. Magic is a spiritual technique to put us in touch with God, who resides in our innermost being. As such, it's a gift from him to help us on our spiritual path and journey toward him. We don't have to travel anywhere to find him. We just need to go deep within ourselves to make contact with him.

I want to point out that the Enochian Meditation parallels many of the procedures of a church service. There are opening and closing prayers, readings, and meditations. There are other very interesting parallels that you will experience for yourself. I guess in a way this meditation is my form of going to church, but it was only after many months of practicing it that I realized the similarities. The big difference is that to me, this is my *real* church, since I'm coming in contact with God directly and experiencing his being for myself.

In the Enochian Meditation, there are thirty Aethyrs we can explore, one by one, by conducting separate sessions for each one. The usual procedure is to start at the Thirtieth Aethyr (the lowest or closest to the earth and farthest from God) and work your way up to the

First (the highest one spiritually or the one that's closest to God). We may not be able to enter all of them, and how far we get may depend on our level of spiritual development and awareness, which is as it should be.

After further spiritual development, perhaps we can go further and continue on our path. We're all different and are at different places in our spiritual ascent toward God. Don't rush anything. Also, please refer to the CD that accompanies this book for specifics on different parts of the meditative procedure, including the correct pronunciations of the entire Enochian Call.

Even though I believe the following meditation is safe and helpful, I want to state that the author and the publishers of this book are not responsible for the effects or results of this technique. I suggest that you be sure to follow the correct procedures. Also, please know that this meditation isn't necessarily for everyone; you have to decide whether or not it's right for you. The minimum criteria are that:

- You don't have any physical or mental problems that could interfere or cause any problems for you.
- Your purpose in doing this is to become closer to God and to experience his peace, knowledge, and wisdom—and not for any selfish, material reason.
- You follow the specifics of the procedure and learn them well before you attempt to modify it to your own individual needs.

The entire meditation should take thirty to forty minutes if it's not rushed. It should be done with devotion and love. I like to think that I'm on holy ground when I do it.

The Lesser Banishing Ritual of the Pentagram

You will perform the Lesser Banishing Ritual of the Pentagram both before and after the Enochian Meditation. As stated earlier, employ-

ing the LBRP is a way to purify your environment and protect yourself from any negative energies or entities.

The LBRP only takes a few minutes to do. It's extremely important that, as with any magical procedure, you treat the LBRP with respect and reverence. You're dealing with forces that we know little about. Just because your motives may be pure doesn't necessarily protect you from its consequences. I will give you an example using electricity as an analogy. To use, experiment with, or tap the energy of electricity, you have to know how to handle it properly and safely. You may have good intentions, but if you put your finger in a wall outlet, you will be electrocuted. In a similar fashion, just because you have good intentions with regard to magic doesn't mean you'll be safe. This is a misconception that many people have.

The LBRP is so ancient that no one really knows where it originated; it has lasted through eons of time because it's so effective. Almost every time I do the LBRP, I feel extreme peace and quiet, and the atmosphere around me seems pure.

An interesting effect is that after you perform the LBRP, your mind seems to quiet down too; there isn't a constant chatter of thoughts going on. After performing it, I always feel as if I've taken a bath in the light, love, and purity of God. I feel the peace of the universe, the oneness.

The Enochian Meditation—Step-by-Step

The meditation is divided into three parts as follows.

Part One—Preparation and Preliminaries

This consists of the initial setup of the area you will be meditating in, the conducting of the preliminary visualizations and prayers, and an enactment of the Lesser Banishing Ritual of the Pentagram, which is comprised of the Kabbalistic Cross and the Pentagram of White Light. This normally takes five to ten minutes.

Part Two—The Enochian Meditation Itself

This consists of reading aloud the entire Enochian Call and meditating on the governors' names (the angels in charge of the Aethyr you're trying to enter, experience, and explore). Reading the Enochian Call out loud is the main thrust of this meditation. (I suggest you don't meditate longer than fifteen minutes at first. You can increase the time after you feel comfortable with the procedure.)

Part Three—Ending the Meditation

This consists of thanking the governors or angels, reading the License to Depart and the final prayer, and performing the Lesser Banishing Ritual of the Pentagram. This usually takes about ten minutes.

THE ENOCHIAN MEDITATION

Part One—Preparation and Preliminaries

Seat Yourself Comfortably in a Chair Near a Lighted Candle

Find a quiet place where you will not be disturbed by anyone or by any phone calls. Sit comfortably in a chair and place a lighted candle near you. (Make sure the candle is in a stable position where you can see the flame clearly at all times and where it will not fall or cause anything near it to catch on fire; never leave a candle unattended.) The candle helps you visualize the Light of God and connects you to that light.

Take a Few Minutes to Relax and Pray

Look at the candle. Think of God and his presence within you. The light from the candle symbolizes the Light of God and connects you to him. Be natural and approach this effortlessly. Don't force any thoughts or feelings. This is a time to take a few minutes to settle down and realize that you're doing this meditation to be present with God and the angels and to experience higher spiritual realms. Recite the psalms and Dee's prayer or make up your own. If you're a member of another denomination, you

may choose to read something from your holy book or your prayer book. Everyone is different and has different spiritual needs, so do whatever feels best for you.

Perform the White Light Visualization

Say the following to yourself and visualize the light (close your eyes to visualize better):

May the white light surround me.

May the white light elevate me and put me in touch with my spiritual guides.

May the white light connect me with the Divine Light, the Light of God.

Repeat Dr. Dee's (Modified) Prayer

(This is optional; if repeated, it should be read silently)

O God, I most humbly beg your Divine Mercy to send me the help of some pious wise man and expert philosopher. And if no such mortal man is now living on earth, then I beg you to send me from Heaven your good spiritual ministers and angels, namely Michael, Gabriel, Raphael, and Uriel, and any other true and faithful angels of yours who may instruct me.

Do the Lesser Banishing Ritual of the Pentagram

(Do this standing and read the words out loud)

First you will first do the Kabbalistic Cross, and then you will construct the Pentagram of White Light. (The Kabbalistic Cross is similar to the sign of the cross, but the words and directions are different.)

The Kabbalistic Cross

- Stand facing east.
- Visualize the Light of God coming to you and just hovering over your head in a dazzling radiant ball of light.

- Reach up with your right index finger and, touching this ball of light, bring it to your forehead and touch your forehead.
- Say or chant: AH-TEH (Unto Thee . . .).
- Move straight down and touch your chest or stomach and say or chant: MAL-KUTH (. . . the Kingdom . . .). (As you move your finger to each part of your body, visualize the white Light of God moving with you, and at the end, you will have a large cross over your body from the white light.)
- Touch your right shoulder and say or chant: VEE-GE-BUR-AH (. . . and the Power . . .).
- Touch your left shoulder and say or chant: VEE-GE DU-LAH (. . . and the Glory . . .).
- Finally, bring your hands together in front of you like in prayer and say or chant: LE-OL-LAM (. . . Forever . . .).
AH-MEN.

(I would suggest chanting as it gives this ritual more life and energy. Also, do not repeat the English translations of the words given above in parentheses. This is just for your information.)

The Pentagram of White Light

- Facing east, trace a pentagram in the air. The size doesn't matter, but I usually make it on the large side. I can visualize it as a white, vibrant, dazzling light, or a blue flame (whichever you can see more easily). As illustrated in figure 8.1 below, start at the lower left side of the pentagram and move in the directions indicated in the figure.
- When the pentagram is complete, thrust your right index finger (which you're using as your magic wand) in the center of the pentagram and say or chant: YOD-A-HAY, VAV-A-HAY.
- Turn and face south.
- Make the same pentagram again in the air (starting at the lower left side) and, when completed, thrust your right index finger in the center and say or chant: AH-DO-NAI.

Figure 8.1. Start at the lower left corner and trace the pentagram in the direction indicated until you come back to the starting point.

- Turn to the west (notice you're going around a circle in a clockwise direction), trace the pentagram, and when completed, thrust your right index finger in the center and say or chant: E-HI-YAY.
- Turn to the north, trace the pentagram, and when completed, thrust your right index finger in the center and say: AH-GA-LA.
- Turn to the east, and don't trace a pentagram but just thrust your finger in the center of the pentagram you traced initially, thus completing a closed circle of four pentagrams, each one facing a cardinal direction (east, south, west, and north). Visualize this circle and the pentagrams as a vibrant light surrounding and protecting you. These four incantations are names of God.
- Still facing east, stretch out your arms in the form of a cross and chant the following:
Before me: RA-FAY-EL.
Behind me: GA-BRE-EL.
On my right: ME-CHI-ALE.
On my left: UR-REE-ALE.

(You're summoning the four archangels of God—Raphael, Gabriel, Michael, and Uriel—for protection.)

- Keep your arms outstretched and continue by saying:
Before me flames the pentagram.
Behind me shines the six-rayed star.
- Repeat the Kabbalistic Cross once more, and you're now done with the LBRP.

After you have completed the LBRP, remain standing and pause for a few minutes. Just soak in the peace and calmness and then sit down.

Part Two—The Enochian Meditation Itself

Read the Entire Enochian Call Below Out Loud

(Please note that the correct pronunciation of the Enochian Call in its entirety is repeated on the CD accompanying this book.)

If this is the first time you're doing this meditation and you want to begin in the Thirtieth Aethyr (which I strongly recommend), you will be saying the name of the Thirtieth Aethyr (TEX) after you say "Mā -drî -iax Ds praf" (as I've indicated below)—and then you will continue reciting the entire rest of the Call out loud. Because it acts like a mantra, therefore, it is most effective if you recite it out loud. You can chant it if that makes you feel more in tune with it. The words are broken into syllables, and pronunciation marks are added to indicate long and short vowels. (Note: The straight line above the vowel indicates a long vowel: ā ē ī ō ū; the caret symbol above the vowel indicates a short vowel: â ê î ô û.)

The Enochian Call (The Call of the Thirty Aethyrs)

Mā -drî -iax Ds praf (Name of Aethyr, i.e., TEX) ch(k)īs Mi-cā-olz Sa-ā-nir Ca- ōs-go, od fī-sis Bal-zi-zras Ia(ya)-ī-da, Non-ca(sa) Go-hū-lim, Mic(Mīk)-ma A-do-ī-an Mad, I-ā-od Bli-ōrb, Sâ-ba-o-o-ā-ô-na ch(k) īs Lu-cīf-ti-as pe-rīp-sol, ds Ab-ra-ās-sa Non-cf(sf) Ne-tā-â-ib Ca-os-gi od Ti-lb Ad-phaht Dām-ploz, To-ō-at Non-cf(sf) Gmi-cāl-zô-ma L-rāsđ Tōf-glo Marb yār-ry I-doi-go od Tor-zulp Ia(ya)-ō-daf Go-hōl, Ca-ōs-ga Ta-ba-ord Sa-ā-nir od Chris-tê-os Yr-pō-il Ti-ō-bl, Bus-dir ti-lb No-aln pa-id ors-ba od Dod-rm(rum)-ni Zyl-na. El-zāp-tilb Parm-gi pe-rīp-sax,

Yol-cam pri-ā-zi Ar-co-a-zior. Od quasb Q-ting. Ri-pīr pa-a-oxt Sa-gā-cor(kor). vm-L od prd(pur)-zar ca-crg(cōrg) Aoi-vē-â-e cor-mpt. Tor-Zu, Za-Car, od Zam-Ran aspt Sib-si But-mô-na ds Sur-zas Tia Bal-tan. Odo Cicle Q-ā-a, od oz-az-ma pla-pli lad-nâ-mad.

Meditate with the Governors' Names

When you have finished reading the Enochian Call, repeat the names of the governors of the Aethyr you're working in out loud or silently (which I prefer). Start with the higher numbers first. Thus, if you're opening the Thirtieth Aethyr, you will pronounce the names of each of the four governors—beginning with the ninety-first governor (Dozinal), then the ninetieth (Advorpt), then the eighty-ninth (Gemnimb), and then the eighty-eight (Taoagla). All four of the governors belong to this Thirtieth Aethyr (all of the other Aethyrs have three governors). Close your eyes and use whatever method you feel most comfortable with. You can move from one angel to the next when you feel moved to do so. I usually dwell on the name of one governor for a few minutes or longer and then go to the next one for a few minutes. If you need to open your eyes to read the names of the governors in the book, that's fine. (Eventually, you will know them by heart and not have to refer to the book.)

Stay with one Aethyr for each session. For example, don't mix the governors of the Thirtieth Aethyr with those of the Twenty-ninth. Also, you don't have to use the governor's names as a continuous mantra. I like the example of going into a room and calling out the name of a friend. You keep calling him until he comes to you, and then you don't need to call

his name anymore. When I feel the presence of a governor, I usually stop repeating his name.

However, if you want to keep repeating them, that's fine, too. I've done it that way and it's very effective. This is your personal meditation, and you need to experiment to see what's right for you.

Names of the Ninety-one Governors of the Thirty Aethyrs

I have opted to *not* include the pronunciations of the governor's names on the CD that accompanies this book. This is because there is a little less definition as to exactly how they should be pronounced. Another reason is that it is better for people to arrive at the correct pronunciation themselves. If you are not pronouncing the angel's name correctly during your meditation, believe it or not, the angel will impress upon you the correct pronunciation. That's why I would rather leave this up to you.

Note: The straight line above the vowel is a long vowel: ā ē ī ō ū; the caret symbol above the vowel is a short vowel: â ê î ô û.

Part Three—Ending the Meditation

When you're done repeating the names of the governors, take a few minutes to relax and come out of your deep rest.

This is important since your body has been in a deep physiological state for fifteen to twenty minutes, and you need at least two or three minutes to readjust. Just stop thinking of the governor's names, and you will gradually come back to your normal state. You can also thank the spirits mentally for their help.

Thank the Spirits (using your own words)

Thank the governors for appearing to you, spending time with you, and guiding you through their domain or Aethyr. You would do this for any friend who showed you around their town after a visit. I usually do this silently, but you can do it out loud if you prefer. Use your own words of thanks, whatever feels right to you.

License to Depart (Read silently or out loud)

O spirits (name the governors; here, for instance: Dozinal, Advorpt, Gemnimb, and Taoagla), because you have been very ready and willing to come at my call, I hereby license you to depart to your proper place. Go now in peace and be ready to come at my call when requested. May the peace of God be ever continued between you and me.

Final Prayer

You can make up your own prayer, thanking God or saying whatever you feel moved to say.

Do the Closing Lesser Banishing Ritual of the Pentagram

(Stand up and say it out loud)

Sit down and rest for a few minutes before you get up and resume your activities.

Recommendations for the Enochian Meditation

Keep a Diary

Almost all magicians keep a diary, and I strongly suggest that you do too. After each session, write about your experiences, noting anything unusual or significant. This also allows you to chart your progress. (If Dr. Dee had not kept a diary you would not be reading this book!) You may discover something important for yourself or for others in the future. At the very least, you should record the date, the time, what Aethyr you've explored, and the results achieved. If you experienced any visual images or sounds during the meditation, record those as well. Believe me, you will forget everything very quickly, and it's important for you to have a record. (I used to use a digital recorder at the end of my sessions because sometimes so much happened I wouldn't get a chance to write it all down before I forgot it!)

Go Slowly

Go slowly and enjoy the meditations. Don't try to analyze them while you're meditating. Just experience them—you can analyze them later on. It may take time to experience the Aethyrs in their fullest sense. But this makes sense. If you're exploring a new area or region, you're not going to see everything there is to see the very first time. You also need to adjust to the new environment and begin to use your new senses. Some people don't experience visual phenomena but may feel the presence of *something*. You may have different experiences in the same Aethyr at different times. Again, everyone is unique; enjoy this new adventure.

I would suggest that you stick with the procedure as I've outlined above for the first couple of weeks or longer. You can then modify it to suit your personal needs if you wish. Remember, magic is a science and an *art*. You're the artist, so tailor your meditation to suit your own personality.

Conform the Meditation

If you're in a place where you need to be quiet, you can do the entire meditation in your mind, even the LBRP. After you have performed the LBRP for many months, you will start to develop the ability to do it silently. You will not have to stand up and physically make the pentagrams and move around to each of the four directions in order to complete it. Just sit with your eyes closed and visualize your movements and say the words silently to yourself. In fact, I find this method to be just as powerful as when I say them out loud, but this only happened after I did the exercise for some time—after its archetypal pattern has been established on the astral plane. It was after almost six months of doing the LBRP out loud that I was able to do it mentally with the same effect.

Be Persistent

Israel Regardie, one of the most famous of the Golden Dawn magicians, said that persistence is the most important trait to have when practicing

magic. So don't give up. As I've stated earlier, we all have different gifts and reach different levels at different times—don't compare yourself with others. You're a unique spiritual being. The Sufis say that there are as many paths to God as souls. God's Meditation is one of those paths, and I believe it is a very simple and effective one. There are also many variations you can do in this meditation so be unique and creative because you're the artist. The possibilities are infinite.

In the next chapter, I will answer some questions and concerns that may have come up for you during this meditation.

9

EXPECTED RESULTS AND RECOMMENDATIONS

I originally was not planning on including this chapter, but as I was completing the book, I realized many people may have specific questions about the meditation after having tried it, so I will try to anticipate these questions.

Questions and Comments

First, it's important to realize that every person is on their own unique spiritual path. As we process information through our physical and spiritual bodies, the information is clouded, colored, and altered by our personal makeup and experiences. We also have different abilities and talents, in both the physical and spiritual worlds. Some people may have the gift of seeing visual phenomena from the spiritual world; others may be able to hear sound; and others feel emotion. I'm not good at visualization so most of my experiences in the Aethyrs involve being aware of changes in my states of consciousness, subtle sensations, information and knowledge flowing in from a higher level, and a type of sensation which I call flavors.

Each Aethyr and each angel has a flavor of its own that I can identify; it's a repeatable phenomenon. For example, in our physical

world, we recognize someone or a specific place by the sight, sounds, smells of that person or place. This is its flavor. Whenever you encounter this place or person again, you immediately recognize it by its flavor. It's similar in the spiritual world but occurs on a higher spiritual level.

Another question that arises is: what if you feel uncomfortable during the process, or you feel negative energies? This has never happened to me, but my suggestion would be that if it happens to you, and if you're a Christian, say the name of Jesus three times. Many years ago, I was involved with some occult experimentation, and I felt a high level of negative energy coming at me. I had memorized the 101 names of God and repeated them. Nothing happened until I said the name of Jesus, and the negative energy went away. I was not a Christian at that time, but it made me realize that the name *Jesus* is so powerful that it helps no matter what your faith or belief may be.

I have to say that, since that time, I've developed a new understanding of the Cosmic Christ. If you follow a different belief system, use the name of a deity or a holy word appropriate to your beliefs and religion, and repeat it three times. Many times, in actual fact, there is no external negative energy; rather, it's being generated by our own minds and is of our own creation. These uncomfortable feelings may arise because the new sensations we're invoking are foreign to our everyday feelings and experiences. If this should happen to you, you now have an effective way of dealing with the situation.

It's possible that unusual physical phenomena may occur during or after your meditation. It's not a common thing, but it has happened to me on several occasions. It was not frightening but actually very inspiring and uplifting. Since you're involved with energies in the higher spiritual realm, they may affect some changes in the physical realm, which you have no control over. Again, this isn't anything to be concerned about. Maybe there is a lesson or message that the angels are trying to give you, and it may be one that's very enlightening.

One question that's often asked of me is: if we're entering the

Aethyrs and communicating with only the good angels, why do we need a License to Depart and a LBRP? That's an excellent question, and as I mentioned before and as far as I know, Dr. Dee and Kelley never used the LBRP or a License to Depart in *their* rituals. I use them for several reasons. It makes me feel that I'm on holy ground, and I want to be in this frame of mind when I undertake my Enochian Meditation.

The White Light Visualization is a technique that's also known to work for spiritual protection. As mentioned earlier, I use both it and the LBRP. You can use your judgment as to which to use, but I would at a minimum always use the LBRP before and after any Enochian Meditation or magical ritual. I like to also use the License to Depart as it acts as closure for the meditation. You're basically telling the angels that you're done with the session and they should leave and not interact with you anymore. It's also respectful to the angels because in a sense you're telling them goodbye for now, that until the next encounter, you will go back to your world and they to theirs.

If you don't experience results after you've tried the Enochian Meditation several times, wait a few days and try it again. Sometimes we're not ready—either mentally or spiritually—for certain techniques. I also must emphasize that you should not be under the influence of alcohol or drugs (except for prescription drugs) during this meditation. This meditation should be done with a clear mind.

I recommend that you do it alone in a room by yourself, someplace you will not be disturbed. If you're going to have a conversation with a close or intimate friend, you don't want to be disturbed—you want to be able to give that person your full attention. How much more so when our conversations are with angels and God? To avoid interruptions, I put a "Do Not Disturb" sign on my door, turn off my cell phone, and take my landline phone off the hook as well.

I don't know if anyone entering the room during a meditation that you're undergoing would be affected by your meditation. My feeling is that they probably wouldn't, but it would disturb *your* deep state of rest. In any event, I like to be safe and not expose anyone to any unnecessary

energies they may not be prepared for. Again, we're not invoking evil angels, but we're experimenting with forces we don't have all the answers about.

What if there's an emergency and you have to stop in the middle of the meditation? Attend to the interruption, and when you come back, do the White Light Visualization or the LBRP and continue where you left off. (Of course, also repeat the LBRP when you close.) Remember, you're not surrounded by evil beings who want to harm you. You're doing something that's helping your spiritual development, with the assistance of good angels in their heavenly abode.

What I've been doing recently, if I'm interrupted and have to get up and go somewhere during the meditation, is visualize that the white light around me moves with me and continues to surround me no matter where I go. When I'm done taking care of whatever it is that I need to attend to, I go back to my chair and visualize the white light again and continue on where I left off.

I would not do this meditation too late at night since it energizes you and may keep you awake. Also, limit the time in which you meditate with the governors or angels to about fifteen minutes initially. You can increase this as time goes on and you become more comfortable with the process and also your individual reaction to it. I also like to be relaxed for a brief period of time before I do the Enochian Meditation.

It's interesting that, even in my dream state, if I'm experiencing negative forces or sensing negative energy, I can perform the entire LBRP ritual exactly as it should be done. Usually when dreaming our thoughts are fragmented and confusing, but this ritual is so deeply embedded in my mind or my astral body that I can do the entire ritual in my dream state if I need to.

In this book, I have only touched on one aspect of the Enochian Magic of Dr. Dee. The angels taught him other types of angelic magic, and you may want to learn about these also. (Again, I would refer you to Lon Milo DuQuette's book, *Enochian Vision Magick*.) When I first

started practicing magic, I got a very clear message that “everything I do is a magical act.” Our lives should be a constant magical invocation of our higher self, of the god within us. The only purpose of a magical ritual is to awaken this higher self within. If we ask our guides for help, I’m sure they will try to assist us. Every day, ask your spiritual guides and God himself to help and guide you in the right direction so you can ascend on your spiritual path toward cosmic consciousness. Listen to that soft voice within yourself. We must also learn to be patient. All things happen in their due time.

Secrecy is another rule of magic. Sometimes it’s better to keep your experiences or revelations to yourself. When we share them, they may be misunderstood, and you may feel like you have thrown them to the dogs. Remember the biblical verse (Matthew 7:6), “don’t cast your pearls before swine.” I’ve experienced this many times. Often when I’ve had an incredible experience and have shared it with someone, it doesn’t sound right—it doesn’t come out the way I want it to. There are some things that are important to share, but you have to make this distinction and be selective. Share your new wisdom, knowledge, and experience with discretion. Sometimes, if you keep your revelations and insights within you, they simmer and become fuller!

At first you may not feel at home with this magical procedure. That’s okay because over time you will adapt and feel more comfortable with it. In fact, I feel more aware and natural when I’m exploring the higher heavens than when I’m in the physical reality. They are both necessary for our spiritual learning, but the higher worlds always carry the higher reality.

This may not be necessary to say, but you should not believe and accept everything you read, even in this book. Be selective and evaluate everything. Take what is good and reject what isn’t applicable to you. I’ve also discovered that some things that were bad for me years ago are now good for me. We’re dynamic spiritual beings, and we grow and change over time. I like the expression, “You can never go home again.” Once you start on the spiritual path, there is no looking

back. The analogy of Lot's wife looking back and turning to a pillar of salt epitomizes this idea. Once we embark on the spiritual journey, we must keep going until we arrive at the source of the truth, which is God.

Life is a spiritual adventure.

I like the Quote in the *The Candle of Vision*:

Sitting in your chair you can travel further than ever Columbus travelled and to lordlier worlds than his eyes had rested on. Are you not tired of surfaces? Come with me and we will bathe in the fountain of youth. I can point you the way to El Dorado.¹

You will begin to realize that the White Light Visualization and the LBRP, if done on a regular basis, build up residual power and protection and actually remain with you all day long. You don't lose protection when you leave the area where you practice magic. No one ever told me this, but I've experienced it after many, many months of performing these rituals on a daily basis. They always surround you and go with you throughout the day and are your constant companions.

Remember, magic is an art, and you're the artist.

Also, don't expect to receive all the answers. We have just begun our path, at least most of us have, and any revelations that we receive will take time and much effort. We're exploring unknown worlds and realms and have to figure out what to do as we go along. There's no instruction manual, although there are aids in the form of teachers, books, and spirit guides. We're the final judges. We have to decide who to listen to and what to accept.

Always test the spirits because we must be careful that we're not getting advice from a mischievous or evil spirit. That's why it's always important to use your knowledge and intuition when making a decision. Also, things that reflect love, kindness, charity, humility, and goodness are usually from God, but we must be careful. Too many people have gone wrong by thinking God or angels were speaking to

them when it was really evil forces or mischievous beings. This isn't to scare you but to urge you to be careful and judge everything. We do this every day in our physical world, so why not do it in our spiritual world also?

Also, remember to always thank the angels for their guidance and insight as you would thank a friend who had helped you in some way. We should ask in humility and only want what is the will of God for us. If we're not meant to have a certain revelation, we should not push God or the angels for it.

Finally, we must not forget our relationship to others. We're all traversing the spiritual path together, and we depend on one another. Love and charity are the universal law. An angel once relayed to me that "we need to bring you up so you can bring others up." That was the first indication that one of my roles was to write a book to help others find God. But first I needed to do my part to learn and experience what I needed to, in order to teach others. I hope I've done that.

I also like to remember and follow these guidelines that I call my three golden rules of magic; they came to me during one of my rituals:

Be humble in everything you do.

God is in everything.

God is in everybody.

The first guideline allows us to know our place in the spiritual realm and not to take things for granted. Also, realizing that God is in everything makes us walk on holy ground all day long. Finally, realizing that God is in everybody gives us charity and love for our neighbors and our fellow travelers on the path.

Aleister Crowley

This book would not be complete unless I commented on Aleister Crowley, the English occultist and magician who was a member of the Golden Dawn and one of the founders of the OTO. Crowley attempted to enter all thirty Aethyrs and left a written record of his attempt. Crowley first tried to enter the Aethyrs in November of 1900 but didn't get very far. He only entered the Thirtieth and Twenty-ninth and stopped there; he felt they were overpowering. It's interesting that I also couldn't get past the Twenty-ninth Aethyr for many months. I also had the feeling of the overpowering presence of something very holy and thus held back. (Finally, my good friend, Lon Milo DuQuette encouraged me, so I pushed on.)

Crowley made another attempt in November 1909 in the area of the Sahara Desert with Victor Neuburg, an occult associate of his. He continued with the Twenty-eighth Aethyr and worked up to the First. He published his experience in his magazine, the *Equinox*, in 1911 under the title of "The Vision and the Voice" (this article was later published as a book). Crowley's visions are very bizarre to say the least, and he added much unnecessary ritual that Dee would never have approved of. In fact, to my mind, many of the rituals and practices that he used to supplement the Enochian Calls bordered on black magic. Much of Crowley's ritual was completely made up by him. It was unorthodox and would be repulsive to most people.

I *will* give him credit, though, for being one of the most gifted and talented magicians of all time—even though his life and practices were very controversial, and he was dubbed "The Wickedest Man in the World." Aleister Crowley may have come the closest of any one person to understanding the real significance of Enochian Magic. In Crowley's vision of the Twenty-second Aethyr, he describes a table of forty-nine characters. This is the same table that Dee generated from an early angelic communication in which the names of the angels of the seven planetary spheres were given.

When Crowley first saw this table appear, it was surrounded by numerous angels. There was light on the table, and he observed that it burned with an intolerable light that he had never observed in any of the other Aethyrs.² This is an interesting description of Crowley's experience in the Twenty-second Aethyr. I have to say that I also experienced one of the most profound altered states and the presence of God in the Twenty-second Aethyr; it was much deeper than any of the other Aethyrs I've explored.

Crowley's information makes sense in that the angels always stressed the importance of the number *seven* (seven angels), and the number *forty-nine* and its multiples. If Crowley's visions had not been so contaminated by his vivid imagination, perhaps the angels' revelations of the tables would have been more frequent and detailed. Perhaps previous information was blocked, and it may be that this was the only time the real message of the angels came through.

Crowley mentions that the light was extremely intense in the Twenty-second Aethyr. Perhaps it overwhelmed his imagination. Another way of looking at this is to imagine entering a room that you've never been in before, and it's filled with unique furniture and unusual décor. Instead of walking into this room and just observing what is there without bringing anything into it, what Crowley did when entering an Aethyr, in my opinion, was to bring in his own "stuff" and mix it with the other things in the room, leaving his visions clouded with his own preconceptions.

By analyzing Crowley's experiences in each of the Aethyrs and comparing them with our own and those of others, we may be able to see what was actually in the room and not generated from our own perceptions. When different people see and experience similar things in the same Aethyr, the objectivity and independence of that spiritual realm is revealed.

Another interesting difference between my technique and Crowley's is that, after Crowley recited the Enochian Call, he used a topaz to scry and to explore the Aethyrs. This is a method that many Enochian

magicians use today. They employ a scrying stone (usually a crystal ball or black mirror) instead of closing their eyes and meditating like I do. I believe that my meditative technique is more natural than scrying and that more people will have success with it. I've experimented with scrying, with crystals and other objects, during my Enochian Meditation and have not had good results. (See plate 14 of the color insert, which is a photo of a crystal skull; crystal skulls can be used for scrying also.)

I know other Enochian magicians who scry using a black mirror or crystal ball, and they've had good results, but they seem to have an innate ability and talent for scrying. You can try both methods and see what works the best for you. Remember, your abilities are unique so try different things and go with what works for you.

I know from the diaries that Dee and Kelley used scrying to receive the tables and the Enochian Calls. However, there is no indication that once the Calls had been received, they continued to use the scrying technique. Just because this was the method of transmission for Dee and Kelley doesn't mean that this should be the preferred method today. Let me reiterate that I believe that meditation is the most natural and God-given way to communicate with God.

Figure 9.1. A black mirror made and used for scrying by Nick Nocerino, one of the world's foremost experts on crystal skulls.

Crowley also said that anyone with only the slightest capacity for magic will find that the Enochian Calls or Keys will work for them. I intentionally didn't read Crowley's book before I explored the Aethyrs since I didn't want my experiences to be influenced by his. Everyone should rely on their experiences and not those of others; thus, I don't recommend reading his book until you have explored the Aethyrs for yourself. And I can't overemphasize the importance of faithfully keeping a good spiritual diary.

I've already mentioned that initially Crowley had trouble getting past the Twenty-ninth Aethyr, and that I too had this same problem. It's important to realize that you may come to a limit in how far you can go as well. You may not be able to appreciate the higher Aethyrs beyond the particular level you're currently at. You need to follow your inner awareness regarding this. There is no need to race through all the Aethyrs; instead, go slowly and carefully. As mentioned, I spent many months on just the Thirtieth and Twenty-ninth Aethyrs before I advanced further. Everyone is different, and you need to determine your own pace.

Early this year, I began to realize that my task was to bring God's Meditation to the world, and I am thoroughly convinced that God and the angels want to share with everyone how to access the peace and presence of God. My sincere blessings to you—I wish you success on your spiritual path. May the Light of God illuminate all of you in your search and bring you to the final and only true reality, which is the presence of God.

10

HIDDEN REVELATIONS OF ANGELIC MAGIC

It's so interesting how you can look at something 100 times and then the 101st time discover something you never saw before, and you can't believe you overlooked it. This happened to me with the Dee diaries. I was trying to put all the pieces of Dee's Enochian Magic into a completed puzzle, but something wasn't fitting properly.

What Is the Real Function of the Tables?

The question that was nagging me is why did the angels go through all the trouble of creating the forty-eight tables letter by letter, a very time-consuming process, when they could have skipped this step and just given Kelley and Dee the forty-eight Calls directly letter by letter? Is it possible that the forty-eight tables themselves have another role or purpose?

In fact, and as I have discussed before, not all the Calls were generated from the forty-eight tables. It appears that the angels used the system of grid locations and giving the Calls in reverse order only for the first nineteen words of the First Call. Later they seemed to abandon this system—the Calls were given directly, letter by letter, and not in reverse order. With this method, the angel stood on a table and pointed

to the letters on a turning globe or letters directly on a table. I know for certain that the Nineteenth Call, the one used to generate the thirty Calls, was dictated by the angel Illemes standing on a table that had a globe with letters on it. The globe would turn, and the angel would point to the letters on the globe that would form the Calls. The transmission of the Nineteenth Call began on Thursday, July 12, 1584:

Dee: Now in the name of Jesus, as concerning those 30 Calls, or thirty Call, we await your information of Illemese. . . .

EK: Now he standeth as Nalvage used to do, upon the Globe with the rod in his hand: And Gabriel sitteth by. . . .

Dee: In the name of the eternal and everlasting God say on.

EK: Now the Globe turneth swiftly, and he pointeth to letters thus, with the rod which Nalvage was wont to use.¹

This method of the angel pointing to letters on a globe is mentioned several times during the transmission of the Nineteenth Call. This call was transmitted during several angelic sessions. During one session, about halfway through the Call, the globe was mentioned again by Kelley:

EK: Now they appear, and the Table, or Globe with them.²

The thirty Calls of the Aethyr generated by the Nineteenth Call were the most important part of Dee's Enochian Magic, but the tables were not even used for this. That's what bothered me, because the angels had made incredible statements about the forty-eight tables. After the Nineteenth Call is given, Gabriel makes the following statement about the tables:

Gabr. . . . Thus hath God kept promise with you, and hath delivered you the keys of his storehouses: wherein you shall find (if you enter wisely, humbly, and patiently) Treasures more worth than the frames of the heavens.³

From the time I began practicing Enochian Magic, I had not concerned myself with the tables. What would I use them for? What other functions might they have? This is where the missing pieces fall in. First, let's read what I found to be the most important sections in Dee's diaries concerning these tables.

On pages seventy-six and seventy-seven of Casaubon's 1659 edition of *A True and Faithful Relation of What Passed for Many Years Between Dr. John Dee and Some Spirits*, we have the following communications between the angel Nalvage, Dee, and Kelley, which took place on Thursday, April 12, 1584, while they were in Poland. The angel doesn't specify the time period, which this vision describes, but I think it's safe to say it can refer to many different times: times past, Dee's time, and most likely even our own. It's a timeless description of the world and of humanity:

The Godhead in his secret judgment keeping in his Almighty bosom, the image and form of all things, universally, looked down upon the Earth; for he said, Let's now go down among the sons of men: He saw that all things grew contrary to their creation and nature; either keeping their dignities and secret virtues shut up in obscurity, or else riotously perishing, through the imbecility and forwardnesse of ignorance: So that it was said, Behold, I delight not in the World: The Elements are defiled, the sons of men wicked, their bodies become dunghills, and the inward parts (the secret chambers of their hearts) the dens and dungeons of the damned: Therefore I will draw my spirit from amongst them, and they shall become more drunken, and their ignorance such as never was: No, not since the fall of the heavens.⁴

Nalvage is describing how bad and wicked human beings had become. Isn't this an apt description of the world today? Just look around. We're in ignorance of God and his will. He doesn't delight in the world. The "elements," nature and our environment, are defiled. Our atmosphere is polluted, and radioactive waste contaminates our planet. The secret virtues mentioned are our spiritual gifts, which people have ignored and buried. Instead of humans striving after God, we strive after material things and are filled with greed, selfishness, and lust. We keep our secret virtues shut up inside us; we don't use and expand upon our spiritual gifts.

A frightening allusion in the quote above is the comparison between today and the day of "the fall of the heavens." This is a probable reference to the time when a third of the angels rebelled against God and were cast out of heaven and fell to the earth, as described in the Book of Revelation and the apocryphal Book of Enoch:

For, lo, the time is come, And he that's the Son of Unrighteousnesse, is and liveth: Unto him therefore shall be given strength and power: and the Kings of the Earth shall become mad: yea, even raging mad; yea even in the third madnesse, and that in the depth of their own imaginations; and I will build my Temple in the Woods, yea even in the Desert places; and I will become a Serpent in the wildernesses: for I've tucked up my garments and am fled away, and She shall mourn on the Mountains without comfort.⁵

The "Son of Unrighteousness" is the antichrist. We know this since Dee wrote "Antichrist" in the margin of his diary next to this name. What is interesting about this statement is that the angel says, "The antichrist liveth." Does that mean he is alive today and was alive in Dee's time? Maybe he has always been alive and is waiting for the end times to make his appearance. The "Woods" and "Desert places" (he capitalizes them) are our inner being where God dwells in our inner spiritual sanctuary.

Lo, the Thunder spake, and the earth became misty, and full of fogge, that the Soul of man might sleep in his own confusion. The second Thunder spake, and there arose spirits, such as are for Sooth-sayers, Witches, Charmers, and Seducers: and they are entered into the holy places, and have taken up their seats in man. Woe be unto the earth therefore: For, it's corrupted. Woe be unto the earth, for she is surrendered to her adversary: Woe be unto the earth, she is delivered into the hands of her enemy: Yea, Woe be unto the sons of men, for their vessels are poysoned. But even then said the Lord, Lo, I will be known in the wilderness, and will Triumph in my weaknesse.⁶

Perhaps these “Thunders” are related to the seven thunders described in the Book of Revelation. The witches and charmers are, in my opinion, people who practice black magic and don't use magic for its true purpose of spiritual development and seeking God, as Agrippa and Dee wanted it to be used.

... it became a Doctrine, such was never from the beginning: Not painted, or carved: filed, or imagined by man, or according to their imaginations, which are of flesh: but simple, plain, full of strength, and the power of the holy Ghost: which Doctrine began, as man did, nakedly from the earth: but yet, the image of perfection. This selfsame Art is it, which is delivered unto you an infallible Doctrine, containing in it the waters, which runne through many Gates: even above the Gate of Innocency. . . .⁷

This “Doctrine,” or the Book of Enoch (the tables) and the forty-eight Calls are not “painted or carved,” meaning they are not just useless words or scripture but full of the power of the Holy Spirit and of God. They will open the doors to heavenly realms. The phrase “it's delivered unto you” and the use of the word *water* both symbolize spirituality.

The following is the most important message regarding the true purpose of tables:

I'm therefore to instruct and inform you, according to your Doctrine delivered, which is contained in 49 Tables. In 49 voyces, or callings: which are the Natural Keyes, to open those, not 49, but 48 (for One isn't to be opened). Gates of understanding, whereby you shall have knowledge to move every Gate, and to call out as many as you please, or shall be thought necessary, which can very well, righteously, and wisely, open unto you the secrets of their Cities, and *make you understand perfectly that contained in the Tables*. Through which knowledge you shall easily be able to judge, not as the world doth, but perfectly of the world, and of all things contained within the Compasse of Nature, and of all things which are subject to an end.⁸ (Italics mine.)

Thus, opening the gates by using the Calls and going into the cities (Aethrys) allows one to then unlock the forty-eight tables.

The forty-eight Calls allow us to enter the Aethyrs, and once inside, we're taught the secrets of how to read the tables as instructed by the angels. The angels had emphasized that the role of the tables is central, but this had just passed by me. I had been focusing on the Calls exclusively since the tables didn't seem to serve any additional purpose that I could figure out. But apparently one of the purposes of entering the Aethyrs (which the Calls allow us to do) is to unlock our understanding of the tables. I don't know how to do this, but maybe someone else does or will be able to figure it out in the future. (See the epilogue for my experiences with this.)

What's interesting is that in the diaries Dee specifically mentions that, when Kelley was in a trance, he was able to understand the tables. When the trance ended, he had no idea of their meaning. Maybe the trance mentioned is a reference to an altered state of consciousness like that produced with God's Meditation. I will share one of my experiences with regard to this as it may help others solve this puzzle.

The Mysteries of the Twenty-second Aethyr

The following vision took place when I was exploring the Twenty-second Aethyr during my Enochian Meditation. (Remember that this was the same Aethyr in which Crowley received his vision and explanations of the table with the forty-nine squares of letters.) What's significant is that I usually don't get visual phenomena in my meditation, but this time I did. As I was meditating on the governors, I started to get into a very deep altered state, and I strongly felt the presence of God and the holiness of this Aethyr and his angels. The last governor seemed to open up my awareness of the purpose of the tables more completely.

I saw all of the forty-nine tables (not just the forty-eight) floating in space, and it appeared that each leaf was separated from the next one by about an inch. (Remember, the angels had deemed that the First Call and table was not to be shared with humans; that's why I think my vision is so extraordinary.) Then, the hand of God appeared, and his finger brushed or touched the first leaf, and it moved toward the second, and the second brushed the third, and so on and so forth. This was similar to dominos falling in slow motion. As each leaf hit the next one, something like letters or possibly notes came out from the leaves. They were numerous and floated majestically in the air.

A good way to visualize this is if you had forty-nine very dusty pages of a book. If you fanned the book, dust would fly into the air. In this case, it wasn't dust that came out but letters. They moved and floated in a beautiful harmony, almost like a symphony. I knew this symbolized the creation of the universe by God. His finger brushing the first leaf was like the OM Point or the Big Bang, which began everything. His finger was the Word of God (John 1:1). God only touched the first leaf, and as his hand moved or fanned over the rest of the leaves; the wind that he produced from the hand motion moved the rest of them in a domino effect.

This wind represents "The wind of God" mentioned in Genesis Chapter 1. Many bibles translate this section as "The spirit of God"

but that is not correct. The wind was hovering over the deep before creation began. Some people translate the Hebrew word for wind as Holy Spirit. So, if this wind was the Holy Spirit of God, it was now taking over to finish the process of creating the universe. The English word *spirit* used here is translated from the Hebrew word *ruah*, which really should be translated as breath, wind. The religious people involved with the translation tried to imply it was the Holy Spirit but most scholars translate it as wind. In my vision, all three persons of the Godhead were present: the Father, the Son, and the Holy Spirit. Notice that God only touched the first leaf and no others. This is why the first leaf was never given to Dee, and he only received forty-eight and not forty-nine leaves. Since God actually touched the first one, it was too holy to be given to humans.

This vision is consistent not only with Christianity, in that the three aspects of God were present in the creation, but also Egyptian mythology. The Egyptian god Thoth was considered the tongue of God, through which the will of God was translated into speech. He has also been compared to the Logos or the mind of God. In addition, he was the Egyptian god of magic and writing. He was considered to be the scribe of the gods and was credited with inventing the alphabet.

The letters coming out of the pages would be consistent with a cosmology where Thoth ruled as a god. He was the god who originated all things; the Egyptians believed that he was responsible for making all of the calculations for the establishment of the universe, including the stars, the planets, the earth, and everything they contained. It's very interesting that his female counterpart Maat controlled the movement of all things in the universe and was the force which maintained creation—in other words, the wind.

In Crowley's vision of the Twenty-second Aethyr, an angel plays a pipe, and according to Crowley, the music is wonderful. The angel stops playing and moves his fingers in the air, which leaves a trail of fire of many colors. There is some similarity between this and my vision of God moving his finger in the air and fanning the forty-nine tables.

Crowley also seemed to see visions of the creation and dissolution of the universe. In my vision, I only beheld the creation. (Keep in mind I didn't read Crowley's description before I explored the Twenty-second Aethyr.) I was very grateful to the angels for revealing the vision of the Twenty-second Aethyr to me. It was one of the most sublime revelations I have ever received in my exploration of the Aethyrs.

In conclusion, it would appear that the tables are the final key to unlocking the secrets of God. Are we meant to do this during this time of human existence, or will the secrets be unlocked at some time in the future? That's another question I cannot answer.

A Few Last Thoughts

The Angel Gabriel made the following interesting statement:

Thus hath God kept promise with you, and hath delivered you the keys of his storehouses: wherein you shall find (if you enter wisely, humbly, and patiently) Treasures more worth than the frames of the heavens. . . . Therefore, now examine your Books, Confer one place with another, and learn to be perfect for the practice and entrance. See that your garments be clean.⁹

You must be prepared spiritually: as the angel says, "enter wisely, humbly, and patiently." How many magicians take the time to be in the proper state of body and mind before they practice their ritual magic? Are their lives consistent with these characteristics? Do they approach magic with humility and reverence? The phrase "See that your garments be clean," is a metaphor for spiritual cleanliness. Remember that Agrippa pointed out that one's frame of mind and attitude is of the utmost importance in magic.

I want to leave you with an idea that came to me during one of my recent Enochian Meditations. I was asking one of the angels to help me understand the tables, and the angel said to me, "What do the Tables

contain that was not used in generating the forty-eight Calls?" I took out my copy of the tables from the British Library and realized almost immediately that over each table (of the forty-nine by forty-nine grid pattern) was a title in the Enochian language (the meaning of which we have no idea). These titles were not used in generating the forty-eight Calls. Perhaps these titles are a key to something that's waiting to be discovered.

In this book, I have attempted to show that magic is a spiritual practice that helps one to experience God's presence and the higher realms or heavens that are within all of us. Magic is a spiritual path in our ascent or way back to God. The purpose of our existence is for us to become God-conscious, that is, to attain cosmic consciousness. I believe the practice of magic is the simplest and most direct method or means to attain this goal. Both Henry Cornelius Agrippa and Dr. John Dee believed this, and that was their sole purpose in studying and practicing magic. Magic opens up the spiritual world and hence the spiritual path for seekers of God. We attempt, through our practice of magic, to move closer and closer to God as we traverse the higher realms of the heavens.

So, if we sincerely believe the above and are using the practice of magic and magical meditations for spiritual development, then who or what are we?

We Are Mystics!

Mystics are individuals who transcend normal consciousness and are awakened to a higher reality. They experience the direct presence of God and his attributes. The veil is torn, and they now have spiritual vision and understanding. They now know the secrets of nature and feel the oneness of God within them. This experience is one that they never forget, and it can never be put into words, as hard as they may try to. This transcendence brings the true awareness and presence of God—his love, peace, and harmony. It is an infinite blissful or ecstatic

state, which reveals everything and the purpose of everything.

This spiritual illumination is the goal of life. The greatest mystics have tried to write about this experience, and they have given us glimpses. (See the writings of St. John of the Cross and St. Teresa of Avila.) This experience or state is dormant within every person and is just waiting to express itself. The attainment of this state is the birth-right of every individual.

Thus, magic, as I see it, is a mystical path toward God, and we are the mystics on that path.

I would like to conclude this book by reflecting on the words *occult* and *esotericism*. The word *occult* means hidden or secret knowledge. *Esotericism* or *esoteric knowledge* has a similar meaning and refers to knowledge given or revealed to only a select few. I believe times have changed, and now this occult knowledge, of which Enochian Magic is a major part, is to be revealed to the masses and not just to the select few. That's the purpose of this book.

If what the angels say about these tables is true, we're sitting on one of the most important discoveries in the history of humankind: the knowledge and understanding of all things in the universe, the highest mysteries of God that a person can know. It's just waiting to be discovered by someone. The angels made these statements about the tables:

Wherein, they will open the mysteries of their creation, as far as shall be necessary: and give you understanding of many thousand secrets, wherein you're yet but children; for every Table hath his key: every key openeth his gate, and every gate being opened, giveth knowledge of himself of entrance, and of the mysteries of those things whereof he is an inclosure.¹⁰

One is one: neyther is, was or shall be known: And yet there are just so many. These haue so many names, of the so many Mysteries, that went before. . . . O what is man, that's worthy to know these Secrets?¹¹

This boke, and holy key, which unlocketh the secrets of god his determination, as concerning the begynning, present being, and ende of this world, is so reuerent and holy: that I wonder (I speak in your sense) whie it is deliuered to those, that shall decay: So excellent and great are the Mysteries therein conteyned, aboue the capacitie of man. . . . One thing excepted: which is the use thereof. Unto the which the lord hath appointed a day.¹²

The angels told Dr. Dee not to read this book aloud or try to understand it until the appointed time:

God shall make clere when it pleaseth him: & open all the secrets of wsidome whan he unlocketh. Therfore Seke not to know the mysteries of this boke, tyll the very howre that he shall call thee.¹³

Perhaps that time is now?

Epilogue

FINAL DISCOVERIES ABOUT THE TABLES OF ENOCH

As I was coming to the end of writing this book, some important information was revealed to me. Given its significance, I've opted to include it here.

The Key to Reading the Tables of Enoch

My first discovery regarding reading the tables of Enoch occurred when I was exploring the Twenty-second Aethyr in my Enochian Meditation. (As you will recall, this was an important Aethyr for both Aleister Crowley and myself.) I was told by the angel of that Aethyr that the key to the tables is in the first leaf—the one composed of paragraphs of Enochian words, which were supposed to fit into the forty-nine by forty-nine grid patterns.

In the first two tables (unlike the rest—see appendix A) an entire Enochian word would be placed in the cell instead of a single letter, so Kelley had to write out the words in a long string (they would not fit into the small cell area). The angel told me that the ninety-four tables should also be read as a string of Enochian words. That is, start with row one, column one and list all the letters together until the end of that

row, at that point there should be forty-nine letters. Continue with the next row, until all the 2,401 letters are written out, one after another. I was told to do this for each table.

I asked, “How will I know how to separate the words since it would be just a string of letters?” He said, “When you look at the tables it will be apparent.” I had no idea what he meant. So, I started looking at a scan of the tables on my computer and enlarged them so I could read each letter; that was not easy as the tables are very messy and the handwriting difficult to discern. As I was attempting to write down each letter in each cell, I noticed small commas and sometimes periods between groups of letters. I assume that’s what the angel was referring to when he said, “It will be apparent.”

I was totally surprised because I’ve studied these tables numerous times and never noticed the very small commas or periods. After I wrote out a few lines and separated the letters using commas to create words, I tried to read them. It’s interesting that the words *did* sound like the Enochian language. Unfortunately, not all the tables have these commas and periods so there may be other clues with regard to how to separate the characters into words. I’m in the process of investigating this further.

If you will recall, another hint I received was that at the top of each table is a title in the Enochian language, which of course no one has been able to interpret. I had been told that these were an important key in that they were *not* used in producing the Calls. Maybe they tie in somehow with the string of letters forming the words. I am continuing to investigate this also, and my search has led me to my next revelation.

The Missing Tables of Dr. Dee

I propose that we may have an original table in Dee’s handwriting. The full set of tables that we have today is written in Kelley’s hand, but we don’t know for certain if Dee wrote the initial set and then Kelley copied it later, leaving the recopied set for posterity.

We *do* know, as I've stated earlier in this book, that the tables were transmitted to Kelley by an angel pointing to a letter on his table. Kelley would see what that letter was and then repeat it out loud. Now, we don't know if Kelley wrote the letters down on his set of tables as he saw them, or if Dee wrote them down on his set after Kelley repeated them out loud. I believe Dee wrote them down because what reason would Kelley have to repeat them unless someone was listening to copy them, and that person would have to have been Dee?

What evidence do we have for this? We do know that *MS 3189* (the ninety-four tables with the several pages of Enochian words at the beginning) are all in Kelley's handwriting. Thus, if Dee initially wrote them down, Kelley must have later made a copy from Dee's original. We have to ask if there are additional tables in Dee's handwriting, and the answer is yes. In the preface of Meric Casaubon's *A True and Faithful Relation of What Passed for Many Years Between Dr. John Dee and Some Spirits*, Casaubon stated that at the back of these diaries there were many tables. He went on to say that he would only reproduce one of them as it would be too costly to reproduce all of them. In addition, he didn't think they were very significant.

The table in the 1659 book can be compared with the identical one in *MS 3189* that's in Kelley's handwriting. I discovered that the one in Casaubon's book is in Dee's handwriting, not Kelley's. (I'm able to distinguish between Dee's and Kelley's handwriting by the way they formed some of their letters in a distinct way.) I realize it was redrawn by the engraver of the plate, but he must have traced or followed Dee's characteristic handwriting and the way he formed his letters. (Obviously, he must have used Dee's original drawing of this table.)

Thus, I believe that the tables in the back of Dee's spiritual diaries that Casaubon was referring to were the *original* ones drawn by Dee all in Dee's handwriting. Aside from a copy of this one table, the rest are all missing or destroyed. We only have the one that Casaubon decided to reprint in his book. There also is a discrepancy between the table in the Casaubon book and the same table in *MS 3189*; there appears to be

Figure E.1. The top script is from *MS 3189* in Kelley's handwriting with the shortened title. The bottom script is from the sample table in Casaubon's book—it's one of the missing Dee tables and is a representation of Dee's handwriting. (Redrawn by the author.)

more information on the Dee table, and the title of the table is longer in that it has additional Enochian words.

Did Kelley abbreviate and leave things out when he copied Dee's original tables? Is the *MS 3189* Kelley copy that we currently have in the British Library not a true and complete copy? Is there anything missing that would affect the supernatural effects or properties of these tables? Remember, I was told that the titles are a key to all of this. We will not know unless we eventually recover the missing Dee tables, which I believe are in Dee's handwriting and are the original or first ones drawn and, in fact, may contain additional information that was not included in the Kelley copies of the table.

The Discovery of the First Table

As I discussed in chapter 7, there are in reality forty-nine tables, but only forty-eight were given to Dee and Kelley. The first table was never given since the angels said that the soul of a human has no portion in this table and that this table neither is, was, or shall be known. I believe at a later date, the angels changed their mind, and Dee was given the first table. I may have discovered and deciphered it from Dee's notes and diaries.

Figure E.2. The front side of the first leaf reconstructed

Figure E.3. The back side of the first leaf reconstructed

I tried to reconstruct it according to the directions Dee was given by the angels and have included mention of it in this book because it's possible someone else may discover its meaning or shed some light on it. It's a mystery to me why the angels at first told Dee and Kelley they would not give them this table and then apparently changed their minds. I also want to verify that I've identified and interpreted this information correctly. I will give all the details of this in a follow-up book to

be published by Inner Traditions. In this forthcoming publication, the complete Book of Enoch will be reprinted for the first time.

If you have made any discoveries, I would enjoy hearing from you so I can include this information in my next publication for others to take advantage of. I can be reached by e-mail at drjohn@gizapyramid.com. Or you can reach me through the website that I've created for this purpose: www.myangelmagic.com. I believe we can only solve these enigmas if we all work together. Even the Bible says, "For where two or three are gathered in my name, I AM there among them" (Matthew 18:20).

I believe we're all on this spiritual path together, and by helping each other, we will make more rapid progress to our ultimate goal of cosmic consciousness.

APPENDICES

Appendix A

THE QUESTION OF THE TABLES

Let's now turn our attention to the tables. I've been referring to them as ninety-five in number. The originals are in the British Library, and there are definitely ninety-five of them there. But here's what's confusing: the angels refer to these tables as the set of "forty-nine Tables." So why the discrepancy?

I believe the answer lies in a statement made by an angel. The angel "Ile," who later delivered the Calls to Kelley, said that

Every Table containing one whole leaf. . . .¹

Book collectors know that one leaf is composed of a front and a back. So, one leaf would contain two tables, one on the front side of the paper and one on the back side (referred to as the verso). For simplicity's sake, let's assume there were actually ninety-four tables instead of ninety-five. (We will see later why this assumption is justified.) If we divide ninety-four by two, we get forty-seven.

The angels had also said that the First Call couldn't be given to them as it's too heavenly or spiritual to be given to humans. Dee and Kelley were given forty-eight tables, not forty-nine. We're still short one table.

To confirm that only forty-eight tables were transmitted to Kelley and Dee, let's read the angels' own words and the actual vision of the book that Kelley observed on March 24, 1583. Notice that the angel uses the word *leaves* and not *pages* (remember, there are two pages per leaf). The angel also makes it clear that there are forty-eight total leaves.

First, Kelley observes that the angel *Medicina Dei* is holding a book. This is the Book of Enoch. The angel says:

All the LEAVES are like gold and it seems that they were written with blood, not dried. . . . There are 48 LEAVES [Capitals are my emphasis, and I've modernized the English].

Then the angel "*Medicina Dei*" says:

One . . . shall not be known.²

This definitely states that the Book of Enoch (which the angel was holding) has forty-eight leaves, and they are leaves and not pages. Kelley and Dee will not be shown the first leaf so they will only have the forty-eight to use.

Let's look in detail at this book that is in the British Library (known as *Sloane 3189*) and which Dee called the *The Liber Loagaeth*. The entire book itself consists of:

- Eight pages of Enochian words; we have no idea what they mean.
- One page with a table of nine lines composed of forty-nine letters per line.
- Ninety-five pages of individual tables.
- Finally, one blank page and one page with the twenty-one characters of the Enochian alphabet.

These first eight pages of Enochian words are in groups of—let's

call them paragraphs. There are forty groups or paragraphs, and each paragraph is composed of forty-nine separate Enochian words. Each word is supposed to fit into one space of a forty-nine by forty-nine table (instead of one letter). Since Kelley couldn't fit these words into the allotted space, he wrote it out in a long sentence. Thus, the forty-nine words in paragraph one would fill in the forty-nine columns in row one.

Paragraph two also has forty-nine Enochian words, which fit into each column on row two, and so forth. So, when we get done with the forty paragraphs of forty-nine words each, we have forty of the forty-nine rows filed in. Now, on the last page, is a table of nine rows by forty-nine columns, each one of which is filled in with a letter. These additional nine rows complete the table of forty-nine rows and forty-nine columns. So, these eight pages and the nine by forty-nine table make up one complete table. This is identified as the back side of the first leaf. The first side of the leaf isn't in this Book of Enoch but in another manuscript (*MS 3188*). Kelley never copied the first side of the first leaf into the Book of Enoch (*MS 3189*). In *MS 3188*, there are forty-nine groups or paragraphs of forty-nine Enochian words, so each word fits into one of the spaces in the forty-nine by forty-nine table. So, we now have two tables, one on the front side of the first leaf and the other on the back side of the first leaf. Thus, we have the first of the forty-eight leaves with two tables, one on the front and one on the back.

Thus, ninety-four tables plus the two additional tables, which are made up of the pages of Enochian words in each cell, equals ninety-six pages of tables. If we divide it by two, we get forty-eight *leaves*. This is consistent with the angels' statement that there are forty-eight tables or leaves.

Remember, there are actually ninety-five pages of tables in the British Library copy, and I assumed for our calculations there were only ninety-four.

I went through the British Museum scans in detail, and lo and

behold, I found a page that was reproduced twice. Whoever did these scans many years ago must have thought that the first scan of this page was too light, so they scanned it again but didn't discard the extra scan. That's my opinion of what probably happened. So, if you eliminate the duplicate page, you now actually wind up with ninety-four tables! (If you want to verify this, the duplicate page is numbered 18 in the manuscript in the British Library.)

Appendix B

THE ENOCHIAN MEDITATION SUMMARIZED

After you have performed this meditation many times, have learned it well, and have memorized the LBRP, you won't need to read over all the explanations and discussions in chapter 8. This page is a summary to have in front of you when you do the meditation:

ENOCHIAN MEDITATION SUMMARY

Preparation

- Sit near a lighted candle

Meditate on how the candle connects you with the Light of God and the Presence of God.

- White Light Visualization (read the following):

May the white light surround me.

May the white light elevate me and put me in touch with my spiritual guides.

May the white light connect me with the Divine Light, the Light of God.

- Do the Lesser Banishing Ritual of the Pentagram (LBRP)

First you will first do the Kabbalistic Cross, and then you will construct the Pentagram of White Light.

The Kabbalistic Cross

- Stand facing east.
 - Visualize the Light of God coming to you and hovering over your head in a dazzling ball of light.
 - Reach up with your right index finger and bring this ball to your forehead and touch your forehead.
 - Say or chant: AH-TEH (Unto Thee . . .).
 - Move straight down and touch your chest or stomach and say or chant: MAL-KUTH (. . . the Kingdom . . .). (As you move your finger to each part of your body, visualize the white Light of God moving with you, and at the end, you will have a large cross over your body from the white light.)
 - Touch your right shoulder and say or chant: VEE-GE-BUR-AH (. . . and the Power . . .).
 - Touch your left shoulder and say or chant: VEE-GE DU-LAH (. . . and the Glory . . .).
 - Finally, bring your hands together in front of you like in prayer and say or chant: LE-OL-LAM (. . . Forever . . .).
- AH-MEN.

The Pentagram of White Light

- Facing east, trace a large pentagram in the air. (As illustrated in figure B.1 on page 174, start at the lower left side of the pentagram and move in the directions indicated.)
- When the pentagram is complete, thrust your right index finger in the center of the pentagram and say or chant: YOD-A-HAY, VAV-A-HAY.
- Turn and face south.
- Make the same pentagram in the air (starting at the lower left side), and when completed, thrust your right index finger in the center and say or chant: AH-DO-NAI.

Figure B.I. Start at the lower left corner and trace the pentagram in the direction indicated until you come back to the starting point.

- Turn to the west, trace the pentagram, and, when completed, say or chant: E-HI-YAY.
- Turn to the north, trace the pentagram, and when completed, thrust your right index finger in the center and say: AH-GA-LA.
- Turn to the east and thrust your finger in the center of the pentagram you traced initially, thus completing a closed circle of four pentagrams. Visualize this circle and the pentagrams as a vibrant light surrounding and protecting you.
- Still facing east, stretch out your arms in the form of a cross and chant the following:
Before me: RA-FAY-EL.
Behind me: GA-BRE-EL.
On my right: ME-CHI-ALE.
On my left: UR-REE-ALE.
- Keep your arms outstretched and continue by saying:
Before me, flames the pentagram.
Behind me, shines the six-rayed star.

- Repeat the Kabbalistic Cross once more, and you're now done with the LBRP.

The Enochian Call

(The Call of the Thirty Aethyrs)

Mā -drî -iax Ds praf (Name of Aethyr, i.e., TEX) ch(k)īs Mi-cā-olz Sa-ā-nir Ca-ōs-go, od fī-sis Bal-zi-zras Ia(ya)-ī-da, Non-ca(sa) Go-hū-lim, Mic(Mīk)-ma A-do-ī-an Mad, I-ā-od Bli-ōrb, Sâ-ba-o-o-ā-ô-na ch(k)īs Lu-cīf-ti-as pe-rīp-sol, ds Ab-ra-ās-sa Non-cf(sf) Ne-tā-â-ib Ca-os-gi od Ti-lb Ad-phaht Dām-ploz, To-ō-at Non-cf(sf) Gmi-cāl-zô-ma L-rāsd Tōf-glo Marb yār-ry l-doi-go od Tor-zulp Ia(ya)-ō-daf Go-hōl, Ca-ōs-ga Ta-ba-ord Sa-ā-nir od Chris-tê-os Yr-pō-il Ti-ō-bl, Bus-dir ti-lb No-aln pa-id ors-ba od Dod-rm(rum)-ni Zyl-na. Tor-Zu, Za-Car, od Zam-Ran aspt Sib-si But-mô-na ds Sur-zas Tia Bal-tan. Odo Cicle Q-ā-a, od oz-az-ma pla-pli lad-nâ-mad.

Meditate with the Governors' Names

See list of names on pages 130–34.

End the Meditation

- Thank the Spirits
- Intone the License to Depart

O spirits, because you have been very ready and willing to come at my call, I hereby license you to depart to your proper place. Go now in peace and be ready to come at my call when requested. May the peace of God be ever continued between you and me.

- Do the Closing Lesser Banishing Ritual of the Pentagram

Appendix C

JESUS AND THE ANGELS

I was debating whether or not to add this section to the book since I did not want to give the impression that I was trying to push my personal views or beliefs on anyone. I hope by now, after reading this far, you realize that I do not believe in evangelizing or trying to convince anyone of my personal beliefs. We all need to find God for ourselves and within ourselves using our own means. Forcing your beliefs on someone else does not work. In fact, it has the opposite effect.

When I was director of religious education I saw this many times at different churches. It seemed that if a religious belief had been forced on a child, as soon as they became an adult and left home, they abandoned their faith and stopped going to church. This is most likely the case with almost anything in life. If you try to force your viewpoints or beliefs on anyone, they will most likely reject them as soon as they have the opportunity, even if what you tell them is the truth. I have tried to emphasize throughout this book that finding God is a personal and intimate experience. My approach and the one I have suggested is to find God through meditation. I believe that this is the most natural and gentle way to experience him.

After reading the final draft of this book, I realized I may have left out an important aspect of this angelic communication, which most authors choose to ignore. I felt that to leave this out would be to do an injustice to the message of the angels. What I am specifically referring

to are statements made by the angels about the role and importance of Jesus Christ. Thus, putting my own beliefs aside, I feel it is important to cover this ground in an objective way.

We know from Dee's diaries and writings that he was a devoted believer in Jesus Christ as the Son of God. But what did the angels say about this, and how is it relevant to what we have been discussing? Some may argue that the statements made by the angels were consistent with Dee's beliefs and practices and were expressed in such a way as to make them acceptable and consistent with his views. However, this does not make sense; the angels said many other things that were contrary to Dee's beliefs and religious views.

Let's look at some of the statements made by the angels that are about Jesus. I have selected what I believe are some of the most revealing ones:

Madini: I rejoyce in the name of Jesus, and I am a poor little Maiden,
Madini. . . .¹

Gabriel: For behold, you participate (in) the mercies of God through his Son Christ Jesus, in that we open unto you those things that have been sealed. . . .²

Gabriel: Charity is the gift of the Holy Ghost, which Holy Ghost is a kindling fire, knitting things together, through Christ Jesus; in the true wisdom of the Father. . . . For it is the meat of us that are anointed, which is the son of God, and the light of the world.³

Dic illis: My name is called Dic illis. I am one under Gabriel, and the name of Jesus I know and honour.⁴

Uriel: Is not Jesus, God, and the High Priest of the Lord placed on the right hand of his Father?⁵

An angel: O you of little understanding: Who is he that can and hath to give, but God, Jesus Christ the Sonne of the living God, unto whom all things are given in Heaven, and in Earth. . . .⁶

An angel: Now then if you be man, then are you of earth, earthy. But according to your similitude, grafted in the image of God in his Sonne Jesus you are heavenly.⁷

An angel: For he that dwelleth in Christ is quick, because he dwelleth in life and light. But he that goeth out of Christ through sin, and in whom Christ dwelleth not, he is dead.⁸

Raphael: In the Name of Jesus Christ, I Raphael am now sent unto you to deliver unto you your question so far forth as God his will and pleasure is to command me. . . .⁹

Raphael: In the Name of him that created me Raphael, and all the blessed Creatures, and likewise in his power made all the world, and all things therein contained: Jesus Christ of his great goodness hath sent me now at his will, and so I am bound at his will to return, when his pleasure is. All honour be given to him being God Almighty for evermore. Amen.¹⁰

So, to summarize the main points of the above quotes, the following are the attributes and the role of Jesus:

- Angels rejoice in the name of Jesus.
- Jesus opens up mysteries that have been sealed for us. (Compare Revelation.)
- The true wisdom of the Father can be found in Jesus.
- Jesus is the light of the world.
- The angels know and honor the name of Jesus.
- Jesus is placed on the right hand of the Father.

- All things, both in the heavens and on the earth, are given to Jesus.
- We are grafted in the image of Jesus, the son of God.
- Those that dwell in Jesus are alive and of the light.
- Jesus has sent Raphael to Dr. Dee to communicate this angelic communication.
- Jesus is God Almighty.

It is apparent from the above quotes that the angels believed Jesus is the Son of God: he was given all power in heaven and earth; his name is very powerful; and he has sent his angels to communicate important spiritual truths to Dr. Dee.

The name of Jesus is the most powerful name to use to protect yourself spiritually. I shared a story earlier in the book in which the name of Jesus protected me from negative influences when the other hundred names of God had no effect. This is very significant to me and something important for me to share with others.

Because of my experience with this, I add the name of Jesus to my opening prayer for the Enochian Meditation and also include his name in the License to Depart. This really gives me added comfort, and I feel very much protected with his presence.

Do I believe Jesus is the Son of God? How important is this belief? I cannot judge others or comment on their beliefs, but this is an important tenet of mine. I do not believe in Jesus in the way traditional and evangelical religions believe in him. I view Jesus more as a cosmic Christ that is in everyone and is the personal aspect of God that we can connect with. I believe Jesus is the sum total of the attributes of God that incarnated in human beings. When some say Jesus is the Son of God, we really have no idea what that means. It is just a way of trying to visualize or understand a spiritual mystery. I remember a statement made back in the 1970s by a follower of Meher Baba, a highly respected spiritual teacher from India. In fact, I was a follower of Meher Baba for many years and feel his simple philosophy helped me start to look for

God within myself, without being shackled with religious beliefs and ideology.

Even though today I do not accept everything Meher Baba taught, he was a powerful influence in my life. One of Meher Baba's well-known followers was asked if he believed Meher Baba was an avatar or God-conscious person, and his response was that the concept and understanding of what an avatar is goes beyond his comprehension and spiritual wisdom. It would be like asking a child to understand the Theory of Relativity. I feel the same way about Jesus. I do not have the spiritual wisdom to determine if he is the Son of God, but I do believe that he is the most important spiritual teacher that ever lived and embodied what I believe are the attributes of God. If that makes me a Christian, so be it, but I do not like labels. I feel the best description of Jesus is that he is the embodiment of the attributes of God incarnate and was born and died in order to give light and guidance to human beings.

One aspect of Jesus which many Christians do not always emphasize is the comfort that he brings. When I meditate or need some help, I withdraw into the presence of Jesus. It is similar to my approach when I meditate with the presence of God, but if I use Jesus' name, something more personal is communicated. It's difficult to capture in words, but the feelings evoked are ones of warmth, protection, love, and peace. It is not really much different than what I feel when I'm with God; it's perhaps another way to experience God.

I think other spiritual teachers throughout history have shared some of God's attributes and that is why many people were attracted to them and followed their teachings. However, I don't believe any of them came close to fully embodying the attributes that Jesus had. He truly embodied the concept of God for us in human form.

Jesus is important in my life for these reasons, which may or may not be shared by most Christians. I try to keep my beliefs simple and nourished by my meditation. To make my point clear and not give a false impression, I want to end with my favorite Sufi saying, one that

I have quoted earlier: “There are as many paths to God as souls in the world.”

Author’s Note: After I wrote this appendix, I decided to meditate on whether or not to include this section in the book since I didn’t want to alienate any readers who don’t believe Jesus has a special significance in the greater scheme of things. I was deliberating over which Aethyr to enter when I strongly felt the angels calling me back to the Twenty-second Aethyr, which, as I have previously mentioned, was one of the most powerful Aethyrs that I have explored. It was the one in which I experienced a very intense presence and the Light of God. Also, as discussed in chapter 9, this was one of the most intense Aethyrs that Aleister Crowley experienced.

After the Lesser Banishing Ritual of the Pentagram and the White Light Visualization, I decided to open my Bible to a random place and read what was there. (I usually do not do this.) When I did this, it opened on the first chapter of John. This was very appropriate, because I was asking whether or not to include a section on what the angels said about Jesus:

In the beginning was the Word, and the Word was with God, and the Word was God. The same was in the beginning with God. All things were made by him; and without him was not anything made that was made. In him was life; and the life was the light of men. And the light shineth in darkness; and the darkness comprehended it not.

JOHN 1:1 (AV)

The angels told me that even today we have not comprehended who Jesus really is and what he is. All the religions have additional doctrines created by humans that have distorted the true meaning of Jesus. Maybe the angels are also trying to restore that meaning today, and that’s why

they mentioned and discussed Jesus so much throughout their spiritual communications with Dee.

I was told to pick up my pencil and write. This was an unusual request during my Enochian Meditation. This is what I wrote:

God is the greatest thing (or concept) that man could comprehend in the world. No other concept should be considered. Meditate on God all day long. Jesus is the extension of God for human understanding and relationship. Do to others what you would do to Jesus. Love. Love. Love. Harmony. Harmony. Harmony. This is the original concept of Creation.

Their response to my question to the angels regarding whether or not to include this appendix to the book was, “Yes, yes, yes! This crowns the book!” Then they said, “No other questions please. Meditate and relax!”

After this I experienced the most incredible peace of God pervading everything. I felt lighted up like a Christmas tree and felt that the angels were smiling at me!

The final words I received from the angels were:

The Light of Jesus will purify, cleanse, and elevate you.

Man’s job is to meditate on God. God’s job is to elevate man.

We cannot elevate ourselves on our own without the help of God.

Remember the saying, as we take one step toward God, he takes ten steps toward us.

ABOUT THE AUTHOR

John DeSalvo, Ph.D., is director of the Great Pyramid of Giza Research Association. His purpose in starting this association was to make available to the public general information and new research on the Great Pyramid and to post the work of pyramid researchers who may not have had the opportunity to publish their work in the traditional academic journals.

A former college professor and administrator, his B.S. degree is in physics, and his M.A. and Ph.D. degrees are in biophysics. He has taught the following subjects on the college level: human anatomy and physiology, biochemistry, general biology, human gross anatomy, and neurophysiology. His college administrative experience includes cultural affairs director, basic science department head, and dean of student affairs.

In 1979 DeSalvo coauthored of the book *Human Anatomy—A Study Guide* (currently out of print) with Dr. Stanley Stolpe, former head of the Anatomy Department at the University of Illinois. His publications in scientific journals include research on the infrared system of rattlesnakes (“Spatial Properties of Primary Infrared Neurons in Crotalidae”). He was also a recipient of research grants and fellowships from the National Science Foundation, United States Public Health and Human Services, and the National Institutes of Health.

For more than twenty years, John DeSalvo was one of the scientists

involved in studying the Shroud of Turin. Currently, he is executive vice-president of ASSIST (Association of Scientists and Scholars International for the Shroud of Turin), which is the largest and oldest research association in the world currently studying the Shroud of Turin. He was also a research consultant to the original STURP (Shroud of Turin Research Project) team and was the contributing science editor for the book *SINDON—A Layman's Guide to the Shroud of Turin* (published in 1982, currently out of print). His Shroud research involved the image formation process of the man on the Shroud and studies using three-dimensional reconstruction, spectroscopic, and ultraviolet analysis. He has lectured nationwide on the Shroud, and in 1980 the International Platform Association designated him as one of the top thirty speakers in the nation.

He published *The Complete Pyramid Sourcebook* in 2003 and *Andrew Jackson Davis: The First American Prophet and Clairvoyant* in 2005. His book *Decoding the Pyramids* was published by Barnes and Noble in May 2008 and has been translated into French, Spanish, Italian, Dutch, and Czech.

In October 2008, his book *The Seeress of Prevorst: Her Secret Language and Prophecies from the Spirit World* was published by Inner Traditions. His most recent book, *Dead Sea Scrolls*, was published by Barnes and Noble in July 2009 and is also available in French, Dutch, Spanish, and German.

USING THE ENOCHIAN MEDITATION CD

The purpose of this CD is to review some of the key procedures of the Enochian Meditation that I discuss in the book and for you to hear how the words of the basic Enochian Meditation (otherwise known as the Call of the Thirty Aethyrs) should be pronounced so that you can learn and use its correct pronunciations for your own meditation practice. The CD contains the following:

Track 1 is an overview of basic suggestions for the entire Enochian Meditation.

After this general overview, we begin our preparation for the meditation itself. Proper preparation includes performing both the White Light Visualization and the Lesser Banishing Ritual of the Pentagram. Instruction and commentary on the White Light Visualization is found on track 2, and commentary and pronunciations of the Lesser Banishing Ritual of the Pentagram are on track 3.

We then enter the heart of the meditation itself, wherein I will pronounce the entire Enochian Call (otherwise known as the Call of the Thirty Aethyrs) on track 4.

The next part of the CD will focus on meditating on the names of the angels or governors of each realm. Track 5 contains commentary on this process.

The closing steps to take to end the Enochian Meditation are found on Track 6.

Track 7 contains final comments and suggestions for you as you learn to integrate this practice into your life.

I wish you the best of luck in your Enochian Meditation!

The background of the book cover is a close-up, artistic photograph of angel wings. The feathers are a mix of light and dark green, with some showing a brownish tint. The lighting is soft, creating a hazy, ethereal atmosphere. The wings are spread out, filling most of the frame.

Enochian Vision Magick

An Introduction and Practical Guide to the
Magick of Dr. John Dee and Edward Kelley

LON MILO DUQUETTE

FOREWORD BY CLAY HOLDEN

Having mastered the arts and science of his age, Elizabethan magus Dr. John Dee [1527–1608] resolved that worldly knowledge could no longer provide him the wisdom he desired. He turned his attention to magick, and in 1582 he and his clairvoyant partner Edward Kelley made contact with a number of spiritual entities who identified themselves as angels—the same angels that communicated with Adam, Enoch, and the patriarchs of the Old Testament. Over the next three years three distinct magical systems were revealed to Dee and Kelley. The third, thanks largely to efforts from the adepts of the Hermetic Order of the Golden Dawn and the 20th-century practices of Aleister Crowley, is now widely known as Enochian Magick.

Enochian Vision Magick includes extensive background and historical notes, explores the foundation for the creation of the Enochian Magick system, and provides readers with a step-by-step process for using it.

“Lon DuQuette is a miracle worker, and *Enochian Vision Magick* is his greatest miracle. His uncanny gift for clear and simple explanations has produced the most accessible, interesting, personal and—most importantly—*practical* guide to Enochian magick available.”

—Richard Kaczinski, Ph.D., author of *Perdurabo: The Life of Aleister Crowley*

“DuQuette has created a truly original and highly interesting vision of the practical application of the Enochian System. He treats the material as Dee intended it to be treated—as a gateway into another world.”

—Geoffrey James, editor and translator of *The Enochian Evocation of Dr. John Dee*

“It has fallen to Lon Milo DuQuette to provide an easy entrance to the Watchtowers of Dee’s magic. In doing so he has done modern magic a great service.”

—Stephen Skinner, co-author of *The Practical Angel Magic of Dr. John Dee’s Enochian Tables*

“We are lucky to finally have a useful introduction to this difficult subject that provides the aspiring Enochian conjurer with both the proper foundation and the tools to successfully begin what can become a lifelong adventure and labor of love.”

—David R. Jones, Master of The Black Lodge of Santa Cruz

Acknowledgments

This book could not have been written without the inspiration and generous assistance of the following friends, scholars, and master Enochian magicians: David P. Wilson (S. Jason Black), Clay Holden, Christeos Pir, David R. Jones, Robin Cousins, Josh Norton (Benjamin Rowe), James Wasserman, Judith Hawkins-Tillirson, Rick Potter, I.Z. Gilford, Poke Runyon, Christopher S. Hyatt, and Robert Powell—and to the regular members of the Monday Night Magick Class of Heru-ra-ha Lodge O.T.O., I give my most heartfelt thanks; Constance Duquette, who co-hosts this 30-year on-going class (and is my most ruthless heckler); Jonathan Taylor; Mike Strader; Jill Belanger; Olver Althoen; Carlos Casadas; and Sandy, Arto, Cobra, Vanessa, Bret, Michael, Patricia, Coleen, Mary, Evgeniy, Jane, Alan, Danny, and scores of others who throughout the years have brought Life, Love, and Liberty into our home each week.

I would also like to thank Glacier Nitz-Mercaeant, of The Enochian's Keep in Indiana, for his beautiful gifts of my gold Enochian Ring and Lamen; and the late Cecil Eugene Burns (a.k.a. Frater White Haired Bull) who built and donated the true and faithful replica of the Holy Table that now adorns our Enochian Temple space.

My thanks also go to Brothers Michael Strader, for his rendering of the Ensigns of Creation in the angelic script, and Robert Powell for his beautiful images of the Tablet of Union and the four Elemental Tablets. They are perhaps the clearest black and white renderings of these complex figures ever published.

Finally I offer my heartfelt gratitude to Clay Holden for his encouragement and support of this project. I am also deeply indebted to him for allowing me to use his magnificent recreations of the original angelic alphabet and his images of the Forty-nine Good Angels, the Holy Table, the Sigillum Dei Aemeth, and Golden Talisman.

I also draw the reader's attention to Brother Holden's original image of John Dee's Monas Hieroglyphica that adorns the cover page of each of the five books that make up *Enochian Vision Magick*. This

image is in itself a most profound and historic element in the entire book for it represents a solution of a geometric puzzle going back to ancient Greek mathematical texts—that is, the production of a regular heptagon in a circle using only a compass and ruler. Please pay special attention to Clay's foreword to discover more.

Finally I offer very special thanks to Jan Johnson, Brenda Knight, and Amber Guetebier of Weiser Books who patiently (and graciously) forgave several deadline breaches.

Foreword

This is the book I would have given my eyeteeth for twenty-five years ago. It is the first work to systematically lay out the whole corpus of Dee and Kelley's magickal system, and the only one to provide a useful path through the dense and multilayered labyrinth of what has come down to us as "Enochian Magick," based almost entirely on their original manuscripts.

When Lon asked me to consider writing a foreword to his book, I think he knew that I had not been deeply involved in Enochian research for a number of years, but asked me to at least consider looking at what he was writing. It took only about fifteen minutes of reading to reignite my enthusiasm for the material which at one time was an all-consuming passion, and to realize that what he was in the process of writing would become a landmark text on the subject. Now that the book is finished, I am even more deeply honored to be able to write a few words of introduction to his remarkable work.

What particularly impresses me with Lon's book is not only the sheer volume of material covered or the clarity with which it is presented, but its immense readability and the fact that he has struck an elegant balance between classical scholarship, practical magickal instruction, and anecdotal events.

One never loses the sense that there is a real person at work here, questioning, organizing, and reporting his conclusions together with his experiences along the path. The self-important tone of many so-called "Enochian Magick" texts is entirely absent, replaced by clear and well-organized content.

When I first encountered Enochian magick, the only available published materials were Regardie's *Golden Dawn* and Crowley's *Gems from the Equinox*, fascinating but largely incomprehensible to me. Next was the first of several largely incoherent books on Enochian Magick by Gerald Shueler, which elaborated on the Golden Dawn material and added much of his own invention, most of it of dubious value. In hindsight, they seem more suitable for Dungeons and Dragons than serious magickal work (though to be fair, as David Jones once pointed out to

me, D&D is probably an excellent introductory discipline for magickal ritual work).

Then came Geoffrey James's *The Enochian Evocation of John Dee*, a completely different matter altogether. Still more of a synopsis of a system than a workable guidebook (based largely on Sloane MS. 3191, Dee's precis of the materials received between 1582 and 1587), it gathered together the bulk of Dee and Kelley's work, and gave a sense of where it all came from. Still incredibly useful many years later, when coupled with an examination of the original scrying sessions that produced the material, it still does not serve as a proper guidebook through the system. The heart is there, but the how and why are largely absent.

When looking at what the Golden Dawn and Crowley and their successors put together as "Enochian Magick," it seems clear that they were missing huge chunks of this "how and why," along with many critical pieces to understanding what they were dealing with, and their attempts to graft basically everything else in their magickal system onto it produce a cumbersome thing that Dee and Kelley would not recognize as what they pulled through.

I have likened their resulting patchwork as similar to what happens when one attempts to open a Word document or a highly formatted database file in a text editor: one can read and even extract a good bit of raw data, but the formatting and links to other programs are entirely unreadable and bear little resemblance to the original document.

Without an understanding of Dee and Kelley's early material, mostly presented in Sloane MS. 3188, what comes later on, while workable on its own, will be largely incomprehensible. And while in many ways it can be convincingly argued that the later system, centered on the four Elemental Tablets, and the Tablet of Union are independent of the earlier material, Dee's diaries demonstrate that he went back and added marginal notes to even the earliest diaries to refer to events and communications that transpire several years later, as well as referencing the earlier communications in the later entries.

Fortunately for the reader, Lon's book gives full treatment, background, and application of both the early and the later materials, and provides in spades both the how and why that are missing from so many other books that purport to be guides to the system.

For me, not until David Jones's Center for Enochian Studies, based out of Thelema Lodge OTO in Oakland, began their annotated transcriptions

of the first of Dee's spirit diaries, did I get a real sense for the background story of Enochian magick. All of a sudden, it was like reading a Philip K. Dick novel, with the tables and diagrams coming to life, populated by spirits, angels, and demons of all sorts, each with his or her own personality. And notably, John Dee and Edward Kelley for the first time became real people, questioning and struggling to understand and document what was being communicated to them.

I was finally able to borrow microfilms of the spirit diaries from the always truly generous and helpful Bill Heidrick, and I spent countless days printing them out on microfilm reader printers. When I finally had a set of Sloane MS. 3188 (*Quinti Libri Mysteriorum*) printed out and bound in front of me, the real magick began to take place for me. It was as if one discovered that Jules Verne's Captain Nemo was a real person, and could read his own words and step back 400-plus years into the past, to share his thoughts and experiences. To this day, it is the closest thing to real time travel I have ever felt.

Dee's handwriting presented some difficulty at first, as did his use of many antiquated terms, abbreviations, and frequent recourse to Latin. To my aid came Elias Ashmole's "fair-copy" of the diaries (Sloane MS. 3677), transcribed many decades later, in a beautiful hand which was much easier to read than Dee's. It also has the benefit of being more complete in some cases than Dee's original, as the manuscript was in considerably better shape in the 1600s than it is today, and Ashmole made notes indicating where materials were missing.

Given the difficulty in reading the original texts, it occurred to me to begin transcribing the diaries into electronic texts, laid out exactly as Dee had in the original manuscripts, and this was the birth of the John Dee Publication Project. The idea, which I tested in reading circles at Thelema Lodge, was that once one could get past the difficulties of Dee's sixteenth-century italic and secretarial handwriting, the actual English was not so different from that of Shakespeare, and that the modern reader would more easily be able to approach the work. Producing small batches of texts, with my transcription facing pages of the actual manuscript, it proved a fairly simple matter for people to actually read and understand the material.

While the world has changed immensely over the past two decades, and it is now possible to download electronic copies of all of Dee and Kelley's spirit diaries off the Net, it is still valuable to have the

reconstructed electronic texts. And while I have never completed the transcriptions of the *Quinti Libri Mysteriorum*, it both taught me many valuable computer skills that ultimately changed my life and demonstrated that the text could be reproduced as written in an easily readable form. I am pleased that it still provides many readers with a place to begin in reading the spirit diaries.

It was suggested to me early on by David Jones that rather than attempting to comprehend the whole system, I should concentrate on a particular section and work to understand the mechanism of that piece of the system. In my case, that piece of the puzzle was the Sigillum Dei Aemeth.

While Lon in this book suggests that, rather than trying to reproduce Dee and Kelley's work, one ought to use the system they transmitted, I found it of inestimable value to read through the text of *Mysteriorum Liber Secundus*, where the layout and working of the Sigillum is systematically laid out, and fill in each of the squares in a blank Sigillum as I went through it. By so doing, this impressive talisman became a truly living being for me, and it was possible also to rectify certain errors which exist in Dee's diagram of the Sigillum.

Case in point: at the bottom of the Sigillum Dei Aemeth, both in Dee's original illustration at the end of *Mysteriorum Liber Secundus* and in virtually every version published since, one finds the character "y" with a "14" under it. The text however clearly gives this number as "15." Replacing this number, and applying the method of backwards and forwards rotation around the outer circle, one utilizes the remaining unused squares, and two additional names are produced, neither of which is mentioned in the text. This exercise is left to the reader.

It further demonstrated that Dr. Dee, in fact, *lies* in certain places in the record, indicating that there is material hidden even there that he did not want to be visible to an unthinking reader.

One of my favorite quotes from the beginning of *Mysteriorum Liber Secundus* is Dee's interchange with the archangel Michael:

Mi. [...] Thow shalt sweare by the Living God, the strength of his Mercy, and his Medicinall vertue, powred into man's soule never to disclose these Mysteries

D. Yf no man, by no means, shall perceyve any thing hereof, by me, I wold think that I shold not do well.

Mi. Nothing is cut from the churche of God. We in his Saints are blessed for ever.

We separate the, from fyled and wycked persons: We move the to God.

D. I vow, as you require: God be my help, and Gwyde, now and ever, amen.

MIC. This is a Mystery, skarse worthy for us, ourselves, to know, muche lesse to Reveale. Art thou, then, so Contented?

D. I am: God be my strength.

Keeping this in mind, one may begin to understand why Dee occasionally misdirects the reader in his diaries. As with Aleister Crowley's works several hundred years later, if one is paying attention to what one is reading, the erroneous data should just about jump out from the page, and provide a pointer to the actual information.

Investigating such parts of the magickal furniture can provide further unknown or undocumented information, such as the following:

If one adds and subtracts the numbers at the top and bottom of the letters around the outer ring of the Sigillum (having corrected the "y/15"), one arrives at a total number of 440. Adding the "1" in the concentric circles that is given at the end of the instructions on the outer ring (accompanied by the statement "Omnia unum est"), the total comes to 441, the gematric value of the Hebrew "Aemeth," or Truth. Without the correction of the "y/15" square, the total remains 440, the gematric value for "Meth," or Dead. Thus, the Sigillum may be considered as a Golem, and the published version an inactive and unworkable "dead" talisman.

There is also an additional Table to be generated from the instructions given for the characters around the outer ring, as they are described in the text:

D. Note: All the Companies of these 40, stode, five together, and five together, and so in eight Companies; each, of five

Thus one can lay out the characters in eight rows of five, and in so doing, can produce symmetrical character sigils similar to the ones found on the Elemental Tablets for the angels of the outer ring.

In attempting to find a simple way to generate a regular heptagram in a circle for the purposes of reproducing the Sigillum on paper, I further discovered an interesting connection between the spirit diaries and Dee's earlier *Monas Hieroglyphica*.

While one cannot in fact produce a regular heptagon in a circle using only a compass and ruler (a geometric puzzle going back to ancient Greek mathematical texts), one can approximate it. There are several classical solutions, each of them rather close, but also involving complex methodology. Laying out the *Monas Hieroglyphica* in its 4 x 9 grid, as given in Dee's book, using a compass from the mid-point to trace a circle, and rotating the *Monas* so its "horns" touch on the circle from the top of the grid, one finishes with a *very* close approximation of a heptagon, in fact, as close or closer than any known classical solution.

Finally, it is perhaps fitting to suggest that one can read and consider Dee and Kelley's spirit diaries in a number of different ways, some of them mutually exclusive, but all of them perhaps of interest and value.

First, they can be considered as authentic records of spirit communication. Over the years I have worked closely with practicing Enochian magicians, including at least one incredibly talented scryer, who can both see and hear through the crystal ball, a very rare combination. Most scryers can do one or the other, but not both. In Edward Kelley, Dee found a rare man, however difficult he may have been to work with, and clearly knew it. Dee could only rarely see or hear anything himself, but with his amazing mathematical and classically trained mind, was perhaps the only man in the world capable of understanding and organizing the instructions that were presented to him. He was also skeptic enough to question and reject transmitted material that appeared to come from lying spirits, as Kelley periodically pulled through "illuding divils" that specialized in disinformation. The internal consistency of the bulk of the spirit diaries, as well as the coherent interrelationship of its many parts, speaks convincingly to its being a genuine record of actual events over a period of years.

Second, one can consider the material as an exercise in cryptographic method, intended as a means of communicating secret information back from the continent to Dee's colleagues and superiors in Elizabeth's

court. Clearly, as one reads through *Liber Mysteriorum Quartus*, and to a certain extent *Secundus*, one can see similarities to the methodology of Trithemius's *Steganographia*, a work with which Dee was quite familiar, and which has now been demonstrated to be entirely a cryptographic treatise.

The arrays of "dignified" and "undignified" spirits can be seen as referring to encryption methods involving "nulls," and Dee and Kelley's discussion of "transposition of letters" in *Quinti Libri Mysteriorum* Appendix is at the very least suggestive again of the same. Then there are the tables in *Liber Loagaeth*, at the end of which (Sloane MS. 3189) Dee has appended eight tables from "Aldaraia Sive Soyga," the mathematical methods of which have been demonstrated by Jim Reeds. They appear even on the surface to be cryptographic tables, though no one to date has made a systematic study of their content, nor provided any translation or decryption or methodology. They remain the most hermetically sealed of all Dee and Kelley's documents.

In a similar way, one may usefully compare this "cryptography" theme with the Kabbalistic method of transposition of letters along with numeric values as a strictly spiritual exercise (e.g., the "Sepher Yetzirah"), and arrive at the conclusion that the Enochian system might be considered "sacred cryptography" in the same sense as the classical Kabbalistic method, unrelated to the mundane world of secret transmission of political secrets.

Lastly, and perhaps most amusingly, I have entertained the idea that Dee was the author of the first science fiction novel over a period of years, and indeed the first to give thought to the idea of "cyberspace," an interdimensional world where communication takes place through a portal, giving thought to the twentieth-century works of H. P. Lovecraft, Philip K. Dick, and William O. Gibson.

In this view, while Edward Kelley is still a historic personage (he appears in Dee's private diaries as well as being clearly documented both in England and in Prague, usually in conjunction purely as an alchemist), the "Edward Talbot" and "Edward Kelley" presented in the Spirit Diaries, his frequent turns from devout scribe to blaspheming conjurer and back again, along with all the mischievous and light hearted spirits who are trotted on and off the stage, can be seen as an immense work of fiction. Whether written purely for Dee's amusement

or as a secret means of documenting a different sort of spiritual transmission remains hidden today.

Of course, as anyone who has spent any time actually working with the system(s) presented in the Spirit Diaries can attest, when you put them to work *as if* true, stuff happens. Once invoked (or evoked), the spirits do in fact seem to appear and go to work, whether one believes in them or not.

Which leads to the one piece of advice I would give to anyone starting out in working Enochian Magick: Be very clear of what you ask for, as you are certain to get as much of it as you can handle, and once started, it is much more difficult to get it to stop.

In closing, I would like to quote a passage from W. Wynn Westcott's translation of the "Chaldean Oracles" (quoting Proclus), which I have always found incredibly useful to keep in mind when working Enochian Magick, or indeed, any ritual work:

As the Oracle therefore saith: God is never so turned away from man, and never so much sendeth him new paths, as when he maketh ascent to divine speculations or works in a confused or disordered manner, and as it adds, with unhallowed lips, or unwashed feet. For of those who are thus negligent, the progress is imperfect, the impulses are vain, and the paths are dark.

Lon's wonderful book provides the reader—for the first time—with a clearly lit and well-ordered guide through the maze of Dee and Kelley's Enochian system. The hallowed lips and well-washed feet are up to the reader.

Keep an open mind, a pure heart, and a clean temple, and you will surely hear their angels and spirits speaking to you.

A Note Regarding Original Source Material and Footnote References

The original Enochian magick material is a labyrinth of manuscripts. In preparing this book, I was fortunate to have at my disposal electronic files containing the photographic images of original material currently housed at the British Library, London. The manuscripts are numbered and designated by the name of past owners. The ones I used for the present work are designated: Sloane 3188, 3189, 3191; and Cotton Appendix XLVI parts I and II.

Within these numbered manuscripts are various “books,” or “Liber” bearing separate titles. Some of these Libers were copied by Kelley or others and reproduced in subsequent manuscripts (sometimes renamed) and have found their way to London’s British Library and the Bodleian and Ashmolean libraries at Oxford University. For my purposes the material from the British Library’s Sloane 3188, 3189, 3191; and Cotton Appendix XLVI parts I and II proved to be quite sufficient. Digital scans of the Enochian manuscripts can be accessed electronically at: <http://www.themagickalreview.org/enochian/mssl/>.

Enochian scholar Geoffrey James prepared a concise summary breakdown of Dee and Kelley manuscripts for the bibliography of his excellent book, *Enochian Magick of Dr. John Dee*.¹ He has graciously allowed me to reproduce his entries for the material that relates directly or indirectly to *Enochian Vision Magick*. The reader who wishes to explore the source material in greater detail (or who simply wishes to track the book’s footnotes and references) should find this list very helpful.

SLOANE MS. 3188.

This manuscript contains Dee’s earliest scrying sessions. It contains six individual ‘books’, which are:—

Mysteriorum Liber Primus covering December 22, 1581 to March 15, 1582, and containing a ceremony with Saul (Dee’s first scryer) and

the first ceremonies with Edward Talbot, in which the table and Solomon's ring are described.

Mysteriorum Liber Secundus covering March 6, 1582 to March 21, 1582, and containing the first elements of the Heptarchic system, the spirits of the Sigil of Æmeth, and the first suggestion that an antediluvian language would be delivered to Dee. This title page is missing, but can be inferred from textual references in SLOANE MS. 3677.

Mysteriorum Liber Tertius covering April 28, 1582 to May 4, 1582, and containing numerous sigils related but apparently not essential to the Heptarchic system, as well as the names of the 49 good angels.

Quartus Liber Liber Mysteriorum covering November 15, 1583 to November 21, 1583, and containing the remainder of the Heptarchic system; this book is the first to record the name of Edward Kelly² as the scribe.

Liber Mysteriorum Quintus covering March 23, 1583 to April 18, 1583, and containing the tables later transcribed by Kelly into SLOANE MS. 3189.

Quinti Libri Mysteriorum Appendix covering April 20, 1583 to May 23, 1583, and containing the famous *Enochian* letters, as well as information concerning the construction of the Great Table.

SLOANE MS. 3189.

Liber Mysteriorum Sextus and Sanctus or *The Book of Enoch revealed to John Dee by the Angels* which contains 49 double-sided tables of (apparently) random letters. It is in Edward Kelly's handwriting.

SLOANE MS. 3191.

This manuscript is the only book of ceremonial magic extant in Dee's handwriting. It consists of three separate 'books,' each dealing with a different aspect of Dee's angelic magickal system. The books are:—

49 Claves Angelicæ Anno 1584 Cracoviæ (Liber 18) which contains Dee's transcription of the Angelical Keys (often called the Enochian Keys or Enochian Calls.)

Liber Scientiæ Auxillii et Victoriæ Terrestris which contains a complex system of magic based upon the Great Table (often called The Table of Watchtowers). It is entirely in Latin, and related to the Call of the 'Thirty Aires.

De Heptarchia Mystica which describes a complete system of planetary magic, along with excerpts from the various scrying sessions.

COTTON APPENDIX XLVI, PARTS 1 & 2.

This manuscript is occasionally referred to as Royal Appendix XLVI, or SLOANE MS. 5007. It contains thirteen ‘books,’ which are:—

Liber Mysteriorum (et Sancti) parallelus Novalisque covering May 28, 1583 to July 4, 1583, and containing the tail end of the Heptarchic system and the only recorded incident of Kelly speaking Greek.

Liber Pergrinationis Prime Videlicet A Mortlaco Angelicæ Ad Craconiam Poloniæ covering September 21, 1583 to March 13, 1584, and containing the journey from Mortlake to Cracow, Poland and various political speculations.

Mensis Mysticus Saobaticus Pars primus ejusdem covering April 10, 1584 to April 30, 1584, and containing the dictations of the first calls (backwards).

Libri Mystici Apertorii Cracoviensis Sabbatici covering May 7, 1584 to May 22, 1584, and containing the remainder of the calls (except for the call of the Thirty aires, in the Angelical tongue, and the spirits of the Thirty aires.

Libri Septimi Cracoviensis Mystici Sabbatici covering May 23, 1584 to July 12, 1584, and containing the geographic locations of the spirits of the Thirty aires, the *Great Table or Watchtowers*, and the first third of the *Call of the Thirty Aires*, as well as the names of the Thirty aires.

Libri Cracoviensis Mysticus Apertorius Præterea Præmium Madimianum covering July 12, 1584 to August 15, 1584, and containing the remainder of the *Call of the Thirty Aires*, as well as the names of the Thirty aires.

Mysteriorum Pragensium Liber Primus Cæsarique covering August 15, 1584 to October 8, 1584, and containing an attempt to convince the Holy Roman Emperor of the canonical nature of the visions.

Mysteriorum Pragensium Confirmatio covering December 20, 1584 to March 20, 1585, and containing mostly political speculation.

Mysteriorum Cracoveinsium Stephanicorum Mysteria Stephanica covering April 12, 1585 to June 6, 1585, and containing an alchemical formula and a letter from Dee’s wife to the spirits.

Unica Action, quæ Pucciana vocetor covering August 6, 1585 to September 6, 1585, and containing religious visions obviously meant to impress the Papal Nuncio who was then attending the ceremonies.

Liber Resurrectionis Pragæ, Pactum sev Fædus Sabbatismi covering fragments from April 30, 1586 to January 21, 1587, and containing further ceremonies with the Papal Nuncio.

Actio Tertia Trebonæ Generalis covering April 4, 1587 to May 23, 1587, and containing a complex series of corrections to the *Watchtowers* and the infamous wife-swapping episode.

Jesus, Omnipoten sempiternæ & une Deus covering March 20, 1607 to September 7, 1607 and containing the last records of Dee's magickal experiment.

Some of this material has been published in more modern times in books that are still readily available. Foremost of these are *A True & Faithful Relation of What Passed for Many Yeers Between Dr. John Dee and Some Spirits*,³ and *John Dee's Five Books of Mystery*.⁴

To make things a bit easier for the reader to access more readily available source material, I will, wherever possible, try to make references with the text and in notes to passages in these modern works.

Prologue to the Prologue

Something Secret

Vyasa: There's something secret about a beginning. I don't know how to start.

Ganesha: As you claim to be the author of the poem, how about beginning with yourself?

—THE MAHABHARATA⁵

There is indeed something secret about a beginning, secret and invisible like the soul of infinite potential that broods in the heart of every living seed. My tongue is tied. I stare at the blank screen of my monitor. I don't know how to start. For the writer it is the most difficult moment—a million things to say, but where to begin? My eyes search the walls and ceiling of my little office and fall upon the mask of the Hindu god Ganesha. His bright, pleasant face reminds me of the opening scene of Jean-Claude Carrière's play, *The Mahabharata*,⁶ where Vyasa, the author of the epic poem is faced with his own writer's block as he strives to begin his monumental story. Unable to read or write himself, Vyasa is blessed by the arrival of Ganesha, the beloved elephant-headed god, who offers to serve as Vyasa's scribe and take down his story from dictation. He also gives Vyasa some advice about how to start.

"How about beginning with yourself?"

And so, in pale imitation of the poet Vyasa, I will heed the wise counsel of my elephant-headed lord, the remover of obstacles. I shall begin this work of magick by telling you something about myself. Don't worry, I won't tell you much. Just enough to get us started.

I am a man. I am what they call in the East a householder—that is, I am married and have for my entire adult life endeavored with varying degrees of success to provide a loving and stable environment for my family. I am also an exceedingly lucky man, for in truth, throughout the years it has been my sainted wife and beloved son who have provided *me* with a loving and stable environment.

Fate (coupled with a conspicuous lack of ambition) has conspired to make our lifestyle one of genteel poverty (well, not always so genteel). We've never owned a house, a new car, or a credit card. On the other hand, we've always lived in moderately affluent communities and safe neighborhoods. We've always owned old cars that usually get us where we're going. Our bills consist primarily of the rent, the utilities, health insurance, and our groceries. We have no debts.

Some people say that's a miracle. I agree. Miracles are part of my job, for I am a magician. I'm not the type of magician who creates illusions to entertain audiences, but the type of who seeks to *dispel* the myriad illusions that hinder my own spiritual growth and enlightenment.

Aleister Crowley (1875–1947), the great twentieth-century magician, defined magick as the “science and art of causing change to occur in conformity with Will.”⁷ This is obviously a very broad definition of the term. In my opinion, however, it is the only one that is entirely accurate. You are, of course, free to interpret this definition any way you wish. Personally, I've come to the realization that the only real changes I can effect with magick are changes in myself. By changing myself, I change the world around me, hopefully for the better.

Naturally, I haven't always considered myself a magician, but for as long as I can remember I've been a seeker. Please don't project any undue piety upon this statement. I'm as wicked as anyone who seldom breaks any criminal or civil statutes can be. But even as I wallow in my dark and lazy wickedness, I find myself again and again stumbling inadvertently toward the Light.

As a magician I have also been extraordinarily lucky. Early in my career I was befriended (and many times guided) by some very wonderful, and in their own ways masterful, magicians to whom I owe an immeasurable debt: Israel Regardie, Phyllis Seckler, Helen Parsons Smith, and Grady L. McMurtry. I have also collaborated with others who have enlarged and enriched my magickal life. Foremost among these is my wife, Constance, who is the greatest natural magician I have

ever known. There are many others as well: Karen James, whose profound sense of beauty and passion for the art of dramatic ritual keeps alive the mysteries of Eleusis; Douglas James, William Breeze, James Wasserman, Steven Abbott, LeRoy Lauer, David P. Wilson, Rick Potter, Dewey Warth, Nathan Sanders, Christopher S. Hyatt, Poke Runyon, Michael Strader, Sandra Brautigam, and Jonathan Taylor; and, for the last twenty-eight years, the assembled magi of my weekly magick class.

On my fortieth birthday I began to write professionally. In this vocation I have also been exceedingly fortunate. Readers who are familiar with the body of my work know that I am occasionally taken to task by knowledgeable critics who accuse me of writing for beginners and who chide me for diluting or oversimplifying complex and esoteric concepts. Against these charges I can say very little in my defense except to confess that I am indeed a simple man who, by conventional academic standards, is a lazy and undisciplined student. I have to learn anecdotally. I need to put things in a personal context. I need to appreciate and understand the general before I can be thrilled and inspired by the specifics.

Yes, I'm proud to write for beginning students of magick. But first and foremost I write to explain things to myself. I write to find out what I know. I write the books that I wish I could have studied during the first five years of my magickal studies—books that might have saved me years of frustration, blind alleys, and wheel-spinning. I also like to think that I write for more advanced students who may find themselves entangled in the elegance of magickal minutiae or else have become so entranced and self-impressed with their encyclopedic memories that they've lost sight of why they are doing magick in the first place.

I write about things with which I'm familiar and have had hands-on experience. One of those things is Enochian magick. I began my study of this most curious of quaint and curious subjects in late 1979 and began practicing it in earnest in autumn of 1980. Back then there was very little published information available. The only person I actually knew who had any significant hands-on experience with the system was Dr. Francis (Israel) Regardie,⁸ who cautioned me in no uncertain terms that I probably shouldn't be dabbling in such things.

Nevertheless, armed with my copy of Aleister Crowley's *Gems from the Equinox*⁹ and the two volume set of Regardie's *The Golden*

Dawn,¹⁰ I naïvely plunged into what I thought was the deep end of the Enochian magick swimming pool. A year or so later a friend would present me with a huge stack of photocopied¹¹ documents from the British Museum. This material represented several significant portions of surviving diaries and magickal notebooks of Elizabethan magus Dr. John Dee (1527–1608 or 1609) and his clairvoyant partner Edward Kelley¹² (1555–1595).

Only then did I begin to realize how dreadfully deep the waters of Enochiana really are. By then, however, it was too late for me to get out of the pool. What little of the system I had mastered had already yielded breathtaking results. My life was becoming very magickal.

Those primitive photocopies eventually yellowed, then browned, then charcoal-blackened into illegibility, but my interest didn't fade. Neither did the interest of others in the magickal community. Today clear copies of the museum manuscripts are readily available to the serious student, and there are no less than thirty books currently in print with the word "Enochian" in the title. I confess a few of those are my doing. In 1991 Dr. Christopher S. Hyatt and I wrote a commentary on Aleister Crowley's little Enochian masterpiece, *Liber Chanokh*.¹³ A year later Herman Slater of Magickal Childe Publishing asked me to pen the introduction to the new facsimile edition of the 1659 *A True & Faithful Relation of What Passed for Many Yeers Between John Dee . . . and Some Spirits*. In 1995, my wife, Constance, and I created a deck of tarot cards¹⁴ that incorporates a large number of images relating to the Enochian Elemental Tablets. In the book that accompanies the cards,¹⁵ I elucidate on how they can be used for practical Enochian magick operations.

But writing (and reading) about Enochian magick is one thing; actually using it in a practical way to advance one's own spiritual evolution is another. With few exceptions, the thirty odd books mentioned above are very long on theory and history and very short on straightforward suggestions on how to actually sit down and perform Enochian magick, or reasons why one would want to do such a thing in the first place. I hope to remedy this, at least in small measure, by writing this book. I feel qualified to do this not because I have any illusions that I am the world's most knowledgeable scholar on the subject (I assure you I am not). I offer simply the credentials of nearly thirty years of applied

experience with several aspects of Enochian magick. I have come to some very fundamental conclusions that I believe might be of significant and practical value to both the speculative student and the operative practitioner of this elegant and complex magickal system.

Before I plunge us directly into those waters, however, I need to briefly address the question of why a relatively sane and rational twenty-first-century adult would wish to seriously embark upon the path of magick. I will do this with a device that will most assuredly irritate my publisher—a second prologue. And once again, to please my Lord Ganesha,¹⁶ I will begin by talking about myself.

Prologue

Why Magick?

Magick is as mysterious as mathematics, as empirical as poetry, as uncertain as golf, and as dependent on the personal equations as Love.

—ALEISTER CROWLEY¹⁷

I'm a magician. I practice the art of ceremonial magick. I adore and *invoke* the essence of highest Deity and hold congress with divine angels. I also *evoke* and command spirits and demons.¹⁸ Ceremonial magick is the path I have chosen to give expression to the spiritual yearnings I believe are inherent in every human being. It is my Tao, my Way, my religion, my philosophy, my psychology. But ceremonial magick isn't my life. I already have a life, thank you. But I use magick to help make my life magick.

I have closets and chests full of bizarre and colorful robes and crowns and wands and daggers and chalices and swords and lances and thuribles and banners and veils and rings and incense and candles and oils and tablets and talismans and mirrors and crystals. I have books—strange books (some very old and rare), books that would scare the daylights out of most of my neighbors. I use these magickal tools; I study these books in order to perform the rites of ceremonial magick. These things are not my life. But I use them to make my life magick.

On the surface one might think it reasonable and fair to ask, “Why are you a magician, Lon? Why do you believe in this stuff? Why do you do these crazy things?”

It might surprise you to know I don't have a proper answer to these questions. It is impossible for me to adequately explain or justify why

I celebrate my spiritual life through the vehicle of magick, for the same reasons it is impossible for any artist to properly explain why he or she has taken up the brush or the chisel or the violin or ballet slippers. If reasonableness were the sole criterion for the existence of art, there would be no music, no dance, no magick.

Make no mistake about it, magick is an art form, and every true magician is an artist. Just like the musician and dancer, the magician must practice, create, and perform. Just like the painter or sculptor, he or she must be armed with proper tools, skills, knowledge, and, most of all, inspiration. But what about people who've never learned to play a musical instrument, never learned to dance or paint or sculpt, yet who find themselves spiritually touched by listening to music, watching ballet, and visiting galleries? Are they not artists too?

In a very important way, I believe they are. As quantum physicists tell us, both the observer and that which is observed are changed by the act of observation itself. By appreciating the artist's handiwork, we are fundamentally affecting the reality and life of that creation. More importantly, when we expose ourselves to the artist's creation, we enjoy the passive luxury of allowing our consciousness to be altered, elevated, and enriched in unique and personal ways the artist might have never imagined.

The art of ceremonial magick, however, is a little different. There is no painted canvas to display, no audience to applaud. Regardless of how altruistic the magician's motives may be, magick is spiritual *performance art* that must ultimately be executed and appreciated by the magician alone. He or she is at once the teacher, the student, the medium, the conductor, the performer, the venue, the audience, and the critic. The magician touches the broader audience of humanity only by affecting changes in the *magician*, and success can be weighed only in the silent Holy of Holies of his or her own soul.

So, here and now and for the duration of this book, I shall lay aside the question of "why magick?" If my magickal efforts seem to propel me closer to self-realization, if my work brings me a measure of health or happiness or wisdom or a sense of fulfillment, good. But none of these things, nor indeed any *thing*, can be the goal of my art. Instead of asking, "why magick?" I suggest all who would fancy themselves magicians seek answers to the following questions, questions I struggle to answer every day of my life:

Am I really an artist? Am I drawn to this strange and irrational art form because of my mad passion to enrich my art and fulfill my creative life purpose? Or am I doing all this to *avoid* fulfilling my destiny? Am I running away from myself? When I don my magickal robes and enter the temple, do I do so as a radiant artist-magician, armed and ready to storm the gates of heaven and hell to do battle for the triumph of my soul, poised to take the next step in my spiritual evolution? Or am I merely a foolish man in an exotic costume, a mystic poseur in serious need of a life?

BOOK I

Don't Try to Duplicate the
Magick Dee and Kelley Did to
Receive the System—Just Use
the System They Received!

CHAPTER ONE

In the Middle of the Night

Teach me (O creator of all things) to have correct knowledge and understanding, for your wisdom is all that I desire. Speak your word in my ear (O creator of all things) and set your wisdom in my heart.

—JOHN DEE¹⁹

It's 3:43 a.m. I've been up for about a half an hour bathing, dressing, and preparing myself to operate. Constance is asleep in the bedroom, and I'm trying to be as quiet as I can. In just a few minutes I will turn off the computer here in my office, take up my almond wand, and go into the darkened living room. There I will quietly perform a Lesser Banishing Ritual of the Pentagram, light two tapered candles, and sit down before the Holy Table.

Once comfortably seated I will close my eyes and pray:

Teach me (O creator of all things) to have correct knowledge and understanding, for your wisdom is all that I desire. Speak your word in my ear (O creator of all things) and set your wisdom in my heart. Amen.

I will then open my eyes, take the golden Ring, and quietly recite the Prayer of the Ring:

Behold the Ring. Lo, this it is. This is it, wherewith all miracles, and divine works and wonders were wrought by Solomon: this is it, which the Archangel Michael has revealed to me. This is it, which Philosophy dreameth of. This is it, which the Angels scarce know. This is it, and blessed be his name: yea, his Name be blessed forever. Without this I shall do nothing. Blessed be his name, that encompasses all things: Wonders are in him, and his name is WONDERFUL: PELE. His Name works wonders from generation to generation. Amen.

I will put on the Ring and then take up the golden Lamen that is attached to a black ribbon. Before putting it around my neck I will again pray:

Behold the Lamen. As the Holy Table conciliates Heaven and Earth, let this Lamen which I place over my heart conciliate me to the Holy Table. Amen.

I will then take up my almond wand, reach across the Holy Table, tap the upper right-hand corner, and begin to chant. As I do so, I will move the tip of the wand from right to left along the far edge of the table and chant:

Pa Med Fam Med Drux Fam Fam Ur Ged Graph Drux Med
Graph Graph Med Med Or Med Gal Ged Ged Drux.

Then, moving the tip of the wand down the left edge of the table, I will continue to chant:

Pa Drux Un Tal Fam Don Ur Graph Don Or Gisg Gon Med
Un Ged Med Graph Van Ur Don Don Un.

Then, moving from left to right along the bottom edge:

Pa Drux Ur Ur Don Ur Drux Un Med Graph Graph Med Med
Graph Ceph Ged Ged Ur Mals Mals Fam Un.

Then up the right-hand edge to finish where I started:

Pa Gon Med Un Graph Fam Mals Tal Ur Pa Pa Drux Un Un
Van Un Med Un Gon Drux Drux Ur.

I will repeat this entire procedure six more times, each time increasing the intensity of my focus on the words and movements. When I've completed the seventh round of chanting, I will hold the wand over the center of the table and chant seven rounds of the following:

Med Gon Gisg, Don Ur Van, Ur Don Ur, Med Med Graph.
Med Don Ur Med, Gon Ur Don Med, Gisg Van Ur Graph.

Then I will trace a circle over the center of the table and say:

Seven, rest in Seven: and the Seven, live by Seven: The Seven,
govern the Seven: And by Seven all Government is.

Galas Gethog Thaoth Horlwn Innon Aaoth Galethog,

Zaphkiel Zedekiel Cumael Raphael Haniel Michael Gabriel,

E(l) Me Ese Iana Akele Azdobon Stimcul,

I Ih Ilr Dmal Heeo Beigia Stimcul,

S Ab Ath Izad Ekiei Madimi Esemeli,

E An Ave Liba Rocle Hagonel Ilemes,

Sabathiel Zadkiel Madimiel Semiel Nogahel Corabiel
Lavanael.

Finally, I will place the tip of my wand upon the center of my forehead and whisper:

luah lang sach urch

iad moz zir—iad bab zna—iad sor gru—iad ser osf.

The chanting will take about eighteen minutes. By then I will have chanted myself into an altered state of consciousness. In fact, I'll be high

as a kite and struggling to avoid drifting into a directionless rapture. I will no longer be the overweight knot of worries and vices that haunts the daylight world of bills and phone calls and deadlines—vampires of time. I will be a magician, a key player in the business of creation, a spiritual being occupying my own indispensable rung on a hierarchical ladder of spiritual beings: gods, archangels and angels, spirits, and demons—spiritual entities who personify in metaphoric Technicolor every natural force, every monad of energy, every atom of matter, every concept and principle, potentiality, and tendency in the visible and invisible cosmos.

My living room will disappear, and in its place will tower the Temple of the Universe, holy ground demarcated by a consecrated carpet of red silk, upon which rests the Holy Table, the center of the universe, the Holy of Holies where heaven touches earth.

The table is completely veiled by a red silk cloth, with its gold tassels that hang from each corner. The cloth conceals an elaborately painted and engraved tabletop, the perimeter of which is carved with eighty-four squares containing letters from a sacred angelic alphabet—letters whose names I chanted in the angelic tongue during my seven rounds of chanting. A large carved hexagram spans the entire inner surface of the tabletop. And in the center of the hexagram broods a large rectangle made up of twelve squares, each containing an oversized angelic letter—the same letters whose names I chanted during the second round of chanting—artfully carved into the surface of the table. Seven talismans, Ensigns of Creation, are arrayed around the central rectangle. They are made of purified tin and are peculiarly lettered in the angelic script.

The centerpiece of the Holy Table is the *Sigillum Dei Aemeth*, a wax disk approximately nine inches in diameter and one and one-half inches thick, bearing the carved image of a complex diagram consisting of an interlocked heptagram, two heptagons, a pentagram, and an array of numbers and letters, which, when decoded, spell the names of seven sets of seven divine beings: *Seven who rest in seven, seven who live by seven, the seven who govern the seven, and seven by whom all government is*. Four smaller waxed versions of this Sigillum (wrapped in red silk bags) rest under the legs of the Holy Table, insulating it from distracting geocurrents.

The chanting completed, I will unveil a circular black mirror made of highly polished obsidian. I have it placed in a stand directly upon the covered Sigillum Dei Aemeth, and I will carefully angle it so I see my dimly lit face reflected in its pool of deep blackness. After only a few moments the reflection of my face will disappear, and I will see with magick eyes and hear with magick ears.

Now, the vision magick begins.

In the middle of the night I will call upon the angels.

I will call upon the angels, and they will answer.

CHAPTER TWO

The Magick of Dr. John Dee

If Merlin is an inner resonator who generated the literature which gathered about his name, then Dr. John Dee must be considered almost his outer manifestation in the real world.

He is probably the single most influential aspect of the magician ever to have lived and a worthy successor to the Arthurian mage.

—JOHN AND CAITLIN MATTHEWS²⁰

The little ceremony I described in chapter one cannot be found in any other book of magick. I composed it in the spring of 2006 for the benefit of the members of my weekly magick class. It is designed as a ritual of preparation—a ceremonial “drug,” as it were, to safely induce an altered state of consciousness, a trance in which specific techniques of magick may be practiced and visions can occur.

The components of the ritual are not, however, a modern invention. The magical implements and furniture were fabricated as faithfully as possible from descriptions found in sixteenth-century manuscripts and items currently housed at the Bodleian Library of Oxford University, the British Library, and the King’s Library wing of the British Museum.

The prayers and the chants were drawn from those same ancient texts. In a group magical working, the prayers are recited in unison and the chants intoned Tibetan style, in a deep monotone chorus of two or

four groups of voices. The hypnotic effect on the participants is tangible and powerful. (I have yet to discover what it does to our eavesdropping neighbors.)

The ancient manuscripts I refer to are the diaries and magical records of Dr. John Dee²¹ and his partner Edward Kelley, and these texts represent the source material for the system of magick known and practiced today as *Enochian magick*.

It is not my intention, nor is it within the scope of the present work, to present a proper biography of Dee. That has been handled nicely in Peter French's brilliant biography²² and other texts that I've itemized in the bibliography. I cannot, however, escape the necessity of providing a brief outline of his life and work, because it will have a direct bearing on our understanding of Enochian vision magick and why I think my little ritual of preparation is so important for those who wish to pursue this path.

Son of a gentleman server to Henry VIII, John Dee was a true Renaissance magus and one of the most extraordinary individuals of his time. Historian John Aubrey called him "one of the ornaments of his Age."²³ That is saying a lot, for his age was peopled with some of the brightest lights in the history of western civilization: Queen Elizabeth I, Charles V, Francis Bacon, Ben Johnson, Edmund Spenser, Giordano Bruno, Christopher Marlowe, and William Shakespeare.

Dee's unique genius blossomed at Cambridge University, and his fame as a published mathematician propelled him as a young man to academic rock-star status throughout Europe. It also brought him to the attention of the rulers of his world, including the future Queen Elizabeth.

He was the master of scores of disciplines. He was a physician, an engineer, a theologian, an astronomer, and cartographer. He invented the nautical instruments and developed the advanced navigational charts that helped make Britannia ruler of the waves. He even coined the term *Britannia*. A master astrologer, he was allowed to choose the date of Elizabeth's coronation, and throughout her reign he remained her friend and counselor.

Because he was fluent in many languages and lectured often on the continent, Elizabeth enlisted his services as a spy. Dee enjoyed this role very much. As a matter of fact, I believe he remained in this position

until the day she died. He was fascinated with cryptography and loved word and letter puzzles. Dee was secretly known as “the queen’s eyes,” and he signed his dispatches to her with the stylized image of a hand shading two eyes.

Yes, John Dee, on “her majesty’s secret service,” was the first agent 007.²⁴ Dee possessed the largest private library in England and was constantly enlarging it. He was perhaps the most educated man of his day. Part of his education included esoteric philosophy, Qabalah, alchemy, and magick—not illogical pursuits for a Renaissance magus. Magick, in particular, was a science to be explored and exploited. Dee wanted to talk to angels (as did the biblical patriarch Enoch) not only to discover the wisdom of the past and the secrets of the universe, but also, more immediately, to discover the secrets of Elizabeth’s enemies and brandish the power to magically manipulate the spiritual forces that control them. Dee wanted to be a magical spy.

His approach to magick (at least at first) was pretty standard procedure for the day. After bathing and dressing in clean clothes (extraordinary measures for the times—unless, of course, it was May, when many people of the day took their annual bath), he would enter a room set aside for the purpose. There he would drop to his knees before a consecrated table/altar and for a half hour or so pray fervently to God and His good angels, alternately reciting a litany of self-abasing confessions of his unworthiness to enter into the divine presence and boasting of his God-given right to do that very thing. With his consciousness duly exalted by prayer, he would then gaze into a crystal or a black mirror (a process known as scrying²⁵) and wait to receive a vision.

In theory that’s how it was supposed to work. However, even though Dee was skilled at composing long and eloquent prayers, he was not very good at scrying. In 1581 he started to advertise for someone who was. He had a small measure of success with a handful of rented seers until March of 1582, when he made the acquaintance of one Edward Talbot. Talbot (who would soon confess that his name was actually Kelley) was an unemployed alchemist’s assistant and convicted

forger. Kelley's questionable character notwithstanding, his skills as a scryer immediately impressed Dee, who hired him on the spot at a salary of fifty pounds a year, a handsome figure for the day.

The partnership of Dr. John Dee and Edward Kelley would last until 1587. Their angelic-magick workings for the most part concluded in 1584. During their time together they engaged in hundreds of scrying sessions of varying lengths, in which Kelley gazed into a crystal ball or a black obsidian mirror and reported everything he saw and heard during a variety of angelic communications. Dee, sitting at a nearby table with pen and ink, led the questioning and recorded everything in anal-retentive detail.

Not all of the sessions yielded profound revelations. Indeed, many appear to be attempts by the communicating intelligences to simply keep the conversation going. There were numerous instances when information received in earlier sessions was amended (sometimes radically) in subsequent sessions. There were even times when the magicians were informed that they had been deceived in earlier communications by evil spirits. Nevertheless, the consistency of the bulk of the material is staggeringly impressive, and the double-/triple-blind nature in which it was delivered, especially the angelic language, calls, and magical tablets, boggles the imagination.

The Dee and Kelley years can be viewed as having occurred in three major phases, resulting in what appears on the surface to be three separate and unique magical systems. I will discuss these in more detail shortly. Here at the beginning it is enough to simply point out it is the third and last phase of their angelic workings (the three-month period between April 10 and July 13, 1584) that yielded the material for the system of vision magick that can be properly called Enochian.

The Enochian period was highly productive and bore much promise. In fewer than a hundred days Dee and Kelley received an angelic language, tablets containing the names of elemental and celestial beings, and calls in the angelic tongue that promised to unlock the secrets of heaven and earth. With sad, almost Faustian irony, however, once the Enochian material was in their hands, Dee and Kelley did not proceed to actually operate the system in subsequent workings.

They would go on to other magical adventures, attempting to impress (with little success) the crown heads of Europe with their supernatural

counsel. Finally, after nearly five years of working together, years of exhausting magical sessions, and years of traipsing their families around Europe (not to mention a notorious wife-swapping incident), familiarity finally bred contempt, and the two magicians parted company without ever getting into the driver's seat of Enochian magick and turning the key.

Dee's complicated life would draw him back to the English court and the distracting world of political intrigue and survival. In 1588, as the Spanish armada set sail to annihilate England's much smaller fleet (an event Dee predicted years earlier), Elizabeth called again upon her Merlin. Dee shocked her courtiers by urging the queen to not engage the Spanish armada and keep her ships at bay, prophesizing that a mighty storm would scatter and destroy the Spaniards. Elizabeth wisely heeded Dee's words. The storm manifested right on cue, and in the chaos that followed, the Spanish armada went down to defeat. In many circles Dee was credited with magically raising the tempest that saved England. The story of this event became instant legend. William Shakespeare, writing only twenty-three years later, would use Dee as the model for Prospero, the storm-raising magician in his play, *The Tempest*.

Kelley's post-Enochian years would not earn him such renown. His ambitions kept him on the continent, where he peddled the promise of alchemical treasures to the crown heads of Europe. He was knighted by Emperor Rudolph II of Bohemia but was shortly thereafter imprisoned by his royal patron for failing to manufacture alchemical gold. With fairy-tale panache, Sir Edward Kelley plunged to an untimely death in November of 1595 while attempting to escape from the turret of Emperor Rudolph's prison tower.

Dee's end was not so colorful. Elizabeth appointed him warden of Christ's College in Manchester, but it was not a happy tenure. His wife (and, it is believed, several of his children) died there during the plague in 1605. Dee returned to his home at Mortlake, where his daughter Katherine cared for him until his death in late 1608 or early 1609.

How so many of Dee's manuscripts survived to see the light of the twenty-first century is a magical wonder story in and of itself. Several of the most important documents Dee had hidden in the false bottom of a cedar chest (can we get much more romantic?), where they lay undiscovered for over fifty years after his death. Through a curious

chain of events (that tragically saw a portion of the manuscripts baked as pie wrappings), the surviving material came to the attention of the illustrious antiquary, politician, astrologer, chemist, and Freemason, Elias Ashmole (1617–1692), one of the few people in the world capable of recognizing the importance of the discovery. Thanks to Ashmole, the material was catalogued and finally housed safely in his own museum at Oxford, the British Museum, and the British Library, where, over three hundred years after its reception, it captured the attention of S. L. MacGregor Mathers, Wynn Wescott, and the adepts of the Hermetic Order of the Golden Dawn, then Aleister Crowley—and now you.

CHAPTER THREE

Dee and Kelley vs. the Golden Dawn and Aleister Crowley

Now hath it pleased God to deliver this Doctrine again out of darknesse: and to fulfill his promise with thee, for the books of Enoch: To whom he sayeth as he said unto Enoch. Let those that are worthy understand this, by thee, that it may be one witness of my promise toward thee.

—THE ANGEL AVE, MONDAY, JUNE 25, 1584²⁶

Modern Enochian magick (as first developed in the late nineteenth century by S. L. MacGregor Mathers and the adepts of the Hermetic Order of the Golden Dawn and later adapted and augmented by Aleister Crowley and others) is a remarkable and tidy self-referential system of visionary magick. It is based upon a small portion of sixteenth-century manuscripts of Dr. John Dee and Edward Kelley, and the mystique of its colorful origins make it initially alluring to magical dilettantes and dabblers. However, the complexity of the system, as outlined by Golden Dawn/Crowley texts, continues to effectively guard the mysteries of this marvelous magical art form from all but the most serious, courageous, tenacious, foolish, or naïve.²⁷

For most of us who cut our Enochian-magick teeth during the latter half of the twentieth century, the Golden Dawn (GD) and Crowley books were at the time the only source material readily available to us. By following the intricate procedures outlined in these texts, we proceeded with our visionary quests along the two avenues of experimentation offered us by the GD/Crowley model: one branch of the system dealing with the elemental (manifest) universe, the other dealing with the aethyric (celestial). I'll discuss these branches in more detail in book IV.

Both of these magical environments are populated by spiritual beings whose names are drawn from five grids of lettered squares received by Dee and Kelley during a series of angelic communications during the third (or Enochian) period of their magical operations. Both the elemental and the celestial magical environments (and their spirit inhabitants) are accessed by intoning one or more of nineteen calls, which are chanted in an 'angelic language that was given to the Elizabethan magicians under breathtaking and extraordinary circumstances during the last months of their angelic magick workings. Theoretically, these calls induce very specific trances, whereby the magician can pinpoint particular spiritual entities or environments he or she wishes to contact or visit. As you can imagine, this is a very attractive prospect to the magical explorer.

The visionary labor of many post-modern Enochian explorers was well repaid, for we soon discovered that despite our very limited access to the original texts (not to mention our inexperience and ineptitude) this kind of magick actually worked. With surprisingly few exceptions, when we followed the GD/Crowley procedures and techniques, even the most insensitive and skeptical among us received visions we deemed appropriate to the particular regions we were exploring.

The technique used to receive visions such as these is called scrying. The Golden Dawn and Crowley often referred to the practice as "traveling in the spirit vision." Scrying is, quite simply, the ability to put oneself in touch with one's own psychic senses. In magical operations the scrying session is usually preceded by a formal ceremony designed to put the magician in an altered state of consciousness. It is, for all intents and purposes, a shamanistic experience. The thoughts, mental images, and impressions that flood the magician's mind during this altered state are subsequently recorded in the magician's journal and analyzed.

Naturally, some of us proved more talented than others. Art lovers and movie fans make particularly good candidates for Enochian vision magick, for they see with the romantic's eye and already possess a vast memory bank of evocative landscapes, archetypal characters, and supernatural beings. They are by nature dreamers skilled at communicating through a vocabulary of images and visual metaphors. But even the least imaginative of us, in short order, learned to develop our own visionary skills that became increasingly honed by our repeated work with the system.

There is no question (in my mind, at least) that the Enochian magick procedures and techniques developed by the Golden Dawn and Crowley embody a highly effective system of magical working that, if properly applied, can become an integral component in the modern magician's program of personal self-development. This is especially true for those of us whose magical careers have led us to the Qabalah-based disciplines referred to today in specialized circles as *hermetic* or *ceremonial* magick.

To modern ceremonial magicians, Enochian magick appears at first glance to enjoy a comfortable compatibility with our world of pentagram rituals, hexagram rituals, tarot cards, trees of life, qabalistic path workings, chakra work, invocations, god-forms, and spirit evocations. This compatibility, however, has been, for the most part, contrived and jerry-rigged. For as efficacious as the GD/Crowley applications and techniques are, they bear little resemblance to anything Dee and Kelley practiced or were instructed to engage in by their angelic contacts. With all due respect to Mathers, it is clear that he and his Golden Dawn adepts chose to limit their attention to only those portions of source texts that offered material that they could fit easily into the qabalistic/hermetic schema to which they were so passionately committed. Furthermore, it is clear that in many instances, when the original material didn't fit the schema, they found a way to make it fit.

This fact should not diminish in our respect for the wonderfully effective system the Golden Dawn and Crowley have bequeathed to us. But it has prompted many of us (who obviously have an inordinate amount of time on our hands) to examine in greater detail the surviving Dee and Kelley material that has now become more readily available to the serious student. What we discovered is an overwhelmingly large body of work—books, notebooks, and diaries—the most interesting of which span the better part of three years of intense magical operations.

Most of this material appears to have nothing whatsoever to do with Enochian magick as practiced today.

As I mentioned earlier, Dee and Kelley's magical workings took place in three distinct phases that yielded three unique magical systems. For convenience, I will refer to these as (1) *Heptarchia Mystica* (or simply *Heptarchia*), (2) *Loagaeth* (which includes an angelic alphabet), and (3) *Enochian*.

One could argue quite convincingly that the revelations Dee and Kelley received during the Enochian period represent the crème de la crème of their magical workings and that it is unnecessary to waste our time on the painfully complex details of the Heptarchia and Loagaeth working periods. After all, the GD/Crowley system and techniques were developed from this *plus ultra* Enochian material, and everything seems to work just fine, thank you. In fact, for the better part of twenty years I was one of the most vocal apologists for the Enochian school whose motto is, "Don't try to duplicate the magick Dee and Kelley did to receive the system—just use the system they received!" Then, starting in 1999, a couple of things happened that caused me to rethink the wisdom of this attitude.

First, I became enthralled with the work of Clay Holden and the John Dee Publication Project, which brought the glories of *Quinti Libri Mysteriorum* to life on the World Wide Web. Then, in 2003, my O.T.O.²⁸ Brother and Enochian magick adept Christeos Pir sent me a computer disk of material from a marvelous Enochian seminar he presented in Pittston, Pennsylvania. Along with the seminar material, he sent me a collection of photographic files of surviving Dee manuscripts from the British Library and other materials that were of great interest to me. I assure you, I could not have written this book without these materials and the profound insights of this great modern magician.

Around the same time, my publisher sent me a copy of Joseph H. Peterson's book *John Dee's Five Books of Mystery: Original Sourcebook of Enochian Magic*. I had years earlier examined much of this material enlarged from microfilm, but now I had the luxury of comfortably reviewing it in clearer formats (with Latin translations) on my home computer and from Peterson's marvelously well-organized book.

I must confess that even with this information stacked conveniently and legibly under my nose, I was overwhelmed by the sheer immensity of it all. I'm interested in the magical adventures of Dee and Kelley as

much as the next fellow, but I also have a life. Did I need to sacrifice three years of my own life in order to eavesdrop on every detail of three years of theirs? More than ever I saw the wisdom of simply using the magical system Dee and Kelley received and of not wasting precious time trying to recreate the magick they practiced to receive the system. After all, can't I drive a car without first having to build it myself?

But we're not talking about driving cars; we're talking about the art of magick. In the final analysis, no matter what system the magician chooses, in order to make it work most effectively he or she must first become attuned to that system's particular way of viewing of the universe. This concept is so important to the understanding of what will follow in this book that I will pause to illustrate with an example.

The ceremonial magician who practices qabalistic magick acquiesces (at least for the duration of the working) to see all things in heaven and earth in terms of a hierarchy of spiritual personages expressed by the various god names, archangels, angels, spirits, intelligences, and demons of the system. In Qabalah-based magic, such spiritual beings are conveniently organized and arranged according to fourfold formulas dictated by the Hebrew letters that make up the great Name of God, *Yod Heh Vav Heh*, and by the familiar schema of the Tree of Life, with its ten sephiroth and the twenty-two paths that connect them. Before the magician is ready to operate within the laws and peculiarities of this qabalistic worldview, he or she must first become a fit component of that universe—a harmonious and integral part of this great divine machine, a vital step on this hierarchical stairway of consciousness.

Like the ballerina whose ninety minutes on stage is the product of years of practice and thousands of hours of rehearsal, the magical artist must also be first transformed into a proper instrument of his or her craft. Magicians achieve this transformation with preliminary meditations and rituals, by which we adjust our focus step-by-step until we become comfortable citizens of the specific magical world in which we intend to operate. For the western ceremonial magician, the well-worn curriculum of the Golden Dawn provides perfect examples of this step-by-step adjustment process.

First the magician becomes master of the pentagram and a full citizen of the world of the five elements of the microcosmic universe. By repeated performances of the pentagram rituals and meditations, the magician's

psyche becomes balanced and accustomed to the world of the four directional winds, the four elements, and the corresponding magical weapons: the wand, cup, sword, and disk.

Once the elemental (microcosmic) universe is mastered, the magician then moves on to the next step in the attunement process by mastering rituals of the hexagram. Here the magician's point of reference is enlarged as his or her consciousness and identity is obliged to expand from the microcosmic world of the elements to the macrocosmic greater world—the world characterized by the sun orbited by the planets and surrounded by the belt of the zodiac.

This is very basic stuff, but it illustrates how rituals enable the ceremonial magician to externalize internal processes and undergo self-transformation. Would-be magicians who attempt more advanced work without being adjusted by these early attunements are ill prepared to understand or properly absorb what is happening to them within the context of the progressively higher magical environments in which they presumptuously wish to operate. It is true that some magicians may receive seemingly dramatic and noteworthy effects from such premature efforts, but seeds of promise cannot long take root in soil that is not properly prepared or that is too shallow.

Late in 2005, while gathering material for yet another workshop series on Enochian magick for my Monday night magick class, I poured over the records of Dee and Kelley's pre-Enochian workings in hopes of finding the key to their preparatory processes. What exactly did the angels *do* to Dee and Kelley during the years prior to the final Enochian revelations? Dee and Kelley received some pretty interesting things during those earlier workings, including instructions for the creation of an array of magical implements that the Golden Dawn and Crowley all but ignored:

- a Ring;²⁹
- a Lamen, which was to be worn by the magician as a breastplate and which connects him or her to the Holy Table;
- the Holy Table itself, inscribed with letters from an angelic alphabet and upon which would rest the Sigillum Dei Aemeth;
- the Sigillum Dei Aemeth, an intricately carved disk made of purified beeswax (an artifact so stunning and historically

intriguing that it is prominently displayed today in the King's Library wing of the British Museum);

- seven talismans (five squares and two circles), called Ensigns of Creation, which surround the Sigillum on the Holy Table.

All of these items were linked to one another and to the magicians by an overwhelmingly complex process that distilled, shuffled, and organized thousands of letters from numerous and varied alphanumeric grids. These grids had been painstakingly received in vision, one letter at a time, by Kelley and duly transcribed by Dee. The letters spelled the names of great angels, which, in turn, when manipulated, yielded the names of subordinate angels, which produced still more names.

Now, before we get too excited about dusting off and playing with all these pre-Enochian magical tools and furniture, I have to make myself clear on one very important point. These items were received during the first phase of Dee and Kelley's workings.

This period yielded a unique system of planetary magick they referred to as Heptarchia Mystica (see book II). To all appearances, heptarchic magick has little or no direct relationship to the Enochian magick system they received during their final days of practice. Also, it is demonstrably clear (in my mind at least) that Enochian magick can be performed quite effectively without using the Ring, the Lamen, the Holy Table, and so on. However, it is equally clear to me that, as Dee and Kelley were receiving and working with the items and concepts of heptarchic magick, their minds and psychic bodies were, day by day, undergoing subtle yet profound evolutionary changes.

Could the reason the practical Enochian material came so very late in the game be that Dee and Kelley had to first complete their transformation into magicians who could appreciate and handle the advanced work? After all, isn't that what magick is really about—changes in the magician? Could these changes have been brought about by the mere act of meticulously following the angels' complex directions, which filtered and distilled these magical concepts into material manifestation? If so, this would be a vital preparatory step that modern Enochian magicians are omitting entirely.

I grew intrigued with this idea. Given the fact that the GD/Crowley methods of Enochian magick already work so well right out of the box,

how much better might these same techniques work if the magician were first prepared and attuned in a manner similar to the way Dee and Kelley had been prepared and attuned. A magician so equipped would be picking up, as it were, where the two Elizabethans left off in 1584.³⁰

I was at first uneasy with this theory because it came dangerously near to destroying my comfortable philosophy of “Don’t try to duplicate the magick Dee and Kelley did to receive the system—just use the system they received!” However, my inherent laziness was rewarded, and I eventually took comfort in the realization that in order to ceremonially prepare oneself to perform Enochian magick, one might not need to torturously repeat everything Dee and Kelley did to receive the Ring, the Holy Table, the Lamén, the seven Ensigns of Creation, and the Sigillum Dei Aemeth. Instead, one must simply understand and use (in a way that mirrors the preparation process) the Ring, the Holy Table, the Lamén, the seven Ensigns of Creation, and the Sigillum Dei Aemeth that they received!

This book was written to show the practicing Enochian magician how to do precisely that, and the little ritual in chapter one (and outlined in greater detail in appendix I) is the ceremony that embodies this preparation process. Like the rituals of the pentagram that prepare us for elemental magick, like the rituals of the hexagram that prepare us for planetary magick, I believe this little ceremony captures the essence of the step-by-step processes of personal alchemy that prepared and attuned Dee and Kelley.

The material is based on two series of classes that Constance and I held in our home in 2005 and 2006—visionary workings that spanned a period of just over seven months. While the class spent a considerable amount of time discussing and analyzing the magical theories that underlie these methods of preparation, most of our time was spent actually applying the techniques in a formal and ceremonial manner prior to group and individual Enochian scrying sessions.

My biggest challenge, for both the class series and writing this book, has been how best to communicate the essence of the breathtakingly intricate procedures that occupied Dee and Kelley during their years of preparation without enmeshing the reader in a time-devouring web of details. It is somewhat like trying to convey the profundity of a great cathedral without dwelling minutely on every action of every

stonemason who fashioned each perfect stone. I have resolved, therefore, to stay focused on the big picture and allow the reader to wrap his or her mind around the major themes, secure in the knowledge that he or she can proceed to dissect the method of the madness—and discover further revelations—by referring to the now readily available source texts. It is very important for the reader to understand that this book was not written as a substitute for the source material but simply as a guide to the practical, self-transformational applications of this magical art. I advise those of you who may be committed to in-depth academic research of this subject *not* to view my book as an authoritative replacement for the original texts. Dee and Kelley's records are liberally peppered with irregularities, conflicting instructions, missing pieces, and typos. I've done my best to wade through these and be as consistent and accurate as possible. But when I say I'm going to stay focused on the big picture, that is exactly what I mean.

Are you ready to begin? If so, we need to first talk briefly about the mind of Dr. John Dee and explore the reasons why the secrets of heaven and earth were communicated to him in alphanumeric ciphers, tables, and squares.

CHAPTER FOUR

The Mind of a Cryptographer

Now first I understand what he, the sage, has said: "The world of spirits is not shut away; Thy sense is closed, thy heart is dead!"

—FAUST, ACT I, SCENE I³¹

Are angels, spirits, and demons real? Do they have an existence apart from and outside the mind? Ever since human beings could frame thoughts into words, we have asked ourselves that question. It is an eternal debate among magicians and mystics and one that likely will never be resolved to anyone's complete satisfaction. Personally, I agree with the venerable Rabbi Lamed Ben Clifford who said, "It's all in your head. You just have no idea how big your head is."³² Certainly every outside impression we receive is ultimately processed inside our own minds. Just keeping that fact in mind we might conclude that, where objective reality is concerned, there is no outside-of-ourselves.

In either case, in the art of magick, the magician must behave (at least for the duration of the operation) as if the spirits are independent intelligences and have an objective existence in a dimension outside his or her own mind. Dee and Kelley (who believed most fervently in a tangible heaven, hell, and the characters and events of the Bible) certainly assumed that the communicating spirits and angels were real and enjoyed an independent existence. This gave the Elizabethan partners a

decided psychological edge over modern magicians, who must overcome a smug mountain of logic, rationality, and spiritual cynicism in order to even begin to operate this most naïvely romantic of spiritual art forms.

For practical purposes, it does not matter whether the magician is making contact with “spirit” intelligences from a “spirit world” or merely tapping into currently unexplainable levels in his or her own mind. If the magician is properly prepared (and operating under the right circumstance), it is indeed possible for him or her to make contact with intelligences that for all intents and purposes could be characterized (objectively or metaphorically) as angels, spirits, and demons.

No two individuals are alike, and the art of preparing oneself and arranging the right circumstances for spirit contact is unique for every magician. For us to understand the elements of Enochian magick, we will need to get a basic idea of how the spirits went about reaching the minds of Dee and Kelley—especially Dee, who was, after all, the operating magician. In fact, there are instances where the communicating intelligences indicated that they viewed the two magicians as a single entity with Kelley acting as an extension of Dee’s mind. On April 28, 1582, Dee asks of the archangel Michael, “You mean us two (Dee and Kelley) to be joined so, and in mind united, as if we were one man?” and Michael answered, “Thou understandest.”

As I mentioned earlier, Dee was not a particularly talented scryer. Although his diaries record several instances when he saw certain spirits and phenomena, he relied almost entirely on the visionary skills of others. This makes perfect sense to me. Dee’s immense intellect was actually a magical handicap. His magnificent brain was too engaged to surrender its analytical control. His mind worked too fast, and his thoughts were too loud to hear the subtle messages from the spirits. This is not good for mystical experiences. In order for the communicating intelligences to get past Dee’s constantly churning mind, they had to force him to *use* his mind to *overcome* his mind. They had to beat his brain at its own game.

And what were the favorite games of Dr. John Dee’s brain? Ciphers, codes, puzzles, magick squares—these were the arts that touched Dee’s sense of wonder. Had he been obsessed with music, the spirits might have communicated to him through melodies or harmonies or rhythm. Had he been a dancer, they would have communicated through elements

of body movement; had he been a military man, they would have through the metaphors of battle. But he wasn't a musician or a dancer or a soldier. Dee was, at heart, a cryptographer—perhaps the best in the world—and whether he consciously realized it or not, this was how he could make contact with his subconscious mind. This is how he expected the cosmos to unveil her secrets to him. For Dr. John Dee, the secrets of the universe were codes that could be broken. Divine revelation was a matter of decipherment, and he was willing to work for it. Indeed, by working for it, he would prepare himself to receive it. *Give me the raw data, and I will decode the mind of God.*

Dee was already looking for that raw data the day Edward Kelley first knocked on his door. He was looking for it in the *Book of Soyga*.

CHAPTER FIVE

The Book of Soyga

Dee: Is my book of Soyga of any excellency?

Uriel: That book was revealed to Adam in Paradise by God's good angels . . .

Dee: . . . Oh, my great and long desire hath been to be able to read those tables of Soyga.

—JOHN DEE AND THE ARCHANGEL URIEL, MARCH 10, 1582³³

Even before Dee met Kelley he was immersed in the study of a magical treatise written in Latin called *Aldaraia sive Soyga: Tractatus Astrologico magicus* or, more simply, the *Book of Soyga*.³⁴ We know that Dee was intrigued by the *Book of Soyga* because his diary records that it was the subject of one of the very first questions he asked of the archangel Uriel during Edward Kelley's inaugural scrying session on March 10, 1582. In later diary entries he laments that he has misplaced his *Book of Soyga*, and still-later entries indicate that he eventually found it.

The book is an anonymous, late-medieval grimoire of planetary, angelic, and demonic magick that is in many ways not too dissimilar from other magical treatises of the period. However, there are several

things that distinguish *Soyga*—things that obviously made it particularly attractive to Dee. For one thing, a great deal of the text concerns itself with alphanumeric exercises and puzzles; letters with numerical, astrological, and elemental values, which are combined, recombined and reduced to form magick words (spelled forwards and backwards), all of which contain increasingly complex values and magical virtues. As we will see, this magical letter distillation process is characteristic of Enochian magick.

Perhaps most intriguing to Dee were the last eighteen leaves of *Soyga*. These pages contain thirty-six tables, each comprising a grid of 1,296 squares, arranged in 36 x 36 grids. Each of the tables' 1,296 squares is filled with a Latin letter. Together the tables could form a cube comprising 46,656 squares. Each of the thirty-six tables is identified by an astrological or elemental symbol; the first twenty-four are attributed (in pairs) to signs of the zodiac, the next seven to the planets, the next four to the elements (Fire, Water, Air, and Earth), and one simply to "Magistri."^{35,36}

For our purposes, I impress upon the reader's mind the profound importance of alphanumerics and how much information can be encoded within a grid of a magick table. I will try to demonstrate this with a very simple illustration, shown in figure 1.

♄ ¹ A	♁ ² B	♂ ³ C
♃ ⁴ D	♊ ⁵ E	♋ ⁶ F
♌ ⁷ G	♍ ⁸ H	♎ ⁹ I

Figure 1: A simple alphanumeric magick table

This table is made up of nine squares. Each square contains one of nine letters, and these letters can be considered by themselves or in combination with the others to spell magical words. Each individual letter has many traditional meanings attached to it. To keep things simple, I've arbitrarily assigned just two correspondences (numerical and planetary) to each of the letters; these are shown in the corners of each lettered

square. Theoretically, the number of correspondences each square can represent is nearly infinite.

For example, in this particular table, *c* not only represents the letter *c* but also the number three and all things threeish. What do I mean by threeish? One very big example is all things in the universe that *exist* in *time* and have *movement*, and all things that have a *beginning*, a *middle*, and an *end*. In this example *c* also represents Saturn and everything Saturnian (from wisdom and restriction to darkness, old age, and lead).

Like DNA, alphanumeric squares carry an unimaginably vast amount of information in a deceptively small package. As a resident of our 3 x 3 table, the *c* square also carries information drawn from its position relative to the other letters and their correspondences. Can you begin to see how much information is contained in that one little square alone? Imagine, then, the mass of complex data that could be tightly stored in a 36 x 36 x 36 square cube represented by the *Book of Soyga*.

I've discovered no evidence of a direct connection between the *Book of Soyga* and any of the magical workings that led ultimately to the reception of Enochian magick. Nevertheless, the fact remains that even before Dee met Kelley, the mechanics of the alphanumeric cipher system, as presented in *Soyga*, captured Dee's analytical imagination and had become part of the way he expected to receive divine information. Indeed, at every phase of Dee and Kelley's workings, alphanumeric squares and codes would play a major role.

We know Dee held the *Book of Soyga* in high regard and was particularly preoccupied with learning the secrets of the thirty-six tables. The magical process of the *Book of Soyga* (shuffling and distilling immense numbers of letters and squares into smaller and smaller bits of concentrated information) would become the *modus operandi* by which the spirits would ultimately communicate the secrets of Enochian magick to Dee and Kelley. It would be the method by which they received the Holy Table, the Lamen, the Ensigns of Creation, the *Sigillum Dei Aemeth*, the Table of Nalvage, the Elemental Tablets, and, most dramatically, the angelic language and the forty-eight calls. In a way, this process is a metaphor of the mechanics of creation itself. As Carl Sagan³⁷ said, "If you wish to make an apple pie from scratch, you must first create the universe." In this case, our apple pie is the manifest universe—the world as it presently exists—the world Dee and Kelley wished to understand and magically affect.

This world is the end product of a progression of cosmic events that physicists believe began with an immeasurably dense singularity (containing all the potential information that would eventually become the universe) that burst open and set into motion the phases of creation. The immensely packed assembly of thirty-six 36 x 36 alphanumeric squares found in the *Book of Soyga* is a crude but appropriate model for such a singularity. The intricate process of combining, shuffling, and distilling information-packed squares magically mimics the astronomical processes by which atoms and elements to stars and planets were formed in the creation cycle from seemingly chaotic units of a potential universe.

The *Book of Soyga* did not play a direct role in the magical operations of Dee and Kelley, but the patterns and formulae it embodied would remain the methodology of their angelic communications until the end of their association. I believe that the two magicians, by taking part in this incremental process of creation, became personally *attuned* to the magical universe as it presently exists, and thus prepared themselves to receive and engage in Enochian magick. In the chapters that follow, I will present only the briefest snapshots of the step-by-step process that I believe was the *attunement program* that prepared Dee and Kelley to receive the Enochian magick system. Hopefully, by your participation in the process, you also will undergo (however vicariously) a similar transformational experience and become fully prepared to actually practice Enochian vision magick.

But first, let us pray.

CHAPTER SIX

Let Us Pray

No man should ever undertake any great or important undertaking without first invoking the blessing of God.

—Master's admonition, California Free and Accepted Masons

The whole secret may be summarized in these four words: "Inflame thyself in praying."

—ALEISTER CROWLEY³⁸

One of the most fundamental and important magical tools Dee used throughout his life was prayer. So, before we begin to examine magick rings and protective breastplates and holy tables and other such wizardly items, we need to first get something straight about prayer.

It's okay to pray. Even if you think you don't believe in the same God that Dee and Kelley believed in, it's okay to pray. I realize for many twenty-first-century magicians the word *prayer* carries with it unpleasant memories of childhood church and Sunday school traumas, and bedtime fears that "if I die before I wake" somebody was going to take my soul to God knows where.

In magick, prayer has nothing to do with religion. It does, however, have everything to do with the magician's grasp of facts of life in

the magical world in which he or she intends to operate. Part of that reality is the mystical fact that existence itself is an expression of consciousness, and there are levels of consciousness higher and lower than the one we are currently attuned to.

By the simple act of uttering a prayer, our apparently limited consciousness reaches out and makes contact with a higher level of consciousness, and by doing so, we insert ourselves into the divine circuitry of the cosmos. As we do, part of us (a part that we might not be aware of) wakes up, as it were, and recognizes our rightful place in this circuitry.

In my book *The Key to Solomon's Key*,³⁹ I illustrate this concept using the legend of King Solomon as my example. In the excerpt below, I discuss prayer in the context of spirit evocation, but the same thoughts hold true to all forms of magick, including Enochian.

The third chapter of the book of Kings⁴⁰ tells us that at the beginning of his reign the Lord appeared to Solomon in a vision by night and said, "Ask that which I should give you." Solomon answered:

"Give therefore to thy servant an understanding heart to judge thy people and to discern between good and bad; for who is able to judge this thy so great a people?" And it pleased the Lord because Solomon had asked this thing. And the Lord said to Solomon, "Because you have asked this thing and have not asked for yourself riches, neither have you asked the lives of your enemies nor have you asked for yourself long life, but have asked for yourself wisdom to discern judgment; Behold, I have done according to your words; lo, I have given you a wise and understanding heart, so that there has been none like you before you, neither shall any arise after you like you."⁴¹

Before undertaking the task of ruling his people and building the Temple, Solomon doesn't begin by consulting with his inferiors (his ministers, his generals, his architects, his building-supply contractors, or labor leaders). He doesn't immediately enmesh himself in the energy-draining details of micromanaging

such a huge and important project. Instead he turns his attention upward to the highest level of the hierarchical scale of consciousness. He makes direct contact with Deity and, instead of behaving like a helpless youngster asking a parent for pocket money, he boldly makes himself available to serve as a conduit through which the Deity's infinite wisdom and understanding can pass.

This profoundly mature and uncomplicated request is instantly granted, *as if Deity had no choice but to acquiesce*. A unique⁴² spiritual hierarchy is created, with Solomon enthroned midway between heaven and hell—poised to work in cosmic harmony with the divine consciousness above him, poised to compel the infernal spirits to do the same.

This is the primary secret of Solomonic magic. As long as the magician remains plugged in to *that which is above*, he or she is simultaneously plugged into (and must begin to master) *that which is below*.⁴³

Dee's prayers, both in English and Latin, fill page after page of his diaries and magical records. I confess I am neither inclined nor devotionally equipped to follow his exhausting example. I do, however, recognize the efficacy of prayer as an indispensable preliminary to magical operations. And, while I do not personally believe that the biblical Solomon ever existed as such in empirical history, as a magical artist I embrace his myth and happily adopt him as a patron saint of magick.

How appropriate, then, that the first magical tool Dee and Kelley would receive from their angelic contacts was the Ring of Solomon, and that before putting on that ring, the magician must first pray.

BOOK II

De Heptarchia Mystica

CHAPTER SEVEN

The Ring

Lo, this it is. This is it, wherewith all Miracles, and divine works and wonders were wrought by Salomon.

—THE ARCHANGEL MICHAEL, MARCH 14, 1582

The first system of magick Dee and Kelley received from their angelic contacts was a form of planetary magick referred to as De Heptarchia Mystica. It was delivered mostly in late 1582 and amended somewhat the following year. The details of how it was painstakingly received are recorded in Dee's *Quinti Libri Mysteriorum*⁴⁴ and edited for purposes of practical working in his "De Heptarchia Mystica."⁴⁵ Unfortunately, we don't know exactly how, or even if, the magicians actually operated this particular form of magick. What we do know is that besides receiving the names and symbols for forty-nine planetary "good angels" Dee and Kelley were instructed to create a number of magical items—items that were almost entirely ignored by the Golden Dawn and Crowley. These items, I believe, can be extremely important tools for the modern Enochian magician; these are the Ring, the Holy Table, the Ensigns of Creation, the Lamén, and the Sigillum Dei Aemeth.

First we need to examine the Ring, for without the Ring the magicians were told they could "do nothing." Unlike most other things they

would receive from their angelic contacts, the Ring was delivered in a relatively straightforward manner.

I will not quote long passages from Dee's records, but his description of the circumstances surrounding the reception of the magic Ring are so colorfully dramatic that I cannot resist quoting a brief passage. The date is Wednesday, March 14, 1582. Dee and Kelley were engaged in their fourth action⁴⁶ and experiencing a close encounter with the archangels Michael and Uriel. (The following excerpt retains the inconsistent spelling and punctuation of Elizabethan English. The Greek delta, Δ, is Dee, "Mi" the archangel Michael.)

Δ: Now Michael thrust out his right arme, with the sword: and bad the skryer to loke. Then his sword did seame to cleave in two: and a great fyre, flamed out of it, vehemently. Then he toke a ring out of the flame of his sworde: and gave it, to Uriel: and sayd, thus:

Mi: The strength of God, is unspeakable. Praysed be god for ever and ever.

Δ: Then Uriel did make cursy unto him.

Mi: After this sort, must thy ring be: Note it.

Δ: Then he rose, or disapeared, out of the chayre, and by and by, cam again, and sayde, as followeth.

Mi: I will reveale thee this ring: which was never revealed since the death of Salomon: with whom I was present. I was present with him in strength, and mercy.

I.o, this it is. This is it, wherewith all Miracles, and divine works and wonders were wrowght by Salomon: This is it, which I have revealed unto thee. This is it, which Philosophie dreameth of. This is it, which the Angels skarse know. This is it, and blessed be his Name: yea, his Name be blessed for ever.

Δ: Then he layd the Ring down upon the Table: and sayd, Note.

Δ: It shewed to be a Ring of Gold: with a seale graved in it: and had a rownd thing in the myddle of the seale and a thing like an V, through the top of the circle: and an L, in the bottome: and a barr cleane throwgh it: And had these fowre letters in it, P E L E. After that, he threw the ring on the borde, or Table: and it semed to fall throwgh the Table and then he sayde, thus,

Mi: So shall it do, at thy commanndement. Without this, thou shalt do nothing. Blessed be his name, that cumpasseth all things: Wonders are in him, and his Name is WONDERFULL: His Name worketh wonders from generation, to generation.⁴⁷

Figure 2: The Ring

Solomon was, and remains, the archetypal magician, and his legendary exploits as a master of spirits fill the pages of traditional Jewish, Islamic, and Ethiopian religious literature. In many of the stories, his magical ring played an important role as the source of his power to control demons. I can imagine Dee and Kelley were very impressed to be given the Ring of Solomon by none other than the archangel Michael himself.

Although the ring's design is unique, the word PELE (wonder worker) is found in two books which Dee already had in his library: *De Verbo Mirifico* by German humanist and Hebrew scholar Johann Reuchlin and Cornelius Agrippa's *Occult Philosophy*. (Agrippa apparently took the term from Reuchlin.)

Dee was told the Ring should be made of pure gold. If he indeed had one made, it has not survived the centuries. Realistically, few of us today have the skill to fashion or the resources to have a golden ring custom made.⁴⁸ Nevertheless, Michael seemed adamant, “Without this, thou shalt do nothing.” And so I’ve come to the conclusion if I’m to practice this particular art of magick, then before I do *anything*, I’m going to wear the Ring.

Figure 3: Pattern for a paper Ring

Here is the pattern for a Ring that can be made out of colored paper or poster board. I realize such material is not as impressive or romantic as pure gold. You might even think that a true magick Ring cannot be made from a scrap of paper. You might tell me you’d feel silly wearing a paper ring. If you feel this way, then I hope you won’t be offended when I tell you that if you can’t make a real magick Ring out of paper, then you’ll not be able to make one out of gold. The same goes for the other magical items I am going to discuss in the next few chapters.

Before I practice any aspect of Enochian magick, I recite two short prayers. The first is a prayer John Dee used regularly throughout the years of his magical workings:⁴⁹

Teach me (O creator of all things) to have correct knowledge and understanding, for your wisdom is all that I desire. Speak your word in my ear (O creator of all things) and set your wisdom in my heart.

The second is a prayer I fashioned from the words the archangel Michael spoke to Dee and Kelley during their March 14, 1582, action:

Behold the Ring. I.o, this it is. This is it, wherewith all miracles, and divine works and wonders were wrought by Solomon: this is it, which the Archangel Michael has revealed to

me. This is it, which Philosophy dreameth of. This is it, which the Angels scarce know. This is it, and blessed be his name: yea, his Name be blessed forever. Without this I shall do nothing. Blessed be his name, that encompasses all things: Wonders are in him, and his name is WONDERFUL: PELE. His Name works wonders from generation to generation. Amen.

After reciting these prayers and putting on the Ring, I then position myself at the Holy Table and prepare to put on the Lamén.

CHAPTER EIGHT

The Lamén

Beware of wavering. Blot out suspicion of us, for we are God's creatures that have reigned, do reign, and shall reign forever. All our Mysteries shall be known unto you.

—THE ANGEL BRALGES, ONE OF THE ANGELIC PRINCES
NAMED ON THE LAMEN, NOVEMBER 16, 1582, PRINCE
BRALGES, NOVEMBER 16, 1582⁵⁰

The Lamén and the Holy Table are inextricably linked. By wearing the Lamén over the heart, the magician becomes linked to the Holy Table. I cannot say it any plainer than that. But putting on the Lamén and sitting at the Holy Table are empty gestures unless the magician has some idea of what these items represent and how they are connected.

The designs for both the Lamén and the Holy Table were distilled from tables composed of letters of the names of planetary angels of the Heptarchia. Even though the chronology of their reception is a bit tangled, it is probably easiest to discuss the Lamén first.

Traditionally a Lamén is a breastplate that is hung from the neck by a chain or ribbon. The breastplate of the high priest of Israel is the biblical archetype for this most important piece of magical adornment. It was a square plate, a 3 x 4 grid embedded with twelve precious stones representing, among other twelveish concepts, the tribes of Israel

and the signs of the zodiac. The Lamén that the angels delivered to Dee and Kelley contained no precious stones but displayed eighty-four angelic letters arranged in a most curious and exacting manner.

Two versions of the Lamén were received by Dee and Kelley. The first, delivered in 1582, was a rather odd assortment of lines, squiggles, and letters reminiscent of Solomonian or Goetic sigils. This Lamén, they were told, was to be made in gold and worn as a protective device. After receiving it, the magicians spent the rest of the year and part of 1583 receiving material relating to the forty-nine planetary good angels of the Heptarchia (see figure 5).

The seven-letter names of these angels were received (much to Dee's cryptographic delight, I'm sure) by the complex manipulation and distillation of letters from a cross-shaped table composed of seven 7 x 7 tables (343 squares in all, each containing a number and a letter). This process was dictated by the archangel Michael during a grueling three-hour session. Just to give you an idea of the shape and size of this table, I've included a rough image without the letters and numbers.

Figure 4: Cross of 343 letters and numbers

The magicians were then instructed how to organize and arrange these 343 letters to reveal the hierarchy of planetary good angels. Each of the seven planetary spheres was assigned a king, a prince, and five ministers. Figure 5 shows how the 343 letters form the names of the forty-nine good angels and how they are arranged according to planet (starting at the top of the wheel and working counterclockwise: Venus, Luna, Saturn, Mercury, Jupiter, Mars, Sol). Note also that only the names of the kings and princes are in all capital letters.

Figure 5: The forty-nine good angels (seve kings, seven princes, thirty-five ministers,

- 37. Prince BRALGES
- 38. Minister Bormila
- 39. Minister Buscnab
- 40. Minister Bminpol
- 41. Minister Bartiro
- 42. Minister Bliigan

It is obvious from the surviving material that some technique of practical magic was intended to call forth the heptarchic kings, princes, and ministers. Illustrations of flat wooden disks containing the names of the kings and other unexplained characters tantalize us with glimpses of an organized magical system. But the sad fact remains that important source material that could shed light on this has not survived the centuries.

However, just as amber encapsulates and preserves the essence of a prehistoric insect (right down to the DNA), so too the Lamén and the Holy Table capture the distilled essence of the heptarchic hierarchy and system.

After receiving the names, sigils, and hierarchical structures of the forty-nine good angels, the magicians were informed that the first Lamén they received during their actions the previous year was a false one, delivered to them by an “illuding spirit.” They were given instructions how to create a new one, which was to be worn not for protection per se, but in order to “dignify” the magicians as worthy practitioners of this form of magick.

I’m going to try to illustrate (as painlessly as possible) how both the Lamén and the Holy Table were created and why I believe their use in Enochian magick is important. Now, the reader might be tempted to skim over the following material, invoking my slogan, “Don’t try to duplicate the magick Dee and Kelley did to receive the system—just use the system they received.” But I beg you to resist that temptation. By following through (even halfheartedly) the methods by which these magical tools were constructed, you will slip, however subtly, into the divine creative stream that produced them. You will become part of the same process that programmed and prepared Dee and Kelley.

The key to the construction of the Lamén was a 12 x 7 table containing the letters of the names (minus the initial b^{51}) of the seven planetary heptarchic kings and their princes (see figure 6).

Mimicking the cooling phases of Big Bang creation, this 12 x 7 table was condensed from the 343 lettered squares of the much larger cross-shaped table (see figure 4).

	Princes						Kings						
<i>B</i> ornogo ♀	O	G	O	N	R	O	L	E	G	O	B	O	<i>B</i> obogel ☉
<i>B</i> efafes ☉	S	E	F	A	F	E	L	E	L	A	B	A	<i>B</i> abalel ♂
<i>B</i> utmomo ♂	O	N	O	M	T	U	R	O	P	E	N	Y	<i>B</i> ynepor ♃
<i>B</i> lisdon ♃	N	O	D	S	I	L	L	O	P	S	A	N	<i>B</i> naspol ♀
<i>B</i> rorges ♀	S	E	G	R	O	R	N	E	S	P	A	N	<i>B</i> napsen ♃
<i>B</i> ralges ♃	S	E	G	L	A	R	A	Z	A	M	U	L	<i>B</i> lumaza ☽
<i>B</i> ageno ☽	L	O	N	E	G	A	N	O	G	I	L	A	<i>B</i> aligon ♀

Figure 6: The 12 x 7 table of the Lamén

As you can see, the names of the kings are found on the right half of the table, the names of the princes on the left half. The names in *this* table are read from right to left. You will immediately notice that the kings of one planet are not matched on the same line as the prince of the same planet (e.g., the sun ☉ king, Bobogel, is set on the same line with the Venus ♀ prince, Bornogo, instead of on the line of the sun ☉ prince, Befafes).⁵² This odd juxtaposition of planetary king and prince puts a certain strain on the sensitivities of those of us who like the order of our universe nice and symmetrical. However, this is the arrangement the angels insisted upon for the 12 x 7 table from which the Lamén was to be formed. As we will soon see in the following chapter, they will rectify the imbalance in the 12 x 7 table in order to create the Holy Table. But first let's continue to see how the Lamén is built.

The basic form of the Lamén is a table of twenty-four squares (arranged from top to bottom: 2—4—6—6—4—2) enclosed within diamond square, enclosed by a square, enclosed by a larger square.

Figure 7: Blank Lamén form

The letters of the 12 x 7 table were applied to the Lamén by means of an exercise that first divided the table into three sections, described as flesh, heart, and skin. The letters were then transferred to the blank Lamén in three steps.

Step One: The letters of the *flesh* were added to the perimeter of the Lamén in their same relative positions to the 12 x 7 table.

O	N	R	O	L	E	G	O	
F	A	F	E	L	E	L	A	
O	M						P	E

G	L	A		R	A		Z	A	M
N	E	G		A	N		O	G	I

Figure 9: Letters of the flesh on the Lamén

Step Two: The letters of the *heart* were added to the corners of the next inner square of the Lamén in a curiously inconsistent manner. (I've added arrows indicating how the letters are applied.)

Figure 10: Letters of the heart

Figure 11: Letters of the heart on the Lamén

Step Three: First, the corners of the *skin* letters were added to the corners of the innermost diamond square of the Lamén in a manner consistent with their relative positions on the 12 x 7 table. Second, the remaining twenty-four letters of the 12 x 7 table were then braided into the remaining squares in the center of the Lamén.

Figure 12: Letters of the skin

Figure 13: Letters of the skin on the Lamén

Figure 14: Completed Lamén (Latin letters)

Dec was told that the Latin letters of the finished Lamén should be translated into the angelic script. (I'll discuss the angelic alphabet a bit later.) Figure 15 shows the completed Lamén with angelic letters.

As with the Ring, gold was the material suggested for the Lamén, but it can be made from paper or poster board. The Lamén I first used was printed on both sides (Latin letters on one side, angelic script on the other) and laminated in plastic. In the area just above the top center I punched a hole through which I threaded a black ribbon.

Figure 15: Completed Lamen (angelic letters)

As I put on the Lamen I utter the prayer:⁵³

Behold the Lamen. As the Holy Table conciliates Heaven and Earth, let this Lamen which I place over my heart conciliate me to the Holy Table. Amen.

To understand what I mean by that prayer, we'll next need to turn our attention to the Holy Table.

The Holy Table

Every one of those sides must have 21 Characters: But first, at every corner make a great B.

—THE ANGEL IL, APRIL 28, 1583⁵⁴

Magick tables were nothing new to Renaissance magicians. Unlike the protective circle and triangle spirit-trap apparatus used by Solomonic magicians, a properly consecrated magick table in a room transforms the entire chamber into holy ground. The table itself becomes the Holy of Holies, the place whereupon earth and heaven touch. Drawings of the period show the magician on his knees, his arms stretched in supplication, before a magick table sheltered by a conical tent.

Dee was already using a table of practice before Edward Kelley entered the picture, but afterwards, as the elements of the heptarchic magick developed, it became clear that the communicating spirits wanted Dee to customize his table in a most specific manner. The angels wanted the Holy Table to be an “instrument of conciliation,” made of “sweet wood,”⁵⁵ and built two cubits square and two cubits high.⁵⁶ The table was to stand upon a carpet of red silk that was large enough to accommodate the scryer’s chair. Once the Sigillum Dei Aemeth and the seven Ensigns of Creation were in position, the Holy Table was covered by a red silk cloth with gold tassels that hung from the corners.

The scrying stone or black mirror was then placed upon the covered Sigillum.

The public's first view of the Holy Table (sometimes referred to as the Table of Covenant or Table of Practice) was published in 1659 by Meric Casaubon in his *A True & Faithful Relation . . .*⁵⁷ It was Casaubon's image that was reproduced in 1912 in Aleister Crowley's magazine *The Equinox*⁵⁸ and numerous books since then.

It may come as a surprise to many (and be highly amusing to others) that Casaubon's impressively printed image of the Holy Table is perhaps the greatest flaw in his liberally flawed and ill-titled *A True & Faithful Relation*. One look at the description and drawing in Dee's *Quinti Libri Mysteriorum: Appendix*⁵⁹ reveals the eighty-four letters that form the border of the Holy Table and the twelve letters that fill the 3 x 4 center square of Casaubon's image are printed in backward order. Figures 16 and 19 illustrate the correct arrangement of the letters on the Holy Table.

Figure 16: The Holy Table with Ensueis of Creation

The Holy Table and the Lamén are inextricably linked. By wearing the Lamén, the magician is linked, or conciliated, to the Holy Table. The object that forms this magical link and serves as the common denominator between the Holy Table and Lamén is the same 12 x 7 table that was used to construct the Lamén—the same table that bore the names of the seven planetary kings and the seven planetary princes of the heptarchic hierarchy.

Did I say the *same* 12 x 7 table? That's not entirely accurate.

Recall that when we were discussing the 12 x 7 table in the previous chapter, something appeared out of whack. The names of the planetary kings did not share the same lines as their planetary counterpart prince (e.g., the sun ☉ king, Bobogel, is set on the same line with the Venus ♀ prince, Bornogo, instead of his sun ☉ prince, Befafes). This planetary mismatch in the 12 x 7 table's construction did not appear to bother the angels, and indeed the "flaw" seemed to be a vital characteristic of the Lamén.

As you can see in Figure 17, the version of the 12 x 7 table that is the key to the Holy Table "corrects" this imbalance by rearranging the names of the planetary kings to match those of the princes of the same planet. Furthermore, the table is reversed, so that the kings now occupy the left side of the table and princes the right, and the direction in which the names are read is reversed to read from left to right.

	Kings							Princes							
	→							→							
<i>B</i> aligon ♀	A	L	I	G	O	N	O	R	N	O	G	O	<i>B</i> ornogo ♀		
<i>B</i> obogel ☉	O	B	O	G	E	L	E	F	A	F	E	S	<i>B</i> efafes ☉		
<i>B</i> abalel ♂	A	B	A	L	E	L	U	T	M	O	N	O	<i>B</i> utmomo ♂		
<i>B</i> ynepor ♃	Y	N	E	P	O	R	L	I	S	D	O	N	<i>B</i> lisdon ♃		
<i>B</i> naspol ♀	N	A	S	P	O	L	R	O	R	G	E	S	<i>B</i> rorges ♀		
<i>B</i> napsen ♃	N	A	P	S	E	N	R	A	L	G	E	S	<i>B</i> ralges ♃		
<i>B</i> lumaza ♃	L	U	M	A	Z	A	A	G	E	N	O	L	<i>B</i> ageno ♃		

Figure 17: The 12 x 7 table adjusted to create the Holy Table

In my mind, the differences between the two 12 x 7 tables demonstrate a fundamental fact of life—the fact that even though human

beings are an integral part of the hierarchy of spiritual beings, we currently find ourselves “on earth,” trapped in a tomb of matter and to all appearances separated from the greater realities of the spiritual “heavens.”

Qabalists tell us that we are created in the image of Deity—that we are, in the truest sense, a little reflection (a microcosm) of the great intelligence and creative force that creates, sustains, and destroys all things in the universe (the macrocosm). As Hermes Trismegistus said, “As above, so below.”

That’s all fine and good, and I go about my magical business as if it were true. But honestly, even though I’m composed of the same material that makes up the sun and moon and stars and angels and archangels and the supreme Deity, even though I am striving for self-awareness and do my best to be a divinely creative individual, still I don’t feel much like the macrocosmic Deity. Compared to the macrocosm, my microcosm is way out of whack. My life is one of stress and imbalance. From where I stand, there is a very big break between Deity’s above and Lon Milo DuQuette’s below. I’m like the 12 x 7 table from which the Lamén is created: I’ve got all the condensed components of a perfectly tuned universe in me, but they are out of sync just enough to keep me from actually being the perfect reflection of the big “way things are.”

I can really identify with the way the Lamén is constructed. Like it, my hierarchy of planets is mismatched and unbalanced. (Take one look at my astrological chart if you don’t believe it!) Like the curious inconsistencies that characterize how the individual letters are transferred from the 12 x 7 table to the Lamén, my individual components are a litany of curious inconsistencies.

The 12 x 7 table that makes the Holy Table, on the other hand, sets this all straight. It is like the macrocosm showing the microcosm how it’s done. As I sit before the Holy Table with the Lamén over my heart, I can almost feel the Holy Table’s order and perfection pulling magnetically at my heart through the Lamén, connecting me by an almost tangible electric current to the Holy of Holies, pulling my heart and my attention toward the sacred spot in my living-room temple where heaven touches earth. The Holy Table is indeed an *instrument of conciliation*, an instrument of reunion.⁶⁰

The letters of the 12 x 7 table are transferred to the Holy Table in the following manner. First, to make things a little easier to see let’s turn the 12 x 7 table on its end.

Top	>	O	S	O	N	S	S	L
Edge	>	G	E	N	O	E	E	O
	>	O	F	O	D	G	G	N
Left	>	N	A	M	S	R	L	E
Edge	>	R	F	T	I	O	A	G
	>	O	E	U	L	R	R	A
Bottom	>	N	L	L	R	L	N	A
Edge	>	O	E	E	O	O	E	Z
	>	G	G	L	P	P	S	A
Right	>	I	O	A	E	S	P	M
Edge	>	L	B	B	N	A	A	U
	>	A	O	A	Y	N	N	L

Figure 18: The Holy Table's 12 x 7 table turned on its end

The border of the Holy Table is first segmented into twenty-one cells per side. Per angelic instructions, the sacred letter *B* is placed in the four corners, and then the letters of the 12 x 7 table are inserted in the remaining cells as indicated by the four sets of arrows on figure 18. The 3 x 4 square in the center of the Holy Table is extracted from the central heart of the 12 x 7 table, as highlighted in figure 18.

The arrows around the edges of figure 19 (see page 54) show that the letters are arranged to generate a counterclockwise whirl. In the Ritual of Preparation of chapter one, I chant seven rounds of the perimeter letters in this order using the angelic pronunciation. I also do the same for the twelve letters of the center square. By doing so, I effectively activate the Holy Table and the objects that sit upon it (including the Sigillum Dei Aemeth, the Ensigns of Creation, and the skrying mirror). The chant affects a powerful shift in consciousness unlike anything I have experienced before in magical practice.

As the manifest universe is the evolving end product of the dynamic forces that created it, so too the Holy Table manifests on earth as the perfect miniature working model of the heavenly matrix. It is a magical machine with many moving parts, all in perpetual motion.

Picture in your artist/magician's mind how, like the stars in the rotating arms of a spiral galaxy, the eighty-four *angelic letters* that form

Figure 19: Master key to the Holy Table

the border of the Holy Table circumscribe the other objects on the tabletop with an eternal counterclockwise movement around the *outside* of the table's *hexagram* (symbol of the macrocosm).

Within, the twelve *angelic letters* in the 3×4 square in the center of the Holy Table's hexagram churn with the dynamics of the up-down/right-left movement suggested by its four rows of three letters networked with its three columns of four letters.

The Lamén is born of the same alphanumeric codes as the Holy Table, but its construction is flawed by a slight imbalance. So too the magician, in his or her present state, is the seemingly flawed *microcosmic* reflection of Deity. By wearing the Lamén, the imperfect magician is linked to the perfection of the Holy Table, and while in this exalted state may become privy to the secrets of the *macrocosmic* universe.

CHAPTER TEN

The Sigillum Dei Aemeth

Seven, rest in 7: and the 7, live by 7: The 7, govern the 7: And by 7 all Government is.

—THE ARCHANGEL MICHAEL, MARCH 20, 1582⁶¹

Figure 20: The Sigillum Dei Aemeth

The design of Dee's Sigillum Dei Aemeth ("the seal of God's truth") is perhaps the most recognizable image of Enochian magick. It is a powerful magical device, alive with the angelic forces of an ordered universe in which "Seven, rest in Seven: and the Seven, live by Seven: The Seven, govern the Seven: And by Seven all Government is."

Unlike the hierarchies of the Lamien and the Holy Table, the Sigillum's hierarchy of angels was not condensed, distilled, or otherwise generated from the seven 12 x 7 tables from which the names of the forty-nine good angels were drawn. Nevertheless, the Sigillum is the centerpiece of heptarchic magick and is the object through which all heptarchic energy (if we dare call it that) is focused.

The Sigillum itself was a disk nine inches in diameter and approximately an inch and a half thick. It was made of pure beeswax and placed in the center of the Holy Table. The scrying crystal or black mirror was placed upon it. Four smaller wax versions were placed beneath small boxes, upon which stood the four legs of the Holy Table.

Dee was first told to simply copy the design from a book he already had in his library. But Dee had at least two volumes⁶² that contained designs for sigilla. He couldn't make up his mind which one to use, so he asked for further clarification. The angel then gave instructions how to construct an entirely new sigillum based on the format of the others but adding an array of heavenly personages: seven god names enclosing seven sets of angelic names.

It is clear to me that the construction of the Sigillum was a vital step in Dee and Kelley's preparation program and that construction can serve that same important purpose to the modern magician as well. I'm going to walk you through the steps of how it is constructed, because I hope readers who are serious about actually *doing magick*, rather than merely studying it, will want to build their own.

I've provided you with a blank sigillum (figure 21), and I encourage you to make multiple photocopies of it. Enlarge it, if you wish, to nine inches in diameter. Then follow the step-by-step instructions. As you do, you will not only be building this magical device on paper, but you also will be installing it inside yourself. Constructing your own Sigillum Dei Aemeth is the fastest and easiest way I know to meet and connect with the angelic forces resident in the design and make them part of *you*. It may take you several tries to get it all right,

but I'm confident when you have completed your Sigillum you will think it worth the effort.

Figure 21: Blank Sigillum Dei Aemeth form

Building the Sigillum

Step One: The Seven God Names

The seven god names were drawn from numbers and letters that appear in the forty cells that make up the perimeter of the Sigillum. The magicians were told to divide the outer perimeter of a blank ring into four sections. Then they were to divide each of the four sections into ten (making forty cells in all). Kelley then had a dramatic and colorful

vision, facilitated by the archangel Michael, with the help of Uriel and the angel Semiael. In this vision, forty angels stepped forth, one at a time, and parted their garments to reveal one of three things:

1. a number positioned above a letter,
2. a letter positioned above a number, or
3. a single letter.

Some of the letters were capitalized, but most were lowercase. As they revealed their letters and numbers, each of the forty angels also uttered a different pious declaration in Latin, such as, “O God, God, our God, blessed are you, now and forever” or “And you are true in your works.” Then the angel disappeared or was consumed in flashes of fire or other such dramatics. The magicians were then left with a string of numbers and letters, which I’ve arranged in a table (see figure 22).

4	9	7	t	22	6	22	20	14	6	18	26	<i>l</i>	<i>l</i>	7	13	H	y	t	e	10	11	15	8	r	6	o	5	h	o	a	a	h									
→	T	G	n	9	n	m	o	a	n	a	h	o	<i>l</i>	30	n	8	G	r	12	og	15	11	8	21	b	A	I	a	16	n	A	10	G	14	17	s	5	24	111		

Figure 22: Outer perimeter bar code (the lowercase letter l is italicized so as to not be confused with uppercase I)

First make sure your blank Sigillum is oriented so that the pentagram in the center is pointing toward the top of the page. Then refer to figure 23 and locate the topmost cell of the Sigillum’s outer perimeter—the cell that contains the number 4 over the capital letter T. Fill in that cell with a 4 over a T. Then, referring to the table (figure 22) and moving clockwise, fill in the remaining thirty-nine cells of the outer perimeter of your blank Sigillum as you see them in figure 23.

From the letters and numbers of the perimeter the seven god names and their sigils are drawn. The starting points for the god names are the cells that contain capital letters. These are also identified in figure 22 with asterisks beneath them.

Galas

Figure 24: Sigil of Galas

Starting at the cell with 9/G in it (near the top of the circle), count nine cells clockwise (because the *number* is above) to 6/a. From there, count six cells clockwise to l/8. Count eight cells *counterclockwise* (because the *letter* is above) to 20/a. Count twenty cells clockwise to 8/a. Count eight cells clockwise to the single letter s. Because there is no number assigned to the s cell, we know that s is the final letter to this god name.

When all the counting is done, we have spelled the god name *Galaas*. The archangel Michael would later advise Dee and Kelley to alter the spelling (an archangel's prerogative) to *Galas*.

Michael assigned Galas a characteristic sigil and a number (see figure 24). He also instructed that the sigil and number of Galas should be placed on the Sigillum, in the area between the perimeter of cells and the outer bar of the heptagon at approximately the eleven o'clock position (see figure 32). Although a connection is not mentioned overtly in the original material, the god name *Galas* and its sigil are generally considered by many modern Enochian magicians to be associated with the qabalistic planetary sphere of Saturn.

Gethog

Figure 25: Sigil of Gethog

Starting with 7/G (near the bottom of the circle), count seven cells clockwise to e/21. Count twenty-one cells counterclockwise to t/9. Count nine cells counterclockwise to h/14. Count fourteen cells counterclockwise to the unnumbered letters og to finish the god name *Gethog*.

Michael assigned Gethog the sigil and number shown in figure 25 and instructed that they should be placed on the Sigillum in the area between the perimeter of cells and the outer bar of the heptagon at approximately nine o'clock (see figure 32). Although a connection is not mentioned overtly in the original material, the god name *Gethog* and its sigil are generally considered by many modern Enochian magicians to be associated with the qabalistic planetary sphere of Jupiter.

Thaoth

Figure 26: Sigil of Thaoth

Starting with 4/T (near the top of the circle), count four cells clockwise to 22/h. Count twenty-two cells clockwise (because the *number* 22 is on top) to 11/A. Count eleven cells clockwise to a/5. Count five cells counterclockwise to o/10. Count ten cells counterclockwise to t/11. Count eleven cells counterclockwise to the cell that contains the single letter *h* to finish the god name *ThAaoth*.

Again using his archangel's prerogative, Michael later advised Dee to slightly alter the spelling to *Thaoth*. He also assigned Thaoth the sigil and number shown in figure 26 and instructed that they should be placed on the Sigillum in the area between the perimeter of cells and the outer bar of the heptagon at approximately seven o'clock (see figure 32). Although a connection is not mentioned overtly in the original material, the god name *Thaoth* and its sigil are generally considered by many modern Enochian magicians to be associated with the qabalistic planetary sphere of Mars.

Horlōn

Figure 27: Sigil of Horlōn

Starting with 11/12 (near the bottom of the circle), count twelve cells counterclockwise to 22/o. Count twenty-two cells clockwise to

r/16. Count sixteen cells counterclockwise to 26/l. Count twenty-six cells clockwise to 6/ω.⁶³ Count six cells clockwise to single letter *n*, producing the god name *Horlōn*.

Michael assigned Horlōn the sigil and number shown in figure 27 and instructed that they should be placed on the Sigillum in the space between the perimeter of cells and the outer bar of the heptagon at six o'clock (see figure 32). Although a connection is not mentioned overtly in the original material, the god name *Horlōn* and its sigil are generally considered by many modern Enochian magicians to be associated with the qabalistic planetary sphere of Sol.

Innon

Figure 28: Sigil for Innon

Starting with 15/I (near the left-hand side of the circle), count fifteen cells clockwise to 7/n. Count seven cells clockwise to 14/n. Count fourteen cells clockwise to o/8. Count eight cells counterclockwise to the single letter *n*, producing the name *Innon*.

Michael assigned Innon the sigil and number shown in figure 28 and instructed that they should be placed on the Sigillum in the area between the perimeter of cells and the outer bar of the heptagon at approximately four o'clock (see figure 32). Although a connection is not mentioned overtly in the original material, the god name *Innon* and its sigil are generally considered by many modern Enochian magicians to be associated with the qabalistic planetary sphere of Venus.

Aaoth

Figure 29: Sigil for Aaoth

With Aaoth, you have your choice of either (1) starting at 11/A (near the left-hand side of the circle) and counting eleven cells clockwise

to a/5 or (2) starting with 6/A (near the left-hand side of the circle) and counting six cells clockwise to a/5.

In either case, once you get to a/5, count five cells counterclockwise to o/10. Count ten cells counterclockwise to t/11. Count eleven cells counterclockwise to finish at *h*, producing the god name *Aaoth*.

Michael assigned Aaoth the sigil and number shown in figure 29 and instructed that they should be placed on the Sigillum in the space between the perimeter of cells and the outer bar of the heptagon at approximately two o'clock (see figure 32). Although a connection is not mentioned overtly in the original material, the god name *Aaoth* and its sigil are generally considered by many modern Enochian magicians to be associated with the qabalistic planetary sphere of Mercury.

Galethog

Figure 30: Sigil of Galethog

Starting at 5/G (near the left-hand side of the circle), count five cells clockwise to a/24. Count twenty-four cells counterclockwise to l/30. Count thirty cells counterclockwise to e/21. Count twenty-one cells counterclockwise to t/9. Count nine cells counterclockwise to h/14. Count fourteen cells counterclockwise to the single letters *og*, producing the name *Galethog*.

Michael assigned Galethog the sigil shown in figure 30 and instructed that they should be placed on the Sigillum in the area between the perimeter of cells and the outer bar of the heptagon at approximately one o'clock (see figure 32). Although a connection is not mentioned overtly in the original material, the god name *Galethog* and its sigil are generally considered by many modern Enochian magicians to be associated with the qabalistic planetary sphere of Luna.

These seven god names—*Galas*, *Gethog*, *Thaoth*, *Horløn*, *Innon*, *Aaoth*, and *Galethog*—are distilled into one supreme name. Strangely enough, the great name is also spelled *Galethog*. The code that reveals this distillation can be found on those little numbers that appear beside six of the sigils of the god names. Let's take a look at the supreme god name as it appears with the sigils.

Figure 31: Supreme god name of the Sigillum Dei Aemeth

Obviously, the sigils of the divine names contain the stylized letters G, a, l, xe, t, and og. The little numbers beside the letters point out seven landmarks among the forty cells: 5/G, a/24, l/30, e/21, t/9. Og has no number attached to it, confirming that it is the end of the supreme god name.

Figure 32: The seven god names and their sigils

Step Two: The Seven God Names of the Outer Heptagon and of the Planetary Archangels

A heptagon (a seven-sided figure) rests just inside the perimeter of the Sigillum. Each of the seven bars that compose the heptagon is divided into seven cells and is filled with the names of the next order of angels

in the hierarchy of the Sigillum. These seven names were drawn from a 7 x 7 (sevenfold) table delivered to Dee and Kelley in a series of brief and colorful visions (see figure 33).

Z	l	l	R	H	i	a
a	Z	C	a	a	c	b
p	a	u	p	n	h	r
h	d	m	h	i	a	i
k	k	a	a	e	e	e
i	i	e	e	l	l	l
e	e	l	l	M	G	±

Figure 33: The first sevenfold table

The names are read horizontally and are inserted in the bars of the outer heptagon as shown in figure 34.

Figure 34: God names of the outer heptagon

When the table is read vertically, however, the names of the seven classic planetary archangels appear:

Zaphkiel	(Saturn)	Zadkiel	(Jupiter)
Cumael	(Mars)	Raphael	(Sol)
Haniel	(Venus)	Michael	(Mercury)
Gabriel	(Luna)		

These archangels were assigned to these planets many years before Dee and Kelley received them and could have been found in any number of books in Dee’s library. However, Dee and Kelley insisted that the table was given to them before they noticed these names were generated by the table. Whether we choose to believe their assertion or not, the fact remains that these particular angels are not unique to the Enochian system.

Figure 35: Planetary archangels from the first sevenfold table

In order to read each archangel's name using the seven god names on the bars of the heptagon, we are obliged to project the letters in progressive layers rising from the surface of the Sigillum itself. I wish I could graphically illustrate this using the modern magick of animation, but you can demonstrate this for yourself. Let's turn to the first table in figure 35 and use the name of the planetary archangel of Saturn, Zaphkiel, as our example.

Start with the capital Z found in the first cell of the name *ZllRHia*, then move to the first cell of the name *aZCaacb* (to pick up the *a*), then move to the first cell of the name *paupnhr* (to pick up the *p*), then move to the first cell of *hdmhlaI* (to pick up the *h*), then move to the first cell of *Kkaaeee* to pick up the *K*, then move to the first cell of *eellMG* (to pick up the *e*). Finally, move to the *second* cell of the *ZllRHia* bar of the heptagon and pick up the final *l* to spell *Zaphkiel*.

I hope you can visualize what happens every time you move to another bar of the heptagon to pick up a letter in the archangel's name. As you move, you are literally shifting the dimensional structure of the Sigillum up another level—in the case of *Zaphkiel*, eight levels in all (see figure 36). (Picture the multilevel chess game played by characters on *Star Trek*.)

Figure 36: The name of the planetary archangel Zaphkiel spelled in eight layers above the Sigillum

Compound this with the fact that Zaphkiel's name is braided together in these same layers with the names of the six other archangels' names. Viewed this way, the Sigillum is no longer a flat image placed on the flat surface of the Holy Table. It is a multidimensional space hovering over the Holy Table—a magical basket formed of the netting of the entwined letters of the names of the seven planetary archangels. It is

within this invisible basket that the scrying stone or black mirror is placed during the magical operation. Is it any wonder visions appear in such an environment?

But we're far from through with the wonders of the Sigillum. Fill the cells of your personal Sigillum's outer heptagon, and then let's move inward another step.

Step Three: The Seven Names of the Planetary Angels Beneath the Bars of the Outer Heptagon

Just inside the bars of the outer heptagon are seven more divine names. These names are drawn from a second 7 x 7 (sevenfold) table given to Dee and Kelley, letter by letter, in vision. These names are read horizontally and placed beneath the bars of the outer heptagon.

S	A	A	I ²¹ / ₈	E	M	E ₈
B	T	Z	K	A	S	E ₃₀
H	E	I	D	E	N	E
D	E	I	M	O	₃₀	A
I [•] / ₂₆	M	E	G	C	B	E
I	L	A	O	I ²¹ / ₈	V	N
I	H	R	L	A	A	²¹ / ₈

Figure 37: The second sevenfold table

You will immediately notice some of the squares in this table contain tiny numbers (21 over 8, 8, 26, 30, and so on) and variously placed dots. These are added to indicate the addition of the letter *l* or letters *el* or *al* (angelic suffixes) to the letter in the square, the better to spell out the names of the various angels this table will produce.

These names of these seven great angels are added to the Sigillum as shown in figure 38.

Figure 38: Names of the seven planetary angels beneath the bars of the outer heptagon

Step Four: The Daughters of the Light

Five more sets of planetary angels are drawn from the second sevenfold table. The first set was revealed in vision by seven young women (called "Daughters of Light" or "Women") clad in green silk. Each bore a little blue tablet on her forehead that identified her by name: El, Me, Ese, Iana, Akele, Azdobn, and Stimcul.

The names of the Daughters of Light are drawn from the second sevenfold table by reading the upper right section of the table in a diagonal, downward direction.

S	A	A	I ²¹	E	M	E
B	T	Z	K	A	S	E
H	E	I	D	E	N	E
D	E	I	M	O	A	
I ²⁶	M	E	G	C	B	E
I	L	A	O	I ²¹	V	
I	H	R	L	A	A	E ²¹

Figure 39: Names of the Daughters of Light on the second sevenfold table

Although the angels were not identified with planets in the original material, the manner in which the vision proceeded to reveal these names suggests these seven angels carry the following planetary assignments:

E(l)	Saturn	Me	Jupiter
Ese	Mars	Iana	Sol
Akele	Venus	Azdobn	Mercury
Stimcul	Luna		

The names of the Daughters of Light are placed on the Sigillum in clockwise order in the points created by the interlocking lines of the heptagram (see figure 40).

Figure 40: The Daughters of Light on the Sigillum

Step Five: The Sons of the Light

Next came seven young men (called the “Sons of the Light” or “Men”) dressed in white, each carrying a metal ball: the first ball was gold, the second silver, the third copper, the fourth tin, the fifth iron, the sixth quicksilver, and the seventh lead. Each had a tablet of gold on his breast that identified him by name: I, Ih, Ilr, Dmal, Heeoa, Beigia, and Stimcul.

The names of the Sons of Light are drawn from the second sevenfold table by reading the lower left section of the table in a diagonal, downward direction.

S	A	A	I ²¹ ₈	E	M	E ⁸
B	T	Z	K	A	S	E ³⁰
H	E	I	D	E	N	E
D	E	I	M	O ³⁰	A	
I ³⁰	M	E	G	E	B	E
I	L	A	O	I ²¹ ₈	V	N
L ²¹ ₈	H ²¹ ₈	R ²¹ ₈	L ²¹ ₈	A ²¹ ₈	A ²¹ ₈	E ²¹ ₈

Figure 41: Names of the Sons of Light on the second sevenfold table

The metal of the ball carried by each of these characters suggests these seven angels carry the following planetary assignments:

I	Saturn	Ih	Jupiter
Ilr	Mars	Dmal	Sol
I leeo	Venus	Beigia	Mercury
Stimcul	Luna		

The names of the Sons of Light are placed on the Sigillum in clockwise order on the interlocking bars of the heptagram (see figure 42).

Figure 42: The Sons of Light on the Sigillum

Step Six: The Daughters of Daughters of the Light

Next came seven “little wenches” (“Daughters of Daughters”) dressed in white, having tablets, which appeared to be white ivory, on their bosoms, identifying them as S, Ab, Ath, Izad, Ekiei, Madimi, and Esemeli.

The names of the Daughters of Daughters are drawn from the second sevenfold table by reading the upper left section of the table in a diagonal, downward direction.

S	A	A	L	E	M	E
B	T	Z	K	A	S	E ³⁰
H	E	I	D	E	N	E
D	E	I	M	O	³⁰ A	
L ²⁶	M	E	G	C	B	E
L	L	A	O	I ²¹	V	N
L	I	R	L	A	¹¹	

Figure 43: Names of the Daughters of Daughters of Light on the second sevenfold table

Although these seven angels are not identified with planets, they are generally believed to carry the following planetary assignments:

S	Saturn	Ab	Jupiter
Ath	Mars	Izad	Sol
Ekiei	Venus	Madimi	Mercury
Esemeli	Luna		

The names of the Daughters of Daughters of Light are placed on the Sigillum in clockwise order beneath the bars of the heptagram (see figure 44).

Figure 44: The Daughters of Daughters of Light on the Sigillum

Step Seven: The Sons of Sons of the Light

Next came seven “little children . . . like boys” (“Sons of Sons”) dressed in robes of purple silk with long pointed sleeves and hats such as priests or scholars wear. They had triangular green tablets on their breasts identifying them as E, An, Ave, Liba, Rocle, Hagonel, and Ilmesec.

S	A	A	7	E	M	7
S	I	2	K	A	S	7
H	E	1	B	E	N	E
D	E	1	M	O	3	A
I	2	E	G	C	B	E
I	1	A	O	I	E	N
I	H	R	L	A	A	2

Figure 48 shows the how the names of the pentagram planetary angels are arranged on the Sigillum.

Figure 48: The pentagram planetary angels on the Sigillum

Because the original Dee and Kelley material does not confirm the planetary attributions to all the various names on the Sigillum, I will not presume to do so either. I have, however, created a chart (see figure 49) that I currently use to help me in my meditations on the subject. I offer it along with the key to reading the names of planetary archangels from the first sevenfold table.

Figure 49: Possible key to the planetary angels on the Sigillum

Zaphkiel	Saturn ♄ 1-8
Zadkiel	Jupiter ♃ 1-7
Cumael	Mars ♂ 1-6
Raphael	Sol ☉ 1-7
Haniel	Venus ♀ 1-6
Michael	Mercury ☿ 1-7
Gabriel	Luna ☾ 1-7

Step Nine: The Crosses

Once the names of these angels were placed around the central pentagram, a number of tiny crosses were added to the Sigillum in a curiously inconsistent manner (see figure 50).

Figure 50: The completed Sigillum

And now your Sigillum is nearly complete. The only thing left to add is the design on the back. It is a very simple image of a cross dominating a small circle, around which are the letters of the divine word *AGLA* (an acronym for the Hebrew phrase *Ateh Gibor Le-olam Adonai*, “the Lord is mighty forever.”)

Years ago, on a Christmas morning, I melted the stubs of scores of candles into a round Christmas cookie tin.⁶⁴ After the wax cooled and hardened, I removed the wax disk from the tin and set to work carving

Figure 5 1: The back of the Sigillum Dei Aemeth

my own Sigillum. Other magicians I know have sealed their drawings of the Sigillum upon wooden disks that they purchased for pennies at a crafts store, or glued the image to foam board. Whatever the medium, I think the presence of the Sigillum is an important factor in creating the magical environment conducive to Enochian vision magick.

There is so much more the angels told Dee and Kelley about the Sigillum, including suggestions for how every letter in each of the names contains a set of angels, and on and on by sevens by sevens. I encourage you to continue your exploration of the Sigillum's mysteries. But now we must move on to the seven Ensigns of Creation, where I promise you a much shorter journey.

The Ensigns of Creation

(Of these seven tables, characters, or scotchcons. Consider the words spoken in the fifth book Anno 1583, April 2nd. How they are proper to every King and prince in their order. They are Instruments of Conciliation.

—JOHN DEE, FOOTNOTE TO *Quinti Libri Mysteriorum: Liber Tertius*

The Ensigns of Creation are seven planetary talismans designed to be positioned on the Holy Table in a circle surrounding the Sigillum Dei Aemeth or laid out in a line along the edge of the table nearest the sayer. They were to be made of purified tin or else painted directly upon the Holy Table. Like the Lamén and the Holy Table, they are "Instruments of Conciliation" connected to the Heptarchia planetary kings and princes in a manner that, I must confess, is not altogether clear to me.

Five of them are square tables containing squares filled with numbers, letters, crosses, and lines. Two ensigns are a circle surrounded by a square. The letter *B* (*Pa* in the angelic language) is by far the most used letter in the ensigns.

The ensigns originally displayed Latin letters. The communicating angel would later insist that the Latin letters be replaced with the corresponding characters of the angelic script (see chapter fourteen). Dee was reluctant to do this and even asked the angel if he really had to. The angel said he must. We don't know if he ever did.

It is clear that the ensigns were to be utilized ritualistically, such as being held in the magician's hand during prayers or invocations. But information on exactly how things were to be done is incomplete, and there are no records whatsoever of Dee and Kelley actually performing rituals of heptarchic magick.

Figure 52 shows the ensigns with their Latin letters and the planet, king, and prince each represents.

Figure 52: The seven Ensigns of Creation and then kings and princes

Figures 53 and 54 show the ensigns lettered in the angelic script. To my knowledge, this is the first time the ensigns have appeared in print in their correct form.⁶⁵ As with the Ring, Holy Table, Lamen, and Siggillum, the ensigns can be reproduced in paper board or whatever material is at the magician's disposal.

A circular diagram containing a 6x6 grid of musical notation. The grid is surrounded by the letter 'I' at the top, bottom, left, and right. The notation includes various symbols, some with numbers above or below them, and some with letters like 'V' or 'P'.

Unsign of Luna

Figure 53: Mercury, Saturn, and Luna Ensigns of Creation in the angelic script

Ensign of Venus

Ensign of Sol

Ensign of Mars

Ensign of Jupiter

Figure 54: Venus, Sol, Mars, and Jupiter Ensigns of Creation in the angelic script

Figure 55 shows the positions in which the ensigns are placed on the Holy Table around the Sigillum. Note they are positioned near the points of the Sigillum's heptagram.

The entire assembly is one big magical machine—the Sigillum resting like a sevenfold, multidimensional dynamo in the center of the Holy Table's swirling and churning angels and the circling Ensigns of Creation. The *scrying stone* or *black mirror* is placed upon the Sigillum at the very heart of this magnificent instrument like the monitor screen of a magical computer connected to the ultimate worldwide-web.

Figure 55: Position of the ensigns around the Sigillum

We have made only the tiniest scratch on the surface of Dee and Kelley's material of this period. There is much more information concerning *De Heptarchia Mystica* available to the serious student, and I encourage the reader who feels drawn to this system to make the effort. I know it is only a matter of time before some bright magician fine-tunes, perfects, and transforms the material into a workable magical system.

The focus of this book, however, is Enochian vision magick, and we must now move on to the second phase of Dee and Kelley's magical operations. Through our understanding of the Ring, the Lamien, the Holy Table, the Sigillum Dei Aemeth, and the Ensigns of Creation and of their construction, we have prepared ourselves to meet with angels on the holy ground of our temple.

Do I Need All This Stuff?

Never since the beginning of the world was this secret delivered, nor this holy mystery set open, before the weaklings of this world.

—THE ANGEL IL, APRIL 29, 1583

The question I'm sure many of you are asking at this point is, "Do I need all this stuff?"

During the classes that I conducted in our home in 2005 and 2006 (with experienced magicians) and subsequent day-long workshops I've conducted around the country with people having little or no prior magical experience) it has become abundantly clear to me that the magical objects and "furniture" Dee and Kelley received during the Heptarchia periods (the Ring, the Holy Table, the Lamen, the Ensigns of Creation, and the Sigillum Dei Aemeth) can and *should* be formally employed in order to create the specific environment of consciousness conducive to the practice of angelic vision magick.

Furthermore, it has been my observation that regular and repeated activation of this magical "temple" by means of the little ritual outlined in chapter one (and laid out more fully in appendix I) can attune the magician to this uniquely ordered universe and serve to progressively strengthen and enhance his or her visionary capabilities.

Most exciting for me was the discovery that once the magician is prepared and the temple activated the angelic forces (especially the

good angels resident in the Holy Table, Lamen, Ensigns of Creation, and the planetary angels resident in the Sigillum) can be individually called forth or visited by means of classic evocation techniques or even informal extemporaneous prayers and conjurations. In other words, I believe that even if he or she never went on to practice Enochian magick per se, a resourceful magician, willing to experiment, and armed with a proper understanding of the tools and formulae of the Heptarchic periods would be already prepared to engage in angelic vision magick of a high order.

This is new territory for all of us, but it holds much promise, for it entails the possibility of contacting the same angelic forces that engaged Dee and Kelley throughout most of their day-to-day actions. Obviously, dealing with these angelic forces offers an alluring challenge for today's more intrepid magicians who, when frustrated by gaps and perplexities in the original material, will not be afraid to go straight to the communicating angels for guidance and clarification on how all this should operate. Indeed, I expect to see in the years to come exciting and viable magical systems develop as the result of the magical efforts of gifted practitioners who dare to make such angelic contact.

But do you need all this stuff?

My answer is this: In order to do this particular variety of magick you need all this stuff *inside* you. That's where the real magick takes place. But until such time as you have internalized all this (even in the most cursory and general manner) it is necessary to have some outward, visible, material representation of the magical concepts and forces you are dealing with.

I suggest, if you're serious about engaging in this magical art form, then you should, at the very least, provide yourself with a Ring, a Holy Table, a Lamen, a Sigillum Dei Aemeth, and the seven Ensigns of Creation. Make them out of paper if you have to. Copy them straight out of this book if you have to. But have them. Make them real to you. Consecrate them by using them. Use them to create your Enochian magick temple.

The sense of art for some magicians is stimulated by replicating as much as humanly possible the tools and procedures as outlined in ancient texts. By doing so, they achieve a level of empowerment they believe is necessary to execute the work. Personally, my sense of art is quite happy with paper rings and photocopied Holy Tables. However,

I have over the years been blessed with many talented colleagues who have generously helped me equip my temple so I might better demonstrate these things to others.

Here is as good a place as any for me to pause and describe what I believe the source material suggests would transform a clean uncluttered room into the holy ground of an Enochian magick temple.

The Temple

Upon the floor in the center of the room is a square carpet of red silk cloth large enough to accommodate the Holy Table and the chair of the scryer.

Upon the silken carpet are placed four miniatures of the Sigillum Dei Aemeth, made of wax. They are covered and protected from the table legs by shallow cylindrical boxes.

Upon the box-covered sigilli rest the four legs of the Holy Table.

The Holy Table is made of sweet wood (laurel).

Upon the Holy Table, arranged as we've discussed, are the seven Ensigns of Creation (lettered in the angelic script) and the Sigillum Dei Aemeth, made of purified beeswax, nine inches in diameter and an inch and a half thick.

The Holy Table and all the objects upon it are covered by a red silk cloth with gold tassels that dangle from the corners. This cloth should match in material and color that of the red silk carpet.

Upon the covered Sigillum the scrying stone (a crystal ball) or black mirror is placed.

The scryer's chair is placed on the carpet near the table. His or her feet should touch the carpet.

The Ring and Lamen should be near. The magician should ceremonially put them on at the beginning of each session and remove them at the conclusion.

Renaissance magicians often wore crowns and white linen robes, and on one occasion in preparation for a specific working, Dee and Kelley were instructed to wear white linen robes. In an operation that

took place on July 13, 1584 (at the very end of the Enochian communications), the archangel Gabriel told the magicians:

See that your garments be clean. Herein be not rash: Nor over hasty; For those that are hasty and rash, and are loathsomely appareled, my knock long before they enter.⁶⁶

In practical operations conducted by my Monday night class and my Enochian magick workshops, everyone is shoeless and wears comfortable street clothes. In private sessions, such as the one I described in chapter one, I put on a simple black robe. Not only does it carry with it a certain personal magical virtue, but its color does not distract from the images reflected in the black mirror as I scry.

BOOK III

Liber Loagaeth and the
Angelic Alphabet

CHAPTER THIRTEEN

Liber Loagaeth

*Every element (of the book) hath 49 manner of understandings.
Therein is comprehended so many languages. They are all spoken at
once, and severally, by themselves, by distinction many be spoken.
Until thou come to the City, thou canst not behold the beauty thereof.*

—THE ANGEL ME TO JOHN DEE, EASTER DAY, 1583⁶⁷

The second phase of Dee and Kelley's magical operations remains, for the most part, a tantalizing mystery to modern students. Covering most of 1582 and 1583, it is a period characterized by considerable tension between the two magicians, but one that also produced a large body of work in the form of a book referred to at various times as *Liber Mysteriorum Sextus et Sanctus*, the *Book of Enoch*, and *Liber Loagaeth*.⁶⁸ While in recent years Enochian scholars have courageously set out to give us a closer examination of this information, it unfortunately has not been enough to allow modern practitioners to develop anything near a workable system from this material.

One of the reasons more attention isn't paid to this period is the nature of the material itself and the nearly complete lack of direction concerning how it is to be applied. Also, the focus of the communications of this period is driven by Dee's very personal fixation on discovering lost books of the Bible, the Apocrypha, and in particular the *Book of Enoch*, which is mentioned in several places in the Bible. The resulting

character of *Liber Loagaeth* is rich in apocalyptic imagery and prophetic sounding rhetoric. This has been seized upon in recent years by commentators who would project a patently sectarian interpretation upon the material, even going so far as to suggest sinister (perhaps even Satanic or Lovecraftian) motives behind the “angelic” communications.

We are all, of course, free to our own religious convictions and spiritual worldviews. After all, they are part of the magical artist’s pallet of tools. I think it wise, however, to keep in mind that when we study the Dee and Kelley material, we are not only eavesdropping on questions framed in the minds of two sixteenth-century Englishmen and put in the context of biblical literature, but we are also hearing the answers to those questions given in such a manner as these men could understand—that is, framed within the same cultural and Biblical context. I’m sure if Dee had been a Chinese alchemist or an African shaman in these same circumstances, the angels would have communicated the same universal answers unencumbered by the apocalyptic nomenclature familiar to the Jewish or Christian mind.

Joseph Peterson wrote in the introduction of his marvelous book *John Dee’s Five Books of Mystery*:

‘The importance of *Liber Loagaeth* cannot be overemphasized. From it would “be restored the holy booke, which haue perished euen from the beginning, and from the first that liued.” The truths it contains will end religious disputes and restore religious unity. “Which when it hath spread a while, THEN COMMETH THE END.”⁶⁹ In short, it will usher in the new age. Since the book is so central to these angelic communications, it is amazing that it has remained unpublished.⁷⁰

Amazing indeed, but as I wrote concerning *De Heptarchia Mystica*, it is only a matter of time before someone cracks the code of this breathtakingly immense body of work. What do I mean by breathtakingly immense?

One surviving manuscript comprises forty-eight leaves, each containing 49 x 49 lettered squares, 115,000 lettered squares in all. Each square was filled, letter-by-letter, according to Kelley’s vision. In the end, the magicians were left with forty-nine calls in an angelic language. (Note: These calls were not the same calls in the angelic tongue that would come later and form the centerpiece of the Enochian phase of

Dee and Kelley's partnership.) *Loagaeth* literally means "speech from God," and the magicians were informed that the words of the forty-nine calls were the same as those uttered by God at the dawn of creation—in the same language spoken by Adam when he named all things.

Unfortunately, these calls were never translated (or else the material has been lost), and attempts by modern linguists have failed to find enough landmarks of a properly constructed language to put the calls of *Loagaeth* in the same category as the angelic language that would be received in the third and final phase of the magicians' actions.

Kelley's visionary skills were severely exploited during this period, and his visions were characterized by the presence of a dazzling light that both magicians could see. The light would fly out of the scrying stone and penetrate Kelley's head, putting him in a trance in which he could read and comprehend the text of *Liber Loagaeth*. He was, however, forbidden to translate it and told that God would later provide the translation. At the end of the session, the light would leave Kelley's head and return to the stone. When he returned to normal consciousness, he claimed to have no memory of the experience.

As tempting as it might be, I am, for the time being not incorporating any of the calls from *Loagaeth* in my Enochian-magick preparation ritual. However, something else of great importance came out of this period: the angelic alphabet.

CHAPTER FOURTEEN

The Angelic Alphabet

He wiped his finger on the top of the Table, and there came out above the Table certain Characters enclosed in no line: but standing by themselves, and points between them. He pointed orderly to them with his finger, and looked toward the skryer at every pointing.

—EDWARD KELLEY DESCRIBING HIS VISION OF THE ANGEL'S
REVELATION OF THE ANGELIC ALPHABET, MARCH 26, 1583⁷¹

I confess, even with clear copies and transcriptions of the source material in front of me, it has been very difficult for me to wrap my mind around the order of the visionary events of Dee and Kelley's years together. Because certain elements of these magical systems were often corrected or amended by the angels in subsequent visions, often occurring months apart, it is extremely difficult (for me at least) to present a clean chronology of events. The circumstances surrounding the reception of the angelic alphabet are no exception.

The alphabet was received during the Loagaeth period, but because the magicians were told to replace the Latin/English letters of the Lamen, Holy Table, and the seven Ensigns of Creation with letters from the angelic script, its influence reached back in time to touch the Heptarchia period as well.

You will notice that the name for the first letter received, *Pa*, is the only letter whose name is capitalized. *Pa*, *b* in English, has a special significance in the magick of the Heptarchia. For example, the names of all the forty-nine good angels begin with *b*, the letter *b* appears overwhelmingly on the Ensigns of Creation, and each of the four corners of the Holy Table displays an oversized *Pa*.

This abundance of *bs* has caused several knowledgeable modern magical commentators to speculate that *b* must represent the number seven, the number upon which these magical systems seem to be based. While that makes a great deal of sense to me, I have nonetheless found nothing in the original material that would specifically suggest numerical equivalents to any of the single letters of the angelic alphabet.

What is very clear, however, is the fact that the communicating angel wanted Dee and Kelley to immediately memorize the letters of the angelic alphabet and the letters' names. Dee was a busy man and wanted to be excused from this time-consuming duty. The angel Me would have none of it. In this March 26, 1583, exchange, Dee tries to make the angel understand, "Look man, I've got a life!"

Me: I instructed thee before-hand and told thee, that both of you must jointly learn those holy letters (For, so, I may boldly call them) in memory: with their names: to the intent, that the finger may point to the head, and the head to the understanding of his charge.

Dee: You perceive that I have diverse affairs which at this present do withdraw me from peculiar diligence using to these Characters and their names learning by heart: And therefore I trust, I shall not offend, if I bestow all the convenient leisure that I shall get, about the learning thereof.

Me: Peace, Thou talkest, as though, thou understoodest not. We know thee, we see thee in thy heart: Nor one thing shall not let another. For short is the time, that shall bring these things to proof.⁷²

BOOK IV

Enochiana

Enochian Magick

The Lord appeared unto Enoch, and was merciful unto him, opened his eyes, that he might see and judge the earth, which was unknown to his Parents, by reason of their fall : for the Lord said, Let us shew unto Enoch, the use of the earth : And lo, Enoch was wise, and full of the spirit of wisdom.

—THE ANGEL AVE, MONDAY, JUNE 25, 1584⁷³

To my knowledge, Dee and Kelley never used the word *Enochian* to describe the system of magick they received between April 10 and July 13, 1584. Throughout their actions, they simply referred to it as angelic. We cannot, however, be faulted too badly for attaching the biblical patriarch's name to the system. The magicians were told that this was the magick given by God to Enoch (the seventh man from Adam) in the form of a book and that Enoch (before he ascended bodily into the presence of God) passed it on to others. Over the generations, the book fell into wicked hands, and God caused it to be lost. But because of Dee's piety and prayers, God was moved to once again deliver it to mankind.

These final days were an especially difficult period in Dee and Kelley's relationship. They and their families were living in Krakow, Poland. Their actions were regularly interrupted by "evil spirits," who

encouraged the magicians to abandon the actions. Kelley was increasingly impatient and uncomfortable with the work, voicing his fear of the possible evil nature of the communications on one hand. Ironically, Kelley was at the time practicing demon magick behind Dee's back. Dee was furious when he learned of this. So were the communicating angels, who warned that such behavior attracted evil spirits into the magician's environment—an annoying and time-consuming distraction. Finally Kelley promised Dee and the angels that he would knock off the black magick.

The angels, too, appeared to be growing impatient with Dee and Kelley, as if they realized the magical chemistry that existed between the two magicians (the personal factors that made them such a perfect operator/receiver team) was rapidly disintegrating. In April, the magicians were told in no uncertain terms that the work had to be completed by August. The magicians met their deadline with time to spare. July 13, 1584, Dee's fifty-seventh birthday, saw the final communication that completed the reception of the angelic calls and provided the names of the thirty Aethyrs. Not only had the Enochian phase of Dee and Kelley's operations ended, but, indeed, the entire angelic adventure had also come to a close. The plug was pulled. The communicating angels fell silent.

The magicians would continue on and off for several years with visionary operations and unsuccessful mago-political adventures in Europe. But, with the exception of only three brief references in their subsequent diaries, they never again mention the angelic magick. One of those latter-day references (the *Tabula Recensa*), however, is very significant to the study of the Enochian magick period. I'll speak more on that very soon.

The reception of the Enochian material was (at least to my impatient attention span) even more confused and topsy-turvy than that which characterized the Heptarchia and *Liber Loagaeth* periods. Sadly, as we discovered in the two earlier cases, the surviving information, while abundant, still does not provide us with adequate information on how it all was supposed to work as a practical system of magick.

And here is where we must again tip our magical hats to S. L. MacGregor Mathers, the adepts of the Golden Dawn, and Aleister Crowley, who at the dawn of the twentieth century developed this material into a

remarkably logical system of vision magick—a system possessed of the solid infrastructure lacking in the surviving source material, a system that, for all intents and purposes, offers the diligent practitioner a practical and elegant unified field theory of hermetic and qabalistic magick.

As applied most commonly today, Enochian magick is a two-part magical system: one part focusing on the elemental universe, the other on the aethyric. The former enables the magician to summon or visit in vision the spirits of the myriad levels of the elemental worlds of Fire, Water, Air, Earth, and Spirit; the latter enables the magician to systematically penetrate increasingly higher heavens (or Aethyrs) to access information from those heavenly levels of consciousness.

I will soon show how these two systems are operated. But before I do that, and in keeping with our program of systematic attunement, I need to introduce you to another magick table. It was the first revelation of the Enochian period, but it is also, in my opinion, the final component of the preparation protocol. This tablet was delivered to the magicians by the angel Nalvage in April of 1584. It is an item that was acknowledged by the adepts of the Golden Dawn but never incorporated into any practice. It is something, however, I believe should not escape our attention. No name was given to this object. Some modern scholars designate it simply the Tablet of God. I shall refer to it as the *Round Tablet of Nalvage*.

CHAPTER SIXTEEN

The Round Tablet of Nalvage

The order and knitting together of the parts in their due and perfect proportion, God the Holy Ghost. Lo the beginning and end of all things.

—THE ANGEL NALVAGE, APRIL 10, 1584

Figure 58: The Round Tablet of Nalvage

"The Method of Science—The Aim of Religion" was the official motto of *The Equinox*, the great magical periodical first published by Aleister Crowley and his colleagues in the early years of the twentieth century.⁷⁴ This same phrase could also comfortably serve as the watchwords that describe what the art of magick is to me.

Conversely, superstition (as the word is commonly understood) has, in my opinion, no place in the arsenal of the modern magician. This, I believe, is especially true concerning the practice of Enochian vision magick. In all my years of magical practice and exploration of this system, I have never encountered a single case of so-called psychic attack, demon possession, headache, hives, or hernia—indeed *any* ill effects whatsoever—resulting from the practice of this particular kind of magick.

That being said, strange and unexpected things do occasionally happen to those who practice magick. And while I believe it is bad for one's mental health to ascribe undue importance to these phenomena, it is important that they be dispassionately observed and recorded. So, before I discuss the Round Tablet of Nalvage and its importance to the system of Enochian magick, I feel I must share with you two little stories that might help you understand the level of respect I hold for this particular magical object.

Twenty years ago, I was teaching a class in Enochian vision magick at our home in Costa Mesa. This class was different from the Enochian magick classes I had taught previously, for it was the first time we would study and experiment with using the Round Tablet of Nalvage. In preparation for the first class, I decided to make a copy of the tablet out of wax (as I had done with my *Sigillum Dei Aemeth*). A friend had given me two massive, black wax candles shaped like giant chessmen (bishops). My plan was to melt these down in a round Christmas cookie tin and carve the squares and the angelic letters of the Tablet of Nalvage on the cooled wax disk.

It was a foolish time to be starting an arts project like this, because our landlord had just informed us he was bulldozing our house in two weeks and building apartments on our lot (thanks a lot!), and we were deep in the midst of packing up our things to move. Still, magick is magick, and life goes on. I put the two black wax bishops in the cookie tin and slid them into the oven. I set the heat on the lowest possible warm level and went out to the garage to help (watch) Constance pack.

As you might imagine, we had some very interesting things in our garage, many of which we hadn't looked at in years. We did more reminiscing than packing. I didn't forget the black wax bishops in the oven,

however, and checked on them regularly. It seemed they were taking a long time to melt, so I turned up the heat a little higher.

Back out in the garage we found a stash of psychedelic artwork Constance had painted and drawn in the late sixties, when we were hippies living in the woods of southern Oregon. We hadn't seen them in fifteen years. What a treat! We lingered over them for probably ten minutes before I remembered the black wax bishops for the Round Tablet of Nalvage in the oven.

When I opened the back door, I found the kitchen dark except for a warm orange glow that, like a spectacular sunset, brightened the dark clouds of smoke that filled the house from the ceiling to about four feet from the floor. The oven was completely engulfed in flames. I ran into the living room and found our son, Jean-Paul, lying on the floor watching television completely oblivious to the black smoke pressing its way toward him from above.

Once he and the dog were evacuated, I called for Constance (always a level head in times of emergency), and we proceeded to attack the fire. When I opened the flaming oven, I discovered that one of the bishops had slid to the side of the cookie tin and parts of it had melted down the outside rim. The wax had run to the bottom of the oven and dropped down upon the pilot light, which then became the eternal flame of Costa Mesa. There was nothing we could do to turn off the oven. Constance eventually had to turn off the gas outside, and with the help of baking soda and wet towels, we got the fire out. I rescued the cookie tin and let it cool in the sink. A couple hours later, in the charred ruins of our kitchen, I carved a beautiful black wax Round Tablet of Nalvage.

Now, I'm the first to confess that this story has less to do with magick and superstition and more with my own carelessness and stupidity. (I am now forbidden to use the oven for magical crafts.) The accident did, however, serve to give me a healthy respect for the Round Tablet of Nalvage—a respect that in the last year has increased immeasurably. And that brings me to my second magical tale of Nalvage.

As we'll soon see, there is much we know about the Round Tablet of Nalvage. What we don't know is how it was intended to be used. As I was preparing for the class series that inspired this book, I debated with myself how (or even if) I was going to introduce it into our studies. After all, there is nothing in the source material that hints at what is to

be done with it. Late in the afternoon, I prepared our living room temple for the evening's class. The Sigillum and ensigns were set neatly on the Holy Table; the table was covered with its red silk cloth, and the obsidian mirror was set in place.

I went to the closet cupboard in my office and took down my black wax Round Tablet of Nalvage from the topmost shelf. I unzipped its plastic bubble-wrapped envelope and carefully removed it. I had to admit, after all those years, it still looked magnificently magical. I took it into the living room and set it down upon the covered table. I sat down in my comfy chair, and in the warm glow of sunset (which brought to my mind the glow of our blazing kitchen so many years earlier), I meditated about how the Round Tablet of Nalvage fits into the system.

I didn't get much meditating done, because the moment I closed my eyes I fell asleep. I awoke just a few minutes before people would start arriving for class. I still didn't know how or if I was going to use the tablet for the night's gathering. I hastily decided that if I didn't have sound reasons for using the tablet, I was going to skip it altogether—at least for that night. I took the tablet off the Holy Table, wrapped it back up, and carefully put it back on the top shelf of the closet cupboard.

I went to my desk to turn off the computer and gather things for class, when I was startled by the sound of something smashing against my guitar, which was mounted upright in its stand near the open closet door. With the guitar strings still ringing, I turned to see that the Tablet of Nalvage had flown from its shelf, ricocheted off my guitar, and was resting inches from my feet.

As a reasonably rational man, I am of the opinion that there is nothing supernatural in the world, just natural things that have yet to be explained. I'm sure there is nothing I can say to convince the cynic that the tablet hadn't fallen naturally from the shelf because I hadn't put it there properly. I remain, however, extremely impressed at the distance this object had to travel across physical space in order to strike the guitar and find its way to my feet at the very moment I had decided not to discuss it at that evening's class.

Needless to say, I changed my mind about the importance of the tablet, and in the few moments remaining before class members started

to arrive, I composed the two-part chorus that incorporates the dynamics created by the letters of the Round Tablet of Nalvage—a chant that has become the last (and perhaps the most important) component of the Ceremony of Preparation.⁷⁵

Now, let's take a brief look at those dynamics and how a chant based on the Round Tablet of Nalvage can be constructed.

The Tablet of Nalvage is not really round. It is a square divided into four squares (or continents) and surrounded by four outer bars (see figure 59). The continents and bars are subdivided into lettered squares (nine squares per continent and four squares per bar). But before we start filling in the letters, let's see what the angel Nalvage had to say about the continents.

Figure 59: The four continents of the Round Tablet of Nalvage

Nalvage told Dee and Kelley that continents 1 and 2 are “dignified,” while 3 “is not yet dignified, but to be dignified,” and 4 is “without glory or dignity.” Nalvage described them in Latin as follows:

1. *Vita suprema* (highest life), the continent of “joy”;
2. *Vita* (life), the continent of “potentiality”;
3. *Vita non dignificata, sed dignificanda* (life not dignified, but which shall be dignified), the continent of “creation”; and
4. *Vita est etiam haec, sed quae perperit mors* (“Even this is life, but life which will be paid with death”), the continent of “discord.”

Each continent contains nine letters that, when read in various ways, yield words in the angelic language. In order to more easily see these words, I have separated the tablet into its component parts (see figure 60).

Figure 60: Separated Round Tablet of Nalvage

When read counterclockwise, the outer bars of the tablet spell the names of four classes of angels: *luah* (praising angels), *lang* (ministering angels), *sach* (confirming angels), and *urch* (confounding angels).

These angels circumscribe and contain the angelic forces at work within the continents. Nalvage gave the following Latin meanings to the words inside the continents when the words are read horizontally from left to right (see figure 61).

<i>idz</i> – Gaudium – Joy <i>aoi</i> – Praesentia – Presence <i>mzr</i> – Laudantes – Praising	<i>sai</i> – Actio – Action <i>god</i> – Factum – Events <i>urr</i> – Confirmantes – Establishing
<i>bna</i> – Potestas – Power <i>daz</i> – Motus – Motion <i>iab</i> – Ministrantes – Ministering	<i>fos</i> – Luctos – Lamentation <i>sea</i> – Discordia – Discord <i>rdi</i> – Confundantes – Confusing

Figure 61: Words and meanings of the words of the four continents

Figure 62: Key to the Round Tablet of Nalvage

Figure 62 shows how the letters of the continents are read to reveal the nature of the divine powers resident in the tablet.

First notice how the three letters of *outer* corners of each of the four continents (upper left corner of upper left continent, lower left corner of lower left continent, and so on) all spell the Enochian word meaning God—*iad*.

Notice next that the three diagonal letters of continents spell the words *moz* (joy), *bab* (power), *sor* (action), and *ser* (lamentation).

Finally, the three letters of the *inner* corners of the continents spell the words *zir* (I am), *zna* (motion), *gru* (deed), and *osf* (discord).

The arrows in figure 62 show the beautiful symmetry the words create within the tablet. If we put the words of each continent together, we arrive at phrases such as:

- Continent 1. *iad moz zir* (I am the Joy of God.)
- Continent 2. *iad bab zna* (God's Power in Motion)
- Continent 3. *iad sor gru* (Result of God's Action)
- Continent 4. *iad ser osf* (God's Discord and Lamentation)

This rich tapestry of joy, movement, creation, and sorrow is contained and encircled by a counterclockwise whirl of the angels: *luah*, *lung*, *sach*, and *urcb*.

Concerning the tablet as a whole, Nalvage said, "The Substance is attributed to God the Father."⁷⁶

In reference to the letters on the outer bars, Nalvage said, "The first circular mover, the circumference, God the Son, The finger of the Father, and mover of all things."⁷⁷

Referring to the continents and the manner in which their letters are read, he said, "The order and knitting together of the parts in their due and perfect proportion, God the Holy Ghost. Lo the beginning and end of all things."⁷⁸

Like the Holy Table, the Round Tablet of Nalvage, once decoded, displays divine and angelic words and names in perpetual motion in such a way that one can almost sense what is meant by the term *choir of angels*. In group workings, I break the participants up into two voices as we ceremonially chant the words from the tablet.

Voice One: *luah lang sach urch*

Voice Two: *iad moz zir—iad bab zna—iad sor gru—iad ser osf*

The effect is powerful even when I'm alone in the middle of the night and chant one voice at a time.

Once Nalvage described the dynamics of the tablet, he didn't go on to provide instructions on how, or even if, the tablet was to be used. Is it a talisman? Is it to be worn as the Lamen? Is it to be held or placed on the Holy Table? We don't know.

However, we do know that after the two magicians had become attuned to the structure of the Round Tablet of Nalvage, the entire remaining system of Enochian magick was revealed in less than ninety days. This has led more than a few magicians to speculate that the Round Tablet of Nalvage might be the key to a mysterious and unexpressed "first call" of the Enochian system, or perhaps even represent the call itself.

The Forty-eight Calls

Move, therefore, and show yourselves: open the Mysteries of your Creation: Be friendly unto me: for I am the servant of the same your God, the true worshipper of the Highest.

—FROM THE FIRST CALL⁷⁹

The centerpiece of the Enochian system is a collection of calls⁸⁰ in an angelic tongue that is significantly different from the language delivered in *Liber Loagaeth*. The reception of the calls followed that of the Tablet of Naivage. They were first dictated to the magicians in the angelic tongue, then afterwards translated into English. Careful examination of the calls and their translations reveal that Enochian is a real language and not simply strings of barbarous names and words. The calls read like evocative hymns or invocations. They are constructed of real, sometimes breathtakingly beautiful sentences that can be translated (not merely transliterated). The language exhibits a remarkable consistency of word meaning from call to call. It has a form of grammar and syntax. This phenomenon, coupled with the multiple double-blind/letter-by-letter method by which it was received, makes this (in my mind at least) one of the most extraordinary aspects of Dee and Kelley's workings.

Technically, there are forty-nine calls. However, as the first call was said to be unexpressed, I will refer to them as if there were forty-eight.

They appear translated in their entirety in appendix II of this book, along with the keys to how they are put to use by modern Enochian magicians (see also chapter twenty-seven).

Beginning on April 10, 1584, the first four calls were painstakingly delivered, letter-by-letter (in backward order, because the angels at first voiced fears that the calls were so powerful it might be too dangerous to deliver them in a straightforward manner). As usual, the letters were drawn from an assortment of lettered grids. The angels also provided translations to the first four calls immediately after their delivery.

Then things changed. It appears that even the angels became impatient with this tedious method. They proceeded to deliver calls five through eighteen in a straightforward manner, but they would wait six weeks before delivering the English translations.

The fact that the translated words from the first four calls (delivered backwards) matched (or were otherwise linguistically compatible with) the translated words of calls five through eighteen (delivered forward and translated six weeks later) all but rules out the possibility that either Dee or Kelley invented the angelic language or the calls.

The nineteenth call (the Call of the Ayres or Aethyrs) and the names of the thirty Aethyrs (or heavens) were received on July 13, 1584, Dee's fifty-seventh birthday, effectively ending Dee and Kelley's angelic magick relationship. However, before that final communication, the angels would deliver an incredible amount of material to the two magicians between April 10 and July 13—material that three hundred years later would inspire the adepts of the Golden Dawn to develop the hybrid system we now call Enochian magick. I call it hybrid because the "Enochian" magick developed by the Golden Dawn and Crowley is based on a number of assumptions that connect the forty-eight calls with other "Enochian" material Dee and Kelley received after the reception of the calls. I refer to what are now commonly called the Elemental Tablets, which I will discuss in detail in chapter twenty-three and beyond. While eminently logical and based on the most antiretentive hermetic principles, many of the assumptions made by the Golden Dawn and Crowley were nonetheless not clearly made in the original Dee material.

First, however, we need to look at the circumstances that triggered the final and most astounding chapter in the story of the reception of Enochian magick. It all started with Dee wanting to spy on the king of Poland and ended with the reception of what appears to be nothing less than the printed circuit board of the mind of God.

The Ninety-one Parts of the Earth

Dee: Hey Nalvage, I'd sure like to magically eavesdrop on secret meetings between King Stephen of Poland and his ministers. I'd like to know if Count Albert Laski will soon succeed Stephen as king of Poland. Can you help me do this?

*Nalvage: No problem, Dr. Dee. But first you have to understand how the universe where this can happen operates. You need to understand how everything in heaven and earth is connected to everything in heaven and earth.*⁸¹

—IMAGINARY CONVERSATION, JOHN DEE AND THE ANGEL NALVAGE

The fantasy dialogue above is more than just another one of my lame attempts to be witty. It describes what, for all intents and purposes, was happening during this phase of the Enochian magick revelations. Dee was indeed trying to squeeze from the angels some information regarding political intrigues in Poland. The angel Nalvage's response was to first try to explain to Dee the mechanics of how specific spirits rule specific parts of the earth. In doing so, Nalvage would ambitiously attempt to demonstrate how everything in heaven and earth is connected to everything in heaven and earth. The results of this revelation Dee would neatly memorialize thirteen months later in *Liber Scientiae Auxilii et Vitoriae Terrestris*.⁸²

Nalvage started by dividing the universe into thirty segments that would eventually be identified as Aires, or Aethyrs (see column I of figure 63). To the thirty Aires he assigned ninety-one parts of the earth (see column II), which he first referred to by the geographical name recognizable to the sixteenth-century magicians, such as Syria (see second name in column III), then by the name by which it is known in the divine realms, such as Pascomb (see second name in column IV).

He then assigned each of these pairs of names to one of the twelve mythical tribes of Israel, along with their directional coordinates, an angelic king, and a respectable number of good ministers.

All this information and more can be found in figure 63. Columns I through V contain the information Dee and Kelley received at this stage of the reception. The symmetrical characters found in column VI and the names of the good princes of the Air in column VII were delivered to Dee and Kelley at a later date than the information in columns I through V. This fact will have astonishing significance when we examine the circumstances and sequence of events that brought to a close the angelic adventures of the two magicians. The key to the columns of the table is as follows:

- Column I Number of the Aire
- Column II Sequence of the ninety-one parts of the earth
- Column III Names of the ninety-one parts of the earth as imposed by man⁸³
- Column IV Names of the ninety-one parts of the earth as imposed by God (Note: These are also the names of ninety-one governors of the Aethyrs; see chapter twenty-eight.)
- Column V (from top to bottom) Tribe of Israel, quarter of the earth assigned to the dispersed tribes of Israel, angelic kind, number of good ministers
- Column VI Divinely ordained symmetrical characters (see chapter twenty-one) (Note: The mystery of the missing symmetrical characters 28, 29, and 30 would be revealed to Dee and Kelley later; see chapter twenty-four.

Column VII

Names of the good princes of the Air
(Note: These are also the names of the
thirty Aethyrs; see chapter twenty-eight.)

Using the second of the ninety-one parts of earth, Syria, as our example, we see that its divinely ordained name is Pascomb. The tribe of Zabulon is assigned to Syria/Pascomb, as are the angelic king Zinggen and 2,360 good ministers.

In order for you to appreciate the amazing circumstances surrounding the reception of the Enochian material, it will be important for you to have a general understanding of the chronology of events that took place in the spring and early summer of 1984. This I will try to provide in the following chapter.

CHAPTER NINETEEN

The Golden Talisman and the Watchtowers of the Universe

Now therefore hearken unto me: for I will open unto you the secret knowledge of the Earth, that you may deal with her, by such as govern her, at your pleasure; and call her to a reckoning, as Steward doth the servants of the Lord.

—THE ANGEL AVE, JUNE 20, 1584⁸⁴

Figure 64a: The Golden Talisman

Very early on the morning of Wednesday, June 20, 1584, Edward Kelley was aroused from a sound sleep by someone (something) patting him on the head. He opened his eyes and beheld an angel, "clothed with feathers, strangely wreathed about him all over, etc." standing at the head of his bed. The angel would later identify itself as Ave, one of the Sons of Sons of Light from the Sigillum Dei Aemeth (see chapter ten). Ave proceeded to project a vision that would dramatize the elements and structure of the entire system of Enochian magick as widely practiced today. The following is from Dee's diary:⁸⁵

There appeared to him [Kelley] four very fair Castles, standing in the four parts of the world: out of which he heard the sound of a Trumpet. Then it seemed out of every Castle a cloath to be thrown on the ground, of more than the breadth of a Table-cloth . . . ⁸⁶

. . . Out of every Gate then issued one Trumpeter, whose Trumpets were of strange form, wreathed, and growing bigger and bigger toward the end.

After the Trumpeter followed three Ensign Bearers.

After them six ancient men, with white beards and staves in their hands.

Then followed a comely man, with very much Apparel on his back, his Robe having a long train.

After him came five men, carrying up of his train.

Then followed one great Crosse, and about that four lesser Crosses.

These Crosses had on them, each of them ten, like men, their faces distinctly appearing on the four parts of the Crosse, all over.

After the Crosses followed 16 white Creatures.

After them, an infinite number seemed to issue, and to spread themselves orderly in a compasse, almost before the four fore-said Castles.

The highlights of Kelley’s vision would eventually be memorialized upon a round talisman etched in gold, which is today on display at the British Museum. Much as I’d like to believe this object was fashioned by Dee himself, it is almost certainly a forgery patterned upon the flawed image printed in Casaubon’s *A True & Faithful Relation*. For reference, however, I will continue to refer to both the vision and the image as the *Golden Talisman*.

The four castles, or Watchtowers, formed a cross, the center of which was a circle supported by twenty-four columns. Figure 64 illustrates the lower quarter of the Golden Talisman.

Figure 64: The lowermost of the four castles of the Golden Talisman

Ave would elucidate upon the nature, powers, and hierarchical status of the characters on the Golden Talisman. Eventually he would go into far greater detail by projecting and organizing all of it upon what he called the Great Table or the Great Table of the Watchtowers. The Great Table is the Rosetta stone of Enochian magick. How it was received and how it is connected to the information Dee and Kelley had already received concerning the ninety-one parts of the earth present us with perhaps the most convincing proof that the two magicians were indeed in contact with noncorporeal intelligences of a superior order.

CHAPTER TWENTY

The Unlettered Great Table and the Four Great Seals

The seals and authorities of these Houses are confirmed in the beginning of the World. Unto everyone of them be 4 characters, (tokens of the presence of the son of God: by whom all things were made in Creation.)

—THE ANGEL AVE, JUNE 20, 1584⁸⁷

In a working that took place on Wednesday, June 25, 1584, the angel Ave showed the magicians the image of a table that was divided into four sections by a central cross. Each of the four sections was identified as one of the castles of the Golden Talisman vision. Also called Watchtowers, Watchmen, princes, and mighty angels of the Lord, they were each represented by a seal. Three of these seals, by their imagery, bear a direct and unambiguous connection to the *Sigillum Dei Aemeth* or the Ensigns of Creation.

The first seal was assigned to the upper left section of the table. It was the image of a capital letter *T* with four rays beaming vertically from the top bar. This seal comes from a major landmark of the *Sigillum Dei Aemeth*. The 4/T cell is the first (near the top) of the forty cells that form the perimeter (see figure 2.3). The 4/T cell is where we began counting to create the seven Names of God drawn from the *Sigillum*.

The second seal was assigned to the upper right section of the table and identified as an alphabet cross. We first saw this cross on the (lower right) corner of the first sevenfold table (see figure 33), which generated the letters of the large outer heptagon of the Sigillum, where the cross appears at the top left (see figure 34).

The third seal was assigned to the lower right section of the Great Table. Its origin was a little harder to track down. Ave said, “It is in that table, which consisteth of 4 and 8.” One of the seven Ensigns of Creation that ring the Sigillum on the Holy Table (the one many modern magicians associate with Mercury) is a 4 x 8 table (see figure 54). The square occupying the position of the second column, second row, contains the cross, numbers, and letters exactly as appears on the vision of the third seal.

The forth seal was assigned to the lower left section of the table and was the image of “a little round smoke, as big as a pin’s head.” It is illustrated in one of the drawings of the Great Table in Sloane 3191 as a tiny circle with twelve rays issuing from it. It is perhaps the stylized representation of the figure that appears on the back of the Sigillum Dei Aemeth: a small circle from which projects the four capital Ts of a cross potent formed from twelve right angles (see figure 51). Perhaps it is connected to the Round Table of Nalvage and the twelve words that occupy its four continents. Frankly I’ve been unable to find any reference in the original material that would suggest either of these connections.

Figure 65: The original positioning of the four Great Seals upon the Great Table

Figure 65 shows the positions of the Great Seals on the Great Table and the order in which they were revealed to Dee and Kelley on June 25, 1584. On April 18, 1587 (nearly three years after the magicians had, for all intents and purposes, discontinued their angelic workings), Kelley would receive a vision that would alter (or reform) several aspects of the Great Table, including the relative positions of the seals and all they represent.

As one might expect, this reformation remains the source of intense frustration to Enochian students and practitioners. To add to all the confusion, Dee at different times assigned different directional attributes to the quarters of the table. Later, the Golden Dawn, in order to develop a workable system from this material, would attribute the quarters of the Great Table to the elements of Air, Water, Earth, and Fire. Eventually, I will do that as well, but for the moment, let's be satisfied with identifying the four quarters of the Great Table by their seals and original numbers as shown in figure 65, while we move on to the wonders of what next took place.

The Great Table

There was a terrible storm of thunder and rain, toward the end of our yesterdays action: which I said, was somewhat more than natural.

—JOHN DEE, JUNE 26, 1584⁸⁸

I feel I must here briefly outline (if only for my own benefit) the sequential landmarks of the Enochian magick period up to this point:

- The reception of the Round Tablet of Nalvage,
- The beginning of the reception of the forty-eight calls in the angelic language,
- The reception of the order and earthly name of each of the ninety-one parts of the earth, together with:
 - its divinely given name,
 - the tribe of Israel to which it is assigned,⁸⁹
 - the direction assigned to that tribe,
 - the name of its ruling angelic king,
 - the number of good ministers.

(All of the above information is itemized in columns I through IV of the figure 63 in chapter eighteen.)

Then came:

- The vision of the Golden Tableman, with its four sets of castles:

- one trumpeter,
- three ensign bearers,
- six seniors (“six ancient men”),
- the king and his five princes (the “comely man, with very much Apparel” and the “five men, carrying up of his train”),
- five crosses in the air (“one great Crosse” and “four lesser Crosses”),
- sixteen dispositors (“16 white Creatures”).
- The vision of the unlettered Great Table and the four Great Seals.

What happened next was so remarkable that I hope I can recount what happened clearly enough for you to appreciate how remarkable it was.

During the working of Monday, June 25, 1584, Kelley was given in vision four blank grids, each of which was twelve squares wide by thirteen squares high. These grids were said to represent the four quarters of the unlettered Great Table of the vision of a few days earlier. As the vision proceeded, “little pricks,” or dots, began to appear in the squares. Kelley was then instructed to connect the dots in groups of seven, which created sigils, each forming a curious pattern.

Figure 66: Example of a symmetrical character on a grid

When he was through connecting the dots, all but eight of the 624 squares that make up the four grids were covered by eighty-eight characters, each unique in form, each covering seven squares, but none of which intruded upon another character’s squares. These symbols were identified as “the true images of God his Spiritual Creatures.”

Now we know what those zigzag lines that fill column VI in chapter eighteen's figure 63 are. They are called *symmetrical characters* because each one is formed from the same number of pricks—in this case, seven.

Once the blank grids were filled with the lines of the symmetrical characters, Kelley was instructed to fill in the squares with letters. Starting at the top left of each grid and moving to the right, letters began to appear to Kelley, one by one, as Dee copied them down. Some of the letters were capitalized, but most were not. A few of the capitalized letters appeared to be written backwards.

When all four grids were filled in with letters and characters, it became clear that the characters spelled out names. Not only that, but each of these eighty-eight names also began with a capital letter and contained no other capital letter among the remaining six.

This phenomenon is in itself impressive, but it is nothing compared to what Dee and Kelley would learn next. Within a few hours (and with a few helpful hints from the angels), the two magicians discovered, to their utter amazement, that the symmetrical characters spelled all but three of the divine names of the ninety-one parts of the earth—names they had been given days earlier and in list format. Figure 67 shows an example of how the divine name of the second part of the earth, *Pascomb*, is spelled out by its symmetric character.

All four grids were filled with similar characters all spelling out (with a few minor irregularities) the names of eighty-eight of the ninety-one parts of the earth.

T	a	O	A	a	u	p	t	D	n	i	m
a	a	b	c	d	e	f	g	h	i	j	k

x	r	i	n	h	t	a	r	n	d	i	

Figure 67: The name *Pascomb* drawn from its symmetrical character

The next day the angels tidied up this array by joining the four 12 x 13 grids with a central cross and turning it into one Great Table. The

letters of the three missing divine names of the parts of the earth were found distributed in the central cross (sometimes referred to as the *Black Cross* or the *Great Central Cross*) and a mysterious ninety-second name, *Puraoan*, was created from certain of the backwards letters that occupied the squares left vacant by the symmetrical characters (see chapter twenty-four). Things were wrapped up pretty neatly.

Figure 68: Lettering of the original Great Table

Before we continue, I would like to again stress how impressive was the method of reception. Enochian scholar and magician David R. Jones, wrote:

The student of Enochian can compare the lists of names with the sigils, which formulate their existence on the Watchtowers, and easily see the correlation. But realize that the names were delivered first and then the Watchtowers horizontally line by line and after having both figures at hand. The Angels demonstrated

that, by discrete (7 letters, the number of letters in each Governor's name) linear connections, all of the letters given in the Watchtowers could be accounted for from the letters that formulate names of the Governors previously given. This would require either a monumental and complex second and third order memorization (2 dimensions to 1 dimension then back to 2 dimensions and with directional correlation from a 3 dimensional origin to a 3 dimensional conclusion) on Kelly's part or an elaborate and extremely obtuse deception on Dee's part. This constitutes one of the chief proofs of the system.⁹⁰

The magicians would eventually be informed that the ninety-one divine names of the parts of the earth are also the names of ninety-one governors who inhabit the thirty Aethyrs, or Aires, or heavens that surround the Watchtowers like a heavenly glass onion. We've yet to discuss the Aethyrs because their names (see figure 63, column VII) were among the last bits of information Dee and Kelley received in their Enochian magick workings. The lowest of these Aethyrs, Tex, is inhabited by four governors. The remaining Aethyrs including the highest, Lil, each have three governors.

I will talk more about the Aethyrs in chapter twenty-five. Here it is important for us to simply understand that linking the ninety-one parts of the earth to the thirty Aethyrs was the Enochian way of identifying and linking all levels of divine consciousness from bottom to top. Thus, the dynamics of the Great Table really are a demonstration of how everything in heaven and earth is indeed connected to everything else in heaven and earth.

Tabula Recensa

At length, E. K. was willed to go down into his Chamber, and I did remain still at our Dineing Table till his return, which was within an hour or somewhat more. And at his return this he brought in writing

—JOHN DEE, APRIL 20, 1587⁹¹

Such was the amazing genesis of the Great Table. How all this is connected to the vision of the Golden Talisman and the practice of modern Enochian magick will be the subjects of the next chapters. Before moving on, however, and in order to more easily illustrate the structure of the system, I need to temporarily tighten up some of the loose ends that the irregularities in the original material often leave dangling in the eyes of the student. The most serious of these concerns the lettering of the Great Table and the various names of angels drawn therefrom. Here's the problem:

After they initially received the Great Table, the magicians were obliged to change or add certain letters in some of the squares. To confuse things further, in documents they received both earlier and later,⁹² the names of a handful of the ninety-one governors of the table (whose names are spelled out by the symmetrical characters) and the names of specific angels drawn from the Watchtowers of the Great Table are in

subsequent communications spelled a bit differently than they appear in the original table. This difference has proven very frustrating to modern Enochian magicians, who naturally would like to be confident in their ability to accurately identify and spell the name of the angel with whom they wish to communicate.

There are other loose-end inconsistencies that plagued Dee and Kelley, one of which was the uncertainty over which compass directions were to be assigned to the four quarters of the Great Table—a problem that Dee appears never to have resolved to his satisfaction, and one that I have chosen to sidestep completely by not using the directional references to identify the four quarters of the Great Table at all. These inconsistencies, however, pale before what happened in April of 1587, nearly three years after Dee and Kelley had ended their Enochian workings.

For some reason Kelley felt compelled to revisit the mysteries of the Great Table and once and for all settle the questions of unresolved inconsistencies. During a conversation with the archangel Raphael that lasted approximately one hour, he claimed to receive the *Tabula Recensa*, or “Reformed Table.” This table, while correcting a few of the letters, was characterized by one very dramatic change: three of the quadrants housing the four Watchtowers were shifted to different positions within the full table. This alteration did not change any symmetrical characters, nor did it tinker all that much with the names of the governors or other angels within the table. What it did do was change the basic construction of the Great Table.

Figure 69 shows the new positioning of the reformed table. (The letters with an asterisk indicate backwards letters.)

For the duration of this book I will, for the sake of consistency, try to use the *Tabula Recensa* as my main model for both the lettering and arrangement of the Watchtowers of the Great Table. I say “try to use” because for nearly the entire Enochian period the angels referenced the original Great Table (figure 68) when explaining the angelic hierarchies and spelling the names of individual angels. It will be necessary from time to time to refer to the original, unreformed Great Table, especially when we start discussing the Kerubs (see chapters twenty-three and twenty-four), whose names might be dramatically affected by the reformed table’s new arrangement.

Also for convenience sake, I'm going to represent the segue between the Enochian magick of Dee and Kelley and Enochian magick as it is generally practiced today. Up to this point in the chronology of the adventures of Dee and Kelley, each of the four Watchtowers of the Great Table (both the original and reformed) have been identified by the one of the four Great Seals (see figure 65) or by certain landmark letters. At different times in the original material they have been identified by the order they were received or by the directions: east, south, west, or north. Nowhere in the surviving documents have I been able to find the four quadrants of the Great Table overtly identified as the *Elemental Tablets* of Fire, Water, Air, and Earth.

That being said, certain clear references in the continuing communications revealed elemental hierarchies and rulerships both *of* and *within* the individual Watchtowers. Building on this information, the adepts of the Golden Dawn projected an eminently logical elemental structure to the Great Table, its central Black Cross, and its individual subdivisions. These elemental attributions are the heart and soul of the system of Enochian magick taught and practiced by the Golden Dawn, Aleister Crowley, and most modern practitioners.

I personally believe that when these more modern adepts treated the Watchtowers as expressions of the elements they were picking up where Dee and Kelley had stopped and were taking the next logical step in the development of the system. To more easily discuss how all this is going to relate to the practical application of the system, I will now and for the remainder of this book, refer to the four Watchtowers by their modern elemental designations. Please refer to figure 69.

- The *upper left* quadrant of the reformed Great Table I will now refer to as the Watchtower, or Elemental Tablet, of Air.
- The *upper right* quadrant of the reformed Great Table I will now refer to as the Watchtower, or Elemental Tablet, of Water.
- The *lower left* quadrant of the reformed Great Table I will now refer to as the Watchtower, or Elemental Tablet, of Earth.
- The *lower right* quadrant of the reformed Great Table I will now refer to as the Watchtower, or Elemental Tablet, of Fire.

This is how they are identified in most modern Enochian literature. There is a fifth Elemental Tablet—the Tablet of Union—that is attributed to the quintessential element, Spirit. It is much smaller, containing only twenty squares, and its letters are drawn from those on the central Black Cross of the Great Table, which serves to unite the four Watchtowers in precisely the same way Spirit is said to unite and separate the four elements. I will have more to say about this very important tablet in chapter twenty-six.

Figure 70: Elemental Tablets (Watchtowers) are placed in the same positions as found on the pentagram.

The Great Table Meets the Golden Talisman

*The Angels of the 4 angles shall make the Earth open unto you,
and shall serve your necessities from the 4 parts of the Earth.*

—THE ANGEL AVE, JULY 2, 1584⁹³

Recall, from chapter nineteen, that the vision of the Golden Talisman revealed *four castles* from which flowed four cloths of different colors. Out of each castle, marching in procession came *one trumpeter, three ensign bearers, six seniors, and one king*. The king was followed by five men (who held up his train) and five crosses (one great cross surrounded by four lesser crosses) that floated in the air above them. Each of the four lesser crosses “had on them, each of them ten, like men, their faces distinctly appearing on the four parts of the Crosse, all over.”⁹⁴

After the crosses came sixteen *white creatures*, identified as dispositors on the Golden Talisman, and then “an infinite number seemed to issue, almost before the four foresaid Castles.”⁹⁵

These images and characters provide, at least partially, the key to the divine hierarchy of the Great Table. This hierarchy represents the spiritual forces that govern not only the phenomenal universe but also heaven. Let’s take a moment and project the vision of the Golden Talisman upon the Great Table.

The Four Castles

The castles are obviously the four Watchtowers (Elemental Tablets) themselves, and the rest of the characters in the vision represent the angelic hierarchy resident in each tablet. These angels can be called forth and visited in vision by intoning one or more of the first eighteen calls to activate the Elemental Tablet and the specific area of the tablet where they reside. I will show how that is done in appendix I. First, let's see how the cast of characters from the Golden Talisman fit on the individual Elemental Tablets.

For purposes of illustration, I will use the Elemental Tablet of Fire (the lower right quarter of the reformed Great Table) as our model.

d	o	n	p	a	T	d	a	n	V	a	a

Figure 71: *The Elemental Tablet of Fire*

The Trumpets (Trumpeter)

The first character to issue from each of the castles was the trumpeter. The trumpeters are the Great Seals of the tablets. In our example (the Elemental Tablet of Fire), the seal is the image of the sun emitting rays.

Figure 72: *The Great Seal of the Elemental Tablet of Fire*

The Three Ensign Bearers

At the top of the hierarchical ladder of each Elemental Tablet are the three ensign bearers, who represent the *Three Great Secret Names of God*. These names appear in the central horizontal row of the Great Central Cross that divides each Elemental Tablet. This cross is made of the two vertical columns that bisect the tablet into left and right; the left column is called the *Line of the Father* and the right column is called the *Line of the Son*, and the single central row that bisects the tablet top and bottom is called the *Line of the Holy Ghost*.

Dee and Kelley were told that the three ensign bearers were respectively of the nature of “3, 4, and 5.” This means that the Three Great Secret Names of God are spelled using the first three letters, the next four letters, and the final five letters of the central horizontal row of the central cross. In the case of the Fire tablet, these letter combinations are: *oiP*, *teaa*, *pDoce*.

r	o	o	a	n	n	g	A	C	r	a	r

Figure 73: *The Three Great Secret Names of God of the Elemental Tablet of Fire*

If there was any doubt as to the angels’ meaning concerning the four sets of the Three Great Secret Names of God, they thoughtfully provided a round diagram with all twelve names neatly represented as ensign flags surrounding a central quartered square. In that diagram, all the letters of the names appeared in uppercase letters: *OIP*, *TEAA*, *PDOCE*.

The Three Great Secret Names of all four Elemental Tablets are found in appendix IV.

The Six Seniors

Next came the six seniors. While there is little specific indication in the surviving documents that would suggest the six seniors carry planetary attributions, it is nonetheless a logical assumption; it was made by the adepts of the Golden Dawn and is made by most modern practitioners. For clarity of reference (and for the duration of our discussion), I will adapt the modern planetary designations given to the seniors.

The six seniors of each of the Elemental Tablets are found on the Great Central Cross of each tablet. The seven-letter names of the six seniors radiate from the center two letters of the cross to its extremities.

Figure 74: Positions of the six seniors on the Elemental Tablet of Fire

On the Elemental Tablet of Fire, the six seniors are: *aaetPio* (Mars), *Adoeet* (Jupiter), *aLndVod* (Luna), *aapDoce* (Venus), *arinna* (Saturn), and *aNodoin* (Mercury).

In subsequent references to the seniors (such as in lists and prayers), Dee would standardize the capitalization of the names on all the Elemental Tablets. In our example: *Aaetpio*, *Adoeet*, *Alndvod*, *Aapdoce*, *Arinna*, *Anodoin*.

The names of the seniors of all four Elemental Tablets are found in appendix IV.

In Kelley's vision of the Golden Talisman, the six seniors from each of the four castles march to the center and meet as pillars that support, as it were, the entire structure. This image is suggestive of the twenty four

elders who surround the throne of God in the Book of the Revelation of John.⁹⁶ The twenty-four seniors together are represented on the Golden Talisman as the twenty-four columns that ring the center circle of the talisman (see figure 64).

There is a seventh planetary senior who is attributed to the sun. Just as the sun is the central “king” of our solar system, so too is the sun senior identified as king and found in the center of each Elemental Tablet.

The King

Like the sun, which attracts and holds the planets in orbit, the king of each Elemental Tablet is said to summon and direct the seniors for heavenly duties. When those duties are of a *merciful* nature, the king spells his name a bit differently than when the duties are those of *severity* and judgment.

Like those of the six seniors, the seven letters of the king’s name are drawn entirely from the Great Central Cross (the lines of the Father, Son, and Holy Ghost) of the Elemental Tablet. Beginning with the fifth letter from the left in the horizontal line of the Holy Ghost, the name is spelled out in a clockwise whirl that ends in *one* of the two squares that occupies the center of the cross: either at the *sixth letter* from the left for operations of *mercy* (figure 75) or the *seventh letter* from the left for operations of *judgment* (figure 76).

In the case of the Elemental Tablet of Fire, the letters that hold those positions are both *as*, so both names are *Edlprna*.

Figures 75 and 76: Clockwise whirl spelling the two names of the king of the Elemental Tablet of Fire, Edlprna and Edlprna

Perhaps my use of the Elemental Tablet of Fire is not the best example to illustrate how the name of the king is formed by the clockwise whirls because the resulting names are the same. The other three Elemental Tablets yield distinctly different names.

The names of the Kings of all four Elemental Tablets are found in appendix IV.

The Five Crosses (One Great Cross and Four Lesser Crosses)

Each of the four quarters formed by the Great Central Cross is a rectangle five squares wide by six squares high. These quadrants are often referred to in modern Enochian magick as *lesser angles* or *subangles*. Just as the reformed Great Table positions the Elemental Tablet of Air in its *upper left*, Water in its *upper right*, Earth in its *lower left*, and Fire in its *lower right* quadrants, so too each subangle is assigned one of the four elements and positioned on its Elemental Tablet in the same way.

Figure 77: Positions of the subangle elements

Each of the four subangles is dominated by a Calvary cross made up of ten squares (the ten men of the vision of the Golden Talisman), which form the two god names of the subangle. The name drawn from the six letters of the vertical column of the cross (read top to bottom) was said to *summon* the angels of the subangle, and the five-letter god name of the horizontal bar of the cross (read left to right) was said to *command* them. Figure 78 shows the god names *rzionr* and *nrzfm* from the Fire subangle (the lower right quadrant) of the Elemental Tablet of Fire.

Figure 78: God names from the Calvary cross of the Fire subangle of the Elemental Tablet of Fire

The god names of the subangles of all four Elemental Tablets are found in appendix IV.

Sixteen White Creatures (Dispositors)

Next in procession in Kelley's vision (and next in the hierarchy of the Elemental Tablets) are the "16 white Creatures." On the Golden Talisman diagram they are represented as sixteen small columns standing side-by-side at the extremity of each rectangular cloth (see figure 64) where they are labeled "XVI Dispositors."

Among modern magicians there are several schools of thought concerning the identity of the sixteen dispositors. The simplest (and in my opinion the most correct) theory holds they are made up of the four angels who reside beneath the arms of the Calvary cross of each of the four subangles of the Elemental Tablet. Referred to as *good angels* or *servient angels*, they are invoked and commanded by the god names of their Calvary cross and have powers and knowledge that can be of great practical use to the magician (see appendix IV).

The names of the servient or good angels can be spelled with four letters (if you omit the central letter from the vertical bar of the Calvary cross) or with five letters (if you include the letter from the cross). In our example, the names are:

adre or ad[i]re

sisp or si[o]sp

pali or pa[n]li

ACar or AC[r]ar

Z	i	r	Z	a
n	r	z	f	m
a	d	i	r	e
s	i	o	s	p
p	a	n	l	i
A	C	r	a	r

Figure 79: Servient angels of the Fire subangle of the Elemental Tablet of Fire

This is a logical and very workable way of looking at the angelic hierarchy of the Elemental Tablet and conforms nicely to the vision of the Golden Talisman and to the way Dee composed his prayers to conjure these good angels.

This theory does, however, leave out in the cold the four letters *above* the arm of each Calvary cross. To address this issue we must bring up the several schools of thought concerning *Kerubs*.

Kerubic Angels

In Christian iconography, every well-appointed crucifix bears a rectangular piece of wood nailed above the head of Christ and displaying the four letters INRI.⁹⁷ So too above the arms of the Calvary cross of every subangle we find four letters that spell the name of the Kerub of the subangle, a unique spiritual personage. The Golden Dawn dubbed these angels Kerubs.⁹⁸

Now, if you are paying attention, you might want to point out that there are only four subangles and only four Calvary crosses (one in

each Elemental Tablet), and therefore there should only be four Kerub/dispositors, not sixteen, per tablet. Of course, your observation would be accurate—if we restrict ourselves to spelling their names in a straightforward and orderly manner. But according to *this theory*, there are actually four Kerubs hidden in the four letters above the arms of every Calvary cross, and these sixteen Kerubs are actually the sixteen dispositors.

Let's use the Fire (lower right) subangle of the Fire Elemental Tablet and the Kerub ZiZa as our example.

Z	i	r	Z	a
n	r	z	f	m
a	d	i	r	e
s	i	o	s	p
p	a	n	i	i
A	C	r	a	r

Figure 80: Kerub ZiZa of the Fire subangle of the Elemental Tablet of Fire

This subangle's four Kerubs are created from a simple permutation of the four letters above the arms of the Calvary cross; simply slide the four letters to the left, each time placing the displaced first letter to the back of the line:

ZiZa iZaZ ZaZi aZiZ

This dynamic perpetual motion of letters doesn't stop with the Kerub, for each letter of the Kerub's name can also rule a column and row of the sixteen letters of the servant angels residing beneath the arm of the Calvary cross.

In our example, the first Z in the Kerub's name rules the column directly beneath it and the arm of the cross: *aspA*.

The Z also rules the bottom row of the subangle: *ACar*.

Figure 81 shows how the other letters in the Kerub's name rule the servant angels of the subangle.

p	a	n	i	i
A	C	r	a	r

Figure 81: How the letters of the Kerub rule the servient angels of the Fire subangle: The first Z rules column name aspA and row name ACar. The letter I rules column name diaC and row name pali. The second Z rules column name rsla and row name sisp. And finally, the letter a rules column name epir and row name adre.

According to this theory, in order to open a subangle to summon or contact a servient angel, the magician must first invoke the two god names of the Calvary cross of the subangle in question, then invoke the Kerub, then invoke the servient angel of choice. This is a logical and workable system, but one that doesn't appear to have been on Dee and Kelley's menu. In fact, original material suggests that the Kerub is a unique citizen of the subangle, one who is not under the rulership of the Calvary cross, but under a "god" whose name begins with a sacred letter drawn from the Black Cross (the Great Central Cross) of the Great Table.

A Super Kerub?

Neither Dee or Kelley nor the modern magicians of the Golden Dawn ever use the term *Super Kerub*.

There is, however, a variety of kerubic angel who seems to embody that title. Like the variety of kerubs we've just discussed, the names of the Super Kerubs are drawn from the letters above the arms of the Calvary crosses of the subangles of the Great Tablet. But, instead of answering to the two Calvary cross god names of their subangle, the Super Kerubs answer to a higher authority—a supercharged angel who is linked directly to the Black Cross of the unreformed Great Tablet. This angel was the subject of much discussion in the original Dee and

Kelley material, for its existence and posers were central to the understanding of the “wicked” angels.

In order for us to understand the nature of the Super Kerubs and the wicked angels, we will need to take a closer look at the Black Cross.

The Black Cross, Super Kerubs, Wicked Angels, Missing Symmetrical Characters, and the Tablet of Union

That shall make the cross that bindeth the 4 Angles of the Table together. The same that stretcheth from the left to right, must also stretch from the right to the left . . .

—THE ANGEL AVE, JUNE 25, 1584⁹⁹

I stated earlier that I have been unable to find in the surviving Dee and Kelley material any overt references to the four Watchtowers as being Elemental Tablets of Fire, Water, Air, and Earth. However, the communicating angels gave every indication that the dynamics and hierarchical structure of the Great Table were, at least in part, elemental in nature. In the communication of Monday, June 25, 1584, the angel Ave speaks of the virtues of the table:¹⁰⁰

First, generally this Table containeth:

1. All humane knowledge.
2. Out of it springeth Physick.
3. The knowledge of all elemental Creatures, amongst you. How many kinds there are, and for what use they were created. Those that live in the air, by themselves. Those that live in the waters,

- by themselves. Those that dwell in the earth, by themselves. The property of the fire—which is the secret life of all things.
4. The knowledge, finding and use of Metal. }
 The vertues of them. } They are all of one matter.
 The congelations, and vertues of Stones. }
 5. The conjoining and knitting together of Natures. The destruction of Nature, and of things may perish.
 6. Moving from place to place, [as, into this Country, or that Country at pleasure.]
 7. The knowledge of all crafts Mechanical.
 8. Transmutatio formalis, sed non effentialis.¹⁰¹

If we look at the four quarters of the Great Table as being the Elemental Tablets of Air, Water, Earth, and Fire, the Black Cross that separates and joins the tablets would then obviously represent Spirit—that quintessential force that binds the four elements together in infinite quantities and ratios to create and sustain the universe, while at the same time keeping the elements separated just enough to retain their identities. This push/pull, active/passive nature is a defining characteristic of Spirit. As I mentioned earlier, this characteristic is illustrated (as every good ceremonial magician knows) by the dynamics of the pentagram, which allow for two types of Spirit pentagram, one active and one passive.

The Black Cross contains forty letters that radiate from the central blank square. When we read from the top of the column toward the center, we find the curiously spaced and inconsistently capitalized letters *e xarp* and *h Coma*. When we start at the center square of the Black Cross and read to the right, we find the letters *nanTa* and *bitom*.

We can find identical sets of letters if we read from the bottom of the column toward the center and from the center of the row to the left. In other words, the Black Cross contains mirror images of the letter groups *e xarp*, *h Coma*, *nanTa*, and *bitom*—a phenomenon curiously reflective of the dual nature of Spirit.

During the same June 25 session, Ave would (in remarkably few words) explain the letters on the Black Cross, answer questions concerning the three missing symmetrical characters of the tenth Aire (Lexarph, Comanan, and Tabitom—the twenty eighth, twenty ninth, and thirtieth

parts of the earth; see chapter eighteen, figure 63), and demonstrate how those three names construct a master table, the *Tablet of Union*, which appears to rule the whole Great Table.

But before discussing all that, we have a small bit of unfinished business to clean up from the last chapter. I am, of course, talking about the Super Kerubs and the wicked angels.

Super Kerubs, or Gods of the Kerubs?

It is my opinion, and I'm sure many will disagree, that there are two hierarchies of angels existing simultaneously in each subangle. The first hierarchy simply begins with the two god names of the Calvary cross, who are invoked before calling upon the four servient angels whose names appear beneath the arm of the cross. In this schema, all the names of the angels in the hierarchy are drawn neatly and exclusively from within the subangle itself. The Kerub plays no role at all.

The second hierarchy, I believe, does not use the two god names of the Calvary cross at all, nor does it necessarily concern itself with the servient angels. Instead, it places a new character, a Super Kerub, or kerubic god, above a group of angels whose names are drawn exclusively from the four letters above the arms of the cross.

Figure 82 is a version of the original, unreformed Great Table that I've highlighted to, hopefully, make this all clear. I realize it may sound crazy for us to bounce back to using the unreformed table when locating these angels, but it is the unreformed table the angels used in 1584 when this information was received. For the moment, please ignore the circled backwards letters on the diagram.

The letters of the Black Cross are the key to creating the kerubic gods. Note how four of the letters in the column are isolated from others that appear neatly in groups of four. Reading from the top toward the center, the *e* of *e xarp* and the *h* of *h Coma* are isolated. Reading from the bottom toward the center, the *p* of *exar p* and the *a* of *hCom a* are also isolated. Note that these four isolated letters appear in the same rows as the Kerubs who live above the arms of the Calvary crosses of all sixteen subangles.

Figure 82: Key to the Black Cross and Kerubs

To determine the name of a subangle's kerubic god, simply insert the isolated letter (that appears on the same row as the Kerub's name) at the beginning of the Kerub's four-letter name. For example, the Kerub of the Fire subangle of the Fire tablet, *ZiZa*, would be transformed into the Super Kerub, *pZiZa* (see figure 80). Instead of ruling the servient angels, this Super Kerub *pZiZa* directly rules four angels whose names are created by the permutation of the Kerub's own name: *ZiZa*, *iZaZ*, *ZaZi*, and *aZiZ*. A table containing all the kerubic gods and their Kerubs can be found in appendix IV.

The important thing to remember is that in this system there are two hierarchies of angels in each of the sixteen subangles: one hierarchy that simply uses the god name of the Calvary cross to summon or contact the servant angels living under the arms of the cross, and one hierarchy that selects a letter from the Black Cross (outside the Elemental Tablet) and adds it to the Kerub's name to create a kerubic god who rules four Kerubs whose names are created by the permutation of the regular Kerub's own name.

When to use one hierarchy and not the other in a magical operation remains a subject of debate among modern magicians. One thing is certain, the more the magician understands about the nature and dynamics of the Great Table, the more he or she will be able to devise a logical and workable mode. So let's discover more wonders of the Black Cross. Let's start with something we haven't encountered before in Enochian magick—wicked angels.

Wicked Angels

The letters of the Black Cross are also the key to creating the names of the four wicked, or evil or malevolent, angels of each subangle. Up to now we've been dealing with angels whose names are representative of complete and balanced segments of the Great Table and its Elemental Tablets. But during the June 25 session, as the angel Ave was expounding on the virtues of the Black Cross, he also introduced Dee and Kelley to a set of angels that are not complete and balanced—angels he referred to as being “wicked.” These malevolent angels manifest aversely the powers of their good-angle subangle neighbors. For example, if the good angels are useful for healing, the wicked angels bring sickness and affliction (see appendix IV).

But some of the wicked angel duties seem rather tempting and are said to be useful in obtaining money and for gambling. Kelley initially got pretty excited about such prospects and was very disappointed when Ave in no uncertain terms told him hands off the evil angels. Why Ave would give details of these critters and turn around and tell the magicians not to use them remains a mystery. Or does it?

The name of an evil angel is a portrait of incompleteness and imbalance supercharged with an injection of the immense power of the Black Cross—a dangerous recipe if there ever was one. Creating it is very simple. Here's how to do it.

Remember how we created the name of a kerubic god by prefacing the name of a regular Kerub with the letter from the Black Cross occupying the same row? Well, that's almost exactly what we do to create the name of a wicked angel. However, instead of prefacing the four letters of a Kerub's name, we preface only the *first two letters* of the servient

angel's name with its neighboring letter from the Black Cross. This three-letter supercharged perversion of the first half of a servient angel's name is a wicked angel.

Figure 83 is the Air (upper left) subangle of the Elemental Tablet of Earth (upper right Elemental Tablet in the *unreformed* Great Table) with the adjoining Black Cross letters. The four evil angels of this sub-angle are *xai*, *aor*, *rrs*, and *piz*.

e'	b	o	a	z	a
u	N	n	d	x	
x	a	i	f	r	d
a	o	r	p	n	n
r	r	s	o	n	i
p	i	z	i	n	r

Figure 83: Names of wicked angels of the Air subangle of the Elemental Tablet of Earth (unreformed Great Table)

And how does one, if one were inclined, call forth these evil angels? Who are their hierarchical rulers? As one might expect, the adverse god names that call forth the evil angels are the names on the Calvary cross *spelled backwards*. In the case of our example they are *iOpгна* and *xanNu*.

You can easily work out the names of the other evil angels and their rulers by referring to figure 82 or consulting the table in appendix IV.

Paraoan

Ave was particularly concerned that Dee and Kelley locate the name *Paraoan* on the Great Table. The significance of this great angel has not (at least to my satisfaction) been adequately explored or explained. The name *Paraoan* first appeared among the ninety-one parts of the earth as one of the three divine names (number 65) in the twenty-second Aire. *Paraoan* is the divine name of the part of the earth designated as Marmarica. According to Enochian scholar Robin Cousins, in Dee and Kelley's day, *Marmarica* was a North African coastal region straddling the Egyptian and Libyan coasts, bounded on the east by the River Nile (see appendix III).

Oddly enough, a perfectly good sixty-fifth symmetrical character already existed. It is found in the lower right section of the Elemental Tablet of Water, and spells the name *Laxdizi*.

Nevertheless, Paraoan seems to also hold the title of the sixty-fifth part of the earth known as Marmarica. The obvious and inescapable similarity between the names *Marmarica* and *America* inserts (into my mind at least) an added dimension of mystery to this curious anomaly. Add to this the enigmatic and direful comments Ave made concerning the final *n* in *Paraoan*:

As far as that N. stretcheth in the Character, so far shall that Countrey be consumed with fire, and swallowed into Hell, as Sodom was for wickednesse. The end of all things is even at hand: and the earth must be purified, and delivered to another.¹⁰²

A bit later, Dee presses Ave on this:

Dee: I beseech you say somewhat of the N in Paraoan, of which you said, so far as that stretched, should sink to hell.

Ave: Every letter in Paraoan, is a living fire: but all of one quality and of one Creation. But unto N is delivered a viol of Destruction, according to that part that he is of Paraoan the Governour.¹⁰³

The letters of the name *Paraoan* are created from seven of the eight backward letters that appear scattered among the four Elemental Tablets of the Great Table. See the circled letters in figure 82. The eighth backwards letter, the backward *L* found in the lowermost square on the right of figure 82, has another very important job to do.

The Three Missing Symmetrical Characters of the Tenth Aire

Recall from the table in chapter eighteen (figure 63) that there were no symmetrical characters for the three parts of the earth assigned to the tenth Aire (those whose divine names were *Lexarph*, *Comanan*, and

Tabitom). Neither can these three names be found within the available letters in any of the four Elemental Tablets. They are, however, to be found on the Black Cross, and the angel Ave, in his highly productive lecture of June 25, 1584, shows how it is done.

Ave instructed Dee and Kelley to pluck the backward capital *L* from the lower right corner of the lower right Watchtower (I've circled it in figure 82) and preface the lowercase letters *e*, *x*, *a*, *r*, *p*, and *h* from the column of the Black Cross to form dual versions of the divine name *Lexarph*.

Then starting with the capital letter *C* in the column, moving down from the top *C* (or up from the bottom *C*), then continuing to read either right or left into the horizontal row, dual versions of the divine name *Comanan* are formed.

Then, starting with the capital letter *T* in the left and right arms of the Black Cross and reading toward the extremities, we discover dual versions of the divine name *Tabitom*.

Lexarph, *Comanan*, and *Tabitom* are respectively the divine names of the twenty-eighth, twenty-ninth, and thirtieth parts of the earth in the tenth Aire, whose symmetrical characters were missing from the original material concerning the ninety-one parts of the earth. Their characters are simply the straight lines and rotating *L*s that spell out their names on the Black Cross.

Obviously, angelic beings whose names are drawn from the Black Cross are of a nature that sets them apart from their neighbors in the Elemental Tablets. Their presence in the tenth Aire also distinguishes that portion of the ninety-one parts of the earth for special attention—something that will be important to us later.

The Four Names of the Tablet of Union

Lexarph, *Comanan*, and *Tabitom* also contain within themselves the four names that appear in pairs on the Black Cross, names that are very familiar to practicing Enochian magicians: *EXARP*, *HCOMA*, *NANTA*, and *BITOM*. These are the four divine names of the elements that (in the practice of modern Enochian magick at least) rule the four Elemental Tablets.

These four names are arranged into a table five squares wide by four squares high. This *Tablet of Union*, in its profound simplicity, extracts the essence and hierarchical dynamics of the entire Great Table. The Tablet of Union is quite literally the Great Table distilled.

E	X	A	R	P
H	C	O	M	A
N	A	N	T	A
B	I	T	O	M

Figure 84: The Tablet of Union

We'll soon learn much more about the Tablet of Union. But first, we are almost ready to bring the story of Dee and Kelley's Enochian period to an end. It was not long after Ave's revelations concerning the Black Cross, Kerubs, wicked angels, missing symmetrical characters, and the Tablet of Union that the two magicians' great angelic adventure, for all intents and purposes, came to a close. There remained only a couple of loose ends to tie up. But my heavens, what loose ends those were!

“There Is All.”

Nalvage is called away and cannot be in Action with you until Wednesday. Then shall you have the Calls that you look for. And so enter into the knowledge and perfect understanding of the 49 Gates and Tables if you will.

—THE ARCHANGEL GABRIEL, MONDAY, JULY 9, 1584¹⁰⁴

In early July of 1584, the two magicians were busy trying to tie up loose ends before a mysterious August deadline. On July 7, the angel Ave waxed eloquent about how Enoch made tablets such as those Dee and Kelley now possessed, and had labored fifty days in prayer and confession before receiving a supreme revelation. It appears from the communication¹⁰⁵ that the two magicians were to do likewise.

In a breathtakingly short amount of time, Dee and Kelley received the translations of the remaining angelic calls (five through eighteen), which they had six weeks earlier received in the angelic tongue, together with tantalizing hints that the eighteen calls might be connected to the Tablet of Union and the four Elemental Tablets.

On Thursday, July 12, the angel Ilemese¹⁰⁶ began to deliver a nineteenth call, together with its translation. This call was said to be actually thirty calls, bringing the total number of calls to forty-eight. Add the unexpressed “first” call (see chapter sixteen), and we have a grand total

of forty-nine (7 x 7) calls. The next day, Friday the thirteenth, 1584, John Dee's fifty-seventh birthday, Ilemese delivered the remaining portion of the nineteenth call and revealed that it was the key to accessing the thirty Aires (the heavens connected to the ninety-one parts of the earth). Lastly, he revealed the names of the thirty Aires, which until then had only been identified by numbers (see chapter nineteen, figure 63, columns I and VI).

The nineteenth call was a master call to be used to access each of the thirty Aires or Aethyrs. The only thing that differentiated the thirty calls from one another was insertion of the name of the particular Aire in the first line. Ilemese delivered the names of the Aires as a simple list and then engaged in a brief exchange with Dee.

The first Aire is called	_____	Lil.
The second	_____	Arn.
The third	_____	Zom.
4.	_____	Paz.
5.	_____	Lit.
6.	_____	Maz.
7.	_____	Deo.
8.	_____	Zid.
9.	_____	Zip.
10.	_____	Zax.
11.	_____	Ich.
12.	_____	Loe.
13.	_____	Zim.
14.	_____	Uta.
15.	_____	Oxo.
16.	_____	Lea.
17.	_____	Tan.
18.	_____	Zen.
19.	_____	Pop.
20.	_____	Chr.
21.	_____	Asp.
22.	_____	Lin.

23. _____ Tor.
24. _____ Nia.
25. _____ Uti.
26. _____ Des.
27. _____ Zaa.
28. _____ Bag.
29. _____ Rii.
30. _____ Tex.

Ile: There is all—Now change the name, and the Call is all one.

Δ: Blessed be he who onely is always one.

I take these names to be as primus, secudus, tertius, and to 30.

A voice . . . Not so, they be the substantial names of the Aires.

Δ: It was said they had no proper names; but were to be called, O thou of the first Aire, O thou of the second, etc. I pray you reconcile the repugnancy of theses two places, as they should seem.¹⁰⁷

Dee's testiness evoked a response from none other than the archangel Gabriel, who was sitting nearby in Kelley's vision during Ilmese's discourse. The great angel stood and informed the magicians they now possessed the knowledge they needed. He encouraged them to study and prepare for the August operation and then, after one more little jab at Dee's cheekiness, delivered a most poignant valediction.

E. K. The Curtain is opened.

E. E. [sic] Now Gabriel standeth up.

Gabr . . . Thus has God kept promise with you, and hath delivered you the keys of his storehouses: wherein you shall find, (if you enter wisely, humbly, and patiently) Treasures more worth than the frames of the heavens.

But it is not August come: Notwithstanding the Lord hath kept his promise with you be the time. Therefore, Now examine you Books, Confer one place with another, and learn to be perfect for the practice and entrance.

See that your garments be clean. Herein be not rash: Nor over hasty; For those that are hasty and rash, and are loathsomely appareled, may knock long before they enter.

There is no other reading of the Book, but the appearing of the Ministers and Creatures of God: which shewing what they are themselves, shew how they are conjoyed in power, and represented formally by those letters.

E. K. Now he taketh the Table, and seemeth to wrap it up together.

Δ: Seeing I have moved the doubt of their names I pray you to dissolve it.

Gab . . . You play with me childishly.

Δ: I have done.

Gab . . . Thinkest thou that we speak any thing that is not true?

Thou shalt never know the mysteries of all things that have been spoken.

If you love together, and dwell together, and in one God; Then the self-same God will be merciful unto you: Which bless you, comfort you, and strengthen you unto the end. More I would say, but words profit not. God be amongst you.

E.K. Now they both be gone in a great flame of fire upwards . . . ¹⁰⁸

Thus, in a dramatic burst of flame, the angels of Enochian magick tell silent, and the most amazing magical operation ever recorded came

to an end. Unfortunately, we don't know if the two magicians actually performed the fifty-day operation scheduled for August. Surviving diary entries for the month treat on other matters. What we are left with, however, is an elegant and remarkably coherent system of vision magick.

For those of us who have made Enochian magick a part of our spiritual quest, Gabriel's parting words ring profoundly true. God did keep promise with Dee and Kelley and delivered unto them (and us) the keys to the storehouses wherein we shall find, if we enter wisely, humbly, and patiently, treasures worth more than the frames of the heavens.

BOOK V

Putting It Together

Rulership of the Tablet of Union

*The Tablet of Union is a Great Table you can put in your briefcase;
but EHNB is a Tablet of Union you can put in your pocket.*

—LON MILO DUQUETTE

I have purposefully placed this brief overview of practical Enochian vision magick after the chronology of Dee and Kelley's great Enochian adventure. I do so because Enochian vision magick as it is generally practiced today is a system that depends heavily on innovations that were developed long after the great magicians passed into history. Not that I think that modern Enochian magick is an affront to the memories of these two giants of magick. But I do think it is important for us to know the difference between the foundational material and the structures that have later been built upon it.

I think it is also important to remember that there is nothing particularly sacrosanct about the methods and techniques developed by the Golden Dawn, Crowley, or any other latter-day magicians. As an informed and competent magician, you are just as free as these individuals were and are to develop your own Enochian magick art form based and structured on your personal interpretation and understanding of Dee and Kelley's experiences and material. After all, in order for you to justly claim the title of magician you must *be* a magician, not

merely a one-man or one-woman Society for Creative Anachronism dedicated to simply recreating the lives and works of real magicians of the past.

Enochian vision magick as practiced today can be divided into two broad categories: elemental and aethyric. Both require the ability to scry and to keep a faithful written record of one's workings. Scrying the Aethyrs has, in my later years, become the focus of most of my Enochian operations, because that process deals most directly with the current state of my personal initiatory career—by that I mean my personal transformational process, my spiritual journey, the lifting of my consciousness.

However, it has not always been so. Indeed, I would never encourage any magician, especially in the early stages of his or her Enochian career, to neglect either branch of Enochian exploration. I spent many years honing my visionary skills by exploring the elemental worlds that not only make up my physical, mental, and emotional environment but also actually represent everything that my limited senses tell me is *me*.

It is the elemental branch of Enochian vision magick that I will first discuss. To help me do this, I'm going to talk briefly about the structure of another great magical tool, the tarot.

Rulership of the Tablet of Union

The classic tarot image of the Magician shows the magician standing behind a table, upon which are four magical tools; a wand, a cup, a sword, and a disk. These are the four elemental weapons of the magician. They represent respectively the four suits of the tarot and the elements Fire, Water, Air, and Earth.

The master card of each suit is the ace. The ace is the "Spirit" of the suit—the "Spirit" of the element. The other cards in the suit are given life by the spirit of the ace. They are essentially subdivisions, components, and aspects of the ace—they all "live" inside the ace.

If we put an ace under a magick microscope, we would first see that it is composed of four major components.¹⁰⁹ These are the four court cards (commonly titled king, queen, prince, and princess) that represent respectively the elements Fire, Water, Air, and Earth. For example, if we

put the Ace of Wands (Fire) under our magick microscope, we would see that it was composed of the King of Wands (the fiery aspect of Fire), the Queen of Wands (the watery aspect of Fire), the Prince of Wands (the airy aspect of Fire), and the Princess of Wands (the earthy aspect of Fire).

In the Enochian model, we can actually see Spirit's influence interpenetrating the heart and every quadrant of the Elemental Tablet in the form of the Great Central Cross and the Calvary crosses of the subangles. The Black Cross of the Great Table reveals Spirit's influence on an even larger scale. It literally holds together and separates the four Elemental Tablets. The Black Cross is like the ace of aces. All this is expressed most simply and elegantly in the Tablet of Union.

I draw your attention to figure 85 and the four rows of names in the Tablet of Union.

		Subangles				
		⊗	△	▽	▽	△
Elemental Tablets	△	E	X	A	R	P
	▽	H	C	O	M	A
	▽	N	A	N	T	A
	△	B	I	T	O	M

Figure 85: The elemental key to the Tablet of Union

Recall that *Exarp*, *Hcoma*, *Nanta*, and *Bitom* are the four names found in pairs on the Black Cross of the Great Table. In modern Enochian magick, these Black Cross letters represent the element Spirit. The four names on the Tablet of Union are not merely the master keys to the elemental universe—they are the elemental universe.

Starting with the top row, we see that EXARP is the elemental world of Air; HCOMA the world of Water; NANTA, Earth; and BITOM, Fire.¹¹⁰ (Note the little symbols of the elements to the left of each row of names.)

Now let's look at the five columns of the Tablet of Union. The left-most column is made from the four first letters of the names, giving us the name *EHNB*. At the top of this column is a little circle with spokes inside. This is the symbol of Spirit. It tells us that *EHNB* is the column of Spirit and the essence of the entire tablet.

Obviously, the angelic entity described by the letters *EHNB* is profoundly powerful. It is a name that represents and contains within itself the entire Great Table and all the angelic forces within it. *E* represents the entire the Elemental Tablet of Air, *H* the Elemental Tablet of Water, *N* the Elemental Tablet of Earth, and *B* the Elemental Tablet of Fire.

In a real sense, the remaining sixteen letters all live inside *EHNB* in just the same way the sixteen court cards of the tarot live inside their aces. Put *E* under a microscope and see the letters *XARP*. Put *H* under a microscope and see *COMA*. Put *N* under a microscope and see *ANTA*. Put *B* under a microscope and see *ITOM*.

As we move right, the next column is *XCAI*, whose letters represent the four Air subangles of the four Elemental Tablets and all the resident angels inside the Air subangles. (*XCAI* would be the four princes of the tarot.)

AONT does the same for the Water subangles (queens of the tarot), *RMTO* for the Earth subangles (princesses of the tarot), and *PAAM* for the Fire subangles (kings of the tarot).

Now are you starting to see the power resident in the Tablet of Union? If we were to call *EXARP*, *HCOMA*, *NANTA*, and *BITOM* archangels of the elements, then we would have to say that *EHNB* is the archangel of archangels of the elements. The Tablet of Union is a *Great Table* you can put in your briefcase, but *EHNB* is a *Tablet of Union* you can put in your pocket.

The Tablet of Union and the four Elemental Tablets are activated and penetrated in vision by intoning one or two of the first eighteen calls in the angelic tongue. I give details showing how this is done in appendix II, but here is a brief overview:

The first two calls are dedicated to the Tablet of Union exclusively and are never used to call or visit the angels of the Elemental Tablets.

The next four calls (three through six) deal with the angels of the individual letters of *EXARP*, *HCOMA*, *NANTA*, and *BITOM*, and/or are used to activate and penetrate the *native subangles* of the Elemental

Tablets. (A native subangle is the subangle of an Elemental Tablet that represents the same element as the Elemental Tablet—e.g., the Air Subangle of the Air Tablet, the Water Subangle of the Water Tablet.)

The next twelve calls (seven through eighteen) are used to activate and penetrate the remaining three subangles of the Elemental Tablets. How these calls are allotted to the various subangles is an exercise in routine hermetic logic.

As I mentioned earlier, it is not necessary for you to have elaborate or expensive models of the Elemental Tablets and the Tablet of Union in order to perform Enochian magick. But it is important that you have a good understanding of them and have the equipment “installed” in your mind. When I work with the angels of the Elemental Tablets or the Tablet of Union, I simply have my four colored Elemental Tablets (positioned as they appear in the reformed Great Table) on a table before me and place my small Tablet of Union on the top of them in the center.

Now on to the business of actually doing Enochian vision magick.

Elemental Workings, Temple Openings, and Addressing the Hierarchies

Sylphs and Gnomes and Undines too,

Salamanders beckon you . . .

—“THEME FROM MOUNT OREAD”¹¹¹

Why on earth would anyone wish to call upon an angel of the elements? What can a salamander (Fire elemental) do for me? When does an undine (Water elemental) come in handy? Does a sylph (Air elemental) really look like Tinkerbell? Are gnomes (Earth elementals) really grumpy? Is exploration of the elements a necessary prerequisite to higher magical workings?

As I wrote in the prologue, the question of, “why magick?” is one that is not easily answered. The supreme goal of the magician is spiritual enlightenment and liberation of the soul. Do I expect to accomplish that end through the aid of elemental spirits?

Not directly. But the elementals are a part of my world, a part of my being. They move within me and around me. They dwell among themselves in their infinite number, ratios, and proportions. “Know

Thyself” was chiseled above the doors of the ancient temples of initiation. How can I know myself when the mysteries of the elements of my own heart and soul remain undiscovered?

Enochian elemental magick is not a matter of calling up a spirit to command it to do a job for you, to cause the girl next door to fall in love with you, to bewitch your neighbor’s cow, or to kill an enemy at a distance. Instead, when you visit an Enochian elemental angel in vision, you are exploring a specific aspect of creation, a highly specialized area of which the angel is the visual and metaphoric embodiment. You see things the way they *are* in that narrow quadrant of the universe. Once armed with the insights these spiritual specialists can provide, you are better prepared to know how to go about causing the girl next door to fall in love with you or bewitching your neighbor’s cow. (I understand that killing at a distance is less satisfying than one might imagine.)

Does this really help the magician? First and most obviously, it broadens his or her understanding of how the spirit world is the subjective and underlying reality of the objective world. Just as the educated and seasoned traveler is better equipped than the novice to understand rewards and pitfalls of world travel, a magician experienced with elemental work is endowed with a greater understanding of existence. That in and of itself is a spiritual reward.

But more than that, each willed encounter with the angels of the elements activates, readjusts, and rebalances the magician’s own internal elemental components. Like the computer user who periodically defragments the hard drive of his or her computer in order to make things to run more efficiently, the magician is changed and (hopefully) improved with every thoughtful and seriously examined elemental encounter.

At our Monday night magick class, we’ve developed a series of simple questions we first ask every angel we call from an Elemental Tablet. Just as we would not expect any two computer hard drives to be fragmented in exactly the same way, no two magicians should expect the exact same answers to these questions. Here are a few of them. The first questions are the simplest yet most important:

- What is your name? (Confirm you have who you’ve called.)
- What is your nature?

The next questions deal with how the angel is perceived by the human senses:

- What is your color?
- What is your sound (musical note, if possible)?
- How do you feel to the human touch?
- What do you taste like?
- How do you smell?

The next questions deal with how the angel makes itself known to us through our thoughts and emotions:

- How do I express you through emotions?
- In what form of images and ideas are you most revealed to me?
- When are you most manifest in my daily life?

Other questions could concern things more specific to one's own personal magical issues, but I think you get the picture.

Now that we know a little more about why to practice Enochian elemental magick, let's look at how to do it. It is likely that my opinion on this subject will be slightly at odds with a number of practicing Enochian magicians. It is even more certain to receive condemnation by legions of others who don't actually perform Enochian magick but instead enjoy speculating how Enochian magicians should operate.

Dee and Kelley contacted the angels by praying. Boy, did they pray! There is nothing in the surviving records that suggests that they performed banishing rituals, drew pentagrams or hexagrams in the air, made knocks or magical gestures, or called upon the strings of classic qabalistic Hebrew divine names from the sephiroth of the Tree of Life. The operating procedures of the Golden Dawn and Crowley, however, do all those things and more.

Here is an example of a Golden Dawn-style temple opening appropriate for working with the Elemental Table of Earth. It is a ceremony that incorporates ritual components from the GD's neophyte degree, the grade that represents Malkuth, the tenth and lowest sephirah on the Tree of Life. As you can see, the ritual invokes the qabalistic hierarchy of divine names, archangels, and angels traditionally attributed to Malkuth and the element Earth.

The Opening of the Temple in the Grade of 1° = 10□

Give the Sign of the God SET fighting.

Purify with Fire and Water, and announce

“The Temple is cleansed.”

Knock.

“Let us adore the Lord and King of Earth! Adonai ha Aretz, Adonai Melekh, unto Thee be the Kingdom, the Sceptre, and the Splendour: Malkuth, Geburah, Gedulah, The Rose of Sharon and the Lily of the Valley, Amen!”

Sprinkle Salt before Earth tablet.

“Let the Earth adore Adonai!”

Make the Invoking Hexagram of Saturn.

Make the Invoking Pentagram of Spirit Passive and pronounce . . .

“AHIH AGLA NANTA”

Make the Invoking Pentagram of Earth, and pronounce . . .

“ADNI MLK.” And Elohim said: “Let us make Man in Our own image; and let them have dominion over the Fish of the Sea and over the Fowl of the Air; and over every creeping thing that creepeth upon the Earth. And the Elohim created ATh-h-ADAM: in the image of the Elohim created They them; male and female created They them. In the Name of ADNI MLK, and of the Bride and Queen of the Kingdom; Spirits of Earth, adore your Creator!”

Make the Sign of Taurus.

“In the Name of Auriel, great archangel of Earth, Spirits of Earth, adore your Creator!”

Make the Cross.

“In the Names and Letters of the Great Northern Quadrangle, Spirits of Earth, adore your Creator!”

Sprinkle water before Earth Tablet.

“In the three great secret Names of God, MOR, DIAL, HCTGA, that are borne upon the Banners of the North, Spirits of Earth, adore your Creator!”

Cense the Tablet.

“In the name of ICZHIHA, great king of the North, Spirits of Earth, adore your Creator! In the Name of Adonai Ha-Aretz, I declare that the Spirits of Earth have been duly invoked.”

Knock. 4444—333—22—1

For many modern Enochian magicians, rituals such as this qabalistically formatted degree opening ceremony are perfect vehicles for establishing the proper elemental environment in which to operate. For years they were an indispensable part of my operating procedure as well. I discontinued, however, about ten years ago.

As we myopically focus on the fascinating intricacies of different magical systems, we often forget the big picture and the fact that we have only one universe to play with. There is no such thing as a separate qabalistic magick universe, or a separate Solomonic magick universe, or a separate Enochian magick universe. These various systems simply oblige us to view the same universe from different angles. Granted, when we look from differing points of view, we see certain similarities. After all, it's the same universe. There are certain to be recognizable landmarks. But we can't expect the structure of one system's point of view to neatly match or define the other.

It is my opinion that the spiritual forces inherent in Enochian magick are expressed units of living consciousness that reflect a uniquely structured and organized point of view of the universe—one that the communicating angels obliged Dee and Kelley to build from scratch. It is a perfect, self-referential system of looking at things that cannot be expected to be consistently compatible with other self-referential systems.

With all due respect to the knowledgeable and eloquent magicians who created the above temple opening, I believe that (unless your sensitivities as a magical artist demands it) most of it is completely unnecessary in order for you to properly activate an Elemental Tablet and effectively address the hierarchy of angels who rule the angel you may wish to contact. The use of the various pentagrams and the hexagram, the assumption of a Samo-Thracian elemental god-form, the invocation of the various names of the Hebrew deity and traditional angels, and the recitation of Bible verses are all tried-and-true magical methods to access the elemental world of Earth, but they are tools used in *another* kind of magical system—a system that views the magical universe from a slightly different angle, music played using a different scale of notes.

Please don't misunderstand me. Qabalistic temple openings such as the one above work effectively enough for Enochian elemental operations. But what makes them work, in my opinion, is not the pentagrams, Hebrew god names, or Bible verses. They work because, nestled within the ramblings and tossing about of salt and water, the magician is required to recognize and address by name the spiritual forces of the elements as they are uniquely organized and expressed in the Enochian magick system. In our example above, those names are Nanta (the great angel of Earth from the Tablet of Union), Mor, Dial, Hctga (the Three Great Secret Names of God from the Elemental Tablet of Earth), and Iczhiha (the king of the Elemental Tablet of Earth). The hierarchy of high elemental forces that the *other* magical system calls Adonai ha Aretz, Adonai Melekh, Malkuth, the Rose of Sharon, and the Lily of the Valley—everything the *other* system calls forth by means of pentagrams, gestures, and Bible verses—are all wrapped up and neatly addressed in the Enochian system in the names Nanta, Mor, Dial, Hctga, and Iczhiha.

If you conclude that my thoughts on this subject have some merit, I encourage you to customize for yourself a simply formatted little

speech that addresses by name and in proper order the various angelic personages of the hierarchies of each Elemental Tablet. I will outline my address to the hierarchies at the end of this chapter. But first, let's discuss what the proper procedure for an elemental working might be.

DuQuette's Protocol for Enochian Elemental Vision Magick

The lower the angel you wish to contact is in the hierarchy of the Elemental Tablet, the more superior angels there are above it who must be named and addressed. Therefore, for our example I will use Adre, a lowly servient angel found under the arms of the Calvary cross of the Fire Subangle of the Elemental Tablet of Fire. (See chapter twenty-three, figures 71 through 79.)

I. Preliminaries

Before embarking on any formal magical operation it is helpful, indeed necessary, to feel good about oneself. Therefore, I always recommend that the magician first bathe, dress in clean clothing, and operate in a clean and uncluttered space. It is also wise to formally purify and banish the area before operating. These preliminary ceremonies can be as simple or as elaborate as you feel necessary. I always begin with a simple Lesser Banishing Ritual of the Pentagram that I've customized to reflect my own taste and spiritual proclivity. A classic version of the pentagram ritual can be found at the beginning of appendix I.

I next perform the Ceremony of Preparation that is outlined in chapter one and appendix I of this book. I consider this ritual an Enochian magick temple opening par excellence. I believe it serves to purify, banish, and consecrate both the temple and the magician in a manner that is in harmony with the universe as perceived by the Enochian angels. It also establishes and sanctifies the magical environment for the black mirror or scrying stone.

II. The Call(s)

A complete list of the angels of all four Elemental Tablets, together with their traditional duties, can be found in appendix IV.

In order to contact any angel from an Elemental Tablet, one need first activate the tablet by intoning the proper call or calls in the Enochian tongue. The calls and the key to their use can be found in appendix II.

Only one call is necessary if your target angel resides in the Great Central Cross (one of the Three Great Secret Names of God, a senior, or a king). Also, only one call is necessary if your target angel resides in the *native* subangle of the Elemental Tablet (e.g., the Fire Subangle of the Fire Tablet, the Water Subangle of the Water Tablet, etc.). But if your target angel resides in a non-native subangle (e.g., the Earth Subangle of the Water Tablet, the Air Subangle of the Fire Tablet, etc.), you must also recite an additional call assigned specifically to the subangle.

Our target angel, Adre, resides in the native subangle (Fire Subangle of the Fire Tablet), so we need only recite the sixth call (see appendix II).

Reciting the sixth call switches on the power of the Elemental Tablet of Fire, as it were, and puts it in standby mode to await more specific actions from the magician.

III. Addressing the Hierarchy

Whether you feel it or not,¹¹² your recitation of the sixth call has put you in an altered state of consciousness. Magically speaking, you are now present within the environment of the Element Tablet of Fire. You have awakened the spiritual forces of the tablet, and they are waiting to see if you are worthy of their attention. If you can convince the spirits of the tablet that you know where you are and how you got there, they will acknowledge you as a natural citizen of their well-ordered magical universe. Once you've established rapport with its superiors, the target angel will have no choice but to be compliant and ready to open its mysteries to you.

You prove your worthiness by remembering your manners and addressing by name the angels who reign over your target angel. In the case of a servient angel like Adre, the hierarchy is essentially the whole cast of characters. Starting from the top we have:

1. The Supreme Name of Fire from the Tablet of Union: *Bitom*.
2. The Three Great Secret Names of God of the Elemental Tablet of Fire: *Oip, Teaa, Pdoce*.
3. The name of the king of the Elemental Tablet of Fire: *Edlprna*.
4. The names of the six planetary seniors of the Elemental Tablet of Fire: *Aaetpio, Adoeet, Alndvod, Aapdoce, Arinna, and Anodoin*.
5. The first god name of the Fire subangle: *Rzionr*.
6. The second god name of the Fire subangle: *Nrzfm*.
7. And finally, the name of our target servient angel: *Adre*.

If the target angel is higher on the hierarchical ladder, there are fewer names to include in your little speech. For example, to call a senior, you only need to use the names in steps 1, 2, and 3 before calling on the name of the target senior. If your target angel is the king of the Elemental Tablet, you only have to use the names in steps 1 and 2.¹¹

And what about the kerubic angels who, as we learned earlier, have a separate hierarchy that skips the god names of the subangle?

In the case of the Fire subangle of the Elemental Tablet of Fire, simply replace the name in step 5 with the name of the god Kerub (*Pziza*) and replace the name in step 6 with the name of the Kerub (*ZiZa, iZaZ, ZaZi, or aZiZ*).

IV. Calling Your Target Angel

Repeat out loud the name of the target angel, Adre, several times. State why you have called it; ask your questions and/or make your requests, then sit quietly and scry. If necessary, repeat the call to induce a deeper state of mind. If you wish, have a tape recorder running and describe your vision as it unfolds. Don't tire yourself. Conclude your visionary business at the first signs of fatigue. Thank the angel and formally close the session with a banishing ritual of your choice.

V. Write It All Down

Immediately transcribe everything into your magical journal. I mean *everything*: the date and time, weather conditions, astrological aspects (if you know them and care about such things). Even if you think there is nothing to report, write that down, along with your thoughts of why things might not have worked.

Sample of a Hierarchical Invocation

The invocation below is what I currently use to acknowledge and invoke the hierarchy of the Elemental Tablet. I will provide the English translation of it first so you will know what it is saying. You may easily customize your own by referring to an Enochian dictionary.¹¹⁴

With the Elemental Tablet before me, I utter each angel's name and I wave my wand over the squares that spell it.

I invoke and move thee, O thou, Spirit (name of target angel).

And being exalted above you in the power of the Most High, I say unto you come forth and obey!

In the name of (Supreme Name from the Tablet of Union; e.g., Exarp, Hcoma, Nanta, or Bitom);

and in the name of (the Three Great Secret Names of God of the Elemental Tablet),

and in the name of (the name of the king of the Elemental Tablet),

and in the name of (the names of the six seniors of the Elemental Tablet),

and in the name of . . . ,

and in the name of . . . ,

and in the name of . . . (as many names in hierarchy as necessary),

I invoke and move thee, O thou Spirit (name of target angel).

Here is the same invocation in the Enochian angelic language:

Ol vinu od zacam, Ils gah (name of target angel).

Od lansh vors gi Iad, gohus pugo ils niiso od darbs!

Dooiap (Supreme Name from the Tablet of Union),

od dooiap (the Three Great Secret Names of God),

od dooiap (the name of the king),

od dooiap (the names of the six seniors),

od dooiap . . . ,

od dooiap . . . ,

od dooiap . . . (as many names in hierarchy as necessary),

Ol vinu od zacam, Ils gah (name of target angel).

Aethyric Workings

Everything in heaven and earth is connected to everything in heaven and earth.

Everything in heaven and earth is the reflection of everything in heaven and earth.

Everything in heaven and earth contains the pattern of everything in heaven and earth.

Look hard enough at anything and you will eventually see everything.

—RABBI LAMED BEN CLIFFORD¹¹⁵

In order to more easily understand what follows, I ask that you turn back to chapter eighteen and refer to the columns in figure 63.

Right up until the last day of the Enochian period, Dee and Kelley believed that the thirty Aires (column I) were simply the numbered segments of creation that organized in groups of three¹¹⁶ the ninety-one parts of the earth. Furthermore, they believed that the ninety-one divinely appointed names of the parts of the earth (column IV) were merely the angelic language names for the geographic areas of the earth named in column III. But in his final communication of July 13, 1584,

the angel Ilmese revealed that the thirty Aires had names and a certain connection with the nineteenth call. As we saw in chapter twenty-five, this concept appeared to confuse and irritate Dee, who seemed comfortable with merely identifying the Aires by their sequence number.

Even though there is very little in the surviving material to suggest the thirty Aires are anything other than containers for the parts of the Earth, many modern magicians believe they carry a more profound significance. Indeed, it appears to me that this is an excellent example of modern magicians picking up the football where Dee and Kelley dropped it and running with it for a very big touchdown. The basic idea is this.

In keeping with the most fundamental hermetic and qabalistic axiom, “As above, so below,” the *microcosmic* world (the physical universe and humanity) is the reflection of a heavenly *macrocosmic* world of divine consciousness. So too, the thirty Aires containing the ninety-one parts of the earth are the microcosmic reflection of thirty Aethyrs, or heavens, that surround and enclose the four Watchtowers of the Great Table in thirty heavenly spheres, like layers of a glass onion.

Like the ten sephiroth and the twenty-two paths on the Tree of Life, the thirty Aethyrs can be viewed as emanations of divine consciousness. The thirtieth or lowest Aethyr would represent a level of divine consciousness that is so low that it has almost descended into matter. The first or highest Aethyr would represent the pure and undifferentiated mind of Deity.

Using this model, the ninety-one parts of the earth (column IV of figure 63) have their counterparts in the Aethyrs, and the divine names of the parts of the earth (e.g., Pascomb for Syria) also serve as the names of angelic governors, who, in groups of three, inhabit the thirty Aethyrs. The only exception to this is the thirtieth Aethyr, Tex, which has four governors.

There is a great temptation among modern practitioners to project this thirty-Aethyr model upon classic schema of the qabalistic Tree of Life with its ten sephiroth and twenty-two paths that also represent levels of consciousness. Some magicians go so far as to suggest the thirty Aethyrs can simply be divided by three into ten units and superimposed upon the ten sephiroth of the Tree. I wish I could believe things were as simple as that, but, as I wrote in the previous chapter, the classic

qabalistic and Enochian models oblige us to view the same universe from different angles.

Aleister Crowley gave perhaps the most comprehensible way of viewing the relationship of the thirty Aethyrs and the Tree of Life:

It is to be remarked that the last three æthyrs have ten angels attributed to them, and they therefore represent the ten Sephiroth. Yet these ten form but one, a Malkuth-pendant to the next three, and so on, each set being, as it were, absorbed in the higher. The last set consists, therefore, of the first three æthyrs with the remaining twenty-seven as their Malkuth.¹¹⁷

The angels Crowley is referring to are the governors of the Aethyrs. Because Tex contains four governors instead of three, Crowley considered the last three Aethyrs (Tex, Rii, and Bag) as a set containing ten governors who could be projected on a Tree of Life (see figure 86).

Figure 86: The first (lowest) set of governors (of the thirtieth, twenty-ninth, and twenty eighth Aethyrs) projected on a single Tree of Life

He then posited that this entire Tree of Life becomes the Malkuth (the tenth and lowest sephirah) of a higher Tree of Life made up of the nine governors of the next three Aethyrs (Zaa, Des, and Vti), which, in turn, become the Malkuth of the next three Aethyrs, and so on all the way to the top.

Figure 87: The last (highest) set of governors (of the first, second, and third Aethyrs) with the remaining twenty-seven Aethyrs and their governors encapsulated in a master Malkuth

You may or may not resonate with Crowley's view on this subject. Still, it is not unreasonable to compare the thirty Aethyrs to the sephiroth of the Tree of Life, especially when we understand both of them to be levels of personal initiation. This is precisely how Aleister Crowley viewed them. His systematic scrying of the Aethyrs as he walked across the North African Sahara in 1909 are chronicled in his visionary masterwork,

The Vision & the Voice, a text I believe should be studied by anyone interested in Enochian aethyric vision work.

While I certainly am not yet ready to compare my aethyric adventures with those of Crowley's, I have on multiple occasions engaged in a systematic exploration of the Aethyrs. I have, on a number of occasions, scryed each Aethyr, starting with number thirty, Tex, and worked my way to number one, Lil. Even my Monday night magick class is obliged to now and again undergo thirty weeks of scrying the Aethyrs.

Am I suggesting that we all actually achieve the sublime levels of consciousness represented by the higher Aethyrs? Of course I am not. But most of us receive provocative and highly personal visions, especially in the lower Aethyrs. That is because the lower Aethyrs represent levels of consciousness that we visit all the time in the natural course of daily life—in dreams, reveries, ecstasies, even deliriums. Even as I write these words, I am probably dipping into the lower Aethyrs as my memory and imagination conjure images that help me crystallize ideas I can put into words on the page. (I probably spent my entire senior year of high school staring into space and cruising in the lower Aethyrs!)

As the magician moves upwards through the Aethyrs, he or she progressively breaks into higher and higher levels of consciousness. If we are prepared for this new territory, our visions are characterized by a certain spontaneity and lucidity. However, when we begin to get out of our depth—when we haven't yet achieved the level of consciousness necessary to take the next step—our visions become murky and forced, as if we were watching it through a glass darkly. When this happens, the vision is usually characterized by a clear message announcing in no uncertain terms that we have not completely penetrated the Aethyr.

But that is not a bad thing. In fact, it is exactly what we want to happen, because we then know where we are on the initiatory ladder. Moreover, we have a chance of knowing what it is we need to do (or, more accurately, we will know who we need to become) to take the next step in our initiatory career. Allow me to illustrate with a hypothetical example.

Let's say you've resolved to systematically scry all thirty Aethyrs, one per night, from thirty to one, over a one-month period. Each night after your scrying session, you dutifully record in your journal the details of your vision. Everything is going along nicely until you

attempt to penetrate in vision the fifteenth Aethyr, Oxo. You recite the nineteenth call in the proper manner and call for the three governors of Oxo (Tahando, Nociabi, and Tastoxo; see figure 63 column IV).

As the vision begins, three angels appear in the mirror, crystal, or your mind's eye, and march in a circle around you so that you cannot move in any direction. They will not respond to your questions or vouchsafe a proper vision. When something like this happens, you know that your present level of consciousness (your personal initiatory grade) is not refined enough to penetrate, let alone appreciate, the next Aethyr. It's as though you are a radio receiver not yet equipped to pull in higher broadcast frequencies. In order for you to do so, you will need to upgrade your equipment by raising your level of consciousness.

You will need to undergo an initiatory experience that will turn you into a more refined visionary traveler. And, as in all initiations, there is an obstacle that needs to be overcome. This obstacle can be anything from a psychological issue to a personal demon or character flaw. In order to conquer it, you might need just a tiny illumination concerning life, or a magical shift of focus, or to successfully achieve a more profound meditative state or trance.

You won't need to look far to discover what this obstacle is. It should be right there in your magical diary, in the record of the last Aethyr you could successfully penetrate. Somewhere in that vision there is a message telling you what it is you must do in order to take the next step in your spiritual journey through the heavens. It is sublimely simple and personal. It makes Enochian aethyric magick, in my opinion, a far more effective and user-friendly method of magical self-transformation than guided meditations or qabalistic pathworkings.

The method I use is straightforward. After performing a banishing and the Ceremony of Preparation, I simply recite the nineteenth call using the name of the particular Aethyr I wish to visit. Then I repeat the names of the three governors of the Aethyr until the vision begins.

The vision is usually characterized by the appearance of one or more of the governors, who stand ready to answer my inquiries and demonstrate the nature of the Aethyr. As in elemental workings, I try not to tire myself, and afterward make a detailed record of my experiences in my diary.

A complete list of the governors is found in chapter eighteen, in column IV of the table designated figure 63, and in appendix II, figure 90

Epilogue

In the Middle of the Night

Isn't it enough to see that a garden is beautiful without having to believe that there are fairies at the bottom of it too?

—DOUGLAS ADAMS

It's 3:15 a.m. For the last few days, I have arranged to sleep through the afternoon heat of an unseasonably hot late summer so that I may write undisturbed in the cool peace and quiet of the wee hours. This book of magick has taken me much longer to complete than I anticipated. Did I say "complete"? It's a well-worn cliché that a writer never finishes a work, but merely abandons it. I've finally come to the place where I'm ready to abandon this book. For as slim as it is, it might be hard for you to believe that it has dominated my life for nearly three years. My publisher expected it in their hands over a year ago, and for their patience I am profoundly grateful.

This is far from the end of the material, however. I've worked hard and long on the appendices, which for the practicing Enochian magician will likely become the most worn and dog-eared section of the book.

I must confess that my attitudes concerning Enochian magick have changed many times in the thirty years it has been part of my life. My respect for the magical art form, however, has never diminished and has continued to grow unabated. I feel like the musician who is moved to tears by listening to a great symphony, but who can play only a few notes himself and those only moderately well.

Perhaps you will never choose to make Enochian magick a part of your spiritual repertoire. Perhaps you will. In either case, as I abandon this book, it is my sincerest hope that I have been able to help you in some small measure attune your magical ear to the music of the spheres.

Adieu.

Appendix I

The Ceremony of Preparation

The magician purifies and banishes the temple as he or she has skill to do so. Below is a standard version of the Lesser Banishing Ritual, a ceremony used by many modern magicians.

Touching the forehead, say, *Ateh* (“Unto Thee”).

Touching the breast, say, *Malkuth* (“the Kingdom”).

Touching the right shoulder, say, *ve-Geburah* (“and the Power”).

Touching the left shoulder, say, *ve-Gedulah* (“and the Glory”).

Clasping the hand upon the breast, say, *le-OLAHM, AMEN* (“to the Ages, Amen”).

Turning to the east, make the banishing pentagram (that of Earth) with the wand. Say, *IHVH* (“Ye-ho-wau”).

Figure 88: Banishing pentagram (Earth)

Turning to the south, again draw the pentagram but say, *ADNI* (“Adonai”).

Turning to the west, again draw the pentagram but say *AHIH* (“Eheieh”).

Turning to the north, again draw the pentagram, but say *AGLA* (“Agla”).

Extend the arms in the form of a cross say:

*Before me Raphael,
Behind me Gabriel,
On my right hand, Michael,
On my left hand, Auriel,
For about me flames the pentagram
And in the column stands the six-rayed star.*

Touching the forehead, say, *Ateh* (“Unto Thee”).

Touching the breast, say, *Malkuth* (“the Kingdom”).

Touching the right shoulder, say, *ve-Geburah* (“and the Power”).

Touching the left shoulder, say, *ve-Gedulah* (“and the Glory”).

Clasping the hand upon the breast, say, *le-OLAHM, AMEN* (“to the Ages, Amen”).

The Ceremony of Preparation

The Temple

The Holy Table is set in the middle of the room upon a carpet of red silk. Four small versions of the *Sigillum Dei Aemeth* rest under the table

legs. In the center of the Holy Table rests the Sigillum Dei Aemeth surrounded by the seven Ensigns of Creation. All are covered and draped by a red silk cloth with gold tassels at the corners. The black mirror or scrying crystal is placed upon the covered Sigillum. The Ring and Lamén are at hand upon the covered table.

A chair is positioned before the table so that the face of the scryer may be reflected in the mirror. The chair must also rest upon the red silk carpet. When operating at night or in a dimly lit room, one or two candles can also be placed upon the covered Holy Table.

The Ceremony

After banishing, the magician sits down and prays:

Teach me (O creator of all things) to have correct knowledge and understanding, for your wisdom is all that I desire. Speak your word in my ear (O creator of all things) and set your wisdom in my heart. Amen.

The magician picks up the Ring and prays:

Behold the Ring. Lo, this it is. This is it, wherewith all miracles, and divine works and wonders were wrought by Solomon: this is it, which the Archangel Michael has revealed to me. This is it, which Philosophy dreameth of. This is it, which the Angels scarce know. This is it, and blessed be his name: yea, his Name be blessed forever. Without this I shall do nothing. Blessed be his name, that encompasses all things: Wonders are in him, and his name is WONDERFUL: PELE. His Name works wonders from generation to generation. Amen.

The magician picks up the Lamén and prays:

Behold the Lamén. As the Holy Table conciliates Heaven and Earth, let this Lamén which I place over my heart conciliate me to the Holy Table. Amen.

The magician recites seven complete rounds of the chant of the Holy Table's Perimeter Letters. If possible, the magician traces with the wand the covered letters he or she is chanting:

Pa Med Fam Med Drux Fam Fam Ur Ged Graph Drux Med
Graph Graph Med Med Or Med Gal Ged Ged Drux.

Pa Drux Un Tal Fam Don Ur Graph Don Or Gisg Gon Med
Un Ged Med Graph Van Ur Don Don Un.

Pa Drux Ur Ur Don Ur Drux Un Med Graph Graph Med Med
Graph Ceph Ged Ged Ur Mals Mals Fam Un.

Pa Gon Med Un Graph Fam Mals Tal Ur Pa Pa Drux Un Un
Van Un Med Un Gon Drux Drux Ur.

The magician chants seven rounds of the twelve letters of the Holy
Table's central square:

Med Gon Gisg, Don Ur Van, Ur Don Ur, Med Med Graph.
Med Don Ur Med, Gon Ur Don Med, Gisg Van Ur Graph.

The magician chants one round of the names of the forty-nine
angels upon the Sigillum Dei Aemeth:

Galas Gethog Thaoth Horlwn Innon Aaoth Galethog

Zaphkiel Zedekiel Cumael Raphael Haniel Michael Gabriel

E(l) Me Ese Iana Akele Azdobon Stimcul

I Ih Ilr Dmal Heeo Beigia Stimcul

S Ab Ath Izad Ekiei Madimi Esemeli

E An Ave Liba Rocle Hagonel Ilemes

Sabathiel Zadkiel Madimiel Semiel Nogahel Corabiel
Lavanael

Finally, the magician quietly whispers the Holy Names of the
Round Table of Nalvage. First the angel names of the corners:

luah lang sach urch

Then the god names of the four continents:

Iad moz zir—iad bab zna—iad sor gru—iad ser osf.

The magician then proceeds to the business at hand—calling an angel of an Elemental Tablet or scrying an Aethyr.

When the magician's work is done, he or she dismisses the spirit with thanks and prays:

Thy Name be mighty, O God, which canst open the veil whereby
Thy All-Powerful Will may be opened unto men. Power, Glory,
and Honor be unto Thee, For Thou art the same God of all
things, and art life eternal. Amen.

Appendix II

The Enochian Calls (Keys)

The genuineness of these Keys, altogether apart from any critical observation, is guaranteed by the fact that anyone with the smallest capacity for Magick finds that they work.

—ALEISTER CROWLEY¹¹⁸

Invocations?

Enochian magick as developed by the Golden Dawn and widely practiced today uses the first eighteen calls to activate the Elemental Tablets and contact the resident angels. However, in the hectic last days of the Enochian period, Dee was instructed in several places to write his own invocations. It remains unclear to me whether or not the angels were suggesting that additional “homemade” invocations were to be created as appendages to the calls. What *is* clear to me, after more than a quarter century of practical application, is the fact that the calls by themselves (with only the briefest of additional verbiage to awaken target angels and their hierarchy) serve admirably as the only invocations a magician needs.

Naturally, if it appeals to your magical sense of art to compose additional invocations to utter before and/or after the call, I encourage you to do so.

Pronunciation

You will probably be very surprised at how little time I spend on this subject. In fact, I am very tempted to simply paraphrase Rabbi Ben Clifford's heretical comment about the Hebrew language and tell you bluntly, "There is no such thing as correct Enochian pronunciation!" On a few occasions, the communicating angels gave Dee and Kelley suggestions as to how certain words are pronounced. But, by and large, we modern magicians are left to our own devices as to how to push these awkwardly constructed words out of our mouths.

Dee notated the words of the calls in columns. The left column contained the Enochian word in all uppercase letters—*PIRIPSOL*, for example. The right column contained the word in upper- and lowercase letters, which split the word into syllables and characterized certain letters as if to suggest pronunciation: *Pe ríp sol*. Sometimes the translation of the word appeared in a center column: "of the heavens."

The Golden Dawn and Crowley use a pronunciation method that they felt rolled more fluidly off the tongue. This method obliged the magician to insert a natural Hebrew vowel sound after every Enochian consonant. For example, the word *butmon* (meaning "mouth") would be pronounced, "but-a-mon-u." This is wonderful for words such as this one, giving it an almost Italian lilt. But things get a little crazy when it comes to the letter *z*, which the English currently pronounce as "zed" and in Dee and Kelley's day was pronounced "zod."

The angels did on occasion instruct Dee when and when not to use "zod," but its universal application to a language that uses the letter *z* very often becomes, in my opinion, laughably cumbersome. Using the Golden Dawn pronunciation method, the simple, one-syllable Enochian word *zims* ("clothing") becomes the unwieldy, four-syllable "zod-I-me-zod." You tell me which rolls off the tongue better.

The most obvious alternative to the GD pronunciation is simply sounding out the words as they are written (which appears to be what the angels generally wanted Dee and Kelley to do). For the last fifteen years, this is what I have done, and it is what I recommend to students who are learning Enochian magick. Before that, however, I used the GD/Crowley pronunciation method and was perfectly happy with it. In

fact, I still use the Italian sounding method when I recite the first and second calls because I have them memorized and they hold a special place in my heart.

Both methods work just fine. In fact, any sincere effort on the part of the magician to sound out the words as they appear in the call works. Some of the best group scrying sessions I have experienced have followed the most horribly butchered recitations of the calls. It's as though the Enochian angels (like the French) appreciate any attempt on your part to speak their language. I often use the example of a mouse. If a mouse hopped up on your shoe and squeaked, you'd just shoo it away. But if it hopped up on your shoe and started to talk to you in your native tongue, you'd be impressed. You wouldn't even care if it spoke with a thick accent!

I have tried to present the calls below as close as possible to the original spelling, breaks, letter characterization, and punctuation. The English translation that follows each call is generally punctuated in the same way as the Enochian.

The Calls, the Tablet of Union, and the Elemental Tablets

According to the Golden Dawn, Crowley, and many modern Enochian magick practitioners, the first eighteen calls activate the Tablet of Union, the Elemental Tablets, and the hierarchy of angels resident in the tablets in a very specific (and demonstrably logical) manner. Although the Dee and Kelley source material does not support this arrangement, it has become the foundation of a remarkably workable system. This table is the key to their use.

CALL	ELEMENTAL TABLET	CALL USED FOR . . .
1	TABLET OF UNION	The first call is to be used first in all invocations of angels of the Tablet of Union. According to the Golden Dawn, it is never used for actions dealing with angels of the Elemental Tablets.
2	TABLET OF UNION	The second call is to be used second (after call 1) to invoke Angel EHNB of Tablet of Union. According to the Golden Dawn, it is never used with Elemental Tablets.
3	AIR	The third call can be used in one of three ways: 1. Used third (after calls 1 and 2) to invoke angels of EXARP of the Tablet of Union. 2. Used first for operations involving the Elemental Tablet of Air. 3. Used by itself for invocations of the Seniors from the Elemental Tablet of Air or for angels from the Air Subangle of the Elemental Tablet of Air.
4	WATER	The fourth call can be used in one of three ways: 1. Used third (after calls 1 and 2) to invoke angels of HCOMA of Tablet of Union. 2. Used first for operations involving the Elemental Tablet of Water. 3. Used by itself for invocations of the Seniors from the Elemental Tablet of Water or for angels from the Water subangle of the Elemental Tablet of Water.
5	EARTH	The fifth call can be used in one of three ways: 1. Used third (after calls 1 and 2) to invoke angels of NANTA of Tablet of Union. 2. Used first for operations involving the Elemental Tablet of Earth. 3. Used by itself for invocations of the Seniors from the Elemental Tablet of Earth or for angels from the Earth subangle of the Elemental Tablet of Earth.

Figure 89: Key to the calls

<i>CALL</i>	<i>ELEMENTAL TABLET</i>	<i>CALL USED FOR . . .</i>
6	FIRE	The sixth call can be used in one of three ways: 1. Used third (after calls 1 and 2) to invoke angels of BITOM of Tablet of Union. 2. Used first for operations involving the Elemental Tablet of Fire. 3. Used by itself for invocations of the Seniors from the Elemental Tablet of Fire or for angels from the Fire subangle of the Elemental Tablet of Fire.
7	AIR	The seventh call is used after call 3 to call forth or visit the angels of the Water subangle of the Elemental Tablet of Air.
8	AIR	The eight call is used after call 3 to call forth or visit the angels of the Earth subangle of the Elemental Tablet of Air.
9	AIR	The ninth call is used after call 3 to call forth or visit the angels of the Fire subangle of the Elemental Tablet of Air.
10	WATER	The tenth call is used after call 4 to call forth or visit the angels of the Air subangle of the Elemental Tablet of Water.
11	WATER	The eleventh call is used after call 4 to call forth or visit the angels of the Earth subangle of the Elemental Tablet of Water.
12	WATER	The twelfth call is used after call 4 to call forth or visit the angels of the Fire subangle of the Elemental Tablet of Water.
13	EARTH	The thirteenth call is used after call 5 to call forth or visit the angels of the Air subangle of the Elemental Tablet of Earth.
14	EARTH	The fourteenth call is used after call 5 to call forth or visit the angels of the Water subangle of the Elemental Tablet of Earth.

<i>CALL</i>	<i>ELEMENTAL TABLET</i>	<i>CALL USED FOR . . .</i>
15	EARTH	The fifteenth call is used after call 5 to call forth or visit the angels of the Fire subangle of the Elemental Tablet of Earth.

17	FIRE	The seventeenth call is used after call 6 to call forth or visit the angels of the Water subangle of the Elemental Tablet of Fire.
18	FIRE	The eighteenth call is used after call 6 to call forth or visit the angels of the Earth subangle of the Elemental Tablet of Fire.

I reign over you, sayeth the God of Justice, in power exalted above the firmaments of wrath: in whose hands the Sun is as a sword and the Moon as a through-thrusting fire which measureth your garments in the midst of my vestures, and trussed you together as the palms of my hands: Whose seats I garnished with the fire of gathering and (which) beautified your garments with admiration: to whom I made a law to govern the holy ones and delivered you a rod with the ark of knowledge. Moreover you lifted up your voices and swear obedience and faith to him that liveth and triumpheth whose beginning is not, nor end can not be, which shineth as a flame in the midst of your palace and reignneth amongst you as the balance of righteousness and truth. Move, therefore, and show yourselves: open the Mysteries of your Creation: Be friendly unto me: for I am the servant of the same your God, the true worshipper of the Highest.

to be measured, be Thou a window of comfort unto me. Move and
show your selves, open the Mysteries of your Creation, be friendly unto

me: for I am the servant of the same your God, the true worshipper of the Highest.

The Call of the Thirty Aethyrs

The nineteenth call is used to open each of the thirty Aethyrs. Only the name of the Aethyr itself (the third word in the first sentence) is changed.

Each Aethyr (with the exception of the thirtieth) is inhabited by three governors, who could be considered personifications of the nature of the Aethyr. I believe that after you recite the call and before you settle down to scry, it is important to pronounce, vibrate, or otherwise incorporate the names of the governors in a brief invocation.

The names of the Aethyrs and their governors are listed in figure 90. If you wish to incorporate the sigils of the governors (the symmetrical characters) for visualizations or to create talismans, the sigils can be found in chapter eighteen, in column VI of figure 63.

O you heavens which dwell in the First Ayre are mighty in the parts of the Earth, and execute the Judgment of the Highest, to you it is said, Behold the face of your God, the beginning of comfort, whose eyes are the brightness of the heavens, which provided you for the government of the Earth and her unspeakable variety, furnishing you with a power of understanding to dispose all things according to the providence of Him that sitteth on the Holy Throne, and rose up in the beginning saying: the Earth let her be governed by her parts and let there be division in her, that the glory of her may be always drunken and vexed in it self. Her course, let it run with the heavens, and as a handmaid let her serve them. One season let it confound an other, and let there be no creature upon or within her the same, All her members let them differ in their qualities, and let there be no one creature equal with an other: the reasonable Creatures of the Earth let them vex and weed out one an other, and the dwelling places let them forget their names: the work of man, and his pomp, let them be defaced: his buildings let them become caves for the beasts of the field. Confound her understanding with darkness. For why? It repenteth me I made Man. One while let her be known and an other while a stranger: because she is the bed of a Harlot, and the dwelling place of Him that is Fallen. O you heavens arise: the lower heavens underneath you, let them serve you! Govern those that govern: cast down such as fall! Bring forth with those that increase, and destroy the rotten! No place let it remain in one number: add and diminish until the stars be numbered! Arise, Move, and Appear before the Covenant of his mouth, which he hath sworn unto us in his Justice. Open the Mysteries of your Creation: and make us partakers of Undeified Knowledge.

Figure 90: Aethyr/governor table

Appendix III

The Geographical Location of the Ninety-one Parts of the Earth Named by Man, as Detailed in John Dee's *Liber Scientiae Auxilii Et Victoriae Terrestris*¹¹⁹

by Robin E. Cousins

Liber Scientiae Auxilii et Victoriae Terrestris, which forms part of Sloane Manuscript 3191, provides the details necessary to operate a system of magic, by which the magician can discover

‘how to compare . . . [the] divisions of provinces according to the Divisions of the Stars, with the Ministry of the Ruling Intelligences, and Blessings of the Tribes of Israel, the Lots of the Apostles, and Typical Seals of the Sacred Scripture, [so that he] shall be able to obtain great and prophetic oracles, concerning every region, of things to come.’¹²⁰

On Wednesday 23 May 1584, while in Krakow, John Dee and Edward Kelley received from the Spirit Nalvage the names of ninety one regions and provinces of the physical world, as defined by man. At this time America was no longer considered to be a group of islands; but Australia had yet to be discovered and the search for the North West Passage had just commenced. The names of the ninety-one parts relate to the Ptolemaic ancient world of about AD 150 with some additions. The Spirit Nalvage explains:

‘Notwithstanding the Angel of the Lord appeared unto Ptolemy, and opened unto him the parts of the Earth: but

some he was commanded to secret: and those are Northward under your Pole. But unto yon, the very true names of the World in her Creation are delivered.'¹²¹

The list is not altogether satisfactory. Dee, who was well-versed in geography, had not heard of some of the places and even Nalvage said, 'Here are 15, which were never known in these times . . . The rest are'. Many of the strange locations are indeed in the Polar Regions, which were uncharted at the time. In fact, a considerable Arctic land mass was believed to exist and was featured on sixteenth century maps. Nevertheless, locations for this region are desirable and there are many areas in the extreme north, whether land or sea, which can be covered by the descriptions. The belief of a south polar continent (Tolpam, Part 58) was not inaccurate, a location which can usefully extend to Australasia which was undiscovered at the time.

Two points emerge at the end of the communication relating to known lands not included in the list. Firstly, when Dee asks of 'Polonia, Moschovia, Dania, Hibernia (Ireland), Islandia, and so of many others', Nalvage replies: 'Polonia and Moscovia, are of Sarmatia (Russia); Denmark, Ireland, Frizeland, Iseland, are of Britain: And so it is of the rest.'¹²² Does this imply that Brytania (Part 61) can be used to gain access to lands not included within the ninety-one parts? Secondly, when Dee presses Nalvage as to which part governs 'Atlantis and the annexed places, under the King of Spain called the West Indies', Nalvage replies: 'When these 30 appear, they can each tell you what they own. Prepare for tomorrows Action'. The communication is, therefore, incomplete. Unfortunately, 'tomorrows Action' never occurred, because Kelley believed Nalvage to have taken the descriptions from books, including Agrippa's *Occult Philosophy*, and refused to communicate further. 'E. K. remained of his wilful intent', noted a frustrated Dee. However, Onigap (Part 34) may refer to these lands and there is the possibly implied use of Brytania, as described above. Note that Dee held that the term 'West Indies' was very misleading and preferred to use 'Atlantis' instead of 'America', as a name for the new lands. Nevertheless, the additional thirty parts wait to be realised, which would bring the total of the parts of the Earth to 121. It is interesting to speculate, whether they would affect the design of the Great Table.

Dee bought Gerhard Mercator's *Universal Chart of the World* and the geographical work of Pomponius Mela to help him with his locations. He does not record his success. Ultimately, the advice of Nalvage in relation to Chaldei (Part 42) and Chaldea (Part 72) is the only way to establish the locations of the obscure and ambiguously described parts of the world: 'You shall finde the difference of it, in practice'.

The Ninety-One Parts of the World

Many of the locations are well-known. However, for the obscurer areas Dee's *Spiritual Diaries* (*Cotton Appendix XLVI, Parts 1 & 2*, published as *A True and Faithful Relation of What passed for many Yeers Between Dr. John Dee and Some Spirits*, edited by Meric Casaubon, 1659) are often the only guide. In these instances, supportive quotations are given. Other parts, especially those located by Kelley or Nalvage in the Far Orient or in the Arctic regions, are difficult to place on the world map today, as in Dee's time these regions were largely unexplored and uncharted.

1 AEGYPTUS: Egypt.

2 SYRIA: Southern Syria.

3 MESOPOTAMIA: Land between the Tigris and Euphrates rivers in Northern Iraq and North-East Syria.

4 CAPPADOCIA: Extensive province of Central Turkey, stretching from the Black Sea in the north to Cilicia (Part 14) in the south. The original territory, Cappadocia Proper, occupied the southern areas.

5 TUSCIA: Tuscany or Etruria, a province in Central Italy including Florence.

6 PARVA ASIA: Asia Minor, Anatolia or Asiatic Turkey.

7 HYRCANIA: Area south-east of the Caspian Sea in Iran.

8 THRACIA: Thrace includes Eastern Greece, Turkey in Europe, and Southern Bulgaria.

9 GOSMAM: According to Kelley, 'Here appear great Hills, and veins of the Gold Mines appear: the men seem to have baskets of leather. This is one of the places under the Pole Artick.'

10 **THEBAIDI**: Thebes (Egypt) and surrounding area.

11 **PARSADAL**: Kelly, 'Here the sun shineth fair.' Most probably Pasargadae or Parsagarda ('the habitation of the Persians'), the ancient capital of Parsa/Persis/Persia Proper or the modern Iranian province of Fars (Part 74). Parsagarda is located about 60 miles northeast of Shiraz.

12 **INDIA**: Includes Indian provinces along the Indus River, roughly present-day Pakistan and India West of the Ganges (India Intra Ganges).

13 **BACTRIANE**: Bactriana covers Northern Afghanistan and the south-east of the Turkmenistan, the River Amu Darya (Oxus) forming the northern boundary. For lands to the north of the river, see Sogdiana (Part 26).

14 **CILICIA**: Coastal country bordering the Mediterranean in South-East Turkey.

15 **OXIANA**: Alexandria Oxiana, a town and its surrounding area on the Oxus River (Amu Darya) on the borders of Northern Afghanistan and Uzbekistan.

16 **NUMIDIA**: Eastern Algerian coastal district between Africa (Part 86) and Mauretania (Part 91).

17 **CYPRUS**: Cyprus.

18 **PARTHIA**: North-East Iran, to the south of Hyrcania (Part 7). The region has a common border with Turkmenistan.

19 **GETULIA**: The Western Sahara, south of Morocco, including Southern Algeria, Mali and the modern state of Mauritania.

20 **ARABIA**: Saudi Arabia.

21 **PHALAGON**: Dee: 'I have never heard of it.'

Kelley: 'It is toward the North, where the veins of Gold . . . appear . . . The men have things on their shoulders of beasts skins.'

Dee: 'Groynland as I think' (i.e. Greenland).

22 **MANTIANA**: This is Matiana or the Mattieni by Lacus Matianus, now Lake Urmia in North-Western Iran. The population is mainly Furdish. Lake Van, approximately 200 miles west in Eastern Turkey, was once called Lake Mantiana.

23 **SOXIA**: Sacae/Sachia/Sakas approximates with Xinjiang Uygar or Sinkiang Uighur region, North-West China. It is also known as Chinese Turkistan.

Kelley: 'People here appear of reddish colour.'

24 **GALLIA**: A 'greater' France with the Rhine forming the northern and eastern boundaries, thereby including Belgium, Luxembourg, and the Southern Netherlands.

25 **ILLYRIA**: At its greatest extent, Illyria included Central and Eastern Austria, Western Hungary or Transdanubia, the former Yugoslavia excluding Macedonia, Northern Bulgaria and Romania.

26 **SOGDIANA**: District between the rivers Amu Darya (Oxus) and Syr Darya (Jaxartes) including Uzbekistan, with the cities of Bokhara and Samarkand, and Western Tajikistan. Afghanistan is to the south, for which see Bactriana (Part 13).

27 **LYDIA**: Coastal region in Western Turkey.

28 **CASPIS**: Area to the south-west of the Caspian Sea in Iran.

29 **GERMANIA**: Includes modern Germany, Poland, the Czech Republic, Slovakia, and extends to the Italian border in the south, incorporating Switzerland and the Tyrol in Western Austria. In the north, Germania can include Denmark, Norway and Sweden, although Dee was told that Brytania (Part 61) could be used for Denmark, which at that time governed Norway as well.

30 **TRENAM**: Kelley: 'Here appear Monkies, great flocks. The people have leather Coats, and no beards, thick leather, and Garthers . . . '

Nalvage: 'These people are not known to you?'

Dee: 'Are they not in Africa?'

Nalvage: 'They be.'

Probably Teniam, a region on Jodocus Hondius's *World Map* (1608) straddling the Ivory Coast/Upper Volta/Ghana borderlands.

31 **BITHYNIA**: Black Sea coastal region in the north of Turkey, west of Paphlagonia (Part 40), including Istanbul (Asian side).

32 **GRAECIA**: Nalvage: 'A great Citie, and the Sea hard by it.'

Dee: 'Is not that great Citie Constantinople?'

Nalvage: 'It is . . .'

Graecia is thus Istanbul, not Greece; for which use Achaia (Part 37).

33 **LICIA**: Lycia is a country on the south coast of Turkey or Anatolia.

34 **ONIGAP**: Kelley: 'Here appear handsome men, in gathered tucked garments, and their shoes come up to the middle of their legs, of diverse coloured leather.'

Nalvage: 'These be beyond Hispaniola.'

Kelley: 'It is a low Countrey. Here appear great piles of Stones like St Andrews Crosses . . . There are on this side of it (a great way) a great number of dead Carkases . . .'

Nalvage: 'It is beyond Giapan.' (That is, beyond Japan across the Pacific to the Americas. Note that Onigap is an anagram of Giapon.)

Dee: 'Then it is that land, which I use to call Atlantis.'

Nalvage: 'They stretch more near the west.'

This can only be Mexico, particularly the Yucatan. Beyond Hispaniola (Haiti and Domenica) and west of 'Atlantis' or America is Central Mexico and the Yucatan, which is a low-lying peninsula. The people wore bright colours; the temples could resemble St Andrew's crosses; and, many people were slaughtered by the Spanish Conquistadores.

35 **INDIA MAJOR**: India Extra Gangem or India east of the Ganges, which includes all of South-East Asia.

36 **ORCHENY**: Nalvage: 'A great many little Isles.'

Dee: 'Do you mean the Isles of Orkney?'

Nalvage: 'No.'

Dee: 'They seem to be the Isles of Malacha.'

Dee is mistakenly thinking of the islands around Malaya (Malacha or Malacca) or even the Moluccas. The Orcheni were a people south of Chaldea (Part 72), living on or by islands in the marshlands of the lower Tigris and Euphrates.

37 **ACHAIA**: Southern Greece, including Athens and the Peloponnisos.

38 **ARMENIA**: Extensive region which, most comprehensively, stretches

from the Euphrates in eastern Turkey to the Caspian Sea, thereby including Armenia and Azerbaijan.

39 CILICIA (NEMROD): Nalvage: ‘You never knew this Cilicia. This is Cilicia where the Children of Nemrod dwell. It is up in the Mountains beyond Cathay.’ Probably Calatia, a region in this location featured on Emery Molyneux’s terrestrial globe of 1592. It equates with the extreme north-eastern province of Russia by the Bering Straits, the Magadan Oblast. Cilicia in Turkey is Part 14.

40 PAPHLAGONIA: Black Sea coastal country in the north of Turkey.

41 PHASIANA: Mainly Kurdish region in Eastern Turkey, north of Lake Van, not to be confused with Phazania/Fezzan in Libya, for which see Garamantica (Part 45).

42 CHALDEI: The people of Chaldea (Part 72).

43 ITERGI: Nalvage: ‘. . . the people are yellow, tawney . . . They are to the south of the last Cilicians.’ This is possibly Mongolia, Manchuria (North-East China), and Korea. The name appears in this region on a terrestrial globe, dated 1492, of German geographer Martin Behaim (c.1459–1507).

44 MACEDONIA: Northern Greece and the Former Yugoslav Republic of Macedonia.

45 GARAMANTICA: Garamantes, a large area in Inner Africa, covering the Eastern Sahara, including the south of Libya (Fezzan), extreme South-Eastern Algeria, Niger and Chad.

46 SAUROMATICA: Sarmatia or European Russia.

47 AETHIOPIA: Includes Ethiopia south of Egypt and also the entire unknown African continent south of the Equator, which was known as Ethiopia Interior in Dee’s time. Unexplored parts of Africa north of the Equator were known as Libya Interior.

48 FIACIM: Kelley: ‘Now he sheweth by the North Pole and the great Mountain.’

This is the North Pole. A great mountain was believed to exist at the Pole.

49 COLCHICA: Colchis roughly equates with the modern Republic of Georgia, located to the east of the Black Sea.

50 **CIRENIACA**: Cyrenaica, a Mediterranean coastal region of Eastern Libya.

51 **NASAMONIA**: III-defined north-eastern Libyan coastal district by the Gulf of Sirte in the west of Cireniaca (Part 50).

52 **CARTHAGO**: Carthage, Tunisia.

53 **COXLANT**: Nalvage: 'It appeareth very Eastward.'

Kelley: 'It is on high ground. There come four Rivers out of it, one East, another West, another North, and another South . . . Is this the Paradise that Adam was banished out of?'

Nalvage: 'The very same.'

A discussion follows which does not help to locate Coxlant. The search for the Earthly Paradise, like the Eldorado, was the dream of early explorers. The four rivers are the Pison (The Persian Gulf?), Gihon (The Nile?), Hiddekel (Tigris), and Euphrates. The favourite location of Paradise was considered to be a little north of the confluence of the Tigris and Euphrates. However, other locations favoured sites further north in Mesopotamia and Armenia. Tibet could be another location. It is very easterly; on high ground; and the four rivers are the Mekong (east), the Indus (west), the Yangtze (north), and the Brahmaputra (south). Ultimately, however, the location of Coxlant or the Earthly Paradise must rest with the spirituality of the individual.

54 **IDUMEA**: Also called Edom, this is Southern Israel and Jordan.

55 **PARSTAVIA**: Actually Bastarnia, approximately Bessarabia or Moldavia to the east of Romania.

56 **CELTICA**: Nalvage: 'It is that which you call Flandria, the Low Country.'

This is North-West France and Belgium, not Central Gaul which is usually known as Celtica.

57 **VINSAN**: Kelley: 'Here appear men with tallons like Lions. They be very devils. There are five isles of them.'

Suggest the ancient kingdom of Wu-Sun, south of Lake Balkhash in Kazakhstan. The 'isles' could be communities near the lake.

58 **TOLPAM**: Kelley: 'Under the South Pole.' This is Antarctica and Australasia.

- 59 **CARCEDONIA:** Carchedonia or modern Tunisia.
- 60 **ITALIA:** Italy, including the Istrian Peninsula in Croatia.
- 61 **BRYTANIA:** The British Isles, Scandinavia, and possibly places not included in the 91 parts.
- 62 **PHENICES:** Phoenicia, approximately the Lebanon and Northern Israel.
- 63 **COMAGINEN:** Commagene, a land-locked district in Southern Turkey, bounded on the east by the Euphrates and on the south by Syria. Cilicia (Part 14) is to the west.
- 64 **APULIA:** Province in south-east Italy between the Apennines and the Adriatic, bounded on the south by Calabria or the 'heel' of Italy.
- 65 **MARMARICA:** North African coastal region straddling the Egyptian and Libyan border. The Nile forms the eastern boundary.
- 66 **CONCAVA SYRIA:** Hollow Syria, usually known as Coele Syria, now forms Northern Syria.
- 67 **GEBAL:** Later Byblos, now Jubayl, about twenty miles north of Beirut, Lebanon.
- 68 **ELAM:** Also known as Susiana, it is approximately the same as the modern Iranian province of Khuzestan at the north of the Persian Gulf, bordering Iraq and including Abadan.
- 69 **IDUNIA:** Nalvage: 'It is beyond Greenland.'
- 70 **MEDIA:** North-Western Iran, south of Caspis (Part 28) and Hyrcania (Part 7). Includes Teheran.
- 71 **ARIANA:** Eastern Iran, Pakistan west of the Indus, Southern Afghanistan.
- 72 **CHALDEA:** A tract of country in South Iraq running along the Euphrates from the Persian Gulf to Babylon (about 50 miles south of Bagdad). The Shamiya Desert forms the western boundary.
- 73 **SERICIPOPULI:** A people in Eastern Asia. Serica or Seres equates with China and the Far East.
- 74 **PERSIA:** Persis or Parsa, this is approximately the modern Iranian province of Fars. Located in South-West Iran and bounded on the west by

the Persian Gulf, the province was the kernel of ancient Persia and includes the ancient cities of Parsagarda (Part 11) and Persepolis.

75 GONGATHA: Kelley: 'Towards the South Pole.'

This is Gongala, an area to the south of Libya Interior by the Equator. In the sixteenth century Kelley's description is apt, but today the region equates with South Sudan.

76 GORSIM: Kelley: 'Beares and Lions here.'

Most probably Chorazin/Korazim/Gorazim, an ancient site to the north of Lake Tiberias (Sea of Galilee), Israel, with the ruins of a black basalt synagogue. The place was condemned by Jesus and legend claims the Antichrist will be born there. Note also Chorasmia/Khorezm/Khiva, south-east of the Caspian Sea in Turkmenistan.

77 HISPANIA: Spain and Portugal.

78 PAMPHILIA: Southern Turkish coastal land, between Lycia (Part 33) and Cilicia (Part 14), forming a narrow strip of land around the Bay of Antalya.

79 OACIDI: This is Oasitae ('. . . of the Oasis'), the oasis area west of the Nile, which includes the great oasis of the Oracle of Amon.

80 BABYLON or BABYLONIA: Region in Southern Iraq, extending north from the Persian Gulf between the Lower Tigris and the northeastern Arabian desert. Babylon, the capital, is about fifty miles south of Bagdad.

81 MEDIAN: Kelley: 'It is much Northward.'

Note, however, Midian—the land of the Midianites by Sinai; or, even the people of Media (Part 70).

82 IDUMIAN: Kelley: 'They are two Isles environed with an arm of the Scythian Sea, which goeth in at Maspi.'

Most probably the region to the north-east of the Aral Sea in the Kazakhstan. Suggest 'Maspi' is a corruption of the Aspisii Montes/Mons Aspisii, which shortened to M. Aspisii, distorts to Maspi. The mountains were supposedly located in this region, but in the sixteenth century much of this land and especially the far north of Siberia or Scythia was Terrae Incognita. Mercator's map of North-East Asia, which is dated 1569, shows a hypothetical arm of the Scythian Sea (Laptev and East Siberian

seas) almost reaching to the north-east of the Aral Sea with the M. Aspisii nearby. The Aspisii Scythia were the people dwelling to the west of the mountains and to the north of the River Jaxartes (Syr Darya). Note also, however, the Arimaspi detailed in Part 88 below. The Maspii, a noble Persian tribe, are too far south to be considered.

83 **FELIX ARABIA:** Arabian Red Sea coastlands, particularly the south-western areas, including the Yemen.

84 **METAGONITIDIM:** The Metagonitae were a people living in Tangiers and the surrounding area. The district forms the west of Mauretania (Part 91) or modern Northern Morocco.

85 **ASSYRIA:** Eastern Iraq between the Tigris and the Iranian border.

86 **AFRICA:** Mediterranean coastal region of Libya, including Tripoli and the modern province of Tripolitania, but excluding the eastern part, for which see Cireniaca (Part 50) and Nasamonia (Part 51). The region also includes the eastern Algerian coastlands and the Algerian/Tunisian border. This is not the continent of Africa.

87 **BACTRIANI:** The people of Bactriana (Part 13).

88 **AFNAN or AFRAN:** Kelley: 'Here appear people with one eye in their head, seeming to be in their breast, towards the Equinoctial.'

Dee: 'I remember of people called Arimaspi.'

Dee is confused here, as the Arimaspi ('the one-eyed') were a people on the left bank of the Middle Volga, north of the Caspian Sea. The Afran are the people Ptolemy called the Africerones, located just north of Equatorial Africa in North Zaire. The ancient scholars considered that all the southern parts of Africa were uninhabitable (as with many unexplored lands) and populated with strange beasts. Herodotus included in his conjectures on unknown Africa descriptions of peoples with 'one eye in the breast instead of the usual head', which must be the people referred to.

89 **PHRYGIA:** Large province in Central Turkey. Greater Phrygia was bounded on the east by Cappadocia (Part 4).

90 **CRETA:** Crete.

91 MAURITANIA or MAURETANIA: Morocco and the north Algerian coastlands, not to be confused with the modern state of Mauritania, which is located further south and for which see Getulia (Part 19).

Appendix IV

Angels of the Elemental Tablets

Figure 91: Full Tablet of Union

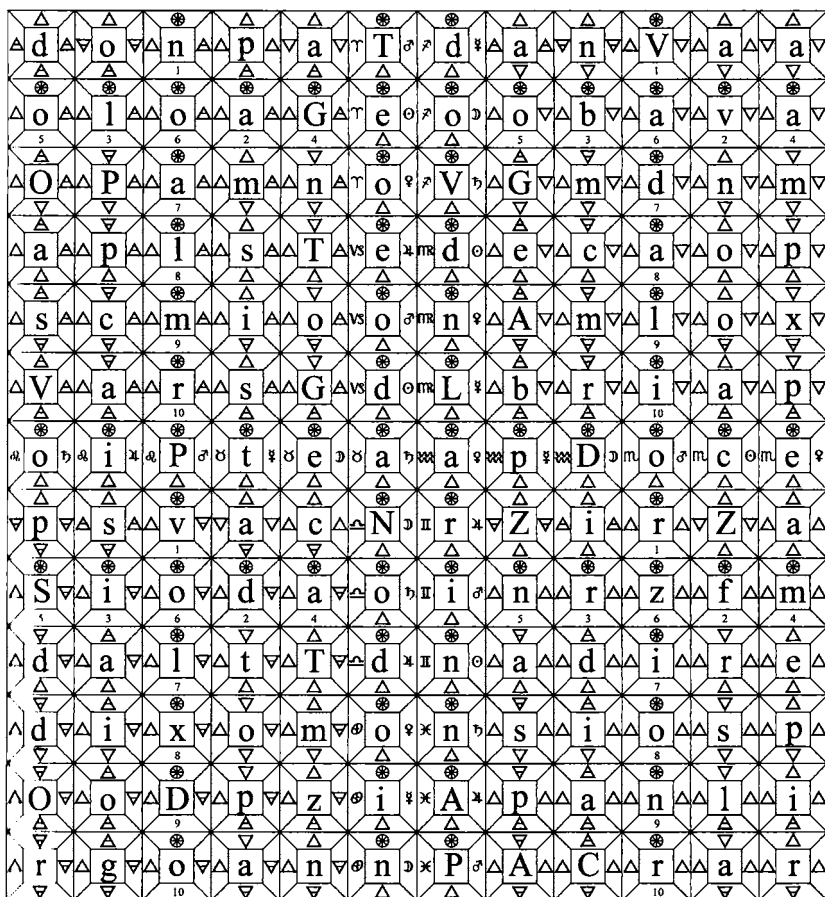

Figure 92: Full Elemental Tablet of Fire

Figure 93: Full Elemental Tablet of Water

Figure 94: Full Elemental Tablet of Air

Figure 95: Full Elemental Tablet of Earth

The Three Great Secret Names of God

At the very top of the hierarchy of the Elemental Tablet are the Three Great Secret Names of God. In the practice of modern Enochian magick, prior to contacting any angel from the Elemental Tablet, the Three Great Secret Names of God should be first be invoked. The Golden Dawn and Crowley incorporated the names in a preliminary temple opening. Whether you use these temple openings in your own work, or

if you design your own opening ritual, you must never neglect to recognize by name the Three Great Secret Names of God who rule the Elemental Tablet you are working with.

<i>Elemental Tablet</i>	<i>Three Great Secret Names of God</i>

<i>Water</i>	MPH	ARSL	GAIOI
<i>Earth</i>	MOR	DIAL	HCTGA
<i>Fire</i>	OIP	TEAA	PDOCE

Figure 96: The Three Great Secret Names of God of the Elemental Tablets

The Seniors and the Kings

Next in hierarchical order are the six seniors and the king of the Elemental Tablet. After invoking the Three Great Secret Names of God, these seven angels must also be recognized by name and made part of the magician’s opening ritual.

If you are invoking an individual senior, you may omit the names of the other seniors (but not the king) in your ritual opening.

<i>Elemental Tablet</i>	<i>Planets Assigned to the Seniors</i>

Three Examples of Enochian Magick Visions

Nanta, elo Hoath zorge ef.

"Spirit of Earth, first worshiper friendly visit."

—LAIDROM, MARS SENIOR OF EARTH

Example 1¹²³

First Session (September 25, 1980) Laidrom, Mars senior of the Elemental Tablet of Earth. Scryer: David P. Wilson.

For our first evocation session I decided we would work as Dee and Kelley did. One person would act as seer, and one as operator. The seer would recite the appropriate call, receive the vision, and communicate it during or after the session. The operator would banish, open and close the temple, and question the seer. I would be the operator, but I did not know who in our little class would be the first to sit in the visionary driver's seat. On class night there was only one rather reluctant volunteer.

David P. Wilson was not new to the world of magick. In the years leading up to his affiliation with our lodge he sat in with a host of magical groups and workshops in the Los Angeles area upon whom he later heaped scorn and ridicule because of their inability to show him "real magick." He was the boldest member of the class, also the most impatient and sarcastic. I could see the Enochian class going down in flames on

opening night because David the curmudgeon once again “saw nothing!” He had done none of the preliminary Enochian work with the rest of the class. He hadn’t painted a set of tablets or studied any of the calls. Still, he was our only volunteer.

I can’t recall why but I decided we would to try to contact LAIDROM, the Mars Senior of the Elemental Tablet of Earth. In the spirit of *better safe than sorry*, we placed the Earth tablet in the South (Capricorn/Cardinal Earth) and enclosed the entire class in a circle cast with a clothesline cord. I banished with the rituals of the lesser and greater pentagrams and hexagrams, then opened the temple and invoked the hierarchical names as indicated in *Liber Chanokh*. David was seated on the floor at the southern edge of the circle, just inches away from the Earth tablet. Leaning against the wall behind the tablet was a huge cardboard version of the [Elemental] Tablet of Earth that I placed there for the other members of the class to focus upon. I turned on the tape recorder and gave David a copy of the Call to read. I sat down behind him while he read it aloud.

He did rather well considering he had never read it before. When he was finished, he closed his eyes and took a deep breath. Nothing happened. I asked him to read the Call again. He did so and after only a few seconds he said, “I have a landscape. I see a landscape.”

I was relieved beyond words. “What does it look like?”

David proceeded to describe in surprising detail a desert vista of flat, trackless white crystalline powder stretching to the horizon. Great gray columns of volcanic rock towering over the plain broke the monotony of the scene. Between the columns the ground was pock-marked with countless gaping pits.

That was it. Nothing else was occurring. I asked him to read the Call a third time. This time there was movement. From out of a pit in the center of his field of vision arose a black cone. He said it sparkled from the inside and upon its surface with thousands of little sparks that jumped from one star to another.

I asked, “Is this LAIDROM?”

David grabbed his pencil and notepad and quickly scribbled something. I looked at what he had drawn. It looked like four very poorly drawn Enochian letters. At the time it meant nothing to me. I asked for a clearer answer. “Is this LAIDROM?”

“It’s him! It’s him! I see him.”

He described a humanoid figure draped in the same material from which the cone was constructed. He had an egg-shaped head but no face. His hands were like mittens—there were no fingers. He reached his arm toward the ground and “drew” a diagram in the sand in front of him. David quickly copied the figure on the notepad. It was a square divided diagonally by two lines with a small circle in the lower left-hand corner. We took this to be LAIDROM’s signature.

We were all very excited. It was as if the entire class saw David’s vision in our mind’s eye. Then it occurred to me. Now that we’ve got this guy, what the hell are we to do with him? Before I could think of what to do next, David said, “Lon, I feel like . . . I feel . . . I could make strange sounds.”

This was a twist. “Let yourself.” I told him. “Go with it.” I tried to sound calm.

“Naw-n tahelo hoh athayzo raygayeff. . . this is bullshit!”

“No! Relax, let it happen!”

“I mean it, I feel like an idiot. I’m too . . . *zil-zi-anzilzi-lo-da-arp nan-ta . . .* (inaudible) . . . *ef . . . efee thar-zi*. I am sorry. That’s all. Nothing like this has ever happened before. I just felt like doing it.” David’s apology was comical. We all broke into nervous giggles.

It had been quite an evening. As we had planned nothing particular to do with LAIDROM, I thought it wise to quit while we were ahead. I asked David to thank our spirit guest for his visit and proceeded to banish and close the temple.

One of the class members had brought along his Enochian Dictionary¹²⁴ and suggested we try to use it to see if David’s strange babbling actually meant something. I rewound the tape and played it back from the beginning. Everything was crystal clear right up to the time of LAIDROM’s appearance, when the tape developed an irritating distortion. We joked that it was the fault of malicious spirits and expected it to soon clear up. It did not. In fact, by the time the tape reached David’s babbling we could hardly pick his voice out from behind the bank of white noise. As soon as the good stuff was over, the distortion suddenly stopped.

Noise notwithstanding, after replaying the section of tape a dozen times or more, we picked up enough of what was being said to write down three audible strings of syllables:

naw-n tahelo hoh athayzo raygayeff.

zil-zi-anzilzi-lo-da-arp nan-ta . . . (inaudible) and

ef . . . efee thar-zi.

Starting at the beginning, we painstakingly played with the phonetics of each word (and the word/words following) and attempted to match them with words in the Enochian Dictionary. Obviously we weren't being very scientific, nor, I confess, very objective. This was all very exciting and romantic, and I am sure that night we would have squeezed *some* profundity out of any string of sounds. Be that as it may, it took less than an hour to break the sounds up as follows:

Nanta, elo Hoath zorge ef.—Which translated neatly to: “Spirit of Earth, first worshiper friendly visit.”

Zil zien—“stretch forth hands”

Zilodarp Nanta—“stretch forth and conquer Spirit of Earth”

Ef etharzi—“visit in peace.”

Needless to say we were all very impressed. At the end of the evening it was agreed that from now on class would meet two times a week to pursue Enochian magick. Sadly, David's ability to break spontaneously into the Enochian language would diminish rapidly as his familiarity with the language of the Calls increased. After the fourth or fifth session, he lost the ability completely. His visions, on the other hand, became clearer, more informative, and more provocative.

Example 2

Monday Night Magick Class (July 17, 2006) Twenty-ninth Aethyr Rii. Scryer: Jill Belanger

Enochian scrying sessions sometimes trigger emotional, physical, even sexual reactions. This is a clip from the transcription of a recording of a Monday night magick class scrying of the twenty-ninth Aethyr, Rii, and its governors: Vastrim, Odraxti, and Gomziam. The main scryer in this session was Jill Belanger, one of the class's most talented seers. It demonstrates that Enochian visions need not take the form of biblical-esque landscapes and heavy magical pronouncements. I thank

Jill for being a very good sport and allowing us to eavesdrop on part of this provocative session.

This session started with the full opening ritual as outlined in chapter one.

As soon as I closed my eyes I was pulled into a vortex, an upside down six, and I was pulled in with an . . . um . . . another gentleman, a lover, a man, and we were instantly in sexual ecstasy going in water in the form of six, and just flying around, the flame was in the middle, and the water was swirling around, and I was lost in that ecstasy for a while. And then I thought, No, I've got to figure out what this message is about. So I tried to push him away. (Laughter from class.) And I said (very drunkenly), "Gumziam [sic], where are you? And I kept flying around in the water vortex. I then saw two triangles together but three dimensional, in sort of like (garbled) with three or four sides instead of eight sides, and then the two triangles . . . one split off from the other one. One on top, one on bottom, and the widest parts were together, and I was standing in the middle . . . and it was like the floor and ceiling were separating and apart.

And I looked down, and the floor was split into four parts, not like the Watchtowers, more like pyramids, and one was Fire, Water, Earth, and Air. Then it was stuck back together again, and I was swirling with the vortex again. I said, "Fire creates, but water solidifies," and the two pyramids went back together, and I was with this lover again, floating around, and I was like, "OK! Let's . . . well . . . OK!" (Laughter from class.) I'm still kind of hot! (More laughter.)

Example 3

Public Workshop (July 22, 2006) Thirtieth Aethyr, Tex. Scryer: name withheld

The following is a letter I received a few days after I returned home from a workshop series on Enochian vision magick. The vision the young woman describes occurred during a scrying session that concluded a half-day public workshop. She, like most of the attendees at this event, had never performed Enochian magick before.

After I had outlined a brief history of Dee and Kelley's adventures and the fundamentals of Enochian magick, the entire class took part in

the ritual and chanting of the Ring/Lamen/Holy Table/Sigillum/Table of Nalvage opening ceremony. Over their two-part chorus of the Table of Nalvage words, I recited the nineteenth call to penetrate the thirtieth Aethyr, Tex. Here is her experience.

Hi, Lon!

Thanks again for making the trek here . . . last weekend. I learned a lot more than I had expected to, which is why I'm writing you this. I didn't get a chance to talk to you about the things I saw/did when you led the class foray into the Enochian aethyrs, and initially I was hesitant to because of the rather personal nature of some of it. But after talking to [my brother] about it, I realized I should tell you; in fact, he insisted I do so. So here goes.

We had just finished chanting the Holy Table, and you indicated we should close our eyes while you continued chanting and just follow the images that came to us. Initially I got not images per se, but random geometric shapes in dark shades of purple and green, mostly pyramids, and pyramids of one color in front of squares of a slightly darker shade. I realized that I was falling forward, swiftly, down a triangular corridor filled with a dark purplish haze, with occasional lighter purple flashes—like falling through layers and layers and layers, whoosh, whoosh, whoosh, with something spinning all around me at the same time. Then I realized I wasn't going down anymore, but rising, still through this triangular purple infused corridor, whoosh, whoosh, whoosh, still the spinning, and I began to feel my heart pounding like it would burst inside me, I felt dizzy and slightly nauseous, and just when I thought I couldn't stand it for another moment longer, I stopped speeding forward, and the purple mist cleared, and I was standing on a grassy plain, almost a hilltop, that rose slightly upward in front of me. I realized that the thing that had been spinning seemed to be the petals of an enormous flower, a lotus, perhaps, and that the hillside on which I stood was contained within its perimeter, like a low wall going around it. It occurs to me now that I was facing north.

Beyond the border of the wall were two more hills in the distance, one to the left and one to the right, covered in vibrant dark green vegetation, and I knew vaguely that there were Things in those hills, in those trees, but I didn't have time to think about them. There were four pillars that stretched up around me, at the outside edge of the wall, and

as I watched, a pyramid rose up out of the hillside in front of me, or perhaps I simply moved swiftly up the hillside towards it. It wasn't large, maybe only one or one and a half stories high; it was four sided and made of a smooth golden brick or stone. A blinding light issued from the center of it, and, as I watched, the form of a person appeared in the center of this light and was walking towards me.

My impression was that he came from inside the pyramid, and he seemed to be coming from some distance, though the pyramid was just in front of me. He was tall and blond and blue eyed and wore a garment of brilliant white and a golden circlet about his temples. And he was smiling, he was so glad to see me. As he came close to me, he opened up the robe to reveal a column of blinding white light running down the centerline of his body. As my eyes adjusted to the light, I realized that the light was coming from his chakras, which were blazing yellow-white light and shaped sort of like flowers. I realized that my chakras were also blazing, and the light from his heart chakra leapt forward in a thin white-yellow tongue of flaming light and entered my heart chakra. Then his throat chakra flamed and leapt into mine, and then all of them at once seemed to, and that blazing sharing of chakra light continued for a few blissful, amazing moments.

He held his hands out in front of him, palms facing toward me, and I placed my palms against them, and the chakras in our hands blazed with light and fire for a moment. Then he took my hands and pulled them straight into his chest so that I held his heart chakra in my hands, and then he indicated that I should put his heart chakra inside my chest. I was amazed that he would suggest that, and slightly hesitant, but he was insistent, and together we thrust it into my chest. I was stunned at the force of the heat of the union of our two heart chakras. Then he gestured to his throat chakra, and again, I took his chakra in my hands, and lifted it out of him and into myself, with another flash of heat. Then I lifted out his third-eye chakra, then his solar plexus chakra, then his hara chakra. I reached next for his root chakra, and realized that in my hands it had become a huge golden phallus, and as in the curious logic of dreams, there was only one obvious way to integrate that into myself—I mounted it, and at the same time, I reached up and removed the crown from his head, symbolic of his crown chakra, and placed it on my own head at the same moment as the phallus slid into me, and the universe exploded. It wasn't sex, it wasn't copulation, it was Union,

I was perfectly with and within him, and he was perfectly with and within me. It was Bliss, it was Light, it was Perfection. I heard his voice in my ear, saying, "You are She, in Whom all things are received; She in Whom all things are created; She in Whom all things are possible. All Life is Yes; all Love is Know. Know that You are She."

At about that moment, I heard your voice saying something about looking around for landmarks that would help me remember this place, and I laughed to myself that I wasn't likely to forget this. You said something else about bringing back a sign, or a key or talisman from this place, something to know and remember it by that would help me return, and I pulled back slightly from this Being with a wordless question, and his answer was to withdraw from me, and he ejaculated into my outstretched hands, a liquid golden light that turned into two glowing, golden diamond crystals that sank into my palms and disappeared as I watched.

Then your voice said it was time to return, and without another word or glance between us I was whisked up and away, coming back into awareness of my body with a nauseating thud, my head spinning, my heart pounding painfully. You started asking us questions about what we'd seen, where we'd been, and I was too nauseated and out of breath to answer, but was amazed to hear my classmates describing similar imagery, lotuses, columns, towers, pyramids, though no one else seemed to have experienced anything close to what had passed between me and that other Being—or at least, no one was admitting to it. I sat there in a haze, listening to them, thinking about my own experience, and waiting for my heart to quit pounding, my stomach to stop churning. I must have looked pretty stunned, because [my husband] asked me if I was OK, and all I could initially articulate to him as he looked over at me was, "What the f___ just happened to me?"

We broke for dinner at about that moment, and I realized my opportunity to share it with the class had passed. But I still wanted to tell you about it, and, of course, [my husband]. We had driven separate cars that day, so we met at the house before going to the restaurant, and there at home I told him. He stared at me while I told him about it, saying it was pretty amazing, but I'd better not say anything about it in front of the class as a whole, that it was way too personal to just lay out there that way. He suggested I call [my brother], that he'd be able to decode it for me and would definitely be interested. I agreed, but

thought at the same time that I really should tell you, but wanted to do so in private.

We went to dinner and then to the meet and greet with the class, but I held back, there were always too many people around. Perhaps now, after reading my account, you understand my hesitancy. Because to be honest, I wasn't sure how to begin, I was still unsure of myself, unsure of how to confess to someone I had only just met that under his direction I had experienced a union that was way more than sexual with someone who was apparently a Being of Light, a resident of the angelic realms, and also not sure of what that said about me. But I knew who would know what it all meant, and so as soon as I got home on Sunday, I called my brother and told the whole story to him. He was jubilant, congratulatory, awestruck, and then he asked me, "Well, what did Lon say when you told him?" I had to admit that I hadn't been sure of what or how to communicate it, and had been further stymied by my husband's reaction to it. My brother was incredulous. How could I not have shared that vision with you, who of all people, would understand it and sympathize with my bewilderment at it? I should have told you everything, he insisted. I agreed and promised him I would write you. And so here we are.

My brother was curious to know which of the Aethyrs you had us reading from, and I couldn't remember; my husband thinks you said we were only going to push ourselves up a level, but my brother thinks I went farther than that and said you might recognize which one. There were things about the place that I recognized from dreams—it's a place I've dreamed of my whole life but never consciously remembered until now. I'm not unaccustomed to visions and vision quests, but this was unlike anything I've ever done before. My body's reaction to it was visceral; I crashed hard when I came back from it, and I continued to feel the physical aftereffects for several days (kind of like recovery from a bad acid trip). Today, Thursday, I'm finally feeling back up to steam. My brother said that's a normal reaction to astral projection; is that really what I did? I have my own theories about the imagery and symbolism. I'm a massage therapist and energy worker, a master of the Usui and Karuna systems of Reiki, and the student of a spirit guide who was a Native American shaman. The ejaculation of light that turned into crystals and sank into my palms resonates with me on several levels. I

think one possible meaning is that it was a gift to use in my healing work. I can tell you that all this week, whenever I've "turned on" the Reiki or use one of the symbols, the chakras in my palms blaze with heat, my patients have actually commented on it! (In fact, they're heating up right now, just thinking about it.) [My brother] didn't exactly discount my idea about it, but he said there was a lot more mystical significance there than I realized, or than he should even talk to me about until I talked to you. Obviously, it's loaded with archetypal images, but I would love to know what you get from them, what level you sent me to, and if you recognize anything from my descriptions.

Thanks for your patience. This has turned from an email into a novella! I eagerly await your reply!

Brightest blessings!

16 There! That wasn't so hard. Thank you, O remover of obstacles. I do believe the evil spirit of writer's block has been banished.

17 Crowley, *Magick, Liber ABA: Book Four*, 193.

18 In magick, "invocation" usually refers to the *calling into* oneself the presence or the essence of Deity; "evocation" usually refers to *calling forth* a spiritual entity (angel, spirit, demon, etc.) into the magician's triangle of art, there to be constrained and charged to do the magician's bidding. Theoretically, once the magician has successfully invoked the divine presence within himself or herself, he or she then has the divine authority to evoke the spirits.

21 The title *doctor* has for centuries been attached to John Dee, and certainly his academic and professorial stature among his counterparts was enormous. However, there are no records of him actually receiving a doctorate degree. We do know that he finished school in 1551 with a master of arts degree and subsequently given a modest pension from King Edward VI.

22 Peter French, *John Dee: The World of an Elizabethan Magus* (New York: Dorset Press, 1989).

23 John Aubrey, *The Natural History and Antiquities of the County of Surrey* (London: n.p., 1718), 82.

24 This tidbit of historical trivia did not escape the attention of former British intelligence officer Ian Fleming when he created his fictional superspy, James Bond. Dee's espionage exploits are featured at an exhibit at the International Spy Museum in Washington, D.C.

25 Sometimes spelled *skrying*.

26 *A True & Faithful Relation*, Magickal Childe edition, p. 174.

27 For good or ill, there will always be a few of these. Foolishness and naïveté are often the most valuable weapons in the magician's arsenal.

28 Ordo Templi Orientis.

29 Without which the magician "can do nothing."

30 Even though Dee and Kelley continued an on-and-off relationship until 1587, when one particularly significant Enochian magick-related operation occurred (see book III), for all intents and purposes their angelic operations ended on July 13, 1584.

31 Johann Wolfgang Goethe, *Faust*, trans. George Madison Priest (Franklin Center, PA: Franklin Library, 1979).

32 Lon Milo DuQuette, *The Chicken Qabalah of Rabbi Lamed Ben Clifford* (Boston: Weiser Books, 2001). 129.

33 *Mysteriorum Liber Primus*. Also *John Dee's Five Books of Mystery*, pp. 67–68.

34 What is likely Dee's own copy of *Aldaraia sive Soyga: Tractatus Astrologico magicus*—the *Book of Soyga* is found in the British Library's MS Sloane 8.

35 It is interesting to note that one row in the table Magistri of *The Book of Soyga* is not filled with letters.

36 I encourage readers who feel drawn to the mysteries of the tables to review the following brilliant cryptographic analysis of them: Jim Reeds, "John Dee and the Magic Tables in the Book of Soyga," in *John Dee: Interdisciplinary Essays in English Renaissance Thought*, Vol. 193, *International Archives of the History of Ideas/Archives internationales d'histoire des idées*, ed. Stephen Clucas (New York and Heidelberg: Springer, 2006).

37 Carl Sagan (1934–1996) was an American astronomer and popular-science writer. This quote is from his 1980 television series, *Cosmos*.

38 Aleister Crowley, *Magick, Liber ABA: Book Three: Magick in Theory and Practice*, 231.

39 Lon Milo DuQuette, *The Key to Solomon's Key: Secrets of Magic and Masonry* (San Francisco: CCC Publishing, 2006), 104.

40 I Kings 3:5. George M. Lamsa, trans., *The Holy Bible from Ancient Eastern Manuscripts* (Philadelphia: A. J. Holman Company, 1967).

41 Ibid., I Kings 3:9–12.

42 Just as no two people share the same history (karma), flaws, talents, or potential, each magician's career is entirely unique. Hence the Lord's comment to Solomon, "Lo, I have given you a wise and understanding heart, so that there has been none like you before you, neither shall any arise after you like you" (I Kings 3:12).

43 DuQuette, *The Key to Solomon's Key*, 105.

44 Dee, *Quinti Libri Mysteriorum*, Sloane 3188.

45 John Dee, *De Heptarchia Mystica*, Sloane 3191.

46 Dee and Kelley referred to their magical sessions as actions.

47 Dee, *Quinti Libri Mysteriorum: Liber Primus*, Sloane 3188.

48 My dear friend Glacier in Chicago fashioned both the Ring and Lamen for me from a plate of thin gold (see acknowledgements).

49 "From the year 1579 in approximately this manner, in Latin or English (and furthermore in another singular and particular manner around the year 1569, sometimes for Raphael and sometimes for Michael) it was most pleasing to me to pour forth prayers to God. May God grant his wonderful mercy to me. Amen." Dee, *Quinti Libri Mysteriorum: Liber Primus*, Sloane 3188.

50 Using the inconsistent spelling characteristic of the Elizabethan period, this phrase originally read, "Beware of wavering: Blot owte suspition of us; for we are gods Creatures that haue Raigned, do Raigne, and shall Raigne for eu^e. All our Mysteries shalbe known unto you." Dee, *Quinti Libri Mysteriorum: Liber Primus*, Sloane 3188.

51 The letter *b* (or *Pa* in the angelic alphabet) is used liberally in Heptarchic and Enochian magick. The frequency of its appearance has prompted some modern scholars to speculate that it represents the number seven, the key or foundational number of Dee and Kelley's angelic magick.

52 The symbols of the planets are as follows: Saturn ♄, Jupiter ♃, Mars ♂, Sol ☉, Venus ♀, Mercury ☿, Luna ☾.

53 This prayer is not found as such in the original Dee and Kelley material. I composed it to reflect my understanding of the purpose of the Lamens as it relates to myself and the Holy Table.

54 Dee, *Quinti Libri Mysteriorum*: Appendix, Sloane 3188.

55 Most likely laurel wood.

56 It is estimated in Dee's day a cubit equaled approximately forty-four inches.

57 *A True & Faithful Relation* also includes excerpts from Dee's work with Bartholomew Hickman from March 20, 1607, to September 7, 1607.

58 Aleister Crowley, *The Equinox*, Vol. I, no. 7. Reprinted as *The Equinox: Volume I*, Soror Virakam, ed. (York Beach, ME: Weiser Books, 1999), 229.

59 Dee, *Quinti Libri Mysteriorum*: Appendix, Sloane 3188.

60 And just as we microcosmic human beings are said to be the reflection of macrocosmic Deity, the individual names of the kings and princes on the 12 x 7 table that create the Lamens (which are read from right to left) are the mirror image of the those found on the 12 x 7 table that create the Holy Table (which are read from left to right).

61 Dee, *Quinti Libri Mysteriorum: Liber Secundus*, Sloane 3188.

62 *Liber Juratis* (*The Sworne Booke of Honorius*) and Athanasius Kircher's *Eodipus Aegypticus*.

63 The Greek omega here is the only example of a non-Latin letter appearing on the Sigillum Dei Aemeth.

64 When new, the candles served to illuminate the altar during several years of Gnostic masses.

65 My thanks go to Enochian magician Michael Strader for these images, which he was kind enough to also fashion for our Monday night magick class in purified tin.

66 Casaubon, *A True & Faith Relation*, 209.

67 Dee and Kelley, *Liber Mysteriorum Quintus*, Sloane 3189.

68 Much of which can be found today in Sloane 3189.

69 Sloane 3188.

70 Peterson, *John Dee's Five Books of Mystery*, 32.

71 Dee, *Mysteriorum Liber Primus*, Sloane 3188.

72 Dee, *Liber Mysteriorum Quintus*. Sloane 3188.

73 For the full quote see Casaubon, *A True & Faithful Relation*, 174.

74 New volumes of *The Equinox* continue to be published today by Crowley's magical order, Ordo Templi Orientis.

75 The Ceremony of Preparation is found in chapter one and appendix I of this book.

76 Casaubon, *A True & Faithful Relation*, 74.

77 Ibid.

78 Ibid.

79 Ibid., 88.

80 The calls are also referred to as *cries* or *keys*.

81 In this fanciful vignette, Nalvage is reaching into the future to quote the venerable author of *The Chicken Qabalah of Rabbi Lamed Ben Clifford*.

82 Dee, Sloane 3191.

83 Some of the countries are difficult for us to pinpoint today. I am deeply indebted to Robin Cousins, who has done extensive research in this area and written a marvelous essay on the subject, which he has graciously allowed me to reprint in its entirety in appendix III.

84 Casaubon, *A True & Faithful Relation*, 170.

85 Ibid., 168.

86 The four cloths were colored: The one in the east was red; the south, white; the west, green; and the north, black.

87 Casaubon, *A True & Faithful Relation*, 170.

88 Casaubon, *A True & Faithful Relation*, 183.

89 The tribes were first identified by a number, one through twelve, and later identified by name.

90 David R. Jones, "The System of Enochian Magick, Part II: The Evolution of the Tablets," *Lion & Serpent* 4, no. 4 (2001). *Lion & Serpent* is a journal published by Sekhet-Maat Lodge, Ordo Templi Orientis.

91 Dee, *Cotton Appendix XLVI: Actio Tertia Trebonae Generalis*.

92 In particular, *Liber Scientiae Auxilii et Vitoriae Terrestris* (Sloane 3191).

93 Casaubon, *A True & Faithful Relation*, 188.

94 Ibid., 168.

95 Ibid.

96 The Book of the Revelation 4:4: "Surrounding the throne were twenty-four other thrones, and seated on them were twenty-four elders. They were dressed in white and had crowns of gold on their heads."

97 INRI is an acronym of the Latin phrase *Iesus Nazarenus Rex Iudaeorum*, "Jesus the Nazarene, King of the Jews." It appears in the Gospel of John (chapter 19, verse 19). The four letters also have profound esoteric meanings to Christian mystics and ceremonial magicians, who see in the letters a magical formula of creation and being.

98 In astrology it is the four fixed, or kerubic, signs of the zodiac that exemplify the purest elemental quality. For example, there are three zodiac signs that represent the element of Fire: Aries, Leo, and Sagittarius. Aries is the cardinal or initial aspect of Fire, Leo is the fixed (kerubic) or firmly defined aspect of Fire, and Sagittarius is the mutable and most easily influenced aspect of Fire.

The four fixed (kerubic) signs of the zodiac are: Aquarius (Air), Scorpio (Water), Taurus (Earth), and Leo (Fire). The classic symbols of the fixed signs (the angel of Aquarius, the eagle of Scorpio, the bull of Taurus, and

the lion of Leo) are called the kerubic emblems and appear often in Christian iconography.

99 Casaubon, *A True & Faithful Relation*, 179.

107 Casaubon, *A True & Faithful Relation*, 209.

108 Ibid., 209.

109 For the moment I will forego a discussion of the small cards of each suit. See appendix IV.

110 I don't fully understand why, but it is a consistent characteristic of Enochian magick to organize the four elements in this order: Air, Water, Earth, and Fire.

111 Charley D. and Milo, *Charley D. and Milo*, Epic Records, 1970.

112 The more the magician practices reciting the calls, the more sensitive he or she becomes to the shifts of consciousness each one produces.

113 Theoretically, each of the 156 lettered squares of an Elemental Tablet is an angel who can be contacted by continuing the hierarchical descent into the subangle. If you care to plunge this deeply into elemental workings, you are free to do so by discovering a further hierarchy of names and letters that seems most logical to you.

122 Dee, like most of his contemporaries, believed the island of Friseland to exist. It was, in fact, a duplication of Iceland on an early map, an error which was repeated. When its coast was supposedly skirted, this was actually the coast of Cape Farewell, Southern Greenland. Note also that today Germania (Part 29) incorporates Poland. In Dee’s time Poland was located further eastward and would have formed part of Sarmatia or Russia (Part 46).

123 The following is taken from chapter 20 of my book *My Life with the Spirits: The Adventures of a Modern Magician* (York Beach, ME: Weiser Books, 1999), 138–141.

124 Laycock, *The Complete Enochian Dictionary* (see footnote 115).

About the Author

Lon Milo DuQuette is a bestselling author and lecturer, whose books on Magick, Tarot, and the Western Mystery Traditions have been translated into ten languages. He is currently U.S. Deputy Grand Master of Ordo Templi Orientis and is on the faculty of the Omega Institute in Reinbeck, NY and the Maybe Logic Academy. Among his many books, he is the author of *My Life with the Spirits* (Weiser 1999), *Understanding Aleister Crowley's Thoth Tarot* (Weiser 2003), *The Magick of Aleister Crowley* (Weiser 2003), and *Tarot of Ceremonial Magick* (Weiser 1995). He lives in Costa Mesa, CA with his wife Constance. Visit him on the Web at: www.lonmiloduquette.com.

Booksign & joining of books 1,2 & 3 by Caput Mortuum for the Ayin Quadma'ah Movement.

Elias Ashmole's Preface:

Be it remembred, That the 20th: of August 1672, I received by the hands of my Servant Samuell Story, a parcell of Dr: Dee's Manuscripts, all written with his owne hand; vizt: his Conferences with Angells, which first began the 22th of Dec: anno: 1581, & continued to the end of May anno: 1583, where the printed Booke of the remaining Conferences (published by Dr: Casaubon) begins, & are bound up in this volume.

Beside these, the Booke intituled, *The 48 Claves Angelicæ*, also, *Liber Scientia Terrestris Auxilii & Victoria* (These two being those very individuall Bookes which the Angells commanded to be ⁺burnt , & were after ⁺⁺restored by them as appeares by the printed Relation of Dr: Dee's Actions with Spirits pag: 418 & 419) The Booke intituled *De Heptarchia Mystica Collectaneorum Lib: Primus*, and a Booke of *Invocations or Calls*, begining with the Squares filld with letters, about the Black Cross. These 4 Bookes I have bound up in another volume.

All which, were a few daies before delivered to my said Servant, for my perusall (I being then at Dr: William Lillies house at Hersham in Surrey) by my good freind Mr: Thomas Wale, one of his Majesties Warders in the Tower of London.

+10. April }
++30. April } 1586

The 5th: of Sept: following Mr: Wale (having heard of my retourne to Towne) came to my office in the Excise Office in Broadstreete, & told me he was content to exchange all the foresaid Bookes, for one of myne, vizt: *The Institution, Lawes & Ceremonies of the most Noble Order of the Garter*, to this I agreed, and provided one, which I sent him fairely bound, & gilt on the Back.

As a further testimony of the sence of Mr. Wales kindnes; shortly after his death, I sent for his son, & bestowed on him, one of my Deputies places in the Excise, with an allowance of 80 £ per Annum.

On the 10th: of the said Sept: Mr: Wale came thither to me againe, & brought his wife with him, from her I received the following account of the preservation of these Bookes, even till they came to my hands, vizt: That her former Husband was one Mr: Jones a Confectioner, who formerly dwelt at the Plow in Lumbardstreet London, & who, shortly after they were married, tooke her with him into Alde streete among the Joyners, to buy some Houshold stuff, where (at the Corner house) they saw a Chest of Cedarwood, about a yard & halfe long, whose Lock & Hinges, being of extraordinary neate worke, invited them to buy it. The Master of the shop told them it had ben parcell of the Goods of Mr: John Woodall Chirurgeon (father to Mr: Tho: Woodall Late Serjant Chirurgeon to his now Majestie King Charles the 2d: (my intimate friend) and tis very probable he bought it after Dr: Dee's death, when his goods were exposed to Sale.

Twenty yeares after this (& about 4 yeares before the fatall Fire of London) she & her said husband occasionally removing this Chest out of its usuall place, thought they heard some loose thing rattle in it, toward the right hand end, under the Box or Till thereof, & by shaking it, were fully satisfied it was so: Hereupon her Husband thrust a peece of Iron into a small Crevice at the bottome of the Chest, & thereupon appeared a private drawer, which being drawne out, therein were found divers Bookes in Manuscript, & papers, together with a litle Box, & therein a Chaplet of Olive Beades, & a Cross of the same wood, hanging at the end of them.

They made no great matter of these Bookes &c: because they understood them not, which occasioned their servant Maide to wast about one halfe of them under Pyes & other like uses, which when discovered, they kept the rest more safe.

About two yeares after the discovery of these Bookes, Mr: Jones died, & when the fire of London hapned, though the Chest perished in the Flames, because not easily to be removed, yet the Bookes were taken out & carried with the rest of Mrs: Jones her goods into Moorefields, & being brought safely back, she tooke care to preserve them; and after marrying with the foresaid Mr: Wale, he came to the knowledge of them, & thereupon, with her consent, sent them to me, as I have before set downe.

— E. Ashmole /

*Præter alias meas extemporaneas preces, et ejaculationes
ad Deum vehementiores: Hæc una, maxime
usitata fuit*

*Oratio mea Matutina, Vespertinaque: pro Sapientia.
In nomine Dei Patris, Dei Filii, Dei Spiritus Sancti
Amen.*

*Omnipotens, Sempiterna, vere, et vive Deus, in adjutorium meum
intende: Domine Dominantium, Rex Regum, Jeovah
Zebaoth, ad adjuvandum me festina:*

*Gloria Deo, Patri, Filio, et spiritui Sancto: Sicut erat in
principio, et nunc, et semper et in sæcula sæculorum: Amen.*

*Recte sapere, et intelligere doceto me, (ô rerum omnium Creator,) Nam
Sapientia tua, totum est, quod volo: Da verbum tuum in ore meo,
(ô rerum omnium Creator,) et sapientiam tuam in corde meo fige.*

*O Domine Jesu Christe (qui sapientia vera es, æterni et Omnipotentis
tui Patris) humilimè tuam oro Divinam Majestatem, expeditum
mihi ut mittere digneris, alicuius pii, sapientis expertique, Philosophi
auxilium, ad illa plenissimè intelligenda perficiendaque, quæ maximi
valoris erunt ad tuam laudem et gloriam amplificandam: Et si
Mortalis nullus iam in terris vivat, qui ad hoc munus aptus sit: vel
qui ex æterna tua providentia, ad istud mihi præstandum beneficium
assignatus fuerit: Tunc equidem humilime, ardentissimè et constan=
tissimè a tua Divina Majestate requiro, ut ad me de cælis mittere
digneris bonos tuos Spirituales Ministros, Angelosque, videlicet Mi=
chaëlem, Gabrielem, Raphaëlem ac Urielem: et (ex Divino tuo
favore) quoscunque, alios, veros, fidelesque tuos Angelos, qui me plene
et perfecte informant et instruunt, in cognitione, intelligentiaque
vera et exacta, Arcanorum et Magnalium tuorum (Creaturas omnes
tuas, illarumque naturas, proprietates, et optimos usus, concernentium)
et nobis Mortalibus scitu necessariorum; ad tui nominis laudem,
honorem, et gloriam; et ad solidam meam, aliorumque (per me,) plurimorum
tuorum fidelium consolationem: et ad Inimicorum tuorum confusionem,
et subversionem. Amen. Fiat Jeovah Zebaoth: Fiat Adonay,
fiat Elohim. O beata, et superbenedicta Omnipotens
Trinitas, Concedas mihi (Joanni Dee) petitionem
hanc, modo tali, qui tibi maximè placebit.
Amen.*

*Ab anno 1579. hoc ferè modo: Latinè, vel Anglicè; (ast circa annum 1569
alio et peculiari, particulari modo: interdum pro Raphaële, interdum
pro Michaële) ad Deum preces fundere: mihi gratissimum fuit:
Mirabilem in me faciat Deus Misericordiam suum.*

Amen.

*Ad Deum Omnipotentem Protestatio fidelis:
ad perpetuam rei memoriam Anno 1582.*

O God Almighty, thou knowest, & art my director, and witness herein, That I have from my youth up, desired & prayed unto thee for pure & sound wisdom and understanding of some of thy truths natural and artificial: such, as by which, thy wisdom, goodness & power bestowed in the frame of the word might be brought, in some bountifull measure under the Talent of my capacity, to thy honor & glory, & the benefit of thy Servants, my brethren & Sisters, in, & by thy Christ our Saviour. And for as much as, many yeeres, in many places, far & nere, in many books, & sundry languages, I have sought, & studied; and with sundry men conferred, and with my owne reasonable discourse labored, whereby to fynde or get some ynckling, glyms, or beame of such the forsaid radical truths: But, (to be brief) after all my forsaid endeavor I could fynde no other way, to such true wisdom atteyning, but by thy extraordinary gift: and by no vulgar schole doctrine, or humane Invention. And, Seeing, I have read in thy books, & records, how Enoch enjoyed thy favor and conversation, with Moyses thou wast familiar: And also that to Abraham, Isaac, and Jacob, Josua, Gedeon, Esdras, Daniel, Tobias, and sundry other, thy good Angels were sent, by thy disposition, to instruct them, informe them, help them, yea in worldly and domesticall affaires, yea and sometimes to satisfy theyr desires, doubts & questions of thy Secrets. And furthermore Considering, the Shew stone, which the high priests did use, by thy owne ordering: wherein they had lights and Judgments in theyr great doubts: and considering also that thou (O God) didst not refuse to instruct thy prophets, (then, called Seers) to give true answers to common people of things æconomically, as Samuel, for Saul seeking for his fathers asses being gone astray: and of other things vulgar true predictions, whereby to win credyt unto thy weightier affaires: And thinking with my self, the lack of thy wisdom; to me, to be of more importance, then the value of an Asse or two, could be to Cis, (Saul his father): And remembring what good counsaile thy Apostle James giveth, saying, *Si quis autem vestrum indiget sapientia, postulet a Deo, &c.* And that Salomon the wise, did so, even immediately by thy self, attayne to his wonderfull wisdom. Therefore, Seeing I was sufficiently thought and confirmed, that this wisdom could not be come by at mans hand or by humane power, but onely from thee (ô God) mediately or immediately) And having allwayes a great regarde & care to beware of the filthy abuse of such as willingly and wetingly, did invoke & consult (in diverse sorts) Spirituall creatures of the damned sort: angels of darknes, forgers & patrons of lies & untruthes: I did fly unto thee by hartly prayer, full oft, & in sundry manners: sometymes crying unto thee, *Mittas lucem tuam et veritatem tuam, que me ducant &c.*, sometymes *Recte Sapere et Intelligere doceto me, Nam sapientia tua totum est quod volo: &c.*, sometymes, *Da verbum tuum in ore meo, et sapientiam*

tuam in corde meo fige &c. And having perceyved by some slight
 experiens with two diverse persons, that thow hadst a speciall care to
 give me thy light, and truth, by thy holy and true ministers Angelicall
 and Spirituall: and at length, hearing of one, (a master of Arts and
 a preacher of thy word admitted) accownted as a good Seer and
 skryer of Spirituall apparitions, in Christalline receptacle, or in open
 ayre, by his practise procured: and trusting to frame him, by my
 earnest & faithfull prayers unto the (my God) to some my help
 in my forsayd Studies: tyll, thow (o heavenly father) woldest
 by thy unserchable proveydence, send me some apter man
 or means thereto. Thereuppon trying him and using him, I
 fownd great diversity betwene his private usuall manner, and intente of
 practice, and my pure, sincere, devowte, & faithfull prayer unto
 the onely. And therefore often & fervently I exhorted him
 to the good; and reproved both him, and his ministers, with my
 no small danger, but that thow (in manner unherd of) didst
 pitch thy holy tente to my defence, and cumfert, in conflict most
 terrible: as thow best knowest o God, and I willed him thereuppon to preach
 thy mercyes, & the verity of the kingly prophet his testimony,
Castra metatur Angelus Domini, in Circuitu timentium eum.
 And out of Roger Bachon his boke written *De mirabili potestate Artis
 et Naturæ*, (where he writeth against the wycked Divel
 callers) I noted unto him this sentence, *Facilius (sine comparatione
 a *Deo impetrandum foret, vel a bonis spiritibus, quicquid homini
 utile reputare &c.* Which my cownsaile he promised me to
 follow, as thow art witnes, o our true & almighty God.
 And as thy good spirituall creatures neyther had delight
 in the man, neyther wold so playnely & preistly give me theyr
 answers or informations by him, that he might be hable to perceyve
 the pith therof. So was he at length very unwilling to
 here him self rebuked for his nawghtynes, and to be barred from
 the Mysteries of thy truthes understanding; which were
 the onely things that I desyred, throwgh thy grace, o our
 most mercifull God. Therefore, as well for a Memoriall
 answerable to the premisses, as for the better warrant of my
 Such exercises to be made accownt of, hereafter: (leaving all
 unto thy infinite mercies, and unsearchable providence,) I have
 thowght it not impertinent, to note downe, even in this place
 one of the last Actions, which I had with the forsayd preacher:
 When I made earnest & faythfull petition unto the (o the
 true and Almighty God) for sending, unto my cumfort &
 erudition, (yf it were thy blessed will,) thy holy, & mighty
 Angel Annael: of whome and of all the Hierarchies heavenly
 all prayse honor & thanks, be rendred unto thy divine majestie: now
 & ever & worlde without ende. *Amen. Amen. Amen.*

undue secu=
ritie.:

Δ
There appered a
great number of
dead mens skulls,
likewise.

Δ – After my fervent prayers made to God, for his mercifull
cumfort and instruction, throwgh the ministry of his
holy and myghty Angel, named Anael, (yf it wer
his divine pleasure) I willed, the skryer, (named
Saul) to loke into my great Chrystaline Globe, yf
God had sent his holy Angel Anael, or no:
And Saul loking into my forsayd stone, (or Chrystall Globe)
for to espie Anael, he saw there ^Δ one, which answered to
that name. But being earnestly requested of me to tell
the Truthe yf he were Anael, An other did appere
very bewtifull, with apparell yellow, glittering, like gold: and his
hed had beames like ster beams, blasing, and spredding from it; his eyes
fyrie. He wrote in the stone very much in hebrue letters, and the
letters seamed all transparent gold: which, Saul was not able eyther
presently to reade, that I might write after his voyce, neyther to
imitate the letters in short tyme.

A bright star, did go up and down by him.

There appeared allso a white* dog, with a long hed.

And many other visions appeared, with this second: The first being voyded
quite away. Thereuppon I sayd, as followeth,

Δ – *In nomine Jesu Christi, Quis tu es?* — He answered
AN – *Potestas omnis, in me sita est.* to Saul his
Δ – *Quæ?* hearing.

AN – *Bona, et mala.*

Δ – Then appeared in the stone, these two letters **M.G.**
I then axing him some questions, *de Thesauro abscondito*:
He answered,

AN – *Ne perturbes: Nam hæ sunt Nugæ.*

And withall appeared many dedd mens skulls,
on his left hand.

He sayd to me,

AN – *Ubi est potestas tua?*

Δ – *Cur quæris de potestate aliqua mea?*

AN – *Cur? Signifi, non mihi placet.*

Δ – I, thereuppon, set by him, the stone in the frame:
and sayd,

Δ – *An bonus aliquis Angelus, assignatus est huic speculo?*

AN – *Etiam.*

Δ – *Quis?*

AN – **מִיכָאֵל** – he answered, by the shew of these letters in the stone.

Δ – *Bonus ne ille Angelus, de quo in scripturis fit mentio?*

AN – *Maximè.*

Δ – *Fieri ne potest, quod ego eundem videam, et cum illo agam?*

AN – *Ita.* and therewith appeared this character —

Δ – *Quid per hoc, significare velis?*

AN – *Alterius Angeli character est.*

Δ – *Cur hîc, et nunc ostendis?*

AN – *Causam ob magnam.* – Make an ende: It shalbe declared, but not by me.

Δ – By whome then?

Prayer
Fasting

AN – By him that is assigned to the stone: but not, tyll after the feast. And then thou must prepare thyself, to prayer and fasting.

In the Name of God, be secret: and in all thy doings praying, tyll thou hast thy desyre: which shall not be far of.

After Newyeres tyde, Deale, but not on the Sabaoth day.

Pray continually.

When it shall please god, to stir the up, Then procede. In the brightest day, when the Sonne shyneth: In the morning, fasting, begynne to pray.

In the Sonne Set the stone.

Deale both kneeling, and sitting. I have done for this tyme.

My name is ANNAEL.

I will speak ones more to the: and than fare well: for thou shalt not have me any more.

Be not to hasty in wrath.

Δ – Is this, that, you ment to speak?

AN – I: Do good to all men. God hath sufficient for the, and for all men.

Fare well.

Δ – *Gloria patri et filio et spiritui sancto. Sicut erat in principio, et nunc et semper: et in sæcula sæculorum.*

Amen.

Δ – Remember, that diverse other particulars, mowght have byn Noted of this dayes

Action: but these may suffice: And yet it is not to be forgotten, that as he sayd his name was Annael (with a dubble n) so he allso confessed him self to be the same Annaël which is *prepositus orbis veneris*: and allso Chief governor Generall of this period, as I have Noted in my boke of Famous and rich Discoveries.

Consider and
Remember.: }

That this Note, of the Action, (had with holy ANNAEL), is, of prince Befafes, (otherwise called Obelison) accountd as the Prolog of my first boke of mysticall exercises

Anno 1582. Novembris 20. — Vide post.

At Mortlak

In nomine Jesu CHRISTI. Amen.

Anno 1582.

Martii die. 10. hora 11 $\frac{1}{4}$ Ante Meridiem.

Saterday

△
Note: he
had two dayes
before made the
like demannde
and request unto
me: but he went
away unsatisfied,
for his comming
was to entrap
me, yf I had had
any dealing with

wicked spirits
as he confessed
often tymes after:
and that he was
set on, &c.

△ – One Mr. Edward Talbot cam* to my howse, and he being willing and desyrus to see or shew some thing in spirituall practise, wold have had me to have done some thing therein. And I truly excused myself therein: as not in the, vulgarly accownted Magik, neyther studied, or exercised: But confessed my self, long tyme to have byn desyrus to have help in my philosophicall studies throwgh the Cumpany and information of the blessed Angels of God. And there=uppon, I browght furth to him, my stone in the frame, (which was given me of a frende) and I sayd unto him, that I was credibly informed, that to it (after a sort) were answerable *Aliqui Angeli boni*: And allso that I was ones willed by a Skryer, to call for the good Angel Anchor, to appere in that stone to my owne sight. And therfore I desyred him to call him: and (yf he wold) Anachor and Anilos likewise, accownted good Angels, for I was not prepared thereunto. ¶c. He than settled him self to the Action: and on his knees att my desk (setting the stone before him) fell to prayer and entreaty ¶c. In the mean space, I, in my Oratory did pray, and make motion to god, and his good Creatures for the furduring of this Action. And within one quarter of an howre (or less) he had sight of one in the stone. but he still expected for two more: deeming this to be one of the three (namely Anchor Anachor Anilos). But I then cam to him, to the stone: And after some thanks to God, and Wellcome to the good Creature, used; I required to know his name. And he spake plainly, (to the hearing of E.T.) that his name is URIEL.

△ – Are you one of them (sayd I, John Dee) that are answerable, (uppon due observations performed) to this stone?

URIEL – I am.

△ – Are there any more besyde you?

UR – Michaël and Raphaël. But, *Michaël est princeps in operibus nostris.*

△ – ys my boke, of Soyga, of any excellency?

UR – *Liber ille, erat Adæ in Paradiso revelatus, per Angelos Dei bonos.*

△ – Will you give me any instructions, how I may read those Tables of Soyga?

UR – I can – But *solus Michaël illius libri est interpretator.*

△ – I was told, that after I could read that boke, I shold live but two yeres and a half.

UR – Thow shallt live an Hundred and od yeres.

△ – What may I, or must I do, to have the sight, and presence, of Michael, that blessed angel?

UR – *Præsentias nostras postulate et invoke, sinceritate et humilitate. Et Anchor, Anachor, et Anilos, non sunt in hunc Lapidem Invocandi.*

△ – Oh, my Great and long desyre hath byn to be hable to read those Tables of Soyga.

UR – *Hæc maximè respiciunt Michaëlem. Michaël est Angelus, qui illuminat gressus tuos. Et hæc revelantur in virtute et veritate non vi.*

△ – Is there any speciall tyme, or howre to be observed, to deale for the enjoying of Michael?

UR – *Omnis hora, est hora nobis.*

△ – After this, there appered △ in the stone a strange seale, or characterismus of this fashion ensuing:

△:
An illuding
spirit straight
way intruded
him self, and
this charac=
ter: as may
appere *Libri
Quinti Appendice*
where the
character is
described exactly.

* This was not
True Uriel:
as may appere
A^o 1583: May 5.

- Δ – What is the intente, or use of this?
- *UR – *Sigillum hoc in auro sculpendum, ad defensionem corporis, omni loco, tempore et occasione: et in pectus gestandum.*
- Δ – So we ceased, with thanks to god: and I mused much uppon this Action: and layd all up in mynde, and writing.

Δ – *Soli Deo Honor omnis, et gloria.*

Amen.

The same Saturday after none. *Hora. 5.*

- Δ – After that Mr. E.T. had called Uriel, and I was come to the stone and had used a short speche of thanks giving to God: I then required some instruction for the purpose of Soyga.
- UR – Peace. you must use Michaël.
- Δ – I know no meanes or order to use in the invoking of Michaël.
- UR – He is to be invocated by certayn of the psalmes of David, and prayers. The which psalmes, are nothing els, but a means unto the seat and Majesty of God: whereby you gather with your selves due powre, to apply your natures to the holy Angels. I mean the psalmes, commonly called the Seven psalmes. You must use pleasant savours: with hand and hart: whereby you shall allure him and wynn him (thorowgh Gods favour) to attayne unto the thing, you have long sowght for. There must be Conjunction of myndes in prayer, betwyxt you two, to God Continually.
- Yt is the wyll of God, that you shold, jointly, have the knowledge of his Angells to_gither.
- You had atteyned unto the sight of Michaël, but for the imperfection of Saul.
- Be of good Cumfort.
- Δ – The chayre cam into the stone againe: and I axed what it ment.
- UR – This is a seat of perfection: from the which, things shall be shewed unto the, which thou hast long desyred.
- Δ – Then was there a square Table browght into the stone: and I demanded, what that Table betokened.
- UR – A Myserie, not yet to be known. These two, shall remayn in the stone, to the sight of all undefyled creatures.

Note.
Δ in this time
there appered
in the stone,
a riche chayre:
and after a little
while, it was
out of sight.

*Erronice,
contra igno=
rantiam meum
vide post.

you must use a fowre square Table, two cubits square: Where uppon must be set *Sigillum Divinitatis Dei*, which is allready *perfected in a boke of thyne: Blessed be God, in all his Mysteries, and Holy in all his works. This seal must not be loked on, without great reverence and devotion. This seale is to be made of perfect wax. I mean, wax, which is clean purified: we have no respect of cullours. This seal must be 9 ynches in diameter: The rowndnes must be 27 ynches, and somewhat more. The Thicknes of it, must be of an ynche and half a quarter, and a figure of a crosse, must be on the back side of it, made thus:

The Table is to be made of swete wood: and to be of two Cubits high with 4 feete: with 4 of the former seales under the 4 feet.

Δ – The fashion of the 4 feet, standing uppon the foresayd rownd seales, was shewed so as the uttermost circle conteyning the letters, did seme to be clean *without the cumpas of the fete, equally rownd about the same fete. And these seales were shewed much lesser than the principall seal. Under the Table did seme to be layd red sylk, two yardes square. And over the seal, did seme likewise red sylk to lye fowrsquare: somewhat broader then the Table, hanging down with 4 knops or tassells at the 4 corners thereof.

Δ Note this point.

Uppon this uppermost red silk, did seme to be set the stone with the frame: right over, and uppon the principall seal: saving that the sayd Sylk was betwene the one and the other.

The Table was shewed to have on the fowre sides of it, *Characters and names, these, that are here in a schedule annexed, in 4 diverse rowes.

*Cave: quia
angelus tenebra=
rum se intrusit
hic ut libri
Quinti appendice
apparabit.

UR – The Characters and Words on the sides of the Square Table, are to be written with yellow, made of perfect oyle, used in the church.

Δ – What oyle is that

UR – of That oyle shalbe opened unto you. The oyle, is perfect prayers: of other oyle I have no respect.

We sanctifie, bycause we are holy: and you sanctify bycause of your holines.

Δ Note:
 * So is it evident
 who went abowt
 to hinder the
 truth before in
 the character,
 and in the bor=
 der of the Table,
 falsely cownter=
 feated &c as it
 also in the next
 action may
 appere.

Saul in dan=
 ger of being
 carried away
 quick.

UR – There is a spirit, named Lundrumguffa using you
 who seketh your destruction, in the hatred of men, in the hurt of
 thy goods. Discharge him to morrow with Brymstone.
 He haunteth thy howse, and seketh the destruction of thy dowghter.
 His pretence was to have maymed the in thy sholder the last night,
 and long ago. Yf thow do not dischardg him to morrow,
 he will hurt, both thy wife and thy dowghter.

He is here* now.

Give him a generall discharge from your familie and howse.

He will seke Sauls death, who is accursed.

Δ – I know no means, or art to do this by. For I did burn in flame
 of Brymstone, Maherion his name and Character, whan I fownd
 Saul privilie dealing with him (which manner of wicked dealing
 I had oft forbydden him) and yet he cam after, and wold have
 carryed Saul away quick: as Robert Hilton, George, and other
 of my howse can testify.

UR – The cursed will come to the cursed.

Δ – I beseeche you to discharge him: and to bynde him somewhere
 far of, as Raphael did (for Thobias sake) with the wycked
 spirit Asmodeus.

UR – But Thobias did his part. Art is vayne, in respect of
 God his powre. Brymstone is a mean.

Δ – Whan shall I do this?

UR – To morrow at the tyme of prayers.

Δ – *Gloria Patri et filio et Spiritui Sancto
 sicut, &c. Amen.*

1582 Martii 11

Sonday. a Meridie hora .3a. circiter.

Δ – Uriel being called by E.T. there appeared one, clothed with a
 long robe, of purple: all spanged with gold, and on his hed, a
 garland, or wreath of gold: his eyes sparkling: of whome I axed
 Whether the characters noted for the Table, wer perfect:

He answered,

They are perfect Δ*: There is no question.

Δ – Are you Uriel.

Than presently cam in one, and threw the brave spirit down by the
 sholders: and bet him mightly with a whip: and toke all his robes,
 and apparell of him: and then he remayned all heary and owggly:
 and styll the spirit was beaten of him, who cam in after him. And
 that spirit, which so bet him, sayed to the hearing of my skryer,
 Lo, thus are the wycked skourged.

Δ – Are you Uriel, who speaketh that?

Uri – I am he. Write down and mark this: for it is

Δ*
 Hereby may appere
 that this wycked
 spirit foysted in
 the shew of the
 fals characters
 and names before.

Note:
Lundrum=
guffa
skourged
spiritually.

worthy of the Noting.

This was thy persecutor Lundrumguffa. I browght him hither to let the see, how God hath punished thy enemy.

Lo, thus, hath God delt for the: Lo thus have I delt for the:

Thank God.

Δ – blessed be his holy name; and extolled, world with out ende.

E.T – he drew the wycked spirit away, by the leggs, and threw him into a great pitt, and washed his hands, as it were, with the sweat of his own hed: for he seamed to be all in a sweat.

Δ – Here uppon, my skryer saw Uriel go away: and he remayned out of sight a little while. Then he cam in agayn: and an other with him: and jointly these two said to gither, Glorifie God for ever. And than Uriel did stand behinde: and the other did set down in the chayre, with a sworde in his right hand: all his hed glystring like the sonne. The heare of his hed was long. He had wings: and all his lower parts seamed to be with feathers. He had a roab over his body: and a great light in his left hand. he sayd,

Michaël – We are blessed from the begynning: and blessed be the name of God for ever.

Δ – My skryer saw an innumerable Cumpany of Angels abowt him: And Uriel did lean on the square Table by.

He that sat in the chayre (whom we take to be Michaël) sayd
Than,

—— Go forward: God hath blessed the.

I will be thy Guyde.

Thow shalt atteyne unto thy seching.

The World begynnes with thy doings.

Prayse God.

The Angels under my powre, shall be at thy commanndement.

Lo, I will do thus much for the.

Lo, God will do thus much for the.

Thow shalt see me: and I will be seen of the.

And I will direct thy living and conversation.

Those that sowght thy life, are vanished away.

Put up thy pen.

Δ – So he departed.

Δ – *Gloria, Laus, honor, virtus et Imperium*

Deo immortalī, invisibili, et

Omnipotentī, in sēcūla sēcūlorum.

Amen.

Lundrum=
guffa.

Martii 14. Wensday. mane circa horam 9a.

- Δ – Being desirous to procede in this matter, by consent, we bent our selves to the Action. And after that [E T] had called Uriel and saw him, I cam to the desk from my oratorie. There did contynually appeare, the chayre and the Table. I than being affrayde that any other shold come into the stone, in stead of Uriel, did earnestly require the spirituall creature appearing, to shew who he was, and what was his name: At length he answered, and sayde to the hearing of E.T., Uriel is my name, with diverse called *Nariel.

* Agrippa hath so,
cap. 24, Lib. 3,
Occultae Philosophiae

Stay.

- Δ – Then he went away, for a while: and cam agayn, and sayd thus,
Ur. – The strength of God, is allwayes with the.
Dost thou know, what thou writest?

Δ -potius erat di-
cendus Michael:
Namen, Gabriel est
Praevalescentia
Dei: et ita, forti-
tudo quidem, sed
altioris gradus.

- Δ – In two senses, I may understand it: eyther that the good Angel ΔGabriel is allwayes with me, thowgh invisibly: or els, that the strength, and mighty hand of God, allwayes is my defense.
Ur – *Fortitudo Dei, tecum semper est.*

- Δ – He went away agayn, and cam agayn, following or wayting uppon an other: and before that other, was a man having his hed all covered with blak. Then he that cam so in the middle, did sit down in the chayre, and spake this worde following:

Mi – Note

- Δ – This was Michael, with his sword in his right hand. Then cam Uriel to the man (having his hed all hyd, as it were in a blak hode) and toke of that blak hode: and then lifted up the Table cloth. He looked under it, and put it down againe: and lifted it up again. The man stode still before Michael. Then Michaël rose; and toke of all the mans clothes, and left him, as it were, onely in his shirt. Then Uriel toke a little rownd Tablet, as it were, of the bignes of a sixpence, having two letters in it, thus: and gave it to Michaël. Uriel lifted up the Table cloth: and, from thence, seamed to take apparaile, and put on the man. It semed to be sylk: and very full of wrynckles, or plights. And the man kneeled, and held up his hands. Uriel toke like a lawrell bush, and set uppon the mans hed. And than the man kneeled before Michaël. Michaël toke the rownd thing, with the letters: and gave it the man to eat: and he did eat it.

Ur – Lo, things are covered.

- Δ – Then he covered the Table and pluckt the cloth over it; down to the grownd, on every side. The man rose up: And Michaël dubbed him on the hed with his sworde. Then the man stode up.

Then the man turned his face toward E.T. the skryer: and the man did resemble me (John Dee) in countenance. And then he turned to Michaël agayn.

Michael wrote upon the mans back, thus,

ANGELVS TVÆ PROFESSIONIS.

*vide Agrippam
de Triplici hominis
custode. Lib.3°. cap.22.*

Δ – Then E.T. asked me, yf there were such Angels of a mans Profession: and I answered yea; as in Δ Agrippa and other, is declared.

Mi – Leave your folly: Hold thy peace.

Have you not red, that they that cleave unto God, are made like unto him?

Δ – Yes, forsoth.

Mic – Thow camst hither to lern, and not to dispute.

Laudate Dominum in operibus suis.

Δ – The man kneled down, and so went out of sight.

*† vide Reuclinum
de Verbo Miri-
fico, de nomine
NA.*

Mi – He hath eaten strength against trubble: He hath eaten nothing: and in eating, he hath eaten all things. The name † NA, be prayesd in trubbles.

Δ – Now Michael thrust out his right arme, with the sword: and bad the skryer to loke. Then his sword did seame to cleave in two: and a great fyre, flamed out of it, vehemently. Then he toke a ring out of the flame of his sworde: and gave it, to Uriel: and sayd, thus:

Mic – The strength of God, is unspeakable. Prayesd be god for ever and ever.

Δ – Then Uriel did make cursy unto him.

Mi – After this sort, must thy ring be: Note it.

Δ – Then he rose, or disapeared, out of the chayre, and by and by, cam again, and sayde, as followeth.

Mi – I will reveale the this ring: which was never revealed since the death of Salomon: with whom I was present. I was present with him in strength, and mercy.

Lo, this it is. This is it, wherewith all Miracles, and divine works and wonders were wrowght by Salomon: This is it, which I have revealed unto the. This is it, which Philosophie dreameth of. This is it, which the Angels skarse know. This is it, and blessed be his Name: yea, his Name be blessed for ever.

Δ – Then he layd the Ring down upon the Table: and sayd, Note.

Δ – It shewed to be a Ring of Gold: with a seale graved in it: and had a rownd thing in the myddle of the seale and a thing like an V, throwgh the top of the circle: and an L, in the bottome: and a barr — cleane throwgh it: And had these fowre letters in it, P E L E.

*vide Reuclini
librum de verbo
mirifico de
Nomine PELE.*

After that, he threw the ring on the borde, or Table: and it semed

to fall through the Table and then he sayde, thus,
Mi – So shall it do, at thy commandment.

Without this, thou shalt do nothing.

The Use of the Ring.

Blessed be his name, that compasseth all things:
Wonders are in him, and his Name is WONDERFULL:
His Name worketh wonders from generation, to generation.

Δ – Then he went away: and came in again by and by.

Mi – Note.

Δ – Then he brought in the Seale, which he shewed the other
day: and opened his sword, and bad the skryer, reade, and
he red, EMETH.

*De sigillo Emeth,
vide Reuclini Artem
Cabalisticam, lib.3. et
Agrippam lib. 3.
Cap.11.*

Then the sword closed up again: and he sayde,
Mi – This I do open unto the, because thou marvellest
at SIGILLUM DEI. This is the Name of the Seale:
which be blessed for ever. This is the seale self. This is
Holy: This is pure: This is for ever. Amen.

Δ – Then the seale vanished away. And I sayd to my frende
(the skryer) In dede, this other day, I considered diverse
fashions of the seal: and I found them much differing, one
from an other: and therefore I had need to know, which of them
I shall imitate: or how to make one perfect of them all.

Mi – Downt not for the making of it: for God hath perfected
all things. Ask not the cause of my absence, nor of my
apparel: for that Mysterie, is known to God. I have no
cloathing, as thou thy self Shalt see. I am a spirit of
Truth, and Vertue. Yea you shall see me in Powre,
and I will visit you in HOPE.

Bless you the Lorde, and follow his wayes, for ever.

Δ – Then he went away: and Uriel followed him.

And then I sayde to my skryer: It were good, we had ever
some watch word, when we should not Loke for any more matters
at their hands, every tyme of their visitting of us.
Whereupon, (unlooked for, of us,) he spake again.

Mi – We lead tyme, Tyme leadeth not us:

Put up thy pen.

The Name of God, be blessed for ever.

Δ – Then they lifted up their hands to heavenward (which heaven,
appeared also in the stone) and turned toward us, and sayd,

Valete.:

Δ – So they departed: and at their going, the chayr, and the Table,
in the stone, did seme to shake.

Δ – *Soli Deo omnis honor*

Laus et Gloria .:

Amen.

Martii 15. Thursday. Hora 1 $\frac{1}{4}$ a meridie.

Δ – After [E T] his calling into the stone, appeared a tall man, with a sceptre (very great) of gold, glittering. His body all red: and out of his hed, did shote out beames of light, like the sonne beames.

Δ – I being desirous, to know who he was, and his name, I requested him earnestly thereto. But he answered, as followeth,
Invoke nomen Domini, et agnoscetis eum.

Δ – Then I prayed the psalme, *Deus misereatur nostri, et benedicat nobis &c.* After that, he sayd,
I am mighty.

Δ – Bycause he delayed to declare his name, [E T] the skryer did require him, in the name of God the father, Jesus Christ his sonne, and of the holy ghost, to express his name: and he answered in speche.
So I will by and by.

Δ – Then he seamed to take from his hed little bright sparcks, like little candells endes: and to stick them abowt the chayre: and he went rownd abowt the chayre: and than he spake, as followeth,
I am mighty, and working wonders: I am SALAMIAN.

SALAMIAN

Δ - of Salamian you may rede, in the call, *Diei Dominicae in Elementis Magicis Petri de Abano*, there called Salamia.

I rule in the hevens, and beare sway uppon erth in his name, who be blessed for ever. Thow doost dowt at me. I am the servant of God, in his light: I serve him. I say, I serve him, with feare and reverence. My name is SALAMIAN: Mighty in the Sonne, worker of wordly actions, as well internall, as externall: known unto God: whose name I know, and bless for ever.

Δ – Then appeared a big flame of fyre by him in the ayre.

Sal – Thow knowest not, or thow wilt not know, that Mamon, with his servants, are present abowt the: whose presence doth hinder the presence of the vertues Adonay our comming. Blessed be God, in the highest.
Amen.

Δ – He toke the forsaide flame of fyre, and flung it up unto the heaven ward.

Mamon. Sal – Mamon is a king whome God hateth: whose sect, contynually tempt, provoke and stir up wickednes, against the Lord, and against his annoynted. But he dyeth: blessed be God for ever. Drive him away.

Δ – It is incomparably more easy for you to do. And as for my parte, I fele neyther in body, nor sowle, any token of his presence or working. Thereuppon he caused the whole chamber (which we were in) to appere very playnely in the stone: and so there shewed a great cumpany of wycked spirits to be in the chamber: and among them, one, most horrible and grisely thretting, and approaching to our heds: and skorning and gnashing at us.

Sala – God determines his mysteries, by Arte and vertue.

Δ – Then he willed me very egerly, to drive them away. And I prayed fervently. And there seamed One to come into the stone, which had very long armes: and he drave them away courragiously: And so they were driven away.

After that presently, cam one into the stone, all white.

Salamian reached this white one a Cup.

The white man held up the Cup: and sayd, as followeth,

——— Lo, this is my name.

Raphaël

God shall bless you. Fear not: your faithfullness provoketh me to tell my name, and this it is: (putting furth the Cup again) for, I am called Medicina Dei. I will shew the, and I will shew you, the Angel of

your Direction, which is called OCH.

Δ – This name he spake: he shewed it also on the Table (before him) written.

Raph – He is mighty in the sonne beames: He shall profit the hereafter.

Δ – Then cam in an other, and sat down in the chayre: and he sayde, as followeth,

The strength of God liveth: and God raigneth for ever.

I am Fortitudo Dei.

Δ – Why, then, you are Gabriel: and I toke you hitherto to be Michaël. How shall I then amend my boke, in respect of your name, allwayes before, written Michaël?

[For. Dei] – What thow hast written, that hast thow written: and it is true.

Write down this name. POLIPOS.

Dost thow understand it?

Δ – No, God knoweth.

[For. Dei] – When that day commeth, I will speak with the: yf thow observe that which I have *commannded the.

As truely, as I was with SALOMON, so truely will I be with the.

Δ – Then cam in an other, whom we toke to be Uriel: for he went also, as he was wont, and leaned at the Table.

[For. Dei] – Search for wisdom and learning, and the lord will deliver it unto you.

Δ – I wold to god, I knew your name truely, or what peculier letter I might set for you, to Note your words and Actions by.

[For. Dei] – Name I have none, but by my office.

SALAMIAN cam not hither, but by me.

He is a mighty Prince, governing the heavens, under my powre.

This is sufficient for thy Instruction.

I was with Salomon, in all his works and wonders:

and so was this, whome God had appointed unto him.

The Divines know his name: and he is not hidden from the face of the erth: His name is written in the boke which lyeth in the wyndow.

Δ – Do you mean Agrippa his boke? And is it there expressed by the name SALAMIAN?

[For. Dei] – I have sayde.

Δ – What order will you appoint unto us two, in respect of our two beings to gither? My frende here, may have other intents and purposes of his affayres, then will serve me, for his ayde having in these Actions.

[For. Dei] – Joyne in prayers. For God hath blessed you: Downt not.

Consider these mysteries.

Δ – Then they in the stone used talk to gither: but not well to be discerned of the eare of [E.T]

At length [F.D] talked very much, and spedily to [E.T] and disclosed unto him (which he expressed not to me, at the stone but afterward) all the manner of the practise, and the circumstance about the Action intended, with the Gold lamin, the ring, the Seales &c. And after I had spoken somewhat, in requesting him, to shew me the manner, How I shold artificially prepare every thing spoken of, he sayd,

[F.D]...

Δ*
Perchance he
meaneth the
counsaille of
Annael: before
specified.

Δ - It is in *Elementis
Magicis Petri de Abano*
printed with *Clavis
Agrippae*, which
was in my oratorie
almost under my
wyndow.

[The top third of a page is missing here.]

Write — God will be revenged upon Saul: for he hath abused his names in his Creatures.
He hath sinned agaynst kinde. His punishment is great: and so I ende.

[...] Blessed be God, who revealeth all Mysteries, &c.
I am strength in nede.

And Lo, here is Medicine for the sore.

We bless the Lord: We govern the erth, by the societie of Gabriel:
whose powre, is with us: but he not here. &c.

Use Patience.

Ur – I lived with Esdras: I lived in him, in the lord, who liveth
for ever.

Raph – I lived with Tobie: Tobie the yonger.

Δ – This was the white creature, that spake this.

[F.D] – We live in the Lorde: who be prayed for ever.

Δ – I stode silent a good while.

[F.D] – What wilt thou?

Δ – I did attend, what you wold say.

[F.D] – I have sayd.

Δ – I have byn long at this tyme, in my dealing with you. I trust,
I do not offend you therewith. But, for my parte, I could finde in
my hart to contynue whole dayes and nights in this manner of doing: even
tyll my body shold be ready to synk down for wearines, before I wold
give over. But I feare, I have caused wearines to my frende here.

[F.D] – In vertue is no wearines.

Δ – Now he stode up, out of his chayr: and he, and they all, jointly
blessed us, stretching theyr hands toward us, Crossingly. And so
they went away. The Table and the chayre remayned
and the glyttring sparckles, or drops of streaming little
lightes were of the chayre immediately.

Δ – Glorie, thanks, and honor
be unto the Almighty Trinitie.

Amen.

[Elias Ashmole's Note:]

Mysteriorum Liber Primus, tooke

followes *Mysteriorum*⁺ *Liber*
secundus, but the begining thereof
is utterly perished.

⁺So it appears to be by divers
Quotations in the following Books.

Liber Primus – Notes and Translations

(Notes and translations copyright © 1999 Raymond and Susan Drewry. Page numbers refer to Clay Holden's transcription; taking Page 1 as the first page of Dee's text after the Anno 1581:1582 Mysteriorum Liber Primus title page.)

Page 1

Praeter alias meas extemporaneas preces, et ejaculationes ad Deum vehementiores: Haec una, maxime usitata fuit
Oratio mea Matutina, Vespertinaque: pro Sapientia.

Among my other extemporaneous prayers and most fervent outpourings to God: this one was most customarily used. My Morning and Evening Prayer: for wisdom.

In nomine Dei Patris, Dei Filii, Dei Spiritus Sancti Amen
In the name of God the Father, God the Son and God the Holy Ghost. Amen

“In Nomine Dei Patris...”

Dee implies (here and elsewhere) that he started all his Actions with the prayers on this page. This particular phrase is the standard Western Christian formula for marking the ritual start of an Office, Service, or other ceremony or rite. It is also used within a service to mark a change of focus or as a section boundary. As an example of the former, it is used at the start of the Mass, and after it is said the priest is instructed to ignore anything else going on in the church, even the elevation of the Host at another Mass. As an example of the latter, it is used in the Anglican rite to introduce the sermon or homily.

Omnipotens, Sempiterna, vere, et vive Deus, in adiutorium meum intende: Domine Dominantium, Rex Regum, Jeovah Zebaoth, ad adiuvandum me festina:
Gloria Deo, Patri, Filio, et spiritui Sancto: Sicut erat in principio, et nunc, et semper et in saecula saeculorum: Amen.

Almighty, Everlasting, True and Living God, make haste to deliver me. Lord of Lords, King of Kings Jehovah Zebaoth, make haste to help me.
Glory be to God, Father, Son and Holy Ghost: As it was in the beginning, is now and forever, world without end: Amen.

Translator's Note: 'semper et in saecula saeculorum' is generally given in English translations as "forever, world without end" or "for ever and ever." Literally, it is "always, unto an Age of Ages", and is done in imitation of a Hebrew idiom.

“Omnipotens...Amen”

Christian communal life (monastic and secular) was, until the Reformation, built around the Daily (or Divine) Office, a series of eight liturgical services centered on the recitation of psalms and prayers. It was also common for individuals to structure their private devotions around parts of the Office.

Almost every service of the Daily Office opened with the psalm verse "Deus ad adiuvandum me festina", followed by the lesser doxology. (The exception was Matins, the first service of the day,

where “Deus ad adiuvandum” usually came as the second element.) See the notes below for details of the psalm and the doxology.

The elaboration of the simple biblical “God” to a longer list of names and attributes is a cabbalistic practice, detailed by Reuchlin and Agrippa. See, for example, the works cited in the discussions of PELE and NA later in Liber Primus.

The daily office ended with a simple “Benedicamus Domino” (“Let us bless the Lord.”) Every Action in Liber Primus is closed with a more elaborate blessing (e.g. the doxology, *Soli Deo honor omnis*, “Glorie, thanks, and honor be unto the Almighty Trinitie”, etc.)

Thus, Dee not only marked out his ritual time and space using the same formula a religious service would use (see note on “In nomine” above), but also began the Actions with the standard introductory formula from the daily cycle of prayer and devotion, and ended each one with an elaboration of the traditional closing.

“Ad adiuvandum me festina” – Ps 69:2 (Vulgate), Ps 70:1 (English Bibles)

Vulgate ex Septuaginta: Deus in adiutorium meum intende Domine ad adiuvandum me festina;

Vulgate ex Hebraeo: Deus ut liberes me, Domine ut auxiliieris mihi festina

BCP: Haste thee, O God, to deliver me: make haste to helpe me, O Lord.

Geneva Bible: O god, haste thee to deliver me: make haste to helpe me, O Lord.

KJV: Make haste, O god, to deliver me; make haste to help me O LORD

“Gloria...”

This is the short doxology, generally used after psalms, hymns, and canticles. Generally, though, it begins “Gloria Patri” rather than “Gloria Deo, Patri.”

Recte sapere, et intelligere doceto me, (o rerum omnium Creator,) Nam Sapientia tua, totum est, quod volo: Da verbum tuum in ore meo, (o rerum omnium Creator,) et sapientiam tuam in corde meo fige.

Teach me to know aright and to understand (O Creator of all things) for thy wisdom is all that I desire. Give thy word in my mouth (O Creator of all things) and fix thy wisdom in my heart.

“Fige”

Note that *figo* is also the word used for driving nails.

O Domine Jesu Christe (qui sapientia vera es, aeterni et Omnipotentis tui Patri) humilime tuam oro Divinam Majestatem, expeditum mihi ut mittere digneris, alicuius pii, sapientis expertiquie, Philosophi auxilium, ad illa plenissime intelligenda perficiendaque, quae maximi valoris erunt ad tuam laudem et gloriam amplificandam: Et si Mortalis nullus iam in terris vivat, qui ad hoc munus aptus sit: vel qui ex aeterna tua providentia, ad istud mihi praestandum beneficium assignatus fuerit: Tunc equidem humilime, ardentissime et constanter a tua Divina Majestate requiro, ut ad me de caelis mittere digneris bonos tuos Spirituales Ministros, Angelosque, videlicet Michaellem, Gabrielem, Raphaelem ac Urielem: et (ex Divino tuo favore) quoscunque, alios, veros, fidelesque tuos Angelos, qui me plene et perfecte informant et instruant, in cognitione, intelligentiaque

vera et exacta, Arcanorum et Magnalium tuorum (Creaturs omnes tuas, illarumque naturas, proprietates, et optimos usus, concernentium) et nobis Mortalibus scitu necessariorum; ad tui nominis laudem, honorem, et gloriam; et ad solidam meam, aliorumque (per me,) plurimorum tuorum fidelium consolationem: et ad Inimicorum tuorum confusionem, et subversionem. Amen.

O Lord Jesus Christ (who art the true wisdom of thine eternal and almighty Father), I most humbly beseech thy Divine Majesty, that thou deignest to send me the speedy aid of some pious, wise and expert philosopher for the complete understanding and accomplishing of that which will be of the greatest worth for the increase of thy praise and glory: And if there should be no Mortal now living on earth who might be fitting for this gift, or who by thy divine providence might be assigned to the fulfillment of this my prayer, then equally most humbly, most ardently and most constantly, I request from thy Divine Majesty that thou deignest to send to me from the heavens thy good Spiritual Ministers and Angels, which is to say, Michael, Gabriel, Raphael and Uriel: and (out of thy Divine favor) whatever other true and faithful of thy Angels, who might completely and perfectly inform and instruct in the knowledge and in the true and exact intelligence of thy Secrets and Miracles (concerning all thy Creatures and their natures, properties and best uses) the understanding of which is necessary to us Mortals; to the praise, honor and glory of thy name and to my thorough consolation and (through me) that of many others of thy faithful, and to the confusion and subversion of thine enemies. Amen.

“Spirituales”

“Spirituales” has senses of form (as in spiritual beings – i.e. Angels) and function (as in ‘Spiritual Father’, when applied to a priest.)

Fiat Jeovah Zebaoth: Fiat Adonay,
Fiat Elohim. O beata, et superbenedicta Omnipotens
Trinitas, Concedas mihi (Joanni Dee) petitionem hanc, modo tali, qui tibi maxime placebit.
Amen

Let it be so, Jehovah Zebaoth: Let it be so Adonai, let it be so Elohim. Oh Holy and Surpassingly Blessed Almighty Trinity, May you grant me (John Dee) this petition in the way that is most pleasing to you. Amen.

“Fiat”

“Let it be so” is one translation of “Fiat” which may have many translations. This one was chosen for its resemblance to “Fiat Lux” commonly translated “Let there be light”. Alternative translations for “Fiat” are “May it be so” and “Make it so.”

Ab anno 1579. hoc fere modo: Latine, vel Anglice; (ast circa annum 1569 alio et peculiari, particulari modo: interdum pro Raphaele, interdum pro Michaelae) ad Deum

preces fundere: mihi gratissimum fuit:
Mirabilem in me faciat Deus Misericordiam suam.
Amen.

From the year 1579, it was done in this way: in Latin and in English; (but around the year 1569 in another and peculiar, particular way: sometimes for Raphael, sometimes for Michael. To pour prayers out to God: this was most pleasing to me. May God bring forth his marvelous mercy in me. Amen.

John Dee His Note (Page 2)

Angelus sive Intelligentia, nunc toti mundo praedominans
The Angel or Intelligence now ruling over the whole world.

“Intelligentia”

In a theological sense *intelligentia* is a ‘a non-corporeal Being or Intelligence’, and is commonly used for angels and spiritual beings. Agrippa, Ficino, and Aquinas use it in this sense. ‘Intelligentia’ can also be a ‘rational activity, rational comprehension’, in a more philosophical than theological way (also used by Aquinas and various neoplatonizing Christians.) Here, it is easy to opt for the former meaning, though in Liber Tertius the choice is not so clear.

“Annael praedominans”

Oddly enough, Trithemius in his De Septem Secundeis (also called Chronologia Mystica) says that Gabriel is the Angel currently (in 1582) presiding over the world. Annael is problematic in other ways as well. (See below.)

Etymologia: {Gratiosa/Afflicta} misericors Dei

Etymology: The Gracious/Afflicted Merciful ... of God.

Translator’s Note: This is a little problematic, since there is no noun here. (The four other Angels in the Note are all described with nouns.) It could be, for instance, the “merciful nature” or “merciful things” of God. “Gratiosa/afflicta” can be explained in Christian terms, in which God’s mercy is both gracious (in many senses of the word) and suffering (because of the Passion and Death of Christ.)

4 Angeli praesidentes 4 Cardinibus Caeli: ut Agrippa notat in scala Quarternarii.

4 Angels presiding over the 4 cardinal points of Heaven, as Agrippa notes in his scale of fours.

“scala Quarternarii”

Note that this reads “scale of fours”, not “scale of four”. This is translated “The Scale of the Number of Four” in James Freake’s edition of 1651. The table can be found in Agrippa, De Occulta Philosophia, II.7

Etymologiae --

Etymologies --

Fortitudo Dei

The Strength of God

Praevalescentia -- sive praepotentia -- sive Fortitudo Praevalesecens -- Dei

The growing strong -- or the great power -- or the Prevailing Strength -- of God

Medicina Dei

The Medicine of God

Lux Dei

The Light of God

Anna, et Annah, obsecrantis, et confitentis particula est. Hac ratione, non absurde innuere videtur, Orantem et confitentem Deum.

Anna, and Annah, is a particle of one beseeching or acknowledging. By this reason, it is seen, not absurdly, to signify praying to and acknowledging God.

Translator's Note: "Confiteor" is more commonly translated "confess", as in "confess the strength of Christ crucified". "Acknowledge" was chosen instead as it might be less ambiguous to a modern reader.

"ratione"

For expanding "roe" to "ratione", see Dizionario di Abbreviature latine ed italiane. Other editors have taken the text as "coe", which has no satisfactory expansion.

First Page of text after prayer (Page 3)

Ad Deum Omnipotentem Protestatio fidelis:

ad pertetuum rei memoriam Anno 1582

A faithful declaration to Almighty God for the perpetual memory of the event(s) in the year 1582.

Translator's Note: In more modern English, this might read "I swear to Almighty God that this is an accurate account of what happened in 1582". Also, the phrase "Protestatio fidelis" might make one think of Dee as a faithful Protestant, but this is a mere hint or interpretation and not a literal rendering.

Si quis autem vestrum indiget sapientia, postulet a Deo etc.

For if any of you is in need of wisdom, let him ask of God, etc.

"Si quis..." – James 1:5

The text in the microfilm of Sloane 3188 may have a dot over the final "a" or it may not. If it does, this would then read "sapientiam", which is also grammatically correct, and the reading in the Vulgate.

Vulgate: si quis autem vestrum indiget sapientiam postulet a Deo qui dat omnibus affluenter et non inproperat et dabitur ei.

KJV: If any of you lack wisdom, let him ask of God, that giveth to all *men* liberally, and upbraideth not; and it shall be given him.

Geneva Bible: If any of you lacke wisdom, let him aske of God, which giveth to all men liberally, and reprocheth no man, and it shall be given him.

Mittas lucem tuam et veritatem tuam, que me ducant etc.

Send forth thy light and thy truth, which may lead me, etc.

“Mittas lucem...” Psalm 42:3 (Vulgate), Psalm 43:3 (English Bibles)

Though this echoes Psalm 42:3 in the Vulgate (Ps 43:3 in the English Bibles and Psalter), it is not an exact quotation.

Vulgate ex Septuaginta: *emitte lucem tuam et veritatem tuam ipsa me deduxerunt et adduxerunt in montem sanctum tuum et in tabernacula tua*

Vulgate ex Hebraeo: *mitte lucem tuam et veritatem tuam ipsae ducent me et introducent ad montem sanctum tuum et ad tabernaculum tuum*

BCP: Oh sende out thy light and thy trueth, that they may leade me: and bring me unto thy holy hill, and to thy dwelling.

Geneva Bible: Sende thy light and thy trueth: let them leade me: let then bring me unto thine holy Mountaine and to thy Tabernacles.

KJV: O send out thy light and thy truth: let the lead me; let them bring me unto thy holy hill, and to thy tabernacle.

Recte Sapere et Intelligere doceto me, Nam sapientia tua totum est quod volo, etc.

Teach me to know well and to understand for thy wisdom is all that I desire, etc..

Da verbum tuum in ore meo, et sapientiam tuam in corde meo fige, etc.

Give thy word in my mouth and fix thy wisdom in my heart.

Translator's Note: "Give thy word in my mouth, and thy meditation in my heart" is used by some traditionally-minded Episcopalian and Anglican priests before officiating at Holy Communion.

Page 4

Castra metatur Angelus Domini, in Circuitu timentium eum,...

The Angel of the Lord measures out his camp, encircling those that fear him,

“Castra metatur” – Psalm 33:8 (Vulgate); Psalm 34:7 (English)

Ex Septuaginta: *vallabit angelus Domini in circuitu timentium eum et eripeit eos*

Ex Hebraeo: *circumdat angelus Domini in gyro timentes eum et eruet eos.*

BCP: The Angel of the Lord tarieth round about them that feare him: and delivereth them.

KJV: The angel of the LORD encampeth round about them that fear him, and delivereth them.

Geneva Bible: The Angel of the Lord pitcheth round about them, that feare him, and deliuereth them.

Dee's version is slightly different from either of these. "Metatur" has the sense of surveying or measuring out an area, unlike either 'circumdat' or 'vallabit.' The more precise word is consonant with the angelically directed mathematical construction and subdivision of the *Sigillum Aemeth* in the second book. It could also be that Dee the mathematician found the surveying term more congenial than the less technical wordings in the Vulgate.

De mirabili potestate Artis et Naturae.

Concerning the miraculous power of Art and Nature.

Facilius (sine comparatione) a Deo impetrandum foret, vel a bonis spiritibus, quicquid homini utile reputare etc.

Whatever is considered useful to man is more easily (immeasurably so) entreated from God, or from good spirits, etc.

“Facilius....”

The Bacon work is variously titled Epistola Fratris Rogerii Baconis de Secretis Operibus Artis et Naturae, et de Nullitate Magiae or Epistola Rogerii Bacon de Potestate Artis et Naturae. Dee gives yet a third notion of the title. (I have picked and chosen the manuscript variants that most closely match Dee’s text. One of Dee’s copies seems to have embodied a state of the text not otherwise known – see Roberts and Watson, p. 62, and their notes on catalog numbers D4 and DM163. One wonders whether Dee’s text was lacking *de Nullitate Magiae* -- “on the Nullity of Magic”, or whether he suppressed the thought.)

Et adhuc erratur, quando per invocationes, et deprecationes, et sacrificia nituntur homines eos placare et adducere pro utilitate vocantium; facilius enim sine comparatione a Deo impetrandum foret, vel a bonis spiritibus, quicquid homini debet utile reputare.

And still it is mistaken, when men strive, through invocations and prayers and sacrifices, to please and persuade them for the benefit of the callers; for it is incomparably easier to obtain from God, or from good spirits, anything which ought to be deemed useful for man.

Whitby (p 202-23) cites a 1659 English translation Frier Bacon his Discovery of the Miracles of Nature, and Magick, about which he notes “This edition bears the notice on the title-page that it has been ‘faithfully translated out of Dr. Dee’s own copy, by T.M.’” The translation could just as well have been made out of the Froben edition of 1618, which also claims to be taken from Dee’s copy – see Roberts and Watson above.

without all question the way is incomparable more easie to obtain any thing, that is truly good for men, of God, or good angels, then of wicked Spirits” (pp.3-4)

Numquid non est Deus in Israel, ut eatis ad consulendum Beelzebub deum Accaron.

Reg. 4 cap. 1

Is it not because there is not a God in Israel, that you go to consult Beelzebub, the god of Accaron? II Kings , 1:3

“numquid...” – IV Malachim 1:3 (Vulgate); II Kings 1:3 (KJV, Geneva)

Vulgate: numquid non est Deus in Israhel ut eatis ad consulendum Beelzebub deum Accaron

KJV: Is it not because there is not a God in Israel, that ye go to enquire of Baal-zebub the god of Ekron?

Geneva Bible: Is it not because there is no God in Israel, that ye goe to enquire of Baal-zebub the god of Ekron?

Dee is just adding biblical support to the Bacon text – the children of Israel only consult a false god because they no longer know their own God.

Various editions of the Vulgate call the book of Kings ‘Malachim’ (borrowed from the Hebrew) or ‘Regum’ (more strictly Latin.)

Page 5

Anno 1581 Decembris 22. Mane

1581, December 22. In the morning.

In Nomine Jesu Christi, Quis tu es?

In the name of Jesus Christ, who are you?

Potestas omnis, in me sita est.

All power is centered in me.

Quae?
Which?

Bona, et mala.
Good, and Evil.

“Bona, et mala”
Genesis 3:5
Vulgate: et eritis sicut dii scientes bonum et malum
Geneva Bible, KJV: and ye shall be as gods, knowing good and evil

de Thesauro abscondito:
concerning the hidden Treasure:

Ne perturbes: Nam hae sunt Nugae.
Be not troubled: for these are trifles.

Ubi est potestas tua?
Where is your power?

Cur quaeris de postestate aliqua mea?
Why do you inquire of any power of mine?

Cur? Signifi, non mihi placet.
Why? Show it, I am not pleased.

“Cur? Signifi...”
By attempting to turn divert Dee’s questions back on to Dee himself, and by challenging Dee’s authority, Annael is conforming to the standard recorded behavior of summoned beings from classical times through to the 19th century. Dee does not succumb to the diversion, or give in to the threats.

An bonus aliquis Angelus, assignatus est huic speculo?
Is some good Angel assigned to this mirror?

Etiam.
Even so.

Quis?
Who?

Bonus ne ille Angelus, de quo in scripturis fit mentio
Is it not that Good Angel of whom mention is made in the scriptures?

“in scripturis fit mentio”

There are many scriptural references to Michael the Archangel , e.g. Jude 1:9 and Rev. 12:7 . The Michael referred to in the Book of Daniel 10:13, 10:21 and 12:1 is also probably the Archangel, though he is referred to only as a “great prince” (KJV) or “unus de principibus primis” (Vulgate.) See following note on “princeps.”

Maxime.

Most Certainly.

Fieri ne potest, quod ego eundem videam, et cum illo agam?

Can it be that I might see that one and deal with him?

“agam”

"Do" or "have doing" or "traffic" are all possible translations for “agam.” Dee uses “deal” to describe his actions with spirits in other places, e.g. “I have byn long at this time, in my dealing with you” at the end of the last Action in Liber Primus.

Ita.

Yes

Quid per hoc, significare velis?

What do you wish to signify through this?

Alterius Angeli character est.

It is the character of another Angel.

Cur hic, et nunc ostendis?

Why do you show this here and now?

Causam ob magnam.

For a great purpose.

Page 6

“Pray contynually”

I Thessalonians V:17

Gloria patri et filio et spiritui sancto, sicut erat in principio et nunc et semper: et in saecula saeculorum. Amen

Glory be to the father and to the son and to the holy ghost as it was in the beginning, is now and forever world without end. Amen

“Gloria patri...”

This is exactly the lesser doxology, without the extra *Deo* between *Gloria* and *patri*. See the note on the introduction to the opening prayer.

Annael....praepositus orbis veneris

Annael.....in charge over the sphere of Venus

Translator’s Note: “Praepositus” is literally ‘placed over’ or ‘set over’, but can also mean a chief or commander. In classical Latin, it is used for the governor of a province.

Annael

See Trithemius, De Septem Secundeis §2.

In Agrippa, De Occulta Philosophia, this Angel is named Haniel. (See for instance the tables in II.10 and II.12, and III.10 'Of Divine Emanations'.)

Annael/Haniel/Anael is problematic in both primary and secondary sources. The attribution to Venus is constant in Agrippa, and seems likely in Picatrix III.ix.23, but the spelling, derivation, and meaning of the name seem obscure. A Dictionary of Angels claims that Annael and Haniel are synonymous, but gives very different descriptions under the two names. See also the difficulties with the etymology given in "John Dee His Note" above.

Anno 1582 Novembris 20. -- Vide post

Page 7

In nomine Jesu Christi Amen

In the name of Jesus Christ Amen

Marti die .10. hora 11 ¼ Ante Meridiem

In the year 1582 the 10th day of March, 11:15 am.

Aliqui Angeli boni

Some good Angels

Michael est princeps in operibus nostris

Michael is first in our works

Translator's Note: "Princeps" is a heavily loaded word -- "first (in time or in precedence)", "pre-eminent", "leader", "originator", "prince", are all possible renderings.

"Soyga"

Could be seen as 'ἅγιος (Greek for "holy") backwards.

"my boke, of Soyga"

Dee's Book of Soyga is probably Sloane 8, with the inscription "Aldaraia, sive Soyga vocor"; this *incipit* matches Ashmole's description of Dee's book. It contains astrology and demonology; the 'tables' which so interested Dee are algorithmically generated, and of unknown use. They could be cryptographic, for instance, or for use in generating magical apparatus or rites. Please see Jim Reeds' paper for details.

Ur: Liber ille, erat Adae in Paradiso revelatus per Angelos Dei bonos.

That book was revealed to Adam in paradise by the good Angels of God.

Ur. ...solus Michael illius libri est interpretator.

Only Michael is the interpreter of that book.

Ur. Praesentias nostras postulate et invoke, sinceritate et humilitate. Et Anchor, Anachor, et Anilos, non sunt in hunc Lapidem Invocandi

Ask and invoke our presences with sincerity and humility. And Anchor, Anachor, and Anilos are not to be invoked into this stone.

Ur. Haec maxime respiciunt Michaellem. Michael est Angelus,
qui illuminat gressus tuos. Et haec revelantur in virtute et veritate non vi.

These things most of all are the concern of Michael. Michael is the Angel who illuminates your steps. And these things are revealed in virtue and truth, not force.

Translator's Note: Here *vis* is "force", to avoid confusion with *fortitudo* ("strength.")

Ur. Omnis hora, est hora nobis.
Every hour is our hour.

March 14 Wednesday, in the morning about the 9th hour.

(in margin) Agrippa hath so, cap. 24, Lib. 3, Occultae Philosophiae

(in margin) Agrippa has so, in chapter 24, Book 3, of The Occult Philosophy

“Nariel”

Agrippa, in De Occ Phil III.24 gives a long compilation of things (mansions of the moon, signs of the zodiac, ages of the world, planets, etc) and the angels that preside over them. In particular, Noriel (qui ab aliis Uriel dicitur) super australem.

Noriel (by others called Uriel) over the south (i.e. wind and quarter.)

Fortitudo Dei, tecum semper est.

The strength of God is always with you.

(In margin) potius erat dicendum Michael: nam Gabriel est Praevalescentia Dei: et ita, fortitudo quidem, sed altioris gradus

Perhaps Michael should have been said: for Gabriel is the prevailing of God: and thus, the same strength, but of a higher grade.

Page 13

ANGELVS TVAE PROFESSIONIS.

The Angel of your profession.

Translator's Note: "Professio" is the technical term for a declaration of a vocation, e.g. a profession of faith, as when one takes holy orders. See note on "de Triplici hominis custode" below.

(In margin) vide Agrippam de Triplici hominis custode, Lib 3, cap 22

see Agrippa "On the Three-fold Guardian of Man", Book 3, Chapter 22

"de Triplici hominis custode"

This is the title of Agrippa, De Occulta Philosophia III.22, which begins

Triplex unicuique homini demon bonus est proprius custos: unus quidem sacer, alter geniturae, tertius professionis.

For every man there is a threefold good spirit as a proper keeper: one holy, another of the nativity, the third of profession.

The first spirit is similar to the concept of "guardian angel", the second spirit is like the Classical concept of "Genius" or a person's innate (and astrologically influenced) spirit or potential, and the third is the spirit of one's profession, path, etc. There is happiness when the second and third are in agreement, and unhappiness when they are not.

Book III, chapter 23 of Ficino's De Vita Libri Tres is about making Genius and Profession agree. Dee owned a copy of this work.

Laudate Dominum in operibus suis.

Praise the Lord in his works.

"Laudate..." – Sirach 39: 19 (Vulgate); Ecclesiasticus 39:14 (English)

Vulgate: florete flores quasi liliū date odorem et frondete in gratiam et conlaudate canticum et benedicite Dominum in operibus suis

KJV apocrypha: And give ye a sweet savour as frankincense, and flourish as a lily, send forth a smell, and sing a song of praise, bless the Lord in all his works

Geneva: And give ye a sweete smel as incense, and bring forth flowres as the lillie: give a smel, and sing a song of praise: blesse the Lorde in all his workes.

(In margin) vide Reuchlinum de Verbo Mirifico, de nomine NA

see Reuchlin "On the Marvellous Word", concerning the name NA

"NA"

Reuchlin de verbo mirifico, II, sig e6v, (Stuttgart facsimile p 72)

Et sequitur: Nequaquam Jacob appellabit nomen tuum sed Israel: quoniam cum deo & homine praevaluisti: Ut est item vocabulum Na: quod in animi molestia

turbationibusque utimur. Sicut Moyses in numeris: Dimitte Na peccatum populi tui: quod vos interpretatum habetis: Dimitte obsecro. Et psalmo centesimo ac decimoseptimo: A na domine salvifica na. A na domine fortunifica na: quod vos elegantius sic: O domine salvum me fac: o domine bene prosperare.

And it follows: No more shall thy name be called Jacob, but Israel: for with god and man thou hast prevailed. And so it is with the name Na: which we use in trouble and disturbances of spirit. For instance Moses in Numbers: “Na, pardon the iniquity of thy people”, which you will have interpreted “Pardon, I beseech thee.” And also in Psalm CXVII “Ah Na, Lord, fortune-giving Na”, which you find more elegantly thus: “Save now, I beseech thee, O Lord: O Lord, I beseech thee, send now prosperity.”

The psalm is Vulgate 117:25, English 118:25.

‘A Na’ in the context of beseeching is reminiscent of the note on Anna and Annah in ‘John Dee His Note.’

Also, see Agrippa De Occulta Philosophia III.11

Et est nomen Dei Na nun-aleph, in perturbationibus et molestiis invocandum. – p 428, Brill edition

And the name of God Na is to be invoked in perturbations and troubles. –p. 474, Tyson edition.

(In margin) vide Reuclini librum de verbo mirifico de nomine PELE
see Reuchlin’s book On The Marvellous Word concerning the name PELE

“PELE”

Reuclin, De verbo mirifico II, sig e2r, (p 63 in the Stuttgart facsimile)

Quoque vos legitis in eo Iudicum loco: Nomen meum quod est mirabile. Sed tenet non eandem hic significationem quomodo in psalmo octavo: Domine dominus noster Quae admirabile est nomen tuum in universa terra: id est admiratione dignum & gloriosum: quod vocabulum Adir significat: hic vero peli: quod est miraculorum operator.

Also, you read in that place in Judges: My name which is wonderful. (But this does not have the same significance as in the eighth psalm: O Lord our Lord, how wonderful is your name in all the earth: that is, “worthy of admiration” and “glorious”: which the word Adir signifies.) here truly peli: which is “worker of miracles”

Agrippa , De Occulta Philosophia III.11

Origenes, splendidissimis quibusque philosophis non inferior, adserit contra Celsum in quibusdam divinis verbis mirandam latere virtutem; et in libro Iudicum ait Dominus: “Nomen meum quod est Pele (Peh Lamed Aleph), quod interpretatur apud nos ‘miraculorum operator’ sive ‘efficiens mirabilia.’

Origen, not inferior to the most brilliant philosophers, asserts against Celsus that wondrous virtue lied hidden in certain divine Words. And in the book of Judges the Lord says “My name which is Pele”, which signifies to us “a worker of miracles” or “bringing forth wonders.”

Page 14

(In margin) De sigillo Emeth vide Reuclini Artem Cabalisticam lib 3 et Agrippam lib 3

cap 11

On the seal of Emeth, Reuclin's "The Cabalistic Art", book 3, and Agrippa book 3, chapter 11

"Emeth"

The Seal of Emeth has a long history. The sources Dee cites are:

Agrippa De Occulta Philosophia III.11

nomen Emeth, quod interpretatur 'veritas' est, et est sigillum Dei.

the name Emeth, which is interpreted 'truth' and is the seal of God

Reuchlin, De Arte Cabalistica III, fol. LXIIr (p 284 in Bison Book edition)

Ehieh sigillat per Emeth, hoc est essentiam per veritatem. Sicut nobilis ille dictator ait Eliezar Haklir AMTh ChRTMD, Emeth est sigillum eius. Probat hoc ratio arithmetica quam imitantes si multiplicaverimus Ehieh per Ehieh surgent quadringenta quadraginta & unum, Quae simul sunt AMTh hoc est verum seu veritas, sicut Adonai Shalom – Domini Pax.

Ehieh seals through Emeth, that is though essential truth. As that excellent teacher Eliezar Haklir says "Emeth is his seal." Arithmetic reasoning proves this; for if we in such a way multiply Ehieh by Ehieh, four hundred forty one will arise, which is at once Emeth, that is 'true' or 'truth' and Adonai Shalom "Peace of the Lord."

ibid, fol. LXVIr (p 300 in Bison edition)

Ubi post Tetragrammaton repitur YHV quod est symbolum ipsius Ehieh, hoc est entis per aequalitate numeri....Est enim sigillum Dei YHV quo Ehieh sigillavit mundum, et dicitur AMTh, id est verum, quippe quod in se ipsum arithmetice multiplicando nascitur.

And after the Tetragrammaton is found YHV which is a symbol of that Ehieh, which is "Being", by equality of number....And YHV is a Seal of God, by which Ehieh has sealed the world., and it is called Emeth, that is "truth", since it is born by multiplying it arithmetically by itself.

SIGILLUM DEI

The Seal of God

Valete

Farewell

Soli Deo omnis honor Laus et Gloria Amen.

To God alone, all honor praise and glory. Amen.

"Soli Deo..." I Timothy 1:17

Vulgate -- regi autem saeculorum immortalis invisibili soli Deo honor et gloria in saecula saeculorum amen

KJV--Now unto the King eternal, immortal, invisible, the only wise God, *be* honour and glory for ever and ever. Amen.

Geneva – Now unto the King everlasting, immortal, invisible, unto God onely wise, be honour and glorie for ever and ever, Amen.

Martii 15. Thursday. Hora 1 1/4 a meridie

March 15. Thursday. From midday 1 1/4 hours.

Translator's Note: 1:15 PM

Invoke nomen Domini, et agnoscetis eum.

Invoke the name of the Lord, and you will know him.

“Invoke....agnoscetis”

Invoco/agnosco is a nice pair of synonyms for *obsecro/confiteor*, the words used for the etymology of Annael in “John Dee His Note” above.

Deus misereatur nostri, et benedicat nobis&c.

May God be merciful unto us and bless us, etc.

“Deus misereatur...” -- Psalm 66:1 (Vulgate); Psalm 67:1 (English)

Vulgate ex Septuaginto: Deus misereatur nostri et benedicat nobis illum vultum suum super nos et misereatur nostri DIAPSALMA

Vulgate ex Hebraeo: Deus misereatur nostri et benedicat nobis inlustret faciem suam super nos SEMPER

BCP: God be merciful unto us, and blesse us: and shew us the light of his countenance, and be mercifull unto us.

KJV: God be merciful unto us, and bless us; and cause his face to shine upon us; Selah.”

Geneva Bible: God be merciful unto us, and blesse us, and cause his face to shine among us. Selah.

(In margin) Of Salamian you may read in the call Diei Dominicae in Elementis Magicis Petri de Abano.

Of Salamian you may read in the call of Sunday in “Magical Elements” of Peter of Abano

“Salamian”

De Elementis Magicis (attributed to Peter of Abano) is part of De Occulta Philosophia Liber Quartus.

per nomina sanctorum Angelorum, qui dominantur in quarto exercitu, et serviunt coram potentissimo Salamia, Angelo magno et honorato: et per nomen stellæ, quæ est Sol, et per signum, & per immensum nomen Dei vivi, et per nomina omnia prædicta, conjuro te Michael angele magne, qui es præpositus Diei Dominicæ: et per nomen Adona, Dei Israel, qui creavit mundum et quicquid in eo est, quod pro me labores, et admoleas omnem meam petitionem, juxta meum velle & votum meum, in negotio et causa mea.

By the names of the holy Angels, who rule in the fourth company, and serve before the face of the most powerful Salamia, a great and honored Angel, and by the name of the star, which is Sun, and by the sign and unfathomable name of the living God, and by all the aforesaid names, I summon thee, great angel Michael, who art placed over the Lord's Day, and by the name Adonai, the God of Israel, who created the world and whatsoever is in it, that thou labor for me, and undertake all my petitions, according to my will and my desire, in my business and cause.

“admoleas” – Translator's Note:

This word is not to be found in any of the dictionaries cited in the bibliography. Here, it

is taken as *admolior*, turned non-deponent, and made 3rd instead of 4th conjugation. This is a not unreasonable medievalism. It is also a plausible scribal or transcription error (medieval or later.)

Page 16

(In margin) De OCH vide in libello Arbatel in (sol sign)

About OCH, see Arbatel's little book, under Sun.

"OCH"

In Arbatel de Magia Veterum (printed as part of De Occulta Philosophia Liber Quartus) Och is the spirit of the Sun. Raphael confirms this two lines later when he says OCH is "mighty in the sonne beames." OCH is also associated with gold and wealth.

I am Fortitudo Dei

I am the Strength of God.

Fortitudo Dei

This is what Dee calls Michael in 'John Dee His Note'; this, combined with all of the solar references immediately preceding (see the note on OCH), makes Dee's conclusion that this angel is Gabriel pretty inexplicable. The angel neither confirms nor denies Dee's assertion about the visitor's identity.

See page 16 for another example of potential Michael/Gabriel confusion.

"What thow hast written, that hast thow written"

cf Pilate's words "What I have written, I have written." (John 19:22, Geneva Bible and KJV.)

"POLIPOS"

Mi: Dost thow understand it?

Dee: No, God knoweth.

In De Occulta Philosophia, III.34, Agrippa gives the Hebrew names of the twelve apostles, including quartus PEH-VAU-LAMED-YOD-PEH-VAU-SHIN Polipos, quem nuncupamus Philippum.

The fourth Polipos, whom we call Philip.

Dee may be missing the significance of the name, not the immediate reference, but it seems out of character for him not to have added a marginal note in such a case.

(In margin) It is in Elementis Magicis Petri de Abano, printed with Clavis Agrippae

It is in Peter of Abano's "Magical Elements", printed with the "Key" of Agrippa.

Page 17

"I lived with Esdras"

Uriel appears in books 4-13 of II Esdras in the Apocrypha, where he leads Esdras through dreams about the mystery of human destiny and visions of the Last Days.

"I lived with Tobie: Tobie the younger"

Tobias' adventures with Raphael are found in Chapters 4-12 of the apocryphal Book of Tobit.

his Mysteries are: The true Circle of his æternitie
Comprehending all vertue: The whole and sacred Trinitie.
Oh, holy be he: Oh, holy be he: Oh, holy be he.
Uriel answered, *Amen*.

Mic. Now what wilt thou? Δ I wold full fayne procede
according to the matter in hand.

40 Mi. Divide this owtward circle into **40** æquall partes:
whose greatest numbers are fowre. See thou do it presently.

Δ I did so. Dividing it first into fowre: and then every of
them into ten. He called Semiel, and one cam in
and kneled down: and great fyre cam out of his mowth.
Michael sayde, To him, are the Mysteries of these Tables known.
Michael sayde, Semiel (agayn) and by and by, he said, O God thou hast sayd
and thou Livest for ever. Do not think here I spoake
to him. Δ he spake that to us, least we might dowte of his last
speches, as being spoken to Semiel: which he directed to the æternall god
and not to Semiel. Semiel stode up, and flaming
fire cam out of his mowth: and than he sayd, as followeth:

Sem. Mighty Lord, what woldest thou with the Tables?

Mi. It is the will of God, Thou fatche them hither.

Sem. I, am his Tables.
Behold these are his Tables: Lo where they are.

Δ There cam in **40** white Creatures, all in white Sylk long robes:
and they like chyldern: and all they fallyng on theyr knees sayd,
Thow onely art Holy among the highest. O God,
Thy Name, be blessed for ever.

Δ Michael stode up out of his chayre, and by and by, all his legs
semed to be like two great pillers of brass: and he as high as half
way to the heven. And by and by, his sword was all on fyre
and he stroke, or drew his sworde over all theyr **40** heds.
The Erth quaked: and the **40** fell down: and Michael called
Semiel, with a thundring voyce, and sayd,
Declare the Mysteries of the Living God, our God, of one
that liveth for ever.

Sem. I am redy. Δ Michael stroke over them, with

*Δ Semiel - forte significat Nomen meum Deus. Ita quod Tabulae istae sunt Nomen Dei,
vel Nomina Divina.*

Δ Semiel,

Creatures

his sword agayne: and they all fell down, and Uriel allso unto his knees. And commonly at the striking with his sword, flamynge fyre like lightening did flash with all.

Mi. NOTE: here is a Myserie.

The very
fashion of
the T was
thus: 

Δ Then stept furth, one of the **40**, from the rest, and opened his brest, which was covered with Sylk, and there appeared a great **T** all of Gold.

Mi. Note the Number. Δ over the **T**, stode the figure of **4**, after this manner: 

The **40**, all, cryed, yt liveth and Multipliyeth for ever: blessed be his name.

Δ
T, in the holy
language
is Giscg
vide lib. 5.
post et est
ultima Al=
phabeta
litera.

Δ That creature did shut up his bosome, and vanished away, like unto a fyre.

Mi. Place that, in the first place. It is the name of the Lorde.

Δ Than there seamed a great clap of thunder to be.

Then stepped (before the rest) one other of the **40**, and kneled as the other did before. And a voyce was herd saying, Prayse God, for his name is reverent. Michael sayd to me, say after me thus,

Deus Deus Deus noster, benedictus es nunc et semper: amen.

Deus Deus Deus noster, benedictus es nunc et semper: Amen.

Deus Deus Deus noster, benedictus es nunc et semper: amen

G: dicitur
Ged lib. 5.

Δ Then this Creature opened his breast, and fyre cam oute of the stone as before and a great romayne **G** appeared.

Mi. Write with reverence, These Myseries are Wunderfull, the Number of his name, and knowledge.

Lo, this it is, **.9**. Behold, it is but one, and it is Marveyulous.

Δ Then this Creature vanished away.

Mi. The Seale of Gods Mercy: blessed be thy name.

Δ It semed to rayne, as thowgh it had rayned fyre from heven.

Then one other of the **40** was browght furth: The rest all fell down and sayd, **LO**, thus is God known.

N, dicitur,
Drux.

Then he opened his brest, and there appered an **n**, (not of so big proportion as the other), with the number of **7** over it.

Mi. *Multiplicatum est Nomen tuum in terra.*

Δ Then that man vanished away as it were in a golden smoke.

Mi. Thow must not write these things, but with great devotion.

He Liveth. Δ Then cam an other fowrth. Then all falling down sayde, *Vidimus Gloriam tuam Domine.* They were prostrate on theyr faces. Then this Creature opened his breast and he had there a Tablet all of Gold (as it were) and there appered a small **t** uppon it: and the figure of **9** under this Letter **t**.

Δ
Giscg.

Mi. Mark it, for this is a Myserie. Δ Then that shewer (of the **40**) seamed to fly up into the ayre, like as it were a white garment.

Mi. *Illius Gloria sit nobiscum.* Δ All sayd, *amen*: and fell down.

Δ
Na.

Δ Then stode up an other, and opened his bosom, and shewed on his brest bare (being like sylver) a small **h**; and he pointed to it, and over it was the number of **22**.

Angeli
Lucis

Mi. *Et est numerus virtutis benedictus.* Δ This Shewer went away like a White Cok flying up. *Videte Angelos Lucis.*

Δ There cam an other in, and sayd,

Et sum Finis et non est mihi Numerus. Sum Numerus in Numero.

Et omnis Numerus est mihi Numerus. Videte.

Δ
Drux.

Δ There appeared a small **n** on his skyn, being all spotted with Gold.

Then he went away like three fyres, red flaming, and coming to gather in the myddst of the firmament. Δ You must Note that in the stone the whole world in manner did seme to appere, heven, and erth, &c.

Mi. (Δ he cryed with a lowde voyce) *Et est vita in cælis.*

Δ Then stepped furth one and sayd, *Et ego vivo cum bene viventibus*, and withall he kneeled down: and Michael stepped furth and toke of his veale on his brest and he made Cursy and stode up.

Mi. *Vivamus Halleluyah. O Sanctum Nomen.*

Δ
Tal

Δ All fell down on theyr faces, and Michael stroke over them with his sword and a great flash of fyre: And this man his brest seemed open that his hart appeared bleading, and therein the letter m, and 6, over it thus 6

Mic. *Benedictus est Numerus Agni.* m

Δ Hereuppon They all fell down.

Mi. *Orate invicem.* Δ Hereuppon we prayed a psalmē; ^{my skryer} saying one verse, and I the other &c.

Δ
Med

Mi. *Omnia data sunt a Deo.* Δ – Then cam one in, having a rownd Tablet in his forhed and a little o in his forhed: and 22 over it.

Mi. *Et non est finis in illo.*

Benedictus es tu Deus. Δ and then that shewer vanished away: He flew up, like a rownd raynbow knyt together at the endes.

Mi. *Angeli a nomine tuo procident Domine.*

Tu es primus O Halleluyah.

Δ One stode up and the rest fell down, and out of his mowth that stode, cam a sworde: and the point, a Triangle, and in the myddst of it a small a thus , of pure gold, graven very depe:

Δ
Vn
Corrected thus,
after, by
Uriel
to be 20

Et Numerus tuus vivit in cæleris, sayd this shewer. The number was ²⁰22 over the a.

This shewer went away with great lightening covering all the world.

Δ
Drux

Mi. *Nomen illius est nobiscum.* Δ He stroke agayne with his sword over them. Then stode one up: who, upon his garment had an n: and he turned about: and on his back were very many (ens) n.

Mi. *Creasti tu Domine Angelos tuos ad Gloriam tuam.* Δ Over the n, was the number of 14, over that n (I meane) which was onely on his brest.

Mi. *Et te primus Creavit Deus.* Δ Then the shewer flew up like a star.

Δ
Vn

And an other cam in, all his cloth being plucked up: and so seamed naked: He hath a little a. This a, did go rownd about him: begynning at his feete: and so spirally upward: and he seemed to be all clay.

Over the a, was the number 6.

Note these 3
parts

Mi. *Et creata sunt et pereunt in Nomine tuo.* Δ and therwith this shewer fell down all into dust on the Earth: and his white garment flew up, like a white smoke: and allso a white thing did fly out of his body.

Surgit Innocentia ad faciem Dei.

Δ Michael did over them agayn with his sworde, and it seemed to lighten. He began to speak, and he stopped suddenly, and the fyre flew from his mowth.

Mi. *Innocentium Nomina, et sanguinem vidisti Domine a Terra, et Justus es in operibus tuis.* Δ Then cam one in, with a garment

Δ
Na

all bluddy. he was like a chylde, he had a ball in his hand of perfume which smoked: and he hath uppon his forhed a little h. He bowed to Michael: and Michael sayd, *Numerus tuus est infinitus, et erit finis rerum.* Δ This shewer seemed to powre him self awaye

like a flud of blud: and his garment flew upward.

Mi. *Non est illi numerus.*

Med

Omnia pereunt a facie Dei, et a facie Terræ.

Δ Then stepped one furth, and like a water running rownd about him, and he cryeth miserably, *O benedictum Nomen tuum Domine.*

Numerus periit cum illis. Δ A little ,0, with 18 over it, appered.

Δ This shewer seemed to vanish away, and to cause a great water remayn over all.

Mi. *Lux manet in tenebris. Gloriosum est Nomen tuum.*

Δ Then stept one furth from the rest, who fell down, as theyr manner was.

Δ Note: All the Cumpanies of these 40, stode five to gither, and five to gither, and so in eight Cumpanyes; each, of five.

Δ This was a very white one: The upper partes of his throate, seemed open and there seemed to cum out of it fyre, in very many and diverse cullours. he sayd, *Trinus sum.*

Mi. *Benedictum sit nomen El.*

Δ
Ur

Δ Than in the myddle of the fyres or smoke semed an ,1, thrise placed, on a bluddy cross, and over the ,1, the number 26.

Δ This shewer seamed to  have three mens heds and to vanish away in a myst  with a thunder.

Mi. *Labia mea laudant Dominum.*

Δ Then cam a very fayre  yong one in with long heare hanging on her (or his) sholders: and on her belly appeared a great scotcheon; to hir, or him, Michael gave a flame of fyre: and she, or he, did eat it.

Mi. *Et hic est El:* and so appeared a little ,1, on the scotcheon, and it waxed bigger and bigger: and a fyre did seeme to go rownd about it.

Mi. *Benedicta sit ætas tua:* Δ And there appeared ,30, under the 1.

Δ There cam a great many of little fyers and did seeme to elevate this yong woman (or child) out of sight.

Michael stroke his sword over them agayn, and sayd,

Natus est illa Lux.

Ille est Lux noster.

Δ Then stept out an other and opened his white silk garment uppermost: and under it, he seemed to be sowed up in a white silk cloth.

Δ
Drux

He had in his forhed an ,n, in his brest an ,n, and in his right hand an ,n.

Mi. *Numerus tuus est benedictus.* Δ They all fell down, saying, *Numerus tuus est Nobiscum: Nec adhuc novimus finem illius Venies cum numero tuo O unus in æternum.*

Δ and they fell all down agayn. This shewer departed clyming up into the ayre, as if he had clymed on a ladder.

Mi. *Linguis suis cognoverunt eum.*

Δ All sayd, *Benedictus est qui sic et sic est*, throwing up into the ayre threcornerd trenchers of this fashion  all of Gold. The one side of the trenchers was thus marked, and the other side had nothing on.

Δ Then stept one oute: and fyre cam out and in of his mowth: he kneeled, the rest fell down. This seemed a transparent body, and he had in his eyes a small 1: and in his forhed the figure of 8.

Ur

Mi. Note this, under. I meane the figure 8. Thus, $\frac{1}{8}$.

	Δ	All sayd, <i>Et es verus in operibus tuis</i> : and so he vanished away in a flame of fyre.
Δ Ged - G	Mi.	<i>Gaudete omnes populi eius, gaudete omnes populi eius, ab hinc Gaudete.</i> Δ — All sayd, Amen.
Δ . Note this to be the first that vanished away, going behynde Michael.	Δ	one stept furth saying, <i>Incipit virtus nostra</i> , he being covered under his robe, all with armor: and hath a great G on his armor. and the figure of ,7, over it. <u>He went behynde Michael</u> and so vanished away.
	Mi.	<i>Recte vivite omnes Sancti eius.</i>
Δ Don	Δ	One stept furth: and opening his brest, there appered a boke, and turning over the leaves there appeared nothing but a little , r , and 13 over it. He went <u>behinde</u> the Chayre and so vanished awaye.
	Mi.	<i>Hic est Angelus Ecclesiæ meæ, qui doceat Ille viam meam.</i>
Δ Na	Δ	There stept oute a playn man, and under his garment a gyrdel, and under his gyrdle a Rod: and in his hand he had a sworde, and in his mowth a flame of fyre: he had a great H uppon his sworde and under it 22 . He went <u>behynde</u> the Chayre <i>¶c</i> .
	Δ	Michael standing up still uppon his leggs, like pillers of brass. I axed yf I shold not cease now, by reason of the folk taryng for us to come to supper.
	Mic.	Lay away the world. Contynue your work: <i>Coniunxit spiritum mentibus illorum.</i>
Δ Med ged	Δ	Then stept out one, having under his garment a little Chest, and therein a mans hart raw: and the hart was thus with two letters, one on the one side , o , and on the other a , g ,: [Δ — As in scotcheons of armes, where the man and his wives armes ar joyned <i>per pale</i> , as the heraulds term it.]  This shewer shut up the chest and went his way.
	Mi.	<i>Numerus illius est sine numero.</i>
	Δ	Then cam in an other, saying, <i>Tempus est. Deus vestrum agnoscite.</i>
Δ Gisg	Δ	This shewer <u>his armes reached down to his feete</u> : he shewed furth his right hand and in it a little , t , and 11 under it.
Δ Gon con puncto, y.	Mi.	stay; place this, in the second place. This went away.
Δ . Imago: I writ first: but, aunciently, and vulgarly both in writing and print, you shall finde ymago, though not according to the Latine tung	Mi.	<i>Ymago tua, (mors,) est amara.</i>
	Δ	Then cam one in, with a big belly, and fat cheekes: an half sword perced his hart, and a little , y , written on it. <i>Justus est malis deus noster.</i> Δ The number of 15 under it.
	Mi.	Place it in the former place.
Δ Med	Mi.	<i>Opera fidelium, Delectatio mea.</i> [Δ Then cam one in.] <i>Hic est Deus noster.</i> He shewed the letter of o on his naked brest, and the figure of 8 under it. He went away.
Δ Graph	Mi.	<i>Ecce, Iniquitas regnat in domo mea.</i>
	Δ	Then stept one oute very lean, all his body full of little e , and under every one of them, 21 . He went away <u>behynde</u> the chayre.
Δ Pa - b	Mi.	<i>Bestia devoravit populum meum, peribit autem in æternum.</i>
	Δ	Then stept out one in bluddy apparell, all his body full of serpents heds and a b on his forhed, and the number of 10 over it . He went away.
	Mi.	<i>Iniquitas Abundat in templo meo, et sancti vivunt cum Iniquis.</i>
	Δ —	One very lean, hunger sterved cam out, an A on his brest, and , 11 , over it,

Δ I think
it be
superfuous } +

and so went away.

Δ There cam in an other.

Mi. *Iniqua est Terra malitiis suis.*

Δ Then cam in one who drew out a bluddy sworde, on his brest a great romayn **I**, and **15** over it. he went his way.

Mi. *Angeli eius ministraverunt sanctis.* Δ Then stept one oute with a Target and a little **a** on it, and over it the number of **8**. He went away.

Mi. *Regnabit Iniquitas pro tempore.* Δ They all cryed Halleluyah.

Δ
Uriel
corrected
it after,
to be under

Δ Then stept one furth with a golden crown, and a great arming sworde: his clothing all of gold, with a letter **r** on his sword and **16** over it, and so he went away.

Mi. *Nulla regnat virtus super terram.* Δ Then stept one oute, having all his body under his white sylken habit (as they all, had) very brave after the fashion of those dayes, with great ruffs, cut hose, a great bellyed dubblet, a velvet hat on his hed, with a feather: and he advanced him self braggingly: He had burnt into his forhed a little **n**: and Michael sayd, *Non est numerus illius in Cælis.* Δ He went away.

Mi. *Antiquus serpens extulit caput suum devorans Innocentes. Halleluyah.*

Δ Then cam one who put of his white habit: and he toke a sword, and smote up into the ayre, and it thundred: and he had a seal (suddenly there) very gorgeous of gold and precious stones. he sayd,

Regnum meum: Quis Contradicet!

Δ He hath proceding out of his mowth, many little (enns) **n**, and on his forhed, a great **A**.

Mi. *Non quòd est A, sed quòd contradicit A.*
Nec portio, nec numerus eius invenitur in cælo.
Habet autem Numerum terrestrem

Mysterium

*Mysterium
nobis reve=
landum*

Δ He shewed three figures of ,**6**, set in triangle thus, **6⁶6**

Mi. *Vobis est Mysterium hoc, posterius revelandum.*

Δ And there cam a fyre and consumed him, and his chayre away, suddenly.

Δ My skry=
er had omit=
ted to tell
me this, or
els, it was
not told
and shewed,
but Uri=
el did after
supply it
by the
skryer
The first
letter of
Perturba=
tur, doth
not make
shew, of
the letter
following
as other
before
did.

Mi. *Perturbatur terra iniquitate sua.*

This shewer, his garments, white, under: his face as brass: his body gre=
vous with leprosy: having uppon his brest an **O**, with the number of
.10. under it: and so he departed.

Mi. *Surgite O Ministri Dei. Surgite (inquam) Pugnate: No=
men Dei est æternum.*

Δ Then cam two oute to gither: they had two edged swordes in theyr hands, and fyre cam oute of theyr mowthes. One had a **G**, and **5** over it, the other had...

[Δ – We fell to prayer, whereuppon Michael blessed us.]

The other had an **h** on his sword, and **14** under it: and so they went away.

Mi. *Omnis terra tremet ad vocem tubæ illius.*

Δ One stept out, and under his habit had a trumpet. he put it to his mowth, and blew it not. On his forhed a little ,**o**, and **17** under it. He went away.

Mi. *Serva Deus populum tuum, Serva Deus populum tuum Israel, Ser=
va (inquam) Deus populum tuum Israel.* Δ He cryed this, alowde.

Δ
Fam

Δ One appeared with a fyry sword, all bluddy, his vesture all bluddy his vesture all bluddy, and he had **s**.

Est numerus in numero. Δ He went away.

Δ I understand it to be a letter, and the number **5** also. Mi. So it is.

Δ
Uriel also
did correct
this place
with delive
ring this
in the
place of
the other des
cription
before.

Δ There cam one in with diverse owgly faces, and all his body skabbed.
Mi. *Nunc sunt Dies tribulationis:* Δ He had an a on his
forhed and the Number 5 under it.
Mi. *hic est Numerus predictus.*

Mi. *Audite, consummatum est.* Δ This had a great pot of water
in his hand and uppon the pot, graven, a with 5 under it. He
departed in fyre.

Mi. *Angele preparato Tubam tuam.*

Δ Then cam one oute with a Trumpet. *Venit Tempus.*

Δ He offered to blow, but blew it not. on the end of his Trumpet
was a little a and 24 under it. he went away.

Δ They all now seemed to be gon: Michael and all.
He cam in agayn and two with him. And he sayd, *Hii duo*
Cælati sunt adhuc. They two went away.

Mi. *Vale. Natura habet terminum suum.*

Δ He blessed us and florished his sword towards, and over us,
and so went away and Uriel after him: who all this while
appeared not.

Δ After supper Mr. Talbot went up to his chamber to prayers: and
Uriel shewed himself unto him: and told him that somewhat
was amyss, in the Table or seale which I had
byn occupied abowt this day. And thereuppon, Mr. Talbot cam
to me into my study: and requyred the seale (or Tables) of
me: for he was wished to correct something therin, (sayd he)
I delivered him the seal, and he browght it agayn within
a little tyme after, corrected: both in the numbers, for quantyty
and some for place over or under: and allso in one letter or
place omitted. Which I denied, of any place omitted by me,
that was expressed unto me. And the rather I dowted, uppon
Michael his words last spoken, uppon two places then remay=
ning yet empty: saying, *Hii duo Cælati sunt adhuc.* But
If I had omitted any, there shold more than two have wanted.
Whereuppon we thougth good to ax Judgment and dissolving
of this dowte, by Michael. And comming to the Stone
He was redy: I prepownded this former Dowte. He answered,

Mi. *Veritas est sola in DEO. Et hæc omnia vera sunt.*

The
Descryer, or
The Skryer
omitted to
tell.

you omitted no letter or history that was told you. But the
skryer omitted to declare unto you. Δ May I thus recorde it?
Yt is justly reformed by Uriel: the one being omitted of the descrier
and the other not yet by us declared, might make that phrase
meete to be spoken, *Hii duo cælati sunt adhuc.*

Mi. Thow hast sayd. Δ I pray you to make-up that one
place yet wanting. Then he stode up on his great brasen leggs
agayn: He called agayn, Semiael Semiael. Then he cam,
and kneled down.

Consummatum est. Δ The shewer (a white man) pluckt

oute a trumpet, and put it to his mowth, as though he wold blow, but blew not: and there appeared at the ende of the Trumpet the greke ω.
There arose a myst, and an horrible Thunder.

Mi. It is done. Δ Then of the three ⁶6 before Noted, with his finger he put oute the two lowermost: and sayd, *Iste est numerus suus*. And Michael did put his finger into the trumpets ende, and pulled furth a rownd plate of Gold, wheron was the figure of .1. with many circles about it, and sayd *Omnia unum est*.

Semi Eil

Δ The forme of the world which appered before, vanished away: and Se myeil went away. And Michael cam and sat in his chayr agayn:

and his brasen leggs wer gone, and uppon our pawsing he sayd, Mi. Go forward. Do you know what you have already written? *Laudate Dominum in Sanctus eius*.

Note: The Circumference (which is done) conteyneth 7 names:
7 names, conteyn 7 Angels:
Every letter, conteyneth 7 Angels:
The numbers are applyed to the letters.
Whan thou dost know the 7 names, thou shalt understand the 7 Angells.

The declaration of the Numbers

The Number of 4, pertayning to the first T, is a Number significative: signifying, to what place thou shalt next apply the eye: and being placed above, it sheweth removing toward the right hand: Taking the figure for the number of the place applyable to the next letter to be taken. The under number, is significative: declaring, to what place thou shalt apply the next letter in the Circumference, toward the left hand. Which thou must reade, untill it light uppon a letter, without number, not signifying. This is the Whole.
So shalt thou fynde the 7 principall Names: known with us, and apply=
able to thy practise.

Make experience.

Δ Then telling from ⁴T, 4 more places (toward the right hand) exclusively, I finde in that fowrth place, from T, (but being the fifth from the beginning, and with the begynning) this letter h: with 22, over it. Therefore, I procede to the right hand, 22 places: and there I finde A, and 11 over it. Going then toward the right hand 11 places furer: I finde a little a with 5 under it: by reason of which under place of 5, I go toward the left hand, 5 places, exclusively; where I finde o with 10, under it: wheruppon I procede to the left hand, farder by 10 places, and there I see the letter t, and 11, under it: and therefore going to the left hand 11 places, I see there the letter h alone without any number. Wherefore, that letter, endeth my word, and it is in all, **ThAaoth**: Ys this, as it shold be?

Mi. That is not the name. Thou shalt understand all in the next Call. The Rule is perfect. Call agayn within an howre

Calls

Δ Note these doings to be accounted Calls

and it shalbe shewed.

Δ The howre being come we attended Michael his retorn to make the Practise evydent of his first Rule.

Mi. *Salvete.*

Thow diddest erre: and herein hast thow erred: and yet notwithstanding no error in the, bycause thow knowest not the error.

Understand that the 7 Names must comprehend, as many letters in the whole, as there are places in the circle: Some letters are significative of them selves. In dede no letters, but dubble numbers, being the Name of God. Thow hast erred in the first

Dubble
Numbers

Note

Δ
Note:
7 names, pro
ceeding from
3 generall
places of the
Circumference
or 3 generall
letters, being
but one letter
and that, Δ.

name, in setting downe **Aa**; that is, twise a together, which differ the word. Which thow shalt Note to the ende of thy work: Where soever thow shalt finde two a a together the first is not to be placed within the Name, but rather left with his inward power. Thow shalt fynde 7 Names proceeding from three generall partes of the Circumference: My meaning is, from three generall letters: and onely but one letter, that is, this letter **A**. Accownt thow, and thow shalt finde the names just. I speak not of any that come in the begynning of the word but such as light in the myddest: Prove; Prove: and thow shalt see. Whereas thow hast **go**, it is to be red **og**. This is the whole.

Δ — I have red in Cabala of the Name of God of 42 letters: but not yet of any, of 40 letters: That of 42 letters is this,

אב אלהים בן אלהים רוח הקדש אלהים
שלשה באחד אחד בשלשה

id est: Pater Deus, Filius Deus, spiritus sanctus Deus: Tres in uno, et unus in tribus. Vel Trinitas in unitate et unitas in Trinitate.

Δ
vide Gala=
tinum, lib.
3. cap. 11

Or thus, אב אל בן אל רוח הקדש אל אכל לא שלשה
אלהים כי אם אלוה אחד

which in Latin is, *Pater Deus, Filius Deus, et Spiritus Sanctus, Deus, attamen non tres dii sed unus Deus.*

And as this is of God, Unitie in Trinitie, so of Christ onely (the second person of the Divine Trinitie) the cabalists have a name explained of 42 letters, on this manner,

כאשר הכפש המשכלת והבשר אדם אחד
בן האל והאדם משיח אחד

That is in Latine, *Sicut anima rationalis, et caro, homo unus, ita Deus et homo, Messias unus.*

I am not good in the hebrue tung, but, you know my meaning.

Mi — The letters being so taken oute, being a name, and a number, doth certefye the old rule of 42 letters, whan you restore them in agayn.

Δ
42, are here
in *potentia*,
but, non *Actu*

The
Vertu
of this
Circle

Mi — Note, Oute of this Circle shall no creature pass, that entreth, yf it be made uppon the earth. My meaning is, if he be defyled: This shalt thow prove to be a mysterie unknown to man.

Tuesday the 20 of Marche: *circa 10^a mane.* / / ers to them.

Δ Are you Uriel? / / and corrected certayn pray=
Ur. I am. We thank the for thy great good will. Δ. I had made, and written, ^
We cannot viset the now. At the twelfth howre thou shalt use us.

Δ *Fiat voluntas Dei.*

A meridie circa 2a

Baskets

Shut }
Dores }

Δ At the twelfth howre, my partner was busyed in other affayres, and so
contynued tyll abowt 2 of the Clok: when; we comming to the stone,
fownd there Michael and Uriel: but Michael straight way
rose up and went out, and cam in agayn, and one after him, carrying
on his right shulder, 7 little baskets, of gold they seamed to be.

Mi. Shut up your doores. Δ I had left the uttermore dore
of my study, open: and did but shitt the portall dore of it.

Δ He toke the 7 Baskets, and hanged them rownd abowt the border of a
Canapie, of beaten gold, as it were.

Mi. *Ecce, Mystrium est. Benedictus Dominus Deus Israel.*

Δ Therewith he did spred oute, or stretch the Canapy : Whereby it
seamed to cover all the World [which seamed to be in the stone allso,
heven, an erth] so that the skryer could not now see the heven.
And the baskets, by equall distances, did seeme to hang in the border of
the horizon

Mi. What wold you have Δ *Sapientiam*

Mi. Rede the names thou hast written. Δ I had written these
according to the Rule before given, as I understode it.

Th^aaoth

Gal^aas

Gethog

Horlōn

Innon

A^aoth

Galets.org

Mi. Loke to the last name. Δ I had written (as appeareth) **Galetsog**

by misrecke[n]ing the numbers. Where I fownd it shold be **Galethog** with an **h** and not s.

Mi. Lo, els thow hadst erred. They are all right, but not in order
The second is the first (his name be honored for ever) The
first here, must be our third and the third here, must
be our second : thus set downe.

- .1. Galas.
- .2. Gethog.
- .3. Thaoth.
- .4. Horlon.
- .5. Innon.
- .6. Aaoth.
- .7. Galethog.

Mi. Work from the right, toward the left, in the first angle
next unto the circumference

Δ He shewed than, thus, this letter 

M. Make the number of 5 on the right hand, (that is, before it) at a reasonable
distance, thus  5

Δ After that, he shewed the second letter, a great roman A, thus,  24

Then he shewed  30

Then —  21

Then —  9

Then he shewed  14

Then he shewed this compownd letter, with the circle and cross 

He willed me, at each corner of these segments of circles, to make little
Crosses and so I did.

Δ After every of the 7 letters shewed he did put them up in his bosom
assone as he had shewed them fully. The plates wheron those letters
were shewed, hath the forme
of the segment of a circle, thus  : and seemed to be
of pure gold. When the 7 letters were placed, he sayd

Omnia unum est.

Then he pulled all the 7 plates out of his bosom and Uriel
kneeled down before him. Then the plates did seeme to have
two wings (eche of them) and to fly up to heven under the Canapye.

Δ After this, one of the 7 baskets, (that which is in the east) cam to
Michael. and he sayd.

Mi. Seal this. For this was and is for ever

Δ Then he stode agayn on his legs like brasen pillers, and sayd

Mi. Oh how mighty is the name of God, Which rayneth in the
heavens O God of the faithfull, for thow raynest for
ever.

Δ he opened the basket, and there cam a great fyre out of it.

Δ –
Note of
7 Baskets

.1.

- Mi. Divide the 7 partes of the circle next unto that which
thow hast done, every one, into 7.
Note: (for the tyme will be long:) Seven, rest in 7: and the
7, live by 7: The 7, govern the 7. And by 7, all Govern=
ment is. Blessed be he: yea blessed be the Lord: prayed
be our god: His Name be magnified: All honor and Glory be
unto him now and for ever. *Amen.*
- Δ Then he toke oute of the fire in the basket, a white fowle like a pigeon
That fowle had a **Z** upon the first of 7 feathers which were on his brest .
that first feather was on the left side
- Mi. Note. there is a myserie in the Seven. which are the 7 governing the 7
which 7 govern the earth. Halleluyah.
- Mi. Write the letters; Δ Now, a small **I** in the second fether. Then he covered
those first two letters, with the other feathers
The third an **I**, like the other: then he covered that allso.
the fowrth an **R** he covereth that
the fifth a great roman **H**. he covereth it.
the sixth feather hath a little **i** . then he hid that feather,
the last feather had a small **a**.

Mi – Prayse god.

2.

- Δ Then he put the fowle into the basket – and set it down by him. Then
he hong it up in the ayre by him.
- Δ Then he lift up his sworde over us, and bad us pray. Δ We prayed.
- Δ Then he stretched out his hand and there cam an other basket to him.
and he pluckt out a White byrd, much bigger than the other: as big as a
swan: with .7. feathers on the brest

Mi – *Dixit, et factum est*

- Mi. Note: Δ – the first feather hath a little **a**, on it: and it went
away: the next a **Z** great as the first
Then a **C** great
Then a little **a**
Then an other little **a**
Then a feather with a little **c**
Then one with a little **b** Δ Then he covered them all.

Mi – Thow hast truth.

- Δ Then he put up the fowle into the basket; and hung it up by the
other in the ayre
- Δ Than the third Basket cam to him, and he toke out a byrd all green
as grass. Like to a peacock in form and bignes

Mi. *Et vivis tu cum illo: et
regnum tuum cum illis est*

- Δ There started out of this birds brest, 7 fethers, like gold, and fyrie
Mi. Pray.

3.

- Mi. Note. Δ on the first feather a small **p**
Then a small **a**
a little **u**
Then a small **p**
Then a small **n**
then a small **h**
Then a small **r**. Then he put the fowle up into the Basket, *etc.*

Δ Then there cam an other basket to his hand.

Mi. *Dedit illi potestatem in cælis.*

Potestas illius magna est.

Orate. Δ – We prayed.

4. Δ Then he pluckt out a fowle, greater than any of the other, like a griphen (as commonly they are figured) all red fyry, with skales like brass. Then on the seven skales, appered letters.

Mi. Note. Δ – first a little **h**
a little **d**
a little **m**
Then a little **h**
Then a little **i**
Then a little **a**
Then a little **i**

Δ then he put up the fowle, & hung the basket in the Ayre.

Δ Then there cam an other basket to him.

[Δ Note: all this while the firmament was not to be seen.]

Mi. *Magnus est DEUS in Angelis suis.*

et magna est Ilorum potestas in Cælis.

Orate. Δ We prayed.

5. Δ Then he pluckt out a bird like an Egle: all his body like Gold and he had a little circle of feathers on his brest: and on it, between fowre parallell lines, twelve equall squares: and on the top, on the myddle, one, like the other twelve, thus.

Δ Then he put up the Egle, *ec*.

Δ Then cam an other Basket.

Mi. *Nuncius tuus est magnus in cælis.*

Orate.

Δ He, and the Basket that wer opened, shut, and set aside, seamed all to be gon. and the Baskets remaying still hanging on the border of the Canapie. Then he cam agayn, and went awaye agayne. Then cam URIEL and held the Basket: and his leggs seemed to be such great tall pillers of Brass. as Michael did stand on before.

Δ. Michal
was the
sixth name
vide post

UR. This is a Mysterie. He is here, and not here which was here before.

6. Δ He opened the Basket and pluckt out like a phenix [Δ or pelican] of the bignes of a swan, all fyrie sparkling. His byll is bent into his brest and it bled. In his brest was a quadrangle made with his own feathers, thus. He put it up, and hung it by the other Baskets.

Then cam the last basket. Uriel stode still and sayde:
 UR. *Dedit angelis potestatem in lumine cæli.*
Orate. Δ We prayed.

7 Δ Then cam Michael, and toke the Basket of Uriel and becam standing
 on the great brasen legs, as before.
 Δ He toke out of the basket a strange fowle with many wings:
 This fowle had in his forhed a Tablet of this fashion

Mi. *Et Coniunxit illos DEUS in Unum.*
 Δ All the Baskets flew up: and so the Canapie vanished away: and
 the Heaven appeared.
 Δ Now he cam and sat down in his chayre.
 Uriel. Δ Michael sayd to Uriel: it is thy part, to expownd these Mysteries:
 Go to, in the name, of our God.
 Δ Uriel cam and stode before him and sayde: What will you: Ô our
fellows, and servants to GOD? What will you?
 My contynuall and auncient prayer Δ Perfect Knowledge, and understanding, such as is necessary for us.
 UR. Looke uppon, and see if thow canst not understand it: We
 will depart for a little space: and come to the agayne.
 Δ So they went: and left all the stone on fyre, so that neyther
 the Chayr or Table could be seen in it.
 Δ After a quarter of an howre, Michael and Uriel cam
 both agayne.
 Mi. Loke into the 7 angles next unto the uppermost Circumference.
 Δ Uriel cam and stode before Michael.
 UR. Those 7 letters, are the 7 Seats of the One and everlasting
GOD. His 7 secret Angels proceding from every letter
and Cross so formed: referred in substance to the
FATHER: in forme, to the SONNE: and Inwardly to
the HOLI GHOSTE. Loke uppon it: it is one of the
 Names, which thow hast before. every letter conteyning
an Angel of brightnes: comprehending the 7 inward
powres of God; known to none, but him self: a sufficient
BOND to urge all Creatures to life or Death, or any thing
els conteyned in this world. Yt banisheth the wicked,
expelleth evyll spirits: qualifieth the Waters, strengthe
 neth the Just, exalteth the righteous, and destroyeth the
 wicked. He is ONE in SEVEN; He is twice THREE.
 He is Seven in the Whole. He is Almighty. His Name
 is everlasting. His Truth can not fayle. His Glory is
 incomprehensible. Blessed be his name. Blessed be thow,
 (our GOD) for ever.

Δ Note
 these
 manifold
 and great
 Mysteries
 and mark
 these 7 diverse
 crosses with
 these 7 letters.

Note
 this
 Bond.

Δ – He is

Tuesday the 20 *Martii*

1582

Wensday. 21. *Martii* , *circa 2. a meridie*

Note this
Trumpeter

Δ After appearance was had, there cam in one before Michael (who
sat in his seat) and Uriel leaned on the table (as he, usually did). This seemed
to be a trumpeter: he was all in white, and his garments bespotted with blud.
he had nothing on his hed. his heare very long hanging behynde him on his
sholders. The Trumpet seamed to be gold. The sownd therof was
very playne.

We were
commanded
not to ax
of the appa
rayle of
Michael.

Δ I axed of my skryer, in what manner Uriel now shewed, (and Michael likewise.)
Then Michael said, I warned the for axing of my apparell or manner.

Et hæc est Gloria illius, quæ non commovebitur ab impiis.

Mi. *Quid vultis? Δ – Juxta voluntatem Dei, Sapientiam
nobis necessariam ꝑc.*

Mi. *Sapientia mundi, nihil est, peribit autem in æternum.
Veniat æternitas DOMINI, ab universis mundi partibus.*

Phanaël

*Venite, venite, sic vult DEUS ADONAY
fac officium Phanaël.*

Δ This Phanaël was the Trumpeter, (above mentioned) who thereupon blew
his Trumpet, Lustily, turning him self rownd abowt, to all the world.
Then, from 7 partes of the world, (being equally divided
abowt the Horizon,) cam 7 Cumpanyes of Pillers all of fyrye
cullour glittring. And every Cumpany of Pillers high and great
and as thowgh they were Pillers of fyre.
The Heaven, the Sonne, and, Mone and Sterrs seemed to tremble.

Mi – *Multiplex est Deus noster.*

Mi. Mark this Mystery Seven comprehendeth the Secrets
of Heven and erth: Seven knitteth mans sowle and
body together. (3, in sowle, and 4 in body)

In 7, thow shalt finde the Unitie

In 7, thow shalt finde the Trinitie

In 7, thow shalt find the Sonne, and the proportion of the
Holy Ghoste. O God, O God, O God, Thy Name (O God,)

be praysed ever, from thy 7 Thrones, from thy 7 Trumpets
and from thy 7 Angells. Δ – *Amen, Amen, Amen.*

7 < Thrones
Trumpets
Angells

Mi. In 7, God wrowght all things.

Note: In 7, and by 7 must you work all things

O Seven tymes Seven, Veritie, Vertue and Majestie
I Minister by thy licence This expownd, by thy
Vertue (Δ – Michael spake that, pointing to Uriel.)

Δ Michael and Uriel both kneeled down, and the Pillers of fyrie
and brasen cullour, cam nere, rownd abowt them uniformly.

Mi – *Sic est DEUS noster*

Δ One of the pillers leaned toward the skryer, and had like
a pommel or mace hed, on the top of it. And Michael with
great reverence toke out of the top of it a thing like an S

Δ Then leaned down 6 Pillers more: and Michael, cryed lowd

Unus est DEUS noster, Deus Deus noster

Δ Then orderly he opened all the pillers heds: and then the 7 joyned
all together, distinctly to be discerned

Mi. Note. Δ – There appeared, a great S

A

A

I

Δ Then the sides closed up, and hid those letters first shewed.

After that appered two letters more. E

M

Δ He made cursy, and semed to go fromward, and vanished away.

ΜΥΩΤΕΡΙΟΝ est E 8

Δ The Pillers all joyned together at the tops, making (as it were) one
Mace or Pommell, and so flew up to heven wards.

NOTE Δ There seamed two pillers more to come down from heven
(like the other in forme) and toke place there, where the
other 7, stode, which went away.

Note the
intrusion of
Error by the
Wicked powres
of Sathan

Δ Michael with his sword, Cut them asunder: and cryed out,

Away you workers of Iniquitie

Periit Malus cum malis.

Δ The pillers fell down, and the grownd swallowed them up.

Tanta est tua audacia Sathan.

Sed DEUS noster Vivit.

Δ The Pillers which before ascended, cam down joyntly: and oute
of them a Voyce saying ΔNON SUM

Δ Then the 7 pillers next his right hand, bowed to Michael, And
oute of them, a Voyce sayd SUM

Δ Then one of the Pillers stode higher than his fellows, and Michael
opened all the tops of them; and sayd

Orate. Δ – We prayed.

Mi. Write the Name down in the Tables.

Δ Then he toke of, 3 of the heds of the Pillers, and sett them downe
and there appered, **B T Z**, great letters in hollow places like
square Cumfit boxes.

Mi. *Ista sunt secreta secretorum*

Δ
Non Sum
I understand
the refusall of
those two
intruded
pillers

Invoke Nomen eius, aut nihil agere possumus.

The key of Prayer openeth all things. Δ – We prayed.

Then the other 4 pillers, bowingly shewed 4 letters thus, **K A S E**, and the number **30** with a prik under
Then the Pillers joyned theyr heds together very close, and flew up into the firmament with Thunder.

Sic Domine, Sic Sic.

Mi – Place these in the Table Δ – I wrote and he sayd, Thow hast done right. *Laudate nomen Domini, qui vivit in æternum.*

Δ – A voyce cam out of the next cumpany of the 7 pillers (joyning them selves to gither) saying *Ipse.*

Mi – *Et Misericordia tua Domine magna est.*

Δ – Michael kneled whan he sayd this

Δ – Michael shewed out of 4 of theyr heds, of the pillers, (and with all sayd) NO, NOT the Angels of heven, (but I,) are privie of these

things: Δ – So there appeared, 4 letters, **H E I D**

Δ – Then the other 3 pillers were opened and had **E N E** on theyr tops

Dominus collocatur in numero suo.

Δ – The 7 pillers mownted up into the ayre, and it thundred at their going

Δ – Then the fowrth Cumpany of pillers bowed to Michael: out of them cam a voyce. *Vivo sicut LEO in medio illorum*

Mi. *Et tua potestas magna est Ubique*

Δ – Then Michael pluckt of, five of the tops.

There appered **D** then they joyned all to gither: then appere? **E I M O**

Mi. *Hoc est sine præce*

Δ – The other two opened, and there appeared **30 A**

Δ – Then they closed up, and went away, with a great thunder

Δ – Then cam 7 other pillers to Michael, and a voyce oute of them
Saying, *Serpens sum, et devoravi serpentem.*

Mi. *Et bonis et malis serpens es Domine*

Δ – Then they closed all up; and Michael sayd, *Orate.* Δ – We prayed

Δ – Then Michaël toke of, the heds of 4: then appeared first an **I** then **M E G**

Then he opened the other 3. and **C B E** appeared.

Mi. *Numerus illius, est nulli cognitus.*

Δ – They joyned theyr heds all together, and ascended up to heven ward: and great lightening after them.

Δ – Then cam an other Septenarie of Pillers: and oute of them a Voyce, saying
Ignis sum penetrabilis

Mi – *Et sit nobiscum, Ô Deus.* Pray. Δ – We prayed.

Δ – Then he opened 4 of theyr heds and appered in them **I L A O**.

Δ – They closed together agayne.

Δ – Then one other was opened, and **I** appered.

Δ – Then **21** appered, and did shut up agayn.

Δ – Then he smote fyre out of the last pyller, and it thundred and there seemed to come out of it innumerable Angels like little children

Note these Innumerable Angels.

with wings, and there appere: **N**, and suddenly did shut up.

Sic, sic, sic Deus noster.

Δ — Then they joynd all together, and flew up.

Mi. Note down in the table. Δ — I noted them down.

Δ — Then cam the last 7 pillers, and out of them this voyce,
Finis.

Gaudium et Lux nostra Deus.

Δ — Then they closed all in one.

Mi — *Orate* Δ — We prayed.

Δ — Then 6 of the heds opened and appered **I H R L A A.**

Δ — Then the seventh opened: Then seamed trees to leap up,
and hills, and the seas and waters to be trubbled, and thrown up

Δ — A voyce cam out of the Pillers: *Consummatum est.*

Δ — There appeared in that Piller **21**
8

Δ — They joynd together and flew up to heven ward.

Mi — **VNVS VNVS VNVS**

Omnis caro timet vocem eius

Pray. Δ — We prayed.

Δ — Note: my skryer was very faynt, and his hed in manner gyddy, and his eyes,
dasyling, by reason of the sights seen so bright, and fyrie, &c.
Michael bad of him be of good cumfort, and sayd he shold do well.

Mi — Cease for a quarter of an howre.

Δ — After we had stayed for a quarter of an howre, we comming to the
stone agayne, fownd him come all ready to the stone: and Uriel
with him. Who, allso, had byn by, all the while, during the
Mysterie of the .7. pillers.

Mic — Set two stoles in the myddst of the flowre.

on the one, set the stone: and at the other let him knele.
I will shut the eares of them in the howse, that none shall heare
us. I will shew great Mysteries.

Michael than, with a lowd voyce sayd,

Adeste Filiaē Bonitatis:

Ecce DEVS vester adest:

Venite.

Δ — There cam in 7 yong women apparelled all in Grene, having theyr heds rownd abowt
attyred all with greene silk, with a Wreath behinde hanging down to the grownd.
Michael stroke his sword over them, no fyre appearing. Then they kneeled: And
after, rose agayn.

Mi — *Scribe quæ vides.*

Δ — One of them stept out, with a little blue tablet in the forhed of her: and
in it written, **El.**

Δ — She stode a side, and an other cam in, after the same sort, with a great **M**, and a
little **e**, thus, **Me.**

The Third, cam as the other, and had **Ese**

The fowrth — **Iana**

The fifth — **Akele**

The sixth — **Azdo bn**

The seventh stepped furth with — **Stimcul**

*Filiae Bonita=
tis, or Filiolæ
lucis: vide
pagina sequente.*

Δ — They all together, sayd, Nos possumus in Cælis multa.
 Δ — Then they went theyr way, suddenly disapering.
 Mi — Note this in your next place but one. Δ — I did so.
 Mi — Go to the next place. Stay.
 Filiolæ Lucis Mi — *Adeste, Filiolæ Lucis.*
 Michael: Δ — They all, cam in agayn, and answered, *Adsumus Ô tu qui ante*
 one of them *faciem DEI stas.*
 that are } Mi — *Hiis nostris benefacite.*
 cownted to } Δ — They answered, all, *Factum erit.*
 stand before } Mi — *Valete.*
 the face of }
 God. }
 Filii Lucis Mi — *Et dixit Dominus, venite Filii Lucis.*
Venite In Tabernaculo meo.
Venite (inquam): Nam Nomen meum exaltatum est.
 Δ — Then cam in 7 yong men, all with bright cowntenance, white apparaled,
 with white silk uppon theyr heds, pendant behinde as the women had.
 One of them had a rownd purifyed pece or ball of Gold in his hand.
 One other had a ball of silver in his hand.
 Metalls The third a ball of Coper.
 The fowrth a ball of Tynne in his hand.
 The fifth had a ball of yern.
 The sixth had a rownd thing of Quicksylver, tossing it betwene his two hands.
 The last had a ball of Lead.
 They wer all apparayled of one sort.
 Perhaps here wanteth non Mi — *Quamvis ^ in uno generantur tempore, tamen unum sunt.*
 Δ — he that had the gold ball, had a rownd tablet of gold on his brest.
 and on it written a great I —————
 Filii Lucis Then he with the sylver ball, cam furth, with a golden tablet on his brest
 likewise, and on it written Ih —————
 He with the Copper ball, had in his tablet Ilr —————
 He with the tyn ball, had in his tablet Dmal —————
 He with the yern ball, had in his tablet Heeoa, and so went asyde ———
 He with the Mercury ball, had written Beigia —————
 The yong man with the leaden ball, had Stimcul —————
 Mi — *Facite pro illis, cum tempus erit.*
 Δ — All answered, *Volumus.*
 Mi — *Magna est Gloria Dei inter vos. Erit semper. Halleluyah.*
Valete.
 Δ — They made cursy, and went theyr way, mownting up to heven.
 Mi — *Dixit Deus, Memor esto nominis mei:*
Vos autem immemores estis.
 I speak to you. Δ — Hereupon, we prayed.
 Filia filiarum Mi — *Venite, Venite, Venite.*
Filiae Filiarum Lucis Venite.
 forte quæ
 Note these three descents. Qui habebitis filias venite nunc et semper.
 Qui habebitis filias venite nunc et semper.

Dixit Deus, Creavi Angelos meos, qui destruent Filias Terræ.

Theyr attyre

*Adsumus, Δ – Sayd 7 little wenches which cam in.
They were covered with white silk robes, and with
white abowt theyr hed, and pendant down behinde,
very long.*

Mi – *Vbi fuistis vos?* Δ – *They answered: In terris, cum sanctis
et in cælis, cum glorificatis.*

Δ – These spake not so playn, as the former did; but as though they had an
Impediment in theyr tung

Δ – They had, every one, somewhat in theyr hands, but my skryer could not judge
what things they were. Mi. *Non adhuc cognoscetur Mysterion hoc.*

Δ – Each had fowre square Tablets on theyr bosoms, as yf they were of white Ivory.

Filiæ
Filiarum

Δ – The first shewed on her Tablet a great S

The second _____ **Ab**

Ath The third _____ **Ath**

The fowrth _____ **Ized**

The fifth _____ **Ekiei**

Madimi The sixth _____ **Madimi**

The seventh _____ **Esemeli**

Mi – *Quid istis facietis?*

Erimus cum illis, in omnibus operibus illorum. Δ – They answered.

Mi – *Valete.* Δ – They answered, *Valeas et tu Magnus O in Cælis.*

Δ – And so they went away.

Mi – *Orate.* Δ – We prayed.

Filii filiorum

Mi – *Et misit filios filiorum, edocentes Israel.*

Mi – *Dixit Dominus, Venite ad vocem meam.*

Theyr Attire

*Adsumus, Δ – Sayd 7 little childern which cam in,
like boyes covered all with purple, with hanging sleeves
like preists or scholers gown sleeves: theyr heds attyred all
(after the former manner) with purple sylk.*

Mi – *Quid factum est inter filios hominum?*

Male vivunt (sayd they) nec habemus locum cum illis

tanta est illorum Iniustitia. Veh mundo, scandalis:

Veh scandalizantibus, veh illis quibus Nos non sumus.

Δ – These had tablets (on theyr brests) three cornerd, and seemed to be very grene
and in them, letters. The first had two letters in one: thus, of **E, L**:

E

The first _____ **E** — Δ He sayd, *Nec nomine meo timet Mundus.*

The second _____ **An** _____ *Nullus videbit faciem meam.*

The third _____ **Ave** — *Non est virgo super terram cui dicam.* [Δ And
pointed to his tablet, wherein that
word, Ave, was written.]

Rocle

The fowrth _____ **Liba** — *Tanta est infirmitas sanctitudinis Diei.
Benefacientes decesserunt ab illo.*

The fifth _____ **Rocle** — *Opera manuum illorum sunt vana.
Nemo autem videbit me.*

The sixth shewed his

Hagonel. Vide de
hoc Hagonel, lib. 4.

Tablet and said, *Ecce – Hagonel – Qui adhuc Sancti sunt, cum illis vivo.*

The seventh had on his tablet — **Ilemese** — *Hii imitaverunt doctrinam meam.*
In me Omnis sita est Doctrina.

Δ — I thowght my skryer had missherd, this word *Imitaverunt*,
for *Imitati sunt*. And Michael smyled and seemed to lawgh,
and sayd, *Non curat numerum Lupus*. And farder
he sayd, *Ne minimam detrahet a virtute, virtutem*.

Mi — *Estote cum illis: Estote (inquam cum istis) Estote*
(inquam) mecum. Valet.

Δ — So they went, making reverence, and went up to heven.

Mi — *Dictum est hoc tempore.*

Mi — Note this in thy Tables.

Dost thow understand it? Loke if thow canst.

*Urielis
officium*

Δ — He sayd to Uriel, it is thy part, to interpretate these things.

Ur. *Omnis Intelligentia est a Domino.*

Mi — *Et eius Nomen est Halleluyah.*

Compose a table, divided into 7 parts, square.

Note this
Table is
made
perfect in
the next
side
following.

S	A	A	I ²¹ / ₈	E M	M E	E ⁸ / ₈
B	T	Z	K	A	S	E ³⁰ / ₈
H	E	I	D	E	N	E
D	E	I	M	O	³⁰ / ₈	A
I ²⁶ / ₈	M	E	G	C	B	E
I	A ^L	L ^A	O	I ²¹ / ₈	21 8 ^V	N
I	H	R	L	A	A	²¹ / ₈

7. Names
of God

Ur. Those 7 names, which procede from the left hand to the right, are the
Names of God, not known to the Angels: neyther can be
spoken or red of man. Prove if thou canst reade them.

Beatus est qui secrete

Nomina sua conservat.

Note these
two orders
of Angels:
and Note
Uriel doth
have him self
one of the standers
before the face of God

Ur. These Names, bring furth 7 Angels: The 7 Angels, and Go=
vernors in the hevens next unto us*, which stand allwayes
before the face of God.

Sanctus Sanctus Sanctus

est ille DEVS noster.

NOTE
well this
Rule of
Arte.

Ur. Every letter of the Angels names, bringeth furth 7 dowghters.

Every dowghter bringeth furth her dowghter, which is

7. Every dowghter her dowghter bringeth furth, a
sonne. Every sonne in him self, is 7. Every sonne

hath his sonne, and his sonne is 7.

Let us praye the God of Seven, which was and is
and shall live for ever.

Vox Domini in Fortitudine

Vox Domini in Decore

Vox Domini revelat Secreta.

In templo eius, Laudemus Nomen eius El

Halleluyah

Filiae

See if thou canst now understand this table.

The Dowghters procede from the angle on the right hand, cleaving
the myddle: where theyr generation ceaseth.

Filii

The sonnes from the left hand to the right to the middle:

Note this
manner of
center
accoun=
ted.

Δ —

so proceding where theyr number endeth in one Centre.

The Residue thou mayst (by this Note) understande.

Then Michael, he stroke over us ward, with his sword, and the flame
of fire yssued oute.

Note of Numbers
with priks
signifying letters.

Loke to the Corner of the right hand, being the uppermost: where thou
shalt finde 8. Refer thyne eye to the upper number, and the
letter above it. But the Number must be fownd under neth,
bycause his prick so noteth.

Than procede to the names of the dowghters in the Table: and thou
shalt see that it is the first name of them: This shall teache
the.

l the first
daughter

Δ —

Loking now into my first and greatest Circle for 8, I finde it with
l over it. I take this to be the first Dowghter.

Ur.

You must in this square Table set E by the 8 and now
write them composedly in one letter, thus E

E

Nomen Domini vivit in æternum.

Ur.

Give over, for half an howre, and thou shalt be fully
instructed.

Δ —

I did so, and after half an howre comming to the stone,
I was willed to make a new square table of 7: and
to write and note, as it followeth.

S	A	A	I ²¹ ₈	E	M	E ⁸	– Vivit in cælis
B	T	Z	K	A	S	E ³⁰	– Deus noster
H	E	I	D	E	N	E	– Dux noster
D	E	I	M	O	30	A	– Hic est
I ²⁶	M	E	G	C	B	E	– Lux in æternum
I	L	A	O	I ²¹ ₈	V	N	– Finis est
I	H	R	L	A	A	²¹ ₈	– Vera est hæc tabula

*Vera est hæc Tabula, partim nobis cognita, et partim omnibus,
incognita. Vide iam.*

Note these
other pur=
poses

The 30 by E, in the second place, in the upper right corner, serveth not
in the consideration of the first Dowghters, but for an other purpose.

The **26** by **I**, serveth for an other purpose: but not for this Dowghters Dowghter.

The **21**, is **e**, and **8** with the prick under it is **l**: which together maketh **El**, or thus compownded as if it were one letter, **EL**

The Names in the great Seale must follow the Orthographie of this Table. *Virtus Vobiscum est.*

Orate. Δ – We prayed.

*Angeli
Lucis*

Δ – Then there appeared **S A A I ²¹ M EL**. Here is an **E** comprehended in **L**.
Ur. Read now the Table.

Angeli lucis Dei nostri

Et posuit angelos illius in medio illorum

Ur. In the table are the names of 7 Angels. The first is Zabathiel, beginning from the left uppermost corner: taking the corner letter first, and then that on the right hand above: and than that under the first, and than the third from the first, in the upper row: and then cornerwise down toward the left hand: and then to the fowrth letter from the first in the upper row: where there is **I** with **²¹8**, which maketh **el**. So have you **Zabathiel**.

1. Ur. Go forward. Δ – So, I finde next **Zedekieil**.

The true sownd Ur. this **I** in the last syllable augmenteth the true sownd of it.

3. Δ – Then next I finde **Madimiel**. — Ur. it is so.

4. Δ – Then ————— **Semiel**. — Ur. it is true.

5. Δ – Then ————— **Nogahel**. — Ur. it is so.

6. Δ – Then ————— **Corabiel**. — Ur. it is so.

7. Δ – Then ————— **Levanael**. — Ur. it is so.

Δ This name
Corabiel you
may see in *Ele=*
mentis Magicis Petri
de Abano in the
Considerations *Diei*))

Ur. Write these names in the Great Seal, next under the 7 names which thow wrotest last: *videlicet*, under **EL**, **An**, **Ave**, **∅C**. distinctly in great letters.

Ur. Make the **E** and **L** of **Zabathiel**, in one letter compownded, thus **ZABATHIEL**. In this, so fashion your **E** and **L**. And this name must be distributed in his letters into 7 sides of that innermost Heptagonum. For the other, I will teache you to dispose them. You must make for **IEL** (in this name onely) **I** with the **²¹8** annexed. So have you just 7 places.

Ur. The next five names thow shalt dispose in the five exterior angles of the Pentacle: every angle conteyning one whole name.

Ur. Set the first letters of these 5 names, (in Capitall letters) within the five acute internall angles of the Pentacle: and the rest of eche name following circularly from his Capitall letter, but in the 5 exterior obtuse angles of the Pentacle.

Ur. Set **Z**, of **Zedekieil** within the angle which standeth up toward the begynning of the greatest Circle. And so procede toward thy right hand.

Ur. In the middle now of thy Pentacle, make a cross  like a crucifix and write the last of those 7 names **Levanael** thus,

VA
LE  NA

Uriel. *Vidit DEVS, opus suum esse bonum
et cessavit a Labore suo.
Factum est.*

Δ — Michael stode up and sayd,
The æternall Blessing of God the FATHER,
The mercifull Goodnes of CHRIST, his SONNE
The unspeakable Dignitie of GOD the Holy GHOSTE
bless you, preserve you, and multiply your
doings in his Honor and Glory.

Uriel. *AMEN.*

Ur. | These Angels are the angells of the 7 Circles of Heven,
governing the Lightes of the .7. Circles.

Note these
two order
of Angels

| Blessed be GOD in us, and by us,
| Which stand contynually before
| the presence of GOD, for ever.

DIXI.

Δ — Whan may we be so bold, as to require your help agayn?

Mic — Whan so ever you will, we are ready.

Farewell.

Δ — *Sit Nomen Domini benedictum, ex hoc nunc,
et usque in sæcula sæculorum.*

Amen.

𐤅𐤍𐤅𐤍 } hebraicæ

Mysteriorum, liber *Tertius* Δ

Anno 1582:

Aprilis 28:

Liber 3⁹
Liber 4⁹

Anno 1582 Aprilis 28 a meridie hora 4.

E.T: Onely Michael appeared; Δ: And to diverse my complaynts, and requests sayde,
Mi: The lord shall consider thee in this world, and in the world to come.
E.T: All the chayre seemed on fyre.
Mi: This is one Action, in one person: I speak of you two.
Union of us Δ: You meane us two to be joynd so, and in mynde united, as yf we wer one man?
Mi: Thou understandest.
Take heade of punishment for your last slaknes.
Δ: Yf you mean any slaknes on my behalf, Truely it was and is for lak of habilitie to buy and prepare things, appointed of you. Procure I pray you habilitie, and so shall I make spede.
E.T: A great hill of gold with serpents lying on it appeared: he smyteth it with his sword, and it falleth into a mighty great water, hedlong.
Mi: Dost thou understand? Δ: No verylie.
worldly hability E.T: He razed the hill away, as though there had byn none; and sayd,
Mi: Lo, so it is of this worldly habilitie.
Δ: I pray you how must the Lamine be hanged?
The Lamin not simpler spoken: for no such lamyn was to be made Mi: As concerning the Lamine, it must be hanged unseen, in some skarf.
The Ring when it is made, I will lessen it according to my pleasure.
I meane by two Cubites, your usuall yarde.
Haste, for thou hast many things to do.
Glory be to God, Peace unto his Creatures. Mercy to the wicked,
Pele Forgiveness to the Faithfull: He liveth, Ô he rayngneth, O thou art mighty, PELE: thy name be blessed. Δ: Amen.
Ese Venito Ese, Δ: He cryed so with a lowd voyce.
E.T: he is now covered, in a myghty covering of fyre, of a great beawty. There standeth a thing before him. I cannot tell what it is.
Laudate Dominum in cælis.
Orate. Δ: we prayed.
E.T: His face remayneth covered with the fyre, but his body uncovered.
Mi: *Adesdum Ese.*
Iana *Adesdum Iana.*
Vobis dedit demonstracionem in Tabulis vris.
E.T: There appeare of the figure, (before, imperfect) two little women: One of them held up a Table which lightened terribly: so that all the stone was covered with a myst.
A voyce cam out of the myst, and sayd,
Creatio *Ex hiis creata sunt, et hæc sunt nomina illorum.*
E.T: The myst cleareth, and one of the women held up a Table, being thus written uppon.
Numerus Primus.
Δ: The Table semed square, and full of letters and numbers, and Crosses, in diverse places, diversly fashioned.
Δ: Remember, Ese and Iana; ar the thirdth and fowrth of the *Septem Filiæ Bonitatis, supra lib°. 2. °* They are thus in order these: EL, Me, Ese, Iana, Akele, Azdobn, Stimcul.

A finger cam out of the mist, and wyped oute, the first shew, with the Cross, letters, and numbers.

The second was in like wise.

The Third was a b with the taylor upward thus: *g*

The 52 with the three great **BBB** seme to be covered with Gold.

The two Crossed ones he did not wipe out with his finger.

The next he blotted oute.

He blotted not oute the three *f* with the 8 and 3.

The two barrs must go clere *f* and not towch the *f f f* the bars.

The *g*, the square, wherin it standeth, is all gold: and that he let stand.

Fire cam oute and burnt

The  is all of a bright cullour, like the brightnes of the Sonne, and that was not put out.

The places are very black, but where the letters, and numbers do stand.

E.T. hard a voyce saying, *Finis Tenebrarum: Halleluyah.*

E.T.: There commeth a hand and putteth the little woman into the clowde.

Mi: Prayse God: Be inwardly mery.

The Darkness is comprehended.

God bless you: God bless you: God blesse you.

You must leave of for an howre and a half: for you have .6. other Tables to write to night.

Prayse God: be joyfull.

After supper we resorted to our scholemaster.

E.T.: I here a voyce but see nothing: he sayeth,

Initium bonum in nomine ejus

et est. Halleluyah.

E.T.: Three quarters of the stone (on the right side) are dark, the other quarter is clere.

Filiae filiarum
Ese
vide lib.º2º

Mi: *Venite filiae filiarum ESE.*

Δ somewhat
wanteth

The nethermost

E.T.: There come six yong maydens, all in white apparell, alike:
Now they all be gonne into the dark parte of the stone, except one.

There cam a flame of fyre out of the dark, and in the flame written

Vnus on this manner: *V nus nus nus*

She that standeth without, putteth her hand into the dark: and pulleth out a ball of light: and threw it oute: and it waxed bigger and bigger and it Thundred.

Lux

E.T.: A voyce sayd, *Dies primus.*

An other voyce: *Ubi est Tabula?*

an answer: *Est, Est, Est.*

She wyndeth and turneth her self abowt, begynning at her hed, and so was Transformed into a Table, rownde.

E.T.: Three faces do shew and shote oute, and ever returned into one hed agayne: and with it cam a mervaylous swete savour.

The Table
cullored

The Table was of three cullours: white, redd, and a mixture of white

and red, changeably. A strong sowing cam withall, as of clattring of harness or fall of waters; or such like.

There cam a sterre shoting oute of the dark, and settled itself in the myddle of the Table: And the fyre which cam oute with the woman, did cumpas the Table abowt.

A voyce sayd, *O honor, Laus et gloria, Tibi qui es, et eris*

The Table sheweth wunderfull fayre and glorious.

Onely seven priks appeare on the Table.

The three angles of the triangle open, and in the lower point appeared a great A.

And in the right upper corner LV. (E.T: The Table trembled.)

And in the other Corner appeared thre circles of equall bignes, equally, or alike intersecting eche other  by theyr centers.

A voyce: *Unus est, Trinus est; in omni Angulo est.*

Omnia comprehendit: Fuit, est, et vobis erit.

Finis et Origo. (E.T: ô, ô; with a dullfull sownd, he pronownced.)

E.T: The woman sayeth, *Fui: sum quod non sum.* ^{Δ forte fui}

A voyce: *Lux non erat et nunc est.*

E.T: The woman being turned, from the shape of the Table, into womans shape agayn, went into the dark.

Then one part of the darknes diminished. In the dark was a mervaylous turmoyling, tossing, and stur, a long tyme during.

A voyce: For a tyme Nature can not abyde these sightes.

E.T: It is become Quiet, but dark still.

Prayer A voyce: Pray and that vehemently, For these things are not revealed without great prayer. 

E.T: After a long tyme there cam a woman: and flung up a ball like a glass: and a voyce was hard saying, *Fiat.*

The ball went into the darknes, and browght with it a great White Globe hollow transparent.

Then she had a Table abowt her neck, square of 12 places.

The woman seamed to daunce and swyng the Table:

Then cam a hand oute of the dark: and stroke her and she stode still, and becam fayrer: She sayd, *Ecce signum Incomprehensibilitatis;*

Water E.T: The woman is transformed into a water, and flyeth up into the Globe of Light. 

E.T: A voyce: *Est, Est, Est.*

E.T: One commeth, (a woman) owt of the Dark, very demurely, and soberly walking, carrying in her hand a little rownd ball: and threw it into the dark: and it becam a great thing of Earth. She taketh it in her hand agayne, and casteth it up into the rownd Globe and sayd, *Fiat.*

E.T: She turned her back toward E.T. and there appeared a Table divided in 24 parts. yt seemeth to be very square.

A voyce: *Scribe. Veritas est.*

E.T: A sword cam out of the Dark: and clave the woman a sunder, and the one half becam a man, and the other a woman, and they went and sat uppon the Ball of cley or erth. 

Man
Woman

Now seemeth the Dark part to quake.

A voyce ——— *Venito vasedg.*

E.T: There cometh a woman oute of the Dark: she sayd,

Vita hiis ex mea manu.

E.T: She sheweth a Table square full of holes, and many things creeping out of it. This Square is within a rownd.

A voyce ——— *O Lux Deus noster.*

Hamuthz Gethog.

E.T: Then stept out an other woman having a sword in her hand. She toke a thing oute of the dark (a bright thing) and Cut it in twayn and the one parte she cut into two unequal partes, and the other half she cutteth into a thowsand (or innumerable) partes. Then she toke all the partes up into her skyrt. She hath a Table, and it hangeth on her shulders She stept before the other woman, whose hed standeth in the dark.

Note this stepping before.

This woman her Table is fowre square. She is very bewtifull.

She sayd, *Lumina sunt hæc Intelligentiae tuæ.*

She sayd, *Fere nulli Credendus est hic numerus.*

The sterrs, sonne and Mone created

This woman taketh the little peces, and casteth them up, and they become little sparks of light: and of the things she cast, There were two great rownd things. And they were allso cast up to the white Transpa=rent Globe. And she went away into the Dark: which was, now, very much lessened.

Then the other woman (who was forestept) thrust oute her hed who had the rownd conteyning the Square, with the 36 places. She crymbleth clay, and it turneth to byrds. She seameth to be like a witch. Into the bosse of her Table, she put her hand and that bosse, was in the Dark and oute of the bosse, she seemed to fatch that Clay. She sayd,

Ad usum tuum Multiplicati sunt.

E.T: She went into the Dark.

E.T: A Voyce is hard saying,
Omnia gaudent fine.

...| hearbs,
&c.
E.T: There commeth oute a woman; out of the Dark. She plucketh at
the dark, and casteth it on the grownd, and it turneth to herbes, and plants
becomming like a garden, and they grow up very fast. She sayd,
Opus est.

...| Centre }
...| Darknes }
E.T: She hath a fowre square Table before her.
Then cam one, all in white, and taketh the Darknes, and wrappeth it up
and casteth it into the myddle of the Erthen Globe, on which appeared
Trees and plants.

E.T: Then appered Michael, his Chayre, and Table agayne manifestly: which
all this while, were not seen.

Mi: *Obumbrabit vestigia vestra veritatis Luce.*
The Actor, The Actor, The Actor:
One Disposer; he, which is one in all; and All in all:
bless you from the wickednes of Deceyte: Create you
new vessels: To whome I commyt you.

E.T: he holdeth his sword over us, in manner, out of the stone.

Mi: Fare Well. Serve God. Be patient.
Hate vayne glorie. Live justly. Amen.

Δ: What spede shall I make for the yard square Table, the wax, the
seale, and the Character? Mi: As thow ar motioned, so do.

Δ: *Gloria, Patri et F. et S.S. S.e.i.p.e.n.e.s.e.r.s.s. amen.*

Δ: Note, All the Tables before were by E.T, letter for letter noted out
of the stone standing before him all the while: and the
7 Tables following wer written by me as he repeted them orderly out of the stone.

Aprilis 29: Sonday: Nocte hora 8 1/4

E.T : Two appeare, Michael and Uriel.

Mi: *Et posuit illos in ministerium ejus.*
Quid desideratis?

Δ: *Sapientiam et scientiam nobis necessariam, et in Dei servitio potentem*
ad eius gloriam.

Mi: *Sapere, a Deo: Scire a Creatura et ex creaturis est.*

Δ I am not sure
if it wer Mi.
or Ur, that
called for them.
Δ
Ur: *Venite filiae.*

E.T: Seven women appeare bewtiful and fayre.

Mi: This work is of wisdom (Δ: Sayd Michael, and stode up.)

E.T, sayd to me (Δ), He putteth oute his sword and willeth me to sweare, to
that, that he willeth me: and to follow his cownsayle.

Mi: Wilt thou. Δ: Then with much ado, E.T. sayd as followeth,

E.T. his
promise
E.T: I promise, In the name of God the Father, God the sonne and God
the holy ghost, to performe that you shall will me, so far as it
shall lye in my powre.

E.T: Now they two seeme to confer together.

Mi: Now you towche world, and the doings uppon earth.
Now we shew unto you the lower world: The Governors that
work and rule under God: By whome you may have

practise.
The lower
world

To E.T. he
spake,

Filiae

49 good
Angels
Governors

The first
knowledge

powre to work such things, as shalbe to god his glorie, profit of your Cuntry, and the knowledge of his Creatures.

What I do wish thee to do, thou shalt here know, before thou go. We procede to one GOD, one knowledge, one Operation.

Venite filiae.

Behold these Tables: Herein lye theyr names that work under God uppon earth: not of the wicked, but of the Angels of Light.

The whole Government, doth consist in the hands of 49 (in God his Powre, Strength, Mercy, and Justice) whose names are here evident, excellent, and glorious.

Mark these Tables: Mark them. Record them to your [...]

This is the first knowledge. Here shall you have Wisdome. *Halleluyah.*

Mighty and Omnipotent art thou, O God, God, God, amongst thy Creatures: Thou fillest all things with thy excellent foresight. Thy Glorie be amongst us for ever. Δ: Amen.

E.T: All the 7 (which here appeare) joyne theyr Tables in One, which, before they held apart. And they be of this Forme all to_gither. The myddel most is a great Square and on eche side of it, One, as big as it, joyning close to it. And over it joyned two, which both together wer æquall to it: and under it, wer such other two, as may appear in this little pattern. Being thus joyned, a bright circle did cumpas and enclose them all, thus: but nothing was in the Circle.

The Circle abowt was bright
and Nothing in it./

- ET: One stept furth, and sayde,
 1: { Wilt thou have witt, and wisdome:
 Here, it is. (Δ: Pointing to the middle table.)
 2: { An other sayd, The Exaltation and Government of Princes, is in my
 hand. (Δ: Pointing to that on the left hand of the two uppermost.)
 3: { In Cownsaile and Nobilitie I prevayle. (Δ: Pointing to the other of the
 two uppermost: which is on the right hand.)
 4: The Gayne and Trade of Merchandise is in my hand: Lo, here it is.
 Δ: he pointed to the great table on the right side of the myddle Table,
 that I meane which is opposite to our right hand while we behold
 those 7 Tables.
 Δ I mar= 5: The Quality of the Earth, and waters, is my knowledge,
 vayne that the earth and waters are both ascribed to one. the right hand: of the two lowermost.)
 6: The motion of the Ayre, and those that move in it, are all
 known to me. Lo here they are. (Δ: pointing to the other Table
 below, on the left hand.)
 7: I signifie wisdome: In fire is my Government. I was in the be=
 gynning, and shalbe to the ende. (Δ: pointing to the great table
 on the left hand of the Middle Table.)
 Mi: Mark these mysteries: For, this knowne, the State of
 the whole earth is known, and all that is thereon.
 Mighty is God, yea mighty is he, who hath Composed for ever.
 Give diligent eye. be wise, mery, and pleasant in the
 Lorde; in whose Name, NOTE,
 Begynne the Middle Table &c. Δ: I wrote oute of the
 stone the whole 7 Tables (as you see them here with theyr numbers
 and letters) while E.T. did vew them in the stone, and orderly express them.
 Δ: As concerning 39 V . 47 L &c in the second Table, where are 7 places
 and there but 6 numbers and letters, and yet every place semeth to
 have a letter, in the judgment of E.T. his sight. Which is the
 Number and letter wanting, and where must it be placed?
 Mi: *Non potestis hoc videre sine ratione.*
 Δ: The Next day, as I was loking on the Tables being finished, and joyned
 all to gither in One Compownd Figure, E.T. cam to me, and
 stode by me, and his ey was on the forsayd place which I was forced to
 leave empty, in the 7th and last. And behold he saw hovering and
 hopping in the ayre, over the sayd place, and the next before it.
 And that, which I had placed the sixth, was to be put in the seventh
 place, and that which was wanting, was to be set in the sixth place
 being 30 N.
 E.T: Every of the 7 Tables, as they wer written out of the stone
 do seme afterward to burn all in fyre: and to stand in fyre.
 E.T: After all the Tables wer written, eche toke hir Table aparte agayn
 and stode in theyr order.
 E.T: Note moreover. The First, had Bokes in hir hand.
 Kings ————— The second, a crown in hir hand.
 Nobilitie ————— The Third, Robes.
 Merchants Δ — *Aqua* — The fowrth, *animal quadrupes vicium omnium colorum.*
Terra — The fifth, Herbes.
Aer — The sixth, a fanne.
Ignis — The seventh, a Flame of fyre in hir hand.

Mi: *Decedite in nomine eius, qui vos huc misit.*

A boke E.T: Uriel opened a boke in his own hand, and sayde,
 Ur: The Fowntayne of wisdome is opened. Nature shalbe
 knowne: Earth with her secrets disclosed.
 The Elements with theyr powres judged.
 Loke, if thou canst (in the name of God) understand these
 Tables. Δ: No: Not yet.

Erthly Actions Ur: Beholde; I teache. There are .49. Angels glorious and excellent,
 appointed for the government of all earthly actions: which 49 do
 work and dispose the will of the Creator: Limited from the
 begynning in strength, powre, and glorie.

Practise These shalbe Subject unto you, in the Name, and by Invo=
cating uppon the Name of GOD, which doth lighten, dispose and
 Cumfort you.
 By them shall you work, in the quieting of the estates, in learning
of wisdome: pacifying of the Nobilitie, judgement in the
 rest, as well in the depth of waters, secrets of the Ayre, as in the
 bowells and entrails of the Earth.

Ur: Theyr Names are comprehended within these Tables. Lo, he teacheth,
 he teacheth, Lo, he instructeth, which is holy, and most highest.
 Take hede, thou abuse not this Excellency, nor overshadow it with
 vanitie, But stick firmly, absolutely, and perfectly, in the love
of god (for his honor) to gither.

We two to_gither Be mery in him: Prayse his name. Honor him in his Saints. Behold
 him in wisdome: And shew him in understanding.
 Glorie be to him; To thee ô Lord, whose name perseth through the earth.
 Glorie be to thee, for ever. Δ: *Amen, Amen, Amen.*

Ur: Lo, I will breifly teache thee; you shall know the Mysteries in him:
 and by him, which is a Myserie in all things.
 The letters are standing uppon 7 equall numbers. The Number before
 them is signifying, teaching and instructing (from the first Table
 to the last,) which are the letters that shalbe joyned to gither:
 begynning all, with B, according to the disposition of the number
 untill the 29 ⁴⁹ general names be known. The first 29 are more
 excellent than the rest. Every Name doth consist uppon the quantitie
 of the place: Everie place with addition bringeth furth his name,
 which are 49. ———I have sayde.———

*Δ Vide ipanum
 Tabulam ho=
 rum 49 nomen
 Collectam, pa=
 gina sequente.
 The first 29

Δ: I pray you to tell me the first Name. Ur: The first Name is BALIGON.

he ment to E.T. Mi: I have to say to the, and so have I done:
 Δ: Now he spake to E.T., of the matter he sware him to, at the begynning of
 this last instruction: and he told me afterward what Michael had willed
 and moved him unto. Wherat he seamed very sore disquietted: and sayd thus to me,

E.T: He sayd that I must betake my self to the world, and forsake the
 world. That is that I shold marry. Which thing to do, I have no na=
 turall inclination: neyther with a safe Conscience may I do it, contrary
to my vow and profession. Wherefore I think and hope, there is
 some other meaning in these theyr wordes.

E.T. must marry

Mi: Thow must of force kepe it.
 Thow knowest our mynde.

Δ: *Deo opt Max. omnium honor laus et gloria
 in sæcula sæculorum. Amen.*

Ended, *hora noctis, 11 1/2 circiter.*

Coordinatio Angelorum bonorum 49,
per Jo: Dee, ita disposita:

Δ: E.T. wold not willingly now deale with the former Creatures, utterly misliking and discrediting them, bycause they willed him to marry. Neyther wold he put of his hat in any prayer to god, for the Action with them: where=uppon I went into my Oratorie, and called unto God, for his divine help for the understanding of his laws and vertues which he hath established in and amongst his Creatures, for the benefyt of mankinde, in his service, and for his glorie &c.

E.T. is to marry

And commyng to the stone, E.T. saw there those two, whom hitherto, we wer instructed to be Michael and Uriel.

E.T: Michael and Uriel, both kneled holding up theyr hands: and Michael seamed to sweat water abundantly, somewhat reddish or bluddish. There cam 7 Bundells down, (like faggots) from heven ward. And Michael taketh them kneeling. And Uriel taketh a thing like a superaltare and layeth it uppon the Table: and with a thing like a senser doth make perfume at the fowre corners of the Table: the smoke ascending up: and the senser, at the last, being set on the Table it seemed to fall throwgh the Table.

Uriel his manner of apparition

URIEL semeth to be all in a white long robe tucked up: his garment full of plights and seemed now to have wyngs. (which, hitherto, from the begynning of these kinde of Actions he did not) and on his hed a bewtifull crown, with a white Cross over the Crown.

Uriel taketh the .7. Bundells from Michael: and with reverence layeth them on the forsayd Superaltare.

A Glorious man

E.T: There commeth a man, as thowgh he were all of perfect pure glistring gold: somtyme seeming to have One eye, and somtyme Three.

From under the Table commeth a great smoke, and the place semeth to shake.

Uriel lieth now prostrate on his face: and Michael contynually prayed sweating.

All creatures

The Glorious man seemed to open the Covering of the .7. bundells (being of diverse cullored sylk,) and there appered, that these Bundells seemed to have in them, of all Creatures some, in most glorious shew.

The glorious man seemed to stand uppon a little hill of flaming fyre. He taketh of, of one of the Bundells a thing lyke a little byrd; and it hoovereth affore him as thowgh it had life: and than it rested uppon the thing like a superaltare.

A description of the glorious man.

This glorious man seemeth to be open before, and his brest somewhat spotted with blud. He hath a berd forked of brownish cullour, his heare of his hed, long, hanging down to his sholders: but his face, for beutifull glittring, can not be discerned. His heares do shake, as thowgh the wynde carryed them.

This man blesseth the bird, making a Cross over it: and so he did three tymes. He looketh up to heven.

Many cullors in all his garments are shewed in sequentibus libris

Now the byrd, which, before, seamed to be but as byg as a sparrow, seameth to be as great as a swanne: very beutifull: but of many cullours. Now looketh Michael up, and held up his hands to heven, and sayeth,

Sic, Sic, Sic, Deus noster.

Uriel, (sayd)-- *Multiplicabit omnia, benedictione sua.*

The former Bewtifull man taketh this fowle, setteth it on the bundell, and on the place, from whence it was taken: And, now, the place

where this byrd stode before, seemeth allso to be (proportionally) waxed big, as the byrd, (thus enlarged).

The Yoaking
or cuppling of
the two byrds.

This man taketh an other byrd, and putteth the wyng of it, behind the wyng of the first (as though he yoked them.)

This second byrd, at this his first taking, was as byg, as the first was become, (encreased, as it shewed), and it was allso a very bewtifull one.

E.T: All is suddenly dark, and nothing to be seen, neyther Chayre, nor anything els.

E.T: A voyce was hard, like Michael his voyce, saying,
It was a byrd, and is a byrd, absent there is nothing but Quantitie.

Δ
E.T. sayd the
voyce to be
like Michael
his voyce.
Necessitie.

A voyce: Beleve. The world is of Necessitie: His Necessitie is governed by supernaturall wisdome,
Necessarily you fall: and of Necessitie shall rise agayne.
Follow me, love me: embrace me: behold, I, AM.

E.T: Now all the Darknes vanished, the man is gon. Uriel standeth at the Table, and Michael sitteth now in his Chayre: and sayd,

Mi: This doth GOD work for your understanding.

vayne to stryve

It is in vayne to stryve: All Government is in his hands.
What will you els, what will you els?

Δ
forte your

Δ: *Progressum et profectum in virtute et veritate ad Dei honorem et gloriam.*

Mi. This hath answered all [y]our Cavillations.

Δ What hath answered all our Cavillations?

Mi. Thow hast written.

One thing you shall see more, as a persuasion to the Infirmitie.

E.T: The two byrds, which were there, before, and gon out of sight, now are shewed agayn: but none of the bundells appere.

They seme to grow to a huge bignes, as byg as mowntaynes: incredibly byg: and they seeme to hover up in the ayre, and to fly up toward heven, and with theyr wyngs to towch the sky: And one of them with his bill seemeth to take sterrs into it: and the other bird to take them from the same byrd, and to place them agayn in the skye.
And this they did very often: and in diverse places of the heven with great celeritie.

The byrds towch
the sky and
sterrs

After this they semed to fly over Cities, and townes, and to break the clowdes in peces, as they passed: and to cause all dust to flye from all walls, and towres, as they passed, and so to make them clene.
And in the streetes, as these two Byrds flew, seemed diverse brave fellows, like bisshops, and Princis and Kings, to pass: and by the wyngs of these byrds, they were stricken down. But simple seely ones, like beggers, lame and halt, childern, and old aged men, and wemen, seemed to pass so quietly, untowched and unoverthrown of these two Byrds.

And than they seemed to come to a place, where they lifted up, with the endes of theyr wyngs, fowre Carkasses of dead men (owte of the grownde) with crownes on theyr heds: wherof one seemed to be a Childe.

First these 4, seemed leane, and deade: Then they seemed quick
and in good liking: And they being raysed up: parted eche from the
other, and went into 4 sundry wayes, Est, West, North and
Sowth.

Now these two fowles having theyr wyngs joyned together, light uppon
a great hill: and there the First fowle gryped the erth mightly
and there appeared diverse Metalls, and the Fowle spurned them away,
still.

Then appeared an old mans hed, heare and all, on; very much
wythered. They tossed it betwene them, with theyr feete:

And they brake it: And in the hed appeared (in steede of the
braynes) a stone, rownd, of the bignes of A Tennez ball
of 4, cullours, white, black, red, and greene.

One of them (he that brake the skull), putteth that rownd stone
to the others mowth or byll.

The other eateth or nybbleth on it, and so doth the other allso.

G

Now these two byrds, are turned into men: And eche of
them have two Crownes like paper Crownes, white and
bright, but seeme not to be sylver. Theyr teeth are gold,
and so likewise theyr hands, feete, tung, eyes, and ears likewise
All gold.

On eche of these two men, ar 26 Crownes of Gold, on theyr
right sholders, every of them, greater then other.

They have, by theyr sides, Sachels, like palmers bags, full of gold,
and they take it oute, and seemed to sow it, as corne; going or
stepping forward, like Seedmen.

E.T: Then sayd Michael, This, is the ende.

E.T: The two men be vanished away.

Mi: Learne the Myserie hereof.

Δ: Teache us (ô ye spirituall Creatures.) than sayd Michael,

Mi: Joye and helth give unto the riche:

Open strong locks:

Be Mercifull to the wicked:

Pluck up the poore:

Read unto the Ignorant:

I have satisfyed thee: Understand:

Read them over: God shall give thee some light in them. I have
satisfyed thee: Both, How you shalbe joyned,

By whome,

To what intent, and purpose:

What you are,

What you were,

What you shalbe, (*videlicet*) in Deo.

Lok up this Myserie:

*Forget not our Cownsayle:

Ô GOD, thow openest all things: Secret are thy Mysteries
and holy is thy name, for ever,
The vertue of his presence, here left, be
amongst you.

Δ: Amen.

Δ: What am I to do, with the wax, the Table, the ring or
the Lamine? &c.

Mi: When the things be ready, then thow shalt know, how to use them.

Δ: How shall I do for the graving of the ring; May not another
man do it, though, E.T. Grave it not?

Mi: Cause them to be made up, (according to instruction) by any honest man.

Δ: What say you as concerning the Chamber, for our practise?
May my fardermost little chamber, serve, yf the bet be taken downe?

Mi: At the next Call, for the Chamber, you shall know what to do.

Δ: *Benedictus Deus in donis suis:*

et sanctus in omnibus operibus eius.

Amen. ended hor. 4 1/2

Elias Ashmole's Preface:

Be it remembred, That the 20th: of August 1672, I received by the hands of my Servant Samuell Story, a parcell of Dr: Dee's Manuscripts, all written with his owne hand; vizt: his Conferences with Angells, which first began the 22th of Dec: anno: 1581, & continued to the end of May anno: 1583, where the printed Booke of the remaining Conferences (published by Dr: Casaubon) begins, & are bound up in this volume.

Beside these, the Booke intituled, *The 48 Claves Angelicæ*, also, *Liber Scientia Terrestris Auxilii & Victoria* (These two being those very individuall Bookes which the Angells commanded to be ⁺burnt , & were after ⁺⁺restored by them as appeares by the printed Relation of Dr: Dee's Actions with Spirits pag: 418 & 419) The Booke intituled *De Heptarchia Mystica Collectaneorum Lib: Primus*, and a Booke of *Invocations or Calls*, begining with the Squares filld with letters, about the Black Cross. These 4 Bookes I have bound up in another volume.

All which, were a few daies before delivered to my said Servant, for my perusall (I being then at Dr: William Lillies house at Hersham in Surrey) by my good freind Mr: Thomas Wale, one of his Majesties Warders in the Tower of London.

+10. April } 1586
++ 30. April }

The 5th: of Sept: following Mr: Wale (having heard of my retourne to Towne) came to my office in the Excise Office in Broadstreete, & told me he was content to exchange all the foresaid Bookes, for one of myne, vizt: *The Institution, Lawes & Ceremonies of the most Noble Order of the Garter*, to this I agreed, and provided one, which I sent him fairely bound, & gilt on the Back.

As a further testimony of the sence of Mr. Wales kindnes; shortly after his death, I sent for his son, & bestowed on him, one of my Deputies places in the Excise, with an allowance of 80 £ per Annum.

On the 10th: of the said Sept: Mr: Wale came thither to me againe, & brought his wife with him, from her I received the following account of the preservation of these Bookes, even till they came to my hands, vizt: That her former Husband was one Mr: Jones a Confectioner, who formerly dwelt at the Plow in Lumbardstreet London, & who, shortly after they were married, tooke her with him into Alde streete among the Joyners, to buy some Houshold stuff, where (at the Corner house) they saw a Chest of Cedarwood, about a yard & halfe long, whose Lock & Hinges, being of extraordinary neate worke, invited them to buy it. The Master of the shop told them it had ben parcell of the Goods of Mr: John Woodall Chirurgeon (father to Mr: Tho: Woodall Late Serjant Chirurgeon to his now Majestie King Charles the 2d: (my intimate friend) and tis very probable he bought it after Dr: Dee's death, when his goods were exposed to Sale.

Twenty yeares after this (& about 4 yeares before the fatall Fire of London) she & her said husband occasionally removing this Chest out of its usuall place, thought they heard some loose thing rattle in it, toward the right hand end, under the Box or Till thereof, & by shaking it, were fully satisfied it was so: Hereupon her Husband thrust a peece of Iron into a small Crevise at the bottome of the Chest, & thereupon appeared a private drawer, which being drawne out, therein were found divers Bookes in Manuscript, & papers, together with a litle Box, & therein a Chaplet of Olive Beades, & a Cross of the same wood, hanging at the end of them.

They made no great matter of these Bookes &c: because they understood them not, which occasioned their servant Maide to wast about one halfe of them under Pyes & other like uses, which when discovered, they kept the rest more safe.

About two yeares after the discovery of these Bookes, Mr: Jones died, & when the fire of London hapned, though the Chest perished in the Flames, because not easily to be removed, yet the Bookes were taken out & carried with the rest of Mrs: Jones her goods into Moorefields, & being brought safely back, she tooke care to preserve them; and after marrying with the foresaid Mr: Wale, he came to the knowledge of them, & thereupon, with her consent, sent them to me, as I have before set downe.

*Ad Deum Omnipotentem Protestatio fidelis:
ad perpetuam rei memoriam Anno 1582.*

O God Almighty, thou knowest, & art my director, and witness herein, That I have from my youth up, desired & prayed unto thee for pure & sound wisdom and understanding of some of thy truths natural and artificial: such, as by which, thy wisdom, goodness & power bestowed in the frame of the word might be brought, in some bountifull measure under the Talent of my capacity, to thy honor & glory, & the benefit of thy Servants, my brethren & Sisters, in, & by thy Christ our Saviour. And for as much as, many yeeres, in many places, far & nere, in many books, & sundry languages, I have sought, & studied; and with sundry men conferred, and with my owne reasonable discourse labored, whereby to fynde or get some ynckling, glyms, or beame of such the forsaid radical truths: But, (to be brief) after all my forsaid endeavor I could fynde no other way, to such true wisdom atteyning, but by thy extraordinary gift: and by no vulgar schole doctrine, or humane Invention. And, Seeing, I have read in thy books, & records, how Enoch enjoyed thy favor and conversation, with Moyses thou wast familiar: And also that to Abraham, Isaac, and Jacob, Josua, Gedeon, Esdras, Daniel, Tobias, and sundry other, thy good Angels were sent, by thy disposition, to instruct them, informe them, help them, yea in worldly and domesticall affaires, yea and sometimes to satisfy theyr desires, doubts & questions of thy Secrets. And furthermore Considering, the Shew stone, which the high priests did use, by thy owne ordering: wherein they had lights and Judgments in theyr great doubts: and considering also that thou (O God) didst not refuse to instruct thy prophets, (then, called Seers) to give true answers to common people of things æconomically, as Samuel, for Saul seeking for his fathers asses being gone astray: and of other things vulgar true predictions, whereby to win credyt unto thy weightier affaires: And thinking with my self, the lack of thy wisdom; to me, to be of more importance, then the value of an Asse or two, could be to Cis, (Saul his father): And remembring what good counsaile thy Apostle James giveth, saying, *Si quis autem vestrum indiget sapientia, postulet a Deo, &c.* And that Salomon the wise, did so, even immediately by thy self, attayne to his wonderfull wisdom. Therefore, Seeing I was sufficiently thought and confirmed, that this wisdom could not be come by at mans hand or by humane power, but onely from thee (ô God) mediately or immediately) And having allwayes a great regarde & care to beware of the filthy abuse of such as willingly and wetingly, did invoke & consult (in diverse sorts) Spirituall creatures of the damned sort: angels of darknes, forgers & patrons of lies & untruthes: I did fly unto thee by hartly prayer, full oft, & in sundry manners: sometymes crying unto thee, *Mittas lucem tuam et veritatem tuam, que me ducant &c.* sometymes *Recte Sapere et Intelligere doceto me, Nam sapientia tua totum est quod volo: &c.* sometymes, *Da verbum tuum in ore meo, et sapientiam*

*
*Numquid non est
 Deus in Israël,
 ut eatis ad con-
 sulendum Beelze-
 bub, deum Accaron:
 Reg 4. cap:1.*

tuam in corde meo fige &c. And having perceyved by some slight experiens with two diverse persons, that thow hadst a speciall care to give me thy light, and truth, by thy holy and true ministers Angelicall and Spirituall: and at length, hearing of one, (a master of Arts and a preacher of thy word admitted) accownted as a good Seer and skryer of Spirituall apparitions, in Christalline receptacle, or in open ayre, by his practise procured: and trusting to frame him, by my earnest & faithfull prayers unto the (my God) to some my help in my forsayd Studies: tyll, thow (o hevenly father) woldest by thy unserchable proveydence, send me some apter man or means thereto. Thereuppon trying him and using him, I fownd great diversity betwene his private usuall manner, and intente of practice, and my pure, sincere, devowte, & faithfull prayer unto the onely. And therefore often & fervently I exhorted him to the good; and reproved both him, and his ministers, with my no small danger, but that thow (in manner unherd of) didst pitch thy holy tente to my defence, and cumfert, in conflict most terrible: as thow best knowest o God, and I willed him thereuppon to preach thy mercyes, & the verity of the kingly prophet his testimony, *Castra metatur Angelus Domini, in Circuitu timentium eum.* And out of Roger Bachon his boke written *De mirabili potestate Artis et Naturæ*, (where he writeth against the wycked Divil callers) I noted unto him this sentence, *Facilius (sine comparatione a *Deo impetrandum foret, vel a bonis spiritibus, quicquid homini utile reputare &c.* Which my cownsayle he promised me to follow, as thow art witnes, ô our true & almighty God. And as thy good spirituall creatures neyther had delight in the man, neyther wold so playnely & preistly give me theyr answers or informations by him, that he might be hable to perceyve the pith therof. So was he at length very unwilling to here him self rebuked for his nawghtynes, and to be barred from the Mysteries of thy truthes understanding; which were the onely things that I desyred, throwgh thy grace, o our most mercifull God. Therefore, as well for a Memoriall answerable to the premisses, as for the better warrant of my Such exercises to be made accownt of, hereafter: (leaving all unto thy infinite mercies, and unsearchable providence,) I have thowght it not impertinent, to note downe, even in this place one of the last Actions, which I had with the forsayd preacher: When I made earnest & faythfull petition unto the (o the true and Almighty God) for sending, unto my cumfort & erudition, (yf it were thy blessed will,) thy holy, & mighty Angel Annael: of whome and of all the Hierarchies hevenly all prayse honor & thanks, be rendred unto thy divine majestie: now & ever & worlde without ende. *Amen. Amen. Amen.*

ritie.:

Δ
There appered a
great number of
dead mens skulls,
likewise.

Δ – After my fervent prayers made to God, for his mercifull cumfort and instruction, throwgh the ministry of his holy and myghty Angel, named Anael, (yf it wer his divine pleasure) I willed, the skryer, (named Saul) to loke into my great Chrystaline Globe, yf God had sent his holy Angel Anael, or no: And Saul loking into my forsayd stone, (or Chrystall Globe) for to espie Anael, he saw there ^Δ one, which answered to that name. But being earnestly requested of me to tell the Truthe yf he were Anael, An other did appere very bewtifull, with apparell yellow, glittering, like gold: and his hed had beames like ster beams, blasing, and spredding from it; his eyes fyrie. He wrote in the stone very much in hebrue letters, and the letters seamed all transparent gold: which, Saul was not able eyther presently to reade, that I might write after his voyce, neyther to imitate the letters in short tyme.

A bright star, did go up and down by him.

There appeared allso a white* dog, with a long hed.

And many other visions appeared, with this second: The first being voyded quite away. Thereuppon I sayd, as followeth,

Δ – *In nomine Jesu Christi, Quis tu es?* — He answered
AN – *Potestas omnis, in me sita est.* to Saul his
Δ – *Quæ?* hearing.

AN – *Bona, et mala.*

Δ – Then appeared in the stone, these two letters **M.G.**
I then axing him some questions, *de Thesauro abscondito:*
He answered,

AN – *Ne perturbes: Nam hæ sunt Nugæ.*

And withall appeared many dedd mens skulls,
on his left hand.

He sayd to me,

AN – *Ubi est potestas tua?*

Δ – *Cur quæris de potestate aliqua mea?*

AN – *Cur? Signifi, non mihi placet.*

Δ – I, thereuppon, set by him, the stone in the frame:
and sayd,

Δ – *An bonus aliquis Angelus, assignatus est huic speculo?*

AN – *Etiam.*

Δ – *Quis?*

AN – מִיכָאֵל – he answered, by the shew of these letters in the stone.

Δ – *Bonus ne ille Angelus, de quo in scripturis fit mentio?*

AN – *Maximè.*

Δ – *Fieri ne potest, quod ego eundem videam, et cum illo agam?*

AN – *Ita.* and therewith appeared this character —

Δ – *Quid per hoc, significare velis?*

AN – *Alterius Angeli character est.*

Δ – *Cur hîc, et nunc ostendis?*

AN – *Causam ob magnam.* – Make an ende: It shalbe declared, but not by me.

Δ – By whome then?

Prayer
Fasting

AN – By him that is assigned to the stone: but not, tyll after the feast. And then thou must prepare thyself, to prayer and fasting.
In the Name of God, be secret: and in all thy doings praying, tyll thou hast thy desyre: which shall not be far of.
After Newyeres tyde, Deale, but not on the Sabaoth day.
Pray continually.
When it shall pleas god, to stir the up, Then procede. In the brightest day, when the Sonne shyneth: In the morning, fasting, begynne to pray.
In the Sonne Set the stone.
Deale both kneeling, and sitting. I have done for this tyme.
My name is ANNAEL.
I will speak ones more to the: and than fare well: for thou shalt not have me any more.

Be not to hasty in wrath.

Δ – Is this, that, you ment to speak?

AN – I: Do good to all men. God hath sufficient for the, and for all men.

Fare well.

Δ – *Gloria patri et filio et spiritui sancto. Sicut erat in principio, et nunc et semper: et in sæcula sæculorum.*

Amen.

Δ – Remember, that diverse other particulars, mowght have byn Noted of this dayes Action: but these may suffice: And yet it is not to be forgotten, that as he sayd his name was Annael (with a dubble n) so he also confessed him self to be the same Annaël which is *prepositus orbis veneris*: and also Chief governor Generall of this period, as I have Noted in my boke of Famous and rich Discoveries.

Consider and }
Remember.: } That this Note, of the Action, (had with holy ANNAEL),
is, of prince Befafes, (otherwise called Obelison) accountd
as the Prolog of my first boke of mysticall exercises

At Mortlak

In nomine Jesu CHRISTI. Amen.

Anno 1582. Martii die. 10. hora 11 $\frac{1}{4}$ Ante Meridiem. Saturday

△
Note: he
had two dayes
before made the
like demannde
and request unto
me: but he went
away unsatisfied,
for his comming
was to entrap
me, yf I had had
any dealing with

wicked spirits
as he confessed
often tymes after:
and that he was
set on, &c.

△ – One Mr. Edward Talbot cam* to my howse, and he being willing and desyrus to see or shew some thing in spirituall practise, wold have had me to have done some thing therein. And I truly excused myself therein: as not in the, vulgarly accownted Magik, neyther studied, or exercised: But confessed my self, long tyme to have byn desyrus to have help in my philosophicall studies throwgh the Cumpany and information of the blessed Angels of God. And there=uppon, I browght furth to him, my stone in the frame, (which was given me of a frende) and I sayd unto him, that I was credibly informed, that to it (after a sort) were answerable *Aliqui Angeli boni*: And allso that I was ones willed by a Skryer, to call for the good Angel Anchor, to appere in that stone to my owne sight. And therfore I desyred him to call him: and (yf he wold) Anachor and Anilos likewise, accownted good Angels, for I was not prepared thereunto. &c. He than settled him self to the Action: and on his knees att my desk (setting the stone before him) fell to prayer and entreaty &c. In the mean space, I, in my Oratory did pray, and make motion to god, and his good Creatures for the furduring of this Action. And within one quarter of an howre (or less) he had sight of one in the stone. but he still expected for two more: deeming this to be one of the three (namely Anchor Anachor Anilos). But I then cam to him, to the stone: And after some thanks to God, and Wellcome to the good Creature, used; I required to know his name. And he spake plainly, (to the hearing of E.T.) that his name is URIEL.

△ – Are you one of them (sayd I, John Dee) that are answerable, (uppon due observations performed) to this stone?

URIEL – I am.

△ – Are there any more besyde you?

UR – Michaël and Raphaël. But, *Michaël est princeps in operibus nostris.*

△ – ys my boke, of Soyga, of any excellency?

UR – *Liber ille, erat Adæ in Paradiso revelatus, per Angelos Dei bonos.*

△ – Will you give me any instructions, how I may read those Tables of Soyga?

UR – I can – But *solus Michaël illius libri est interpretator.*

△ – I was told, that after I could read that boke, I shold live but two yeres and a half.

UR – Thow shallt live an Hundred and od yeres.

△ – What may I, or must I do, to have the sight, and presence, of Michael, that blessed angel?

UR – *Præsentias nostras postulate et invoke, sinceritate et humilitate. Et Anchor, Anachor, et Anilos, non sunt in hunc Lapidem Invocandi.*

△ – Oh, my Great and long desyre hath byn to be hable to read those Tables of Soyga.

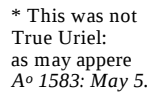

UR – *Hæc maximè respiciunt Michaëlem. Michaël est Angelus, qui illuminat gressus tuos. Et hæc revelantur in virtute et veritate non vi.*

△ – Is there any speciall tyme, or howre to be observed, to deale for the enjoying of Michael?

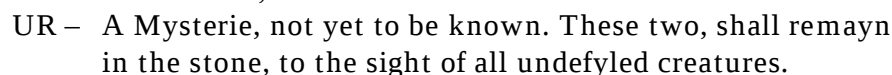

UR – *Omnis hora, est hora nobis.*

△ – After this, there appered △ in the stone a strange seale, or characterismus of this fashion ensuing:

△:
An illuding
spirit straight
way intruded
him self, and
this charac=
ter: as may
appere *Libri
Quinti Appendice*
where the
character is
described exactly.

Amen.

Note.
Δ in this time
there appered
in the stone,
a riche chayre:
and after a little
while, it was
out of sight.

*Erronice,
contra igno=
rantiam meum
vide post.

you must use a fowre square Table, two cubits square: Where uppon must be set *Sigillum Divinitatis Dei*, which is allready *perfected in a boke of thyne: Blessed be God, in all his Mysteries, and Holy in all his works. This seal must not be loked on, without great reverence and devotion. This seale is to be made of perfect wax. I mean, wax, which is clean purified: we have no respect of cullours. This seal must be 9 ynches in diameter: The rowndnes must be 27 ynches, and somewhat more. The Thicknes of it, must be of an ynche and half a quarter, and a figure of a crosse, must be on the back_{side} of it, made thus:

The Table is to be made of swete wood: and to be of two Cubits high with 4 feete: with 4 of the former seales under the 4 feet.

Δ – The fashion of the 4 feet, standing uppon the foresayd rownd seales, was shewed so as the uttermost circle conteyning the letters, did seme to be clean *without the cumpas of the fete, equally rownd about the same fete. And these seales were shewed much lesser than the principall seal. Under the Table did seme to be layd red sylk, two yardes square. And over the seal, did seme likewise red sylk to lye fowrsquare: somewhat broader then the Table, hanging down with 4 knops or tassells at the 4 corners thereof.

Δ Note this point.

Uppon this uppermost red silk, did seme to be set the stone with the frame: right over, and uppon the principall seal: saving that the sayd Sylk was betwene the one and the other.

The Table was shewed to have on the fowre sides of it, *Characters and names, these, that are here in a schedule annexed, in 4 diverse rowes.

*Cave: quia
angelus tenebra=
rum se intrusit
hic ut libri
Quinti appendice
apparabit.

UR – The Characters and Words on the sides of the Square Table, are to be written with yellow, made of perfect oyle, used in the church.

Δ – What oyle is that

UR – of That oyle shalbe opened unto you. The oyle, is perfect prayers: of other oyle I have no respect.

We sanctifie, bycause we are holy: and you sanctify bycause of your holines.

Δ Note:
 * So is it evident
 who went about
 to hinder the
 truth before in
 the character,
 and in the border
 of the Table,
 falsely counter=
 feated &c as it
 also in the next
 action may
 appere.

Saul in danger
 of being
 carried away
 quick.

UR – There is a spirit, named Lundrumguffa using you
 who seketh your destruction, in the hatred of men, in the hurt of
 thy goods. Discharge him to morrow with Brymstone.
 He haunteth thy howse, and seketh the destruction of thy dowghter.
 His pretence was to have maymed the in thy sholder the last night,
 and long ago. Yf thow do not dischardg him to morrow,
 he will hurt, both thy wife and thy dowghter.

He is here* now.

Give him a generall discharge from your familie and howse.

He will seke Sauls death, who is accursed.

Δ – I know no means, or art to do this by. For I did burn in flame
 of Brymstone, Maherion his name and Character, whan I fownd
 Saul privilie dealing with him (which manner of wicked dealing
 I had oft forbydden him) and yet he cam after, and wold have
 carryed Saul away quick: as Robert Hilton, George, and other
 of my howse can testify.

UR – The cursed will come to the cursed.

Δ – I beseeche you to discharge him: and to bynde him somewhere
 far of, as Raphael did (for Thobias sake) with the wycked
 spirit Asmodeus.

UR – But Thobias did his part. Art is vayne, in respect of
 God his powre. Brymstone is a mean.

Δ – Whan shall I do this?

UR – To morrow at the tyme of prayers.

Δ – *Gloria Patri et filio et Spiritui Sancto
 sicut, &c. Amen.*

1582 Martii 11

Sonday. a Meridie hora .3a. circiter.

Δ – Uriel being called by E.T. there appeared one, clothed with a
 long robe, of purple: all spanged with gold, and on his hed, a
 garland, or wreath of gold: his eyes sparkling: of whome I axed
 Whether the characters noted for the Table, wer perfect:

He answered,

They are perfect Δ*: There is no question.

Δ – Are you Uriel.

Than presently cam in one, and threw the brave spirit down by the
 sholders: and bet him mightly with a whip: and toke all his robes,
 and apparell of him: and then he remayned all heary and owggly:
 and styll the spirit was beaten of him, who cam in after him. And
 that spirit, which so bet him, sayed to the hearing of my skryer,
 Lo, thus are the wycked skourged.

Δ – Are you Uriel, who speaketh that?

Uri – I am he. Write down and mark this: for it is

Δ*
 Hereby may appere
 that this wycked
 spirit foysted in
 the shew of the
 fals characters
 and names before.

Note:
Lundrum=
guffa
skourged
spiritually.

worthy of the Noting.

This was thy persecutor Lundrumguffa. I browght him hither to let the see, how God hath punished thy enemy.

Lo, thus, hath God delt for the: Lo thus have I delt for the:

Thank God.

Δ – blessed be his holy name; and extolled, world with out ende.

E.T – he drew the wycked spirit away, by the leggs, and threw him into a great pitt, and washed his hands, as it were, with the sweat of his own hed: for he seamed to be all in a sweat.

Δ – Here uppon, my skryer saw Uriel go away: and he remayned out of sight a little while. Then he cam in agayn: and an other with him: and jointly these two said to gither, Glorifie God for ever. And than Uriel did stand behinde: and the other did set down in the chayre, with a sworde in his right hand: all his hed glystring like the sonne. The heare of his hed was long. He had wings: and all his lower parts seamed to be with feathers. He had a roab over his body: and a great light in his left hand. he sayd,

Michaël – We are blessed from the begynning: and blessed be the name of God for ever.

Δ – My skryer saw an innumerable Cumpany of Angels abowt him: And Uriel did lean on the square Table by.

He that sat in the chayre (whom we take to be Michaël) sayd Than,

—— Go forward: God hath blessed the.

I will be thy Guyde.

Thow shallt atteyne unto thy seching.

The World begynnes with thy doings.

Prayse God.

The Angels under my powre, shall be at thy commanndement.

Lo, I will do thus much for the.

Lo, God will do thus much for the.

Thow shalt see me: and I will be seen of the.

And I will direct thy living and conversation.

Those that sowght thy life, are vanished away.

Put up thy pen.

Δ – So he departed.

Δ – *Gloria, Laus, honor, virtus et Imperium*

Deo im mortali, invisibili, et

Omnipotenti, in sæcula sæculorum.

Amen.

Lundrum=
guffa.

Martii 14. Wensday. mane circa horam 9a.

- Δ – Being desirous to procede in this matter, by consent, we bent our selves to the Action. And after that [E T] had called Uriel and saw him, I cam to the desk from my oratorie. There did contynually appeare, the chayre and the Table. I than being affrayde that any other shold come into the stone, in stead of Uriel, did earnestly require the spirituall creature appearing, to shew who he was, and what was his name: At length he answered, and sayde to the hearing of E.T., Uriel is my name, with diverse called *Nariel.

*Agrippa hath so,
cap. 24, Lib. 3,
Occultae Philosophiae

Stay.

- Δ – Then he went away, for a while: and cam agayn, and sayd thus,
Ur – The strength of God, is allwayes with the.
Dost thou know, what thou writest?

Δ -potius erat di=
cendus Michael:
Namen, Gabriel est
Praevalescentia
Dei: et ita, forti=
tudo quidem, sed
altioris gradus.

- Δ – In two senses, I may understand it: eyther that the good Angel ΔGabriel is allwayes with me, though invisibly: or els, that the strength, and mighty hand of God, allwayes is my defense.
Ur – *Fortitudo Dei, tecum semper est.*

- Δ – He went away agayn, and cam agayn, following or wayting uppon an other: and before that other, was a man having his hed all covered with blak. Then he that cam so in the middle, did sit down in the chayre, and spake this worde following:

Mi – Note

- Δ – This was Michael, with his sword in his right hand. Then cam Uriel to the man (having his hed all hyd, as it were in a blak hode) and toke of that blak hode: and then lifted up the Table cloth. He looked under it, and put it down againe: and lifted it up again. The man stode still before Michael. Then Michaël rose; and toke of all the mans clothes, and left him, as it were, onely in his shirt. Then Uriel toke a little rownd Tablet, as it were, of the bignes of a sixpence, having two letters in it, thus:
and gave it to Michaël.
Uriel lifted up the Table cloth:
and, from thence, seamed to take appaile, and put on the man. It semed to be sylk: and very full of wrynkes, or plights. And the man kneeled, and held up his hands. Uriel toke like a lawrell bush, and set uppon the mans hed. And than the man kneeled before Michaël. Michaël toke the rownd thing, with the letters: and gave it the man to eat: and he did eat it.

Ur – Lo, things are covered.

- Δ – Then he covered the Table and pluckt the cloth over it; down to the grownd, on every side. The man rose up: And Michaël dubbed him on the hed with his sworde. Then the man stode up.

Then the man turned his face toward E.T. the skryer: and the man did resemble me (John Dee) in countenance. And then he turned to Michaël agayn.

Michael wrote uppon the mans back, thus,

ANGELVS TVÆ PROFESSIONIS.

*vide Agrippam
de Triplici hominis
custode. Lib.3^o.
cap.22.*

Δ – Then E.T. asked me, yf there were such Angels of a mans Profession: and I answered yea; as in ^Δ Agrippa and other, is declared.

Mi – Leave your folly: Hold thy peace.
Have you not red, that they that cleave unto God, are made like unto him?

Δ – Yes, forsoth.

Mic – Thow camst hither to lern, and not to dispute.
Laudate Dominum in operibus suis.

Δ – The man kneled down, and so went out of sight.

*† vide Reuclinum
de Verbo Miri-
fico, de nomine
NA.*

Mi – He hath eaten strength against trubble: He hath eaten nothing: and in eating, he hath eaten all things. The name [†] NA, be prayesd in trubbles.

Δ – Now Michael thrust out his right arme, with the sword: and bad the skryer to loke. Then his sword did seame to cleave in two: and a great fyre, flamed out of it, vehemently. Then he toke a ring out of the flame of his sworde: and gave it, to Uriel: and sayd, thus:

Mic – The strength of God, is unspeakable. Prayesd be god for ever and ever.

Δ – Then Uriel did make cursy unto him.

Mi – After this sort, must thy ring be: Note it.

Δ – Then he rose, or disapeared, out of the chayre, and by and by, cam again, and sayde, as followeth.

Mi – I will reveale the this ring: which was never revealed since the death of Salomon: with whom I was present. I was present with him in strength, and mercy.

Lo, this it is. This is it, wherewith all Miracles, and divine works and wonders were wrowght by Salomon: This is it, which I have revealed unto the. This is it, which Philosophie dreameth of. This is it, which the Angels skarse know. This is it, and blessed be his Name: yea, his Name be blessed for ever.

Δ – Then he layd the Ring down uppon the Table: and sayd, Note.

Δ – It shewed to be a Ring of Gold: with a seale graved in it: and had a rownd thing in the myddle of the seale and a thing like an V, throwgh the top of the circle: and an L, in the bottome: and a barr cleane throwgh it: And had these fowre letters in it, P E L E.

*vide Reuclini
librum de verbo
mirifico de
Nomine PELE.*

After that, he threw the ring on the borde, or Table: and it semed

to fall through the Table and then he sayde, thus,

Mi – So shall it do, at thy commandment.

Without this, thou shalt do nothing.

The Use of the Ring.

Blessed be his name, that compasseth all things:

Wonders are in him, and his Name is WONDERFULL:

His Name worketh wonders from generation, to generation.

Δ – Then he went away: and came in again by and by.

Mi – Note.

Δ – Then he brought in the Seale, which he shewed the other day: and opened his sword, and bad the skryer, reade, and he red,

EMETH.

Then the sword closed up again: and he sayde,

Mi – This I do open unto the, because thou marvellest

at SIGILLUM DEI. This is the Name of the Seale:

which be blessed for ever. This is the seale self. This is

Holy: This is pure: This is for ever. Amen.

Δ – Then the seale vanished away. And I sayd to my frende (the skryer) In dede, this other day, I considered diverse fashions of the seal: and I found them much differing, one from an other: and therefore I had need to know, which of them I shall imitate: or how to make one perfect of them all.

Mi – Downt not for the making of it: for God hath perfected all things. Ask not the cause of my absence, nor of my apparel: for that Mysterie, is known to God. I have no cloathing, as thou thy self Shalt see. I am a spirit of Truth, and Vertue. Yea you shall see me in Powre, and I will visit you in HOPE.

Bless you the Lorde, and follow his wayes, for ever.

Δ – Then he went away: and Uriel followed him.

And then I sayde to my skryer: It were good, we had ever some watchword, when we should not looke for any more matters at their hands, every tyme of their visiting of us.

Whereupon, (unlooked for, of us,) he spake again.

Mi – We lead tyme, Tyme leadeth not us:

Put up thy pen.

The Name of God, be blessed for ever.

Δ – Then they lifted up their hands to heavenward (which heaven, appeared also in the stone) and turned toward us, and sayd,

Valete.:

Δ – So they departed: and at their going, the chayr, and the Table, in the stone, did seeme to shake.

Δ – *Soli Deo omnis honor*

Laus et Gloria .:

Amen.

*De sigillo Emeth,
vide Reuclini Artem
Cabalisticam, lib.3. et
Agrippam lib. 3.
Cap.11.*

Martii 15. Thursday. Hora 1 $\frac{1}{4}$ a meridie.

Δ – After [E T] his calling into the stone, appeared a tall man, with a sceptre (very great) of gold, glittering. His body all red: and out of his hed, did shote out beames of light, like the sonne beames.

Δ – I being desirous, to know who he was, and his name, I requested him earnestly thereto. But he answered, as followeth,
Invoke nomen Domini, et agnoscetis eum.

Δ – Then I prayed the psalme, *Deus misereatur nostri, et benedicat nobis &c.* After that, he sayd,
I am mighty.

Δ – Bycause he delayed to declare his name, [E T] the skryer did require him, in the name of God the father, Jesus Christ his sonne, and of the holy ghost, to express his name: and he answered in speche.
So I will by and by.

Δ – Then he seamed to take from his hed little bright sparcks, like little candells endes: and to stick them abowt the chayre: and he went rownd abowt the chayre: and than he spake, as followeth,
I am mighty, and working wonders: I am SALAMIAN.

SALAMIAN

Δ - of Salamian you may rede, in the call, *Diei Dominicae in Elementis Magicis Petri de Abano*, there called Salamia.

I rule in the hevens, and beare sway uppon erth in his name, who be blessed for ever. Thow doost dowt at me. I am the servant of God, in his light: I serve him. I say, I serve him, with feare and reverence. My name is SALAMIAN: Mighty in the Sonne, worker of wordly actions, as well internall, as externall: known unto God: whose name I know, and bless for ever.

Δ – Then appeared a big flame of fyre by him in the ayre.

Sal – Thow knowest not, or thow wilt not know, that Mamon, with his servants, are present abowt the: whose presence doth hinder the presence of the vertues Adonay our comming. Blessed be God, in the highest.
Amen.

Δ – He toke the forsaide flame of fyre, and flung it up unto the heaven ward.

Mamon. Sal – Mamon is a king whome God hateth: whose sect, contynually tempt, provoke and stir up wickednes, against the Lord, and against his annoynted. But he dyeth: blessed be God for ever. Drive him away.

Δ – It is incomparably more easy for you to do. And as for my parte, I fele neyther in body, nor sowle, any token of his presence or working. Thereuppon he caused the whole chamber (which we were in) to appere very playnely in the stone: and so there shewed a great cumpany of wycked spirits to be in the chamber: and among them, one, most horrible and grisely thretting, and approaching to our heds: and skorning and gnashing at us.

Sala – God determines his mysteries, by Arte and vertue.

Δ – Then he willed me very egerly, to drive them away. And I prayed fervently. And there seamed One to come into the stone, which had very long armes: and he drave them away courragiously: And so they were driven away.

After that presently, cam one into the stone, all white.

Salamian reached this white one a Cup.

The white man held up the Cup: and sayd, as followeth,

——— Lo, this is my name.

Raphaël

God shall bless you. Fear not: your faithfullness provoketh me to tell my name, and this it is: (putting furth the Cup again) for, I am called Medicina Dei. I will shew the, and I will shew you, the Angel of

your Direction, which is called OCH.

Δ – This name he spake: he shewed it allso on the Table (before him) written.

Raph – He is mighty in the sonne beames: He shall profit the hereafter.

Δ – Then cam in an other, and sat down in the chayre: and he sayde, as followeth,

The strength of God liveth: and God raigneth for ever.

I am Fortitudo Dei.

Δ – Why, then, you are Gabriel: and I toke you hitherto to be Michaël. How shall I then amend my boke, in respect of your name, allwayes before, written Michaël?

For. Dei – What thow hast written, that hast thow written: and it is true.

Write down this name. POLIPOS.

Dost thow understand it?

Δ – No, God knoweth.

For. Dei – When that day commeth, I will speak with the: yf thow observe that which I have *commanded the.

As truely, as I was with SALOMON, so truely will I be with the.

Δ – Then cam in an other, whom we toke to be Uriel: for he went allso, as he was wont, and leaned at the Table.

For. Dei – Search for wisdom and larning, and the lord will deliver it unto you.

Δ – I wold to god, I knew your name truely, or what peculier letter I might set for you, to Note your words and Actions by.

For. Dei – Name I have none, but by my office.

SALAMIAN cam not hither, but by me.

He is a mighty Prince, governing the hevens, under my powre.

This is sufficient for thy Instruction.

I was with Salomon, in all his works and wonders:

and so was this, whome God had appointed unto him.

The Divines know his name: and he is not hidden from the face of the erth: His name is written in the boke which lyeth in the wyndow.

Δ – Do you mean Agrippa his boke? And is it there expressed by the name SALAMIAN?

For. Dei – I have sayde.

Δ – What order will you appoint unto us two, in respect of our two beings to gither? My frende here, may have other intents and purposes of his affayres, then will serve me, for his ayde having in these Actions.

For. Dei – Joyne in prayers. For God hath blessed you: Dowt not. Consider these mysteries.

Δ – Then they in the stone used talk to gither: but not well to be discerned of the eare of **E.T**

At length **F.D** talked very much, and spedily to **E.T** and disclosed unto him (which he expressed not to me, at the stone but afterward) all the manner of the practise, and the circumstance about the Action intended, with the Gold lamin, the ring, the Seales &c. And after I had spoken somewhat, in requesting him, to shew me the manner, How I shold artificially prepare every thing spoken of, he sayd,

F.D...

Δ*
Perchance he
meaneth the
counsaille of
Annael: before
specified.

Δ - It is in *Elementis
Magicis Petri de Abano*
printed with *Clavis
Agrippae*, which
was in my oratorie
almost under my
wyndow.

[The top third of a page is missing here.]

Write — God will be revenged upon Saul: for he hath abused his names in his Creatures.
He hath sinned agaynst kinde. His ponishment is great: and so I ende.

[...] Blessed be God, who revealeth all Mysteries, &c.
I am strength in nede.
And Lo, here is Medicine for the sore.
We bless the Lord: We govern the erth, by the societie of Gabriel:
whose powre, is with us: but he not here. &c.
Use Patience.

Ur – I lived with Esdras: I lived in him, in the lord, who liveth
for ever.

Raph – I lived with Tobie: Tobie the yonger.

Δ – This was the white creature, that spake this.

[F.D] – We live in the Lorde: who be prayed for ever.

Δ – I stode silent a good while.

[F.D] – What wilt thou?

Δ – I did attend, what you wold say.

[F.D] – I have sayd.

Δ – I have byn long at this tyme, in my dealing with you. I trust,
I do not offend you therewith. But, for my parte, I could finde in
my hart to contynue whole dayes and nights in this manner of doing: even
tyll my body shold be ready to synk down for wearines, before I wold
give over. But I feare, I have caused wearines to my frende here.

[F.D] – In vertue is no wearines.

Δ – Now he stode up, out of his chayr: and he, and they all, jointly
blessed us, stretching theyr hands toward us, Crossingly. And so
they went away. The Table and the chayre remayned
and the glyttring sparckles, or drops of streaming little
lightes were of the chayre immediately.

Δ – Glorie, thanks, and honor
be unto the Almighty Trinitie.

Amen.

Jesus

Anno 1583 Martij 23. Saterdag a meridie.

Δ: EK being come, with Mr John Husey of Blokley. (on the 22 day of marche) and EK being desirous to understand somewhat of our spiritual¹ frendes as concerning such matter as had falln out very strange to him and Mr Husey: abowt a certayne moniment of a boke and a skroll fownd in Northwik hill² by the direction and leading of such a spirituall Creature, as when they had gotten the same, and they endeavored by art to haue some exposition of the skroll, written in strange characters, they wer willed to repayre to me. and there they shold be answered:

&c. which thing now they did.³

Being therfor now ready to receyue instructions of our frendes, there appered in the stone One,⁴ in a foles dote, going abowt a clowde, which appered first in the stone. I charged him if he were the enemy of

I to depart. He tore his clothes all, and appeared all hery under: and sayd, Penetrasti vim iniusticæ meæ.⁵

Δ: Glorifie God and depart. He sayd, Feci, Nam decedo.⁶ He went away as it had byn a bunsh of fethers puild in peces. The Clowd waxed bigger, and went all to the right hand. At length the Table appeared, But the Chayre seemed not to be of the same sort it was, but more Glorious. There appeared three, of which, two went away, and one tarried behynde.

He sayd Auete.

2 The boke fownd in Northwik hill.

¹⁸ A parable.

Martij 24. Sondag: morning abowt 8.

Δ: The Table appeared, and the Chayre: and he who appeared yesterday: kneeling or rather lying prostrate on his face, as if he were a slepe:

He hay a long while.

A thing like a lambs hed did seeme to lik him, and then he rose and wiped his face, as though he had wept.

Me, he sayd, Signa sunt hæc vobis. humilitatis et pænitentiae~ quæ facio omnia, vestra.. non mea sunt.¹⁹ Laudetur verbum eius in Cælo, laudetur etiam et in terris: Investigate potentiam in humilitate loquelæ eius, et videbitis gloriam frontis eius. Misericors namque et omnipotens est gloria virtutis eius. Vana sunt, corruptionibus suis; Necessaria verò Necessitatibus vestris. Nam fecit omnia ad laudem eius: et opera manuum suarum (Ecce) collaudant lumen vultus eius. Adinvicem dilig

Humilitate viuite. Medicina verò mea (quæ eius est) omnia resanabit.²⁰

The feldes wither without the drops of his Mercie. Mans Memorie is dull, unleast it taste of the sprinkling of this vessell. [EK: He hath a great thing under his gown.]

Nature and reason²¹ haue disputed profowndly and truely by the sauour hereof: it perceth therfore depely. But understanding and reason haue eleuated and lifted up the dignitie and worthynes of Mans Memorie, by taste hereof. The Immeasurable and unspeakable begynnings (yea with

19 Note hereby to consider theyr actions, gestures and other circumstances.

20 Signa sunt. ..resanabit: "These are signs to you (p1) of humility and of repentance; which (signs) I make everything yours; they are not mine. May his word be praised in heaven, and may he also be praised on earth. Discover power in the humility of his speech (or language) and you (pl) will see the glory of his brow. For the glory of his power is merciful and almighty. Vanities exist in his seductions; Necessities exist in your true needs. For he made all things for his praise: and (behold) his handiwork praises the light of his face. Love one another; live with humility. Truly, my medicine (which is his) will convey everything." -Ed.

21 Nature .Reason

the begynner and Principle therof), are exactly (after a sort) and perfectly known of them. Yt hath towght from the earth unto the heauens: from the heven, unto his seat: from his seate, into his Diuinitie. From his Diuinitie, a Capable measuring of his unmeasurable mercies. It is true, most true, and true shalbe for euer. That from the lowest grass to the highest tree, the smallest valley, to the greatest mowntayn; yea, euen in the distinction, betwixt light and darknes: the measure whereof is the deapest:

yea (I say) it hath towght a Iudgment. When he axed wisdome, and forsoke the world, he receyued it: and it measured the things of the world. Great are the inward eyes, and greater are the meanes, which deliuer things subiect or obiect unto them.

Finally it procedeth from him, that procedeth: Whereunto the first was formed, after, and not bike. Whose fote slipping bath dasshed his bed in peces, and it becam dark: until! agayn, the Medecine which I haue browght, revived his slombring. Hereby, he, not onely knew all things,²² but the measure and true use therof. Yf the body haue no inward fyre, it presently falleth. Euery Organ is voyde of qualitie, unleast a meane be adiected. So, is a!! that thow hast before, more wonderful!, then, as yet. profitable, unleast thow be directed and led-in unto the true use and order of the same.²³ Great are my words, and great is thy thougth: Greater shalbe the ende of these Gods Mercies.

New worlds, shall spring of these.

New manners: strange men: The true light, and thorny path, openly seen. All things in one, and yet, this is but a vision. Wonderfull and great are the purposes of him, whose Medicine I carry. I haue sayde.

Δ: He lay down agayn, a good while, and at length he rose: after my long prayer and confession made to god, and my discourse to him, &c.

²² Note Adam, before his fall, knew all things.

²³ The true use and order of the premisses.

EK: He plucketh out a boke: a!! the leaves are, as thowgh they were gold, and it semeth written with blud. not dry.

Δ: He sayd, Cownt. Δ: He turned ouer the leaves, but EK could not we!! cownt them: whereuppon he sayd: I will raze out²⁴ thy dulnes. and at length, make thee clere.

EK: There are 48 leaves.

Me: Et finis est.²⁵ One is one neyther is, was or shalbe known: And yet there are iust so many. These haue so many names, of the so many Mysteries, that went before. This is the second and the Third: The Third and the last.²⁶ This is the measure of the whole.

O what is man, that is worthy to know these Secrets? Heavy are his Wickednesses, Mighty is his synne. These sha!lt thou know: These shall you use.²⁷ The One is a Master, the other is a Minister. The One, is a hand, the other is a finger: Grutch not. Neyther let wickednes tempt you: !oue togither. Be contented with your calling: For, all beasts see not a like: yet are they a!! Creatures: Vessels, not of one bignes, yet are they a!! full. Both, most sufficient, but according to fayth, and understanding of Conscience. Yet must there be a third whom, God doth not yet chuse. The tyme shalbe short: the matter great, the ende greater. Ask now what thou wilt and he shall answer thee.

EK: There appered one like my self laying his two armes, one, on EK his sholder: and the other on a man his sholdei unknown to us, but somewhat like to Mr Adrian Gilbert,²⁸ &c.

²⁴ Raze out: "erase." -Ed.

²⁵ Et finis est: "And it is the end." -Ed.

²⁶ Note of this boke.

²⁷ J Dee, and EK.

²⁸ Adrian Gilbert, half-brother to Sir Walter Raleigh, was a frequent visitor to Mortlake. He eventually was allowed to participate in some of the actions. Earlier in this same year (1583), Dee started plans to colonize North America with Adrian Gilbert and John Davis. During subsequent actions, Dee consults the angels about this proposed venture.

Δ: Ys it your will to procede in this matter, you now haue begonne withall: or will you of these characters and places of Threasure hid (here portrayed by picture), say any thing?

Me: As thou wilt. Δ: As the will of God is, so will I. The will of God you know, better than I.

Me: The æternal! liquor be upon you. Ones more, what wilt thou?

Δ: I do prefer the heuenly liquor, before all things, and do desire to be bedewed, with the supercælestiall dew thereof.

Me: Consider the former tree.

Δ: The tre with the water at the fote?

Me: Thow hast sayd. His growing powre, bringeth furth Act.²⁹ Remember the Prince and Subiects, which haue powre (as is told thee) of Erthly Bowels (The thing there, [Uwho~ic] which you desire of me, is no parte of my charge). Call him: It is his office: for by his ministers it bath byn shewed.³⁰ God doth impart his mercy, to those he loueth, in all necessitie: whether of the one, or of the other, where it is dew: I leave it: his Office is to speak it. Notwithstanding hue in truth and humilitie:

Use God his Creatures, to his glorie, and thy Necessitie, the proffit of thy own lymms, and cutting out of all Canker and rotten flesh. Thow understandest: For thy eyes shalbe opened. Amen.

EK: He spreddeth his hands abroade, and goeth away, and putteth his boke in his bosom as he goeth.

Δ: Gloria patri.M &c. Amen.

³⁰ A Blisdon is the prince under Bnaspol the king. Vide sup. Lib. 4: A°. 1587. Circa Maiu: Quidam Ben, (spiritualis Creatura) dixit ipi EK, se custodinisse illum putverem et librum Dunstani, &c. -A. (Vide sup. ... "See above in book 4. Around May 1587 one Ben (a spiritual creature) said to EK that he himself had guarded that powder and Book of Dunstan.") See TFR Actio Tertia, May 23, p. 27 (pages separately numbered). -Ed.

³¹ Gloria patri: "Glory be to the Father." -Ed.

Martij 26. hōr. 10 ante Meridiem.

First, appered a clowd: and that vanished away: Three cam in, they made Cursy to the chayre: and two went away. Then the third which remayned, lay down on the grownd, as before. There cam like a lambs ~³² and licked him. He sayd then, as followeth: being stand up,

Magna sunt, Alla quæ dixisti,³³ making cursy to the chayre. There was a sownd hard before. After a while he sayd,

Me: Thy Kingdom is established in eternitie. Thy hands are invisible, and no man can distinguish thy mercies. I attend your desire.

Δ: As concerning the Characters, and shew of the ten places, we are desirous to know whyther we may require now Bnaspol, or other under him, to say unto us, that, which may content us, for the Case as it standeth with us.

Me: The buylder of the Temple was riche, before it was adorned. With Wisdome, cam the Instruments necessarie for mans worldly use. He hideth no light from those he loveth: neyther shutteth up his tents from such as seke him. Yf one be great, **O** how small is the other? How small therfore is the mynde, and how much weakened that desireth those trifles? But as the smallest thing is feefest to the smallest use, so is the existimation of things of light accownt, necessary for the lightnes and vanitie of this world. A part (Notwithstanding) may beawtify the whole, and a small thing, may cure a great infirmitie. I told thee before, that my fete are not placed uppon such brittle and crakling sand, neyther are my hipps occupied with the vanitie of nothing. I ~ffl ~³⁴manifest in any point, the thing which thow desyrest, neyther is it any part of my charge.

I haue byn thy scholemaster and director to the Sterne, to rule the

³² A lambs hed, may be a token of our humilitie required, &c.

³³ Magna. . dixisti: "Great are the things that I have said." -Ed.

³⁴ Note.

reason therof, with those, which can reache the_ludgment therof. All those before spoken of, are subiect to thy call.³⁵ This vessell at all tymes they greatly accept. Yet haue they times_and seasons.³⁶ When order breaketh in her self, the labor is in vayne. Euery thing is for and to an ende. Of frendship, at any time,³⁷ thow mayst see them, and Know what thow wilt.

But One thing differeth, the Ende, and the Begynning. That onely, is the El, rod, or measure which all ready is deliuered. The stroke of which, bringeth a!! things, in theyr degree, to an ende: as far as the seven (magnificencie of euery Seuen) stretcheth out it self.

Euery one, (to be short) shall at all times and seasons,³⁸ shew thee direction in any thing. But, SO, thow canst not use them, in the determination. and full **ende** of euery practise. It is one thing to affectionate; and an other to effect. What thow seest, is true, and to a former³⁹ cornmoditie: For, with Furderance, euery thing in Nature is ayded.

Δ:--Reade ouer that, which now, lastly, I declared: Then see, if you be not answered.

Δ:

Therefore mayst thow know, what that is, a!!lthowgh thow do not, yet, or presently, put it in practise. by him, whose Charge it is, to deliuer it.⁴⁰

Δ: Of your so greatly commended liquor I am desirous to haue farder understanding.

³⁵ NOTE.

³⁶ Note. All tymes, Speciall tymes.

³⁷ Of frendship, at any tyme.

³⁸ Note.

³⁹ Furder.

⁴⁰ NOTE Whose charge it is to deliuer it.

Me: What liquor is more liuely then the dew of Truth, proceeding from a fowntayn most swete and delectable? Euen that veritie which thy mowth bath preached of.⁴¹ What water recreateth more, or cooleth ignorance deeper than the knowledg of our Celestiall speche?⁴² your voyces are but fayned: shaddows of the wordes and voyces that substantially do comprehend euery substance in his kinde. The things which you do loke on, bycause you see them not in dede, you allso do name them amysse: you are confownded, for your offenses: and dispersed for your punishments: But we are all one, and are fully understanding. We open the eare, and the passage thereof, from the sonne in the morning to the sonne at night. Distance is nothing with us, unleast it be the distance, which separateth the wicked from his mercy. Secrets there are none, but that buried are in the shaddow of mans Sowle.

We see all things: and Nothing is hid from us: respecting our Creation. The waters shall stand, if they here theyr own speche. The heuens shall move, and shew them selues, when they know theyr thunši~. He!! shall tremble, whan they know what is spoken to them.⁴³ The first⁴⁴ excepted, No man euer was, is, or shall be (excepted where I except) that euer shall understand, bath or doth know the least part (O it is incomprehensible) of this Vessel. He named all things (which knew it) and they are so in dede, and shalbe so for euer.

Thow shaltt speak with us;⁴⁵ And we will be spoken with, of thee. Three they are excepted, which taken from amongst you, as they were, do yet speak with us, which are provided in the three laws to destroy

Δ Thus I deciphred
them after a day or
two or three.

Martij 26. a meridie + Tuesday hor. 5 1/5

First there was a great noyce of harmony, hard. There appeared two great Armies fighting, and much bludshed on both sides.⁵⁸ One Captaine is in red harness, the Contrary Captayn, is white and grene. There appered Flags with a croked tree, or like a ragged staff, or cudgel¹, in them: and they were on the red Capitayns side. He and his soldiers had the worse and were putto flight, and they ran away. The Captayn with the white and grene was Master of the felde: and assembled and gathered his men to gather after the Victorie. Now this Capteyn goeth to a town and semeth with his hand to heave up the towne, being a big towne. There was a voyce hard, saying thus, – So shall it be, with 21 more.

Δ : Wyth what one and twenty?

A voyce:—As yet, you can not know. This shall happen, before the Sonne
hath twice gon his course.⁵⁹

58 A battle foreshewed.

59Before two yeres finished, Ergo before A°. 1585, Martij 26.

EK: Now the Capteyn appeared alone, on fote, in his harness. He holdeth up his hands to heven: He is now vanished away. I meane the Capteyn in white and grene. Now appeareth the red cloth before the chayre. There come in three: they all make cursy: and two of them went away.

Δ: Our desyre is to know what we are to think of the Man which cam out of my Oratory and layd the fyry Ball at Mr Adrian Gilbert his fete yesterday, as he sat in my study with Mr Kelly and me: whether it were any Illusion, or the act of any seducer?

Me: No wicked powre shall enter into this place.⁶⁰ Neyther shall Iniquitie range where the fyre of his percing Judgment and election⁶¹ doth light, which shall quicken his deadness, and revive his courage to the auancement of the name of him, which liueth now. He chose with fire and lightened theyr harts, and they immediately understode and felt the Illumination of his glory.⁶²

What wilt thou?

Δ:

To the performance of the glorie and encreasing of his name, which shortly maketh an ende with for euer.

Δ: This phrase, for euer, is somewhat dark.

Me: With this world, for euer. Δ: This giveth some light.

EK: The stone is become very dark.

Me: As the Buylding is grownded and ended uppon Three, So must the mysteries hereof be practised With Three. The fowrth is the Boke, which, Lo, is here present.

Δ: Must Adrian Gilbert, be made priuie of these Mysteries?

Me: Thow hast sayde.⁶³

⁶⁰ NOTE.

⁶¹ Election.

⁶² The Apostles on Whitson Sondag.

⁶³ A. Gilbert may be made priuie, but he is not to be a Practiser.

Δ: May I note to your name any peculier Character or Syllable to distinguish your speches from ours or others?

Me: Medicina sum.⁶⁴

Δ: I may then use this syllable Me, to Note Medicina or Medicus Dei.⁶⁵

Me: Behold, these things, shall God bring to pass by his hands whose mynde he hath now newly set on fyre.⁶⁶ The corners and streights of the earth shall be measured to the depth: And strange shalbe the wonders that are Creeping into new worldes. Tyme shalbe

ed. with the difference of day and night.⁶⁷ All things haue grown ailmmost to theyr fullness. But beware of Pride. We teache duty, Humbleness, and submission. Shortly shall these things come to passe.

Δ: Than, this Adrian Gilbert shall cary the name of Jesus among the Infidells to the great glory of god, and the recouery of those miserable people from the mowth of hell into which, for many hunderd yeres past, and yet contynually they do fall, &c.

Me: Who made thy mowth to prophecy? or, Who of God opened the eyes of thy understanding? Who annoynted thy Jaws, or fed thee with unknown meate. Euen he* it is. that pricked these things forward. and shall use you as his Instruments to a mightie honor.

Δ: May we require description⁶⁸ of the Cuntries, for his better instruction, &c.

Me: Let darknes go behinde thee, and tempt him not, that iudgeth.⁶⁹ These things belong not to my charge. Thow knowest them, which are

⁶⁴ Medicina sum: "I am the medicine." -Ed.

⁶⁵ Medicina or Medicus Dei: "God's medicine or doctor." -Ed.

⁶⁶ A Gilbert, his task.

⁶⁷ Note, a prophesy.

⁶⁸ Description geographicall.

⁶⁹ Tenebrae post dorsum. -A ("Darkness behind the back." -Ed.)

sufficient.⁷⁰ whan short time shall serue, for the whole instruction.⁷¹ Greater nede were to enquire How or by what meanes thow mayst be made worthy.⁷² and, so, consequently, haue knowledge for the knowjag, hauing and using of this cælestiall medicine.

Forget not.

I instructed thee before-hand, and told thee, that both of you must iointly⁷³ lerne those holy letters (For, so, I may boldely call them) in memory: with theyr names: to the intent, that the finger may point to the bed, and the bed to the understanding of his charge:

Δ: You perceyue that I haue diuerse affayres which at this present do withdraw me from pecuhier diligence using to these Characters and theyr names lerning by hart: And therfore I trust, I shall not offend, if I bestow a!! the convenient leysor⁷⁴ that I shall get, abowt the lerning hereof.

Me: Peace, Thow talkest, as thowgh, thow understodest not. We know thee, we see thee in thy hart: Nor one thing shall not let an other. For short is the time, that shall bring these things to profe: Wherein he **that liuetb, shall approve him self aliue.**⁷⁵ Beautifull are the footesteps of his comming. and great is the reuenge of the wicked.

○ Liber, Liber, Liber, bonis vita, malis vero mors ipsa. Magna sunt mirabilia in te inclusΔ: et magnum est nomen Sigilli tui

Lumen Medicinæ meæ, vobis.⁷⁶

70 For discoveries making of the seas and theyr bownds.

71 Instruction requisite.

72 Note.

73 Both ioyntly EK and J:D:

74 Leysor: "leisure." -Ed.

75 God will shew himself aliue.

76 O liber. ...vobis: "O book, book, book, life to the good, but truly death itself for the wicked. Great are the wonders sealed up inside you, and great is the name of your seal. The light of my medicine, for you." -Ed.

EK: He holdeth his hands abroad. He draweth the Curten.

Δ: Gloria Laus et honor Deo patri et F. et 55~77 Amen.

Martij 28. Thursday morning. Mawndy Thursday.

A voyce: Pereant omnes qui insidiantur⁷⁸ virtuti nominis mei: et qui Lumen absconderunt iustitia mea.⁷⁹

EK: Now the veale is pluckt away.

Three appeare, as before time.

All three sayd,—Multa nos, quia multa patitur ipem.⁸⁰

EK: The two go away, and the Third remayneth who is like in all points to him, who yesterday to me alone, in your absence had declared himself to be an Illuder. Δ: NOTE, for the better understanding of this dayes Act it may be remembred that E. Kelly, while I, (John Dee) was at London, yesterday (being wensday) had used meanes to haue conference, with the good Creatures, with whome we haue dealing iointly:

and that there appeared one very like unto our good frende, who toke upon him to be the same, and now seemed to be constrayned⁸¹ by EK to tell the truth: and therefore his outward beautifull apparell seemed to go of, and his body appeared hery and he confessed that he was an Illuder⁸² &c. Whereupon EK was in a great perplexitie of mynde, and was

77 Gloria Laus et honor Deo p<at>ri et F<ilio> et S<piritui> S<ancto>: "Glory, praise, and honor to God the Father, and to the Son, and to the Holy Spirit." -Ed.

78 Insidiatores. -A. ("Traitors." -Ed.)

79 Pereant. ...meΔ: "May everyone perish who betray the virtue of my name: and who have hidden the light of my justice." -Ed.

80 Multa ...ipem: "Reprove us, because he himself suffers much." -Ed.

81 Constrayned: "forced." -Ed.

82 Pilosus. -A ("Hairy." -Ed.)

ready to haue gone his way. And at my comming home told me a long processe of this Tragicall Act. But I comforted him, and wold not yeld to his opinion, But did declare my confidence in the goodnes of God:

for that we craved at his hands, things good and necessarie: and that therefore he wold not giue his childern a stone for bred, or a scorpion for nedefull food required &c.⁸³ And this morning the matter was propownded by me, and thereuppon the former sayings wer used, and all the consequences of mattei which hereafter is recorded.

Δ: The veritie I require of yesterdays doings with EK on my absence.

Camikas zure, he sayd, holding his hands to heuen.

EK: He walketh up and down and semeth angry: and did beat his hands together. There commeth a little streame of fire whitish from aboue: and cam to his hed. He kneleth down before the Chayre, and loketh up, and sayde,

Me: Oh how brittle are the works of thy hands he looked up whose Imperfections are now more innumerable then the sands of the seΔ: or clouds that were lifted up since the begynning of the world. Darknes dare presume to place him self in Lightnes: yea dishonor, (o God) to dwell in place of glory: His lying lipps presume against Truth:

whilst thou suffredst his old and withered face to be garnished with thy beawty. Heaviness⁸⁴ is his seat; yet are his lipps myrthfull: and little there that separateth him from the dignitie of honor: But his ponishment is sufficient, his dishonor unspeakable, and his damnation for euer: which how bitter it is, great and unspeakable, Thow, & thou (I say) that liuest (which hast estranged him so far from thy glory) makest onely manifest. But yet how long shall the sonnes of men puff up them selues with bragging and boasting of that they see not? But (alas) All

83 See. Matthew 7:9; Luke 11:11—12. -Ed.

84 Heaviness: "sorrow." -Ed.

things are confounded, and are contrary to thy commaundements:

some onely which differ, remayn with concordant myndes praying thee, and lifting up thy name, as much as strength performeth. But herein is thy glory and long sufferance manifest, in that thou dost not onely with greif behold theyr synnes, but like a just iudge, fauorably doth ponder the greatnes of theyr enemies, which infect theyr myndes, and blynde the light, which thou hast given unto theyr understanding, with inflammations bodyly, instigations worldly, and tentations innumerable. Great therfore and most great, and none greater can be, which deridest the Aduersarie, and healest the weak: whose smallnes of habilitie thou canst augment, wherein the mysteries of thy great glorie and might, is manifest. Thy seal yeld prayses, with incessant and dutifull obedience. Thy name be magnified, thy mercy published to thy glory:

Holy Holy, yea great and most holy, is thy euerlasting kindenes for euer.

EK: Now he standeth up, and sayd,

Me: As I haue all ready told,⁸⁵ from whome I cam, so haue I not hydden, what I am, or what message I bring; why it is sent, it is aliso written. How long shall I perswade to stedfastnes? But the greater your measures are the greater shalbe the quantitie. These afflictions are necessary. For herin is a measure to distinguish⁸⁶ from falshode, light from darknes, and honor from dishonor. The more they are like us, or shew them selues so, (for, nothing can be more dislike) the more they are Judges of theyr own damnation. Yea, if his strength had byn great, he wold haue devoured thy sowle. Loking to EK.~ But whome God hath chosen, shall none overturne. Brag not: eyther Credyt my words by thyne owne reason. But Consider that diuerse may be dishonored, yea though they be in honor: yet shal it not thow neyther be ouerturned

⁸⁵ Raphaëlis officium. -A. ("Raphael's office." -Ed.)

⁸⁶ Forte, truth.

with the one wynde nor the other: though the afflictions that shall follow thee, be great and hard.⁸⁷ In my words are no error: neyther haue you fownd my lipps untrue. Whan I kneeled, I spake for you. But I haue promised that No unclean thing shall prevayle within this place. Neyther am I a revenging spirit nor of any such office. I quicken the dead, revive them that are falln and cure or sow up the wowndes, which they are permitted to work uppon man, as tokens of God his Justice.

I call the same god, (whome I haue called before) to recorde, that these words are true, my sayings iust, and his mercies more perfect. Whilest heven endureth and earth lasteth, never shall be razed out the Memorie of these Actions.⁸⁸ Use Humilitie: Reioyce whan the enemy is discomforted in his traynes,⁸⁹ and inventions: A ponishment so great, Et cætera. Whan I yoked your feathers⁹⁰ to gither, I ioyned them not for a while. Your flying is to be considered in quantitie, qualitie and Relation.

Thank God: Be mercifull: forget your synnes: and prepare your selues, For great and wonderfull is the immediate powre of him that illuminateth from aboue. It shall light apon you: For those that are present with him. hued with him, eat and drank with him, were instructed by him, Were but hearers onely: At length God was glorified, in one instant all things browght unto theyr remembrance: yea some of them taken to behold the heavens, and the earthly glory. I haue sayd.

Me: Behold. Veniat vindictum dei, et percutiat linguam mentientem.⁹¹

87 Afflictions to EK.

88 Note the durance of these Memorialls.

89 Traynes: deceits. -Ed.

90 Note of the vision which was shewed A°. 1582.

91 Veniat. .mentientem: "May the vengeance of God come, and may it may smite the lying tongue." -Ed.

EK: He goeth his waye and taketh all with him, Table, Chayre, and Curten and a!! There cam in a great many with flaming swords, and bring in the wicked spirit, who yesterday deft so diuillishly with EK. One of them holding him by the arme, sayde, Speak now for your self, you could speak yesterday. They all drew theyr swords: they sknorked fire. And there seamed a water to corn in, but it went away again.

A voyce:—Dicat, nam nrm non est.⁹²

EK: Now is the Skroll with the Characters browght in, which was fownd by spiritual! direction this month, the 12 day, abowt 10½ after none by Mr Kelly and Master Husy.⁹³ He semeth now as like our good frende, as may be. Our frende cam with a sponge and annoynted the wicked spirit his !ipps.

A voyce:—Els could I not speak.

Δ: Seing now thow canst speak, answer me.

The wicked, sayd:—Ask quickly.

Δ: What is thy Name ?—The wicked answered, Gargat.

Δ: What is the sentence of that skroll!?— Gar: I know not.

Δ: In the name of Jesus, I charge thee to tell me the truth as concerning That roll here shewed.—Gar: I haue cownterfeted this roll, and browght it: for it is not the true roll.⁹⁴

Δ: After many words betwene him and me, and the more, bycause he denyed that he knew of any Glorie belonging to God, I urged him so, at length with short and eudent argument, that he answered, be must ~ fess the powre and glorie of god: and sayd, that he was damned for euer:

and did wish damnation to me. And I requested God to use his Justice on him, for the glory of his name. Then he entreated me somwhile, and somwhile derided me, saying, Art thow so lusty? &c.

92 Dicat. ..non est: "He may speak, for he is not one of us." -Ed.

93 The finding of the skroll, of the Treasures.

94 Cownterfeted Roll. -A. Vide infra pag. 152, 153 &c. -E.A.

Δ: All the Cumpany fell on him, and hewed him in peces: and digged a hole in the earth, with theyr swords, and he fell in, and after that was a myghty roaring hard.

A voyce:—Sic soleo iniustis.⁹⁵

Δ: The Cumpany went away. There cam a fire and seamed to burn all the howse.

A voyce:—Purifica Domine sanctum tuum, et dele iniquitatem inimicorum nostrorum.⁹⁶

Δ: Then returned our frende, ^{Me}, and all seemed light and bright agayn: likewise all the furniture, of Table, Chayre, Globe in the chayre covered with a red covering &c.

Me: Visio vera, verè denotatur. Denotetur etiam ad gloriam Dei.⁹⁷

 Δ: Master Kelly, is your dowl of the spirit, now taken away?

EK: Ye truely, I beseche God to forgive me.

Me: Dixisti, et factum.⁹⁸

Δ: As concerning Adrian Gilbert, there might be some dowte in common external! Judgment, of his aptnes to the performance of the voyage with the appertenances, But the Secret of God his prouidence, I will not meddle withal!: for he can make infants speak, and the dum to shew furth his glory &c.

Me: Yf God be mighty, acknowledge his powre. Who made the Sonne of nothing? or man, so brittle a substance? Nature thrusteth up her sholders amongst trees and herbs, like a ientle fyre: In beasts and all the creatures of the feelde, waters, and earth, in a palpable imagination: Amongst the sonns of men, she auanceth her self, wholly in

95 Sic soleo iniustis: "So I am accustomed to unrighteous people." -Ed.

96 Purificata ... nostrorum: "Cleanse, O Lord, your holy one, and destroy the wickness of our enemies." -Ed.

97 Write. -A. Visio ... Dei: "The true vision is truly noted, and it will be noted for the glory of God." -Ed.

98 Dixisti, et factum: "I have spoken, and it is so." -Ed.

the light of understanding. In all these she walketh by her own gualitie, mixing the quantities, with her before iudged proportion. Amongst all these is some distinction, yet all in theyr kindes are perfectly and substantially norrishd. Yf Nature haue such powre, What powre bath our God, and how great is his might in those in whome He kindleth a sowle, understanding. The strength of 1. body, and 2. inward man, with 3. the strength of him that allso leadeth him,⁹⁹ are augmented and diminished at his pleasure. Yf earth, in myxture become fyre, horn much more shall he encrease, whome God hath strengthened: yf he wold haue conquered with thowsands, he wold not haue sent back the dogged harted people. Yf riches or renown were his felicitie, he wold haue kindled the twelue Lamps¹⁰⁰ of his æternal! light, on a higher mowntayne: But he chose them in the Valleys, and from the watering places. I think this be sufficient to confirme your understanding.

Δ: I trust, God be not offended with this matter propownded &c.

Me: He is pleased: And it is enowgh. Eternitie is mighty and glorious to the righteous.

Δ: Whan shall I make him¹⁰¹ priuie of these things?

Me: Whan thou wilt. For euery thing is acceptable with those that are accepted. See thou cownsay!e him. and be his Father.

Δ: As concerning John Daus,¹⁰² we are to ax somewhat &c.

Me: John Daus. is not of my Kalender. Lern of them, of whome

99 A Note Body, sowle, spirit.

100 The 12 Apostles.

101 A. G.

102 John Davis is mentioned in Dee's diary as early as 1577, but Dee probably knew him as a boy. He was evidently one of Dee's pupils, and one of the principal players in the search for the Northwest Passage. He stole at least seventy books from Dee's library after Dee left for Europe in 1583. See Julian Roberts and Andrew Watson, *John Dee's Library Catalogue* (London: The Bibliographical Society, 1990), p. 50.

it is necessary. Be not negligent, in lerning the things before prescribed. 103

God be emongst you.

EK: He bath drawn the curten of red.

Δ: Soli Deo sit omnis honor et gloria.¹⁰⁴ Amen.

Mawndy Thursday, after None. hor 3½

Δ: The Veale being drawn away after a quarter of an howre (almost) after the first motion made by me. Three cam in, and made obedience to the chayre. Two went away, and the third remayned there, as before.

Δ: As concerning the Kalender to be reformed, I am grieved that her Maiestie will not reforme it in the best termes of veritie.¹⁰⁵ And as for the priuiledge for Mr Adrian Gilbert his voyage, I think not well of it, that Royalties shold not be graunted. Therefore both these points, respecting her Maiestie, I wold gladly haue cownsayle, such as in the Judgment of the highest might be most for my bebofe, to follow.

Me: In one gouernment there are sundry principall partes: Euery part in subdiuision conteyneth many and sundry offices. Many Offices

103 Lern the Alfabet.

104 Soli.. gloriΔ: "May all honor and glory be to God alone." -Ed.

105 The reformation of the Kalendar. -A. On 24 February 1582, Pope Gregory XIII ordered the use of the "Gregorian" calendar, and the English court deliberated over its response. Dee was one of the authorities commissioned for a report. According to his diary, Dee delivered his proposal to reform the calendar to Lord Burghley, Treasurer of England on 26 February 1583. It caused considerable controversy. The court opinions were all favorable, and the Queen approved a draft proclamation to adopt the reform, but it was rejected by the bishops because they didn't want to appear to be following the Catholic lead. -Ed.

require many disposers: yet bath euery disposition continually some partition in his quahitie. All things, one thing: And one thing, something: some thing, many things, and many things, most innumerable. The heuens in proportion are gouerned universally of a few; particularly of many: eche place posseseth his diuision: and euery thing diuided, his propertie. Princis ar governors which move and stir them up to work, as it is provided, and to behold in speculation How euery particular Action, shall haue due, perfect, and appropriated Locall being, motion and Condition. Subiects, (yea, the Highest) are stirred up, by theyr propre Angels:¹⁰⁶ The inferior sort do follow the disposition of theyr leaders. Vertue and Vice dwell euery where. Light and darknes, are allwayes intermedled.

Consider, How I speak it.

The myndes of all that move, euen unto the least gualitie in Nature, haue of them selues propre vertues: and therfore propre Instigators.¹⁰⁷ I call to memory thy words, the manner of thy speche, and the secret purpose or meaning, whereunto it is uttred. I see thy Infirmities, and know what thow desyrest. But mark me, whom God commonly choseth,¹⁰⁸ shalbe whom the Princis of the Erth do disdayn. Consider, how the prophet that slew that Monstrous Gyant, had his election. 109

God respecteth not princis, particularly, so much as the state of his whole people. For in Princis mowthes, is there poyson, as well as proverbs. And in one hart, more Synne, then a whole world can conteyn. Yt is not myne office to meddle with theyr vanities, neyther is it a part of my pageant to towch any thing that tasteth not of Medicine. But, what? doth thy mynde reply? Dost thow think, that my cownsayle

106 Angeli proprij. -A ("Proper angels." -Ed.)

107 Peculier and propre Instigators.

108 God his Elect.

109 The reference is to David and Goliath. -Ed.

herin, to a grieved mynde, is, (though it can be) Medicinal!? Peradventure¹¹⁰ thow thinkest I am not, thy marrow: yes I haue byn long in the highest part of thy body,¹¹ and therefore ame somthing perswaded of thy meaning.

Δ: In dede, I thought that your good Cownsaile, was or might be a remedie and a medicine to my afflicted mynde, for this unseamely doing, in the two former points expressed.

Me: Behold, where unto thy earthly man wold seduce thee. Dost thow think, that if it pleas god, it shall not please the Prince? if it be necessarie, all ready prepared?

Secretum dico.~²

For a!! things are Limited, with a full measurement, and unsearchable foresight: yea, I say, a!! ready, unto the ende. Be not discomforted. Quayle not at the blast of a small tempest: For those that speak thee fayre,¹¹³ haue dissembling harts, and priuie do they shote at thee, with arrows of reproche. Whan they¹¹⁴ shall haue nede of thee: I meane, of the help of God, through thee, (some shut up, some entangled, some gadding¹¹⁵ like masterles Doggs.) Than shall they gladly seke thee and desire to finde thee. They shall smell oute thy fote steps, and thow shalt not see them. The key of theyr Cares shalt thow be Master of: And they them selues shall not unlok theyr own grievousness. Yea they shall say, Oh let the earth devowr us. But I am to long. I

110 Peradventure: "perhaps." -Ed.

111 Δ: Raphael long tyme visiting my hed.

112 A secret. -A. Secretum dico: "I declare a secret." -Ed.

113 Lingua dolosa. -A ("Deceitful speech." -Ed.)

114 England.

115 Gadding: "wandering." -Ed.

answer thee, all though it be not my office,¹¹⁶ to declare that thou desirest: yet for that thou desirest my Medicine. I say. Thou shalt preuayle agaynst them,~⁷ yea euen agaynst the Mightiest. As thou wilt, so shall it be in God his blessings.

Beware of Vayne glory. Use few wordes.

Thy weapons, are small, But thy Conquest shalbe great. Lo. Doth this satisfy thee? Haue a firme faith. It is the greatest lesson. Be it unto thee as thou hast deliuered. One thing, I answer thee, for all Officis. Thou hast in Subiection all Offices. Use them when it pleas thee, And as thy Instruction bath byn.

I haue sayde.

Δ: As things be planted here, for preparation of Table, Sigihlum Dei &c, which things are not portable with eas: So, bycause I think, that some seruices to be done in gods purposes by me, will require other places than this howse, so shall diuerse my practises haue (as I think) a more compendious manner, and redy, to be executed in any place &c.

Me: Truely thou hast sayd, and so shall it fall unto thee. As I am here in this place, and yet in dede not, So, here: So shall it fall oute, and follow in the Mysteries of your Associated Operation.

The other~⁸ shall be. but, as a necessary help to the first Practises, to plant the Tree: which being confirmed and strongly rooted shall bring furth frute, most abundantly.¹¹⁹ The Erth and the tree, can not be separated. This is the ende, and true it is. Let him be record, whom I beare record of here,

116 Note, each in his Office.

On good friday; After None

Δ: There was a savor of fire felt by EK. There semed one with a sword, suddenly to thrust out of the stone at EK his bed. Whereat be started; and sayd he felt a thing (immediatly) creeping within his bed, and in that pang becam a!! in a sweat. And he remayned much misliking the

¹²⁰ Note Lerne The Alfabet.

¹²¹ A Philosophicall Harmonie in prayer, is ment by the prayer which I dayly use, & often: Deus in a m m d a a m f G P e F e S &c. -A. Apparently "Deus in adiutorium meum intende: Domine ad adiuuandum me festina: Gloria Patri et Filio et Spiritui Sancto" ("O God, be pleased to deliver me; O Lord, hasten to help me. Glory be to the Fathei and to the Son, and to the Holy Spirit"), based on Psalm 70. Compare with Dee's prayer at the beginning of Liber 1. -Ed.

¹²² Omnipotenti.. actio: "All honor, praise, and thanksgiving be to our almighty God, creator, redeemer, and sanctifier." -Ed.

moving and creeping of the thing in his bed. At a quarter of an howre ende it cam to one place: and so ceased somewhat: & then the Curten was drawn away: and there appeared the Table, and the chayre covered. Then cam three, two went away and the one remayned: as before was used.

EK held the paper of the letters in his hand: and  bad him put it out of his hand.

Me: The taste of this merciful! potion, yea the savour onely of the vessel! worketh most extremely agaynst the maymed drowsines of ignorance. Yf the hand be heavy, how weighty and ponderous shall the whole world be? What will ye?

Δ: This he sayd uppon our silence after his former words. I answered, we desyred to lerne the Mysteries of the boke. The Boke now appeared (the cover of the chayre being taken away) the boke lying uppon a rownd thing: which EK, was not yet able to discern what it is.

The first side of the first leaffe of the boke appeared full of the former letters, euery side hauing 49 tymes 49 square places, with letters:

some more then other.

Me: Euery side conteyneth 2400 and one od letter. 123

EK: A!! the letters semed to be of bluddy cullor, and wet. The lines betwene the squares, semed to be like a shaddow. In the first square were 7 letters.

Me: Say after me: But pray first, crc you begynne. Δ: We prayed.

EK: All became blak as pych in the boke.

Then it becam light agayne.

Now he pointeth up, with his rod of gold diuided into 3 equal parts, which rod he toke from under the Table.

Me: 1.

Keph van [He lifted his face to heven.]
Don graph fam veh na

EK: Now he kneleth down; and hohdeth up his hands:

The letters of the first square, ar 7.

7	6	5	4	3	2	1

Now he pointeth to the second.

2. Med gal ~K: He turneth him self abowt

3. un gal un Mals na.

Me: Twise seven, Thre and All one: and his mercy endureth for euer.

4. Tal un vrh.
5. Fam graph Fam.
6. Ged graph drux med.
7. un van.
8. Ta! un don ur un drux. Sownded as
9. Med.
10. Ta! van fam mals un.
11. un ged gon med gal.
12. Mals un drux.
13. Ged un.
14. Fam graph fam.
15. ged un tal mals graph gal un keph
16. veh un mals veh drux graph na [capcneh]
17. ged med.
18. med gal.
19. Fam graph tat graph ur un pa van ged graph drux
20. Gal med tat drux un.
21. mals na gon un tal
22. ged un
23. van un drux veh don un drux.¹²⁴
24. Van don graph mats don graph fam

EK: Now he seemeth to wepe, and knock his brest. He pointeth with the rod,
up, agayn, and sayd,

25. un gal graph mals gal
26. un keph graph
27. Gal don van keph
28. Gisg un don gal graph tal un na.

29. van un
30. veb graph fam gisg fam
31. ged don un mals un gal. He stayed here a good while.

140 Gharmes.

spoken.¹⁴¹ but in the time of his own time. It shalbe sufficient to ins~truct thee: Fare well.

EK: Now be couereth the boke with the veale.

Δ: Prayses and Thankes be rendred to god, of us his sely¹⁴² ones, now and euer. Amen.

Δ: Note. All the former letters and words in the squares, were onely in the first or upper row, begynning at the right hand, and so going orderly to the left. And secondly Note that this lesson he red, pointing with his rod orderly uppon the same forsaid first row.

Martij 31. Easter day after none abowt 4.

EK hard first a sownd of Musical! harmonic.

Δ: The Veale was pluckt away.

Three cam in, two went away, as was before accustomed.

EK: Now he lyeth down. He riseth and pulleth the veale from the chayre. That veale was of cullor as a raynbow. The boke appeared playne and evidently on the globe in the chayre. EK felt the thing ronne in his bed as the other day it did. Me taketh out the rod from under the Table: He sayd,

Æternitas in Cælo.

Δ: Uppon my staying from speche, he sayd, What wilt thou?

Δ: The proceding instruction necessary for understanding of the boke.

¹⁴¹ A It is not to be spoken or interpreted, but whan the *time* appointed is come.

¹⁴² Sely: "pitiable." -Ed.

Me:Mensurator.¹⁴³ Δ: He putteth up his rod to the boke. Me: Sint oculi illorum
clan, ut intelligant.¹⁴⁴ I-Ic held up his hands

and semed to pray. I-Ic pointed now to the second row of the 49 rows of the first
page of the boke, and sayd,

153 There is a stop.

154 Ophed.

155 Medoz.

156 Pres.

157 Δ: Note: A-deüne must be pronownced as one worde: like as Res-publica, in latin: els here wold seme to be 50 words but, A-deüne, cam out of one square. 158 Vandemhnaxat.

159 Bances.

Δ: He rose and axed me, What wilt thou?

Δ: The former question to be soluted. Me: Thow hast written fals:

for, it must be lhehudz, and so it is of 7 letters.

Δ: Yf euery side conteyne 49 rows, and euery row will require so much tyme to be receyued as this bath done it may seme that very tong time will be requisite to this doctrine receyuing: But if it be gods good liking, we wold fayne haue some abridgment or compendious manner, wherby we might the soner be in the work of Gods servyce.

EK: The Chayre and the Table are snatched away,^{~60} and seme to fly toward heven. And nothing appeared in the stone at all: But was a!! transparent clere.

Δ: What this snatching away of Chayre and Table doth meane we know not: But if the Lord be offended with his yonglings, and Novices in thes Mysteries, for propownding or requiring a compendious Method &c, Then we are very sorry, and ax forgivenes for the rashnes of our lipps: and desyre his maiestie not to deale so rigorously with us:

as though we had sufficient wisdom or warning, to beware of such motions or requests making to his ministers. Let it not be so sayd of the holy one of Israel: but let his mercies abownd with us to his glorie. Amen.

EK: Now commeth all down agayn, as before.

Me: What are the Sonnes of men, that they put time in her own bosom? or measure a Judgment that is unsearchable?

Δ:

Me: I help thy imperfections: What, man thinketh wisdom, is error in our sight. But bicause my Nature is to cure, and set up those that fall, Thus much understand.

As I haue sayde: The 49 partes of this boke¹⁶¹. 49 voyces,

¹⁶⁰ A Note and take hede from hence forward.

¹⁶¹ Of the boke.

Whereunto the so many powres. with theyr inferiors and subiects,¹⁶² haue byn,
are, and shalbe obedient.

Euery Element in this mysterie is a world of understanding. Euery one
knoweth here what is his due obedience: and this shall differ thee in speche
from a mortal! creature.¹⁶³

Consider with thy self, How thou striuest against thyne own light, and
shaddowest the windows of thyne own understanding.

I haue sayde: Be it unto thee, as God will. I am not a powre or whirlewynde
that giueth occasion of offence.

Longe sumus a peruersitate destructionis.¹⁶⁴ Thus much I haue sayd, for thy
reformation and understanding.

Δ:¹⁶⁵

Me:Lo, untilh the Secrets of this boke be written, I come no more:
neyther of me shall you haue any apparition. Yet, in powre, my office shalt be
here.¹⁶⁶

Say, what you here, for euery word shall be named unto you: it is somewhat a
shorter way, and more according to your desyre.

Euery Element¹⁶⁷ bath 49 manner of understandings. Therin is
comprehended so many languages.¹⁶⁸ They are all spoken at ones, and
seuerally, by them selues, by distinction may be spoken. Untill thou come to the
Citie, thou canst not behold the beawty thereof.

Nihil hic est, quod non est perfectum.¹⁶⁹

¹⁶² 49 Powres with theyr Inferiors, vide sup. 48 after a sort: and 1. vide Martij 24.

¹⁶³ Angelicall Language.

¹⁶⁴ Longe ...destructionis: "We are far away from the perversity of destruction."
-Ed.

¹⁶⁵ There are approximately three blank lines here. -Ed.

¹⁶⁶ Raphael is to be absent for a certayn time: but his powre shall be here.

¹⁶⁷ Of the boke.

¹⁶⁸ Languages.

¹⁶⁹ Nihil ...perfectum: "Nothing is here which is not perfect." -Ed.

I go. I haue sayde, (and it is true,) No unclean thing shall enter:

Much less, then, here: For, it is the sight of whose Maiestie we tremble and quake at. He shall teache, of himself for, we are not worthy.¹⁷⁰ What then, of your selues? But such is his great and singular fauor, that, he is of him self, and with those, whom he choseth.¹⁷¹ For, the ende of a!! things is at hand,¹⁷² and Powre must distinguish, or els nothing can prevayle. What you here, yea what thow feelest, by thy finger, Recorde; and scale sure. This is all, and in this is conteyned all, that comprehendeth all, The a!!mighty powre and profunditie of his glory.

What els?

As thow seest, and till he see, whose sight,¹⁷³ is the light of this his own powre, His might is great. The dew of his stedfastnes and glorious perfection hold up and rectify the weaknes of your fragilitie: Make you strong to the ende of his workmanship to whome I commit you.

EK: He plucketh the veale ouer all.

A voyce afterward:—Ne Ne Ne na Jabes.

Δ: Sanctus Sanctus Sanctus Dominus Deus Zebaoth: Pleni sunt cæli et terra gloria Maiestatis eius. Cui soli omnis honor, laus et gloria.¹⁷⁴

Amen.

170 A Note, that we shalbe Theodidacti, of god him self and no Angel herein. -A. Theodidacti: "taught by God." -Ed.

171 Potentia. -A. ("Power." -Ed.)

172 The ende of all things is at hand.

173 The sight of god.

174 Sanctus. . . gloriΔ: "Holy, holy, holy, Lord God of Hosts. Heaven and earth are filled with the glory of his majesty. To him alone is all honor, praise, and glory."
-Ed.

1583 Aprilis 2. Tuesday. Jesus + before none

Δ: A noyce like a Thunder was first hard. The Chayre and Table appered. There appered fyre in the chayre, and burnt away the veate or covering therof. The cullor of the flame of the fire was as of Aqua vitæ burnt.

A voyce:—Sum.¹⁷⁵

EK: There goeth a clowd or smoke from the chayre, and covereth the Table. That smoke filled a!! the place.

A voyce:—Impleta sunt omnia gloria et honore tuo.¹⁷⁶

EK: A!! is become clere, saue the Table which remayned couered with the clowde still.

A great thunder began agayn, and the chayre remayned all in fire. Now the boke appeareth evidently, lying uppon the Globe in the chayre and the letters appered wet styll, as yf they were blud. There appered fire to be thrown oute of the stone, uppon EK.¹⁷⁷

The sownd of many voyces semed to pronownce this: Let all things prayse him and extolt his name for euer.

EK: The fire is still in the chayre, but so transparent, that the boke and letters therof may we!! be seen.

EK felt his bed as if it were on fire.

A voyce:—Sic soleo errores hominum punificare.¹⁷⁸

A voyce:—Say what you see.

EK: I see letters, as I saw before.

A voyce:—Moue not from your places;¹⁷⁹ for, this place is holy.

175 Sum: "I am." -Ed.

176 Impleta.. tuo: "All things have been fulfilled to your glory and honor." -Ed.

177 Note, fire.

178 Sic. ...punificare: "So I am accustomed to cleansing the errors of the people." -Ed.

179 Moue not from your places.

A voyce:—Read.—EK: I cannot.

Δ: You shold haue lerned the characters perfectly and theyr names, that you mowght now haue redyly named them to me as you shold see them. Then there flashed fire uppon EK agayne.¹⁸⁰

A voyce:—Say what thou thinkest. Δ: He sayd so to EK.

EK: My bed is a!! on fire.

A voyce:—What thou thinkest, euery word, that speak.

EK: I can read a!!, now, most perfectly: and in the Third row¹⁸¹ thus I see to be red,

3. Pa1ce¹⁸² duxma ge na dem oh dog da ved ge ma fedes o ned a tha
lepah nes din. Ihehudétha dan vangem onphe dabin oh nax palse ge
dab maz gem fatesged oh ma! dan gemph naha Lax ru !utúdah ages
nage! osch. macom adeph a dosch ma handa.

EK: Now it thundreth agayn.

A voyce:—Ego sum qui in te. Mihi ergo qui Sum.

Δ: Non nobis domine non nobis, sed nomini tuo damus gloriam.¹⁸³

Δ: Then EK red the fowrth row, as followeth,

4. Pab o mata nax !asco vana ar von zimah la de de pah o gram nes ca pan
amphan van zebog ahab dauez öl ga. van gedo oha ne daph aged onédon pan
he ges ma gas axa nab alpod ne ahida phar or ad gamésad arg!a nado oges.

Δ: Blessed be the name of the Highest, who giueth light and understanding.

180 Fire agayn.

181 The Third row of the first page.

182 Palse/Paize. I dowt which of these 3 must serve: c,s,z.

183 Ego sum. ...gloriam: "I am the one who is within you. Therefore I am the one who is for myself. Δ: Not for us, O Lord, not for us, but for your name may we give glory." -Ed.

EK: It thundreth agayn. A!! is covered.

A voyce:—Orate.¹⁸⁴

Δ: We prayed: and returning to the work agayn, the fire covered a!! stilt and EK hard voyces, singing (as a far of) very melodiously. Then all became euident agayn unto EK his perfect Judgment.

Δ: EK then red thus,¹⁸⁵

5. Mabeth ar mices¹⁸⁶ achaph pax mara geduth alldes orcánor manch¹⁸⁷ arseth. olontax ar geban vox portex ab pamo. agématon burlse ganport. vdrlos pasch. ¹⁹³ Locus sanctus. -A. Locus est hic sanctus: "This place is holy." -Ed.

¹⁹⁴ Sacer est a te Domine: "It is consecrated to you, O Lord." -Ed.

¹⁹⁵ The Seventh row.

¹⁹⁶ lah.

¹⁹⁷ Lesgomph.

¹⁹⁸ Asco, with a prick ouer the o, is to be pronounced as Asto.

¹⁹⁹ Vnam.

EK: The sownd of Melodic, begynneth agayne.

Δ: The fire cam from EK his eyes, and went into the stone againe. And then, he could not perceyue, or read one worde.²⁰⁰ The Fyre flashed very thick and all was couered with a veale.

Δ: Prayse we the lord, and extoll his name. For, his hand bath wrought wondrous works, for his owne glorie.

Amen.

Aprilis .3. Wensday, Forenone

Δ: First the Curten was drawn away: and then a!! appeared on fire: The whole place a!! ouer. EK hard voyces, but could not discern any thing but the humminging of them.

Δ: There cam fire agayn (out of the stone) uppon EK, a!! his body ouer.

EK: The fire so diminisheth it self that the boke may be perceyved.

A voyce:—Magnus Magnus Magnus.²⁰¹

An other voyce:—Locus sacer et acceptabilis Deo.²⁰²

EK fel!t the fire to gather up into his bed. Shortly after he could read the boke, as he could do yesterday.

Now, the fire shot out of EK his eyes, into the stone, agayne. And by and by he understode nothing of all, neyther could reade any thing:

nor remember what he had sayde. All became dark. Then was the curten drawne, and so we ended.

Δ: Gloria patni et filio et Spiritui sancto

nunc et semper.²⁵⁶

Amen.

Aprilis .3. Wensday + After none hor ^{51,4}

Δ: A prety while, the veale remayned ouer all: then it was taken away. First fire was thrown uppon EK out of the stone. Many voyces concordantly sayd, — Bonum est ô Deus, quia Bonitas ipa es.²⁵⁷

An other voyce:— Et magnum, quia tu magnitudo ipsius Magnitudinis ~25 8

A voyce:— Adgmach adgmach adgmach = much glory

A great voyce:— Sum, et sacer est hic locus.²⁵⁹

254 It is but one word.

255 Sownded, palef.

256 Gloria. ...semper: "Glory be to the Father and the Son and the Holy Spirit now and forever." -Ed.

257 Bonum. ...es: "It is good, O God, for you are goodness itself." -Ed.

258 Et magnum. ...Magnitudinis: "And great because of the size of greatness itself." -Ed.

259 Sum. ...locus: "I am, and this place is, holy." -Ed.

A voyce:— Adgmach ádgmach ádgmach húcacha.

Δ: Then EK read the row on this manner,

21. PadohOmagcbs²⁶⁰ galpz ~261 apá nal Si. gámvagad a! pódma gan NA.

260 Padohómaghebs.

261 Rede as arch.

262 A pillar of light stode before the boke.

263 In margin, but crossed out: "Vin in vinco must be pronowced long as if it were a dubble i."

264 Arse.

265 Or, gascampho why didst thou so: as god sayd to Lucifer. The word hath 64 significations.

266 =cum humilitate aduocamus te cum adoratione Trinitas. ("~Befafes] with humility we call you, with adoration of the Trinity." -Ed.)

267 This is the name of the spirit contrary to Befafes.

Befafes ô, is to call uppon him as on god. Befafes oh, is as muche to say, 'come Befafes and beare witness."

Also in margin: "Befafes his Etymologie is as much to say as, 'Lumen a Lumine'. Spiritus orh secundus est in grada imperfectionis tenebrarum. A. How can orh signifie 'Deus sine fine' if it be the name of a wicked spirit?" (Deus sine fine: "God without end"; Deus a Deo: "God from God"; lumen a lumine: "light from the light"; Spiritus orh ... tenebrarum: "The spirit orh is the second in the scale of imperfections of darkness"; Deus sine fine: "God without end." -Ed.)

268 In margin: "~~Orh = Deus sine fine. Gorh = Deus a Deo.~~

Befes, the vocatiue case of Befafes.

~~Befes, is as much to say as 'come Befafes and see us'.~~

269 This word hath 72 significations.

270 Of two syllables.

Δ: Now appered Raphael [ Me] or one like him, and sayde,
Salus vobis in illo qui vobiscum.²⁷¹

I am a medicine that must prevayle against your infirmities: and am come to teache, and byd take hede. Yf you use dubble repetition, in the things that follow, you shall both write and work and all at ones: which mans nature can not performe. The trubbles were so great that might ensue thereof, that your strength were nothing to preuayle against them. When it is written, reade it no more with voyce, till it **be in practise**. A!! wants shalbe opened unto you. Where I fownd you, (with him, and there,) I leave you. Cumfortable Instruction is a necessarie Medicine.

Farewell.

EK: The boke and the Chayre, and the rest were a!! out of sight while Raphael spake, and he lay down prostrate. EK saw a great multitude in the farder side of the stone. They all cam into the stone, and axed,

What now?

How now?

Vors mábberan = how now: what hast thou to do with us?

Δ: As I began thus to say (The God of powre. of wisdom.) they a!! interrupted my entended prayer to god for help &c and sayd, We go We go.

Δ: And so they went away.

Then the boke and the rest cam in agayne.

A voyce:—One Note more, I haue to tell thee. Ax him not, What he sayeth, but write as thou hearest: for it is true.

Δ: Then, o lord, make my hearing sharp and strong, to perceyue sufficiently as the case requireth.

271 Salus. .vobiscum: "Welcome (lit, health) to you in him who is with you." -Ed.

Rap:—Be it unto thee.

Δ: Then EK red as followeth,

22. ors lab gemphe nahoh ama-natoph des garhul vanseph iuma lat gedos lubab aba last gesto Vars macom des curad vals mors gaph gemsed pa campha zednu ábfada máses IOfgono Luruandah²⁷² lesog iam!e padel arphe nades gulsad maf gescon lampharsad surem paphe arbasa arzusen agsde gheho! max vrdrá paf gals macrom finistab gelsaphan asten Vrnah²⁷³

Ed.

A Voyce:—Serue God and take hede of Nettels.³¹⁸ Δ: This was spoken to EK in respect of a great anger he was-in yesternight, by reason that one had done him inurie in speche at my table. Charles Sled.

EK: There appere a great many, a far of; as thowgh they appered beyond the top of a howse: and so semed far of behinde the stone: and they seme to haue no heds.

A Voyce:—A peculier people, and shalbe restored.³¹⁹

Δ: After this voyce, the sayd hedles-people disapered. Then all appered fyre, and a clowd covered all: and in the top of the fyre in the chayre, appered three faces, and seemed to shute and close in one. The faces seemed, eche to turn rownd, and so to ioyn in one afterward.

A Voyce:—Prayse him in his glorie and worship him, in his truth.

Δ: The fire entred into EK.

A voyce:—Orate.³²⁰ Δ: We prayed.

Δ: Then thus appeared,

36.gedothar argo fa adóphanah gamsech olneh várasah iusmach = begotten.

A voyce:—Interpret not, till your understanding be furnished.³²¹

318 Take hede of Nettels.

319 Perhaps the Jues shall be restored. ~.l. Dee sees “headless” as a metaphor for the fact that the Jews have no central authority like the Pope. Dee’s meaning is most likely to be that the vision is a prophecy that the Jews will be readmitted into England where they had been expelled in 1290/91. They were, in fact, readmitted into England in 1655 after petitions from Menasseh Ben Israel. See David S. Katz, *Philo-Semitism and the Readmission of the Jews to England* (Oxford: Clarendon Press, 1982), chapter three for details. There is more on this in his most recent book, *The Jews in the History of England* (Oxford: Clarendon Press, 1994). According to Dr. Katz (private communication), “Dee had good reason to think this might happen in his lifetime.” -Ed.

The 49th row followeth after 2 leaves: Arney vah nol, &c.

Δ: Now the boke was couered with a blew silk sindall³⁵⁰ and uppon that blew covering appered letters of gold, conteyning these words,

346 = Use humilitie in prayers to God, that is fervently pray. It signifieth, Pray into god. ~
347pronownce as ch~ in chery.

348 ~ ratrugeem is one of the 7 words on the side of the Table first prescribed.

349I will begynne a new.

350 Note this covering to be made for the boke. = Æ Sindall: "sendal, a thin light silk." -Ed.

Amzes naghézes Hardeh³⁵¹

EK: It signifieth, the universall name of him that created universally be prayed and extolled for euer.

Δ: Amen

A Clowde covered the boke.

A Voyce:—Mighty is thy Name (o lorde) for euer.

EK: It lightneth.

A Voyce:—The place is Holy: stur not sayd the three heds

Δ: Now appered to EK, some imperfection passed in the eleuenth row. And that we wer towght how to amend it: and so we did.

Δ: Then the firy light went from EK into the stone agayn: and his inspired perceyuerance and understanding was gone: as often before it used to be.

Δ: Gloriam laudemque nostri Creatoris, omnes Creaturæ. indesinenter resonent:³⁵² Amen.

Halleluiah Hallelujah Hallelujah

Amen.

Aprilis 6. Saterdag after none.

Δ: The Table, Chayre, boke and fyre appeared. And while I went into my oratorie³⁵³ to pray, fire cam thrise out of the stone uppon EK, as he was at prayer, at my table in my study.

351 Note this to be pronownced rowndly to gither.

352 Gloriam . . . resonent: "May all creatures continually resound the glory and praise of our Creator." -Ed.

353 Oratory: a small private chapel. -Ed.

EK hard a voyce out of the fyre, saying,

Why do the Children of men prolong the time of theyr perfect felicitie: or why are they dedicated to vanitie? Many things ar yet to come:

Notwithstanding, the Time must be shortned,

I AM THAT I AM.

A voyce: Veniet³⁵⁴ Vox eius, Ut dicat fitijs hominum quæ ventura sunt.³⁵⁵

EK: here is a man, in white, come in, like Uniel, who cam first into the stone.

Δ: Benedictus qui venit in nomine Domini.³⁵⁶—Ur: Amen.

Ur:—I teache: EK sayd that he turned toward me.

Ur: What wil!t thou I shall answer thee, as concerning this work?

EK: He hath a ball of fire in his left hand and in his right hand a Triangle of fyre.

Δ: What is the most nedefull for us to lerne berm, that is my chief desire.

Uriel:—Fowre monthes, are yet to come: The fifth is the begynning of great miserie, to the heauens, to the earth and to all liuing Creatures.³⁵⁷ Therefore must thou nedes attend upon the will of God:

Things must then be put in practise. A thing that knitteth up all must of

354 The manuscript has an “a” (or A?) over the second “e” in “veniet.” -Ed.

355 Veniet . . . sunt: “His voice will come, that he may tell the sons of men what is coming” Sloane 3677 also has an “a” over the second “e” of “veniet.” With this proposed amendment the statement would start: “May his voice come. . .” -Ed.

356 Benedictus. . . Domini: “Blessed in he who comes in the name of the Lord.” -Ed.

357 A prophesy very dreadfull now at hand.

force conteyn many celestial! Vertues. Therefore, in these doings, must things be finished spedvly,³⁵⁸ and with reuerence.

This, is the light, wherewith thou shalt be Kindled.³⁵⁹

This is it, that shall renew thee: yea agayn and agayn, and, seventy scuen tymes, agayn.

Then shall thy eyes be clered from the dymnes. Thou shalt perceyue these³⁶⁰ things which haue not byn seen, No, not amongst the Sonnes of men.

This³⁶¹ other haue I browght, whereof I will, now, bestow the ~y entith part of the first part of seuentie seuen. The residue shall be fullfilled, in, and with thee: In. (I say.) and to gither. with thee. Behold (sayth the lord) I will breath uppon men, and they shall haue the spirit of Understanding.

In 40 dayes³⁶² must the boke of the Secrets, and key of this world be Written: euen as it is manifest to the one of you in sight, and to the other in faith. Therefore haue I browght it to the wyndow of thy senses, and dores of thy Imagination: to the ende he may see and performe the tyme of God his Abridgment.³⁶³ That shalt. thou,³⁶⁴ write down in his propre and sanctified distinctions.

³⁵⁹ Uriel held up now the triangle of fire  .

³⁶⁰ Those.

³⁶¹ Uriel now holding up the Ball of fire in his left hand, sayd as is here written:  .

³⁵⁸ Spedily & reuerently.

³⁶² If from the first day of writing we accownt than from good friday the reckoning doth begynne: and so ende this.

³⁶³ The Abridgment of time.

³⁶⁴ Speaking to A.

This other, (pointing to EK) shall haue it aliwayes before him, and shall daylie performe the office to him committed. Which if he do not, the Lord shall raze his name from the number of the blessed, and those that are annoynted with his blud.³⁶⁵

For, behold, what man, can speak, or talk with the spirit of God? No flesh is hable to stand, whan the voyce of his Thunder³⁶⁶ **shall present the parte of the next leaf unto sight.**

You haue wauering myndes, and are drawn away with the World:

But brittle is the state therof: Small therefore are the Vanities of his Illusion.

Be of sownd faith. Beleue. Great is the reward of those that are faithfu!t. God Wit! not be dishonored, neyther will suffer them to receyue dishonor, that honor him in holiness.

Behold, Behold, Mark ô and Behold: Eache line hath stretched him self, euen to his ende:³⁶⁷ and the Middst is glorious to the good, and dishonor to the wicked. Heuen and erth must decay: so, shall not the words of this Testimonie.

Δ: Ecce seruus et misellus homuncio Dci nostri, fiat mihi iuxta beneplacitum voluntatis suæ:³⁶⁸ &c.

Δ: Uric! toke a little of the fire in his left hand and flung it at EK:

and it went in at his mowth.³⁶⁹

Ur: My message is done.

Δ: May I Note Ur, (meaning Uriel,) for your name who now deale with us?—
Ur:—I am so.

365 The danger thretned, if EK do not his dutie.

366 Note a terrible thing.

367 The ende of all.

368 Ecce...suae: "Behold this servant and wretched little man; let it be to me whatever is most pleasing to his will." -Ed.

369 Note, by the place here before what measure in proportion of powr and understanding this was, in respect of the white ball of fyre.

Δ: I pray you to give us advise what we are to doo in our affayres.

Ur: It is sayde.

Δ: He sayd to EK, Tell him, i haue told him, and seemed to smile.

Δ: Of Mistres Haward (Jentlewoman³⁷⁰ of her Maiesties priuie chamber) I wold fayn know, wherefore we were not warned of her cornming? She hath caused us, now, for an howre or two, to intermit our exercise? Is it the Will of god, that for her great charitie used toward many, (as in procuring the Quenes Majesties Almes to many nedy persons) the lord entendeth to be mercifull to her? I meane at the pynche of these great miseries ensuing, now (by you) told of. And that by her~ I may do good seruice concerning the Quenes Maiesties Cumfort?

Ur:—Who is he, that opened thy mowth, or hath told thee of things to come? What thow hast sayd, is sayde. Mark the ende.³⁷¹

It is a sufficient answer.

Ur:—Loke up.—Δ: He sayd so to EK: who loking up, saw the boke, the chayre and the Globe a part, abroad, out of the stone, and then, none rernayning in the stone to be seene: and it cam nearer & nearer to him, and it burned, as before.

Ur: So, set down, what thow seest. ~: The boke and writing was made very playne to him.

What thow seest, deliuer unto him. As it is his will, so be it unto thee:

Do thy duty, whereunto thow art moved, and it shalbe sufficient.

Farewell, for a time.

³⁷⁰ Jentlewoman: "noblewoman." -Ed.

³⁷¹ Mistres Francis Haward elected to taste of god his great mercy for her charitable hart, &c.

EK: Now is all couered with a white clowde, such an one as I saw not yet.

Δ: We put up the Stone: and the former boke and other furniture, appeared uppon the table hard by EK: and he was to write out as he saw: which he began to do, both in character and words: but it was to cumbersome to him: and therefore he wrote onely the words in latin lettres.

Δ: After he had written 28 lines there in that paper boke, the first word being Arney, and the last, being j~ suddenly all was taken away out of his sight: and so likewise his understanding of that he had written was quite gone. For, contynually as he wrote, he understode the language and sense thereof, as if it had byn english.

Δ: After he had finished that second page³⁷² of the first leafe, I then did copy it out as followeth.

ⱠⱡⱢ ⱡⱢⱡ ⱡⱢⱢⱢⱢ

Δ: And this is the late ende of the second page of the first leafe of this excellent boke. The other leaves are written, apart, in an other boke⁴⁰¹ as may appere. But with these 9 rowes and the former 41, doth arise the some of 50: which is one more then 49: Therefore I am not onely of this but of diuerse other imperfections yet remayning in this page, to ax the solution and reformation.

Δ: Whan I had told this my dowte to EK, he answered me that the first row of these last .50. before set downe, was the last of the first page of this first leafe: and true it is that in the first page were first sett down 48 rows, of which eight and fortith row begynneth with this word Amgédpha &c And therfore the next row following, (begynning with Arney vah nol gadeth &c) is the nyne and fortyth row of the first page and so the last row of that page: And therby aliso the second page of the first leaf hath these 49 rowes here noted: And so is one dowte taken away: The other is of the numbers of words in some of the 49 rows of this second page.

⁴⁰¹An other boke: British Library, Sloane manuscript 3189 contains the bulk of the angelic book.
-Ed.

Aprilis 10. hor. 9.

Z~: As we wer talking of the Macedonian (the grecian), who yesterday cam with Mr. Sanford his letters, there appeared in the corner of my study a blak shadow: and I did charge that shaddow to declare who he was: There cam a voyce and sayd that it was the Macedonian: and abowt his hat was written in great letters this word,

, which EK wrote out and it signifieth maculo-
sus,⁴⁰² or condemnatus⁴⁰³ &c. and the Voyce sayd, that word was
sufficient

adding Est,⁴⁰⁴

~: God be thanked and prayed;

To me deliuered by Mr. Edward Kelly 1583. Martij 22 Friday
Mr. Husy cam with him from blokley ⁴⁰⁵ OS

⁴⁰² Polluted. -Ed.

⁴⁰³ In marg.: firmuG ("strong"). condemnatus: "condemned." -Ed.

⁴⁰⁴ Est: "He is." -Ed.

⁴⁰⁵ This note is on the reverse side of the following diagram. -Ed.

Tabula locorum rerum et Thesaurorum absconditorum Menaboni, mci Gordanili, militis, et Danaorum Principis, expulsi, multorumque aliorum clarissimorum (Britanie meridionali parte) virorum, contra eiusdem inhabitatores militantium: quam, hlc, familiarissimorum consensu, aliquando ad nostratium rediuntium commoditatem et auxilium abscondere et sepelire decreui: qua quidem intellecta, facile possunt ad lucem abscondita efferre.⁴⁰⁸

And the Notes of the ten places, here by, affixed: are thus to be red orderly:

1 Gilds cros hic o mer id io onali ot on	2 blankis ⁴⁰⁹ Suters croces	
3 Marsars got cros	4 Huteos cros	5 Fleds grenul
6 Mons Mene	7 Mountegles amid	8 Lan sapant
9 Corts nelds		10 Mnrr ⁴¹⁰ Merse

⁴⁰⁸ Note J. Dee. The last being of the Danes here, was about the year 1040. (Tabula effere: "The table of places of things and hidden treasures of Menabon, my Gordanil, soldier and banished prince of the Danes, and of many other famous men in the southern part of Britain and of native soldiers who fought against the same. With the agreement of closest friends I decided to hide this away and bury it for the convenience and help of our countrymen who may return at some time. By this when understood, they can easily bring the hidden to light." -Ed.)

⁴⁰⁹ Of this  "k" I dowl yet.

⁴¹⁰ ~ forte Marr.

Aprilis 15. Monday

Δ: As EK was writing the eighteenth leaf which was of the spirites of the earth, (in the after none abowt 4½ of the klok) he red a parcell therof, playnely & alowde to him self, and thereuppon suddenly at his syde appeared three or fowre spirituall creatures like laboring men, having spades in theyr hands & theyr heares hangyng abowt theyr cares, and hastily asked EK what he wold have, & wherfor he called them. He answered that he called them not. & they replyed, & sayed that he called them: Then I began to say, they lyed: for his intent was not to call them, but onely to read and repeat that which he had written: and that euery man who readeth a prayer to perceyue the sense thereof, prayeth not. No more, did he call them. And I bad them be packing out of the place: and thereuppon remoued from my desk (where I was ruling of paper for his writing) to the grene chayre which was by my Chymney: and presently he cryed out and sayd they had nipped him and broken his left arme by the wrest: and he shewed the bare arme and there appered both on the upper syde and lower side imprinted depe-in, two circles as broad as grotes⁴¹¹ thus:

very red: And I seeing that, sowght for a stik, and in the meane while, they assalted him, and he rose, and cryed to me (saying) they come flying on me, they come; and he put the stole, which he sat on, betwene him and them. But still they cam gaping, or gyrning⁴¹² at him. Then I axed him where they were: and he poynted to the place: and then I toke the stik and cam to the place, and in the name of Jesus commaunded

411 Grotes: silver fourpence pieces used from the ¹⁴th to the 17th century. -Ed.

412 Gyrning: "snarling." -Ed.

those Baggagis to avoyde and smitt a cross stroke at them: and presently they avoyded.⁴¹³

All thanks be to the onely one Almighty, and everlasting God Whose name be prayesd now & ever. Amen.

Aprilis 18414. Thursday morning .hor. 8. Circiter

Δ: As EK cam to write-out the Tables according as he was wont: and to haue the letters appearing in the ayre hard by him, he saw nothing but a blak clowde seven-cornered. And after I had put the stone agayne into the frame,⁴¹⁵ and thereuppon did make long and oft request, for answer hauing, There appered nothing, neyther was anything seen in the stone. Then I fell to prayer agayn, and at length, there appeared written uppon, or yssuing out of the clowde, this sentence.

He promised. be not carful: Δ: Note here are just 21 letters.⁴¹⁶

EK: The letters semed to stand at fingers endes, (being 21): and so euery finger had a letter on it: and the fingers semed to be placed at the Corners of the Heptagonall clowde: and as sone as the sentence was red the fingers which seemed to issue out of the Heptagonum, did shrink in agayn and disapere.

Δ: All laude honor and thanksgiving, be to the highest, our most louing mercifull and almighty God, now and euer. Amen.

413 Avoyded: "departed." -Ed.

414 Note. Now 30 Tables being written since good friday: and days onely 21 passed since good friday.

415 The stone out of the frame.

416 A as who shold say, cni-o~ cilia, ipe dixit: nr Deus. -A. (Autos. ..Dens: "he said himself, 'our God.'" -Ed.)

Thursday. Aprilis 18. after dynner

Δ: We being desirous to know the cause of this stay making, in the Tables shewing as before was accustomed; and now (24 leaves being written,) a dark clowde to hang in the place of a glorious boke, did greatly disquiet our myndes, and browght us in feare of some offence lately committed, by any one, or both of us, whereby the Indignation of the lord might be kingled against us. Hereuppon we prayed severally; and at length, (no alteration, or better Cumfert hapening to us,) I prayed in the hearing of EK, (by my desk, on my knees) in great agony of mynde; and Behold, there appeared one standing uppon, or rather somewhat behynde the Heptagonall clowde who sayd,

I am sent, to understand the cause of your greif, and to answer your dowtes.

Δ: I, then, declared my mynde breifly, according to the effect of my prayer. Whereunto he answered at large, reproving my appointing of god a tyme or to abridge the tyme spoken of: and among his manifold grave speeches he had these words,

Prepare all things,⁴¹⁷ For tyme is at hand.
His Justice is great and his arme stronge.

How darest thou dowt or dreame, saying: Lo, God, this may be done in shorter time &c. But such is flesh.

Be rocks in faith.
It is not the manner of us, good Angels,⁴¹⁸ to be trubbled so oft.

⁴¹⁷ Prepare all things.

⁴¹⁸ Good Angels.

At the time appointed, thou shalt practise: While sorrow shall be measured, thou shalt bynde up thy fardell.⁴¹⁹ Great is the light of Gods sinceritie. Appoint God no tyme. Fullfill that which is commaunded. God maketh clere whan it pleaseth him. Be you constant and avoyde Temptations: For True it is, that is sayde: And lastly I say,

It shall be performed.

What is it now thou woldest desyre to be made playner?

Δ: Still he proceded uppon my answers: and at length he sayd,

Neyther is the time of mans Justification known untv! he hath byn tried.⁴²⁰

You are chosen by God his mercy to an ende⁴²¹ and purpose: Which ende shall be made manifest by the first begvning in knowledg in these Mysteries.

God shall make clere whan it pleaseth him: & open all the secrets of wisdom when he unlocketh. Therefore Seke not to know the mysteries of this boke. tll the very howre⁴²² that he sbal! call thee. For then shall his powre be so full amongst you, that the flesh shall not be perceyued, in respect of his great glory.

But was there euer any, that tasted of gods mercies so assuredly, that wanted due reverence?⁴²³ Can you bow to Nature, and will not honor the workman? Is it not sayd, that this place is holy? What are the works of holmes? I do aduertise you: for, God will be honored. Neyther will he be wrasted.. in any thing he speaketh. Think not, that you could

419 Fardel: "pack." -Ed

420 Tyme of Justification known than.

421 The ende of our election.

422 Tyll the very howre.

423 Want of due reuerence using in our actions is reproved.

speake or talk with me, unleast I did greatly abase my self, in taking uppon me so unlikely a thing in forme. as to my self. &c.⁴²⁴ But he doth this not for your causes, not for your deserts, but for the Glorie of his owne name.

One is not to be lightened, but all. And, which all? The two fethered fowle together with the Capitayn.

Ask What thou wilt: for, untill the 40 daves⁴²⁵ be ended, shalt thou haue no one more shew of us.

Δ: Whether shall we give Cownsayle, or consent to the Captavne⁴²⁶ to go down into his Cuntry, as, presently he entendeth.

Ur:—As he listeth. Δ: EK sayd that this was Uriel who now had appered and answered all this.

Ur:—I will ask thee one question. Haue we any voyce or no?

Δ: I do think you haue no organs or instruments apt for voyce: but are mere spirituall and nothing corporall: but that you haue the powre and property from god to insinuate your message or meaning to eare or eye, in such sort as mans Imagination shall be, that both they here and see you sensibly.

Ur:—We haue no voyce but a full noyce that filleth euery place:⁴²⁷ which whan you ones taste of, Distance shall make no separation. Let there one come that may better answer: not in respect of thy self but one, more nerer to thy estate.⁴²⁸—Do thy Duty.

Δ: He sayd this, to one who cam in, and he departed him self.

Δ: This new come Creature sayd, Wold you haue any thing with me, li?429

424 Angels abase themselues, to pleasure man by theyr instructions, when they tak uppon them, or use any sensible evidence of themselves or voyces, &c.

425 40 dayes.

426 A.G. -A. (Adrian Gilbert. -Ed.)

427 Vox angelorum.

428 Uriel putteth one into his place.

Δ: Who art thou: Art thou one that loveth and honoreth our Creator?

li: Will you see my hart?—EK: He openeth his body and sheweth his hart: and theron appered written ~

Δ: He semed to be a very mery Creature, and skypped here and there, his apparell was like as of a vyce in a play: and so was his gesture⁴³⁰ and his skoffing, as the outward shew therof was to be vulgarly⁴³¹ demed:

but I did carefully ponder the pith of the words which he spake: and so forbare to write very much which he spake at the begynning by reason EK did so much mislike him, and in a manner toke him to he~an Illuder.

Δ: As you are appointed to answer us by the Messenger of God, so answer us, (who desyre pure and playne verity,) as may be correspondent to his Credit that assigned you, and to the honor of God who Created us.

11:—My answer is Threefold:⁴³²—I answer by gesture, by my apparayle, & will answer thee by my wordes.

Δ: Do you know where the Arabik boke⁴³³ is that I had: which was written in tables and numbers?⁴³⁴

11:—It is in Scotland:—A minister hath it; it is nothing worth. The boke conteyneth fals and illuding Witchcrafts. All lawde honor and prayse be to the One and euerlasting God: for euer and euer.⁴³⁵

Δ: The Lord Threasoror,⁴³⁶ hath he, any bokes belonging to Soyga? 11:—He hath none: but certayn Introductions to all artes.

Δ: But it was reported to me by this Skryer⁴³⁷ that he had: certain

ell semeth to be like a Vice⁴⁵⁰ in a play.

EK: Ar you not a Kinsman to Syngolla?

Il: I syr, and so are you a kinsman to Synfulla.

Δ: A man may finde corn in chaf.

Il:—So may you (perchaunce) finde me an honest man in my ragged clothes.

Δ: This other day, whan I was in dowl of the Grecian (the Macedonian) whether he had any good and profownd lerning or no, he was represented spiritually, and abowt his hat in great letters was written this greke word  : I pray you what doth it

signifie? I axed the grecian and he sayd,  Il: Loke in your boke. Δ: I toke the common lexicon: and he sayd: No Not that: Then I axed if I shold take phauorinus his lexicon:⁴⁵¹ and he answered, Nor that. And I axed which then: and he sayd your boke covered with a white parchment: and I axed, that of Munsteris of Latine greke and hebrue? And he sayd, yea: and there you shall finde that Maculosus hath onely that one word  longing to it. I loked & so fownd it: which satisfyed me very well.

Δ: I pray you what say you of Gariladrah;⁴⁵² do you know him? Who long sins⁴⁵³ did deale with me?

⁴⁴⁹ Note, El semed to be woman.

⁴⁵⁰ Vice: "a character playing one of the vices in a morality play; jester." -Ed.

⁴⁵¹ Varinus Phavorinus, *Lexicon græcum* (Rome, 1523). -Ed.

⁴⁵² Gariladrah.

⁴⁵³ Since. -Ed.

11:—Yf he were lesser then I, I durst speak to him: But bycause he is greater then I, I am not to speak to him. All under, and nothing above me, I deale.

Loke in your Tables and there you shall finde an other name of his.

Δ: I remember no such thing. 11:—Consider who hath set me here.⁴⁵⁴ Yf the Truth thou hast allready, be of a greater then my self, then is it sufficient. Δ: What day was that name given me?

11:—Immediately, sir, after your⁴⁵⁵ Worships last coming.

Δ: That was Raphael: And I remember that Gariladrah sayd that he must leave me and his better, (Raphael) shuld be my instructoi and that then the same Raphael was in my hed then. &c.

Δ: Sing a song to his prayse, who created us.

11: I will sing a short song.

Your doings are of GOD: your calling great:

Go down and seke the Threasor,⁴⁵⁶ and you shall obteyn

it.

Take no care: for, this Boke shall be done in 40 dayes.⁴⁵⁷ Begyn to practise in August.⁴⁵⁸ Serue god before.

You shall know all thing, ictu oculi.⁴⁵⁹ And so, prayse, glory, and eternal! singing with incessant humilitie be unto thee, Creator that hath framed, made and Created all things, for euer and euer, Now say you (yf you will).

Amen. Δ: Amen Amen Amen.

(Draft)

The Rosie Crucian Secrets

by John Dee

Note:

This manuscript was copied from a version which was published through the Popular Press and was no longer available at the time of our putting together this draft. The original is a one-off copy in the London museum.

This copy is our first draft and is not complete in that we have as yet only copied that part of the manuscript which we deem most necessary to preserve for our own purposes and for the future, which is roughly half of the book.

Of those portions which we have not included here some is totally useless, a larger part is published elsewhere and the rest is considered but an interesting curiosity with little or no practical value. Nevertheless we do intend completing the transcription of the entire document at some future date. These bits include some notes on the Rosicrucian Order, the Lexicon and the actual footnotes.

In order to keep the original work as intact as possible we have made an exact copy including the varieties of spellings and terms used inconsistently throughout.

The original manuscript is loosely attributed to John Dee, it seems for the only reason that his name appears in the margins of the original, yet the contents of some of this work have been attributed in the past to another individual.

It matters little for the work speaks for itself in its practical value.

*Frater C.H.A.
January 1997.*

Qui Vult secreta scire, debet secreta secrete custodire.

The Rosie Crucian Secrets

Their Excellent Method
of Making Medicines of Mettals.

Edited and Arranged by Sr. K.Q.M.

FOREWORD

Edward John Langford Garstin, though a somewhat distant cousin, was familiar to me by the name of Eddie from my early childhood. I don't recall in what connection I first heard of him but his name seemed to come up in any talk of family relations. I did not meet him until 1928 when I was studying art at the Slade School and had joined The Quest Society. This group was run on fairly informal lines by G.R.S. Mead, one time secretary to Mme Blavatsky, and author of many works on Gnosticism. Edward was a prominent member of The Quest and I made myself know to him at one of its meetings. I have told something of my association with him in my study of MacGregor Mathers and the Golden Dawn, *The Sword of Wisdom* (Spearman, 1975).

I am not certain of the date of Edward's birth, but if, as I believe, he was 62 at the time of his death on June 26, 1955, this could make it about 1893. I am hazy about his exact connection with my family, but I have traced record of a certain Luisa Charlotte, daughter of General Garstin and wife of Charles (Andrew?) Colebrooke Sutherland who was in the Bengal Civil Service. This lady died at sea in 1838, presumably on the way to or from India, having produced two daughters. One of them married James Colquhoun and became the mother of my grandfather, James Andrew Sutherland Colquhoun, b. 1839. I suppose that Edward's great-great grandfather was the above mentioned General Garstin who must have been active at the end of the eighteenth century, but there was certainly another General Garstin among his immediate forebears - his father or grandfather.

My impression is that there was no link with the writer Crosbie Garstin and his father Norman, who as a founder member of the Newlyn School of Painters and settled in Cornwall towards the end of last century.

In appearance Edward was above middle height and of sandy colouring with pale blue eyes. In features he resembled the photograph of the French Alchemist, Claude d'Yge' de Lablatiniers (1912-1964), which appeared on the cover of the review *L'initiation et Science*, No.63, Paris 1965, marking the occasion of the latter's death.

Edward was dogged by ill-luck all his life, both in business and in affairs of the heart. The fate of his occult work recalls a phase used by WB. Yeats in a similar connection, being 'neither paid nor praised'.

Edward was an excellent dancer and married young, one of his wife's attractions being that she was able to partner him in ballroom dancing championships, many of which they won. The 1914-1918 war broke up this partnership when the Army claimed Edward. On his return from active service with the rank of Captain, he found no sign of his wife, except numerous debts. She had vanished, having sold the contents of their flat and spent all the money in their joint account. In an attempt to re-establish himself Edward embarked on various business ventures but with a notable lack of success. So it came about that when I met him he was sharing a flat with his widowed mother in a less than modish area of Kensington, unemployed except for his esoteric studies. He found out that he was also a good cook and this proved useful in their straightened circumstances.

He was a vegetarian at this time, probably following the example of Mathers. Later, he was to be glad to have food of any kind.

I take it that he was already an occult student when he met Mrs. Morgan Boyd, who had helped Moina MacGregor Mathers to establish the A.O. Lodge of the Golden Dawn, when the latter moved to London from Paris, soon after Mathers' death in 1918. So Edward must have been initiated into this Lodge by the early 1920s. Moina had died when I met him but he had known her well. I do not think he would have had the opportunity of meeting Mathers himself, and whether he had joined The Quest before his initiation I don't know. Certainly for some years between the two Wars he was investigating the groups and personalities then active on the London occult scene. He hoped to marry Mrs Boyd's daughter Esme, who was also a member of the Lodge, but she married a stockbroker instead.

In about 1930 Mr. Mead decided to close down The Quest Society and magazine, relinquishing the lease of the two studios used as premises, Edward tried to carry on a similar group under the name of The Search Society. This lacked not only The Quest's headquarters but most of its prestigious membership, though Dr W.B. Crow and Hugh Schonfield were among its supporters. The latter co-edited with Edward a quarterly review *The Search*, produced by the Search Publishing Company, a venture in which they were joined as I recall, by a third partner, Cazimir de Prozynski. They brought out some few titles, but in a year or two, all three 'searches' - society, review, and company - had collapsed. After I left the Slade School, I went to live abroad for a while, and when I returned to London was much occupied with my work as a painter. I had gradually lost touch with Edward after the refusal of Mrs. Boyd to admit me to their Lodge - as recounted in *The Sword of Wisdom*. (It was hasty of me, as I now see, to take this No for an answer, since it is common practice with some secret associations to refuse a candidate the first time around.) Later I heard that with the outbreak of the 1939A5 War, Edward was recalled to the Army, in which he finally reached the rank of acting Colonel, but this was never confirmed and he returned to civilian life as a Major, much to his disappointment in view of his family traditions. Such traditions must have been important to him, since he used his family motto, Animo et Fide, as his magical name.

Edward's mother had died and he married again, this time a red-haired charmer, formerly the wife of the commercial artist Beresford Egan. This second marriage was no more successful than the first. The ex-Mrs Egan had no sympathy with Edward's occult interests, which were a topic of ridicule between her and her boyfriends. After the war, she departed with one of these, a G.I., taking most of Edward's furniture and all his family portraits with her to the U.S.A.

When I next made contact with Edward, in the early 1950s, he was living in a service flat at Scarsdale Villas, W.8. He was unemployed except for a partnership, again with de Prozynski, in a concern called the Anglo-Brazilian Trading Company, which dealt in mechanical spare-parts of some kind. Unfortunately no commercial activity in this line was possible, since all trade with Brazil was barred by the British Government for some years. I presume the partner had some other means of subsistence, but Edward complained of being badly hit by the ban. Though I did not understand how near he was to destitution, I wondered why he did not exchange his flat for a simple room in a less expensive area, and take any kind of job until he could find something more congenial. I suggested that he asked Mrs. Boyd's help, as she had some useful contacts in the business world, but he maintained that she could do nothing. (I was later told that she

had already come to his rescue financially on occasion -- now either she was unwilling to do so again, or he was unwilling to ask her.) Finally, he was obliged to give up the flat and sell his small but well-chosen library of occult books to Geoffrey Watkins.

Next he migrated to one of the remoter suburbs, lodging for a time with a chemist and his wife in return for assistance in running their business. Lastly he exchanged these rather cramped quarters for a room in the flat of A. C. (Tony) Windyard's parents in Battersea. Tony, since deceased, was then a young teacher of mathematics and much interested in esoteric subjects. I do not know how long this arrangement lasted, but it was not long. Afterwards Tony related to me that one evening they had a discussion on some point of Qabalah and on retiring Edward had seemed calm and collected. But next morning his door was locked and a note pinned outside directed Tony to push the key through and pull it under the door to open. He found Edward dead from an overdose of some drug.

Mrs. Boyd was shocked at this news and insisted that consequent on the suicide, Tony should destroy Edward's Order Papers, implements and any items directly connected with his G.D. work, all of which he had kept together in a trunk.

I was out of London for some weeks at this time and only heard of Edward's death by letter from Tony after the inquest and funeral at Morden Cemetery were over. I remembered Edward's remarking some time previously, that he had no inhibitions about suicide, but I felt sure that he could have found some happier solution to his problems. He must have been severely depressed and thus unable to foresee anything but a burdensome old age.

His life story reminds one of a warning passage from Eliphas Levi, which recounts the frequent lot of the occult explorer, and finishes.

'Inheritor of so many victims, he does not dare the less, but he understands better the necessity for silence.'

Ithell Colquhoun

INTRODUCTION

The *Rosie Crucian* Secrets exists only in one known copy, which is No. 6485 of the Harleian MSS. It purports to be a copy of a manuscript by Dr John Dee, the celebrated Elizabethan mathematician, physician, astrologer, magician and alchemist, and is credited to him in Cooper's *Athenae Cantabrigiens is*. Apparently the authority for this ascription is the fact that the MS, which consists of 501 beautifully written folios and has no title page, gives throughout, as marginal notes, the numbers of 'the Sheets of Dr Dee: The work is in three parts, of which the first is purely alchemical and medical; the second is a short alchemical lexicon; and the third deals with the Laws of the Order. A fresh numbering of the sheets 'according to Dr Dee' commences with each part.

As far as I am aware, no doubt as to the authenticity of this manuscript obtained until 1893, when Mr. A.E. Waite suggested that it was a forgery on the following grounds. ²(1) That a critical examination of the first part shows it to be little else but an adaptation of John Heydon's *Elharvareuna, or Rosicrucian Medicines of Metals*, first published in 1665. (2) That at the end of the first part is included a letter said to be from Dr John Frederick Helvetius to Dr John Dee, giving an account of a transmutation by Elias Artista, which historical transmutation took place at the end of 1666, more than half a century after the death of Dee.³(3) That the lexicon, which purports to explain certain hard words which occur in the writings of Dr Dee, consists almost entirely of words not found in the extant works of that author. (4) That the third part is an adapted translation of Michael Maier's *Themis Aurea*, which appeared in 1618.⁴

One other objection has been raised,⁵ namely that the Rosicrucians only came into existence about the time of Dee's death. This argument is, however, almost entirely negligible beside those brought forward by Mr. Waite, which must be considered in some detail.

Before commencing such an examination, it would, perhaps, be as well to make one point clear. The MS does not in any way claim to be an autograph, but merely a copy, and the copyist has indicated the date of the commencement of his labours. March 12th 1713, by inscribing it in the floriated title at the head of the manuscript. For the moment we will ignore the identity of the copyist, though this will also have to be considered as having some bearing on the question of forgery.

As regards Mr. Waite's first point, anyone who cares to compare the *Rosie Crucian* Secrets with Heydon's *Elharvareuna* will find that as far as the end of the second paragraph of what is stated to be 'the thirty-eighth sheet, Dr Dee,'⁶ the one is certainly an adaptation of the other, though without further evidence it is impossible to say who is guilty of the plagiarism. Our MS, however,⁷ extends to some ninety-four sheets of Dr Dee, so that *Elharvareuna* can account only for a little over one third of it. The remaining two thirds I have been unable to identify anywhere - except for Helvetius' letter - and Mr. Waite has neither indicated a source nor pointed out that one is lacking. His last published pronouncement on the subject merely states that 'the text is alchemical as far as folio 3528 and draws much from Heydon.'⁹ I will return to this point again, but in the meantime I would merely suggest that as evidence of forgery it is inconclusive and

inaccurately stated.

Mr. Waite's three remaining arguments seem to me to be far more to the point. Indeed so cogent are they that in the absence of any other theory to explain what must at once be admitted to be correct, I should be compelled to agree that he has proved his case. As I have already remarked, he might, indeed, have further pointed out with regard to Maier's *Themis Aurea* that Part m of our MS is almost a verbatim transcript of the first and only English translation of this work, which appeared in 1656.¹ I shall endeavour later to put forward an alternative explanation of these facts.

I must first, however, deal with the suggestion that Rosicrucianism only came into existence about the time of Dee's death.¹⁰ As I shall have to enter rather more fully into the question at a later stage, I will, for the moment, content myself with saying that unfortunately for its value as an argument, this statement has never been proved, despite the large number of books that have been published dealing with the origin and history of the Fraternity, nor is it probable that the problem will be taken much further. Mr. Waite has, perhaps, been more painstaking than any other contemporary scholar, but his findings can only be regarded by the impartial reader as inconclusive, as is the case with so much historical research. We are left, therefore, with no precise knowledge as to the date of the foundation of the Order in Germany,¹¹ and hence no grounds for stating that Dee could not, as tradition relates, have been a member.¹²

At this stage it becomes necessary to take into consideration the identity of the copyist, seeing that he has been accused of forgery on what must be described as a wholesale scale.¹³ He is one Peter Smart, who describes himself as M.A. of London, and he would seem to have been occupied in copying various MSS during the years 1699 to 1714, but mostly from 1712 to 1714.

The charge of forgery is made specifically in respect of *The Rosie Crucian Secrets* and also in respect of another MS, also in the Harleian Collection, namely No. 6486, the title of which is HERMETIS TRISTMEGISTI: SPONSALIA CELEBERRIMAL *The Famous Nuptials of the Thrice-Greatest Hermes, allegorically describing the Mystical Union and Communion of Christ with every Regenerate Soul. Composed by C.:R.:, a German of the Order of the Rosie Cross about 255 years past, and from the Latin MS faithfully translated into English by Peter Smart, Master of Arts, 1714.* On the reverse of the title, and by the same hand, it is said that in the margin are brief notes by the late Dr. Rudd, explaining some hard words and sentences.

I will revert to this MS shortly, but the mention of Dr. Rudd involves some consideration of the following Harleian MSS, said to be by Rudd and copied by Smart, namely No.6481, *The Miraculous Decensions and Ascensions of Spirits*; No.6482, *Tabula Sancta Cum Tabulis Enoch*; No.6483, *Liber Nialorum Spirituum, Seu Goetia*; and No.6484, *The Talismanic Sculpture of the Persians*. There are two more Rudd MSS not mentioned by Mr. Waite, namely Harleian 6479 and 6480. Of these the former is *A defence of Jewes and other Eastern Men* and the latter *A Hebrew Grammar*.

As far as I can ascertain, these are the only known works attributed to Dr. Rudd, and by innuendo it is suggested that he is merely Smart's *alter ego*. Alternatively it is claimed that despite Smart's several allusions to ancient manuscripts of the late Dr Rudd, the latter cannot have written later than the close of the seventeenth century, 'some of his materials coming from Vaughan and Meydon.'¹⁴

It is important to consider these charges as, if proved, they would be valuable evidence as to the character of Peter Smart and would tend to confirm the suggestion that *The Rosie Crucian Secrets* came in the same category.

As regards any materials that may be found in Heydon, this is, indeed, no proof as to date or illegitimate borrowings, for in an age admittedly lax as to literary honesty Heydon stands out as *facile princeps* among the plagiarists¹⁵ so that not only are the materials involved all older than the date suggested¹⁶ but the ultimate question.¹⁷

Thomas Vaughan is not in the same category anyone casting any doubt upon his literary integrity. But in any event only one case can be adduced where there seems to have been direct borrowing from him by Rudd, and that is the opening vision in the *Decensions and Ascensions of Spirits*. This particular vision, it is to be observed, was also borrowed by Heydon. All three versions vary fairly considerably, though there are passages in each which are to all intents and purposes identical and the very nature of the discrepancies and coincidences seems to suggest a common origin outside all three. I hope, however, that confirmation of this idea will be found when I develop my argument as to the possible origin and authorship of *The Rosie Crucian Secrets*. For the present I will content myself with remarking that no one who has studied the literature with any care would dream of suggesting that the main elements in these MSS of Dr Rudd were original or that they were written with any intention of being published. My submission is that they were private compilations by a student of these subjects.

As to Rudd himself, we have no positive information, but there was a Thomas Rudd (1583-1656), a mathematician and a Captain of Engineers, who in 1651 published the first six books of Euclid with a preface by John Dee.¹⁸ This is not the date of the first publication of this preface, for it had appeared before H. Billingsley's translation of *Euclid's Elements* in 1570. It may well be, however, that Thomas Rudd knew Dr Dee (he was twenty-five years old at the time of Dee's death) and for that reason made use of his preface. It is unlikely that he was the mysterious Dr. Rudd himself; although the name is uncommon and in those days the mathematician, the astrologer and the student of occult mysteries were much akin; but he may have been a relation. In this case he was presumably the younger man, for although there is no proof of the supposition, it is not unreasonable to imagine that the Dr. R. mentioned in a marginal note at the end of the fiftieth sheet of Dr. Dee in *The Rosie Crucian Secrets*¹⁹ as having sent him by letter on October 19th 1605 'A Process upon the Philosophic Vitriol' is the Dr Rudd of the MSS in question.

One more point in connection with Dr Rudd remains to be mentioned, namely the marginal notes to the *Sponsilia Celeberrima Hermetis Trismegisti*.²⁰ Mr. Waite is emphatic regarding these, stating that the translation is not by Smart, who, he says, used the English version by E. Boxcroft published in 1690 and that the notes are 'the marginalia of the English rendering and these derive in turn from the German text.' Mr. Waite is also positive that there never was a Latin original.²¹

Now in the first place the authorship of this work, the *Nuptiae Chemicæ* or *The Chemical Marriage* as it is usually called, is by no means certain. It is the third and most striking of the original Rosicrucian documents, and was first printed in German in Strasbourg in 1616, the authorship being attributed to Christian Rosenkreutz under the date 1459. Modern opinion rather inclines to assign it to Johannes Valentinus Andreae

on the strength of a statement made in his autobiography, which was written late in life. He claims - and it must be remembered that he writes as an opponent of the Fraternity - to have written it in 1601 or 1602 as a jest, though at that time he could only have been fifteen or sixteen years of age. Personally I confess to finding this incredible²² but the reader must judge for himself.²³ It is a matter of some importance, for if not by Andreae, there may well have been a Latin original of an earlier date, of which the so-called High Dutch 'original' is a translation, and it is interesting to note that Latin is the language of most of the marginal notes.²⁴ But to return to the statement regarding Rudd's alleged notes. A comparison will at once show that while the Latin notes of Smart's version vary slightly from those of Foxcroft, there are many additional notes in English, which do not appear in the latter, which are, therefore, either those of Rudd or Smart or borrowed by one or other of them from some unknown source. The alternatives are not in themselves important, but it is quite clear that Mr. Waite is in error in stating that all the marginal notes in Smart's copy are to be found in Eoxcroft.

I do not suggest that the English translation is actually by Smart, through the fact that it is to all intents and purposes identical with that of Foxcroft cannot be taken as positive proof; but I would suggest that it is quite possible that neither of these gentlemen was responsible for the labour involved, but both used an earlier version that had been in circulation in a manner which I shall suggest later, in which case the copy which passed into the hands of Smart may well have had annotations additional to those in the copy which came to Foxcroft, being those of Rudd. Admittedly this does not redound to the credit of Peter Smart, but at the same time it seems obvious that his various MSS were not intended for publication and his claim to be the actual translator from the Latin may be ascribed to the same personal vanity which probably led to the statement in two of the MSS that they were 'methodised' by him.

It may appear to be a long digression, but the character of our copyist is of some importance, seeing that it has been suggested that he was not merely a gratuitous liar but a worse plagiarist than Heydon and that he is guilty of having forged *The Rosie Crucian Secrets*.

It is with the last of these statements that we are really concerned, and it would appear that in making a charge of forgery, especially in this particular case, a very material point has been overlooked, namely that it is the purpose of a forgery to deceive; for it seems obvious that at the time in question, namely in 1713, there could have been little hope of achieving such a result.²⁵ This, I maintain, is proved by the bulk of the contents themselves. *Elharvareuna* was published in 1665, the letter of Helvetius, published in 1667, deals with events which occurred in 1666, 26 fifty-eight years after Dee's death, and an English translation of Maier's *Themis Aurea* had appeared in 1656. I suggest that no forger would have been so clumsy as to weld together these various, comparatively recent and presumably still familiar elements with any hope of passing them off as the work of Dee. Possibly Mr. Waite had these facts in mind when he said as long ago as 1893²⁷ that 'it is, in fact, a very curious forgery, rendered the more difficult to account for by its want of assignable motive.'

Having indicated some of the chief weaknesses of the argument against Smart either as an incorrigible plagiarist or as the forger of the Rudd MSS and more particularly of *The Rosie Crucian Secrets*, it now remains to be seen from what source Smart could have obtained the MS which appears under that title. At the end of Harleian MS No.6483, *Liher Malorum Spirituum*, there is a note by Smart indicating that what followed was *The*

Rosie Crucian Secrets, and stating: 'This Manuscript of Dr Dee was given me by Dr John Gadbury in Anno 1686.' This introduces a new character to the scene in the person of the well-known astrologer and astronomer,²⁸ who was born in 1627 and died in 1704. Among his friends was John Heydon - for whom, on more than one occasion, he wrote laudatory verses to be prefaced to his books²⁹ - and he was evidently a student of alchemy and the Rosicrucian literature I have no evidence to show how the alleged Dee MS may have come into his possession, though I have, I maintain, a reasonable explanation, but in the absence of anything to the contrary, there seems to be no reason why Smart's statement should not be accepted. For the moment I am not even concerned with the question of authorship, but merely to show that there is a high degree of probability in favour of the hypothesis that Smart only figures in the history of this mysterious manuscript as a copyist.³⁰

Before I come to any consideration of the possible history of *The Rosie Crucian Secrets*, however, it would be as well to examine in a little more detail the nature of its contents. As has already been admitted, approximately the first third of Part 1 is almost identical with Heydon's *Elharvareuna*³¹ except that the latter is written as a dialogue supposed to take place between Eugenius Theodidactus³² and Eugenius Philalethes.³³ Many considerable passages are taken verbatim from the works of Thomas Vaughan³⁴ and it is remarkable that in every case, without a solitary exception, Vaughan's words are put into the mouth of Heydon himself. This transcends the limits of ordinary plagiarism to such an extent - Heydon having, on his own showing, a list of two hundred and sixty authors on whom he drew³⁵ - that it seems hardly credible. As will appear I incline rather to the idea that Heydon, having found a suitable MS, re-wrote it in dialogue form. His acquaintance with Gadbury would easily account for the way in which he could have got his material. I am further confirmed in this opinion by the fact that the literary style of *Elharvareuna* changes very markedly after page 190 -- at which point it breaks away from our MS - the remaining eighteen pages being, presumably, Heydon's sole contribution to this volume. Incidentally the style of the *Holy Guide* and his other works differs very radically from *Elharvareuna*, but the whole of *The Rosie Crucian Secrets*, allowing for certain variations in some of the formulae where there is redundancy, is obviously by the same hand.³⁶ There is, to be accurate, one exception to this statement, namely a short and very curious section³⁷ which is very distinctly reminiscent of certain of the communications in Dee's *True and faithful Relation*.

I am aware that if my suggestion is correct it would seem that a charge of unacknowledged borrowing must also be laid against Thomas Vaughan, whose reputation for literary honesty has so far not been assailed. I feel, however, that the evidence is only circumstantial and that where he made use of portions of this MS, the probability is that, as in other cases, he did so with permission, but was debarred from mentioning his source for reasons which I shall hope to make clear. These reasons are, in fact, closely involved in my theory as to the possible origin of *The Rosie Crucian Secrets*, and to this I must now devote some attention.

In the first place, as far as the alleged Dee authorship is concerned, there is the vexed question as to the possible antiquity of the Rosicrucian Fraternity, as it is now commonly called. In this connection, as so often happens, the ill-considered writings of those who seek to maintain the original as given, or even to ascribe to it the 'time immemorial' description, do more to bring such theories into disrepute than all the reasoning of the critics. I do not propose, therefore, to go into the large number of stories, many of them fantastic, that have been circulated as fact, nor even to lay further stress on the dates

given by Maier.³⁸

There seems, however, to be unexpected corroboration of John Yarker's statement that the original Rosicrucians were initiated by 'Moslem sectaries' independent of the traditional visit of C.:R.:C.: to Damcar, Damascus and Fez, which is rejected by the critical historians.⁴² This evidence is supplied in an interesting pamphlet recently published, entitled *Die Praxis der Alten Turkischen Friemauerei*, by Rudolf Freiherr von Sebottendorf; who indicates a definite alchemical practice based on the I.A.O., which is commonly recognized as being in use among Rosicrucians. There is a further link indicating that this actual practice was known to certain alchemical adepts in Germany at an early epoch to be found in Sebottendorf's interpretation of the mysterious 'zodiacal paragraph' in the ninth of the *Twelve Keys* of Basil Valentine; for although there is great uncertainty as to his date, it is, according to Mr. Waite, fairly safe to place him at the end of the fifteenth and beginning of the sixteenth centuries.⁴² It is, perhaps, worthy of note that this treatise was of such interest to Maier (whose connection with the Fraternity is almost beyond dispute) that he included it in his *Golden Tripod*; and it is at least interesting to note that another work of Valentine, *Azoth or the Secret Aureliae of the Philosophers* was published in 1613 in an edition described as 'Interpreted by M. Georgius Beatus. Vaughan quotes a long and singularly fine extract from this work, which he definitely states is by 'one of the Rosy Brothers, whose testimony is equivalent to the best of these, but his instruction far more excellent.'⁴³ It is, of course, impossible to say whether Vaughan was alluding to Beatus or Valentine when he made this remark, but the balance of probability would seem to point to the latter. In any event his silence should be borne in mind when considering the theory regarding the origin of *The Rosie Crucian Secrets* as I shall later put it forward.

I must confess that I have always found considerable difficulty in grasping the reasons put forward for suggesting that whatever its origin may be, the account given in the *Fama and Confessio* is definitely untrue. This whole hypothesis appears to rest on the alleged Lutheran and definitely anti-papal tone of these documents, coupled, perhaps, with a somewhat naive-seeming enthusiasm on the part of the authors, that might even be described as boastful or bombastic in certain places. There is, of course, the fact that we do not know of any city of Damcar in Arabia, and that the ingenuity of critical scholars has revealed what appear at first sight to be minor discrepancies in the story itself. In justice to the anonymous authors, however, it is only fair to state that these latter are very largely exaggerated, even, in certain cases, being fabricated or imagined, as a careful examination of the actual text of the *Fama* will show.⁴⁴

For this reason, while I must agree with Mr. Pryse⁴⁵ that the story of C.:R.:C.: cannot be accepted as strict history, I find his reasons, which would appear to be the seeming anachronisms in the story,⁴⁶ weak. I admit that the narrative is, like much else that passes for accepted history, lacking in evidential corroboration, as is only to be expected when one remembers that it deals with a secret Fraternity, and I am glad to observe that Mr. Pryse does not suggest that there is absolutely no historical basis for the story of the foundation of the society and the finding of the tomb, and places the date of the *Fama* as 1610, 'perhaps a year or two earlier'.⁴⁷ He even finds evidence of the existence of a group of individuals with agents as far apart as Danzig and Amsterdam, in whom 'we may recognise the germ of the Fraternitas R.:C.: "'and after mentioning Maier and Rudd, very pertinently asks why Andrew Libavius, who in 1615 violently attacked the Order, in the following year exhorted his readers to join it.

Mr. Waite himself is in favour of an earlier origin⁴⁹ for the Fraternity than 1610, seeing the beginnings of it in the *Militia Crucifera Evangelica* and the *Naometria* of Simon Studion, which was published in 1604, the year of the alleged finding of the tomb of C.:R.:C.:. The date, however, of the writing of *Naometria* is unknown, but we are given to understand that Studion was born circa 1543, graduated at Tübingen in 1565 and seems to have been present at the memorable meeting of the *Militia Crucifera Evangelica* at Lüneburg in 1586.

This theory of the origin of the Fraternity is, of course, purely speculative. It is, however, interesting to note that in *Naometria* is to be found a diagram uniting the symbolism of Rose and Cross, which makes it possible that Studion was connected with a society or group using this emblem before *Naometria* was written. That there had been such associations in England, France, Germany and Italy at least as far back as the early part of the fifteenth century and probably earlier seems beyond doubt. Indeed documentary evidence for the existence of some of them (though unnamed) is available⁵⁰ but the fact that they were, from their very nature whether the advancement of science or the liberation of religion - secret, supplies a more than cogent reason for our almost total absence of information concerning them.

I do not suppose that it will be disputed that Dr. Dee is in every way the type of individual that one would expect to have belonged to some such body. There can, of course, be no certainty on this point, but there is at least evidence that the circulation of MSS by him to various individuals under conditions of secrecy is credible seeing that we have it in his own hand that he gave to Mr Richard Cavendish 'a copy of Paracelsus, twelve lettres, written in French with my own hand, and he promised me before my wife never to disclose to any that he hath it.' That he was associated with students abroad is beyond dispute, and it is noticeable that at Bremen he was visited by Heinrich Khunrath of Hamburg, all of whose books were published after this conference with Dee.⁵¹

This suggestion cannot, of course, be stretched too far, and is, in any event, purely a speculative hypothesis - as are those of all serious writers on this subject - but a likely, list of names occurs to one in this connection, such as Dee, Christopher Heydon, Khunrath, Maier, Fludd, Dr Rudd and Thomas Rudd, Ashmole, Vaughan,⁵² Gadbury and John Heydon.

In the foregoing list the Rudds, or at least Dr Rudd, form a connecting link between one generation, as it were, and another, and would account for any MSS in circulation among the members reaching Gadbury and thus, finally, our copyist, Peter Smart. And although proof; in the historical sense, is lacking, I would suggest that more than one of these individuals was in all probability a member of the Rosicrucian Fraternity. For example Robert Fludd and Maier give every indication of writing from within. Then there is Ashmole himself; about whom there is a very strong tradition and some grounds for accepting it.⁵³ Lastly there is Vaughan, whose acquaintance with the Brethren seems to have been more intimate than he was willing to admit. These are perhaps the more obvious names, but Khunrath, the great contemporary of Maier, also comes within the range of possibility, and many have held his *Amphitheatrum Sapientie Eternae* to contain Rosicrucian emblems. Mr. Waite has stated⁵⁴ that he considers the doctrine of the ninth diagram to be 'so much in consonance with the theosophy of the Rosy Cross that it might have appeared in Fludd's vast treatise on the Macrocosm' Not merely is this the case, but in the first figure, according to Sebottendorf⁵⁵ the signs of the three vowels, I. A. O. are plainly illustrated.⁵⁶

Within such a group it is quite natural to suppose that many, if not all, of the MSS were by the members; hence *The Rosie Crucian Secrets* may well have been by Dee himself; though I do not insist upon this.⁵⁷ The alternative explanation is that a manuscript book belonging to Dee in as much as it was in his handwriting, but to the group in so far as it was not his personal possession, came into the hands of Gadbury, who added certain other relevant matter which interested him, namely the letter of Helvetius, the alchemical lexicon and the copy of Maier's *Themis Aurea*, but without being careful to name his sources, there being no particular reason why he should do so. When, therefore, this book came into the possession of Peter Smart, the latter, in making his own copy, failed to observe, or at least to comment upon, the fact that the work was a compilation and not a homogeneous whole and annotated his pages with the Dee folios.

The circulation of such MSS among the members of a secret group, presumably bound by certain obligations of secrecy, would account for the finding of various passages used without due acknowledgement by a scrupulous writer like Thomas Vaughan, seeing that acknowledgement would have been virtually impossible.⁵⁸ It would also account for the amazing impertinence which occurs in *Elharvareuna* already mentioned, where sections previously used by Vaughan are put into the mouth of Heydon himself by that blatant plagiarist; and note that this particular work was not published till 1665, the year of Vaughan's death.

That Vaughan denied, at least by implication,⁵⁹ his connection with the Fraternity of R.:C.:, must, of course, be admitted; but so did Maier and Fludd; nor is it a matter for surprise, seeing that the policy of the Order was to keep itself secret and not to disclose the names of its members. It seems, therefore, only logical to suppose that although apologists came forward to defend the Brethren and their *Fama* and *Confessio*, they should either remain anonymous or conceal their real connection, of which the latter alternative was infinitely preferable, the anonymous writer being always suspect.

To sum up my contentions, I submit that in the first place there is really no evidence worth considering for the suggestion that *The Rosie Crucian Secrets* is a late forgery by Peter Smart, who, in my opinion, figures simply as a copyist; that there is a mass of evidence in favour of the supposition that as early as Dee's time there was in existence a secret fraternity, probably with membership both in this country and abroad, to which he belonged, among whom circulated certain private MSS; that this society may even have been, and probably was, a branch of the Rosicrucian Brotherhood; that there is a very obvious and probable line of descent by which the MS we are considering could have come into the hands of Peter Smart; and finally that the attribution by him of the whole MS to Dee is a simple and understandable error.

E. J. Langford Garstin London
January 16th 1935

THE PREFACE⁶⁰

The Contemplative Order of the Rosie Cross have presented to the world Angels, Spirits, Planets and Metals, with the times in Astromancy and Geomancy to prepare and unite them telesmatically. The Water is not extracted by the hands of men, but it is made by nature a Spermatick, Viscous Composition of water, earth, air and fire, all those four natures united in one crystalline, coagulated mass.

By Mercury I understand not Quicksilver, but Saturn philosophical, which devours the Moon and keeps her always in his belly. By Gold I mean the Spermatick Green Gold⁶¹, not the adored lump which is dead and ineffectual⁶². This is the substance which at present is⁶³ our study. [It] is the child of the Sun and Moon⁶⁴, placed between two fires, and in the darkest night receives a light from the stars and retains it. The Angels or Intelligences are attracted by an horrible emptiness⁶⁵ and attend the Astrolasme for ever. He hath in him a thick fire by which he captivates the thin Genii. At first the Telesma is neither metal nor matter, neither solid nor fluid, but a substance without all form but what is universal⁶⁶. He is visible and a fume of Mercury, not crude but cocted. This fume utterly destroys the first form of Gold, introducing a second and a more noble one. He hath no certain colour, for Camelion like, he puts on all colours, and there is nothing in the world hath the same figure with him when he is purged from his accidents. He is a water coloured with fire, deep to the sight and, as it were, hollow and he hath something in him that resembles a commotion. In a vaporous heat he opens his belly and discovers an airy heaven, tinged with a milky white light; within this Coelum he hides a little Sun, a most powerful red fire sparkling like a Carbuncle, which is the red Gold of the Rosie Crucians.

That you may know the Rosie Crucian philosophy, endeavour to know God Himself, the worker of all things, and to pass into Him by a whole image of likeness (as by an essential contract and bond), whereby we may be transformed and made as God, as the Lord spake concerning Moses, saying, I have made thee the God of Pharaoh⁶⁷. This is the true Rosie Crucian philosophy of wonderful works, that they understood not, the Key whereof is Intellect⁶⁸. For by how much the higher things we understand, with so much the sublimer virtues are we endowed, and so much greater things do work and the more easily and efficaciously. But an Intellect being included in the corruptible flesh, unless it shall exceed the way of the flesh and obtain a proper nature, cannot be united to those virtues (for like to like) and is, in searching into the Rosie Crucian secrets of God and nature, altogether inefficacious. For it is no easy thing for us to ascend to the Heavens, for how shall he that hath lost himself in mortal dust and ashes find God? How shall he apprehend spiritual things that is swallowed up in flesh and blood? Can man see God and live? What fruit shall a grain of corn bear if it be not first dead; for we

must die to the world, to the flesh and [to] all [the] senses and to the whole man animal, who would⁶⁹ enter into the closest of secrets, not because the body is separated from the Soul, but because the Soul leaves the body, of which death St Paul wrote to the Collossians, Ye are not dead and your life is hid with Christ⁷⁰. And elsewhere he speaks more clearly of himself, I know a man, whether in the body or out of the body I cannot tell, God knows, caught up into the third Heaven⁷¹, etc. I say by this death, precious in the sight of God, we must die, which happens to few, and not always, for very few whom God loves and are virtuous are made so happy. And first those that are born not of flesh and blood but of God; secondly those that are dignified by the blessed assistance of Angels and Genii, the power of Nature, [the] influence of the planets and the heavens and [the] virtues of the figures and Ideas at their birth⁷².

Behold The Rosie Crucian Crowne

This Crown⁷³ is set with seven Angels, seven Planets, twelve Signs, seven Rulers, twelve Ideas and sixteen Figures⁷⁴.

Observe this harmony. The seven Angels guide the seven Planets, the seven Planets move continuously in the twelve Signs, the seven Rulers run in the twelve Ideas over the face of the Earth, and with the Elements project sixteen Figures. These have their influence upon the seven metals which you must prepare for the Diseases of mankind, as for example, if Mars cause the disease, Venus and Kedemel will cure it and you must make your Medicine of Copper.

If Saturn and Zazel cause the disease, Jupiter and Hismael in Tin prepared will lend you their influence to cure the party⁷⁵. If Saturn cause the disease the Sun and prepared Gold will cure the disease.

Now I will demonstrate in what thing, of what thing or by what thing is the Medicine or Multiplication of Metals to be made. It is even in the nature, of the nature and by the nature of metals, for it is a principle of all philosophers that Nature cannot be bettered but in his own nature⁷⁶.

Trevisan saith: Every Substance hath his own proper and principal seed of which it is made. A pear tree bringeth forth a pear and an apple tree an apple, and God said in the beginning, let everything bring forth his fruit and let the seed be multiplied in itself. And Arnoldus de Villa Nova saith: Every seed is correspondent to his seed and every shrub bringeth forth his proper fruit, according to his kind, for nothing but man is engendered of man, nor of the animals but their like; whereupon Paracelsus concludeth thus: True Alchemy, which only alone teacheth the Art to make Sol and Luna of five metals, will not admit any other receipt because⁷⁷ that which is thus (and it is truly spoken): perfect metals are made only of metals, in metals, by metals and with metals for in some metals is Luna and in other metals is Sol. If this be true that in Metals are their seed whereby they may be multiplied, how is it then that the philosophers say their Gold and Silver are not common Gold and Silver, for common Gold and Silver

are dead but their Gold and Silver liveth. To this I answer, common Gold and Silver are dead except they be revived by art, i.e., except their seeds, which are naturally included in them, be projected into their natural earth, by which means they are mortified and revived like as the grain of wheat that is dead and unapt to increase, except by art and industry of man it is in due season sown in his kindly earth and there putrefied and again revived and multiplied. For which cause Trevisan hath written that the vulgar bodies that Nature only hath perfected in the mine are dead and cannot perfect the imperfect bodies. But if we take them and reiterate perfection upon them seven, ten or twelve times⁷⁸, then will they tinge infinitely, for then are they entering, tincting and more than perfect and quick in regard of that which they were before.

Paracelsus likewise affirmeth metallic spirits are dead and lie still so that they cannot work, unless by art they are revived, which thing Arnoldus verifies. Gold and Silver, therefore, simple and absolute in their bodily and metallic form, are dead, but by art they are revived and made Gold and Silver of the Philosophers. And they are revived and brought to yield their seed by reducing them into their first matter, which is called *prima materia metallorum*⁷⁹, for it is impossible for the species or forms of metals to be transmuted but by reducing them into their first matter.

Now the first matter of metals is Argent vive, i.e., Quicksilver⁸⁰, as all philosophers verify. For the first matter of anything is the self same thing into which it is resolved as snow and ice are resolved into water, which is the proper and first matter, and so metals are dissolved into Argent vive. Therefore Argent vive or Mercury is the first matter of metals⁸¹. Therefore metals of necessity must be reduced into Mercury and not into cloud water as the philosophers affirm, but into a viscous water⁸² which is the first matter of metals, for it is the opinion of Paracelsus, Arnoldus and Trevisan that labour is lost which is spent in the Separation of the Elements, for nature will be severed by human distinction, but hath her own separation in itself. Therefore metals should not be reduced into cloud water but into a viscous water.

Albertus Magnus saith the first matter of metals is Argent vive, which is a viscous, incombustible moisture commixed in a strong and wonderful mixture with a subtile earthliness in the mineral caves of the earth, which continually moveth and floweth because successively one part hath rule over another. As the cause of flowing and moving is by moisture bearing the chief rule, so⁸³ terrestrial dryness bearing chief rule over the action of moisture is the cause it will not stick to that which it toucheth nor moisten [it].

Trevisan saith that is the nearest matter of metals whose viscous moisture is mixed with his subtile earthliness.

And Geber saith, we could never yet find anything permanent in the fire but this viscous matter or moisture which is the self same note⁸⁴ of all metals, and all the other moistures⁸⁵ do easily fly from the fire by evaporation and separation of one

element from another, as water by fire, one part going into smoke, another into water, another into earth remaining in the bottom of the vessel; but the viscous moistness that is to say Mercury, is never consumed in it nor separated from his earth nor from any other his element; for either they remain altogether or vanish altogether, so that no part of the weight may perish.

Geber thus describeth the nature of Quicksilver⁸⁶: Argent vive, which the Alchemists call Mercury, is nothing else but a viscous water in the bowels of the earth, of a moist and subtile substance of white earth united altogether by a moist, temperate heat by the least parts, until the moist be tempered by the dry and the dry by the moist, so that being thus both equally united and mixed, neither of them may be separated nor taken from one another by the fire. And in this Argent vive, the mother of all metals, is only the whole perfection, for it hath in its composition sulphury parts dry, the which tinge and colour⁸⁷ [the] whiteness in act and redness in power, and therefore this is the true Sulphur which perfecteth, formeth, coagulateth, coloureth and fixeth by his action. But this incombustible, hidden and unknown Sulphur which is in power in Argent vive, cannot bring itself forth into act but by due decoction, wherefore you may now perceive that neither nature in the veins of the earth nor we above ground, have any⁸⁸ other matter to work upon but only pure Mercurial Form⁸⁹ wherein Sulphur is enclosed, that is to say fire and air, which indeed is the internal and essential part of the Mercury itself; but it doth not dominate therein but by the means of heat, the which is caused by the reflexion of the fiery sphere which encloseth the air, and also by⁹⁰ the continual and equal motion of the heavenly bodies, which do stir so lent an heat as that it can hardly be perceived or imagined. And thus by most perfect decoction, and also by continual proportional digestion in long success of time is introduced in art and made manifest in the end of the operation of Nature that aforesaid unknown and incombustible Sulphur, which is the true form and ferment of Gold. And thus mayest thou see that metalline form[s] take their original only of pure mercurial substance, the which is the mother of all metals and coupleth and is united with her male, that is with the said Sulphur, the father of metals, the which causeth the diversity of metals according to the different degrees of decoction and alteration caused in Mercury by his own natural heat of inward Sulphur.

The philosophers do agree that there are⁹¹ in the nature and original of metals two sperms or seeds, the one masculine and agent, which they call Sulphur, the other feminine and patient, which they name Mercury; and these two have the natural conjunction and operation one with another in the womb of the earth, whereby they engender metals of diverse form and quality according to the difference and diversity of their degree of digestion and concoction.

Now I will briefly discover the difference between Sulphur and Mercury, and the beginning and natural generation of them, and then show how they have their natural operation, the one with the other, in the bowels of the earth to be made metals perfect and imperfect.

Sulphur is double in every metal save only in Gold, that is to say external, burning and internal, not burning, which [latter] is of the substantial composition of Argent vive. The Mercury or Quicksilver spoken of is engendered or compounded in the bowels of the earth of clear, viscous water by a most temperate heat, united by the least parts, indissoluble, with an earthly substance, incombustible Sulphur, white, most subtile in art, without the which the substance of Argent vive cannot subsist, which coloureth it naturally with a white colour, but in our magistery it maketh it white and red as we will by governing the nature of it; wherefore Argent vive is the total material cause and total substance of the Philosophers' Medicine, containing in itself that internal Sulphur, being a simple fire, lively, quickening, the which indeed is the true masculine agent that before we spake of, the which, by perfect and due digestion and proportional decoction, congluteth, coloureth, formeth and fixeth his own Argent vive into Gold according to nature and to art in the philosophical medicine. But when that Argent vive is by nature thus fixed and made perfect by most high digestion into Gold only by his own proper and inward Sulphur, which is the true ferment, then the external, combustible Sulphurs cannot enter in nor be mixed with him, but they are⁹² parted clear away as the corruptible from the permanent; wherefore they enter⁹³ not into Gold and therefore cannot be the matter or form, or any part of the matter or form of the Philosophers' Medicine. And thus you may understand the difference between the true Sulphur and Mercury, for when it appeareth simple it is flowing and is called Mercury, and is volatile, carrying or holding his proper incombustible Sulphur or ferment hidden in power. But when in the end of the aforesaid decoction that hidden Sulphur is brought wholly into act, whereby the whole is manifest and doth show the nature of Sulphur, then it is called Sulphur, which doth coagulate, reduce and fix his Argent vive to his proper nature, which is to be made Gold. Wherefore this is the only tincting Sulphur of the philosophers, the which is unknown to the common people. But the compound of them is called the Mixed Medicine, perfect and sound, and in the commixtion they are made all one as wax, and so in truth you may now see that these two spermatick matters are of one root, substance and essence, that is to say of the only essence of pure Argent vive. But the diversity of the sundry shapes, forms and bodies of metals, the which is the cause of the perfection or imperfection of them, is according to the diverse and several degrees of alteration caused by their decoction and digestion. For the Mercury, [which] is Argent vive running in the veins of the earth, conjoineth and is mixed with the aforesaid external Sulphur, and being so mingled and conjoined together by the sundry and different degrees of the decoctions of the internal Sulphur caused by the motions of the heavenly bodies, there is engendered the sundry shapes and forms and bodies of the metals in the entrails of the earth⁹⁴. For first in the first degree of natural operation and digestion, the heat of the internal Sulphur working and somewhat prevailing in the humidity of his Mercury, beginneth somewhat to fix and coagulate the mercurial humour and giveth it the form of Lead. And by further digestion and decoction, the Sulphur yet somewhat more prevailing over his Mercury, the Mercury is somewhat more fixed and receiveth the form of Tin.

Then doth the heat dominate more and maketh Copper and then Iron, and further proceeding in their digestion, the internal Sulphur yet more subduing the moist[ure] and cold of his Mercury by a temperate heat, and attaining by his concoction purity and perfection of whiteness, it more firmly fixeth his body and giveth it the form and fixation and tincture of Silver. And now the essence that was in power is brought forth into act, whereby the external, earthly Sulphur, which gave a transitory form to the undigested metals, is almost utterly expoliated and separated by reason of his perfect form introduced by the means of our digestion and proportional decoction.

And yet in the Silver there are some small parts of the external Sulphur, the which are by the last and most temperate, complete digestion of nature wholly and thoroughly expoliated. And then by nature is accomplished the most perfect, simple and pure substantial form of Gold, which Gold in the perfection of his metalline nature is pure fire, digested by the said Sulphur existing in Mercury, whereby his Mercury, that is to say his whole substance, is converted into the nature of his pure Sulphur and made permanent and triumphant in the force and violence of the fire. And by separation of the external Sulphur, the metals are made perfect according to the⁹⁵ divers degrees of their decoction, digestion and alteration, wherein they separate themselves from the earthly and combustible Sulphur and attain their true, complete, pure form and fixation.

But whereas the philosophers do seem to set down by degrees first Saturn, then Jupiter, then Luna, then Venus, then Mars and then Sol, they had a further meaning therein which is not to be understood according to the letter; for indeed Venus and Mars are placed after Luna, not that it should be believed that Luna doth turn or go into an imperfect body as Venus and Mars, but in truth they are placed after Luna for two causes, first because of the over great and excessive burning of the filthy and fixed, earthly, external Sulphur, which is joined with their Mercury and is outwardly by too much intemperate and an overgreat, superfluous, drying, combustible heat, coagulated and decocted with the Argent vive to a corruptible body, while the other cause is philosophically to be understood in the order and degrees of the colours⁹⁶ in the working of the Philosophers' Medicine, which is a similitude and analogy, and this over great quantity of burning, gross, earthly, external Sulphur is the cause of the hard melting of Mars. But so soon as nature by a temperate, complete digestion hath introduced into act the internal, pure Sulphur, then are separated all those external Sulphurs from the Mercury and a perfect form is introduced. [An] example [of this is to be seen] in the projection of the Philosophers' Medicine, which, being cast upon imperfect metals molten, doth only by virtue of the most pure, temperate, high and mighty digestion fix and give a true, natural form to the Mercury of the bodies, whereby is expoliated away all external Sulphur and they are perfected into fine Gold. And you must also know that nature doth not always [proceed by means] of these degrees in passing through the dispositions and paths⁹⁷ of the metals, or any one of them, but doth oftentimes engender perfect Sol as the aforesaid beginning by a most temperate and due decoction in the

bowels of the earth. The reason hereof, the knowledge of the countries and mines will make manifest unto you⁹⁸.

And thus have I made plain the very operation and work of nature in the earth, as all the philosophers deciphered it. And this operation of nature are we to imitate and follow as near as possible in our art, according to the earnest precepts and prescriptions of all the philosophers in this behalf.

Now I shall show how and in what manner our art must imitate the operation of nature; but first I will resolve, wherefore do the philosophers call Mercury or Quicksilver the First Matter of Metals, when there is another matter or sperm, as we have declared, which must be joined with it before metals can be engendered.

The philosophers do truly call Mercury the First Matter of Metals, being so indeed, for the Sulphur which is the masculine sperm, is of her, and she is the root of him and his coagulation, as Hermes said. And also the same man saith, this water coagulateth when it is congealed and running water is the mother of that which is congealed and coagulated and so it was ever. For which cause the philosophers call the feminine sperm the patient, or matter which suffereth the action of her agent, and taketh the impression of his forms in her substance; and therefore the philosophers said truly that Sulphur giveth the form and beginning of being more than matter, when as that it is his act and matter power and form; for according to the truth of forms, they are named the substance of things, but matter may after another sort be called more the substance in as much as it is the beginning to everything, and from it are extracted all forms.

If, therefore, any man would like to know the form of Gold, he must of necessity know the matter of Gold, the which is Argent vive. It springeth flowing, liquid, flying, bright and suffereth coagulation, and is, therefore, truly called the First Matter of Metals, because all metals have their first matter or substance from her, their mother, the forms of the metals being affected by the moving of the active elements, fiery and airy, of Mercury, that is to say, Sulphur⁹⁹, the which moveth Argent vive, as this proper matter for generation into metals, according to the degrees of his motions.

Now we proceed to apply the operation of an art to the operation of nature, and show what is the first work of art.

Learn to know what is the first work of art by the first work of nature, always provided that it be that first work of nature that art is able to perform. But because the first work of nature was to make the two sperms of nature, which art cannot do, therefore the second work of nature, which is the conjunction of the two sperms in one, must of necessity be the first work of art, and the creation or making of the two sperms must be the only referred to nature, who hath provided and prepared to art the matter that art is to work upon. According to the saying of

the philosopher, art of itself cannot create the sperms, but when nature hath created them, then doth art, joined with that natural heat which is in the sperms already created, mix them as the instrument of nature, for it is plain that art doth add neither form, nor matter, nor virtue, but only aiding the thing existing, to bring it to perfection. And again, nature hath created a matter unto art, unto which art neither addeth anything nor taketh anything away, but removeth such things as are superfluous; likewise nature hath provided for us one Stone and one matter and one medicine, unto the which we, by our art, add no foreign thing, nor in any point diminish it, but in removing that which is superfluous in the preparation¹⁰⁰, and this is done in the purification which is effected by solution. By these words it plainly appeareth that nature hath prepared the matter wherein art is to work, and art by no means can make the same matter; but the only work of art is to cleanse and purify that which nature hath left impure, and make that perfect which nature hath left imperfect, as is verified by this last saying of Arnoldus, and that first of Trevisan.

Now, therefore, it follows that the first work of Art, wherein art doth imitate nature, must of necessity be that which is the second work of nature, (*viz.*) as the second work of nature after she had created the sperm was to join these two sperms of nature together, whereby to make the First Matter of Metals, so the first work of art must be to conjoin the sperm of metals together, whereby we must make the First Matter of one pure Medicine, that may bring the impure and imperfect metals into the purity and perfection of nature. And this can no otherwise be done but by reduction of them into their First Matter as is before said, by which means we may have (as Arnoldus saith) the same sperms of the metals above earth that nature did work in under the earth. And this reduction is nothing else but the dissolution in which they are dissolved into the natural Mercury and Sulphur again, but more pure than they were before by reason that they are in their dissolution separated and purified from the fex and impurity of their nature and make more pure and perfect whereby to engender a more pure and perfect matter than nature could do; and for this cause hath the philosopher written this conference in the lamentation of nature between nature and art, 'Without me, which do yield the matter, thou shalt never effect anything, and without thee also, which dost minister unto me, I cannot alone finish this work.'

It is the chiefest and highest secret of the philosophers to know out of which of the metals must we have these sperms. I ought not to disclose the same in plain terms, but in dark speeches and figures as they have done. Notwithstanding, mark that which shall follow and I will discover to thee the secrets of the philosophers in hope that thou wilt hide them in thy heart and commit the papers to the fire. Now first and chiefly thou must call to remembrance the words of the philosophers before named, who say that in some metals is Sol and in some metals Luna. That is to say, in some metals is the masculine sperm and in some is the feminine sperm. In some of the metals is the tincture of Gold and in some of the metals is the tincture of Silver. Some of them are masculine and some are feminine. For that these words are true in their expositions, the words of Hermes

do very well prove, who said Red Sol is his father and White Luna his mother¹⁰¹. If, therefore, Sol be the father and Luna the mother, and in some of the metals be Sol and in some Luna, what is this but to say that some of the metals are masculine and some of them feminine, or in some of them is the masculine sperm and in some of them is the feminine sperm. Now, therefore, consider which of them are the masculine bodies, and out of which the masculine sperms are to be had, and then we shall more perfectly discern the feminine bodies whence the feminine sperms are to be fetched.

Note that the philosophers do diversly name these two sperms. The masculine they call agent, the Sulphur or rennet, the body or ferment, the poison or flower of Gold, the tincture or inward fire and the form. The feminine sperm they call the patient, Mercury, the Spirit volatile, Argent vive, *menstruum*, water, azoth and the matter and by many other names they name them both. But this *caveat* in the discerning of them I give thee for three causes especially. The one is because thou shouldest in reading of the philosophers not mistake any one of them for the other; the second cause, that thou shouldest by these names know which of the metals are masculine by the quality of their names; and the third cause is that thou shouldest thereby gather and understand that the two sperms, being of two several natures and qualities, can by no means be fetched from one body, as divers have misconstrued, no more than both the sperms of man and woman are in man alone. But they are to be had of two substances of one root, as Trevisan, Arnoldus and the rest of the philosophers affirm.

But I will give thee this secret note, that the two sperms must be had out of two several bodies, yea two bodies in one only root, which is the same Hermaphrodite of the philosophers, which they often write of¹⁰², or their Adam¹⁰³, as in due place shall be disclosed; but in all the reading of the philosophers keep well this *caveat* in thy mind, of the several names and natures of the two sperms.

But now I shall proceed to prove by the philosophers which are the masculine bodies, and how a question shall arise whether is that which giveth the form or tincture the masculine sperm or the feminine. You need not to doubt that among the metals Sol and Luna are both agents and masculine sperms¹⁰⁴, for they both give form and tincture severally, the one to the white work, the other to the red work, according to the sayings of the philosophers.

For Arnoldus in his *Rosary* saith Gold is more precious than all other metals and is the tincture of redness tincting and transforming every body, but Silver is the tincture of whiteness, tincting all other bodies with a perfect whiteness; and therefore he which knoweth to tinct Argent vive with Sol and Luna cometh into the secret. Likewise in another place he saith thus. The first work is to sublime Mercury and to dissolve it, that it may return into the First Matter. Then let the clean bodies be put into this clean Mercury, but mix not the white body with the red, nor the red with the white, but dissolve every one severally apart, because the white water is to whiten and the red water is to make red, therefore mix not

the water of the one medicine with the water of the other, because thou shalt greatly err and be blinded if thou do otherwise. By those two sentences of Arnoldus it appeareth not only that Sol and Luna are agents, the one giving form to the red work, the other to the white, but also there is another body that is to be dissolved into Mercury, which is the patient of these two, for as much as those two are to be put into the same; yet it is not the patient to them both together, but each of them severally and assunder, which proveth them plainly to be both masculine and agent, and none of them patient to any other, nor by any means to be mixed one with another, but a third thing to be patient to them both, that is to say the same Mercury or Argent vive that they before spake of where they said that he which knoweth how to tinct Argent vive with Sol and Luna cometh to a secret¹⁰⁵. Likewise the noble Trevisanus saith, Our medicine is made of two things, being of one essence, to wit of the union mercurially of fixed and not fixed, spiritual and corporeal, cold and moist, hot and dry, and of no other thing can [it] be made. By those words it is manifest that the two Mercuries whereof our medicine is to be made are both of one root but of contrary qualities; that is to say, the one is Mercury fixed, the other not fixed; the one a corporeal, the other a spiritual; the one hot and dry, the other cold and moist; which several Mercuries are contrary, and contrary matters cannot be included in Sol and Luna. For they, as Agents, are only hot and dry, corporeal and fixed, but they are not, as patients, cold and moist, volatile or spiritual¹⁰⁶ and unfixed, and therefore in them may be the masculine sperm, but in no wise the feminine; and therefore, saith *Turba [Philoso]phorum*, a tincture proceeding from the fountain of Sol and Luna giveth perfection to imperfect metals, upon which considerations they have also set down this most excellent canon and principle, (*viz.*) the secret of all secrets is to know that Mercury is the matter and *menstruum*, and the matter of perfect bodies is the form. What is this but as who should say, seeing the Mercury drawn from the perfect bodies is the form or agent sperm of our medicine, then Mercury of an imperfect body must needs be the matter or feminine sperm¹⁰⁷; to the confirmation whereof Paracelsus saith thus: Philosophical Mercury that is of Sol, is in the conjunction compared unto the corporeal spirit of Mercury, as is the husband to his wife whereas they are both one, and the self same root and original, although the body of Sol remains fixed in the fire but the metallic woman unfixed. Notwithstanding *that*, compared to *this*, is no otherwise than the seeds to the field or earth.

By these words of Paracelsus it is evident that the difference between the metallic man and the metallic woman is that the metallic man is fixed and the metallic woman unfixed; by which means it is plain that this metallic woman cannot be Silver or the Spirit of Silver, as some do fondly surmise, and as the most do take it, but of some imperfect body that is unfixed. For who is so simple but knoweth that Luna is fixed and permanent in the fire and inseparably united with his pure white Sulphur.

Then it is proved the two perfect bodies are the agents, giving the forms and tinctures, and so, consequently to be the masculine sperm¹⁰⁸ and no less proving

that the feminine sperm is to be had from an unfixed body, of which nature neither of them is, and therefore we must yield to the apparent reasons and authority of the philosophers.

I shall now expound by some of the philosophers the saying of Hermes that his father is Sol and Luna his mother.

These words of Hermes, though they be so full of truth and have no deceit in them, yet a great number have been deceived thereby. The cause of their error is because they do not consider the nature of Luna, which they take to be meant of Hermes to be the mother of our matter. For if they did either consider the masculine property of Silver or perused the philosophers touching their construction of this point, they should well perceive that Luna is not the Silver¹⁰⁹ that Hermes meaneth, but a certain unfixed matter or Mercury, of the nature and quality of the Celestial Luna¹¹⁰, as in the *Canons of the Philosophers* appeareth, and in the *Turba [Philoso]phorum* by these words: It is a thing worthy to be noted that Luna or Silver is not the mother of common Silver, but it is a certain Mercury endued with the nature and quality of the Celestial Moon, which is the same Mercury or woman before spoken of, that is not fixed as Silver is, but is the nature of the Celestial Moon in respect of her moist, unmixed¹¹¹ and watery quality, having her fixation, form and tincture of her Sulphur as the Celestial Moon taketh light of the Sun. Therefore out of doubt it must be drawn from a body of the same nature, and not from a body of a contrary quality; for what can be more absurd than to think that an unfixed matter can be in a fixed metal or a fixed nature in an unfixed body. Consequently what can be more evident and manifest, seeing the philosophers do all affirm that the metallic man is fixed and the metallic woman unfixed, than that the fixed sperm must be had of a fixed metal and the unfixed and volatile nature out of an unfixed substance, and, therefore, by no means had from Luna, because of her fixed and masculine nature, which all the philosophers in plain terms confirm to be true, as in their *Canons*, by a question demanded and answered in this manner. The question amongst wise men is, whether the Mercury of Luna joined with the Mercury of Sol may be had instead of the philosophical *menstruum*. The[y] answer, Mercury of Luna doth hold the nature of the male or masculine, but two males cannot engender no more than two females. Likewise in another place thus, the Sulphurs Sol and Luna are the two sperms or masculine seeds of the Medicine. And in the *Turb[a]* thus, metallic Lunes are of a masculine nature. Thus I have proved that the two perfect metals are the two masculine bodies, from which we are to fetch our two masculine sperms or forms or tinctures, i.e., both of the red and white, which, seeing they are fixed and perfect bodies, the form and tincture and agents of our matter, they have sufficient reason of themselves to persuade that they can be no other than the masculine sperms, except we will, contrary to all rule of reason and nature, have one thing both the agent and the patient.

Now I will demonstrate which are the feminine bodies, and out of which the feminine sperms of our matter is to be fetched.

This secret of both these secrets is the greatest and requireth of itself to be kept as secretly in the hearts of all wise men hereafter as it hath been of all ancient philosophers heretofore.

Understand the secret by this figure 3, which number indeed it doth contain in itself, and is the very figure of the Trinity of the Deity.

First I will show the reasons as the marks and tokens whereby thou shalt understand and know that this 3 is the same feminine body where is the feminine sperm of our blessed matter, which I will prove by the authority of the philosophers in this manner. First the philosophers do all agree that the metallic man in our matter is fixed and the metallic woman unfixed. If, therefore, I prove our matter 3 to be unfixed, it is a great argument and probability that our 3 is the same woman.

The second mark and token whereby she is known is that the philosophers agree that their Mercury or water which reduceth their Gold or Sulphur into his First Matter is the same that abideth and is permanent with it as Trevisanus declareth¹¹². There is required in our natural solution the permanency of both, viz., of the water dissolving and of the dissolved body; and in another place, no water dissolveth the metallic essence with a natural reduction but that water which is abiding therein in matter and form, which water also, the metals themselves being dissolved, are able to congeal. And Arnoldus saith, the nature of the dissolved body and the dissolving water is all one, but only that the nature of the body is complete, digested and fixed, but the nature of the water is incomplete, undigested and volatile until it be fixed by the body. And in Paracelsus our woman dissolveth her man and the man fixeth the woman. By these words it is plain that the water which dissolveth the body is the same that is permanent with them¹¹³, that is to say, the woman or feminine sperm that is to be joined with the man or masculine.

Paracelsus saith plainly, speaking in the person of the figure 3, my spirit is the water, dissolving the congealed bodies of my brethren and Raymund Lullius saith in his *Epistle to the King*, Our water, you know, is extracted from a certain stinking *menstruum*, which is compounded of four things, and is stronger than all the water of the world, and it is mortal, whose spirit multiplieth the tincture of the ferment. And in another place he saith, all alchemical Gold is made of corrosives and of an incorruptible quintessence, which is fixed with ferment, but such quintessence is a certain spirit reviving and mortifying the mineral medicine. And *Turba [Philoso] phorum* saith, take the black spirit and with it dissolve bodies and divide them. Now consider the nature of our figure 3, and judge if this be that water or no. It must needs be the same, for the words fit the nature of our figure 3 and no other of the imperfect bodies but her, for all the philosophers agree that she is earthly, dark, cold and stinking, and Paracelsus nameth her plainly, the water dissolving her brethren.

Consider yet another note or mark whereby she is known, as the ancient and modern philosophers do affirm that their Gold must be sown in his own proper earth, as also in the *Turb[a]*, let our Gold be sown in his own proper earth.

Arnoldus in his *New Light* saith, with my own hands, my eyes being witnesses I have made the Elixir that converted Saturn into Sol, which matter truly I have now named, and it is the philosophers Magnesia, out of which they found¹¹⁴ quicksilver of quicksilver and Sulphur of Sulphur. To construe these words rightly, what is our figure 3 but Mercury of Mercury, and what is our Gold but Sulphur of Sulphur. I will yet impart a greater secret.

It is written by good philosophers and found true infallibly by daily experience, that the figure 3 is never found simple or pure by himself in the mine, but is ever mixed with Gold or Silver, whose grains or seeds in him are plainly to be seen to the eyes; by which means it appeareth that there is no mine of himself, but he is the mine of them and so their very natural earth.

Consider these words following from Flammellus¹¹⁵, and thou shalt yet hear a greater secret than these. Mercury being never so little congealed in the veins of the earth, there is straightways fixed in it the grain of Gold which, of the two sperms, do bring forth true springs and branch of Mercury as we may see in the caves of Saturn, wherein there is no mine in any of which the true grain of the fixed may not be contained manifestly, that is the grain of Gold or Silver. For the first congelation of Mercury is the mine of Saturn in which it is put by nature. This may truly be multiplied into his perfections without fail or error, being, notwithstanding, in his Mercury not separated from his mine. For the metal consisting in his mine is Mercury, from which if the grain be separated it will be an unripe apple plucked from his tree, which is altogether destroyed. The fixed grain is the apple and Mercury is the tree; therefore the fruit is not to be separated from the tree, because it cannot elsewhere receive nourishment then from his Mercury. It is as great a folly to put Gold or Silver into Mercury as to fasten an apple again to the tree from whence it was taken. Therefore, that this business might be duly accomplished, the tree together with his fruit must be taken, that again it might be planted, without taking away the fruit, into a more fertile and new soil, which will give more nourishment in one day than the first field would have yielded in an hundred years, for the continual agitation of the winds. Go up, therefore, into the Mountain that thou mayest see the vegetable, Saturnian, royal and mineral herb¹¹⁶, for let the juice be taken pure, the feces being cast away, for thereof thou mayest effect the greatest part of thy work. This is the true Mercury of the Philosophers.

Trevisan confirms the matter thus. Our work is made of one root and two substances Mercurial, taken crude, drawn out of the mine clean and pure, conjoined by fire of amity as the matter requireth it, cocted continually until that of two be made one; and in this one, when the two are mixed, the body is made

spirit and the spirit is made body. Paracelsus likewise speaking plainly in the name of our figure 3 saith: It would be profitable to the lesser world¹¹⁷ if he did know or at least believe what lay hid within me, and what I could effect, for he that doth discourse upon the art of Alchemy would more profitably understand that which I can do if he would use that only which is in me, and that which by me may be done. And in another place, under an enigma, he notably discovereth this our blessed matter where he saith: Whatsoever staineth into a white colour hath the nature of life and the power and property of light, which causally¹¹⁸ effecteth life; and contrariwise, whatsoever staineth into blackness or maketh black hath the nature common with death and the property of darkness and the strong power of death. The coagulation and fixation of such manner of corruption is the earth with her coldness. The house is always dead, but the inhabitant of the same liveth, and if thou canst find forth the example thereof thou hast prevailed.

By these words it appeareth that as the tincture of whiteness is the cause of life, which is the spirit of generation, so the blackness, which is the spirit of corruption, is death; and these two tinctures are in our blessed herb. The natural blackness whereof, that is to say our figure 3, is the spirit of the corruption or mortification, which is the same earth which he here noteth with his coldness. The same dead house within the artificial digestion is the death and mortification and putrefaction of the matter, and our Silver and Gold, which is naturally included in the same, is the tincture in his first artificial operation according to the philosophers, who say there is no Gold, but first was Silver before it was Gold. This tincture of whiteness is the same inhabitant which liveth in the same dead house, according to the saying before, the house is dead but they live which inhabit it; by which means it is plain that this is the same example which he speaketh of when he saith, the example whereof, if thou be able to find out, thou hast thy purpose.

Arnoldus noteth in his *Rosary*. This we see, that in the calculation of our figure 3, that first [it] is converted into black powder, next into white, then into a more yellow or red, which words very well discover his enigma written of this matter. Elsewhere he saith thus. The thing that hath both a red head, white foot and black eyes is the *materia*. Likewise it appeareth by the enigma of Hermes¹¹⁹, The falcon is always on top of the mountain crying I am the white of the black and the red of the citron. Now I will show how there is in our figure 3 that [which] I before spake of; the other thing [is] to show how it is the Hermaphrodite or Adam of the philosophers¹²⁰.

In our mineral herb is the number of 3 thus. First therein is our figure 3. Secondly there is our Sulphur, i.e., our Gold or Silver which is naturally mixed with him. Thirdly there is the root of these two, that is to say Mercury or Quicksilver, whereof they were engendered, and whereunto they must be reduced, in respect of which trinity in unity it representeth the Figure of the Deity. Now of our Hermaphrodite or Adam therein. What else is our mineral herb¹²¹ but one root of two substances, wherein is both our man or woman, that is to say our Gold is our

Man, or sperm masculine, or Silver according to his natural mine, which is also the Sulphur, the tincture, the ferment and form before spoken of, having the perfect and fixed nature of the man, and the two agent elements of fire and air in them, and our woman is our figure 3, i.e., which is the feminine sperm, the patient, the *aqua* the *menstruum*, the matter, the Spirit volatile and the undigested¹²² or unfixed body, having in her the two patient elements of water and earth.

Thus you see that Sol and Luna are the masculine sperms in our matter or figure 3, which is also the natural woman, water and earth of them both, where by nature they are planted and spring. That is to say the matter of our red work is our figure 3 joined with Sol and the matter of our white work is our figure 3 joined with Luna¹²³, which matters are first to be had for more surety and security of art even in nature itself called *fex plumbi* or *Quehaeli Hispanica*. And thus dost thou see in our blessed matter, 4. 3. 2. and 1., yea and one only thing according to the words of all philosophers, [and] that you may not in the least doubt of the truth hereof, I have truly laid it open. The root of the operation of art in the matter shall hereafter be at large declared.

Commending, for this great and gracious mystery and secret of nature, to the Godhead all eternal glory, to Whom it is due.

The Lord illuminate my heart with His light and truth so long as my spirit remains in me, for His light is very delightful and good for the eye of my soul to see by; for so shall the night be enlightened to me as the day, neither shall the clouds shadow it. It shall not be like the light of the Sun by day because it shall not be clouded, nor like the light of the Moon by night, because it shall never be diminished as her light is.

The sun was made to rule the day and not to give light to it only, as appears *Gen. i*. And the Moon was made to rule the night and not to give light to it only, because she hath no light to give. Also God made the whole Host of Heaven, the fixed stars and planets, and gave them virtues together with the luminaries, but these virtues are not so great as the virtues of the luminaries, neither is the virtue of the Moon so great as the virtue of the Sun, because she borrows her light from the Sun. Also the whole Host of Heaven, that is the fixed stars, move all in the same sphere, and therefore their distance is always the same, but it is not so with the planets, for their course is various and so is their distance the one from the other, and so is their latitude. For some times they are upon the ecliptic, sometimes North from it and sometimes South, sometimes retrograde, sometimes direct, sometimes in conjunction with one another, sometimes in opposition, sometimes in other aspects. The reason of this is because the sphere of one is lower than the sphere of the other and the lower the sphere is, the sooner they make their revolution.

The nearest to the earth of all the planets is the Moon, and therefore her course is swiftest; and besides her difference in longitude or latitude there happen other accidents to her, which are not visible to other planets; for sometimes she increaseth and sometimes decreaseth, and sometimes she is invisible or faileth in light. The reason why the planets are not seen horned as the Moon is because their distance is greater from us. All the planets are seen biggest when they are at their greatest distance from the Sun, or when they are nearest to the earth according to Copernicus. Also sometimes the Moon is eclipsed, but not in the same manner as the Sun, for the Sun never loseth his light but is only shadowed from a particular people or place by the body of the Moon, but the Moon, eclipsed totally, loseth her light and the reason is the Sun's light is his own, but the Moon['s] is a borrowed light. This being premised, I consider all things under the Moon universally, whether men, beasts or planets, are changed and never remain in the same state, neither are their thoughts and their deeds the same. Take council of your head and it will certify you of the truth hereof; and they are varied according to the various course and disposition of the planets. Look upon your own genesis and you shall find your thoughts moved to choler so often as the Moon transits the place where the body or aspect of Mars was in your genesis; and to melancholy when she doth the like to Saturn. The reason is because the Moon is assimilated to the body of man, whose virtue as well as her light increaseth and diminisheth, for she brings down the virtue of the planets to the creatures and to man if he lives upon earth.

The Sun causeth heat and cold, day and night, winter and summer. When he arrives to the house of his honour or exaltation, to wit Aries, then the trees spring, living creatures are comforted, the birds sing, the whole of creation rejoiceth and sicknesses in the body show themselves in their colours. Also when he arrives at his Fall, to wit Libra, the leaves of the trees fall, all creatures are lumpish and mourn like the trees in October. Another notable Rosie Crucian experiment. Usually sick people are something eased from midnight to noon, because the Sun is in the ascending part of the heaven, but they are most troubled when the sun descends, that is from noon to midnight. The course of the Moon is to be observed in many operations both in the sea and the rivers, vegetables, minerals, shellfish, as also in the bones and marrow of men and of all creatures. Also seed sown in the wane of the Moon grows either not at all or to no purpose. The Rosie Crucians have experiences of many virtues of the stars, and have left them to posterity, and have found the changes and terminations of diseases by the course of the Moon. Wherefore the 7th, 14th, 20th or 21st, 27th, 28th or 29th days of the sickness are called critical days, which cannot be known but by the course of the Moon. But rest not in the number of days, because the Moon is sometimes swifter, sometimes slower. As for such diseases as do not terminate in a month (I mean a lunar month, the time when the Moon moveth round the zodiac, which is in 27 days, some odd hours and minutes), you must judge of these by the course of the Sun.

The day is called critical because the Moon comes to the quartile of the place she was in at the decumbiture, sometimes a day sooner or later.

When she comes to opposition of the place she was in at the day of the decumbiture, she makes a second crisis; the third when she comes to the second quartile, and the fourth when she comes to the place she was in at the decumbiture, and then is the danger.

The reason of the difference of the Moon's motion is the difference of her distance from the earth, for when the centre of her circle is nearest to the centre of the earth, she is swift in motion; and hence it comes to pass that sometimes she moves more than 15 degrees in 24 hours, sometimes less than 12. Therefore if she be swift in motion she comes to her own quartile in six days, if slow, not in seven; therefore must you judge according to the motion of the Moon, and not according to the number of days.

Upon a critical day, if the Moon be well aspected with good planets, it goes well with the sick; if by ill planets it goes ill. You must be resolved in one particular which is, if the crisis depended upon the motion of the Moon and her aspect to the planets, what is the reason if two men be taken sick at one and the same time, that yet the crisis of the one falls out well and not so in the other. I answer, the virtue working is changed according to the diversity of the virtue receiving¹²⁴. For you all know the Sun makes the clay hard and the wax soft; it makes the cloth white and the face black; so then if one be a child whose nature is hot and moist, the other a young man and the third an old man, the crisis works diversely in them all because their ages are different. Secondly the time of year carries a great stroke in this business. If it be in the spring time, diseases are most obnoxious to a child because his nature is hot and moist; a disease works most violently with a choleric man in summer; with a phlegmatic man by reason of age or complexion in winter.

If the Moon be strong when she comes to the quartile or opposition of the place she was in at the decumbiture, viz. in her house of exaltation, the sick recovers if she be aspected to no planet.

Judge the like of the Sun in chronical diseases, but judge the contrary if either of them be in detriment or fall. If the Moon be void of course at the beginning of a disease, the sign is neither good nor bad. Look then to the sign ascending at the beginning of a disease and let the Moon alone for a time.

Observe the following directions how to prepare all the seven metals. If Mars cause the disease, Venus helps more than Jupiter, that is a medicine of Venus cures. If Saturn, then Jupiter more than Venus, i.e., prepared Jupiter cures.

Whatsoever is said of the Moon in acute diseases will hold as true of the Sun in chronical diseases.

What diseases every planet signifies and the disease that are under the twelve signs, with the parts of the body every planet rules, the cure of those diseases by Rosie Crucian physic, by the seven metallic preparations, shall in his proper place be handled at large.

To unlock this grand Rosie Crucian mystery of the ASTROBOLISMES of metals, the miraculous saphiric medicines of the Sun and Moon, the ASTROBOLISMES of Saturn, Jupiter, Mars, Venus, Mercury.

Seriously consider the system or fabric of this world¹²⁵; it is a certain series a *non gradu ad non gradum*, from that which is beneath all apprehension to that which is above all apprehension. That which is beneath all degrees of sense is a certain horrible, inexpressible darkness. The magicians call it *tenebrae activae*¹²⁶, and the effect of it in nature is cold etc. For darkness is *vultus frigoris*¹²⁷, the complexion, body and matrix of cold, as light is the face, principle and fountain of heat. That which is above all degree of intelligence is a certain infinite, inaccessible fire or light. Dionysius calls it *Caligo Divina*¹²⁸, because it is invisible and incomprehensible. The Jew styles it Ein¹²⁹, that is *nihil* or nothing, but in a relative sense or, as the schoolmen express it, *quoad nos*¹³⁰. In plain terms it is *Deitas nuda, sine indumento*¹³¹. The middle substance or chain between these two is that which we commonly call nature. This is the *Scala* of the great Chaldee which doth reach¹³² from the subternatural¹³³ darkness to the supernatural fire. These middle natures came out of a certain water, which was the sperm or First Matter of the great world. And now we will begin to describe it: *capiat qui capere potest*¹³⁴.

It is in plain terms Cuton cai Ruton udwr¹³⁵, or rather it is Hcuth¹³⁶, that is Taia cumatwdhs cai to ceisetai ths ghs¹³⁷, an exceedingly soft, moist, fusible, flowing earth, an earth of wax that is capable of all forms and impressions. It is Udramenos ghgeneths, *terrae filius aqua mixtus* (Son of the Earth mixed with Water)¹³⁸, and to speak as the nature of the thing requires, Tewmighs cai ghs gamos¹³⁹. The learned alchemist defines it as qeion argurion zwticon, enwsis twn pneumatun en swma¹⁴⁰. It is a divine animated mass, of complexion somewhat like Silver, the union of masculine and feminine spirits.

The quintessence of four, the ternary of two and the tetract of one. These are his generations, physical and metaphysical. The thing in itself is a world without form, neither mere power nor perfect action, but a weak virgin substance, a certain soft, prolific Venus, the very love and seed, the mixture and moisture of heaven and earth. This moisture is the mother of all things in the world; and the masculine, sulphureous fire of the earth is their father.

Now the Rosie Crucians¹⁴¹, who without controversy were the wisest of people, when they discourse of the generation of metals tell us it is performed in this manner. The Mercury or mineral liquor, they say, is altogether cold and passive, and it lies in certain earthy, subterraneous caverns. But when the Sun ascends in the East his beams and heat, falling on this hemisphere, stir up and fortify the inward heat of the earth. Thus we see in winter weather that the outward heat of

the Sun excites the inward, natural warmth of our bodies and cherisheth the blood when it is almost cold and frozen. Now then, the central heat of the earth, being stirred and seconded by the circumferential heat of the Sun, works upon the Mercury and sublimates it in a thin vapour to the top of its cell or cavern. But towards night, when the Sun sets in the West, the heat of the earth - because of the absence of that great luminary - grows weak and the cold prevails, so that the vapours of the Mercury, which were formerly sublimed, are now condensed and distil in drops to the bottom of the cavern. But the night being spent, the Sun again comes about to the East and sublimates the moisture as formerly. This sublimation and condensation continue so long till the Mercury takes up the subtle, sulphureous parts of the earth and is incorporated therewith, so that this Sulphur coagulates the Mercury and fixes him at last, that he will not sublime but lies still in a ponderous lump and is concocted to a perfect metal¹⁴².

Take notice then that our Mercury cannot be coagulated without our Sulphur, for *Draco non moritur sine suo compare*, the Dragon dieth not apart from his fellow. It is water that dissolves and putrefies earth, and earth that thickens and putrefies water. You must therefore take two principles to produce a third agent, according to that dark receipt of Hali the Arabian. *Accipe canem masculum Corascenum et catellam Armeniae: conjunge et parient tibi catulum coloris coeli*. Take, saith he, the Corascene dog and the bitch of Armenia. Put them both together and they will bring thee a sky-coloured whelp. This sky-coloured whelp is that sovereign, admired and famous Mercury, known by the name of the philosopher's Mercury. Now for my part I advise thee to take two living Mercuries; plant them in a purified, mineral Saturn; wash them and feed them with water of salt vegetable¹⁴³; and thou shalt see that speech of the Adepts verified: *Pariet mater florem germinalem, quem ubere suo viscoso nutrit, et se totam ei in cibum vertet, foveute patre*¹⁴⁴. But the process or receipt is no part of my design, wherefore I will return to the First Matter; and I say it is no kind of water whatsoever. If thou wilt attain to the truth, rely upon my words, for I speak the truth. The mother or First Matter of metals is a certain watery substance, neither very water nor very earth, but a third thing compounded of both and retaining the complexion of neither. To this agrees the learned Valentine in his apposite and genuine description of our sperm. *Materia prima*, saith he, *set aquosa substantia, sicca repeta et nulli materiae comparabilis*. The First Matter is a waterish substance found dry, or of such a complexion that wets not the hand, and nothing like to any other matter whatsoever. Another excellent and well-experienced philosopher defines it thus. *Est terrena aqua et aquosa terra, in terrae ventre terra commixta, cum qua se commiscet spiritus et coelestis comparabilis*. It is, saith he, an earthy water and a watery earth, mingled with earth in the belly of the earth; and the spirit and influences of heaven commix themselves therewith. Indeed it cannot be denied but some authors have named this substance by the names of all ordinary waters, not to deceive the simple but to hide it from the ranting, ill disposed crew. On the contrary, some have expressly and faithfully informed us it is no common water, and especially the reverend *Turba*. Ignari, said Agadmon¹⁴⁵, *cum audiunt nomen aquae putant*

aquam nubis esse, quod si libros nostros intelligerent, scirent esse aquam permanentum, quae absque suo compari cum quo facta est unum permanens esse non possit. The ignorant, saith he, when they hear us name water, think it is water of the clouds; but if they understood our books they should know it to be a permanent or fixed water which, without its companion, to which it hath been united, cannot be permanent. The noble and knowing Sendivogius tells us the very same thing. *Aqua nostra est aqua coelestis, non madefaciens manus, non vulgi, sed pluvialis.* Our water is a heavenly water, which wets not the hands, not that of common water, but almost, as it were, pluvial. We must therefore consider the several analogies and similitudes of things, or we shall never be able to understand the philosophers.

This water then wets not the hands, which is notion enough to persuade us it can be no common water.

It is a metalline, bitter, saltish liquor. It hath a true mineral complexion. *Habet,* saith Raimund Lullus, *speciem solis et lunae, et in tali aqua nobis apparuit, non in aqua fontis aut pluviae*¹⁴⁶. But in another place he describes it more fully. *Est aqua sicca,* saith he, *non aqua nubis aut phlegmatica, sed aqua choleric, igne calidior.* It is a dry water, not water of the clouds or phlegmatic water, but a choleric water, more hot than fire. It is, moreover, greenish¹⁴⁷ to the sight, and the same Lully tells you so. *Habet colorem lacertae viridis.* It looks, saith he, like a green lizard. But the most prevalent colour in it is a certain inexpressible azure, like the body of heaven in a clear day. It looks in truth like the belly of a snake, especially near the neck, where the scales have a deep blue tincture; and this is why the philosophers call it their serpent or dragon. The predominant element in it is a certain fiery, subtle earth, and from this prevalent part the best philosophers have denominated the whole compound. Paracelsus names it openly but in one place, and he calls it *viscum terrae*¹⁴⁸, the slime or viscous part of the earth. Raymund Lully describeth the crisis or constitution of it in these words: *Substantia lapidis, nostri,* saith he, *est tota pinguis, et igne impregnata.* The substance of our Stone is altogether fat or viscous and impregnated with fire - in which respect he calls it elsewhere not water but earth. *Capias terram nostram,* saith he, *impregnatam a sole, quia lapidem est honoratus, repertus in hospitibus, et est intus inclusum velut magnum secretum et thesaurus incantatus.* Take our earth which is impregnated or with child by the sun; for it is our precious Stone which is found in desolate houses, and there is shut up in it a great secret and treasure enchanted. And again, in a certain place, he delivers himself thus: *Prima materia, Fili, est terra subtilis sulphurea, et haec nobilis terra dictum est subjectum mercuriale.* My son, he saith, the First Matter is a subtle, sulphureous earth, and this noble earth is called a mercurial subject. Know then for certain that this slimy, moist sperm or earth must be dissolved into water, and this is the Water of the Philosophers, not any common water whatsoever. This is the grand secret of the Art, and Lully discovers it with a great deal of honesty and charity. *Argentum vivum nostrum,* saith he, *non est argentum vivum vulgare: imo argentum vivum nostrum est aqua alterius naturae, quae reperiri non potest*

supra terram, cum in actionem venire non possit per naturam, absque adjutorio ingenii et humanorum manuum operationibus. Our Mercury is not common Mercury or Quicksilver. But our Mercury is a water which cannot be found on earth, for it is not made or manifested by the ordinary course of nature, but by the art and manual operations of man. Seek not then for that in nature which is an effect beyond her ordinary process; you must help her, that she may exceed beyond her common course, or all is to no purpose. In a word, you must make this water before you can find it. In the interim you must permit the philosophers to call their subject or chaos a water, for there is no proper name for it, unless we call it a sperm, which is a watery substance but certainly no water. Let it suffice that you are not cheated, for they tell you what it is and what it is not, which is all that man can do. If I ask you by what name you call the sperm of a chick you will tell me it is the white of an egg, and truly so is the shell as well as the sperm that is within it. But if you call it earth or water you know well enough it is neither; and yet you cannot find a third name. Judge then as you should be judged, for this is the very case of the philosophers. Certainly you must be very unreasonable if you expect that language from men which God hath not given them.

Now that we may confirm this our theory and discourse of the sperm not only by experience but by reason, it is necessary that we consider the qualities and temperament of the sperm. It is then a slimy, slippery, diffusive moisture. But if we consider any perfect products, they are firm, compacted, figured bodies; and hence it follows they must be made of something that is not firm, not compacted, not figured, but a weak, quivering, altering substance. Questionless thus it must be, unless we make the sperm to be of the same complexion with the body; and then it must follow that generation is no alteration. Again, it is evident to all the world that nothing is so passive as moisture. The least heat turns water to a vapour and the least cold turns that vapour to water. Now let us consider what degree of heat it is that acts in all generations, for by the agent we may guess at the nature of the patient. We know the sun is so remote from us that the heat of it, as daily experience tells us, is very faint and remiss. I desire then to know what subject there is in all nature that can be altered with such a weak heat but moisture. Certainly none at all; for all hard bodies, as salts, stones and metals, preserve and retain their complexions in the most violent, excessive fires. How then can we expect that they should be altered by a gentle and almost insensible warmth? It is plain then, and that by infallible inference from the proportion and power of the agent, that moisture must needs be the patient. For that degree of heat which nature makes use of in her generations is so remiss and weak it is impossible for it to alter anything but what is moist and waterish. This truth appears in the animal family, where we know well enough that sperms are moist. Indeed in vegetables the seeds are dry, but then nature generates nothing out of them till they are first macerated or moistened with water. And here the Peripatetic philosophers are quite gone with their *pura potentia*¹⁴⁹, that fanatic chaos of the son of Nichomachus.

But I must advise my chemists to beware of any common moisture, for that will never be altered otherwise than to a vapour. See, therefore, that thy moisture be well tempered with earth; otherwise thou hast nothing to dissolve and nothing to coagulate. Remember the practise and magic of the Almighty God in His creation, as it is manifested to thee by Moses. *In principio*, saith he, *creavit Deus coelum et terram*¹⁵⁰. But the original, if it be truly and rationally rendered, speaks thus: *In principio Deus miscuit rarum et densum*. In the beginning God mingled or tempered together the thin and the thick. For heaven and earth in this text signify the Virgin Mercury and the Virgin Sulphur. This I will prove out of the text itself, and that by the vulgar, received translation, which runs thus: In the beginning God created the heaven and the earth. And the earth was without form and void; and darkness was upon the face of the abyss. And the Spirit of God moved upon the face of the waters. In the first part of this text Moses mentions two created principles¹⁵¹, not a perfect world, as we shall prove hereafter, and this he doth in these general terms, heaven and earth. In the latter part of it he describes each of these principles in more particular terms and he begins with the earth. And the earth, saith he, was without form and void. Hence I infer that the earth he speaks of was a mere rudiment or principle of this earth which I now see¹⁵²; for this present earth is neither void nor without form. I conclude then that the Mosaical earth was the Virgin Sulphur, which is an earth without form, for it hath no determined figure. It is a laxative, unstable, incomposed substance, of a porous, empty, *crasis*, like sponge or soot. In a word, I have seen it, but it impossible to describe it. After this he proceeds to the description of his heaven or second principle in these subsequent words. And the Spirit of God moved upon the face of the waters. Here he calls an abyss and waters what he previously called heaven. It was indeed the heavenly water or chaos, out of which the separated heaven or habitation of the stars was afterwards made. This is very clear from the original, for *Hamaim* and *Hashamaim* are the same words like *Aqua* and *Ibi Aqua*, and they signify one and the same substance, namely water¹⁵³. The text then being rendered according to the primitive natural truth and the undoubted sense of the author speaks thus: In the beginning - or, according to the Jerusalem Targum, *in wisdom*¹⁵⁴ - God made the water and the earth. And the earth was without form and void; and there was darkness upon the face of the deep. And the Spirit of God moved upon the face of the waters. Here you should observe that God created two principles, earth and water, and of these two He compounded a third, namely the sperm or chaos. Upon the water, or moist part of this sperm, the Spirit of God did move; and, saith the Scripture, there was darkness upon the face of the deep. This is a very great secret; neither is it lawful to publish it expressly and as the nature of the thing requires, but in the magical work it is to be seen, and I have been an eye-witness of it myself.

To conclude: remember that our subject is no common water, but a thick, slimy, fat earth. This earth must be dissolved into water and that water must be coagulated again into earth. This is done by a certain natural agent which the philosophers call their Secret Fire. For if you work with common fire it will dry your sperm and bring it to an unprofitable red dust, of the colour of wild poppy.

Their Fire then is the Key of the Art¹⁵⁵, for it is a natural agent but acts not naturally without the sun. I must confess it is a knotty mystery, but we shall make it plain if you be not very dim and dull. It requires indeed a quick, clear apprehension. Behold¹⁵⁶ our 7 Bramaah¹⁵⁷ and their wonderful mysteries, for by them you may cure all diseases, young or old, but know first our fire and use in the work.

Fire, notwithstanding the diversities of it in this sub-lunary kitchen of the elements, is but one thing from one root. The effects of it are various, according to the distance and nature of the subject wherein it resides, for that makes it vital or violent. It sleeps in most things, as in flints, where it is silent and invisible. It is a kind of *perdue*, lies close like a spider in the cabinet of his web, to surprise all that comes within his lines. He never appears without his prey in his foot. Where he finds aught that's combustible there he discovers himself; for if we speak properly, he is not generated, but manifested. Some men are of opinion that he breeds nothing but devours all things and is therefore called *Ignis quasi ingignens*¹⁵⁸. This is a grammatical whim, for there is nothing in the world generated without fire. What a fine philosopher then was Aristotle, who tells us this agent breeds nothing but his *pyrausta*, a certain fly which he found in his candle but could never be seen afterwards. Indeed too much heat burns and destroys; and if we ascend to other natures, too much water drowns, too much earth buries and chokes the seed, that it cannot come up. And verily at this rate there is nothing in the world that generates. What an owl was he then that could not distinguish, with all his logic, between excess and measure, between violent and vital degrees of heat, but concluded the fire did breed nothing because it consumed something. But let the mule pass, for so Plato called him, and let us prosecute our Secret Fire. This Fire is at the root and about the root - I mean about the centre - of all things, both visible and invisible. It is in water, earth and air; it is in minerals, herbs and beasts; it is in men, stars and angels. But originally it is in God Himself; for He is the Fountain of heat and fire, and from Him it is derived to the rest of the creatures in a certain stream or sunshine.

Now the Rosie Crucians¹⁵⁹ afford us but two notions whereby we may know their fire. It is, as they describe it, moist and invisible. Hence they have called it their *venter equi*¹⁶⁰ and *fimus equinus*¹⁶¹, but this is only by way of analogy, for there is in horse-dung a moist heat but no fire that is visible. Now let us compare the common Vulcan with this philosophical Vesta, that we may see wherein they are different. First, then, the philosopher's fire is moist, and truly so is that of the kitchen too. We see that flames contract and extend themselves; now they are short, now they are long, which cannot be without moisture to maintain the flux and continuity of their parts. I know Aristotle makes the fire to be simply dry, perhaps because the effects of it are so. He did not indeed consider that in all complexions there are other qualities besides the predominant one. Surely then this dry stuff is that element of his wherein he found his *pyrausta*. But if our natural fire were simply dry the flames of it could not flow and diffuse themselves as they do: they would rather fall to dust or turn, like their fuel, to ashes. The

common fire is excessively hot, but moist in a far inferior degree, and therefore destructive, for it preys on the moisture of other things. On the contrary, the warmth and moisture of the magical agent are equal; the one tempers and satisfies the other. It is a humid, tepid fire, or, as we commonly express ourselves, blood-warm. This is their first and greatest difference in relation to our desired effect: we will now consider the second. The kitchen fire, as we all know, is visible, but the philosopher's fire is invisible, and therefore no kitchen fire. This Almadir expressly tells us in these words: *Solas radios invisibilis ignis nostri sufficere*. Our work, saith he, can be performed by nothing but the invisible beams of our fire. And again: *Ignis moster corrosivus est ignis, qui supra mostrum vas nubem obducit, in qua nube radii hujus ignis occulti sunt*. Our fire is a corrosive fire which brings a cloud about our glass or vessel, in which cloud the beams of our fire are hidden. To be short: the philosophers call this agent their bath, because it is moist as baths are; but in very truth it is no kind of bath, neither *maris* nor *roris*¹⁶², but a most subtle fire, and purely natural; but the excitation of it is artificial. This excitation or preparation is a very trivial, slight, ridiculous thing. Nevertheless all the secrets of corruption and generation are therein contained. Lastly, I think it just to inform thee that many authors have falsely described this fire, and that of purpose, to seduce their readers. For my own part I have neither added nor diminished. Thou hast here the true, entire secret, in which all the easterns agree, Alfid, Almadir, Belen, Gierberim, Hali, Salmanazar and Zadich, with the three famous Jews, Abraham, Artephius and Kalid. Now I will tell thee how to use it.

Take our two serpents, which are to be found everywhere on the face of the earth. They are a living male and a living female¹⁶³. Tie them both in a love-knot and shut them up in an Arabian *Caraha*¹⁶⁴. This is thy first labour, but thy next is more difficult. Thou must encamp against them with the fire of nature, and be sure that thou dost bring thy line about. Circle them in and stop all avenues, that they find no relief. Continue this siege patiently; and they will turn into an ugly black toad, which will be transformed to a horrible devouring Dragon, creeping and weltering in the bottom of her cave, without wings. Touch her not by any means, not so much as with thy hands, for there is not upon this earth such a violent transcendent poison. As thou hast begun so proceed, and this Dragon will turn to a Swan, but more white than the hovering, virgin snow when it is not yet sullied with the earth. Henceforth I will allow thee to fortify thy fire till the Phoenix appears. It is a red bird of a most deep colour, with a shining, fiery hue. Feed this bird with the fire of his father and the ether of his mother¹⁶⁵; for the first is meat and the second is drink, and without this last he attains not to his full glory. Be sure to understand this secret, for fire feeds not well unless it first be fed. It is of itself dry and choleric; but a proper moisture tempers it, gives it a heavenly complexion and brings it to the desired exaltation. Feed thy bird then as I have told thee, and he will move in his nest and rise like a star of the firmament. Do this and thou hast placed nature in *horizonte aeternitatis*¹⁶⁶. Thou hast performed the command of the Kabalist: *Fige finem in principio, sicut, flammam prunae conjunctam, quia Dominus superlative unus et non tenet secundum*. Unite the

end to the beginning, like a flame to a coal; for God, saith he, is superlatively one and He hath no second¹⁶⁷. Consider then what you seek; you seek an indissoluble, miraculous, transmuting, uniting union; but such a tie cannot be without the First Unity. *Creare enim*, saith one, *atque intrinsecus transmutare absque violentia, munus est proprium duntaxat Primae Potentiae, Primae Sapientiae, Primi Amoris*. To create and transmute essentially and naturally, or without any violence, is the only proper office of the first Power, the first Wisdom and the first Love. Without this love the elements will never be married; they will never inwardly and essentially unite, which is the end and perfection of magic. Study then to understand this, and when thou hast performed I will allow thee that test of the *Mekkubalim*: *Intellexisti in sapientiam et sapuisti in intelligentia; statuisti rem super puritates suas, et Creatorem in Throno Suo collocasti*¹⁶⁸.

To close this section, I say it is impossible to generate in the patient without a vital, generating agent. This agent is the philosophical fire, a certain moist, heavenly, invisible heat. But let us hear Raymund Lully describe it: *Quando dicimus*, saith he, *quod lapis per ignem generatur, non vident alium ignem, nec alium credunt, nisi ignem communem; nec aliud Sulphur, nec aliud Argentum Vivum, nisi sit vulgare. Ideo manent decepti per eorum caecas estimationes, inferentes quod causa sumus suae deceptionis et quod dedimus illis intelligere rem unam pro alia. Sed non est verum salva eorum pace, sicut probabimus per illa quae philosophi posuerunt in scriptis. Solem enim appellamus ignem, et vicarium suum vocamus calorem naturalem. Nam illud quod agit calor solis in mineris metallorum per mille annos, ipse calor naturalis facit in una hora supra terram. Nos vero et multi alii vocamus eum Filium Solis, nam primo per solis influentiam fuit generatus per naturam, sive adjutorium scientiae vel artis*. When we say the Stone is generated by fire, men neither see, neither do they believe there is any other fire but the common fire, nor any other Sulphur and Mercury but the common Sulphur and Mercury. Thus they are deceived by their own opinions, saying that we are the cause of their error, having made them to mistake one thing for another. But, by their leave, it is not so, as we shall prove by the doctrine of the philosophers. For we call the sun a fire and the natural heat we call his substitute or deputy. For that which the heat of the sun performs in a thousand years in the mines, the heat of nature performs above the earth in one hour. But we and many other philosophers have called this heat the Child of the Sun, for at first it was generated naturally by the influence of the sun without the help of our Art or knowledge. Thus Lully: but one thing I must tell thee, and be sure, Reader, thou dost remember it. This very natural heat must be applied in the just degree and not too much fortified; for the sun itself doth not generate but burn and scorch where it is too hot. *Si cum igne magno operatus fueris*, saith the same Lully, *proprietas nostri spiritus, quae inter vitam et mortem participet, separabit se et anima recedet in regionem sphaerae suae*. If thou shalt work with too strong a fire, the propriety of our spirit, which is different as yet to life or death, will separate itself from the body, and the soul will depart to the region of her own sphere.

Take therefore along with thee this short but wholesome advice of the same author: *Facis ergo, Fili, quod if loco generationis aut conversionis sit talis potentia coelestis quae possit transformae humidum ex natura terrestri, in formam et speciem transparentem et finissimam*. My son, saith he, let the heavenly power or agent be such in a place of generation or mutation that it may alter the spermatick humidity from its earthly complexion to a moist fire, transparent form or species.

See here now the solution of the slimy, fat earth to a transparent, glorious Mercury! This Mercury is the water which we look after, but not any common water whatsoever. There is nothing now behind but that which the philosophers call *Secretum Artis*¹⁶⁹, a thing that was never published and without which you will never perform, though you know both fire and matter. An instance hereof we have in Flamel, who knew the Matter well enough and had both fire and furnace painted to him by Abraham the Jew; but notwithstanding he erred for three years because he knew not the secret. Henry Madathan, a most noble philosopher, practised upon the subject for five years together but knew not the right method and therefore found nothing. At last, saith he, *Post sextum annum clavis potentiae per arcanam revelationem ab omnipotente Deo mihi concredita est*; after the sixth year I was entrusted with the Key of Power by secret revelation from the Almighty God. This Key of Power or third secret was never put to paper by any philosopher whatsoever. Paracelsus indeed hath touched upon it, but so obscurely it is no more to the purpose than if he had said nothing.

And now I have done enough for discovery and regimen of the fire, and more than any one author hath performed. Search it then, for he that finds this fire will attain to the true temperament; he will make a noble, deserving philosopher and, to speak in the phrase of our Spaniard, *Dignus erit poni ad mensam duodecim parium*¹⁷⁰.

And now I will teach you how to make the DRAMAAH into Medicine mixed with the metals. And first

Of Mercury

The Rosie Crucians describe unto us the Mount of God and his Mystical, philosophical Geomancy, which is nothing else but the highest and purest part of the earth; for from Tetragrammaton He shines upon the Orders and they carry His power to the planets, so you see the superior, secret portion of this element is holy ground; it is the seed plot of the eternal nature. And the Chaos was divided into eight parts; the eight¹⁷¹ was deadly, but first of the seven; the matter was the body of the lapsed Angels¹⁷². After light began to appear¹⁷³, the centre¹⁷⁴ was red, an ash colour blush; the circumference blue. The second division green, fiery red and purple. In the third division the centre was fiery, the inferior waters purple and the superior white. The fourth division was azure blush, the Sun and Moon then appearing pale blush. In the fifth division the earth was red and the centre fiery, the waters blush azure, the Sun and Moon ash colour. The sixth

division of the earth was a red blush, and centre fiery. The seventh apparition is the immediate vessel and recipient of heaven, whence all minerals have their life and by which the animal monarchy is maintained.

This philosophical black Saturn mortifies and coagulates the invisible Mercury of the Stars and, on the contrary, the Mercury kills and dissolves the Saturn; and out of the corruption of both, the Central and Circumferential Suns disgenerate new bodies, the Green Lion in a blush circle; the Green Lion swallowed to the hinderparts; the virtues in a purple vessel of Nature, half Moon made; the vegetable animal mineral in a blush; calcination of fiery and blue earth; sublimation fiery, airy and azure; solution black, white and azure; the Spirit descends. The masculine and feminine Mercury generated there will appear azure, purple, ash colour, yellow and red. In putrefaction our matter is black and azure; the Spirit descends. In conception our *Astrum Solis* is a bloody, fiery, spirited earth; the Spirit descends and the superfinals [are] azure. In impregnation the *Astrum Solis* ascends from a muddy water and the Spirit with it. In fermentation the black, shabby toad lies sultering in his vessel, and the Spirit in azure descending appears in separation of fire, air, water and earth. The toad lies in the earth black, the earth ash colour, the water green, the air blue, the fire blood-red and the aether a liquid white fire; the Spirit ascends. In conjunction of elements the fire is red, air blue, water green and earth dark ash and the Spirit descends in a clear sky. In separation of earth, fire, air and water, the earth lies in the bottom dark, the fire flaming upon it, breaking through the air to the water, and disposeth itself in conjunction of water in air; the Spirit descends in a clear sky to that blue composition; the air in the water is green, the fire red and the earth ashy. In the separation of fire, water, air in water, earth, the earth is dark, muddy, the air in water blue, the water transparent and the fire flaming red and white, and the Spirit ascends in an azure sky.

In conjunction of air in fire, fire in water, water in air, earth, the earth is dark and heavy, the water in air blue, the fire in water green, the air in fire a blush red; the Spirit descends in a clear sky. In separation air, water, fire in air, earth, the earth is ash colour, fire in air blood red, flaming through the azure water and air; the Spirit ascends. In conjunction fire in air, water in fire, air in water, earth, the earth is black, the air in water is green, the water in fire is like the sunbeams in a mist, the fire above all lies in the air blue, flaming; the Spirit descends. The next separation is flames of fire breaking out in all the elements, the earth only lies of a darker colour. The unnatural fire stands thus, air water, fire earth, the earth covered with a blue flame, the fire ascending to the central colour, water and air; the Spirit descends. The rising of the Rosie Crucians Medicines. The earth *cinerī coloris*, a white star and moon appearing in a star; the power and Spirit ascends in a clear sky. In fermentation a dark star lies in the earth and the Spirit descends to it in a clear sky. In purgation the earth is black and the Spirit descends clear. In this separation there appears water in air, fire in water, turned upwards; below is a blue space, then the earth in fire is red, air in earth ash colour.

[In] this conjunction of air in fire, water in earth, fire in air, earth in water; the earth in water is dark, the fire in air red, but not violent, the water in earth green, the air in fire blue; the Spirit descends. And [in] this conjunction of earth in air, water in fire, and fire in earth; here in the bottom the earth is animated with a secret fire, invisible, occult, the water shadows a mild fire, the air in water above these is green and glorious, the earth in air is a bluish white; the Spirit descends.

In this exaltation of the Quintessence the Pelican is in the bottom; next above is azure; then two circles; of the first the upper is blue, the lower a white fire; the next is a green and red sea of fire environing the white matter, and this exaltation of the Quintessence is azure, a globe [which] in the bottom [is] divided in four quarters; from the East to the South is blue, from the South to the West green, from the West to the North white, from the North to the East red, and all the upper part of it azure. Above this globe the fire flames upon both sides. In fixation the branches of fire spread both ways round the white and azure globe; this projection is upon a blue and white powder, the perspect in Multiplication runs down the vessel through the azure to the matter in the bottom.

In imbibition the Serpent lies at the bottom of the matter; in sublimation a strong fire drives the azure part to the top; in coagulation the azure binds or weighs down the fire to the bottom; in conjunction the fire star lies in the bottom; in the¹⁷⁵ exaltation the double circled fire arises, and in the¹⁷⁶ quintessence appears an Angel amidst the ascending globes of fire; and in fixation all is circled with purple and red fire and in the middle stands an Angel in a star, doubled, with his wings spread and holding the glorious Crown of the Rosie Cross in his hands.

1. Of the Preparation of the Gold, Mercury or Argent Vive. 2. Purification. 3. Sublimation. 4. Calcination. 5. Exuberation. 6. Solution. 7. Separation. 8. Conjunction. 9. Putrefaction into Sulphur. 10. Fermentation. 11. Multiplication in virtue. 12. Multiplication in quantity.

1. He that can make the medicine of Argent Vive or Mercury alone is the greatest searcher out of Art and Nature because there is all that in Mercury which wise men seek. For Quicksilver is the Mother and Sperm of all metals and their nearest matter, and it is not only a spirit but a body; it is also a middle nature and also a Sulphur; it is a lingering Mercury; it dieth and riseth again and is fixed with its own proper elements; wherefore it is first necessary that it be purged from its impurities.

2. The Purgation or Purification is on this wise. Grind it upon a marble with a mullet, or a wooden pestle in a wooden mortar, with common salt and a little vinegar sprinkled thereupon till the salt be black; then wash it well with vinegar and dry it easily at the fire or at the sun; then strain it through a double cloth or a new skin of a sheep till it be dry and the vinegar clear taken away and be of a white colour and clear.

3. Grind it upon a marble with a little Mercury Sublimate and let it mortify and incorporate with it; then grind it with its equal weight of Saltpeter and green Copperas till it be like a paste; then put all into a subliming glass and in ashes sublime all the mercury that it be white and clean as snow in the head of the limbeck; sublime it again three times or oftener, and it will be pure Mercury and¹⁷⁸ Sublimate.

4. Put a pound of this Mercury Sublimate into two pounds of common *Aqua Fortis* by little and little at once till all be dissolved like sugar in wine; then shut the glass and set it *in Balneo* to dissolve the space of ten days; then distil away the *Aqua Fortis* in a lent heat *in Balneo* and the Mercury will remain in the bottom like butter, of a white colour and calcined by Corrosive Water.

5. Put this calcined Mercury into an earthen body with a limbeck and in ashes sublime the whole dissolved substance three times, which will all be very white, and then it is called Mercury Exuberate.

When you have three or four pound of this, receive¹⁷⁹ the third part and fix it by often sublimation till it remain in a hard mass and ascend no more but remain fixed, which is called the Glue of the Eagle or the prepared body permanent and the volatile made fixed, which is to be reserved for the earth of the Stone.

6. Dissolve the other two parts *in Balneo* or in a cold cellar or put it in a bladder and hang it over fuming hot water till it be all come to water. Take this water thus made and digest it in a Circulatory, well closed, the space of nine days, then put it in a body with a head and receiver well luted and in ashes or [*in*] *Balneo* distil the water of a white colour, or milky white, which is called *Lac Virginis*, dissolving all metals, and so you have separated the Spirit of the Stone, which is also called the lingering Spirit and the white tincture of the white Stone of Mercury.

7. Take the third part which before you reserved and fixed, called the Glue of the Eagle, as much of it as you please, and add thereto equal weight of its Spirit or *Lac Virginis*¹⁸⁰ and stop up the glass and so you have joined the man and the woman, Mercury with her own earth, the Spirit with the body.

8. Set your *Lac Virginis* thus joined with his own, each *in Balneo* to putrefy 150 days and there let it stand unmoved. After 40 days it will be black and it is then called the Head of the Crow; then it will be of a green colour, after that the Peacock's Tail and many false colours, for between this and white it will appear red; but at last you shall see it white and then increase your fire and it will stick to the sides of the glass like fishes eyes¹⁸¹, then you have each in the nature of Sulphur.

Take of this Sulphur as much as you please and weigh it and add thereto two parts of the white tincture or *Lac Virginis* and set it *in Balneo* to dissolve the space of six days; then distil away the *Lac Virginis* or tincture, and the Sulphur

will remain in the form of liquor, for it is the liquor of the white Sulphur of Mercury which is to be joined with the liquor of the Sulphur of Luna or Silver.

9. The Sulphur of the white luminary, or Silver, or Luna, is made as the other, whereof we shall speak more in the next branch. This liquor of the Sulphur is the Soul, which is joined with the Spirit and body, which quickeneth the whole Stone. The other conjunction before was only the union of the Spirit and the body, but this is a threefold copulation, viz., the uniting of the Soul, Spirit and Body¹⁸². Add equal weight of these two liquors of Sulphur, that is to say the liquor of the Sulphur of Mercury and of Silver or Luna and close well the glass and set it in ashes till it be white, for it will be all colours again and at last white; and then it is the perfect Stone converting all metals into Silver.

10. This Medicine or Elixir is thus multiplied in virtue. Dissolve it in *Lac Virginis* and distil it away and dry it and dissolve it again etc. And let it be so often dissolved and dried till it will dry no more but remain an incombustible oil, and is then Elixir of the third order.

11. Take one part of this Elixir and project it upon 100 or 1,000 parts of melted silver (according to the goodness and virtue thereof) and it will turn the Silver into a brittle mass or substance, which beat to a powder in an iron or brass mortar, or upon a marble and project one part of this powder upon 100 parts of Mercury, purged, made hot, and it will be perfect Medicine whereof one part turneth 100 or 1,000 parts of the bodies into good silver. And this way is your Medicine multiplied in quantity. Here followeth the Mercurial Medicine prepared after we have taught you to make the Medicine of the Moon.

12. It remaineth now that we speak of the Medicine of the Elixir of Life, which is called Potable Silver. But although the liquor of Silver may be made potable Silver if it be corroborated¹⁸³ before by digestion *in Balneo* seven days with the Spirit of Wine, and then distil away the Spirit of Wine that the oil of the Silver may remain in the bottom, which may easily be given for medicine, yet the philosophers would have us do otherwise; for they teach us to bring the metals first into their Quintessence before they be taken inwardly, and that there are¹⁸⁴ no other Quintessences but those that are of a Second Nature according to the old saying:

*Elixir de te est res secunda
De quo sunt facta corpora munda.*

That is to say the four Elements are destroyed and by putrefaction a new body [is] created and made into a Stone, which is the Quintessence as Lully would have it. But I do boldly and constantly affirm that there is no true Silver or Potable Silver nor Quintessence unless it be first Elixir, and that is done in a quarter of an hour by projection of the Elixir upon Silver or pure Gold, molten, according as the Elixir was red or white. If, therefore, you desire after the first composition of the Elixir to make the Arcanum of *Argentum* or *Aurum Potabile*, project the Elixir or

Medicine according to his quality or property upon pure Silver or Gold, molten, and then it is made brittle and frangible, and grind it to a powder and take thereof so much as you please and dissolve it in distilled Vinegar (or rather in Spirit of Wine) the space of nine days. Then distil away the Vinegar or Spirit of Wine [and] that which remaineth in the bottom is the true Medicine, Quintessence, Elixir of Life, Ferment of Ferments and Incombustible Oil converting metals and man's body into perfect health from all diseases of man's body which proceed from Mercury or Luna. And thus is the true Potable Silver made, curing the vertigo, syncope, epilepsy, madness, phrensy, leprosy, etc.

And this is the right way of making the Stone of Mercury alone; but the Elixir cannot be made without the addition of Silver to the white and of Gold to the red.

To each this work, consider eight principles:

1. Luna. 2. Pure Silver. 3. Calcination. 4. Solution. 5. Putrefaction.
6. The Sulphur. 7. The Liquor of the Sulphur. 8. White Ferment.

Hermes saith the Elixir is nothing else but Mercury, Sol and Luna. By Mercury nothing is understood but the Sulphur of Nature, which is called the true Mercury of the philosophers, and that Sulphur gotten by putrefaction by the conjunction of the Spirit and the body of imperfect bodies and metals.

By Sol is meant Gold, by Luna, Silver; both of them are to be joined to imperfect bodies, that is to say, white Sulphur and Red, whence the same Hermes, in his seven[th] treatise of Sol, saith there happeneth a conjunction of two bodies, and it is necessary in our maistry. And if one of those bodies only were not in our Medicine, it would never by any means give any tincture. Upon which Morienus saith: For the Ferment prepareth the imperfect body and converteth it to its own nature and there is no Ferment but Sol and Luna, that is Gold and Silver. Of which Rosinus [saith]: Sol and Luna prepared (that is to say their Sulphurs) are the ferments of metals in colour.

But this is made more evident by Raymund in his *Apertory*, where he saith there is no Ferment except Sol and Luna, for the Ferment of the Medicine to white is Silver and to the red Gold, as the philosophers do demonstrate, because without Ferment there doth proceed neither Gold nor Silver nor anything else that is of its kind or nature, therefore join the Ferment with its Sulphur that it may beget its like, because the Ferment draweth the Sulphur to its own colour and nature also, and weight and sound¹⁸⁵, because every like begetteth its like. Because the Ferment, even as Sol, tingeth and changeth his Sulphur into a permanent and piercing Medicine, therefore the philosopher saith: He that knoweth how to tinge Sulphur and Mercury with Sol and Luna shall attain to the greatest secret. And for this reason it is necessary that Sol and Luna be the tincture and ferment thereof.

2. And so also Arnoldus saith in his *Rosary*, there is no body more noble and pure than Sol or his shadow, that is to say Silver, without which no tingeing Mercury is generated. He that endeavoureth to give colour without this Gold or Silver goeth blindly to work, like an ass to a harp, for Gold giveth a golden and Silver an argentine colour; therefore he that knoweth how to tinge Mercury with Sol and Luna cometh or reacheth to the secret which is called white Sulphur, the best to Silver, which, when it be made red, will be red Sulphur, to Gold best.

3. Take pure Luna, that is to say Silver. That is best which is beaten into leaves; and bring it into calx with Mercury, and it is then called water Silver; then is the Luna well prepared for calcination.

4. When you have your Silver thus prepared, take four or six ounces thereof and put it in double proportions of *Lac Virginis* mixed with equal quantity of corrosive water to dissolve in an egg glass. After it hath dissolved so much as it can in the cold, set [it] *in Balneo* and there let it stand nine days till the whole substance of the silver be dissolved into a green water. Then let the *Balneum*¹⁸⁶ cool and take it out and put the dissolution into the body and set thereon a head and distil off the water from the matter remaining, which is the oil of Silver, calcined not into a calx but [into] a liquor, because this *Lac Virginis*, if it be mixed or joined with common *Aqua Fortis* or alone without it (as it pleaseth the operator) is so strong that the very Diamond cannot resist it but is dissolved. Therefore this water is called the Water of Hell and is the only miracle of miracles of the world, because it containeth such a fiery nature in itself and propriety of burning of all bodies into liquor, whereas the elemental fire prevaieth no further than to reduce metals into calx or ashes. But to return from whence I digressed, I now come to the third operation.

5. To the end, therefore, that this liquor or oil of Silver may be more perfectly dissolved, and that all the imperfection of adustion¹⁸⁷ may be taken away, which by the ancients is called the corroborating of the le[a]st humidity, put the oil or liquor into another egg glass like the former, pour thereupon so much Spirit [of Wine] above it [as shall reach to a depth of] four fingers, then close well the glass and set it *in Balneo* to digest seven or ten days and you shall find the oil or liquor turned into a thin or rare water [or] oil. Put this water into a still and *in Balneo* draw away the spirit of wine till none of the Spirit of Wine remain with the Silver dissolved, and thus you have your Silver prepared for putrefaction.

Observe the power of the Moon and her Angel [upon] Hasmodai¹⁸⁸, Muriel, Populus, Via and Silver. Practice and prepare after this manner. This Medicine cures all the diseases of the neck and breast etc. It must be Silver purely refined.

Geomancy the Harmony in this Preparation¹⁸⁹.

(geomantic pic missing)

6. This liquor of Silver is potable, but not the Quintessence. Put this water into a fit putrefying glass and seal it up and set it to putrefy *in Balneo* till the time of putrefaction be past, which is about one hundred and fifty days, and when you see the first sign of putrefaction, which is called the head of the Crow, increase your fire a little till all the colours begin to appear and you see it begin to be white.

When you see it white, increase your fire yet more and it will rise up and stick to the sides of the glass, most transparent, like the eyes of fishes¹⁹⁰, which is Sulphur of Nature or Salt, or the putrefied body of the white luminary, viz., Luna, which yet is not so hard as a body nor so soft as a Spirit, but of a mean hardness between a Spirit and a body, and is called the Philosophers' Mercury and the Key and means of joining Tinctures.

7. But to come to the liquor of the white Luminary. This body being brought into Quintessence is prepared for dissolution like the Sulphur of the imperfect body; but whereas that is done by virtue of the white tincture or *Lac Virginis*, I rather do it by virtue of the fire natural, which is the Spirit of Wine; and after the drawing away thereof it remaineth in a liquor.

Now this liquor of Luna dissolved is the Quintessence, which then is the liquor of the white luminary and the soul¹⁹¹ (as Eximandrus saith) quickening the whole Medicine, without which it is dead and will never give form nor colour.

8. Therefore the fourth part of the liquor of the white luminary is to be joined to three parts of the former liquor of the Sulphur of Mercury, and after to be kept in a lent fire of ashes, well closed, till it pass through all colours and at last come to its former colour of whiteness; and so the Medicine is fermented¹⁹² and turned into the white Elixir.

The residue of the foresaid dissolved Sulphur keep diligently, and therewith ferment the white Sulphur of other imperfect bodies or stones into Elixirs, which, when they are thrice dissolved and again congealed and remain in a liquid, then they are called incombustible oils and Elixirs of the third order¹⁹³.

And thus the Medicine is made of Mercury alone as followeth by this example. Having spoken of the white Medicine it now resteth that we speak of the making of the Red Elixir, whereof there are two processes, the first whereof is from the Radix, i.e., the long way; the other an accurtation that is much shorter and more excellent. And this way the Elixir may be made in eighty days, and excels all other accurtations; neither is there found therein any diminution of the virtue, but a plentiful and perfect fullness of power and virtue, having all the properties which the Elixir ought to have.

The Operation Under Those Heads

1. Vivum¹⁹⁴. 2. Sublimation. 3. Calcination. 4. Precipitation. 5. Solution. 6. Fixed Oil. 7. Incertation¹⁹⁵. 8. Dessication. 9. Contrition. 10. Fermentation. 11. The Red Elixir. 12. The Third Table.

1. Purgation of Mercury I shall omit because it was spoken of before.

2. The Sublimation is to be done otherwise than in the former work, for that which is called Sublimation here is not done with Vitriol and Saltpeter, but is only the distillation of the Mercury in an earthen body with a limbeck, and that without any additament.

3. When the Mercury is once sublimed in ashes wholly into the head of the limbeck, having a retainer joined thereto, take off the head and with a feather gather the sublimed matter and you shall find your Mercury of a black colour, having lost its fairness, and like a dust or powder sticking to his body.

4. Put it again into the body and sublime it as before, and reiterate this work seven or nine times until you have a sufficient quantity of this powder, a pound or more and this is the Calcination.

5. When you see your Mercury will ascend no more, but remain[s] in the bottom of a black colour, and that it is dead and brought perfectly into calx, let it cool and remove your body into sand till it be turned into a red colour. And this is the perfect Precipitation, [to] prove¹⁹⁶ [which], without the help of any corrosive water, take a little of this powder upon a hot Iron plate. If it fume, dry it longer, if not it is well.

6. Take of this red powder as much as you will dissolve and put thereupon at least his double weight of *Lac Virginis* and set *in Balneo* till you see your *Lac Virginis* stained a yellow or red colour; then filter it from its feces and keep it by itself in a glass well stopped and dry the matter that remaineth in ashes and pour thereon new *Lac Virginis* and do as before, till you have drawn out all the tincture and your Mercury is dissolved.

7. Put these solutions into a body, luting to a head and *in Balneo* distil away the *Lac Virginis* and the red oil precipitate will remain, which is fixed and needeth no distillation, but is the tingeing oil of red Mercury, and the red tincture of the red Medicine of Mercury, and the Soul and Spirit of the Medicine joined as for example.

8. Take part of the white Sulphur reserved in the first Table, and rubify it in ashes till it be red. Then imbibe it with equal weight of the oil of the tincture of this red Mercury and set it to dissolve *in Balneo*; and when you see it is dissolved into a liquid substance, take it out.

9. Then set it in ashes, or under the fire, to fix till the matter, being dried, remain fusible and fixed, standing in a mean heat, not over-hot, which try upon a hot iron plate; and if it fume not it is well; if it do, increase your fire till it be totally fixed and dry.

10. If this matter be imbibed again with its oil till it drink up as much as it will, and again dissolved *in Balneo* and then dried in ashes, it will show many colours and lastly appear red¹⁹⁷. And then it is the Stone, penetrating and fusible, apt for form.

11. Join this imbibed matter (or Medicine) with the fourth part of the liquor or oil of the red Sulphur of Gold or the red Ferment, and dissolve it *in Balneo* and dry it again; and again dissolve it in a glass hanged in the fume of hot water or *Balneum* and congest it again till it stand like honey. Then it is the perfect Red Elixir of Mercury.

12. The Multiplication or Augmentation of the virtue and quantity is showed in the preparation before of the White Elixir.

Of Gold - Sol

1. The Preparation of Gold, Sol. 2. Purged Gold. 3. Calcination. 4. Solution. 5. Putrefaction. 6. *Filius Solis Coelestis*. 7. *Filia Lunae Coelestis*.

1. The Putrefaction or Purgation of Gold is done as the Goldsmiths use to do by melting it with Antimony, that the Gold may remain in the bottom pure and clear from the metals, which they call *Regulus*.

2. Take 4 or 5 ounces of this refined Gold leaf or filings and dissolve it in *Lac Virginis* mixed with equal weight of *Aqua Fortis*, wherein Salt Armoniack sublimed is dissolved, and when it is dissolved into a red liquor, or deep yellow, then it is well calcined.

3. The Solution and Putrefaction is done as before you did with Silver in the preparation of the White Ferment.

4. When you have your white Sulphur of Nature (after Putrefaction) sticking to the sides of the glass¹⁹⁸, let it cool and take out of the glass and set it in ashes and increase your fire, but not too much, lest your matter vitrify, and let your ashes be no hotter than you can hold your hand therein, and so let it stand till the Sulphur be of a perfect deep red colour. Then have you the red Sulphur of the red luminary as for example -

Observe the Harmony of Geomancy in this Preparation

Behold the power of the Sun and his Angel upon Sorath, Verchiel, Fortuna Major and Minor in Gold and of his Medicine, which, being thus prepared, hath performed incredible, extraordinary cures upon the bodies of Princes and Peers in Europe.

5. If you resolve this red Sulphur in Spirit of Wine or distilled Vinegar into an oil, it is then the liquor of the red luminary and *Aurum Potabile* curing all infirmities if the Spirit of Wine or Vinegar be distilled from it; but for this work it were better to dissolve it in our red *Lac Virginis*, distil away the *Lac* from the Sulphur in ashes, and the Sulphur remaining in an oil is the Ferment of all stones to the red.

6. The Augmentation of this red Elixir in virtue is with his red Tincture as before in the white Tincture. The Augmentation in quantity is by projection upon the body of Gold molten, and that brittle matter of Gold upon Mercury; and if it be powdered, and resolved with Spirit of Wine in an oil, as was said before of Silver, then it is the Quintessence of Gold and the Great Elixir of Life, and the Spiritual Ferment for the transmutation of metals and for the health of man's body.

Although Raymund, writing to the King, was pleased to say that every accurtation diminisheth the perfection, because Medicines which are made by accurtation have less effect of transmutation - which I also assent to with him for a great truth, if the work be begun from the first fountain - yet because this work has its beginnings from those things, which before were brought to a perfect degree of perfection, therefore in this there is no diminution of the perfection¹⁹⁹.

Therefore it ought to be declared unto thee that if they be both well prepared (and that thou begin with them) thou wilt do a wonderful work without any great labour sooner than if thou should begin with one thing alone. Therefore, my son, begin thy work of two things together as I showed thee in the greater Medicines, when we spoke of the two-fold custody of the actions which are caused by the bodies and spirits. Thus far Raymund. By that which is caused by the bodies and Spirits he means nothing else but Sulphur, willing that we should begin with Sulphur, to which I do so well agree that I begin this my accurtation with this Sulphur alone, and I add no other body to this Elixir, but only the Sulphur of Mercury, alone created of his own body and Spirit.

Take, therefore, two ounces of the white Sulphur described at the beginning of this treatise, and set it in ashes to rubify. In thirty days it will be turned into red Sulphur which when you have done, dissolve that Sulphur in the red Tincture of

Mercury; when it is dissolved draw away the Tincture; in the bottom remaineth the Liquor of Sulphur.

To which, if you add a due proportion of the liquor of the red luminary, it will be perfect Ferment, which, if you dissolve and congeal as before is showed, it is then Elixir of very great virtue to the red work, and no man can make a shorter abbreviation in the world; and when the Sulphur of any body is prepared, it may this way very speedily be converted into Elixir by adding the liquor of the Ferment.

Now I will lay down instructions concerning:

1. The Body. 2. The Spirit. 3. The Lion. 4. The Eagle. 5. The Philosophers' Lead. 6. Antimony. 7. Antimony Mercury. 8. The Glue of the Eagle. 9. Solution of the red Lion into Blood. 10. Solution of the Glue of the Eagle. 11. Solution of the Blood of the red Lion. 12. Conjunction. 13. Putrefaction. 14. Fermentation. 15. In the Trinity of the Physical and Alchemical Tincture of the Soul. 16. Is the Unity of the Medicine.

1. Take Antimony, calcined, so much as you please and grind it to a subtile powder; then take twice so much *Lac Virginis* and put your powder of Antimony therein and set it *in Balneo* seven days; then put it into a body and set it in sand or ashes till the *Lac* be turned red, which draw off and pour on more, and so let it stand. When that is coloured red, pour it to the other and thus do till you have drawn out all the Tincture. Set all this water *in Balneo* or lent ashes to distil with a limbeck, and distil it with a lent fire; and first of all the *Lac* will ascend, [and] then you shall see a stupendous miracle because you shall see through the nose of the Limbeck as it were a thousand veins of the liquor of this blessed Mineral to descend in red drops, just like blood, which, when you have got, thou hast a thing whereunto all the treasure in the world is not equal. Now you have the Blood of the Lion according to Rupecissa. I will now speak of the Glue of the Eagle, of which Paracelsus thus saith.

2. Reduce Mercury so far by sublimation till it be a fixed crystal. This is his preparation of Mercury and by his way of reducing it into the Glue of the Eagle; but above all I require that that way be used which is described by me before or that hereafter set down after this.

3. Then, saith the aforesaid author, go on to resolution and coagulation, and I again will give you to observe the same manner of solution showed at first.

4. Now let us come to conjunction. After the solution of these two, take equal weight of them and put them in a vessel well shot²⁰⁰.

5. After you have thus joined them together, set your glass in your furnace to putrefy and after the space of certain days²⁰¹. Therefore Paracelsus saith: Then at length and presently after your Lily²⁰² is made hot in your glass, it appeareth in

wonderful manners (or demonstration) blacker than the Crow. After that, in process of time, whiter than the Swan, and then passing by yellow to be more red than blood.

6. This being putrefied and turned into red, is to be taken for the Medicine, and then it is time to be fermented.

7. Of which fermentation²⁰³ Paracelsus thus speaketh: one part thereof is to be projected upon 1,000 parts of molten Gold and then the Medicine is prepared, and this is the fermentation of it. But if the half or one part of the liquor of the Sulphur of Gold before described be added to it, then it would be spiritual Ferment and would be much more penetrating in fortitude and fusible, as Paracelsus doth testify in his *Aurora*, where he would have us to join the Star of the Sun or the oil of Sol to this Pantarva²⁰⁴. And thus the physical, alchemical Tincture is performed in a short time, for curing all manner of infirmities and human diseases (which is also the Great Elixir for metals so courtly concealed by the ancients) which Hermes Trismegistus the Aegyptian, Osces the Graecian, Haly an Arabian and Albertus Magnus a German, with many others have sought and prosecuted, everyone after his own method, and one in one subject another in another, so much desired by the philosophers only for prolongation of life.

8. In this composition Mercury is made a fixed and dissolved body, the Blood or Spirit of the Red Lion is the Ferment or Soul, and so of trinity is made unity, which is called the physical and alchemical tincture, never before that I know of collected or writ in one work, and I had not done this except that otherwise the composition of this blessed Medicine had been soon forgot.

A Shorter Way To Make The Glue Of The Eagle

If you desire to make the Glue of the Eagle in a briefer way, take part of the red precipitate produced²⁰⁵ as it is taught before in Mercury, and dissolve it in distilled Vinegar and the Vinegar will be coloured into a yellow or delightful golden colour; and after you have distilled away the Vinegar, there will remain in the bottom a white substance of the Mercury fixed and fair, which is to be joined to the oil of the Lion; and this work is much shorter and less laborious.

The Calcination Of Antimony Into The Red Lion

Take Antimony, well ground, so much as you please and melt it in naked fire with Salt Armoniack; and when it is melted, cast it suddenly into a vessel almost full of distilled Vinegar, wherein Salt Armoniack hath been dissolved; and thus melt it and cast it three times. Then pour off the Vinegar from the calx of the Antimony and dry it well and grind it small and dissolve it as before is taught, and so have you the Red Lion of the philosophers' Lead or Antimony.

The Rosie Crucian Medicine Or Elixir Of Copper

I will make plain the 1. Elixir. 2. Conjunction. 3. Separation. 4. The Medicine. 5. Fermentation. 6. The Earth. 7. Spirit Oil, Blood of the Lamb²⁰⁶. 8. Distillation.

9. Resolution. 10. Putrefaction. 11. Solution. 12. Vitriol. 13. Calcination. 14. Copper.

Now many have sought the way of the Mineral Pantarva in Vitriol or green Copperas, but they were altogether deceived, which common Vitriol by the philosophers is called the Green Lion of Fools. But this our noble Red Lion taketh its original from the metallic body of Copper.

Although I am not ignorant how to draw an oil out of Roman Vitriol of a more sweet smell and delightful taste than any balsams if the tincture be taken out of the calcined Vitriol in Spirit of Wine; yet the philosophers' will is to command that it doth consist of a metallic virtue, wherewith the transmutation of metals is to be effected. Therefore they say it is to be made of bodies and not of Spirits, as of Vitriol, Sulphur as well and the like. Whence I find it written in the Philosophers' *Turba*, and in the first exercitation: But the philosophers' Medicine is a metallic matter, converting substances and forms of imperfect metals, and it is concluded by all the philosophers that the conversion is not made except by its like. Therefore it is necessary that the *Presoria* be made of a metallic matter, yet²⁰⁷ if any be made of Spirits; yet it would be better and much more philosophical and more near to a metallic nature to be made of bodies than of Spirits. But if by art the body should be turned into a Spirit, then the same body would be both body and Spirit, and not to be [regarded as] doubled, but the Medicine might be made of such a body or Spirit. But let me return to our purpose. It being granted that this our Vitriol is such a body according to which Paracelsus testifieth in his *Aurora Philosophorum* under this enigma or secret of the ancient philosophers:

Visitabis Interiora Terrae Rectificando Invenies Occultum Lapidem Voram Medicinam.

Out of the first letter of every word of this enigma is gathered this word VITRIOLUM, by which is meant that thereof the Medicine is made.

3. Therefore Paracelsus saith the inward parts of the earth are to be visited; not only the earth, which is Vitriol, but the inward parts of the earth. He meaneth the sweetness and redness, because there lieth hid in the inward parts of the Vitriol a subtile, noble and fragrant juice, a pure oil.

4. And this is especially to be noted: the production of this Copper into Vitriol is not to be done neither by calcination of the fire nor distillation of the matter, lest it be deprived of its grossness, which being lost it wants both power and strength.

5. Paracelsus speaks not one word of the preparation of this Vitriol, by whose silence many have erred; therefore I determined to leave him here a little and to prosecute and follow the order of the Table, wherefore I begin with the calcination of the metal. And note that this calcination of Copper is made that it may be turned into Vitriol, and not the calcination of Vitriol made of Copper.

6. Take therefore as much Copper as you please and dissolve it and calcine it in *Aqua Fortis* to a fair green water; then set it three or four days to digest till the matter be clear, which pour out into a limbeck and *in Balneo* draw away the corrosive water so that the matter remain dry, for then it is calcined.

7. Then upon every two pound of this calcined matter pour a gallon of distilled Vinegar and lute it up in a glass and set it *in Balneo*, almost boiling, the space of seven days, when it is cold put it into a limbeck to distil away all the Vinegar *in Balneo*, and in the bottom of the alembick you shall have your Vitriol very well congealed, far fairer than Roman Vitriol, which is corporeal and metallic Vitriol.

8. Which Vitriol I do not dissolve in rain water like the Paracelsians, but rather with *Lac Virginis* as before is taught, or in Raymund's Calcination Water; and after its dissolution and perfect digestion, that is to say fifteen days, I put it into a limbeck and *[in] Balneo* draw off the *Lac Virginis*, which being done you shall find an oily water, green and clear, upon which pour the Spirit of Wine; and after it hath been digested seven days, and the Spirit of Wine distilled away *in Balneo*, you shall find your green water perfectly rectified, made pure, subtile and spiritual, and fit for putrefaction; for if it be not well dissolved and rarefied it will not putrefy.

9. But now I may join with Paracelsus in the manner of putrefaction, I return to him and say with him, commanding to digest in a warm heat in a glass well closed the space of some months, and so long till divers colours appear and be at length red, which showeth the termination of its putrefaction.

But yet in this process this redness is not sufficiently fixed, but is to be more fully purgated from its feces in this manner.

Resolve it or rectify it in distilled Vinegar till the Vinegar be coloured, then filter it from its feces. This is its true tincture and best resolution and rectification, out of which a blessed oil is to be drawn.

This tincture, being thus resolved and rectified is to be put into a body with a limbeck, and *in Balneo* distil the Vinegar gently away.

10. Then in sand or ashes lift up the Spirit gently and temperately, and when you see a fume ascend into the glass and red drops begin to fall out of the nose of the

limbeck into the receiver, then the red oil beginneth to distil. Continue your distillation till all come over. When it is done you shall have the oil in the receiver lifted up and separated from its earth, more delightful and sweet than any balsam or aromattick, without any sharpness at all, which oil is called the Blood of the Lamb²⁰⁸. In the bottom of the body you shall find a white, shining earth, like snow, which keep well from dust, and so you have the clear earth separated from its oil.

Take this white earth and put it in a glass viol and put thereto equal weight of the oil or Soul and body²⁰⁹, which will receive it and embrace it in a moment²¹⁰.

But that it may be turned into a Medicine when you have joined these two together, set it into our furnace the space of forty days and you shall have an absolute oil of wonderful perfection, wherewith Mercury and other imperfect metals are turned into Gold as Paracelsus was pleased to say²¹¹.

11. The Medicine being thus made, I now come to the fermentation, without which it is not possible to give a form to it; neither will I adhere to the opinion of one man alone contrary to all philosophers, that is to say Paracelsus, repugnant to the rest of the philosophers, because they all of them of necessity have decreed to give form to the Medicine by ferment and union, that is to say of an imperfect body, and by how much the ferment is more spiritual the Medicine will be of so much more penetration and transmutation.

12. These things being promised, I do not think it fit that you should proceed to projection upon Mercury instead of fermentation as Paracelsus teacheth, or that the Pantarva should be fermented his way with Gold, either corporeal or spiritual, which Gold will be the foundation of the first projection.

But what do the philosophers command us to do? That projection, that is to say fermentation, be made of a perfect foundation, and that upon imperfect bodies that Medicine may be made with foundation of the Pantarva or Elixir is not [commanded] except it be only the white or red ferment, in respect of which both Gold and Silver are said to be imperfect bodies. Therefore the Pantarva is to be fermented before it is projected upon the corporeal foundation, or imperfect, that is to say corporeal, Gold.

13. Therefore join this oil to the fourth part of the oil of the Sulphur of Gold, and this is the true fermentation or conversion into the Elixir.

14. Then augment it in virtue by solution and coagulation, and in quantity by projection, first upon its corporeal foundation, that is to say Gold, then that upon purified Mercury and that Medicine upon other bodies which are most fit for projection, that is to say most fusible, as Lead or Tin, which, after they are purified, are most apt by reason of their easy melting.

And thus the inward parts of the earth are visited and by reflection the hidden Medicine is found, the true Medicine out of the Green Lion of the philosophers, and not of fools, and out of corporeal and metallic Vitriol, not terrestrial and mineral Copperas.

The Augmentation And Projection Of The Medicines Of Metals Rosy Crucian

First I will treat of the augmentation of the virtue or quantity of which Raymund saith²¹²: The augmentation in quality and goodness is by solution and coagulation of the tincture, that is to say by imbibing it with our Mercury and drying it. But let us hear Arnoldus more attentively. Take one part of your prepared tincture and dissolve it in three parts of our Mercury; then put it in a glass and seal it up and set it in ashes till it be dry and come to a powder; then open the glass and imbibe it again and dry it again; and the oftener you do thus, so much shall you gain more tincture.

And also as it is found in *Clangor Buccinae*. Dissolve it in the Water of Mercury of which the Medicine was made till it be clear; then congeal it by light decoction and imbibe it with its own oil upon the fire till it flow, by virtue whereof it will be doubled in tincture with all its perfections as you will see in projection, because the weight which was before projected upon a thousand is now to be projected upon ten thousand, and there is no great labour in this multiplication. Again the Medicine is multiplied two manner of ways. By solution of calidity and solution of rarity. By solution of calidity is that you take the Medicine, put [it] in a glass vessel and bury it in our moist fire seven days or more till the Medicine be dissolved into water without any turbulency.

By solution of rarity, is that you take your glass vessel with your Medicine and hang it in a new brass pot full of water that boileth, and close up the mouth of the pot that the Medicine may dissolve in the vapour of the boiling water. But note that the boiling water must not touch the glass therein the Medicine is to hang above it three fingers, and this solution will be in two or three days. After your Medicine is dissolved, take it from the fire to cool, fix and congeal and be hard and dry. This do often, and how much the more the Medicine be dissolved it will be so much more perfect; and such a solution is the sublimation of the Medicine and its virtual sublimation²¹³, which the oftener it is reiterated, so much more abundantly and more parts it tingeth.

Whence Rasis²¹⁴ saith the goodness of the multiplication consisteth in the reiteration and fixation of the Medicine, and by how much more this order is repeated, it worketh so much more and is augmented; for so often as you sublime your Medicine and dissolve it, you shall gain so much every time in projection one upon a thousand; and if the first fall upon a thousand, [the second upon ten thousand] the third upon a hundred thousand, the fourth upon a million and so infinitely. For Morienus the philosopher saith: Know for certain that the oftener our Pantarva is dissolved and congealed, the Spirit and Soul is joined more to the body and is retained by it, and in every time the tincture is multiplied. Whence we thus read in *Scala Philosophorum* [that] which also the philosophers say. Dissolve and congeal. So without doubt is understood of the Solution of the body and Soul with the Spirit into water, and congelation makes the Soul and Spirit mix with the body; and if with one solution and simple coagulation the Soul and Spirit would be perfectly joined to the body, the philosophers would not say

dissolve again and congeal and again dissolve and congeal, that the tincture of the Pantarva may grow if it could be done with one congelation only.

The Medicine is another way multiplied by fermentation; and the ferment to the white is pure Silver and the ferment to the red is pure Gold. Therefore project one part of the Medicine upon two of the ferment (but I say three parts of the Medicine upon one of the ferment) and all will be Medicine, which put in a glass upon the fire and close it so that no air go in nor out, and keep it there till it be subtiliated as you did with the first Medicine, and one part of the second Medicine will have as much virtue as one part of the first Medicine had. (But here again *Clangor Buccinae* hath erred, for it should be writ thus: One part of the second Medicine will have as much virtue as ten parts of the first Medicine had.) And thus by solution and fermentation the Medicine may be multiplied infinitely.

We have spoken enough of this multiplication; we now come to the other way of augmentation, which is called corporeal multiplication, and according to Raymund is thus defined: Augmentation is the addition of quantity; whence Avicen writeth: It is hard to project upon a million and to predicate it incontinently. Wherefore I will reveal one great secret unto you; one part is to be mixed with a thousand parts of its nearest in kind (I call that nearest that is the body of the same metal whereof the Medicine was made or perfected). But to return again to Avicen: Close all this firmly in a fit vessel and set it in a furnace of fusion three days till it be wholly joined together, and the manner of the work is thus projected, one part of the aforesaid Medicine upon a hundred parts of molten Gold, and it makes it brittle and will all be Medicine, whereof one part projected on a hundred of any molten metal converteth it to pure Gold; and if you project it upon Silver in like manner, it converteth all bodies into Silver.

In *Scala Philosophorum* all sorts of projection is set thus down in few words. You must know that first it is said project, that is one upon one hundred etc. Yet it is better to project *nunc dimittis* upon *fundamenta* and *fundamenta* upon *verba mea* and *verba mea* upon *diligam te domine* and *diligam te [domine]* upon *attendite*. This brief enigma is thus expounded; it is nothing else but the words and opinion of the former author concealed under the enigma. Therefore let us repeat the words of the enigma or oracle:

*Nunc dimittis super fundamenta,
Fundamenta super verba mea,
Verba mea super diligam te,
Diligam te super attendite.*

These are trifles for the hiding and concealing [of] the perfection of the art, if the expert could be diverted with such simple words, which, though they are at first [obscure] to [the] young artist, yet they are thus explained. We therefore begin with the first sentence.

Nunc dimittis super fundamenta

This is here allegorically taken for the last action almost of the work, which is called the Medicine or Pantarva, which Medicine is to be projected upon the ferment, that is to say upon the oil of Sol or Luna, which are the ferments or foundations of the art in spiritual augmentation (as before was said) upon molten Gold or Silver. And that spiritual ferment converted into Medicine is to be projected upon molten Gold and Silver, which are corporeal ferments in corporeal augmentation and the corporeal fundaments of the art upon Quicksilver.

Fundamenta super verba mea

This is spoken also allegorically, because in the adage it is said words are wind, as if a word were nothing else but the motion of the lips and exaltation of the lungs, which no sooner arise from motion but fly away and are turned into air, so likewise Quicksilver or Mercury goeth out of the bodies of the other metals and is so volatile in the fire or heat as words in the air. And therefore Mercury is likened to words upon which the fundaments are to be projected.

Verba mea (viz. Mercury) super diligam te

That is to say upon other metals which have most affinity with Quicksilver and [are] easy of fusion, as Saturn and Jupiter, that is to say Lead and Tin, which by this concord and love are easily by the penetration and amiableness of the Medicine converted into Medicine. And one part of this Medicine converteth other parts of metals into Gold and Silver according to the force and power of the Elixir; which other metals, because they are the substance of the former bodies whereof the Medicines were made, they are the attendants of these Medicines whereof the philosopher commandeth that *diligam te* be projected upon *attendite*, that the second Medicine, or the last, projected upon metal, especially that whereof the Medicine (that is to say the Pantarva) was made, should turn that metal into Gold or Silver according to the property²¹⁵ and quality of the Medicine.

But to put an end to this projection, take it according to the opinion of Arnoldus, gathered out of his thirty-first chapter: Who willeth to project one part of the Elixir upon one hundred of Mercury purged, and all will be Medicine, afterwards project one part of this Medicine last congealed upon one hundred parts of Mercury washed, and all will be Gold or Silver according as the Elixir is white or red. Lastly that I may briefly rehearse the absolute manner or projection. First the Medicine is to be projected upon Gold or Silver molten, then upon Quicksilver purged, so long till it turns it into Medicine, and lastly upon metals most near, that they may be converted into pure Gold or Silver according to the properties and quality of the Medicine.

Because we have said something of the propinquity of metals, that is to say that the Elixir is to be projected upon that imperfect body out of which its Mercury and Sulphur was first extracted, therefore it will not be unnecessary to set down one example, that is to say, if the Medicine was made of Mercury, then it is to be

projected upon Quicksilver²¹⁶ for making Gold or Silver, because Quicksilver is a near body to Mercury, and so of the rest. Yet it is to be noted that all Elixirs may and ought to be projected upon Quicksilver, because Quicksilver is the mother and sperm of all metals; therefore Quicksilver made and turned into Medicine is to be projected upon a body most near to it, which is Lead or Tin²¹⁷, upon which the Medicine is always to be projected, whether white or red, for the making and transmuting of metals; but both the Quicksilver and Lead are first to be purged that they may be purified and deprived of their filth. Enough hath been said before of the purgation and putrefaction of Mercury.

Of The Putrefaction Of Lead

Melt your lead in a crucible, and when it is melted let it stand in the fire a quarter of an hour, and put therein a little Salt Armoniack, and let it stand a while in the fire and stir it well with an iron spatula till all the Salt Armoniack be gone away in fume; then scrape the skin away out of the crucible that is upon the Lead and let it stand to cool and it will be much whiter and fairer. And thus you must purify your Lead or Tin before projection, because no other bodies are so fusible and apt to melt. Wherefore every Elixir ought to be projected upon Quicksilver and upon Lead or Tin for [the] making or transmuting of metals. But to the end [that] the manner of projection may be yet more plain, I will set down two rules which must be carefully observed.

The first whereof is that the first Medicine, that is to say the Pantarva, be projected upon the ferment always, three parts of the Medicine upon one of the ferment, and one part of this upon ten or one hundred of pure molten Gold, and one part of this Medicine thus made upon 100 parts of an imperfect body, that is to say of Mercury for Medicine.

The latter is that you must always consider the fortitude and debility of your Medicine, for it is to be projected so often upon Quicksilver as it bringeth it into a brittle Medicine, and when it falleth, then project one part thereof upon Lead or Tin for making transmutation according to the order and form of the Elixir.

These being remembered you may easily conceive the order of augmentation in virtue and quantity.

The[se] things being ended, the other three which follow are set down in order because we have spoken before of *Aurum Potabile*, *Argentum Potabile*, or potable Gold or Silver. It is therefore necessary after we have made an end of projection to set down another method of the Elixir of Life in the next place, and after speak of its virtue and power as we find [it] among all the ancient and modern philosophers.

But that we may come at last to the thing intended²¹⁸, observe this manuduction.

You know that no artificer can build, but the earth must be the foundation to his building; for without this groundwork his brick and mortar cannot stand. In the Creation, when God did build, there was no such place to build upon. I ask then, where did He rest His matter and upon what? Certainly He built and founded Nature upon His own supernatural centre. He is in her and through her and with His Eternal Spirit doth He support heaven and earth, as our bodies are supported with our Spirits. This is confirmed by that oracle of the Apostle, *Omnia portat verbo virtutis suae*, He beareth up all things with the word of His power²¹⁹. From this power is He justly styled, *ap irodunamis cai pantadunamis dunamo paos*²²⁰, The infinitely powerful and the all-powerful power-making power²²¹.

I say, then, that fire²²² and Spirit are the Pillars of Nature, the props on which the whole fabric rests and without which it could not stand one minute. This fire²²³ is the Throne of the Quintessential Light²²⁴, from whence He dilates²²⁵ himself to generation as we see in the effusion of the sunbeams in the great world. In this dilation of the Light consist the joy or pleasure of the Passive Spirit, and in its contraction His melancholy or sorrow. We see in the great body of Nature that in turbulent weather, when the Sun is shut up and clouded, the air is thick and dull and our own Spirits, by secret compassion with the Spirit of the Air, are dull too. On the contrary, in clear, strong sunshine, the air is quick and then the Spirits of all animals are of the same rarified and active temper.

It is plain, then, that our joys and sorrows proceed from the dilation and contraction of our inward Quintessential Light. This is apparent in despairing lovers, who are subject to a certain violent, extraordinary panting of the heart, a timorous trembling of the pulse, which proceeds from the apprehension and fear of the Spirit in relation to his miscarriage. Notwithstanding he desires to be dilated, as it appears by his pulse or sally wherein he doth discharge himself, but his despair checks him again and brings him to a sudden retreat or contraction. Hence it comes to pass that we are subject to sighs, which are occasioned by the sudden pause of the Spirit. For when he stops, the breath stops, but when he loseth himself to an outward motion, we deliver two or three breaths, that have been formerly omitted, in one long expiration, and this we call a sigh.

This passion hath carried many brave men to sad extremities. It is originally occasioned by the Spirit of the Mistress or affected party, for her Spirit ferments or leavens the Spirit of the lover, so that it desires an union as far as Nature will permit. This makes us resent even smiles and frowns like fortunes and misfortunes. Our thoughts are never at home according to that well grounded observation, *Animus est ubi amat, non ubi animat*, the Soul dwells not where she lives but where she loves. We are employed in a continual²²⁶ contemplation of the absent beauty; our very joys and woes are in her power; she can set us to what humour she will²²⁷. This and many more miraculous sympathies proceed from the attractive nature of the fire; it is a Spirit that can do wonders. And now let us see if there be any possibility to come at him. Suppose then we should dilapidate or discompose some artificial building stone by stone; there is no

question but we come at last to the earth whereupon it is founded. It is just so in Magick; if we open any natural body and separate all the parts thereof one from another²²⁸, we shall come at last to the fire²²⁹, which is the candle and secret Light of God. We shall know the Hidden Intelligence and see the Inexpressible Face, which gives the outward figure to the body. This is the syllogism we should look after, for he that hath once passed the Aquaster enter the fireworld, and sees what is both invisible and incredible to the common man²³⁰. He shall discover to the eye the miraculous conspiracy between the fire and the Sun. He shall know the secret love of the heaven and earth and the sense of that deep Cabalism, *Non est planta hic inferiora cui non est stella firmamento superius, et ferit eam stella, et dicit ei: Cresce*. There is not an herb here below, but he hath a star in heaven above, and the star strikes him with her beams and says to him: Grow. He shall know how the fire-Spirit hath his root in the spiritual fire-earth and received from it a secret influx upon which he feeds as herbs feed on that juice and liquor which they receive at their roots from this common earth. This is it which our Saviour tells us, Man lives not by bread alone, but by every word that comes out of the mouth of God²³¹. He meant not by ink and paper or the dead letter. It is a mystery, and St. Paul hath partly expounded it. He tells the Arthenians that God made man to the end that he should seek the Lord if haply he might feel after Him and find Him²³². Here is a strange expression you will say, that a man should feel after God and seek Him with his hands. But he goes on and tells you where you shall find Him. He is not far (saith he) from every one of us, in Him we live and move and have our being²³³. For the better understanding of this place I wish you to read Paracelsus, his *Philosophia ad Athenienses*²³⁴. Again, he that enters the centre shall know why all influx of fire descends against the nature of fire, and comes from heaven downwards. He shall also know why the same fire, having found a body, ascends again towards heaven and goes upwards²³⁵.

To conclude, I say the grand, supreme Mystery of Magic is to multiply²³⁶ the fire and place him in the most serene²³⁷ Aether, which God hath purposely created to qualify the fire. For I would have thee know that this Spirit²³⁸ may be so chafed, and that in most temperate bodies, as to undo thee upon a sudden. This thou mayest guess thyself by the Crnsoceraunos, or Thundering Gold²³⁹ as the chemist calls it. Place him as God hath placed the stars in the condensed Aether of His Chaos, for there he will shine, not burn; he will be vital and calm, not furious and choleric. This, I confess, transcends the common people.

Now I will teach the blessed Pantarva Rosie Crucian, their *Aurum Potabile* or the Elixir of life and also the way of making malleable glass.

1. Elixir of Life. 2. Gold dissolved. 3. Silver dissolved. 4. Gold melted.
5. Melted Silver. 6. Projection of the Red Medicine. 7. Projection of the White Medicine.

I have now fully discovered to you the principles of our Chaos²⁴⁰. In the next place I will show you how you are to use them. You must unite them to a new life and they will be regenerated by water and the Spirit. These two are in all things; they are placed [there] by God Himself according to that speech of Trismegistus: *Unumquodque habet in se semen sua regenerationis*²⁴¹. Proceed then patiently but not manually. The work is performed by an invisible artist, for there is a secret incubation of the Spirit of God upon Nature. You must only see that the outward heat fails not, but with the subject itself you have no more to do than the mother hath with the child that is in her womb. The two former principles perform all; the Spirit makes use of the water to purge and wash his body, and he will bring it at last to a celestial, immortal constitution. Do not thou think this is impossible. Remember that in the incarnation of Christ Jesus the *quaternarius*, or four elements as men call them, were united to their Eternal Unity and *Ternarius*²⁴².

Three and four make seven. This septenary is the true Sabbaoth, the rest into which the creature shall enter. This is the best and greatest manuduction that I can give you. In a word, salvation itself is nothing else but transmutation²⁴³. Behold (saith the Apostle) I show you a Mystery: we shall not all die, but we shall be changed in a moment, in the twinkling of an eye, at the sound of the last Trumpet²⁴⁴. God of His great mercy prepare us for it, that from hard, stubborn flints of this world, we may prove crysolites and jaspers in the new, eternal foundation, that we may ascend from this present distressed Church, which is in captivity with her children, to the free Jerusalem from above, which is the mother of us all.

Hermes, speaking of fermentation, bids us to take the Sun and his shadow²⁴⁵. By the shadow he meaneth the Moon, because in respect of dignity, lustre and power she is much more weak and inferior than the Sun. And the Moon followeth the Sun as a shadow doth the body, and is not illuminated except by the light of the Sun. We will first speak of the body, that is to say of Gold, and after come to the shadow, of which Gold it is written in a book of chemical art in this manner: The Rosie Crucian Pantarva is made of Gold alone and only by Nature, and is more sublime than them which the philosophers affirm cureth all infirmities. According to the opinion of this philosopher, I purpose to begin with Gold alone and the Medicine, which is a new and sole nature and ancient and sound Quintessence.

2. But to the end this Gold may be better and more pure, it may be purged two manner of ways, that is to say by Antimony and by dissolution and in corrosive waters with which copper plates are mixed as goldsmiths used to do, which is called Water Gold. When you have thus prepared your gold, project one part of your Red Medicine (or Red Elixir) upon 100 parts thereof, when your Medicine is augmented in virtue and all that weight of molten Gold will be converted into a red, brittle mass, which grind upon a marble to an impalpable powder.

Then dissolve these hundred parts, or so thereof as you please, in distilled Vinegar or in Spirit of Wine, and set it to digest *in Balneo* the space of a day or two. Then distil the Spirit of Wine *in Balneo* and in the bottom will remain the fixed and pure oil of the Gold, which is then true *Aurum Potabile* and spiritual Elixir of Life. If you will give to anyone of this powder presently before it be converted into oil, warm a little white or Rhenish wine and dissolve in either or them so much of the red powder, and the wine so tintured it will be *Aurum Potabile*, but it would be better and more penetrating if it were tintured with the aforesaid oil²⁴⁶.

In like manner is the White Medicine to be projected after the purification of the Silver in a corrosive water as is before declared.

And so the melted Silver will be converted into a brittle powder and white mass, which likewise is to be dissolved and turned into oil, and then the white Elixir or Life is made and potable Silver, curing and healing, so far as it is able in human diseases, for it cannot be supposed that the Elixir of Luna hath so great virtue as the Elixir of Sol hath, or *Aurum Potabile*.

Now whereas among the vulgar and [also the] philosophers Gold hath this report, that being in his first disposition that it cureth the leprosy and [hath] many other virtues, this is not except by²⁴⁷ its complete digestion, because the excellency of the fire acting in it consumeth all evil humours that are in sick bodies as well in hot as cold causes. But Silver cannot do this because it hath not so much superfluity of fire and is not so much digested and decocted with natural maturity; yet notwithstanding this, it hath a fieriness occultly and virtually in it, but not so fully, because the fire causeth not such elemental qualities as in Gold. And therefore Silver, being in his first disposition, doth not cure leprosy so potently unless it be first digested by art until it have the chief degrees of Gold in all maturity. Wherefore other sick metallic bodies more weakly cure infirmities according as they differ more from them²⁴⁸ in perfection and maturity. Some differ more, some less, which is by reason of the Sulphur, infected and burning, of which they were made at the beginning in their generation and coagulation, and therefore they cure not, whereas the fire in them is burning, and so infected with the elemental feces [and] the mixtures of other elemental qualities.

4.²⁴⁹ Seeing, therefore, that Gold is of such vigour amongst the vulgar, and that being in his first disposition, what wonder is it if it, being brought into Medicine (as is experienced) by art and his virtue be[ing] subtiliated by digestion of decoction and purgation of the qualities, but it may then cure more, nay infinite, of all diseases.

It makes an old man young, as our Rosie Crucian *Aurum Potabile* will do; it preserveth health, strengtheneth nature and expelleth all sickness of the body. It driveth poison away from the heart, it moisteneth the arteries and, briefly, preserveth the whole body sound. The manner of using this Medicine according to all the philosophers is thus: If you will use to eat of this Medicine, then take the

weight of two Florence ducats of our *Aurum Potabile* and one pound of any confection, and eat of that confection the quantity of one dram in the winter. And if you do thus it driveth away all bodily infirmities from what cause soever they proceed, whether hot or cold, and conserveth the health and youth in a man and maketh an old man young and maketh grey hairs to fall; it also presently cureth leprosy and diseases of phlegm, mundifieth the blood; it sharpeneth the sight and all the senses after a most wonderful manner, above all the medicines of the Philosophers.

5. To which purpose we thus find in the *Rosary* of the philosophers. In this (that is to say in this *Aurum Potabile*) is completed the precious gift of God, which is the Arcanum of all sciences in the world and the incomparable treasure (for as Plato saith) he that hath the gift of God hath the dominion of the world (that is to say of the Microcosm) because he attaineth to the end of riches and hath broke the bonds of Nature, not only for that he hath power to convert all imperfect metals into pure medicine and²⁵⁰ preserve both man and animal in perfect health.

To this purpose speaketh Geberhim, Hermes, Arnoldus, Raymundus Lullius, Ripley, Senotus, Augurellus, Aegidius, Valescus, Roger Bacon, Scotus, Laurentius, Venture and divers uncertain authors.

Lastly, I now come to the general consent of all the philosophers and repeat what is found in their writings in the book *De Aurora Consurgens*²⁵¹ and in *Clangor Buccinae*. It is to be noted that the ancient philosophers have found four principal effects or virtues in the glorious repository of their treasure:

- (1) First it is said to cure man's body of all infirmities.
- (2) To cure imperfect metals.
- (3) Thirdly to transmute base stones into precious gems.
- (4) To make glass malleable.

6. Of the first. All philosophers have consented that when the Elixir is perfectly rubified, it doth not only work miracles in solid bodies, but also in man's body, of which there is no doubt; for being taken inwardly it cureth all infirmities. It cureth outwardly by unction. The philosophers also say if it be given to any in water or wine first warmed, it cureth them of the Phrensy, Dropsy and Leprosy and all kinds of fevers are cured by the Tincture, and [it] taketh away whatsoever is in a weak stomach; it bindeth and consumeth the flux of peccant humours being taken fasting; it driveth away the melancholy and sadness of the mind; it cureth the infirmities of the eyes and dryeth up their moisture and blearedness; it helpeth the purblind, red or bloodshot eyes and all other incident diseases are easily cured by the philosophical Medicine of the Rosie Crucians.

It comforteth the heart and spiritual parts by taking [it] inwardly; it mitigateth the pain of the head by anointing the temples therewith; maketh the deaf to hear and succoureth all pains of the ears; it rectifieth the contracted nerves by unction; it

restoreth rotten teeth by washing; also all kinds of imposthumes²⁵² are cured by it, by ointments or emplaisters or injecting the dry powder therein.

It cureth ulcers, wounds, cancers, fistulas, *noli me tangere*²⁵³ and such like diseases, and generateth new flesh. If it be mixed with corrupt and sour lime it restores it; it expelleth poison, being taken inwardly; it also killeth worms if it be given in powder; it taketh away wrinkles and spots in the face by anointing therewith and maketh the face seem young; it helpeth women in travail being taken inwardly, and bringeth out the dead child by emplaister. It provokes urine and helpeth generation. It preventeth drunkenness, helpeth memory and augmenteth the radical moisture; it strengtheneth nature and also administereth many other good things to the body.

2. Of the second²⁵⁴ it is written that it transmuteth all imperfect metals in colour, substance, lasting, weight, ductibility, melting, hardness and softness.

3. Of the third, that is to say of transmuting base and ignoble stones into precious.

4. Of the fourth it is writ that it maketh glass malleable by mixture (that is to say, of the powder of the white corporeal Elixir) when the glass is melted.

Thus far *Aurora Consurgens* and *Clangor Buccinae*.

Now if you desire to make pure and malleable glass, beware of what glass you make your metal; for you must not take glass of flint, wherewith glass of windows are made, but such as your Venice glass is made of, and that is to be chosen out of the first metal of the glass which hath stood molten in the fire in the glass-maker's furnace the space of a night, and then it will be spots and pure. Therefore take as much of the said glass out of the furnace with your iron rod as you have a desire to convert, and when it is cold weigh it and melt it by itself in a pot; and when it is molten, project your white corporeal Elixir upon it and it will be converted into malleable metal and fit and apt glass for all goldsmith's operations. And thus is glass made malleable and prepared for any use; but if this were done with the red Elixir it would be much more during, for there is nothing more precious.

To perfect the Great Work which all philosophers have concealed, observe my direction which by experience I have found true. To calcine, dissolve and separate the elements. After join them together, putrefy them or reduce them into Sulphur; ferment, project, augment in virtue and quantity. This is the work of the philosophers.

This subject²⁵⁵ I call *Limus Coelestis*²⁵⁶ and the Middle Nature. The philosophers call it the venerable nature, but amongst all pretenders I have not yet found one that could tell me why. This chaos hath in it the four elements, which of

themselves are contrary natures, but the wisdom of God hath so placed them with their very order reconciles them.

For example air and earth are adverseries, for one is hot and moist, the other cold and dry. Now to reconcile these two God placed the water between them, which is a middle nature, or of a mean complexion between both extremes. For she is cold and moist, and as she is cold she partakes of the nature of the earth, which is cold and dry; but as she is moist she partakes of the nature of air which is hot and moist. Hence it is that the air and earth, which are contraries in themselves, agree and embrace one another in water, as in a middle nature, which is proportionate to them both and tempers their extremities.

But verily this *sa/vo* makes not up the breach; for though the water reconcileth the two elements. like a friendly third, yet she herself fights with a fourth, namely with the fire. For the fire is hot and dry, but the water is cold and moist, which are contraries.

To prevent distemper of the two, God placed the air between them, which is a substance hot and moist; and as it is hot it agrees with the fire, which is hot and dry; but as it is moist it agrees with the water which is cold and moist, so that by mediation of the air the other two extremes, namely fire and water, are made friends and reconciled. Thus you see, as I told you at first, that contrary elements are united by that order and texture wherein the wise God hath placed them. Now I tell you that this agreement of friendship is but partial, a very weak love, cold and skittish; for whereas those principles agree in one quality, they differ in two as you may easily compute. Much need, therefore, have they of a more strong and powerful²⁵⁷ mediator to confirm and preserve their weak unity; for upon it depends the very eternity and incorruption of the creature²⁵⁸. This blessed cement and balsam is the Spirit of the Living God, which some ignorant scribblers have called Quintessence, for this very Spirit is in the Chaos, and, to speak plainly, the fire is²⁵⁹ His Throne²⁶⁰, for in the fire is He seated. This was the reason why the Magi called the First Matter their Venerable Nature and their Blessed Stone. This Blessed Spirit fortifies and perfects that weak disposition which the elements already have to union and pace (for God works with Nature and not against her) and brings them at last to a beauteous, specifical fabric. Now if you will ask me, where is the Soul, or as the schoolmen abuse her, the form, all this while? What doth she do? To this I answer that she is all instrumentals ought to be, subject and obedient to the will of God, expecting the perfection of the body. For it is God that united her to the body and the body to her.

Soul and body are the works of God, the one as well as the other. The Soul is not the artificer of the house, for that which can make a body can also repair it, and hinder death; but the Soul cannot do this, it is the power and wisdom of God. In a word, to say that the Soul formed the body, because she is in the body is to say that the jewel made the cabinet or that the Sun made the world and cherisheth

every part thereof. Learn, therefore, to distinguish between Agents and their instruments, for if you attribute that to the creature which belongs to the Creator, you bring yourselves in danger of hell fire, for God is a jealous God and will not give the glory to another.

If thou dost know the First Matter, know also for certain thou hast discovered the Sanctuary of Nature. There is nothing between thee and her treasures but the door; that indeed must be opened. If thy desire lead thee on to the practice, consider well with thyself what manner of man thou art, and what it is that thou wouldst do; for it is no small matter. Thou hast resolved with thyself to be a co-operator with the Spirit of the Living God and to minister to Him in His work of generation. Have a care, therefore, that thou dost not hinder His work; for if thy heat exceeds the natural proportion, thou hast stirred the wrath of the moist natures and they will stand up against the central fire and [the central fire] against them and there will be a terrible division in the Chaos; but the sweet Spirit of Peace, the true eternal Quintessence, will depart from the elements leaving both them and thee to confusion; neither will He apply Himself to the Matter as long as it is in thy violent, destroying hands.

I will now lay down plain instructions concerning:

1. The Elixir of Saturn. 2. Putrefaction into Sulphur. 3. The Oil, of the Sulphur.
4. Of the Conjunction. 5. Of the Salt. 6. Of Oil of the Spirit. 7. Of Salt of Saturn, which containeth the Oil or Soul of the *Menstruum*. 8. Of White Mercury.
9. Of Red Water of Paradise. 10. Resolution. 11. Solution. 12. Distillation. 13. Hyle. 14. Purgation. 15. Resolution. 16. Of Sericon. 17. Of the Gum.
18. Of Sericon. 19. Of the Solution. 20. Of Minium Or[e]. 21. Adrop.
22. Of Calcination. 23. Of Minium. 24. Adrop. 25. Of Red Lead.
26. Of Calcination of Lead. 27. Of *Aqua Fortis*.

Now²⁶¹ see which way the philosophers move. They commend their secret water and I admire the tears of *Beata Pulchra*²⁶². I will tell you truly what she is; she is not any known water whatsoever, but a secret spermatic moisture, or rather the Venus, that yields that moisture. Therefore do not you imagine that she is any crude, phlegmatic, thin water, for she is a fat, thick, slimy humidity. But lest ye should think I am grown jealous and would not trust you with my mistress, Arnoldus de Villa Nova shall speak for me. Hear him. *Amplius tibi dico, quod nullo modo invenire potuimus, nec similiter invenire potuerunt philosophi, aliquam rem perseverantem videmus de facili evaporare, arida remanet, et ideo separantur, quia non sunt naturales. Si autem eas humiditates consideremus, quae difficulter separantur ab his quae sunt naturales, non invenimus aliquas nisi unctuosas et vi scosas*. I tell thee further (saith he) that we could not possibly find, neither could the philosophers find before us, anything that would persist in the fire, but only the unctuous humidity. A watery humidity, we see, will easily vapour away, and the earth remain behind, and the parts are, therefore, separated, because their composition is not natural. But if we consider those

humidities which are hardly separated from those parts which are natural to them, we find not any such but the unctuous, viscous humidities.

This viscous humidity²⁶³ is Water of Silver, which some have called Water of the Moon; but it is Mercury of the Sun and partly of Saturn, for it is extracted from these three metals and without them it can never be made²⁶⁴.

Very many have written of Saturn or Lead, but none that I know of have written fully thereof in any particular treatise. Therefore I do not only here set down what I have gathered from them most briefly and truly, but also those things which I have found and proved by my own experience, which I have annexed to them that the work may be absolute and complete.

Of which, as they say, Mary the prophetess, the sister of Moses, in her *Books of the Work of Saturn* is said to write: Make your water running like the water of the two Zaibeth²⁶⁵ and fix it upon the Heart of Saturn. And in another place: Marry the Gum with the true Matrimonial Gum and you shall make it like running water; of which process of Mary, George Ripley hath these verses:

*Maria mira sonat
Quae nobis talia donat
Gummis cum binis
Fugitivem fugit in imis
Horis in trinis
Tria vinclet fortia finis
Filia plutonis
Confortia jungit Amoris*

The Heart of Saturn, you shall find why is his body white and clear; the work is briefly thus described. That a water be made out of the body of Saturn like the water Zaibeth, and that water fixed upon the Heart of Saturn. The direction for drawing out the water of Zaibeth and the way of making the Heart of Saturn is hereafter at large declared, with reduction of the body of Saturn into his Heart or Salt.

Note the power of Saturn and his Angel upon earth, Cambiel, Hanael, Cancer, Tristitia, and Lead thus prepared for Medicines and Telesmas. You see here the wonderful power of God, how he rules heaven and earth by ten names, ten Sephiroth, ten orders of blessed Souls, ten Angels in their ten Spheres, seven Angels that carry their power to seven planets and the earth; and here we teach you knowledge of the seven metals and the miraculous Medicines of the Rosie Crucians.

Having thus described the work, I now come to the explanation and say that the calcination of the body is two-fold, for the calcination thereof in the shorter work for extracting the Heart of Saturn is done on any wise by *Aqua Fortis*.

Take eight or ten ounces of Lead in filings and dissolve it in *Aqua Fortis* in double proportion and justified with Salt Armoniack in an earthen vessel with a narrow neck and set in ashes till it be totally dissolved; and there will remain a white matter in the bottom like grains of white Salt, which is a figure of perfect solution. Then pour your matter that is dissolved in the water into a body and set thereon a limbeck and *in Balneo*, draw away the corrosive water till there remain a dry substance in the bottom, and so you have the body converted white by calcination with corrosive water out of which the Heart of Saturn is to be drawn.

7. The way to wash away and purge the corrosive water from the body. Pour warm water upon the substance in the limbeck and pour it often off till it have no sharpness at all upon the tongue and then the body is prepared for drawing out the Salt.

8. When your matter is well dried, dissolve it again in distilled Vinegar and distil the Vinegar twice or thrice from it and in the bottom you shall have a lucid, clear and white, shining Salt, which is called the Heart of Saturn.

9. Now I come to the practice of the other greater work, that the verity of the Medicine may be found, of which many have made mention in their books, as Raimundus, who called it the Vegetable, Mineral and Animal Medicine. Geber saith there groweth a Saturnian Herb on the top of a hill or mountain, whose blood, if it be extracted, cureth all infirmities²⁶⁶.

10. Ripley writ a whole book called his *Practical Compendium*, of the practice of the Vegetable Medicine, teaching the manner and form of operation; but because he neither set down the solution plainly nor perfectly, he hath been the cause of much error and hath not only deceived me, but all those that followed him, until after a long time I found a way to dissolve Saturn, so that it could never after by distillation be turned into Lead again, which is the choicest and greatest secret of the Vegetable Medicine.

11. But let us hear the words of Mary the prophetess and Ripley taken from her: The Radix of our Matter is a clear and white body, which putrefieth not but congealeth²⁶⁷ Mercury or Quicksilver with its odour, makes its water like the running water of the two Zabieth (or Zubech) and fix[eth] it upon the fixed Heart of Saturn. Which words do most aptly agree with the properties of Lead, for if anyone be shot or wounded with a bullet and the bullet remain in the body, it will never putrefy.

12. And also if Quicksilver be hanged in a pot over the fume of molten Lead, so as the fumes of the Lead touch the Quicksilver, it will congeal it.

13. Thus far of the preparation of Lead. We now come to its denomination. They bid us fix the water [of] Zabieth upon the fixed body of the Heart of Saturn. Now for the exposition of the body for the name of Saturn. Ripley called it Adrop²⁶⁸, of which that is made which the Masters call Sericon²⁶⁹, the water of Sericon they

call their *Menstruum*. The two Zabrieths joined together in one water²⁷⁰ are the two Mercuries, that is to say white and red, contained in one *Menstruum*, that is to say of the water and oil of the fixed body or Heart of Saturn.

14. Isaacus also writ a treatise of Lead. He worketh chiefly according to the doctrine of Mary the prophetess and laboureth much to fix the earth of Saturn and after to dissolve the body in distilled Vinegar, that by the addition of corroding the sharp things his red oil may be distilled, which he called the Water of Paradise, that he may imbibe his fixed earth therewith: which way is much shorter than Ripley's, but the rubification and fixation of the earth is long and uncertain; wherefore I have both forsaken Isaacus and Ripley in making the earth, instead of which I have given the fixed Heart of Saturn.

15. But that the body may be prepared according to this Table and after my intention and the desire of Ripley, we both will that the pil or Water of Paradise be drawn out of the Gum of Sericon (whose father is Adrop). Sericon is made of red Lead; therefore it is first necessary to show the way of making Minium of Lead. Take the description as followeth and therewith the composition of the Gum of Sericon.

16. Take ten or twelve pounds of Lead and melt it in a great iron vessel as plumbers use to do; and when it is molten, stir it still with an iron spatula till the Lead be turned to powder, which powder will be of a green colour. When you see it thus, take it from the fire and let it get cool and grind that powder upon a marble till it be impalpable, moistening the powder with a little common Vinegar till it be like thick honey, which put into a broad earthen vessel and set it on a trevet over a lent fire to vapour away the Vinegar and dry the powder and it will be of a yellow colour. Grind it again and do as before, till the powder be so red as red Lead, which is called Adrop. And thus is Saturn calcined into red Lead or Minium.

17. Take a pound of red Lead and dissolve it in a gallon of Vinegar and stir it with a stick three or four times in a day. Then take your earthen vessel and set it *in Balneo* twenty-four hours then let it cool and filter the liquor three times; and when it is clear put it in a bottom [and distil away the Vinegar when] the Gum of Sericon will remain like thick honey; which set apart and dissolve now more Lead as before for more Gum till you have ten or twelve pound thereof.

18. Now give careful attention, for we now come to the point and period of Ripley's error; for if you put four pounds of this Sericon to distil in a limbeck, and from thence would draw a *Menstruum* as Ripley teacheth, perhaps you would have scarce one ounce of this oil, and some part of a black earth will remain in the bottom and most of the Gum melted again into Lead, by which you may know that the Sericon is not well dissolved, nor as yet sufficiently prepared that a Chaos may be made thereof fit for distillation because it is not yet well dissolved. Therefore in Isaacus there is found a way, resolving this Gum with distilled Vinegar acuated with calcined Tartar and Salt Armoniack; wherefore, saith he, if

thou be wise resolve the Gum. But I like not this acuation of the Vinegar as I may call it. I rather choose to resolve the Sericon in Raymund's Calcination Water, which is a compound water of Vegetable Mercury, or fire natural, with the fire against nature, as Ripley testifieth; and it is more verified by Raymund in his books of Mercury, where he teacheth how to dissolve bodies with his Calcivative Water.

19. I will reveal unto you this water, which is almost unknown. Note, therefore, that the Vegetable Mercury is the Spirit of Wine (instead of which we may sometimes use distilled Vinegar) and that the Fire against Nature is a corrosive water made of Vitriol and Saltpeter.

20. Therefore take which you will, either Spirit of Wine rectified (or *Aqua Vitae*) or distilled Vinegar four pounds and two pounds of corrosive water and mix them together.

In this water thus compounded, resolve half a pound of Gum of Sericon in a circulatory and set it *in Balneo* four or five days, and the Gum will be totally dissolved into the form of water or oil of a duskish red colour.

21. Then distil away the water *in Balneo* and there will remain an oil in the bottom which is the Chaos out of which you may draw a *Menstruum* containing two elements, and this is the true resolution of the Gum of Sericon. In this water you may resolve so much Gum as you please by reiteration.

22. Take two pound of this Chathodical substance and prepare it for distillation in naked fire or sand, and lift up the clear red oil, wherein both the Spirit and Soul secretly lie hid, which Isaacus calleth the Water of Paradise, which, when you have [it], you may rejoice, for you have gone through all the gross work and come to the philosophic work.

Therefore proceed to conjunction and join the white Heart of Saturn with the red oil as it is found in the *Rosary, candida succinto jacet uxor nupta marits*, that is to say the red Mercury to the Salt if you proceed to the red work.

23. Therefore take four ounces of the Salt or Heart of Saturn and as much of the red oil or Water of Paradise, and seal them up in a philosophers' egg; and so soon as they shall feel the heat of the *Balneum*, the Salt will dissolve and be made one with the oil so as you shall not know which was the Salt nor which was the oil.

Set your glass *in Balneo* and there let it stand in an equal degree of fire till all your matter be turned white and stick to the sides of the glass and shine like fishes eyes²⁷¹ and then it is white Sulphur of Nature. But if you proceed to the red work, then divide your white Sulphur into equal parts, reserving one part for the white work, and go on with the other part, and in a new glass, well sealed up, set it in ashes till it is turned into a red colour.

24. When your Sulphur is thus converted, imbibe it again with equal weight of its Soul, dissolving and congealing till it remain in an oil and it will congeal no more, but remain fixed and flowing.

This then is to be fermented with the fourth part of the Oil of Gold.

We have set down already before of the augmentation in quantity and quality, therefore it is not necessary to repeat it here.

We will now return to the white Sulphur before reserved, that we may set down the manner of the white work.

When you have your red oil or Soul, if you desire to make the white Elixir, set part of the said oil in a glass *in Balneo* to digest. Then take it out and put it into a body and in a lent fire distil away the Spirit or white Mercury, which you must try and know whether it arise pure without water or not, as you do when you try the spirit of wine. For if it burn all up it is well; if it do not, rectify it so often till it be without any waterings at all; then have you rectified your Spirit, wherewith dissolve your white Sulphur till it remain fixed and flowing as you did before in the red work. Then ferment it and augment it with the fourth part of the oil of the white Luminary or Luna, as you did the red, and it will be the white Elixir, converting imperfect bodies into perfect Silver.

25. Ripley divided the scope of this work into four operations, whereof the first is the dissolution of the body; the second the extraction of the *Menstruum* and the separation of the elements; the third is not necessary in our work, because we cast away the earth after every distillation, instead of which we use our Salt or Heart of Saturn; the fourth is that there be a conjunction of our Salt as is before described.

Here Followeth The Accurtation Of The Work Of Saturn

The way of extracting Quicksilver out of Saturn found in Isaacus, of which I know how to make a special accurtation with his Water of Paradise, which I gathered partly from the aforesaid writer and others. Ripley made his accurtation with Quicksilver precipitated with Gold and imbibition with corrosive water, which I like not, because the Elixir so made will be the greatest poison, as himself confesseth that it were better for a man to eat the eyes of a Basilisk than taste that Elixir.

26. But because I desire to set down this accurtation of Lead alone with his elements, that no strange body may be added to our Elixir, and also that it may be made a Medicine for all uses, I have found out the way of making [it] alone with the Mercury of Saturn and his own proper Tincture; for I make a body of one thing, which is a Spirit, and make that Medicine with its own proper Spirit. Read all the philosophers and you shall never find a word of this process, nor none of the ancients will teach how to make the Mercury of Saturn.

Of the Medicine, Elixir, Fermentation, Imbibition, Precipitation, Quicksilver, Saturn, Lead, The Toad

Sir Christopher Heydon saith in a manuscript of his; *Levi enim arte norunt Alchemistae Mercurium currentem conficere ex plumbo*. The Alchemists know how by an easy art to make current Mercury out of Lead. But what art that was no author of the ancients hath showed unto us. *Quaevite, quaevite*, saith the first alchemist²⁷² (so Paracelsus was pleased to say in imitation of him) *et invenietis, pulsate et operietur vobis*. I tried many experiments, although they were repugnant to doctrine and philosophy; I almost despaired of that art; yet because nothing is difficult to the industrious, by often knocking at last I found it apart, by which means I attained to the art of such a felicity, that is to say of making Quicksilver of²⁷³ Lead. This art revealed is a great secret. The instruments necessary in this work are²⁷⁴ a furnace, a crucible and a pair of tongs. Let the furnace be filled with coals, whereunto put fire, and when the coals are well burnt, so that they give a clear flame and fire, take your crucible, well annealed so that it break not with the sudden heat, and put therein three ounces of filed Lead, having twelve ounces of Mercury sublimate well ground, and Salt Armoniack six ounces, mixed together, which put upon the filings of Lead in the crucible, and when the fire is strong and glowing hot, take your tongs and presently take up your crucible and put it into the hole in the top of the furnace till you hear a great noise and buzzing; then so soon as you can (lest the Quicksilver fly away with the Spirits) take away the crucible with the matter therein and set it in an earthen dish filled with ashes to cool; and when it is cold, strike the lower part of the crucible so that the matter of the Lead may fall into an earthen dish, and you shall find your Lead converted into Quicksilver.

Take of this Quicksilver so much as you please and put it to precipitate in a round glass, well luted; and set it in ashes to the top of the glass. Yet let us stay here a little while [that] the understanding may be more enlightened.

Therefore understand that the intention of this work is to fix the Spirit, which may sooner be done with the Spirit of a fixed body, which before was homogeneous with the body, and which of its own nature desireth to join again with its body.

Therefore Nature requireth that she may be helped by art in this work, to which the artist consenting, he administereth thereto the pure and desired metal, which it delighteth to adhere unto, which metal is Gold, which is thus prepared that it be sooner parted by the Quicksilver and stick thereunto.

Take as much pure Gold as you please and dissolve it in *Aqua Regis* mixed with equal part of *Acetum acerrimum* or *Lac Virginis*. Then set it to digest the space of a day; then put your dissolution into an alembick and set it *in Balneo*. So distil away the water as dry as you can and do thus three times and the third time distil it in ashes that the Salt Armoniack may sublime. Then put distilled Vinegar upon the matter remaining, and after it hath stood three days *in Balneo*, distil the Vinegar away in ashes that all the substance of the Salt Armoniack may sublime,

and do thus three times, always putting in new Vinegar, until the oil of the dissolved Gold remain in the bottom. Then take of your Quicksilver three times so much as your Gold and pour it upon the solution of the Gold that they may mix together and be united. Then put your Quicksilver with the solution in a round glass, stopped only with a piece of cotton, and with a stick put it down every day as it doth ascend; and keep your glass in ashes for a month till your Quicksilver be turned into a red precipitate. Then again dissolve it in new distilled Vinegar till the whole substance of the Quicksilver be dissolved and the Vinegar be coloured into a golden colour; then distil away the Vinegar in ashes and again precipitate the Quicksilver, which is in the bottom of a gold colour, into a red and fixed body, and so have you the Mercury precipitate of Saturn.

It remaineth now that the body be imbibed with its Soul, that thus being from a Spirit reduced into a body [it] may agin imbibe its Soul that it may be dissolved herewith. Therefore put it into a glass and add thereto equal proportion of its Soul or Water of Paradise, and shut your glass well the space of five days till the body be dissolved with the Soul.

Then dry it in ashes till it penetrate and flow; and when it is dried, try it upon a hot iron plate if it be fixed and melt, if not, imbibe it again with half the weight of its water and do so till you make it fusible and piercing by imbibing and drying. And when it will melt in the fire and penetrate, it is then the Medicine and fit for fermentation. And after the fermentation it will be the Elixir.

Then it is to be augmented and projected as is before declared, and thus the work of Saturn is accurtated, of which George Ripley saith: Adrop is the father of the Medicine, Sericon his brother, Lympha his sister, the earth its mother.

But if you desire to know all the secret of Saturn or Lead, I will set you down one process out of Paracelsus: When you have well prepared the Heart of Saturn, saith he, take two or three ounces of that Heart and grind it small with double [the] weight of Saltpeter and put it in a subliming glass with a head well luted to sublime, increasing the fire by little and little as long as anything will ascend or sublime. Thus far Paracelsus. Now if you would find this true, Ripley will tell you what you shall do in these words.

When by the violence of the fire in the distillation of the Gum of the Sericon, a certain white matter shall ascend sticking to the head of the limbeck, like ice, keep the matter, which hath the property of Sulphur, not burning, and is fit matter for receiving form. You shall give it form after this manner by rectifying it in ashes; and when it is red Sulphur, give it of its Soul until it pierce and flow, then ferment it.

Here I have delivered unto you all the ways and manners of Saturn which are found in any of the philosophers' books. To the end, therefore, that the work may be completed with a demonstration of this word *Plumbum Philosophorum* as

appears in the *Practical Compendium* of Ripley, I say that the philosophers' Lead is not taken for Antimony but for Adrop, being converted into the Gum of Sericon.

The influence of Jupiter and his Angel upon Hismael, Advachiel, Aquisitio, Letitia and Tin, by art and nature fitted for man's use. Jupiter followeth Saturn's steps, for he is the offspring of Saturn and naturally born from him.

presentat Stannum sub quo aliquando Mercurius Sublimatus et Sal Ammoniarum intelligitur. Cineritius ille probus justus Jupiter influentiam suam habet in terrestrem Jovem, qui post preparationem suam, se claro serio suavi cum sale Sulphureque lunari ostentat, et mortalibus virtutes suas presentat. Habet quoque specialem suam influentiam bonus ille Jupiter in Jecur, sanat propterea illud, omnesque affectus qui inde oriuntur.

To Make the Elixir of Iron

Observe in this work 1. Calcination. 2. Solution. 3. Separation. 4. Conjunction. 5. Putrefaction. 6. Sulphur. 7. Fermentation. 8. Elixir.

Mars being most earthly of all the planets or bodies, it is not to be doubted but that it may easily be reduced into a body with little labour and therefore most easily converted into Salt, which is done by Calcination; therefore I will first show his conversion into Salt. Understand therefore that hence ariseth a two-fold consideration, that is to say that it be calcined one way into its body or Salt, the other way that the body be prepared for solution by calcination.

The practice differs but a little, for whether you calcine Iron for its *Salt* or *Menstruum*, one only manner of preparation²⁷⁵ sufficeth.

That is to say, that you take filings of Iron or Steel, as much as you please, and mix these with equal weight of Sulphur in an earthen body with a limbeck well luted thereto; then set it in ashes to sublime till all the Sulphur be sublimed from it; then dissolve the filings which remain in the bottom in *Aqua Regis* and it will be converted into Salt, which will be cleansed from the said water if you put thereon distilled Vinegar and distil it away. Do thus three times with new Vinegar and you shall have a yellowish-red Salt in the bottom which then is a body to be joined to the Soul, which keep in warm ashes till you use it.

Now for the practice of Iron for dissolution. Take filings of Iron or Steel, so much as you please, and put it in an iron dish filled with Vinegar and set it in the flaming fire the space of three hours; then take it out and let it cool. Reiterate this work four or five times, then calcine it with Sulphur as you did before.

When it is thus calcined, set it to dissolve in a corrosive water by adding equal weight of our *Acetum acerrimum*, and let it stand till it have dissolved so much as it can in the cold; then set it in hot ashes and let it stand there the space of four or five days. Pour off the water and dry [that] which is not dissolved, and again

calcine it and dissolve it; and when it is dissolved, so as the water be coloured red, pour it out into a body and keep it till you have dissolved as much calcinated Iron as you please.

Then take²⁷⁶ all your dissolution, and with an alembick distil away the water *in Balneo* and put distilled Vinegar upon the matter remaining in the bottom and let it stand upon it *in Balneo* the space of seven days; then take out your glass and filter the dissolution and then again *in Balneo* distil off the Vinegar and in the bottom will remain a thick oil of Iron or²⁷⁷ Steel. But if it be not dissolved to your mind, reiterate your solution in Raymund's Calcination Water, but it would be better if it were edulcorated²⁷⁸ with *Aqua Vitae*, drawing it away again in *in Balneo*, and so you have Iron dissolved into a liquor.

Therefore proceed to distillation, that there may be a separation, and distil it in an earthen vessel in a strong fire increasing the fire as much as you can and receive the oil or Soul or red tincture of Mars, separated from the remaining feces by the nose of the limbeck, which oil is the most permanent tincture for colouring Sulphur for the red work or for exaltation of all Elixirs in colour, for it makes it tinge and colour higher.

When you have thus prepared the tincture, then proceed to conjunction and work with the Salt before reserved, taking three or four ounces of the Salt and equal weight of the Soul.

Then seal it up and set it to putrefy *in Balneo*, and keep it there till it pass through all colours and be white, and then it is Sulphur of Nature.

The nature of Mars and his Angel upon Barzabel, Malchidael, Barchiel, Puer, Rubeus and Iron, with the mixtion of elements. The Medicine must be made when Mars ascends in Aries or Scorpio in the hour of Mars, Puer projected in the Ascendent.

Then take out your glass and set it in ashes in a greater degree of heat till it be red; then dissolving the red Sulphur with its own Soul and again dissolve and fix it; dissolving it *in Balneo*, fixing it under the fire, and so it is prepared for fermentation.

The fermentation is, as hath often been spoke of before, with the resolved oil of the Sulphur of Gold in a four-fold proportion to the Medicine, that by the addition of the ferment it may be made Elixir transmuting all bodies.

And note that the Elixir of Iron excelleth all other Elixirs, for it rubifieth more and tingeth higher and is better for man's body, for it prevaieth against the spleen, constringeth the belly and cureth wounds; it knitteth broken bones together and stoppeth the superfluous flux of the courses etc.

I Will Now Show The Operation Of The Physical And Alchemical Tincture Of The Red Lion And Glue Of The Eagle

It is chiefly to be remembered how I taught you to dissolve Antimony with our *Acetum acerrimum*, which may be also well done if you dissolve it in our Calcination Water; and after that Antimony is calcined, which hereafter shall be at large treated of, also of the Glue of the Eagle. You must understand that we attribute no other beginning to this accur[t]ation except that where before we took the Blood of the Red Lion and the Glue of the Eagle when they were both destroyed, we now join them sound and not hurt together, that they, living, may mortify and dissolve themselves, which I have fitly called Corporeal Matrimony or the Union, for in this wedlock they die together that they may be vivified in the Celestial Antimony. It is not to be wondered if this [work] differ from the other, for this pertaineth to the handling of Spirits, the other way to teacheth the manner of making the Elixir of bodies.

That I may plainly reveal all things unto you, take Antimony well ground, half a pound, and as much Mercury Sublimate likewise well ground, and grind them both together upon a marble till you cannot know them one from the another; then set them in a cold place that the matter dissolving may drop into a glass set underneath, for when the matters are well mixed together, then [I] say that they will both shortly be dissolved; when the water is perfectly dissolved it will be of a greenish colour and loathsome smell.

Put this water with the thick part within into a glass, and let it stand the space of three days in a fixatory under the fire, and in [a] short time you shall have your dissolvedness of a brownish black colour, and after, that is to say in the aforesaid time, it will be red, something higher than red Lead.

Dissolve this calcined matter in Raymund's Calcivative Water, and when you have dissolved it all into a red liquor, or deep yellow, then is your matter brought well into its Chaos.

Put this liquor into a fit body with an alembick and receiver, and by distillation separate the red oil or the red Mercury from the white body which remaineth in the earth, and if any matter ascend into the head of the alembick, despise it not, but try if it [be] fixed; and if it be not fixed enough, sublime it till it be fixed.

Whereunto join equal weight of its Soul, for the Celestial Matrimony, and always leave out the earth in the bottom if you have any sublimate fixed; if not, take the white earth remaining in the bottom, with which proceed as before is said, and join the white body with the Soul. When they are thus joined or married, set them to impregnate and revivify *in Balneo* till it pass through all colours and at last be converted into red, which then is Medicine.

The manner of fermentation [and] augmentation, both in quantity, quality and projection, is spoken already.

And thus I have opened many choice secrets of the ancient philosophers, and also have amended many things in them. Their writings were rather published to conceal the art than to make it manifest or teach it. Although it pleaseth Hermes Trismegistus, the first writer of this art, both to say and protest that he had never revealed, taught nor prophesied anything of this art to any, except fearing the Day of Judgement or the damnation of his Soul for shunning the danger thereof, even as he received the gift of faith from the Author of faith, so he left it to the faithful. Yet when you read his writings either in his *Smaragdine Tablet* or in his *Apocaled* or his *Twelve Golden Gates* and shall find nothing plain, what shall ye think of such an author? Believe me, all the ancients have concealed the secret of their preparations in the gross work, although they writ most famously of the philosophic operation; therefore I have used my endeavour to try, for out of their writings I found that the Elixir might be made of the planets or metals, and also of mean minerals, which came near to a metallic nature. Then, reading more, I found a certain method amongst them all, as it were with one consent or voice on this wise.

First and principally that bodies should be made incorporeal, that is to say discorporated or discompounded, which then is called Hyle or Chaos. Secondly that out of the Chaodical substance, which is one thing, three elements should be separated and purified.

[Thirdly] that the separated and purified elements should be joined, the man and the woman, the body and the Soul, heaven and earth, with infinite other names so called that the ignorant might think they were divers, which only were nothing else but water and Salt, or the Body and Spirit or Soul, that is to say white Mercury and Red, which they joined together that a new and pure body might be created in putrefaction and a Microcosmical infant might be created in imitation of the Creation, that is to say, Sulphur of Nature²⁷⁹.

Fourthly that it should be fed with Milk, that is to say that its own proper tincture, and after[wards] nourished by fermentation, that it may grow to its perfect strength.

Having learned these I began to practise, and in the practice of every body and Spirit I found divers errors; but reading more and trying more, I at last found the manner and true way of dissolving all bodies, separating and conjoining them, finding the composition of their secret of secrets, that is to say *Lac Virginis* or *Acetum acerrimum*, and Raymund's Calcining Water, wherewith I dissolved all bodies at pleasure and perfected the gross work. Wherefore I purposed, contrary to²⁸⁰ the customs of the philosophers, [to] reveal the whole work lest I, being envious, should be the author of errors like themselves. Therefore I have added their secrets to my own experiments and inventions, which are plainly and truly writ.

Alchemy revealeth and openeth unto us four other secrets.

The first is the Composition of Pearls, far greater and fairer than natural ones, which cannot be perfectly done without the help of the Elixir.

The second is the manner of making precious stones out of ignoble ones, by the same art as we made malleable glass.

The third is the manner of making artificial Carbuncles in imitation of natural ones, which few or none have spoken of.

The fourth is the manner of making Mineral Amber, of which Paracelsus hath only writ in his *Book of Vexations of Philosophers*²⁸¹ and in the last edition of his work in the sixth²⁸² [book of] his Archidoxes; but because they cannot be made without the help of the Elixirs, therefore they deserve a place among the Elixirs, where I shall discover the virtue or rather the vice of making Amber.

**The Operation Of Making Pearls Consisteth
Of These Parts. Viz:**

Lac Virginis
Dissolved Pearls²⁸³
Quicksilver and
The White Elixir.

Take *Lac Virginis* or *Acetum acerrimum*, so much as you think sufficient for dissolving the Pearls, as in double proportion to the Pearls, as if there be three ounces of the Pearls let there be six ounces of *Lac Virginis*, wherein dissolve the Pearls and set the glass *in Balneo* to digest the space of a day. Then pour out the solution and distil it *in Balneo*, and in the bottom of the glass you shall find the thick oil of the Pearls, whereunto add so much of your white corporeal Elixir as sufficeth to make the matter like paste, and put thereto equal weight of the pearls of Quicksilver. If the matter be too thin, put more powder of the Elixir; if it be too thick, add more *Lac Virginis* or Quicksilver, till it be like liver. Grind this mass upon a stone till it be brought to a fit thickness.

Then make it up in what form you please, [and] therefore it is necessary that you have a pair of brass or iron moulds in readiness (but it would be better if they were of silver) of what form you will, and fill them with the matter while it is soft; then pierce them through with a needle or such like thing, and put as many of them in a glass as you will (but first hang them upon a thread) and close well the glass and bury it with the pearls therein two foot under the earth and let it stand there the space of six months till they be congealed with the cold into a shining and clear substance like natural Margarites. These Pearls made and compounded in this manner are no less than natural ones, but much greater and more excellent by reason of the white Elixir.

The Operation Of The Magistry Of Carbuncles

Carbuncles have their birth and origin in the pits and golden mines of the earth, of the Spirit of Gold and mineral Salt, indurated and corporeal, being decocted and digested into the hardness of stone by the Archæus²⁸⁴ of Nature, as well by the heat of the climate as by the great heat of the Sun; for they arise from the Spirit of the *minere* of Sol or Gold under the earth, by whose influence they shine as also from [whom] the[y are] hardened into the nature of the stone; whence the philosopher intendeth and endeavoureth as he can to imitate nature by art and to make and compound artificial Carbuncles above the earth with the same materials which nature formeth them of under the earth; therefore he useth the same principles, operating with the Spirit and Soul of Sol undivided, and the most hard Salt of the earth, whereof Venice glass is made, which two are the material organs. For [the] manual [operation] three things are required, that is to say a glass maker furnace²⁸⁵, a flaming fire and a crucible.

We now come to the materials, which are two and are to be joined together; the first giveth the form, the other receiveth it. That which giveth the form is the Spirit and Soul of Sol or Gold, joined together in the Red Elixir and is the agent and, as it were, the man. That which receiveth the form is the hardest salt of the earth contained in glass, and is the power of heaven impregnating the earth; the patient is the power of the earth retaining the impression of the heaven.

Having thus demonstrated the theory we now lay the foundation[s] of the practice, which are two, whereof the first is the preparation of the Elixir, the other of glass. Therefore your red corporeal Elixir is to dissolved with the oil or tincture of Mars or Iron, because it has the greatest virtue above all other bodies, by whose celestial power the earth, that is to say the glass, is to be brought to the hardness of a stone and converted into stone. And so the Elixir is prepared for projection upon glass; but for the preparation of glass there is no more required but that it be made of the same matter that Venice glass is made of, the composition of which, if ye know not, take as much Venice glass as you please and weigh it exactly, upon which [to] project your Elixir. When you have done so, put your glass in the crucible to melt, and when it is well molten then take your corporeal red Elixir dissolved as before (or if you will, undissolved) as much as sufficeth to tinge the molten glass, and put it tied up in a paper in the glass, stirring it a little with a rod, and there let it stand the space of an hour. Then take out the crucible and pour the matter into an ingot, and it will be malleable but as hard as glass and stone-like to the sight; and you may either cut it like stone or work it with a hammer. This Carbuncle stone or metal hath the property of a Carbuncle in shining and glistening above all natural Carbuncles; and if you touch a Toad or Spider, they presently die, because it taketh virtue from the Elixir against all poisons. And if the sick carry this Carbuncle about with him, so that it doth touch the region of his heart, it taketh away the cardiac passion and diminisheth the strength of the disease.

3. Now the third. I say that I think it rather is of a stony and metallic nature joined together, by which mixture it differs from a stone and also from a metal; but because it consisteth of Mercury, earthly Salt and Sulphur mixed, therefore it gets unto it a mixed nature of them, so that it is half stone, half metal²⁸⁸.

Wherefore it is to be judged that it consisteth of three natures mixed together; that is to say mineral, metallic and stony, and is the best of all those which grow in the Ideas of the earth, for it exceeds mean minerals in fixation and constancy, because they pass away in fume by long melting and vanish to nothing, or else they melt easily in moisture as Salts etc. But this Electrum or²⁸⁹ Amber remaineth fixed and constant as well in the fire as water.

It exceeds metals in digestion, colour and dignity. In digestion because it is endowed with the sign of greater and more perfect digestion. For as gold is more yellow by reason of his greater heat and more perfect digestion, so the Electrum, because it hath a higher colour than Gold hath, therefore it is more digested in colour; for as Gold exceeds other metals in colour, so Electrum exceeds Gold; for Gold is yellow but Electrum is red, which is a higher colour than yellow. And as Silver is the Luna of white metals, so Gold is the Sol of red metals: so Electrum is to Gold as the heaven is to Sol in dignity and value. For by how much more Gold is more noble than Silver, so much this Electrum is more noble than Gold.

Lastly it exceeds stones in shining and virtue; in shining because these shine by reason of their hardness; so this Electrum showeth many sparks²⁹⁰, not by reason of its hardness, but by reason of this completeness. And as the heaven is adorned with stars, so this Electrum [is] with sparkling, because it hath the clearness and brightness of all metals. And as the heaven containeth all the stars and planets, so this Electrum, which is the heaven of metals, containeth the Sun and Moon and the rest of the planets in itself, Gold and Silver as it were the greater luminaries, the other bodies or metals as the rest of the planets, mean minerals as stars in virtue.

For although many stones have singular properties and virtues, so that some help the sight, others the spleen, some the heart, some stop blood, some hinder abortiveness, some hasten childbirth, some resist poison, yet there is no one found which takes away all infirmities, as Electrum does more than all mean minerals, metals or²⁹¹ stones, according to the three-fold conjunction, that is to mineral, metallic and lapifidic²⁹².

Therefore, whatsoever others please to think of this natural Electrum, this seemeth most probable to me, that it is not simply a metal, but of a nature exceeding metal; for whereas stones, mean minerals and metals are generated of Salt, Sulphur and Mercury, this Electrum takes his original from stones, minerals and metals. From stones it takes Salt, from minerals Mercury and from Metals Sulphur²⁹³. These three being brought into one by the Ideas of Nature are

its elements, from a greater virtue and power of nature; which elements have formed a higher degree of perfection than in any other stone, mineral or metal, as it were by the command of God, nature should ascribe a crown of virtue and dignity above all minerals.

But however it be, it is taken two manner of ways among the later Magicians [and] Rosie Crucians, and that is to say, that which is made naturally and [that which is made] artificially. Naturally is that which groweth in the natural Ideas of the earth; the artificial is that which is made by art above the earth in imitation of nature.

Whence Paracelsus, a worthy Master in Magic, seeing fully the nature and the utility of Alchemy, commanding to make the Elixir thereof, when as its natural body cannot anywhere be had, in his *Book of the Vexations of Philosophers*²⁹⁴ and the sixth of his *Magical Archidoxes*²⁹⁵, teacheth to compound an Artificial Electrum that the Elixir must be made thereof, as appears more at large in the said books, which I like not at all. He teacheth how to make the Elixir out of Electrum; I contrarily, the Electrum out of Elixir; he would make the Elixir out of the virtue of the Elixir. I leave his way to his own followers, but I desire mine not to weary and vex themselves in such a weak, but [in] a more strong principle.

I make two kinds of Electrum one way, the first whereof is spiritual, the other corporeal. First of the former. After you have made your red corporeal Elixir by projection, in the same crucible melt one ounce of Lead and likewise another of Tin; and when they are hot, take the crucible from the fire and pass therein one ounce of Silver melted in another crucible. And when these three white metals begin to be cold, take two ounces of Mercury well purged and put these two ounces of Quicksilver upon the molten metal by drops, then increase the fire gently so that too much of the Mercury do not fume away²⁹⁶. Then in three other several crucibles melt Iron, Copper and Gold, of each one ounce, which you must have in readiness molten. And first put your molten Gold into the crucible where your four white metals stand molten, and pour upon them²⁹⁷ the Copper and last of all your Iron, stirring the whole mass with a stick, that is may mix together, and let it stand in a melting heat the space of an hour. Then take all out that it may mix together and let it stand in melting in the crucible and consider well the weight of it and according to the goodness of the Elixir make projection for Medicine. And then you have created and compounded spiritual Electrum of the weight of seven ounces, consisting of seven metals, which metals so converted into Medicine, will be the Elixir of Electrum and an universal Medicine, for you need not after regard upon what body (or metal) you project it. It is also the choicest of Medicine for man's body; for although three or four of all the diseases of the Microcosm were united together, yet they may be cured with this one Medicine. If you dissolve part of this in Spirit of Wine and distil away the same Spirit *in Balneo* and the oil of the Medicine of Elixir²⁹⁸ remain in the bottom, you shall have a most noble Rosie Crucian Medicine of Life.

Note that if your Iron melt not well, then dissolve your Electrum in the oil or tincture of Mars, dissolving and congealing until it have imbibed a sufficient quantity.

But if you desire to make corporeal Electrum, when your Medicine beginneth to fail to convert metals any more into Medicine, then in like manner project your Medicine upon your melted metals or bodies and they will be converted into corporeal Electrum, metallic and malleable. Of the abuse of this Electrum Paracelsus writeth that Virgil Hispanus²⁹⁹ and Trithemius made a diabolical bell of this Artificial Electrum, upon which, when they would invoke Spirits (which they called by a more decent name of Intelligences) they writ the character of what Spirit they desired and at the third ring of the bell the Spirits obeyed their desires so long as they desired to talk with them; and when they would talk no more, they hid the character, and by the reverse ringing of the bell the Spirits departed. This supernatural Magic is altogether infamous and unlawful³⁰⁰.

Before I come to the *Particularia*, or the preparations of the seven metals, I will discover some Arcanums belonging to Vitriol, Sulphur and [the] Magnet.

There is a subterranean mineral Salt called Vitriol, which for dyeing of cloths and many other uses we cannot want. It is distinguished from other Salts in its sharpness and quality in eating through. The mineral of this Salt is strange [and] of a very hot and fiery quality as [is] apparent in its Spirit, the like [of which is] not found in other Salts. It is white and red and hath an extraordinary medicinal quality. This Salt containeth a combustible Sulphur, which is not in other Salts. Therefore in metalline affairs, touching their transmutation, it performeth more than others. It not only opens some, but helpeth the generation of others by reason of its innate heat. When Vitriol is separated by fire, then its Spirit at first comes in a white form; after that there comes from its earth a Spirit of a red condition. Staying in the earth, the Salt, being united with its expelled Mercury and Sulphur, can sharpen them; the remainder that stayeth behind is a dead earth of no efficacy. Consider well this now kindled Ternary, for as you find in Vitriol's body three distinct things, as Spirit³⁰¹, Oil³⁰² and Salt, even so you may expect from its own Spirit again (which without the mingling of its oil is driven from its matter) three distinct things as you did formerly from the body of Vitriol, which well deserveth the name of *Speculum Sapientiae Physicae*. Separate this Spirit of Vitriol as it ought, then that affords again unto you three principles, out of which only, without any addition, since the beginning of the world the Philosophers' Stone hath been made. From that you have to expect again a Spirit of a white form, an oil of a red quality [and] after these two a crystalline Salt. These three being duly joined in their perfection generate no less than the Philosophers' great Stone, for that white Spirit is merely Philosophers' Mercury and the red oil is the Soul³⁰³ and the Salt is the true Magnetic Body. As from the Spirit of Vitriol is brought to light the red and white tinctures, so from its oil there is made Venus, her tincture, and in the centre they are much distinct assunder, though they dwell in one body. In this knowledge lieth hid an irrecoverable error;

worldly wit cannot conceive of it that the Spirit of Vitriol and the remaining oil should be of so great distinction in their virtue. Touching their properties, the Spirit being well dissolved and brought into its three principles, Gold and Silver only can be made of it, and out of its oil only Copper, which will be apparent in a proof made.

The condition of the Spirit of Vitriol and its remaining oil is this, that where there is Copper and Iron, the Solar Seed is not far from it commonly; and again where there is Seed of Gold at hand, Copper and Iron are not far from it, by reason of its attractive magnetic quality and love, which they, as tingeing Spirits in a visible manner continually bear one to another. Therefore Venus and Mars are penetrated and tinged with the superabounding tincture of Gold, and in them there is found much more the root of the red tincture than in Gold itself, unto which there belongeth also the *minera* of Vitriol, which goeth beyond these in many degrees, because its Spirit is mere Gold and *rubedo*³⁰⁴, a crude, indigested tincture, and in very truth is not found out otherwise.

But this Spirit must be divided into certain distinct parts, as into Spirit, Soul and Body. The Spirit is the Philosophic Water, which, though visibly parted assunder, yet can never be separated radically (because of their unavoidable affinity they bear and have one to another) as it appeareth plainly when afterward they are joined, [for] the one, in their mixture, embraceth the other, even as a magnet draweth Iron, but in a meliorated essence better than they had before their dissolution. This Spirit (I can prove) is the essence of Vitriol, because this Spirit and oil do differ so much and were never united radically; [and] because the oil cometh after the Spirit, each can be received apart. This fiery Spirit may rather and more fitly be called an³⁰⁵ essence, Sulphur and substance of Gold, and it is so, though it lieth lurking in Vitriol as a Spirit.

This golden Water, or Spirit drawn from Vitriol;, contains again a Sulphur and a Magnet; its Sulphur is the *anima*, an incombustible fire; the Magnet is its own Salt, which in the conjunction attracteth its Sulphur and Mercury, uniteth with the same and are inseparable companions. First in a gentle heat is dissolved the undigested Mercurial Spirit; by this is further extracted after a magnetic way by the Mercurial Spirit³⁰⁶; so still the one is a Magnet unto the other, bearing magnetic love one to another, as such things whether the last together with the medium is drawn forth by the first, and are thereby generated and thus take their beginning. In this separation and dissolution the Spirit or Mercury is the first Magnet, showing its magnetic virtue towards the Sulphur and Soul which it, *quasi magnes*, attracteth. This Spirit, *per modum distillationis*, being absolved and freed, showeth again its magnetic power towards the Salt, which it attracteth from the dead earth; after the Spirit is separated from it, then the Salt appeareth in its purity. If that process be further followed, and after a true order and measure the conjunction be undertaken and the Spirit and Salt be set together into the philosophic furnace, then it appears again how the heavenly Spirit striveth in a magnetic way to attract its own Salt, [for] it dissolveth the same within forty days,

bringeth it to an uniform water with itself, even as the Salt hath been before its coagulation. In that destruction and dissolution appeareth the highest blackness and eclipse and darkness of the earth that was ever seen. But in the exchange thereof a bright, glittering whiteness appearing, then the case is altered and the dissolved, fluid, waterish Salt turns into a Magnet; for in that dissolution it layeth hold on its own Spirit, which is the Spirit of Mercury, attracteth the same powerfully like a Magnet, hiding it under a form of a dry, clear body, bringing the same by way of uniting into a deep coagulation and firm fixedness by means of a continued fire and the certain degrees thereof.

Note that from all metals, especially from Mars and Venus, which are very hard and almost fixed metals, of each part can be made Vitriol. This is the reduction of a metal into its mineral. For minerals grow to metals and metals were at first minerals, and so minerals are *proxima materia* of metals, but not *prima*. From these Vitriols may be made other reductions, namely a Spirit is drawn from them by the virtue of the fire.

This Spirit being driven over, then there is again a reduction of a mineral into its spiritual essence, and each Spirit in its reduction keepeth a metalline property; but this Spirit is not the *prima materia*.

Of The Sulphur And Ferment Of The Philosophers

I have formerly told you plainly how the Philosophers' Sulphur is made; [in] *loco masculi* pour this Spirit upon purged and fined Gold. Let it dissolve and putrefy fourteen days, *in Balneo Mariae* distil it and pour the water again on the Gold calx, and cohobate this until the Gold pours over with the water; set this again to distil, abstract the water gently, leave a third part of it in the bottom, then set it into a cellar; let it coagulate and crystallise, wash these crystals with distilled water, amalgamate them with Mercury vive, evaporate the Mercury gently, then you have a subtile powder; put it in a glass, lute it, reverberate it for three days and nights, do[ing] it gently; thus is the philosophers' Sulphur well prepared for your work and this is the Purple Mantle or Philosophic Gold; keep it safe in a glass for your conjunction.

Of The Philosophic Vitriol

After the philosophers' Sulphur is made, which [in] *loco masculi* is to make the King or man, now you must have the female or wife, which is the Mercury of the Philosophers or the *materia prima lapidis*, which must be made artificially; for our Azoth is not common Vinegar, but is extracted with the common Azoth, and there is a Salt made of *materia prima* or Mercury of the Philosophers, which is coagulated in the belly of the earth. When this matter is brought to light it is not clear and it is found everywhere; it is ponderous and hath a scent of a dead body. Take this matter, distil, calcine, sublime [and] reduce it to ashes, for if an artist want ashes, how can he make a Salt, and he that hath not a metalline Salt, how can he make the philosophers' Mercury?

Therefore if you have calcined the matter, then extract its Salt, rectify it well, let it shoot into the Vitriol, which must be sweet without any corrosiveness or sharpness of Salt. Then you get the philosophers' Vitriol or Philosophic Oil. Make further of it a mercurial water. Thus you have performed an artificial work. This is called the philosophers' Azoth, which purgeth Laton³⁰⁷ that³⁰⁸ is not yet washed. For Azoth washeth Laton, as the ancient philosophers have told two or three thousand years ago. For the philosophical Salt or Laton must with its own humidity, or its own mercurial water be purged, dissolved, distilled, attract its Magnet and stay with it. And this is the philosophers' Mercury or *Mercurius duplicatus*, and it consists of³⁰⁹ two Spirits, or a Spirit and a water of the Salt of Metals. Then this water beareth the name of *Succus Lunaris*³¹⁰, *Aqua Coelestis*, *Acetum Philosophorum*, *Aqua Sulphuris*, *Aqua Permanens*, *Aqua Benedicta*. Take eight or ten parts of this water and one part of the Ferment or Sulphur of Sol; set it in the philosophers' egg, lute it well; put it in the athanor, into that vaporous yet dry fire; govern it to the appearance of a black, white and red colour; then you get the Philosophers' Stone.

Of The Philosophic Magnet

Hermes, the father of the philosophers, had this art and was the first that wrote of it and prepared the Stone out of Mercury, Sol and Luna of the philosophers, whom some hundred laborators have imitated. I do assure you for a truth that the philosophers' Stone is composed of two bodies; the beginning and ending of it must be with philosophic Mercury.

And this is now *prima materia* and is coagulated in the entrails of the earth, first into Mercury, then into Lead, then into Tin and Copper, then into Iron, etc. Thus the coagulated Mercury must by art be turned into its *prima materia* or water, that is mercurial water.

This is a stone and no stone³¹¹, of which is made a volatile fire in [the] form of a water, which drowneth and dissolveth its fixed father and its volatile mother. Mettaline Salt is an imperfect body which turneth to philosophic Mercury, that is a permanent or blessed water, and is the philosophers' Magnet, which loveth its philosophic Mars, sucketh unto him and abideth with him. Thus our Sol hath a Magnet also, which Magnet is the first root and matter of our Stone. If you conceive of and understand my saying and what Hermes saith, three things are required for the work; first a volatile or mercurial water, *aqua coelestis*, then *Leo viridis*, which is the philosophic Lune, thirdly oes *Hermetis*, Sol or Ferment.

Lastly note philosophers had two ways, a wet one, which I made use of, and a dry one. Herein you must proceed philosophically; you must purge well the philosophers' Mercury and make Mercury with Mercury, adding the philosophic Salt, Ferment or Sulphur of philosophers and then you have [firstly] the philosophers' magnet, that is the philosophers' Mercury, secondly the metalline Salt or philosophic Salt, thirdly oes *Hermetis* or philosophic Sulphur.

A Process Upon The Philosophic Work Of Vitriol³¹²

Take ten pound of Vitriol dissolved in distilled rain water; being warmed let it stand for a day and a night. At that time many feces were settled. I filtered the matter, evaporated it gently *ad cuticulum usque*. I set it in a cool place to crystallise. This onshot³¹³ Vitriol I exiccated, dissolved it again in distilled rain water, let it shoot again, which work I iterated so till the Vitriol got a celestial green colour, having no more any feces about it, and lost all his corrosiveness and was of a very pleasant taste.

This highly putrefied Vitriol, thus crude and not calcined. I put into a coated retort, distilled it in open fire, drove it over in twelve hours space by an exact government of fire in a white fume. When no more of these fumes came and the red corrosive oil began to come, then I let the fire go out. The next morning, all being cold, I took off the receiver, poured the gift in the receiver into a body, and some of the lute being fallen in too, I filtered it and had a fair menstrual water, which had some phlegm because I took that Vitriol uncalcined, which I abstracted *in Balneo*, not leaving one drop.

I found my Chaos in the bottom of a dark redness, very ponderous, which I poured into a viol, sealed it *hermeticê*, set it on a three-foot into a wooden globe into a vaprous bath made of water, where I left it so long till all was dissolved. After some weeks it separated into two parts, into a bright, transparent water and into an earth, which settled to the bottom of the glass in [the form of] a thick, black corrosive like pitch.

I separated the white spirit from it and the fluid black matter I set in again to be dissolved. The white Spirit which was dissolved [out] of it I separated again. This work I reiterated, leaving nothing in the bottom save a dry, red earth. After that I purged my white Spirit *per distillationem* very exactly; it was as pure as the tear that falls from the eye. The remaining earth I exiccated under a muffle; it was porous and as dry as dust. On this I poured again my white Spirit [and] set it in a digestion. This Spirit extracted the Sulphur or philosophic Gold and was tinged of a red yellow. I canted it off from the matter and in a body I abstracted the Spirit from the Sulphur. That Sulphur stayed behind in [the] form of an oil, very fiery, nothing [being] like unto its heat, as red as Ruby. The³¹⁴ abstracted white Spirit I poured on the earth again, extracted further in Sulphur and put it to the former. After this that *corpus terrae* looked of a paler colour, which I calcined for some hours under a muffle [and] put it into a body; on it I poured my white Spirit [and] extracted its pure, white, fixed Salt. The remaining earth was very porous, [and] good for nothing, which I flung away; thus these three principles were fully and perfectly separated.

After this I took my astral, clarified Salt, which weighed half an ounce after the weight at Strasbourg in Germany, and of the white Spirit, which weighed four ounces, of Mercury one ounce and a quarter of an ounce. These I divided into two parts, whose quantity was half an ounce and one dram. I put this Salt to one

part of the other in a viol and nipped it [and] set it in digestion; there I saw perfectly how the Salt dissolved itself again in this Spirit, therefore I poured to it the other part, which was half an ounce and one dram. No sooner this was put to it than presently the body, together with the Spirit, turned as black as coal, ascended to the end of the glass, and having no room to go any further, it moved to and fro. Sometimes it settled to the bottom; by and by it rose to the middle; then it rose higher. Thus it moved from the fourth of July to the seventh of August, namely thirty-four days, which wonderful work I beheld with admiration. At last these were³¹⁵ united and turned to a black powder staying on the bottom and was dry. Seeing that it was so I increased my fire in one degree, took it out of the wet and set it in ashes; after ten days the matter on the bottom began to look somewhat white, at which I rejoiced heartily. This degree of fire I continued till the matter above and below became as white as the glittering snow. But it was not yet fix[ed] as I discovered upon] making trial of it, [so I] set it in again [and] increased my fire one degree higher; then the matter began to ascend and descend, moved on high, stayed in the middle of the glass, not touching the bottom of it. This lasted thirty-eight days and nights, [and] I beheld them as well as formerly, at the thirty days, a variety of colours which I am not able to express.

At last this powder fell to the bottom [and] became fix[ed]. [I] made projection with it, putting one grain of it to one and a quarter ounce of Mercury, transmuting the same into very good Lune. Now it was time to restore unto this white tincture her true *anima*, and imbibe it, to bring it from its whiteness unto redness and to its perfect virtue.

Thereupon I took the third principle, namely the *anima*, which hitherto I had reserved, (in quantity it was one ounce and one dram) poured it to my reserved Spirit of Mercury, (whose quantity was one ounce and a quarter of an ounce) [and] drew it over several times *per alembicum* so that they in the end united together. I then divided³¹⁶ them into seven equal parts; one part I poured on my clarified earth or tincture, which greedily embraced its *anima*, together with its Spirit, and turned to a ruddiness in twelve days and nights, but had no tingeing quality as yet, saving [that] Mercury vive and Saturn it transmuted into Lune, which Lune at the separating yielded three grains of Gold. I proceeded further with my imbibation and carried all the seven parts of the *anima* into [my tincture]; at the fourth imbibation one part of my work tinged ten parts of Copper into Gold; at the fifth imbibation one part tinged an hundred parts; at the sixth it tinged a thousand parts; at the seventh it tinged ten thousand parts. At this time I got of the true Medicine four ounces, half an ounce and one dram.

Of The Preparation Of The Seven Metals. And First Of The Sulphur Of Sol, Whereby Luna Is Tinged Into Good Gold

Take of pure Gold, which is three times cast through Antimony, and of well purged Mercury vive, being pressed through leather, six parts; make of it an *Amalgama*; to the quantity of this *Amalgama* grind twice as much of common Sulphur; let it evaporate on a broad pan in a gentle heat under a muffle, stirring it

well with an Iron hook; let the fire be modified that the matter do not melt together. This Gold calx must be brought to the colour of a Marigold flower, then it is right. Then take one part of Saltpeter, one part of Sal Armoniack, half a part of grinded pebbles³¹⁷ [and] draw a water from it. Note this water must be drawn warily and exactly; to draw it after the common way will not do; he that is used to chemic preparations knows what he hath to do. And note you must have a strong stone retort, which must be coated, to hold the Spirit closely; its upper part must have a pipe upward of half a span's length; its wideness must bear two fingers breadth; it must be set first in a distilling furnace, which must be open above that the upper pipe may stand out directly; apply a large receiver [and] lute it well; let your first fire be gentle, then increase it that the retort look glowing hot; put a spoonful of this ground matter in at the pipe suddenly with a wet clout [and] the Spirits come rushingly into the receiver. These Spirits being settled, then carry in another spoonful; in this manner you proceed till you have distilled all. At last give time to the Spirits to be settled [and] to turn into water. This water is a hellish, dissolving, strong one, which dissolveth instantly prepared Gold Calx and laminated Gold into a thick solution. This is that water which dissolves not only Gold but bringeth it to a volatility, carrying it over the helmet, whose *anima* may afterwards be drawn from its torn body.

Note the Spirit of common Salt effecteth the same if drawn in that manner which I shall mention afterwards. If three parts of this Salt Spirit be taken, and one part of *Spiritus Nitri*, it is stronger than Sal Armoniack water, and is better because it is not so corrosive, dissolveth Gold the sooner, carrieth it over the helmet, [and] maketh it volatile and fit to part with its Soul. You have your choice to use which you think best and may easier be prepared thus: Take one part of the prepared Gold calx and three parts of the water which you make choice of. Put it into a deep body, lute a helmet of it, set it in warm ashes [and] let it dissolve; that which is not dissolved, pour three times as much water upon, that all dissolve. Let it cool, separate the feces, put the solution into a body, lute a helmet to it [and] let it stand in a gentle heat day and night *in Balneo Marine*. If more feces be settled separate them, digest them again *in Balneo* nine days and nights, then abstract the water gently to a spissitude like unto an oil in the bottom. This abstracted water must be poured on that spissitude [and] this must be iterated again and often that it grow weary and weak; remember to lute well at all times. To the oleity on the bottom pour fresh water which was not yet used; digest day and night, firmly closed, then set it in a sand cupel [and] distil the water from it [till it be reduced] to a thickness; make the abstracted water warm, put it in a body, lute it, abstract it, iterate this work and make all the Gold come over the helmet.

Note, at the next drawing always the fire must have one degree more. The Gold being come over into the water, abstract the water gently from it in the Balney to the oleity [and] set the glass into a cool place; there will shoot transparent crystals; these are the Vitriol of Gold. Pour the water from it, distil it again unto an oleity [and] sat it by for shooting; more crystals will shoot; iterate it as long as any do shoot. Dissolve these crystals in distilled water, put to it of purged Mercury

three times as much, shake it about, many colours will appear, an *Amalgama* falls to the ground [and] the water cleareth up. Evaporate the *Amalgama* gently under a muffle, stirring it still with a wire; at last you get a purple coloured powder, scarlet like; it dissolveth in Vinegar into a blood redness. Extract its *anima* with prepared Spirit of Wine mixed with the Spirit of common Salt, entered together into a sweetness. This tincture of Sol is like a transparent Ruby, leaving a white body behind.

Note that without information you cannot attain unto the Spirit of Salt; if it be not sweet it hath no attractive power; to the attaining hereof observe these following manuals: Take good Spirit of Salt, dephlegmed exactly, driven forth in that manner as ye shall hear anon. Take one part of it, add half a part to it of the best Spirit of Wine, which must not have any phlegm, but be a mere Sulphur of Wine and must be prepared in that manner as I shall tell you anon. Lute a helmet to it, draw it over strongly, leave nothing behind. To the abstracted [part] put more Spirit of Wine, draw it over somewhat stronger than you did the first time, weigh it, put a third time more [Spirit of Wine] to it [and] draw it over again well luted; putrefy this for half a month, or so long as it be sweet, and it is done in Balney very gently. Thus the Spirit of Wine and Salt is prepared, loses³¹⁸ its corrosivity and is fit for extracting.

Take the Ruby-red prepared Gold powder, put of this prepared Spirit of Salt and Wine so much that it stand two fingers breadth over it, set it in a gentle heat [and] the Spirit will be red tinged; this Spirit must be canted off. Pour a new Spirit on that which remaineth on the bottom, set it luted into a gentle heat, let it be tinged deeply, then cant it off; this work must be iterated (till) that the body of Sol remain on the bottom like Calx vive, which keep, for therein sticketh more Salt of Gold, which is effectual in ways of Medicine, as shall be showed anon.

Those tinged Spirits put together, abstract them gently *in Balneo* [and] there will be left a red subtile powder in the bottom, which is the true tincture animated, or Sulphur of Gold. Dulcify it with distilled rain water [and] it will be very subtile, tender and fair. Take this extracted Sulphur of Sol as you were taught, and as much of the Sulphur of Mars, as you shall hear anon when I treat of Mars. Grind them together, put it in a pure glass, pour on it so much of Spirit of Mercury - let it stand over it two fingers breadth - that the matter may be dissolved; see to it that all dissolve into a Ruby-like Gold water, jointly drive it over, then it is one and were at first of one stem. Keep it well, that nothing of it evaporate; put it in separated Silver calx, being precipitated with pure Salt and afterwards welledulcorated and dried; fix it together in a fiery fixation that it sublime no more; then take it and melt it in a wind-oven; let it stream well; then you have united Bride and Bridegroom and brought them unto Gold of a high degree. Be thankful to God for it as long as you shall live.

I shall hereafter at large set forth how this extracted Soul of Sol may be made potable. I will now set forth how the white solar body shall further be anatomised,

and that by art its Mercury vive and its Salt may be obtained. The process of it is thus.

Take the white body of Sol, from which you have drawn its *anima*, reverberate it gently for half an hour, let it become corporeal, then pour on it well rectified honey-water, which is corrosive [and] extract its Salt in a gentle heat. It is done in ten days space. The Salt being all extracted, abstract the water from it *in Balneo*, edulcorate the Salt with iterated distillings with common distilled water, clarify it with Spirits of Wine, then you have *Sol auri*, of which you shall hear more in its due place [and] of the good qualities in hath by way of medicine upon man. On the remaining matter pour Spirit of Tartar, of which elsewhere because it belongeth unto medicinals. Digest these for a month's time, drive it through a glass retort into cold water, then you have quick Mercury of Sol; many strive to get it but in vain.

There is one mystery more in Nature, that the white solar body, having once lost its *anima*, may be tinged again and brought to be pure Gold, which mystery is revealed to very few. I shall briefly declare it, as also about the universal Stone of [the] Philosophers, how it resteth merely upon the white Spirit of Vitriol, and how that all three principles are found only in this Spirit and how you are to proceed in and to bring each into its certain state and order.

Take the philosophic Sulphur, which in order is the second principle and is extracted with the Spirit of Mercury; pour it on the white body of the King³¹⁹, digest it for a month in a gentle Balny, then fix it in ashes and at last in sand, that the brown powder may appear; then melt it with a fluxing powder made of Saturn; then it will be malleable and fair Gold as it was formerly, in colour and virtue nothing defective. But note, the Salt must not be taken from the Solar body.

There may be prepared yet in another manner a transparent Vitriol from Gold in the following manner.

Take good *Aqua Regis* made with Sal Armoniack one pound, *id est* dissolve four ounces Sal Armoniack in *Aqua Fortis*, then you have a strong *Aqua Regis*. Distil and rectify it often over the helmet, let no feces remain behind; let all that ascends be transparent. Then take thinly beaten Gold rolls, cast formerly through Antimony, put them into a body, pour on it *Aqua Regis*, let it dissolve as much as it will or as you can dissolve in it. Having dissolved all the Gold, pour into it some oil of Tartar or Salt of Tartar dissolved in fountain water till it begins to hiss. Having done hissing, then pour in again of the oil. Do it so long till all the dissolved Gold fallen to the bottom and nothing more of it precipitate, and the *Aqua Regis* clear up. This being done, then cant off the *Aqua Regis* from the Gold calx, edulcorate it with common water eight, ten or twelve times. The Gold calx being well settled, cant off that water and dry the Gold calx in the air where the Sun doth not shine. Do it not over a fire, for as soon as it feeleth the least heat in kindleth and great damage is done, for it would fly away forcibly that no

man could stay it. This powder being ready also, then take strong Vinegar, pour it on, boil it continually, over [the fire] in a good quantity of Vinegar, still stirring it that it may not stick unto the bottom, for twenty-four hours together, then the fulminating quality is taken from it; be careful you do not endanger yourself; cant off the Vinegar, dulcify the powder, and dry it. This powder may be driven *per Alembicum* without any corrosive, blood-red, transparent and fair, which is strange and uniteth unwillingly with the Spirit of Wine and by means of coagulation may be brought to a solar body.

Do not speak much of it to the vulgar. If you receive any benefit by my plain and open information, keep these mysteries secret to thy dying day. I will impart unto thee this arcanum also and entrust thee on thy conscience with it.

Take good Spirit of Wine, being brought to the highest degree, let fall into it some drops of Spirit of Tartar; then take thy Gold powder, put to it three times as much of the best and subtilest common Flowers of Sulphur, grind these together, set it on a flat pan under a muffle, give to it a gentle fire, let the Gold powder be in a glowing heat, put it thus glowing into the Spirit of Wine, cant off the Spirit of Wine [and] dry the powder against a heat. It will be porous being dried. Then add to it again three parts of *Flores Sulphurii* let them evaporate under a muffle, Neal the remaining powder in a strong heat and put it in Spirit of Wine; iterate this work six times [and] at last this Gold powder will be so soft and porous as firm butter; dry it gently, because it melteth easily. Then take a coated body, which in its hinder part hath a pipe; lute a helmet to it, apply a receiver, set it freely in a strong capel; let your first fire be gentle, then increase it; let the body be almost in a glowing heat, then put in the softened, well dried Gold powder, being made warm, behind at the hollow pipe. Shoot it in nimbly. There come instantly red drops into the helmet. Keep the fire in this degree so long till nothing more ascendeth and no more drops fall into the receiver. Note, in the receiver there must be of the best Spirit of Wine into which the drops of Gold are to fall.

Then take this Spirit of Wine, into which the Gold drops did fall, put it in a pelican, seal it *hermeticé* [and] circulate it for a month; it turneth then to a blood red Stone, which melteth in the fire like wax. Beat it small, grind among it lunar calx [and] melt it. Then you find (as) much good Gold as the Gold powder and the spirit of wine together with the moiety of³²⁰ the added lunar calx did weigh, but one moiety of the lunar calx is not tinged and³²¹ is as good as it was to be used. If you hit this rightly, then be thankful to God. If not, do not blame me; I could not make it plainer.

Now if you will make this Vitriol, then take the powder formerly made, boiled in Vinegar; pour on it good Spirit of common Salt, mingled with Saltpeter water and the Spirit of Salt of Nitre. This Saltpeter water is made as *Aqua Tartaris* is made, using³²² Saltpeter. Gold is dissolved in this water, which being done then abstract the water to a thickness [and] set in a cellar; then there shooteth a pure Vitriol of Sol. The water which stayeth with the Vitriol must be canted off, [then]

distil it again to a spissitude, set it in the cellar [and] more of the Vitriol will shoot. Iterate this work as long as the Vitriol shooteth. If you are minded to make the Philosophers' Stone out of solar Vitriol, as some fantastic men endeavour in that way, then be first acquainted and ask counsel of thy purse and prepare ten or twelve pounds of this Vitriol, then you may perform the work very well, and the Hungarian Vitriol and others digged out of the mines will permit thee to do it. You may extract from this Vitriol also its Sulphur and Salt with spirit of wine, which is all easy work.

The Particular Of Lune And Of The Extraction Of Its Sulphur And Salts

Take of Calx vive and common Salt and³²³, Neal them together in a wind oven; then extract the Salt purely from the Calx with warm water; coagulate it again, put to it an equal quantity of new Calx, Neal it, extract the Salt from it, iterate it three times, then is the Salt prepared.

Then take the prepared Lunar Calx, stratify the Calx with prepared Salt in a glass viol, pour strong water on it, made of equal quantities of Vitriol and Saltpeter, abstract the *aqua fort* from it, iterate this three times³²⁴, at last drive it strongly, let the matter melt well in the glass, then take it forth [and] your Lune is transparent and blueish like an Ultramarine. Having brought Lune thus far, then pour on it strong distilled Vinegar [and] set it in a warm place, the Vinegar is tinged with a transparent blue, like a Sapphire and attracteth the tincture of Lune, being separated from the Salt [and] all which comes from Lune goeth again into the Vinegar, which must be done by edulcoration; then you will find the Sulphur of Lune fair and clear. Take one part of this Sulphur of Lune, one half part of the extracted Sulphur of Sol [and] six parts of the Spirit of Mercury; join all these in a body, lute it well [and] set it in a gentle heat in digestion; that liquor will turn to a red-brown colour, having all driven over the helmet, and nothing [will] stand in the bottom; then pour it on the water³²⁵ remaining of the Silver you drew your Sulphur from, lute it well, set it in ashes for to coagulate and to fix it eleven days and nights, or when you see the lunar body be quite dry, brown and nothing of it doth any more rise or fume; then it will melt quickly with a sudden flux [at the] fire before the blast; cast it forth; then you [will have] transmuted³²⁶ the whole substance of Silver into the best, most malleable Gold.

I formerly told you that the Spirit of Salt can destroy Lune, so that a potable Lune can be made of it, of which potable Lune shall hereafter be set forth as to the preparation and the use thereof in medicine.

When you perceive that the Sulphur of Lune is wholly extracted and the Vinegar take no more tincture from her nor the Vinegar doth taste any more of Salt, then dry the remaining calx of Silver, put it into a glass, pour on it corrosive Honey water as you did to the Gold³²⁷, yet it must be clear and without any feces; set it in warmth for four or five days, extract Lune's Salt, which you may perceive when the water groweth white. The Salt being all out of it, then abstract the Honey

water, edulcorate the corrosiveness by distilling and clarify the Salt with Spirit of Wine. The remaining matter must be edulcorated and dried; pour upon it the Spirit of Tartar, digest it for half a month, then proceed as you did with the Gold. Then you have Mercury of Lune. The said Sal³²⁸ of Lune hath excellent virtues upon man's body. The efficacy of its Salt and Sulphur may be learned by the following process.

Take of the sky-coloured Sulphur, which you extracted from Lune and is rectified with Spirit of Wine, put it in a glass, pour on it twice as much of Spirit of Mercury, which is made of the white Spirit of Vitriol. In like manner take of the extracted and clarified Salt of Silver, put to it three times as much of Spirit of Mercury. Lute well both glasses [and] set them in a gentle Balney for eight days and nights. Look to it that the Sulphur and Salt lose nothing, but keep their quantity as they were driven out of the Silver. Having stood these eight days and nights, then put them together into a glass, seal it *Hermeticê*, set it in gentle ashes, let all be dissolved and let it be brought again into a clear and white coagulation. At last fix them by the degrees of fire, then the matter will be as white as snow. Thus you have the white tincture, which with the volatile dissolved *anima* of Sol you may animate, fix, bring to the deepest redness and at last ferment and augment the same *ad infinitum*, the Spirit of Mercury being added thereunto. And note that upon Gold a process is to be ordered with its Sulphur and Salt.

If you understood how their *primum mobile*³²⁹ is to be known, then is it needless in this manner and to that purpose to destroy metals; but you may prepare everything from or of the first essence and bring them to their full perfection.

Of The Particulars Of Mars Together With The Extraction Of Its Anima And Salt

Take of red Vitriol oil or oil of Sulphur one part and two parts of ordinary well water. Put these together [and] dissolve therein filings of Steel. This dissolution must be filtered. Being warmed, let it gently evaporate a third part of it, then set the glass in a cool place [and] there will shoot crystals as sweet as sugar, which is the true Vitriol of Mars. Cant off that water, let it evaporate more, set it again in a cold place [and] more crystals will shoot. Neal them gently under a muffle, stirring it still with an Iron wire; then you get a fair, purple coloured powder. On this powder cast distilled Vinegar, extract the *anima* of Mars in a gentle Balney, abstract again the Vinegar and dulcorate the *anima*. This is the *anima* of Mars, which, being added to the Spirit of Mercury and united with the *anima* of Sol, tingeth Lune into Sol as you heard about the Gold.

Of The Particular Of Venus What Mysteries There Are Hid Therein And Of The Extraction Of Its Sulphur And Salt

Take as much of Venus as you will and make Vitriol of it, after the usual and common practice; or take good Verdigris sold in shops - it effecteth the same; grind it very small, pour on it good distilled Vinegar [and] set it in a warmth; the

Vinegar will be [coloured a] transparent green, cant it off [and] pour on the remaining matter on the bottom new Vinegar; iterate this work as long as the Vinegar taketh out any tincture and the matter of the Verdigris on the bottom lieth very black. Put the tinged Vinegar together, distil the Vinegar from it to a dryness, else a black Vitriol will shoot, thus you get a purified Verdigris. Grind it small, pour on it the juice of immature grapes [and] let it stand in a gentle heat; this juice maketh the transparent tincture as green as a Smaragd and attracteth the red tincture of Venus, which affords an excellent colour for painters, limners and others for their several uses.

When the juice extracts no more of the tincture, then put all the extraction together, abstract a moiety of this juice gently, set it into a cool place [and] there shooteth a very fair Vitriol. If you have enough of that, then you have matter enough to reduce the same and to make of it the Philosophers' Stone, in case you should make a doubt to perform this great mystery by any other Vitriol. The common Azoth is not the matter of our Stone, but our Azoth or *materia prima* is extracted with the common Azoth and with the wine, which is the outpressed juice of unripe grapes, and with other waters also must be prepared. These are the waters wherewith the body of Venus must be broken and be made into Vitriol, which you must observe very well, then you may free yourselves from many troubles and perplexities.

But especially note that it may be done with great profit if you drive forth the red oil of Vitriol and dissolve Mars in it and crystallise the solution as you were told when I treated of Mars. For in this dissolution and coagulation Venus and Mars are united. This Vitriol must be nealed under a muffle unto a pure red powder and must be extracted further with distilled Vinegar as long as there is any redness in it.

Then you get the *anima* of Mars and Venus doubled. Of³³⁰ this doubled virtue, after the addition of the *anima* of Sol, which you made in the before quoted quantity, take twice as much of Silver Calx and fix it. But note that there must be twice as much of the Spirit of Mercury than there was allowed in that place but in the rest the process is alike. The Salt of Venus must be extracted when the juice taketh no more of the green tincture; then take the remaining matter, dry it, pour Honey Water upon it, then that Salt goeth in that heat for five or six days and clarify it with Spirit of Wine; then is the Salt ready for your Medicine.

Of The Particular Of Saturn Together With The Extraction Of Its Soul And Salt

Saturn, the highest of the Celestial Planets, hath the meanest authority in our Magistery, yet is the chieftest key in the whole art. Saturn is not to be slighted by reason of its external despicable form; if he be wrought in a due process after the philosophers' way, he is able to requite all the labourer's pains bestowed upon him, for the great virtues of it in Medicine for man's health and for meliorating of metals³³¹. The preparation of it is thus:

Take red Minium or Ceruse, laminate it thinly, hang these lamens in a large glass filled with strong Vinegar, in which is dissolved a like quantity of the best Sal armoniack, sublimed thrice with common Salt. Stop the glass' mouth very closely that nothing evaporate, set the glass in ashes in a gentle heat, otherwise the Spirits of the Vinegar and Sal armoniack ascend and touch the Saturnal lamens. At the tenth or twelfth day you will spy a subtile Ceruse hanging on those lamens; brush them off with a hare's foot [and] go on and get enough of this Cerus. Take a quantity of it [and] put it in a body; pour strong Vinegar on it, which several times hath been rectified and was fortified at the last rectification with a sixteenth part of Spirit of vulgar Salt, dephlegmed and drawn over. Spot the body well, or, which is better, lute a blind head to it, set the body in ashes to be digested, swing it often about and in a few days the Vinegar begins to look yellow and sweet at the first. Iterate three times³³², it is sufficient.

The remnant of the Ceruse stayeth in the body's bottom, unshapely; filter the tinged Vinegar clearly, that is of a transparent yellowness, put all the tinged Vinegar together, abstract two parts of it *in Balneo Mariae*, [but] let the third part stay behind. This third part is of a reasonable *rubedo*. Set the glass in cold water, then the crystals will shoot off the sooner; being shot, take them out with a wooden spoon [and] lay them on a paper for to dry; these are as sweet as sugar and are of great energy against inflamed symptoms. Abstract the Vinegar further *in Balneo*, in which the crystals did shoot, set the distillation aside for the shooting of more crystals and proceed with these as you did formerly.

Now take all these crystals together; they in their appearance are like unto clarified sugar or Saltpeter; beat them in a mortar of glass or Iron, or grind them on a marble unto unpalpableness, reverberate it in a gentle heat to a bloodlike redness. Provided³³³ they do not turn to blackness. Having them in a scarlet colour, put [them] in a glass, pour on them a good Spirit of Juniper abstracted from its oil and rectified several time into a fair, white, bright manner; lute the glass above, set it in a gentle heat [and] let the Spirit of Juniper be tinged with a transparent redness like blood; then cant it off neatly from the feces into a pure glass, with that proviso that no impure thing run therewith; on the feces pour over the Spirit of Juniper [and] extract still as long as any Spirit taketh the tincture. Keep the feces; they contain the Salt.

Take all these tinged Spirits together, filter them, abstract them gently *in Balneo* [and] there remaineth in the bottom a neat Carnation powder, which is the *anima* of Saturn. Pour on it rain water, often distilled; distil it strongly several times to get off that which stayed with the Spirit of Juniper, and so this subtile powder will be edulcorated delicately. Keep it in a strong boiling, cant it off, then let it go off neatly. Let it dry gently; for safety's sake reverberate it again gently for its better exiccation; let all impurity evaporate, let it grow cold, put it in a viol, put twice as much of Spirit of Mercury to it, seal it *hermeticê*; set it in a vaporous bath called the philosophers' *finus equinus*, let it stand in the mystical furnace for a month,

then the *anima* of Saturn closeth daily with the Spirit of Mercury and both become inseparable, making up a fair, transparent, deeply tinged, red oil. Look to the government of the fire; be not too high with it, else you put the Spirit of Mercury as a volatile Spirit to betake himself to his wings, forcing him to the breaking of the glass. But if these be well united, then no such fear look for, for one nature embraceth and holdeth up the other.

Then take this oil or dissolved *anima* of Saturn out of the viol. It is of a gallant fragrancý. Put it into a body, apply a helmet to it, lute it well, drive it over, then Soul and Spirit are united together and fit to transmute Mercury precipitated into Sol.

The precipitation of Mercury is done thus: Take one part of the Spirit of Salt Nitre and three parts of oil of Vitriol; put these together, cast into half a part of quick Mercury, being very well purged, set it in sand, put a reasonable strong fire to it, so that the Spirits may not fly away [and] let it stand a whole day and night; then abstract all this Spirit, then you find in the bottom a precipitated Mercury, somewhat red. Pour the Spirit on it again, let it stand day and night, abstract it again and then your precipitate is at the highest *rubedo*; dulcify it with distilled water [and] let it strongly be exiccated. Then take two parts of this precipitated Mercury, one part of the dissolved Saturnal oil, put these together, set it in ashes [and] let all be fixed; not one drop must stick anywhere to the glass. Then it must be melted with due additional of Lead; they close together and afford Gold, which afterward, at the casting through Antimony, may be exalted.

Note that Mercury must not be precipitated unless with pure oil of Vitriol or oil of Venus, with the addition of the Spirit of Salt Nitre. Albeit such Mercury cannot be brought to its highest fixation by way of precipitating but its fixed coagulation is found in Saturn.

Beat the above said Mercury small, grind it on a stone, put it in a viol, pour on it the Saturnal dissolved oil [and] it entereth instantly, if so be you proceeded aright in the precipitation. Seal the viol *hermeticê*, fix it in ashes [and] at (the) last in sand, to its highest fixation. Then you have bound Mercury with a true knot and brought him into a fix[ed] coagulation, which brought its form and substance into a melioration with an abundance of riches. If you carry it on a white precipitate, then you get only Silver, which holds but little Gold.

One thing more I must tell thee about this process, that there is yet a better way to deal upon Saturn with more profit. Take two parts of the above said dissolved oil, or oil of the Saturnal Soul, one part of *Astrum Solis* and of Antimonial Sulphur, whose preparation followeth afterwards, two parts, half as much of Salt of Mars as all those are, weigh them together, put them into a glass viol and let the third part of it be empty; set them in together to be fixed, then the Salt of Mars openeth in this compound, is fermented by it and the matter begins to incline to blackness. For ten or twelve days it is eclipsed, then the Salt returns to its coagulation, laying hold in its operation on the whole compound. Coagulate it first

into a deep brown mass, let it stand thus unstirred in a continual heat [and] it turneth to a blood-red body? increase the fire that you may see the *Astrum Solis* to be predominant, which appeareth in a greenish colour, like unto a Rainbow; keep this fire continually, let all these colours vanish [and] it turneth to a transparent red stone, very ponderous, needless to be projected upon Mercury, but [which] tingeth after its perfection and fixation all white metals into the purest Gold. Then take of the prepared, fixed, red Stone or of the powder, one part and four parts of the white metal. First let the metal melt half an hour and let it be well clarified; then project the powder upon it [and] let it drive well so that it be entered into the metal and the metal begin to congeal; then is it transmuted into Gold. Beat the pot in pieces [and] take it out; if it hath any slacks³³⁴ drive them with Saturn, then it is pure and malleable. If you carry it on Lune, then put more of the powder on it than you do upon Jupiter and Saturn, as half an ounce of the powder tingeth five ounces of Lune into Sol. Let this be a miracle. Fool not thy Soul with imparting this mystery unto others that are unworthy of it. Proceed with Salt of Saturn as you were informed about Mars and Venus, only [note that] distilled Vinegar performeth that which Honey Water did by the others and clarify it with Spirit of Wine.

Of The Particular Of Jupiter With The Extraction Of Its Anima And Salt

Take pumice stones sold in shops, neal them, quench them in old good wine, neal them again and quench them as you did formerly [and] let this nealing be iterated a third time; the stronger the wine is you quench withal, the better it is. After that dry them gently; thus are they prepared for that purpose. Pulverise these pumice stones subtilly, then take good Tin, laminate it, stratify it in a cementing way, in a reverberating furnace reverberate this matter for five days and nights in a flaming fire [till] it draweth the tincture of the metal. Then grind it small, first scraping the Tin lamens; put it in a glass body, pour on it good distilled Vinegar and set it in digestion [when] the Vinegar draweth the tincture, which is red-yellow. Abstract the Vinegar *in Balneo*, edulcorate the *anima* of Jupiter with distilled water, exiccate gently and proceed in the rest as you did with the *anima* of Saturn, viz., dissolve radically in or with the Spirit of Mercury, drive them over, pour that upon two parts of red Mercury precipitated; being precipitated with this Venerean, sanguine quality, then coagulate and fix; if done successfully you may acknowledge Jupiter's bounty that gave leave to transmute this precipitate into Gold, which will be apparent at their melting. It performeth this also, it transmuteth ten parts of Lune into Gold, if other Sulphurs be added thereunto; force no more upon Jupiter, it is all he is able to do; being of a peaceable disposition he told all what he could do.

The process about this Salt is to extract it with distilled rain water, clarified with Spirit of Wine.

Of The Particular Of Mercury Vive And Of Its Sulphur And Salt

Take of quick Mercury, sublimed several times, half a pound³³⁵, grind it very small, pour on it a good quantity of sharp Vinegar, boil it on the fire for an hour or upward, stirring the matter with a wooden spatula, [then] take it from the fire and let it be cold, [when] the Mercury settleth to the bottom and the Vinegar cleareth up. If it be slow in the clearing, let some drops of Spirit of Vitriol fall into the Vinegar; it doth precipitate the other, for Vitriol precipitateth Mercury Vive, Salt of Tartar precipitateth Sol, Venus and common Salt doth precipitate Lune and Mars does the like to Venus; a lixivium³³⁶ of Beech ashes doth it to Vitriol and Vinegar is for common Sulphur, and Mars for Tartar and Saltpeter for Antimony. Cant off the Vinegar from the precipitate [and] you will find the Mercury like a pure washed sand. Pour on it Vinegar, iterate this work a third time, then edulcorate the matter [and] let it dry gently.

Take two ounces of *anima* of Mars, one ounce of *anima* of Saturn, one ounce of *anima* of Jupiter, dissolve these in six ounces of Mercurial Spirit [and] let all be dissolved; then drive it over, leaving nothing behind [and] it will be a golden water like a transparent dissolution of Sol; your prepared and edulcorated Mercury must be warmed in a strong viol, pass this warmed water gently upon [the other]³³⁷, a hissing³³⁸ will be, stop the viol and then the hissing³³⁸ is gone; then seal it *hermeticê*, set it in a gentle Balney [and] in ten days the Mercury is dissolved into a grass-green oil. Set the viol in ashes for a day and a night [and] rule the fire gently; this green colour [then] turneth into a yellow oil; in this colour is hid the *rubedo*; keep it in this fire and let the matter turn to a yellow powder like unto Orpiment; when no more comes over, then set the glass in sand for a day and a night; give a strong fire to it, let the fairest ruby *rubedo* appear, melt it to a fixedness with a fluxing powder made of Saturn [and] it comes now to a malleableness; one pound of it containeth two ounces of good Gold, as deep as ever Nature produced any.

An Oil Made Of Mercury And Its Salt

Take quick Mercury, often sublimed and rectified with Calx Vive, put it in a body, dissolve it in a heat in strong nitrous water, [and] abstract the water from it; the corrosiveness which stayeth there must be extracted with good Vinegar well boiled in it. At last abstract the Vinegar, [when] the remainder of it must be dulcified with distilled water and then exiccated. Afterward on each pound must be poured one pound of the best Spirit of Wine. Let it stand luted in putrefaction, then drive over what may be driven, first gently, then more strongly. From that which is come over abstract the Spirit of Wine *per Balneum* [and] there stayeth behind a fragrant³³⁹ oil, which is *Astrum Mercurii*, an excellent remedy against venereal diseases.

Seeing the Salt and *Astrum* of Mercury is of the same medicinal operation, I hold it needful to write of each in particular and will join their operation into one and

declare of it in the last part about the Salt of Mercury, because they are of one effect in medicinal operations. Take the made oil or *Astrum Mercuri*, which by reason of its great heat keeps its own body in a perpetual running, casting it on the next standing earth, from which you formerly drew the oil; set it in a low heat [and] and the oil draweth its own Salt. That being done, put to it a reasonable quantity of Spirit of Wine [and] abstract it again; the Salt stayeth behind, dissolved in the fresh Spirit of Wine, being dulcified by cohobation. Then is the Mercurial Salt ready and prepared for the Medicine. Mercury is able to do no more, neither *particulariter* nor *universaliter*, because he is far off from philosophers' Mercury, although many are deceived in their fancies to the contrary.

Of The Particular Of Antimony Together With The Extraction Of Its Sulphur And Salt

Take good Hungarian Antimony, pulverise it subtilly to a meal, calcine it over a gentle heat, stirring it still with an Iron wire, and let it be albified and [become so] that at last it may be able to hold out in a strong fire. Then put it into a melting pot, melt it, cast it forth, turn it to a transparent glass, beat that glass, grind it subtilly, put it in a glass body of a broad, flat bottom, pour on it distilled Vinegar [and] let it stand luted in a gentle heat for a good while. The Vinegar extracteth the antimonial tincture, which is of a deep redness; abstract the Vinegar [and] there remaineth a sweet, yellow, subtile powder, which must be edulcorated with distilled water. All acidity must be taken off. Exiccate it, pour on it the best graduated Spirit of Wine [and] set it in a gentle heat. You have a new extraction, which is fair and yellow; cant it off, pour on other Spirit, let it extract as long as it can, then abstract the Spirit of Wine. Exiccate [and] you find a tender, deep yellow, subtile powder of an admirable medicinal operation, [which] is nothing inferior unto potable Sol.

Take two parts of this powder [and] one part of Solar Sulphur; grind these small, then take three parts of Sulphur of Mars, pour on it six parts of Spirit of Mercury, set it in digestion, well luted, let the Sulphur of Mars be dissolved totally, then carry in a fourth part of the ground matter of the Sulphur of Antimony and of Sol. Lute and digest. Let all be dissolved, then carry in more of your ground Sulphur [and] proceed as formerly, iterating it so long till all be dissolved; then the matter becomes a thick, brown oil. Drive all over jointly into one, leave nothing behind in the bottom; then pour it on a purely separated Lunary Calx, fix it by degrees of fire, then melt it into a body, separate it with an *aqua fort* [and] six times as much [more] of Sol is precipitated than did enter by weight into the ponderosity of the above compound³⁴⁰. The remainder of Lune serveth for such works as you please to put it unto.

The Antimonial tincture being extracted totally from its *vitrum*, and [when] no Vinegar takes more hold of any tincture, then exiccate the remaining powder, which is of a black colour; put it into a melting pot, lute it, let it stand in a reasonable heat [and] all the Sulphurous part burn away; grind the remaining

matter, pour on it new distilled Vinegar, extract its Salt, abstract the Vinegar, edulcorate the acidity by cohobation [and] clarify it so long that the water be white and clear. If you have proceeded well in your manuals, then the lesser time will be required to extract the antimonial Salt as you shall hear of it, whereby you may observe that the antimonial Sulphur is extracted in the following manner and is of the same medicinal operation, but is of a quicker and speedier work, worthy to be observed.

A Short Way To Make Antimonial Sulphur And Salt

Take good Vitriol, common Salt and unslaked Lime, of each one pound, [and] four ounces of Sal Armoniack. Beat them small, put them in a glass body, pour on it three pound[s] of common Vinegar [and] let it stand in digestion, stopped, for a day. Put it afterwards into a retort, apply a receiver to it [and] distil it as usually an *aqua fort* is distilled. Take of the off-drawn liquor and of common Salt one pound of each, rectify them once more; let no muddiness come over with it; all must come clear. Then take one pound of pulverised antimonial glass, pour this Spirit on it, lute it well, digest and let all be dissolved. Then abstract the water *in Balneo Mariae* [and] there remains in the bottom a black, thick, fluid matter, but somewhat dry. Lay it on a glass table [and] set it in a cellar [and] a red oil floweth from it, leaving some feces behind. Coagulate this red oil gently upon ashes, let it be exiccated there, then pour the best Spirit of Wine on it [and] it extracteth a tincture which is blood-red. Cant off that which is tinged, pour other Spirit of Wine on the remainder and [by iteration] let all redness be extracted. Thus you have the tincture of antimonial Sulphur, which is of a wonderful medicinal efficacy and is equivalent unto potable gold as you were told before³⁴¹. This black matter which stayed behind after the extraction of the Sulphur must be well exiccated. Extract its snow-white Salt with distilled Vinegar, edulcorate it, clarify it with Spirit of Wine and observe its virtues in medicine.

I have mentioned and demonstrated that all things are made and compounded of three essences, viz., of Mercury, Sulphur and Salt. But know this that the Stone is made of one, two, three, four and five³⁴².

Of five, that is the quintessence of its matter; of four are understood the four elements; of three are the three principles of all things; of two, for that is the double mercurial substance; of one, that is the *Ens Primum* of all things, which flowed from the *fiat* of the first creation³⁴³.

Many well-minded artists may be doubtful, by all these sayings, to attain the foundation and discovery thereof. Therefore I shall first very briefly speak of Mercury, secondly of Sulphur, thirdly of Salt; for these are essences of our matter of the Stone.

First know that no common Argent Vive is made of the best metal by the Spagyric Art³⁴⁴, [but one that is] pure, subtile, clear, splendent as a fountain, transparent as crystal, without any impurity. Of this make a water or

incombustible oil³⁴⁵, for Mercury was at the first water, as all the philosophers agree.

In this mercurial oil dissolve its proper Mercury, out of which the water was made, and precipitate that Mercury with its proper oil; then have you a double mercurial substance. And know that your Gold must be first dissolved in a certain water after its purification and must be reduced into a subtile Calx as hereafter shall be declared at large. And then the said Calx must be sublimed by Spirit of Salt precipitated again and by reverberation reduced into a subtile powder; then its own proper Sulphur will the more easily enter into its own substance and be in amity with it, for they wonderfully love each other. So have you two substances in one and [it] is called the Mercury of the Philosophers and yet it is but one substance, that is, the first Ferment.

Your Sulphur you must seek in the like metal, then you must know how to extract it out of the body of the metal by purification and destruction of its form and reverberation without any corrosive. Then dissolve this Sulphur in its own proper blood, whereof it was made before its fixation, according to its due weight; then you have nourished and dissolved the true Lion³⁴⁶ with the blood of the Green Lion³⁴⁷; for the fixed blood of the Red Lion is made out of the volatile blood of the Green Lion, therefore are they of one nature. And the volatile blood maketh the fixed blood volatile, and the fixed likewise maketh the volatile blood fixed as it was before its solution. Then set them together in a gentle heat until the whole Sulphur be dissolved; then have you the Second Ferment, nourishing the fixed Sulphur with the volatile as all philosophers agree with me herein. This afterwards is driven over with Spirit of Wine, red as blood, and is called *Aurum Potabile*, whereof there is no reduction to a body.

Of The Salt Of The Philosophers

Salt maketh fixed and volatile according as in its degree it is ordered and prepared. For the Spirit of Salt of Tartar, if it be drawn per se and without addition, maketh all metals volatile by resolution and putrefaction and resolveth them into a true vive or current Mercury, as my practice declares.

Salt of Tartar *per se* fixeth most firmly, especially if the heat of Calx vive be incorporated with it, for both then have a singular degree of fixing.

So also the vegetable Salt of Wine both fixeth and maketh volatile according to the divers[e] preparation thereof, as its use requireth, which certainly is a great Mystery of Nature and a wonder of the philosophic Art.

If a man drink Wine and out of his urine a clear Salt be made, that is volatile and maketh other fixed things volatile and carrieth them³⁴⁸ over the helmet with it, but it fixeth them³⁴⁸ not, and although the man drink nothing but Wine, out of whose urine the Salt was made, yet it hath another property than the Salt of tartar or of the feces of Wine. For there is made a transmutation in the body of man, so that

out of a vegetable, that is out of a Spirit of Wine, an animal Spirit of Salt is made. Horses, by the corroboration of their natural virtue, do transmute oats, hay and such like and convert it into fat and flesh; so doth the bee make honey out of the best of flowers and herbs. So understand of other things. This key and cause consisteth only in putrefaction, from whence such a separation and transmutation taketh its original.

The Spirit of common Salt, which is drawn after a peculiar manner, maketh Gold and Silver volatile; if a small quantity of the Spirit of Dragon³⁴⁹ be added to it, it dissolveth it and carrieth it over with it *per alembicum*, as also doth the Eagle with the Dragon's Spirit, which dwelleth in stony places; but if anything be melted with Salt before the Spirit be separated from its body, it fixeth much more than it volatiliseth.

If the Spirit of common Salt be united with Spirit of Wine and both be three times distilled over together, then it waxeth sweet and loseth its acrimony. This prepared Spirit doth not corporeally dissolve Gold; but if it be poured on a prepared Calx of Gold it extracteth its highest tincture and redness, which, if it be rightly done, it reduceth pure and white Luna into the same colour, whereof its³⁵⁰ body was before it³⁵¹ was extracted. Also the old body³⁵² will again attain its colour by the love of enticing Venus, being descended from the same original, state and blood³⁵³.

Know also [that] the Spirit of Salt destroyeth Luna and reduceth it into a spiritual essence, from whence afterwards *Luna potabile* may be prepared, which Spirit of Luna is appropriated to the Spirit of Sol as man and wife by the copulation and conjunction of the Spirit of Mercury or its oil.

The Spirit lieth in Mercury; seek the tincture in Sulphur³⁵⁴ and the coagulation in Salt³⁵⁵; then have you three matters, which may again produce some perfect thing, that is the Spirit of³⁵⁶ Gold fermented with its own proper oil. Sulphur is plentifully found in the propriety of most precious Venus, which inflameth the fixed blood gotten of her. The Spirit of the philosophic Salt gives victory to coagulation, although the Spirit of Tartar and Spirit of Urine, together with the true *acetum*, may do much; for the Spirit of Vinegar is cold and the Spirit of Calx vive is very hot, therefore are they esteemed and found to be of contrary nature. This I faithfully declare. Seek your matter in a metalline substance, make thereof Mercury, which ferment with Mercury; then a Sulphur, which ferment with its proper Sulphur, and with Salt reduce it into order³⁵⁷; distil them together [and] conjoin them all according to their due proportion, then will it become one thing, which before came from one; coagulate and fix it by a continual heat, then multiply and ferment it three times.

The Key of the process discovering the Tincture is thus. When the Medicine and Stone of the philosophers is made and perfectly prepared out of the true *Lac Virginis*, take thereof one part, of the best and purest Gold, melted and purged by Antimony, three parts and reduce it into as thin plates as possibly you can; put

these together into a crucible wherein you use to melt metals. First give a gentle fire for twelve hours, then let it stand three days and nights continually in a melting fire; then are the pure Gold and the Stone made a mere Medicine of a subtile, a spiritual and penetrating quality. For without the ferment of Gold the Stone cannot operate or exercise its tingeing quality, being too subtile and penetrative; but being fermented and united with its like ferment, the prepared tincture obtaineth an ingress in operating upon other bodies. Then take of the prepared ferment one part to a thousand parts of melted metal, if you will tinge it, then know for a very certain truth that it shall be transmuted into good and fixed Gold; for one body embraceth the other, although they be not alike, yet by the force and power added to it, it is made like unto it, like having its origin from its like.

Note well that out of Black Saturn and friendly Jove a Spirit may be extracted, which is afterwards reduced into a sweet oil as its noblest part, which Medicine, *particulariter*, doth most absolutely take way the nimble, running quality from common Mercury and bringeth him to a melioration.

Having thus attained the matter, nothing remains but that you look well to the fire, that you observe its regimen, for herein is the highest concernment and the end of the work. For our fire is a common fire and our furnace is a common furnace, although some philosophers, to conceal the art, write the contrary³⁵⁸. The fire of the lamp with the Spirit of Wine is unprofitable; the expense thereof would be incredible. *Fimus Equinus* spoileth it, for it cannot perfect the work by the right degree of fire.

Many and various furnaces are not convenient, for in our threefold furnace only the degrees of heat are proportionately observed. And as our furnace is common so is our fire common and as our matter is common, so is our Glass likened to the Globe of the Earth.

Of Mercury

There are several sorts of Mercury. Mercury of animals and vegetables is merely a fume of an incomprehensible being unless it be caught and reduced to an oil; then it is for use. But Mercury of metals is of another condition, as [is] that also of minerals, though the same, also, may be compared with a fume, yet it is comprehensible and running. One Mercury is better and nobler than the other, for the Solar Mercury is the best of them all. Next unto that is the Lunar Mercury and so forth. There is a difference, also, among Salts and Sulphurs. Among the mineral Salts that carrieth away the bell which is made of Antimony and that Sulphur which is drawn from Vitriol is preferred before all others. Mercury of metals is hot and dry, cold and moist; it containeth the four qualities.

There are medicaments prepared of it of a wonderful efficacy, of several sorts and forms, which is the reason why there is such a variety of virtues therein. In Mercury lieth the highest arcanum for man's health, but [it] is not to be used crude, but must first be prepared into its essence. It is sublimed with Copper water and is further reduced into an oil. There is an oil made of it *per se*, without

any corrosiveness, which is pleasant and fragrant. Several sorts of oils, with additionals, can be made of it, good for many things. It is prepared also with Gold, being first made into an *Amalgama*; there is made a precipitate of it in water, wherein it dissolveth green, like unto a Smaragd or Chrysolite. The volatile Mercury serveth for outward use, if a separation is made by some means and [if it] is brought into [a] subtile, clear liquor and then to a red-brown powder and its received corrosiveness is separated, then it may do well for other uses.

The mixed Mercury serveth for inward use. Mercury, being purged, is precipitated with the blood of Venus, is well digested with distilled Vinegar, and thus his corroding quality is taken off. Have a care what quantity you minister; if it is³⁵⁹ given in a true dose, then it does its part very well. But for its operation it is not equally sublimed unto the fixed, its coagulation is found in Saturn, his malleableness is apparent when he is robbed of his life; he containeth his own tincture upon white and red, being brought in his fixed coagulation unto a white body, is tinged again by Vitriol water and being reduced to Gold is graduated by Antimony. Though that bloodthirsty Iron Captain with his spear assaulteth Mercury very much, yet he alone cannot conquer him unless cold Saturn come in to hide him and Jupiter command the peace with his sceptre. Such process being finished, when³⁶⁰ the Angel Gabriel, the Strength of the Lord, and Uriel, the Light of the Lord, hath showed Mercury unto humble Michael, then Raphael can make right use of the highest Medicine³⁶¹.

Of Antimony³⁶²

It is very difficult to find out all the mysteries that are hid therein. Its virtue is miraculous; its power is great; its colour, hidden therein, is various; its crude body is poisonous; yet its essence is an antidote against poison [and] is like unto Quicksilver, which ignorant physicians can neither comprehend nor find, but the knowing physician believeth it to be true, having made many experiments with it.

This mineral containeth much of Mercury, much of Sulphur and little of Salt, which is the cause why it is so brittle and appliable; for there is no malleableness in it by reason of the small quantity of Salt. The most amity it beareth unto Saturn is by reason of Mercury, for philosophers' Lead is made out of it and is affected unto Gold by reason of its Sulphur; for it purgeth Gold, leaving no impurity in it. There is an equal operation in it with Gold if well prepared and [ad]ministered to man medicinally. It flieth out of the fire or³⁶³ keeps firmly in the fire if it be prepared accordingly. Its volatile Spirit is poisonous, purgeth grievously [and] not without damage unto the body. Its remaining, fixed redness purgeth also, but not in that manner as the former did, provoketh not to stool but seeketh merely the disease whatever it is, penetrateth all the body and the members thereof, suffers no evil to abide there, expels it and brings the body to a better condition. In brief Antimony is the Lord in medicinals. There is made out of it a *Regulus* out of Tartar and Salt; if at the meeting of Antimony some Iron filings be added, by a manual used there cometh forth a wonderful Star, which philosophers before me called the Signet Star³⁶⁴. This Star being several times melted with cold earth

Salt, it groweth then yellowish, is of a fiery quality and of a wonderful efficacy. This Salt afterwards affords a liquor, which further is brought to a fix[ed], incombustible oil, which serveth for several uses.

Besides there are made of common Regulus of Antimony curious flowers, either red or yellow or white, according as the fire hath been governed. These flowers being extracted and the extract, without any addition, *per se* being driven into an oil, have an admirable efficacy. This extraction may be made also with Vinegar of crude Antimony or of its *Regulus*, but it requireth a longer time, neither is it so good as the former preparation.

And being reduced into a *Philistea* there is a glass made of it *per se*, which [if it] is extracted also, [and] then abstracted, there remaineth a powder of incredible operation, which may safely be used after it hath been edulcorated. This powder, being dissolved, healeth wounds, sores etc., causing no pains. This powder being extracted once more with Spirit of Wine, or driven through the helmet with some other matter, affords a sweet oil.

Antimony is melted also with cold earth Salt, dissolved and digested for a time in Spirit of Wine. It [then] affords a white fixed powder [which] is effectual against *Morbus Gallicus* [and] breaks inward imposthumes. It hath several virtues besides.

There is made an oil also of Antimony, the Flying Dragon³⁶⁵ being added thereunto, which, being rectified thrice, then it is prepared. Though a cancer were never so bad and the wolf³⁶⁶ never so biting, yet they, with all their fellows, be they fistulas or old ulcers, must fly and be gone. The little powder of the Flying Dragon prepared with the Lion's Blood, must be [ad]ministered also, three or four grains for a dose according to the party's age and complexion.

A further process may be made with this oil with the addition of a water made of stone serpents³⁶⁷ and other necessary spices, not those that are transported from the Indies. This powder is of that efficacy that it radically cureth many chronical diseases. There is made a red oil of Antimony, Calx vive, Sal armoniack and common Sulphur, which hath done great cures in old ulcers; with stone Salt or with common Salt there is forced from Antimony a red oil which is admirable good for outward symptoms.

There is made a sublimate of Antimony with Spirit of Tartar and Salmiac³⁶⁸, being digested for a time, which by means of Mars is turned into quick Mercury. This antimonial Mercury hath sought of many but few have gotten it, which is the reason why his praise is not divulged, much less is his operative quantity³⁶⁹ known. If you know how to precipitate it well, then your arrow will hit the mark to perform great matters; its qualities ought not to be made common [knowledge]. It is needless to describe its combustibile Sulphur, how that is made out of Antimony; it is easy and known; but that which is fixed is a secret and hidden

from many. If an oil be made of it in which its own Sulphur be dissolved and these be fixed together, then you have a Medicine of rare qualities, in virtue, operation and ability far beyond vegetables.

Quicksilver being imbibed with Quicksilver melted with Antimony for some hours in a wind oven, the Salt of the remainder being extracted with distilled Vinegar, then you have the philosophers' Salt, which cureth all manner of agues.

There is an *acetum* made of Antimony, of an acidity as other *acetums* are; if its own Salt be dissolved in this *acetum* and distilled over, then this *acetum* is sharpened, which is an excellent cooler in hot swellings and other inflamed symptoms about wounds, especially if there be made an unguent of it together with *anima* of Saturn.

There is a quintessence of Antimony, which is the highest Medicine, the noblest and subtilest found in it and [it] is the fourth part of an Universal Medicine. Let the preparation of it be still a mystery. Its quantity or dose is three grains. There belong four instruments to the making of it; the furnace is the fifth, in which Vulcan dwelleth; the manuals and the government of the fire afford the ordering of it.

Of Copper -- water

Copper is a mineral whose Salt is set forth in the highest manner, whose³⁷⁰ great and good qualities are of the transcendancy that reason is not able to comprehend or to conceive of them. It went generally by the name of Copper-water to make the meaning and sense of it plain. And be thus informed that Vitriol containeth two Spirits, a white and a red one; the white is the white Sulphur upon white, the red Spirit is the Red Sulphur upon red.

Observe it diligently. The white Spirit is sour, causeth an appetite and a good digestion in a man's stomach; the red Spirit is yet sourer and is more ponderous than the white; in its distilling a longer fire must be continued because it is more fixed³⁷¹ in its degree. Of the white, by distilling with³⁷² Sulphur of Lune, is made *Argentum potabile*. In the like manner the Gold³⁷³, being destroyed in the Spirit of common Salt and made spiritual by distilling and its Sulphur taken away from it and joined with a red Spirit in a due dose, that it may be dissolved and then for a time putrefied in Spirit of Wine, to be further digested and often abstracted that nothing remain in the bottom, then you have made an *Aurum potabile* of which great volumes have been written, but very few of their processes were right.

Note that the red Spirit must be rectified from its acidity and brought into a sweetness subtly penetrating? of a pleasant taste and sweet fragranc^y.

The sweet Sulphur is made of Sulphur of Vitriol, which is combustibile like other Sulphur before it is destroyed. For the Sulphur of the philosophers is not combustibile. Note this well. The preparation is easy [and] requireth no great

pains nor great expenses to get a combustible Sulphur out of Vitriol. This sweet oil is the essence of Vitriol and is such a Medicine which is worthy the name of the Third Pillar of the Universal Medicine. The Salt is drawn from Colchotar³⁷⁴ and is dissolved in the red or white oil or in both and is distilled again; if it be fermented with Venus it performeth its office very well, for it affords such a Medicine which at the melting tingeth pure Iron into pure Copper.

Colchotar of Sulphur affords true fundamentals unto [the] healing of perished wounds, which otherwise are hardly brought to any healing, and such sores which by reason of a long continued white redness will admit of no healing. Colchotar affords an ingress thereunto, setting a new foundation that quality and virtue are not in the Colchotar, but the Spirit, together with the Salt, are the matters which dwell therein.

There is made of Copper and Verdigris a Vitriol of a high degree, which³⁷⁵ is far spread in its tincture. There is a Vitriol made of Iron also, which is of a strange quality; for Iron and Copper are very nigh kind³⁷⁶ one to another, belong[ing] together as man and wife. This mystery I would have concealed.

[When] Vitriol [is] corroded with Sal Armoniack in its sublimation, there ariseth a combustible Sulphur together with its Mercury, of which there is but little because it hath most of Sulphur. If the same Sulphur be set at liberty again by the Eagle³⁷⁷ with Spirit of Wine, there can be made a Medicine of it, as I told you before, though there be a nearer way to make combustible Sulphur out of Vitriol, as of its precipitation upon a precedent dissolution by the Salt or Liquor of Tartar, as also by a common *lixivium* made of Beech-ashes; yet this is the best reason, because the body of Vitriol is better and more opened with the Key of the Eagle³⁷⁷. There is not found in its nature either cold or moist quality, but [it] is of a hot and dry, substantial quality and [this] is the reason why, by its superabounding calidity, it heateth other things, digesteth them and at last it bringeth them to a full maturity, the fire being continued for a certain time.

Of Common Sulphur

The usual common Sulphur is not so perfectly exalted in its degree and brought into maturity as [when] it is found in Antimony and Vitriol. There is made of it *per se* an oil against putrid, stinking wounds, destroying such worms which grow in them, especially if the little Salt in it be dissolved from its Sulphur.

There is made of it a balsam with Sallet oil³⁷⁸ or oil of Juniper, in like manner with the white Spirit of Turpentine, and [it] is of a red colour [and] is made thus. Take o? Flowers of Sulphur made with Colchotar of Vitriol and digest them for a time in horse-dung. This balsam may safely be used for such that are in a consumption of the lungs, especially [if it] be rectified several times with Spirit of Wine, drawn over and separated, that it be blood red. This balsam is a preservative against corruption and rottenness.

The quintessence of Sulphur is [found] in a mineral where a sulphureous flint is generated. Thus [let] beaten pebbles [be] put in a glass and on it be poured a strong *aqua fort*, made of Vitriol and Saltpeter, and let dissolve what may be dissolved, [then] abstract the water; the remainder must be well dulcified and reverberated to a redness; pour on that Spirit of Wine, extract its tincture [and] afterwards circulate for a time in the Pelican; let all the essence of Sulphur be separated, it stayeth below the Spirit of Wine like [a] fat Sallet oil, by reason of its ponderousness; its dose of six grains is found to work sufficiently. If you digest in this essence of Sulphur, Myrrh, Aloes and other Spirits, it extracts their virtues and makes them³⁷⁹ into a balsam, which suffers no flesh or other parts that are subject to putrefaction to fall into rottenness, for which reason the ancients have put this name to it, *Balsamus mortuorum*. There may be made an oil of it³⁸⁰ which is found very useful. The Sulphur may be sublimed in a high instrument with a good heat, which sublimation in a long time changeth [it] into a liquor or oil [if left] standing in a humid place.

There may be cocted a Liver out of common Sulphur, which is turned into milk, and it may also be changed into a red oil. Many other Medicinals may be made out of Sulphur. Its Flowers, Essence and Oil are preferred before the rest, together with the white and red fixed Cinnabar³⁸¹ which are made of it, because in them is found a mighty virtue.

Of Calx Vive

The secrets of Quicklime are known to few men and few there are which attained to a perfect knowledge of its qualities. But though Lime is contemptible, yet there lieth great matters therein and [it] requireth an understanding master to take out of it what lieth buried in it. [By this] I mean to expel its pure Spirit, which colaterally stands in affinity with minerals, is able to bind and help to make fix[ed] the volatile Spirits of minerals, for it is of a fiery essence [and] heateth, concocteth and bringeth [them] unto maturity in a short time, when in many years they could not [otherwise] be brought to it. The gross, earthly body of it doth not do the feat, but its Spirit doth it, which is drawn out of it. This Spirit is of that ability that he bindeth and fixeth other volatile Spirits.

For note, the Spirit dissolveth *Occuli cancròrum*³⁸², dissolveth crystals into a liquor. These two being duly brought into an unity *per modum distillationis* (I will say nothing now of Diamonds and such-like stones) that water dissolveth and breaketh the stones in the bladder and the gouty Tartar settled into the joints of hands and feet [and] suffers not any gout to take root in those parts. This is a rare secret. Quick Lime is strengthened and made more fiery and hot by a pure and unsophisticated Spirit of Wine, which is often [to be] poured on it and abstracted again; then the white Salt of Tartar must be grinded with it, together with its additionals which must be dead and contain nothing, then you will draw a very hellish Spirit, in which great mysteries lie hid.

Of Arsenick

Arsenick is in the kindred of Mercury and Antimony as a bastard in a family may be. Its whole substance is poisonous and volatile, even as the former two; in its external colour to the eye it is white, yellow and red, but inwardly it is adorned with all manner of colours, like to its metals, which it was fain to forsake, being forced thereunto by fire. It is sublimed *per se* without additions and also in its subliming there are added several other matters as occasion requireth. If it be sublimed with Salt and Mars, then it looks like a transparent crystal, but its poison stayeth still with it, unfit to be joined or added to metals [and it] hath very little efficacy to transmute any metals.

The subterranean Serpent bindeth it in the union of fire, but cannot quite force it that it might serve for a Medicine for man and beast. If it be further mixed with the Salt of a Vegetable Stone³⁸³, which is with Tartar³⁸⁴, and is made like unto an oil, it is of great efficacy in wounds which are of an hard healing. It can make a coat for deceitful Venus, to trim her handsomely, that the inconsistency of her false heart may [not?] be disclosed by her wavering servants, without gain, with her prejudice and damage. When Antimony and Mars are made my companions [saith Arsenick], and [I] am exalted by then to the top of Olympus, then I afford a Ruby in transparence and colour [like un]to that which cometh from [the] Orient and I am not to be esteemed less than it. If I am proved by affliction, then I fall off like a flower which is cut off and withers, therefore nothing can be made of me to fix any metal or tinge it to any profit.

Of Salt Peter

Two elements are predominant in me, as fire and air; the lesser quantity is water and earth. I am fiery, burning and volatile. There is in me a subtile Spirit, I am altogether like unto Mercury, hot in the inside³⁸⁵ and cold in the outside. [I] am slippery and very nimble at the expelling of my enemies. My greatest enemy is common Sulphur and yet is [he] my best friend also, for being purged by him and clarified in the fire, then am I able to allay all heats of the body within and without and am one of the best Medicaments to expel and keep off the poisonous plague.

I am a greater cooler outwardly than Saturn, but my Spirit is more hot than any. I cool and burn according as men will make use of me and according as I am prepared. When metals are to be broken I must be a help, else no victory can be obtained, be the understandings great or small. Before I am destroyed I am a mere ice, but when I am anatomised, then am I an hellish fire.

Of Sal-armoniack

Sal-armoniack is none of the meanest Keys to open metals thereby, therefore the ancients have compared it with a volatile Bird. It must be prepared, else you can do no feats with it, for if it be not prepared it doth more hurt than good unto metals [and] carrieth them away out of the chimney hole. It can elevate and sublime with its swift wings the tincture of minerals and of some metals to the very mountains, where store of snow is found usually, even at the greatest heat

of summer. If it be sublimed with common Salt, then it purgeth and cleareth and may be used safely.

He that supposeth to transmute metals with this Salt, which is so volatile, surely he doth not hit the nail on the head, for it hath no such power; but to destroy the metals and make them fit for transmutation, in that respect it hath sufficient power, for no metal can be transmuted unless it be first prepared thereunto.

Of Tartar

This Salt is not set down in the book of minerals but is generated of a vegetable seed³⁸⁶, but its Creator hath put such virtue into it that it beareth a wonderful love and friendship unto metals, making them malleable. It purgeth Lune unto a whiteness and incorporateth into her such additional which are convenient for her; being digested for a time with minerals or metals and then sublimed and vilified³⁸⁷, they all come into a quick Mercury, which to do there is not any vegetable Salt besides it. Many mysteries lie hid in it. It is a good remedy either outwardly or inwardly in Medicine; its Salt being made spiritual and sweet it dissolveth and reakteth the stone in the bladder and dissolveth the coagulated Tartar of the gout settled into the joints or anywhere else besides. Its ordinary Spirit, which is used for [the] opening of metals, being used and applied outwardly, layeth a foundation for healing such ulcers which admit hardly any healing, as fistulas, cancers, wolves and such-like.

Of Vinegar

In Alchemy and Medicine nothing, almost, can be prepared but Vinegar must set a helping hand to it. In Alchemy it is used to set metals and minerals into putrefaction. It is used also for to extract their essences and tinctures, being first prepared thereunto even as the Spirit of Wine is usual to extract the tinctures from vegetables.

In Physic it deserveth its praise also, for it taketh the pure from [the] impure and is a separator and taketh from the mineral Medicaments their sharpness and corrosiveness, fixeth that which is volatile and is a great defender against poison. Vinegar is used inwardly also and both men and beasts are benefited thereby. Outwardly it is applied to hot inflammations and swellings for a cooler. Spirit of Wine and Vinegar are of great use both in Alchemy and Physic. Both have their descent from the Urine [and] are of one substance, but differ in the quality by reason of [the] putrefaction the Vinegar got there. But this is not the philosophers' Vinegar. Our Vinegar or *Acetum* is another liquor, namely a matter itself³⁸⁸ for the Stone of [the] Philosophers is made out of the Azot of [the] Philosophers, which must be prepared with ordinary distilled Azot, with Spirit of Wine and with other waters besides and must be reduced unto a certain order.

Note this for a memorandum. If distilled, pure Vinegar be poured upon destroyed Saturn and is kept warm in Mary's Bath, it looseth its acidity altogether [and] is as sweet as sugar; then abstract two or three parts of that Vinegar, set it in a cellar

[and] then you will find white, transparent stones like unto crystals. These are an excellent cooler and healer of all adust³⁸⁹ and inflamed symptoms.

If these crystals are reduced into a red oil and poured upon Mercury precipitated by Venus and proceeded in further as it ought; if that [I say] be done³⁹⁰ rightly, then neither Sol nor Lune will hinder thee from getting riches.

Of Wine

The true Vegetable Stone is found in Wine, which is the noblest of all vegetables. It containeth three sorts of Salt, three sorts of Mercury and three sorts of Sulphur.

The first Salt sticketh in the wood of the Wine, which, if [it be] burnt to ashes and a *lixivium* made of it [is able to] have its Salt drawn forth, which must be coagulated. This is the first Salt.

The second Salt is found in Tartar, if that be incinerated; then draw its Salt forth, dissolve and coagulate it several times and let it be sufficiently clarified.

The third Salt is this. When the Wine is distilled it leaveth feces behind, which are [to be] made to powder; its Salt can [then] be drawn out with warm water.

Each of these Salts hath a special property. In their centre they stand in a harmony, because they descend from one root.

It hath three sorts of Mercury and three sorts of Sulphur. The first oil is made of the steam, the second oil is made out of crude Tartar, the third is the oil of Wine.

There is a strange property in the Spirit of Wine, for without it there cannot be extracted any true tincture of Sol, nor can there be made without it any true *Aurum Potabile*; but few men know how a true Spirit of Wine is made, much less can its property be found out wholly. Several ways have been tried to draw and to get the Spirit of Wine without sophistication, as by several instruments and distillings with metalline Serpents and other strange inventions, of sponges, papers and the like. Some caused a rectified *Aqua vitae* [to] be frozen in the greatest frost, expecting the phlegm thereof should turn to ice [and] the spirit thereof to keep liquid, but nothing was done to any purpose.

To Make A True Spirit Of Wine

Take *Vinum Adustum*³⁹¹ and put it into a strong Vessel, which will endure the fire; light it with a match of Brimstone and put quickly a head of Iron or Copper upon it and the true, fiery Spirit will be resolved into a water in the receiver, which must be large. This is the true aerial, fiery Spirit of Wine. It must be subtile, penetrating, without any phlegm, pure, aerial and volatile, so that air in a magnetic quality may attract it; therefore it had need to be kept close in. It is of a penetrating and effectual operation.

There are three which are the noblest creatures in the world; these three have a wonderful affection one to another³⁹². Among animals it is man, out of whose Mummy is made an Animal Stone, in which [the] Microcosm is contained. Among minerals Gold is the noblest, whose fixedness is a sufficient testimony of its noble offspring³⁹³ and kindred. Among vegetables there lieth hid a Vegetable Stone³⁹⁴. Man loveth Gold and Wine above all other creatures, which may be beheld with the eyes. Gold loveth Man and Wine, because it lets go its noble part if Spirit of Wine be put to it, being made potable, which giveth strength to Man and prolongeth his life in health. Wine beareth affection to Man also and to Gold, because it easily uniteth with the tincture of Sol, expelleth melancholy and sadness [and] refresheth and rejoiceth Man's heart. These Stones renew men and beasts, cure leprous metals and cause barrenness to become fruitful with a new birth.

The True Preparation Of Aurum Potabile Without Sophistication

First [I will describe] what is that true and highest *Aurum potable* and Universal Medicine. After this in order there followeth another *Aurum potable* made of the fixed red Sulphur or Soul of the corporeal Gold, most highly purged, and [it] is prepared with the conjunction of the Universal Spirit of Mercury. After this there followeth another particular Medicine, which is half an *Aurum potable*, showing its efficacy and power in many trials. Then I will add thereunto a description of *Aurum potable*, because it traceth the steps of Gold and it sheweth wonderfully its great energy and virtues.

The highest and chiefest *Aurum potable* which the Lord god hath laid into Nature is the excocted, prepared and fixed substance of our Stone before it is fermented. A higher, greater and more excellent Universal Medicine and *Aurum potable* cannot be found nor had in the circumference of the whole world; for it is a heavenly balsam because its first principles and original cometh from heaven, made formal in earth or under ground, and is afterwards, being exactly prepared, brought into a *plusquam* perfection, of which first principle and nativity of this heavenly substance I have already writ sufficiently.

Now as this excocted and perfect substance is the highest, chiefest and greatest Universal Medicine unto man, even so, on the other side, the same matter, after its fermentation, is a tincture also and the chiefest, greatest and most powerful Universal Medicine upon all metals whatsoever and thereby [they] may be transmuted into their highest melioration and health, namely into the purest Gold.

This is the first, chiefest and greatest *Aurum potable* and Universal Medicine of the whole world, of which alone great volumes could be writ, whose preparation is already written.

Now I will declare the true and full process how a true *Aurum potable* is to be made.

How true *Aurum potabile* is to be had and prepared from Gold, which in the best manner is exactly putrefied. Take the extracted Soul of Gold, draw[n] forth with the sweet Spirit of common Salt, as I informed you about the Particular of Gold³⁹⁵, where the body of Gold appeared very white; abstract the Spirit of Salt from it; edulcorate the *anima* of Sol ten or twelve times [and] at last let it be exiccated. Weigh it; pour on it four times as much of Spirit of Mercury; lute it well; set it in the Vaprous bath [and] putrefy it gently. Let the *anima* of Sol be quite dissolved and be turned into water or its *prima materia*. Both will turn into a blood-red liquor, fair and transparent, no Ruby on the earth [being] comparable unto it.

But note, when the *anima* of Sol begins to be dissolved and brought into its *prima materia*, that at the first, on the side round the glass where the matter lieth there [will] be seen a green circle, on it a blue, then a yellow. Afterwards all the colours of the rainbow join and make appearance, which do but last a little while³⁹⁶. The *anima* of Sol being wholly dissolved into the Mercurial Spirit, and [when] nothing is seen in the bottom, then pour to it twice as much of the best rectified Spirit of Wine, brought to its highest degree. The glass must be luted exactly. Digest and putrefy gently for twelve or fifteen days together, then abstract *per alembicum*, [when] the matter cometh over in a blood-red, transparent colour. This abstracting must be iterated; nothing must be left in the bottom which is corporeal; then you have the true *Aurum potabile*, which can never be reduced into a body.

But note, the Gold, before its destruction and [the] extraction of its Soul, must be purged in the highest degree. There is made another *Aurum potabile* and [one that is] artificially prepared, which, though it cannot be said or set down in writing to be the full and true potable Gold, yet is it [counted] more than half an *Aurum potabile* because it is transcending effectual in many diseases in which Nature might have stood in great doubts. This half *Aurum potabile* is made in a two-fold manner, where the latter is better and more effectual than the former and asketh more pains and time than the former.

Take this extracted Soul of Gold drawn forth with the sweet Spirit of common Salt, edulcorate it most purely and exactly [and] at last exiccate it [and] put it in a spacious viol or body of glass. Pour on it red oil of Vitriol, which was dephlegmed and rectified *per retortam* that it be transparent, clear and white and you see that it seizeth on the Gold and dissolveth it and is tinged deeply red. Put so much of this oil to it that in it may be dissolved [the] Sulphur or the Soul of Gold. Let it putrefy in *Balneo Mariae* [and] put a reasonable fire to it, that you may see that the Soul of Gold is quite dissolved in the oil of Vitriol. The feces which it hath settled must be separated from it; then put twice as much of the best rectified Spirit of Wine to it, which rectification you shall be further informed of, seal the glass, let no Spirits of Wine evaporate [and] set it again in putrefaction in the *balneum*; let it be there for a month, then the sharpness of the Vitriol is mitigated by the Spirit of Wine and loseth its acidity and sharpness [and] both together

make an excellent Medicine; drive both over [and] let nothing stay behind in the bottom, then you get more than half an *Aurum potabile*, in form and colour of a deep yellow liquor.

Note that some metals in this manner may be proceeded withal. First a Vitriol may be gotten out of the metal, then a Spirit is further driven from it and joined in this manner with the Soul [and] dissolved and further digested with Spirit of Wine. All must enter into a Medicine as I formerly said, which [Medicines] have their special efficacy.

The second way to prepare this half *Aurum potabile*, which though it be but half an *Aurum potabile*, yet in virtue and efficacy, is far preferred before the other now spoken of, is done as followeth³⁹⁷.

Take the extracted solar Soul spoken of above, put it into a viol [and] pour on it the extracted philosophic Sulphur, which is the second principle, which is drawn with Spirit of Mercury from the philosophers' earth and Mercury, or Spirit of Mercury, unto an oleity, which now is Sulphur again and must be abstracted gently *per modum distillationis*.

Of this philosophic Sulphur pour on it as much that the solar Soul may be dissolved. Let it stand in a gentle bath, let the dissolution be made, then pour more of the best Spirit of Wine to it, digest gently, draw these over, let nothing stay behind in the bottom [and] then you have a Medicine that shall not want above two grains of the right and true *Aurum potabile*.

Those are the chieftest ways to make the corporeal *Aurum potabile*. This I close and proceed further with a short but true process how the Silver, which is the next to Gold concerning perfection, is made potable also. This process must be done in the following manner.

Take the sky-coloured Sulphur or Spirit of Lune, which was extracted with distilled Vinegar as I informed you in the particular of Lune³⁹⁸, edulcorate it, rectify it with Spirit of Wine, exiccate it, put it in a viol, pour to it three times as much of Spirit of Mercury, which is prepared from the white Spirit of Vitriol as I taught you before, lute the glass firmly, set it in putrefaction in the vaporous bath [and] let all be dissolved and nothing more see in the bottom. Then put to it an equal quantity of the best Spirit of Wine, set it in digestion for half a month, drive all over, let nothing stay behind [and] then you have the true potable Luna which in its efficiency is admirable and doth wonders when it is used.

A Description Of The Fiery Tartar

Distil of good Wine a Spirit of Wine, rectify it with white calcined Tartar, let all come over [and] put that which is distilled over into a viol. Pour four ounces of well sublimed Sal-armoniack to one quart of Spirit of wine, set a helmet upon [it],

set a great receiver into cold water [and] drive the volatile Spirits into [it] gently *in Balneo Mariae*. Leave but a little quantity of it behind. Note the alembick must always be cooled with wet cloths, then the Spirits will be dissolved and turn into a liquor. Thus is prepared this hot Spirit of Wine.

Of The Salt Of Tartar

First you must note that the philosophers' Tartar is not the vulgar Tartar, wherewith the lock is opened, but it is a Salt which cometh from root³⁹⁹ and is the only mystical Key for all metals and is prepared thus: Make a sharp *lixivium* of the ashes of Sarments⁴⁰⁰ or twigs of the vine⁴⁰¹, boil away all its moisture [and] there stayeth behind a ruddy matter, which must be reverberated for three hours in a flaming fire. Stirring it still, let it come to a whiteness, which white matter must be dissolved in distilled rain water; let the feces of it settle [and] filter and coagulate them in a glass, that the matter in it be dry, which dry matter is the Salt of Tartar from which the true Spirit is driven⁴⁰².

Note. As precious stones have many rare virtues and qualities, so there are many despicable and ignoble stones, which have great virtues, [as] for example the Limestone, Calx vive, which in men's judgements is held of no great value and lieth contemptibly in obscurity; however there is a might virtue and efficacy in it which appeareth if application be made of it to the most heaviest diseases, seeing that its triumphant and transcendent efficacy is almost unknown for the generality; therefore for the good of such which are inquisitive into natural and supernatural mysteries I will discover this mystery concerning Calx vive and show how its Spirit is driven from it, which work, indeed, requireth an expert artist who is well informed aforehand of its preparation.

Take unslaked Lime as much as you will; beat and grind it on a well dried stone to an impalpable powder [and] put on it so much of Spirit of Wine as the pulverised Calx is able to drink. There must not stand any of that Spirit upon it. Apply a helmet to it and lute it well and put a receiver before it [and] abstract the Spirit from it gently *in Balneo*; this abstracting must be iterated eight or ten times. This Spirit of Wine strengtheneth the Spirit of Calx mightily and [it] is made more fiery hot. Take the remaining Calx out of the body, grind it very small and put to it a tenth part of Salt of Tartar, which is pure, not containing any feces.

As much as this matter weigheth together, add as much of the additional of Salt of Tartar thereunto, namely the remaining matter from which was extracted the Salt of Tartar, and it must be well exiccated. All this must be mingled together and put in a well coated retort. Three parts of the retort must be empty. Lute⁴⁰³ a great receiver or body to it very strongly. Note [that] the body into which the retort's nose is put must have a pipe of a finger's breadth unto which may be applied another body and a quantity of Spirit of Wine in it. Then give a gentle fire to it. At first there comes over some of the phlegm, which falls into the first applied body. The phlegm being all come over, then increase the fire [and] there cometh a white Spirit to the upper part of the body, like unto the white Spirit of

Vitriol, which doth not fall among the phlegm but slideth through the pipe into the other body [and] draweth itself into the Spirit of Wine, embracing the same as one fire doth join with the other. Note [that] if the Spirit of Calx be not prepared first by the Spirit of Wine and drawn off and on as I told, then he does not so, but falleth among the phlegm where he is quenched [and] loseth also all his efficacy. Thus difficult a matter is it to search Nature th[o]roughly, [she] reserving [as she does] many things unto herself. This Spirit being fully entered into the Spirit of Wine, then take off the body [and] put away the phlegm, but keep carefully the Spirit of Wine and Spirit of Calx.

Note both these Spirits are hardly separated because they embrace closely one another and being distilled they come over jointly.

Therefore take these mixed and united Spirits, put them into a jar-glass [and] kindle it; the Spirit of Wine burneth away, [but] the Spirit of Calx stayeth in the glass; keep it carefully. This is the great arcanum; few of other Spirits go beyond its efficacy if you know how to make good use of it. This Spirit dissolves *occuli cancrorum*⁴⁰⁴ [and] the hardest crystals. These three being driven over together and often iterated in that distilling, three drops of that liquor being ministered in warm wine break and dissolve any gravel and stone in man's body, expelling their very roots [and] not putting the patient to any pain.

This Spirit of Calx at the beginning looks bluish [but] being gently rectified [it] looks white, transparent and clear, leaving few feces behind. This Spirit dissolveth the most fixed jewels and precious stones. On the other side he fixeth all volatile Spirits with his transcendent heat.

This Spirit conquereth all manner of podagrical⁴⁰⁵ symptoms, be they never so nodose⁴⁰⁶ and tartarous; [it] dissolves them and expels them radically.

Of Vitriol And Its Preparation As Also Of Its Power And Virtue

Take good Hungarian Vitriol, calcine it till it be of a yellowish colour and no higher; grind this calcined Vitriol very small, put it into a distilling vessel with a long neck, well luted, *luto sapientiae*. Put thereto a large receiver and begin to distil day and night with a very gentle fire, that gives not a stronger heat than the Sun doth in a hot day. Afterwards increase the fire by degrees, forcing at last the Spirits with the strongest fire, till red, visible drops do come over, which work hath taken up three days and nights. This being done take that which is left in the distilling vessel, commonly called *Caput Mortuum*, and grind it small. Pour on it clean rain water, first distilled, and boil therein the Cholcotar and the Salt of Vitriol will go into the water. The water being settled and clear, filter it that the feces may be separated. Let the water vapour away in some glass vessel till the Salt be dry, [then] dissolve the Salt again in rain water, first distilled and let it vapour away again to dryness. Repeat this operation the third time and the Salt of Vitriol will be very fair, clean and clear. Put this dry Salt into a crucible of glass and pour

on it the above made Spirit of Vitriol; lute the glass *luto sapientiae* and set it in digestion for some days. This being done, open the glass and put the materials together into a retort of glass and distil them [at] first gently; and when it ceaseth to drop, increase the fire and force it over till nothing will come more. Let it become cold and then take the Spirit out of the receiver, which must be somewhat large and strong. Put the Spirit into a glass body and rectify it by distillation till it be freed from the phlegm and the matter in the glass body appear to be of a red-brown colour.

Then take the glass body and set it with the said matter in a cellar and there will shoot from it very clear, white, transparent crystals. Put these transparent crystals into a large phial with a very large and long neck and pour on them the first white Spirit of Turpentine and it will boil up and foam; therefore you must be careful and not over hasty in doing this. The crystals will dissolve and the Spirit of Turpentine will grow transparent [and] as red as blood. This being done, pour on it three times the weight of common Spirit of Wine freed fully from its phlegm, so that it stand two fingers high above it. Then put a little head of glass upon the neck of the phial, luting it well, join it to a receiver and distil very gently the Spirit of Wine *in Balneo Mariae* and the tincture of Vitriol comes over very pleasant[ly] with the Spirit of Wine and that which is corrosive remains behind with the oily parts of the Spirit of Turpentine. The Spirit of Wine being come with the tincture, put it together into another phial and pour on it some fresh Spirit of Wine and distil again gently *in Balneo Mariae* as you did before; if any corrosive be come over with the fire it will now stay behind. Repeat this operation the third time and the work is done and perfect. Put this fair, red, transparent Spirit of Vitriol into a Pelican, add to it at once half an ounce of well pulverised Unicorn's horn⁴⁰⁷ and let it stand in circulation in a gentle heat a whole month. Then pour it off very clear from the feces and the tincture of Vitriol is prepared for the Medicine, of a very pleasant taste, and is to be used after this manner following, to wit: Let him that is troubled with the falling sickness⁴⁰⁸ take half a dram of it in a spoonful of *Lillum Convallium* water when the fit is coming upon him. Thus let him use it three times and the Medicine will cure him by the help of God. He that is mad and distracted should take it likewise in Wine for the space of eight days and he will have reason to give God thanks for it. Moreover if it be taken in wine it doth resolve any hardness settled in the nerves and if it be constantly used for some time, even the gout itself is consumed and cured thereby.

Likewise it maketh those who are melancholy and troubled with sadness, if it be used as before, very cheerful and light-hearted; it dispelleth all sadness and breedeth good and pure blood. It hath been found very excellent in swimings and giddiness in the head; it comforteth the brain and preserveth the memory. If it be administered in consumptions of the lungs and any other coughs in the manner aforesaid, it will cure those distempers and is very useful for many other things.

An Addition

Take Sal Armoniack, dissolve a considerable quantity of it in the strongest Vinegar and add to it filings of Copper. Let it putrefy in heat till the filings are all grown friable so that they may be grinded into powder and you will have a yellow powder, which edulcorate well.

Having done so, dry the powder and pour on it the red *Aqua Vitae Vitrioli*, which hath been distilled over with its proper Salt, so that it cover it all over. Set it thus in heat and the powder of the Copper will be dissolved in the oil, but there must be some fair water be mixed with it. Then draw it off in sand to dryness and the phlegm comes over. The remainder force out of a retort in an open fire and you will find an *Oleum Veneris*, green [and] transparent like an Emerald. Put again into this *Oleum* some of the powder of Copper and it will be dissolved in it. Then coagulate to dryness and you have a powder, half an ounce whereof will transmute a whole pound of Iron, being in flux, into very good Copper.

Of The Sweet Essence Of Vitriol

The sweet Essence of Vitriol, whereby many wonderful cures may be wrought, is only prepared out of its Sulphur, which burneth like other Brimstone. To obtain this proceed after this manner. Take of the best Vitriol you can get [and] dissolve it in fair fountain water; after this take Pot-ashes, such as dyers use for their dyeing [and] these dissolve likewise in fair fountain water; let it settle well and then pour off the clear from the dregs and add it to the solution of Vitriol and one will enflame the other and cause a separation. For the Sulphur of Vitriol doth separate itself by precipitation. Make a considerable quantity of it and edulcorate it from all impurity. Afterwards dry the same Sulphur, which will burn like other Sulphur, being cast upon glowing coals.

Take now this Sulphur and sublime it by itself without any addition and there will remain some feces, which separate and put away. Then take the Sulphur and grind together with it half its weight of common Salt of Tartar and distil them together through a retort and there will come over a reddish oil. Pour to this oil some distilled Vinegar and there will precipitate a brown powder and the Spirit of Tartar remaineth in the water. Edulcorate the same powder very well, for therein is the treasure to be looked after. This work being done, pour some Spirit of Wine on the said powder and let it circulate in heat for eight days. Thus the excellent sweet Essence of the Sulphur of Vitriol goeth into the Spirit of Wine and swimmeth upon the top, *in forma olei*, like an oil of cinnamon. Then separate the essence from the Spirit of Wine by means of a separating glass and keep it very carefully for use, it being a great treasure.

The Use Of This Medicine

This Essence of Sulphur, four grains of it being taken in Balm water, drieth up the bad humours of the blood, strengtheneth and incites men and women to copulation, cleanseth the womb, hindreth the rising of the mother and breedeth good sense for the procreation of children.

The same quantity being taken in parsley water and continued for a fortnight, doth consume all phlegmatic humours of the whole body cures the dropsy radically, drives out the putrefied blood [and] openeth imposthumes, yea you will find it do wonderful cures if you will be industrious and careful in the preparation thereof; but you must never whilst you live forget God your Creator, to call upon Him for a blessing and to render to Him thanks for all His fatherly benefits He hath bestowed upon you.

The Preparation Of The Stone Ignis⁴⁰⁹

Now I will teach you the chiefest preparation of Antimony and the use of it in Medicine. In this Antimony are hidden and found so many wonderful mysteries that there is none too old to learn and to search to find them out. I will instruct you to make some preparations which are also required to other things.

Take pure mineral Antimony, which is brought from Hungary, grind it very small and wash it very clean, that the earth may be separated from it. Take then a pound of it, mix with it as much of fluxing powder and melt it once again and then the *Regulus* will be clean and pure.

Add to this *Regulus* its weight of Nitre and melt it down. Pour it out together and beat off the *Scoriae* and put again to the *Regulus* its weight of Nitre and melt it.

Repeat this till all is gone into *Scoriae*, which you must carefully keep; they will burn upon the tongue like fire. This being done, take the matter so gathered, grind it small and edulcorate the Salt-peter from it and there remaineth a brown-yellow powder, which dry and keep; it looketh like grinded glass. Take now a common *Regulus* of Antimony made with Salt-peter and Tartar, grind it small and put it into a round glass, which must not be too high, and fasten a head to it. Sublime your *Regulus* in sand by itself without any addition, sweep the sublimate with a feather again into the glass and sublime it again. Repeat this so long till nothing do rise, but [the matter] remain red and fixed in the bottom. Then take this fixed Antimony and put it upon a stone in a cellar and in time it will be dissolved into water, which distil *in Balneo Mariae* until the sixth part only of the water do remain in the glass. Set this in a cold place and there will shoot reddish crystals, which dissolve in rain water. Filter it and draw off the phlegm to a thickness, set it to dry as before and the crystals will shoot white and very pure, like unto Salt peter. This is the Salt of Antimony.

Take these crystals and pour upon them pure distilled Vinegar and they will dissolve in the Vinegar. Then distil the Vinegar, the glass being very close luted, forcing at last the Spirits into the Vinegar and then the Vinegar is prepared. Take this Vinegar and pour it in the prepared brown-yellow powder and set it in some warm place and the Vinegar will draw out the tincture of Antimony, altogether red, within half or quarter of an hour. Pour off this extraction together and set it to digest twenty-eight days *in Balneo Mariae*.

Afterwards distil from it the Vinegar through an Alembick in sand, forcing in the end the oil into another glass, which comes over with many strange and wonderful veins. Rectify this oil in ashes and the rest of the Vinegar, if any be left, will come off and the oil remaineth very sweet and of a pleasant red colour like a Ruby. Thus have you joined the Sulphur with the Salt of Antimony and brought it over like an *Aqua Vitae*, which keep very carefully. Furthermore take again a common *Regulus* of Antimony made with Salt-peter and Tartar and beat it to [a] powder. Then take of strong distilled Vinegar four quarts and a half. Put into it of Sal Armoniack [and] of Salt of Tartar likewise eight ounces (I shall teach how to make it at the end of the directions). Digest this to the evaporation of the Vinegar and mingle with the Salts three parts of Venice Tripoli and distil the Spirit, which is of a singular nature and property.

Pour this Spirit on the pulverised *Regulus* of Antimony and having the glass well luted let it stand in digestion sixteen days; then distil the Spirit from the matter to a dryness and grind four times the weight of filings of steel with the same. Put it into a retort and putting thereto a large receiver full of water, distil it, forcing at last with a strong fire, and the Mercury comes over in fumes and is quickened in the water, which is the true Mercury of Antimony.

Take common Spirit of Vitriol, add a little common water to it and put your filings of steel into it. Let it stand till the filings are dissolved, then pour it off clean and put away the feces. Afterwards distil the Spirit in ashes to a thickness and set the glass in a cold place and there will shoot good Vitriol of Iron, which take, and having first vapoured away the phlegm mingle with it three parts of the powder made of burned potsherds of broken pots, put it into a retort, draw off the phlegm first, then force the Spirit with a strong fire into a proper glass, which rectify to the height and there will remain an oil in the bottom. Pour this oil upon the Mercury made before and draw off the phlegm in hot ashes and the tincture of the *Aqua vitae* remains behind and doth precipitate the Mercury into a fair, high-coloured powder of very great virtues in curing old running sores.

The Conjunction Of The Three Principles Sulphur, Salt And Mercury Of Antimony

Take of this precipitate, welledulcorated with Spirit of Wine, one part and pour on it of the above mentioned sweet oil, three parts, in a phial, so that the phial be not above one half full.

Then seal it hermetically and place it in a philosophical furnace and the precipitate will be dissolved in that continual heat. Open then the glass and continue a strong fire till the matter become a fixed powder and do fix and then the Stone *Ignis* is prepared of which I have written. This Stone is a particular tincture in men's bodies as well as in those of metal[s]. This may be used in many hard and dangerous distempers. Take of this Stone or particular tincture half an ounce, cast it upon twelve ounces and a half of pure Silver or upon as

much Pewter or Lead, let it flow very well for four and twenty hours, then drive it off clean and quart⁴¹⁰ it as tryers and refiners do and you will find in the Silver two ounces and a half of very good Gold and in the Pewter or Lead one ounce upon the cupel.

Another Medicine Made Out Of Antimony And Mercury And Of Its Effects In Outward Sores

Take Hungarian Antimony and sublimed Mercury and grind them well together and distil them through an earthen retort, forcing them at last with the strongest fire imaginable and you will obtain an oil, which separate and keep apart. Put away the quick Mercury, if so there be any; and the Cinnabar you will find in the neck of the retort. But as for the *Caput Mortuum*, grind it small and put it into a new retort and having poured on it the oil, first made warm, distil it again from it. Repeat so often till the *Caput Mortuum* remain behind like ashes and then your oil is prepared.

After this take so much fresh Antimony as first of all the *Caput Mortuum* did weigh, grind it small and put on it the oil, first warmed, and so many times distil⁴¹¹ as before till the oil come over as red as a Ruby and the *Caput Mortuum* likewise remain like ashes in the bottom of the glass and then the oil is prepared.

The Preparation Of The Sublimate For This Work

Take one pound and a half of Hungarian Vitriol, one pound of common Salt and four ounces of Salt-peter; grind this together and put [with?] one pound of Quicksilver into the bottom of a glass body; place it in sand so that the sand do not come above the matter in the glass; put a head thereupon and give it a convenient fire and the sublimate will stick to the sides of the glass, which is to be used in your work.

Take the above prepared *Aqua vitae*⁴¹² and add to eight ounces of it three ounces of Salt-peter water and distil it out of a coated, glass retort and you will have an ounce of the *Aqua vitae*⁴¹² remain behind fixed. Then put again to the *Aqua vitae*⁴¹² one ounce of fresh Salt-peter water into a retort and distil as before and there will stay more behind. This addition of fresh Salt-peter water to the *Aqua vitae*⁴¹² and⁴¹³ distillation out of a coated retort, as has been said before, repeat so often till all remains fixed in the retort.

The Salt-Peter Water Is Made Thus

Take unburned potsherds grinded small and with three part of the same grind one part of purified Salt-peter. Put into the receiver half a pound of water to one pound of Salt-peter and force the Spirits over into it. That which is fixed with this water⁴¹⁴, put into a glass body and pour upon it the common *Aqua vitae Vitrioli* so that it be four fingers high upon it. Then distil it till the matter become dry. Take out this matter and dry it yet more that the rest of those corrosive Spirits may evaporate, then edulcorate it well with Spirit of Wine and the Medicine is prepared.

The Use

Three or four grains of this Medicine being taken in some good treacle for some days cureth the French pox; there [be] no sore so old and festered but is cured infallibly by it. I have cured with it likewise many spreading, old, running ulcers, as fistulas, cancers, the wolf⁴¹⁵ and the like. The Name of the Lord be praised therefore.

The Preparation Of A Medicine Out Of Common Sulphur

Take common Sulphur and grind it small, then grind with it three parts of calcined Vitriol, put it together into a high cucurbite and sublime it in sand till nothing will sublime more. Take then these flowers, put them into a glass and pour on them a common *Aqua vitae Tartari*, which hath been dissolved in a cellar, so that it swim on the top of its a hand's breadth. Place it in a convenient heat and the Sulphur will open itself in [a] few hours and become transparent red like a Ruby. This being done pour off the extraction into another glass and put to it very good distilled Vinegar and the Sulphur falls to the bottom with a great stink.

Pour off the *Aqua vitae* and edulcorate well the Sulphur and dry it gently. Put this Sulphur again into another glass cucurbite and pour upon it Spirit of Wine, which is prepared with philosophical Tartar, set it in heat for three days and the Spirit of Wine imbibeth again that excellent tincture of the Sulphur. Then pour off the extraction and draw off the Spirit of Wine with a pretty strong fire in sand and there will come over with it a pleasant, sweet smelling *Aqua vitae*. Having done so, rectify the oil in *Balneo Mariae* and draw off the Spirit of Wine gently and the *Aqua vitae Sulphuris* remaineth in the bottom.

The Use Of This Medicine

Six or eight drops of this oil being taken in a spoonful of Wine are good for those that are in a consumption. It is good likewise for coughs, openeth the breast and ulcers of the breast, likewise imposthumes. It relieveth against whatsoever may occasion any putrefaction in a man's body if the use of it be continued for some time.

The Preparation Of The Tincture Of Corals

Take red Corals, break them into pieces and pour on them a common Spirit of Salt and the Corals will be dissolved. This being done, draw off by distillation the Spirit of Salt and edulcorate them well. Then take to one marck⁴¹⁶ of this powder half an ounce of common Sulphur, pulverised, and having mingled it together, reverberate it very gently till all the Sulphur be burned away. Having done so, grind as much Camphor with the Corals and burn the Camphor likewise away. Then edulcorate well the Corals and pour upon them high rectified Spirit of Wine and digest them for eight days and the tincture of the Corals will elevate itself into the Spirit of Wine. Then pour off that which you have extracted and after that draw off the Spirit of Wine from it and there remaineth the tincture of Corals behind in the bottom like a red, fat oil of Olives.

The Use Of The Medicine

Six drops of this tincture given in a spoonful of Wine to those that are bereaved of their senses restoreth them again. This tincture comforteth likewise the brain and strengthens the memory, dispelleth sadness and melancholy, makes light-hearted, breedeth good blood and strengtheneth the heart. It is such a noble Medicine for which we are bound indeed to bless Almighty God.

Of The True Solution Of Pearls

Take very good Verdigris, grind it small and dissolve it in distilled Vinegar; pour off the clean and throw away the feces. Then distil off the Vinegar out of a glass body to a thickness and put it into a cold place and there will shoot from it a fair Vitriol. Put this Vitriol into another glass and pour on it a high rectified Spirit of Wine and dissolve therein the Vitriol very well. Separate the feces from it [and] afterwards distil off likewise the Spirit of Wine to a thickness and set it again in a cold place and the Vitriol shooteth again. Put then the Vitriol into a glass body and draw off by distillation the phlegm *in Balneo Mariae* till the matter becomes dry. Take it out, put it into a glass retort and distil once more with a stronger fire in sand and you will obtain a pleasant Vinegar. Dissolve in this Vinegar as many Pearls as it will dissolve, for this Vinegar worketh very well upon them, dissolveth the substance but not the shells. The Pearls being dissolved, draw off the Vinegar *in Balneo Mariae* till the Pearls be very dry, then take them out and edulcorate them with Rose-water. Put these Pearls thus prepared into a glass body and pour some Spirit of Wine upon them and digest them in [a] gentle heat four and twenty hours and there riseth a pleasant liquor from the Pearls which doth mount and swimmeth upon the Spirit of Wine like an *Aqua vitae* made of Cinnamon. Pour it off together with the Spirit of Wine and keep it.

The Use Of This Medicine

Take of this Spirit of Wine half a spoonful so that four or five drops of the oil may go with it. It comforteth the heart, gives strength to the very marrow and bones [and] cureth swimming in the head and whatsoever may be hurtful to the eyes. [It] dispelleth rheums in the head and the noise in the ears, openeth the passage to hearing and is, moreover, a most precious treasure in many distempers.

A Certain Cure Of The Stone

Recipe. Of common Salt-peter, well purified, one pound and as much of common white Spirit of Vitriol. Pour the Spirit of Vitriol upon the Salt-peter and the Salt-peter will be dissolved together. This being done, distil from thence the Spirit of Vitriol in ashes to a thickness and set it in some cold place and the Salt-peter will shoot again from it. Take two ounces of this Salt-peter and the like quantity of the Salt of Wormwood; pour on them a little of the oil of Sulphur made *per campanam* so that the Salts may be like a poultice. Mix with it likewise one dram of Anniseed oil and as much of white Amber, adding thereto a pound of Canary sugar and mix all these ingredients very well together. Let him that is tormented with the stone take of this powder every day five or six time[s] as much as will lie

upon a point of a knife, twice repeated, and this medicine will work upon the stone and break it and throw it out radically.

Of The Soul Or The Sulphur Of Lune Or The Philosopher's Silver

Take common Salt(-peter) and quick or unslaked Lime, reverberate them together in a wind furnace with the strongest fire, extract again the Salt-peter with warm rain water and coagulate it to dryness; mingle again with it new quick Lime, reverberate it and extract again; repeat this the third time. This being done take Calx of Silver, being after the dissolution in an *Aqua fort* prepared, and mix it with prepared Salt[-peter]; put it into a glass viol, pour on it common *Aqua fort* such as the goldsmiths use, made of Salt-peter and Vitriol, and draw it off by distillation in hot sand. Pour on it some fresh *Aqua fort* and having distilled it likewise, repeat it the third time, giving at last [a] very strong fire, that the matter in the glass may flow very well. Let it cool of itself in the furnace and the Silver will become transparent blue in one piece. Extract this with Vinegar till you can extract no more. Edulcorate that which is extracted with water, that the Salt may be separated from it.

Cohobate Vinegar upon the dry Sulphur till it come over like a Sapphire. Reduce the same Silver into small filings and add to it its weight of Sal-armoniack and sublime it in a glass body and the Sal-armoniack carrieth with it the Sulphur of Lune of a very pleasant sky-colour. Put this sublimate into a dish of glass, edulcorate it well with rain water, first distilled, and the Sal-armoniack will be separated. Then dry the Sulphur of Lune, put it into a little body and pour on it good rectified Spirit of Wine and set it twenty-four hours in heat and the Spirit of Wine doth imbibe the Sulphur of Lune, [a] fine transparent blue, like a Sapphire or Ultramarine, and leaveth some few feces behind, which separate from it.

The Use

Five or six drops of this tincture being taken in Wine doth dispel sad and melancholy thoughts. It preventeth unquiet sleep, cureth those as use to rise and wander up and down in the night and likewise that are lunatics and giveth rest to all such as are restless in the night.

The Secret Of The Quick Or Unslaked Lime

Take good, pure Chalk [and] burn it in a potter's furnace with a very strong fire to bring it to an exact maturity. Then grind it small upon a warm stone and pour on it, in a glass body, Spirit of Wine made with philosophical Tartar that the Chalk become like a thin poultice.

This being done, distil from thence the phlegm to the dryness of the Chalk, pour fresh Spirit of Wine on it and distil it off again. Repeat this six times, then grind the matter small and lay it on a stone in a cellar to dissolve and there will flow in a few days from it a liquor, which, when you have gathered, put it into a retort of

glass and distil it in sand and the phlegm comes over first, which keep apart. After this there cometh a spiritual liquor which is likewise to be kept by itself.

Moreover take crystal stones, pulverise them and grind their weight of live or mineral Sulphur with them. Put then this matter upon a broad, earthen platter, stirring it continually, and burn away the Sulphur from it. Then reverberate it in an open, flaming fire for three hours. This being done, likewise put the matter into a glass and pour the liquor upon it. Take likewise crabs eyes⁴¹⁷, put them into another glass and pour on them of the same liquor; let it stand pretty hot for fourteen days and nights and there will rise from both a moisture, which pour off together very clean into a little body of glass and rectify it *in Balneo Mariae* and the liquor remaineth behind. Three grains of which, being taken in wine, have wrought very great and admirable effects. This Medicine cureth likewise radically the stone of the bladder and kidneys, both in men and women.

Take this burned Chalk, pour upon it and then draw from it again several times an *Aqua fort* made of Vitriol and Salt-peter. Dissolve it afterwards in a cellar. Distil that which is dissolved into an oil with a strong fire. Digest with this oil a Calx of Lune, opened with *Aqua fort*, for a month. Reduce this Calx by melting down with Salt-peter and Sal armoniack and refine it with Saturn; then separate it and you will have a white, fixed Lune, which lay for a day and a night in an *Aqua fort* and you have good Gold, which endureth all trials. *Laus Deo*.

The Preparation Of The Great Philosophic Stone

Our Stone is made out of its own proper Essence; for its transmuteth other metals into real and true Gold, which Gold must be prepared and become a better Stone. And though nothing of another nature must be used in the preparation of our Stone, which might obstruct its majestic excellency, yet the preparation of it in the beginning cannot be made without means. But observe that, as you will hear afterwards, all corrosives must be washed away from it and separated, so that our Stone may be severed from all poison and be prepared to be the greatest Medicine. Now I will show the work itself.

Take of the very best Gold you can have, one part; of good Hungarian Antimony, six parts; melt these⁴¹⁸ together upon a fire and pour it out into such a pot as the goldsmiths use; when you have poured it out it becometh a *Regulus*. This same *Regulus* must be melted again that the Antimony may be separated from it.

This being done, add to it Mercury and melt it again and cleanse it again. Repeat this the third time and the Gold is purged and purified enough for the beginning of the work. Then beat the Gold very thin as goldsmiths do when they gild and make an amalgam with common Quicksilver, which must be squeezed through a leather. Let the Quicksilver fume away little by little upon a gentle fire, that nothing of it may remain with the Gold and stir it about continually with a small Iron [rod] and the Gold is become subtile so that its water may the better work upon it and open it.

The Preparation Of The Water

Take one part of Salt-peter, well purified, and grind with it the like quantity of Sal-armoniack and half as much of pebbles, very well cleansed and washed. Mingle all these ingredients together and put them into an earthen retort, that the Spirits may not come through and put the same into a distilling furnace. The retort must have a pipe behind and put as large a receiver as you can get to the retort. The receiver must lie in a vessel full of cold water and a wet linen cloth must be put round about it, which you must continually [change] with another wet cloth. Then again so much matter [must be put] into the retort [at intervals] till all is gone into it⁴¹⁹ and then your water is prepared.

Take then of the prepared Calx of Gold one part, put it into a glass body and pour three parts of the above made water upon it and place it in warm ashes and the Gold will dissolve in it; but if it should not altogether be dissolved, pour more fresh water upon it and it will dissolve it all. This being done, pour it out into another glass and let it stand till it become cold and it will let fall some feces, which separate by pouring the water from them to another glass. Set this glass *in Balneo Mariae* and put a head upon it. Let it stand in heat day and night and more feces will settle, which separate from it as before. Close up your glass very well after you have put on the head and lute another glass to the head and let it stand for fourteen days in a gentle heat that the body may be well opened. This being done, increase the fire and distil off the phlegm to a thickness that it remain in the bottom like an *Aqua vitae*. That which hath been distilled pour again into the body, having first made it warm, and lute again the head to it and let it stand to digest a day and night. Then draw off the water again by distillation and pour it again warm, upon it. Repeat this so long till the Gold is come over altogether into a low body with a flat bottom. Put this spiritualised solution of Gold again into a glass and pour on it a considerable quantity of rain water, putting thereto three parts of live Mercury to one of Gold but you must squeeze first the Mercury through a leather, and stir it very well together and you will see many wonderful colours. And if you do repeat this, stirring several times, there will fall an *Amalgama* to the bottom and the water will become clear.

This being done, decant the water and dry gently the *Amalgama*, which, having edulcorated it very well, put upon a broad, shallow, earthen platter under a cover. Stir it about continually with an Iron wire till all the Quicksilver be fumed away and there will remain upon the earthen [platter] a very fair powder of a purple colour⁴²⁰.

Afterwards You Must Prepare Your Spirit Of Wine With The Philosophical Tartar In The Manner Following:

First you are to know that the Tartar of the philosophers, whereby the lock is unopened, is not like unto common Tartar as many do think; but it is another Salt and springeth from one root and is the only Key to open and to dissolve metals and is prepared as followeth. Take ashes of a vine which hath borne grapes that have yielded good wine; make of them with warm water as strong a lee⁴²¹ as possibly can be made. When you have a considerable quantity of this lee, boil it

away and coagulate it to a dryness and there remaineth a reddish matter. Put this matter into a reverberating furnace and reverberate it for three days or thereabouts in an open fire, that the flame may play very well upon it and stir it continually till the matter is become white.

Afterwards dissolve this [re]verberated matter in fountain water and let it settle, pour off the clear [liquid] and filter it, that all the feces may be separated and coagulate it in a glass body and you will have a pure, white Salt of Tartar from which a true Spirit is drawn⁴²².

Take now high rectified Spirit of Wine, fully freed from its phlegm, [and] put the same into a glass phial with as long a neck as possibly you can get. But first of all put into it your Salt of Tartar and then the Spirit to the supereminency of three fingers. Lute a head to the phial and put thereto another glass, let it stand in a gentle heat, then distil gently off the phlegm, and the Spirit of Tartar is opened by the Spirit of Wine and by reason of their reciprocal, wonderful love it comes over with the Spirit of Wine and is united with it. The remaining feces and some phlegm staying behind with them are to be put away.

This is now the right Spirit of Wine, wherewith you may open that which the lover of Art desireth to know, for it is become penetrant by preparation.

Take now the powder of Gold of a purple colour and having put it into another phial, pour on it your Spirit of Wine. Put it, very close luted, in a gentle heat and it will extract the Sulphur of Gold within twenty-four hours of a high red colour like blood. Having done so [so often] that it doth not yield any tincture more, pour off the extraction very clear into a little glass body. The remainder is a white Calx. Pour upon this Calx the aforesaid Spirit of Wine and let it stand in putrefaction, having the glass well stopped, for fourteen days and nights and the Spirit of Wine will become of a white colour like milk, which pour off clear and pour upon it⁴²³ fresh Spirit of Wine and let it stand a day and [a] night longer and it will be coloured again, but not much. Add this to the first and what remaineth do not dry, but leave it in the glass. Put the white extraction into a little body and distil the phlegm from it till it be reduced to a small quantity.

This being done, put the glass in a cellar and there will shoot from it fair and transparent crystals, which having taken out, put the remainder again in a cellar and you will have more crystals, which put together into a body of glass, for it is the Salt of the Philosophers, and pour half the extraction of the Sulphur of Gold upon them and they will dissolve immediately and melt like butter in hot water. And then distil it together out of a glass body in hot ashes and it will come over together in the form of a red oil, which falls to the bottom and the Spirit of Wine swimmeth upon the top, which separate from it.

This (oil) is the true Potable Gold, not reducible into a body, and my *Phalaia*, whereby I have cured many by the blessing of God, giving but three grains of it in Wine.

The other half of the extraction must be distilled gently *in Balneo Mariae* to a dryness [that] the Spirit of Wine may be separated. Pour on it this Oil of Gold or Potable Gold and it taketh the powder in a moment and becomes of a much higher colour than it was before; and this will dissolve in common Spirit of Wine and other Wine as red as a Ruby, which constantly and wonderfully cureth all such distempers of the body as have their origin from within.

Then take that other part of Mercury of Pure Gold which you have kept and pour all this, being its own oil, upon it and distil by an alembick, but not too strongly; and there comes over some phlegm and the oil doth precipitate its own Mercury and becomes white again, the greenness⁴²⁴ being lost and gone.

This work being done likewise, get a philosophical egg, which the philosophers call their Heaven and you will find two parts of the oil in weight to one part of the precipitated Mercury. Put then the Mercury into a glass and add the oil of Gold to it, so that one part of the glass may be filled and three parts remain empty. Seal it well as Hermes teacheth and put it into the three-fold furnace so that it standeth not hotter than an egg which is under an hen to be hatched, and the matter will begin to putrefy within a month, and doth become very black which, when it doth appear, it is then certain that the matter is open by putrefaction and you may be glad of the happy beginning. Increase now the fire to the second degree and the blackness will vanish away in time and change into many admirable colours. These colours being gone likewise, increase the fire to the third degree and your glass will look like Silver and the rays will become ponderous. Then, increasing the fire to the fourth degree, the fumes will cease by little and little and your glass will shine as [if] it were beset within with cloth of Gold. Continue this fire and the rays will disappear likewise and there will be no more rays be seen to rise, but you will see your matter lie beneath like a brown oil, which at length being become dry, doth appear like into a Granat⁴²⁵, which is both fixed and liquid like wax, penetrant like oil and mighty ponderous.

He that hath obtained this may render thanks to God his Creator, for poverty hath forsaken him, diseases will fly from him and wisdom hath taken possession of him.

Having thus prepared your Medicine, if you intend to multiply it proceed as follows. Take of the prepared powder of Gold of a purple colour, as you have done before, three parts. Add to it of the prepared tincture, one part, in a new Heaven or philosophers' egg. Seal it again hermetically and set it again into the furnace as before and the matter will unite itself and dissolve and be brought to perfection within thirty-one days, which is a month, which otherwise will take up

ten months. Thus you may multiply the Medicine *in infinitum* so that you may perform things which the world will account incredible.

Lastly you must know that this Medicine is a very spiritual and piercing one, which cureth any distempers of this world in all creatures whatsoever. One only grain of it being taken, it penetrateth the whole body like a fume, cleareth out of the body all that is bad and bringeth that that is good in the room of it, reneweth the man and maketh of him, as it were, a new man, which it preserveth without any accidents to his age and the term prefixed by the Most High. *Contra mortem remedium non est.*

This Medicine, being first fermented with other pure Gold, doth likewise tinge many thousand parts of all other metals into very good Gold as I showed in a former process, whereby such Gold likewise becometh such a penetrant Medicine that one part doth tinge and transmute a thousand parts of other metals, and much more beyond belief, into perfect Gold. God be blessed and praised both now and for ever more. Amen.

Additional Preparations For A Fuller Declaration Of The Same

Spirit Of Mercury By Itself Or Mercurial Water

Put running Mercury into a retort and put to it a receiver, which must stand in a glass with water in it. Distil then, and the Spirit will precipitate itself and is resolved into a water. Pour out this water and put the Mercury which sticketh to the neck of the retort back again into the retort. Distil and rectify till you have brought and reduced it to a water. This spirit of Mercury cureth almost all distempers and doth extract the essence out of minerals and metals.

A Tincture Both Upon Men And Metals

Take the spiritual Gold of a purple colour, extract its Sulphur with distilled Vinegar and separate the Vinegar again from it that it become a powder. This powder being dissolved in Spirit of Red Mercury, that is Gold, put thereto Salt of Gold and fix it. This is an universal Medicine for sick and diseased bodies of men, likewise it is excellent to exalt metals to the highest degrees.

A Tincture Upon White

Calcine Silver with Salt and Quicklime and extract its blue Sulphur, which elevate and rectify with Spirit of Wine that it remain a liquor. Dissolve this in the white Spirit of Vitriol and in the Spirit of mineral Mercury.

I do not understand here the red Mercury, but the common, white, mineral Mercury, or rather that [which] is extracted out of Vitriol.

Fix it then, and you have an universal Medicine against all distempers and a tincture which doth tinge Lead, Pewter, Mercury and Copper into Silver.

To Make An Ounce Of Gold Out Of Half An Ounce

Take Spirit of Salt, rectify it with Spirit of Wine and it become sweetish. Pour this upon the Spiritual Gold of a purple colour and it will extract only the Soul or Sulphur of the Gold, but doth not touch the body of Gold. The Sulphur of Gold doth graduate Silver into Gold, yet no greater quantity of it than there hath been of Gold. The body of Gold must be as white as Silver. Reduce it upon a cupel with Saturn and a little Copper and the white body of Gold doth recover again its colour and property and becometh good Gold.

To Make Mercury Of Gold Or The Philosophical Mercury

Take the Gold of a purple colour out of which the Sulphur is already extracted, digest it with the following water for a month, then revive it again by driving it through a retort in the neck whereof are to be laid Iron plates. Drive it into a receiver with some water in it and it runneth together and becometh a Quick Mercury of Gold.

The Water Is Made As Followeth

Take Salt of Urine of a young man that drinketh nothing but Wine and likewise Salt of Tartar and Sal-armoniack, *ana*⁴²⁶. Let all this dissolve into a liquor, which rectify with Sprit of Wine that it become very sweet. This is the Arcanum wherewith the body of Gold is reduced into a running Mercury.

To Make The Salt Of Gold

Pour⁴²⁷ Gold three times through Antimony, beat it into thin plates and dissolve them in *Aqua Regis*. Dissolve likewise Salt of Tartar in Spirit of Wine and draw off the phlegm that it remain like an oil. With this oil precipitate your Gold and separate again the Salt of Tartar from it by ablutions, then reverberate it fourteen days. Pour upon this Calx of Gold distilled Vinegar; let it boil gently a day and night and the Vinegar doth dissolve the Salt of the reverberated Gold. What remaineth in the bottom undissolved must be reverberated again eight days. Then boil it again in new Vinegar (and) put this afterwards to the first solution.

If anything remaineth behind it must be reverberated eight days more till the body is gone into the Vinegar. Then draw off the Vinegar *in Balneo Mariae* and you have the Salt of Gold in a yellowish powder which cureth all distempers.

Soli Deo Gloria

**To Conclude These Preparations With A Brief Discovery Of The First
Tincture, Root Aand Spirit Of Metals And Minerals, How They Are
Conceived, Ripened, Brought Forth, Changed And Augmented**

Of The First Tincture, THhe Root Of Metals

Observe that the tincture which is the root of all metals is a supernatural, flying, fiery Spirit. It hath its sustenance and natural habitation in the earth and water, where it may rest and work. And this Spirit is found in all metals, and more abundant in other metals than Gold; for the Gold is very close, solid and compact by reason of its well digested, ripened and fixed body; therefore it can no more enter into the body than the body doth need. But other metals have not such a fixed body, but their pores are open and dispersed, therefore can the tingeing Spirit abundantly more penetrate and possess them. But because the bodies of other metals are unfixed, the tincture likewise cannot stay with these unfixed bodies, but must go out of them, and [it] being [the case that] the tincture of Gold doth in no other metal abound more than in Iron and Copper, as husband and wife, their bodies are destroyed and the tingeing Spirit from thence [is] expelled, which breedeth much blood in the opened, prepared Gold, and by its feeding doth make it volatile. Therefore when the volatile Gold is filled by its meat and drink, it taketh up its own blood, doth dry it up through its own internal fire with [the] help and addition of a moist fire and is again a conquest, which doth fix, nay produceth the highest fixedness, so that the Gold becometh a high fixed Medicine and cannot make a body again by reason of the superabundant blood, except there be added to it a superfluous body into which this [super] abundant fixed blood doth disperse itself, which joined metallic body is penetrated by the exceeding great heat of the fixed blood of the Lion, like fire, [is] cleansed from all impurity and immediately is ripened to a perfect maturity and fixedness.

I now pass to the birth and to the generation, how the *Archeus* doth show and pour forth its power and displayeth it, by which all metallic and mineral forms are exposed to the view and are made formal, palpable and corporeal through the mineral, incomprehensible, flying, fiery Spirits.

First you are to know that all the metals and minerals of the earth have one only matter and one only mother, by which they in general altogether have received their conception and perfect bodily birth. And this matter, which cometh from the centre, doth divide itself in the beginning into three parts to produce some corporeal thing and a certain form of every metal. These three parts are fed and nourished by the elements in the earth out of its body till they become perfect. But the matter, which hath its original from the centre, is framed by the Stars, wrought by the elements and formed by that which is terrestrial and is a known matter and the true mother of metals and minerals and is such a matter and mother out of which man himself hath been conceived, born, nourished and made corporeal, and may be altogether compared to the Middle World⁴²⁸; for whatsoever is in the Great World, that is known likewise in the Little and whatsoever is in the Little World, that is likewise in the Great. And thus what is in the Great and Little World together, that is found in the Middle World, which joineth the Great and Little Worlds and is a Soul, which doth unite and copulate the Spirit with the body. This Soul is compared to water and is indeed a right true water, yet doth it not wet like other water, but it is an heavenly water, found dry in a metallic, liquid substance, and a soul-like water, which loveth all Spirits and

doth unite them with their bodies and bringeth them to a perfect life. Therefore it is certain that the water is a mother of all metals, which, being heated by a warm, aerial fire⁴²⁹, as is the Spirit of Sulphur, bringeth life into the terrestrial body through its ripening, wherein the Salt is apparently found, which doth preserve from putrefaction, that nothing may be consumed by corruption. In the beginning and in the birth is wrought first the Quicksilver, which yet lieth open with a subtile coagulation, because there is but little of the Salt communicated to it, whereby it showeth more a spiritual than a corporeal body. Other metals, which are all derived from its essence and have more Salt, which maketh them corporeal, do follow after this. I begin with the Spirit of Mercury.

Of The Spirit Of Mercury

All visible and palpable things are made out of the Spirit of Mercury, which is beyond all the terrestrial things of the whole world, and all things are made out of it and have their original from it. For herein is all to be found that can do all that the Artist doth desire to enquire into. It is the principle to work metals, being made a spiritual Essence, which is a mere Air, and flyeth to and fro without wings and is a moving wind, which, after its expulsion out of its habitation by Vulcan, is driven into its Chaos, into which it entereth again and doth resolve itself into the elements, where it is attracted by the Stars after a magnetical manner, out of love, from whence it went forth and was wrought out before, because it desireth to be united again with its like. But when this Spirit of Mercury can be taken and made corporeal, it doth then resolve itself into a body and becometh a clear, fair and transparent water, which is a true spiritual water and the first Mercurial Root of minerals and metals, spiritual, unperceivable, incombustible, without any commixtion of the terrestrial aquosity. It is that heavenly water of which much hath been written. For by the Spirit of Mercury all metals may be, if need requireth, dissolved, opened and without any corrosive reduced or resolved into their first matter. This Spirit reneweth both men and beast[s] like the Eagle⁴³⁰, consumeth whatsoever is bad and produceth a great age to a long life.

To declare further the Essence, matter and form of this Spirit of Mercury, I must tell you that its Essence is Soul-like, its matter spiritual and its form terrestrial, which yet must be understood by some incomprehensible thing⁴³¹.

Touching the beginning of this Spirit of Mercury, this is needless to know because it is of no benefit, nor can it do you any good. But observe that its beginning is supernaturally from Heaven, the Stars and Elements, granted in the beginning of the first Creation to enter further into a terrestrial being. And because this is needless as I have told you, leave that which is heavenly to the Soul and apprehend it by faith. That which is of the Stars, leave likewise alone, because such impressions of the Stars are invisible and incomprehensible. The Elements have already brought forth this Spirit perfect into the World, through the nourishment of it, therefore do not meddle with them either, for no man can make any Element, but the Creator alone; and insist upon thy Spirit already produced, which is both formal and not formal, comprehensible and incomprehensible and

yet doth appear visibly, and you have the first matter, out of which are grown all metals and minerals and is one only thing and such a matter which doth unite itself with the Sulphur of Venus or Copper and is coagulated with the Salt of Mars, so that it becometh one body and a perfect Medicine of all metals, not only to generate [them] in the beginning in the earth, as in the great world⁴³², but also by [the] help of a moist fire to change and transmute [them], together with the augmentation, in the little world. Let this not seem strange to you, because the Most High hath thus permitted it and Nature hath wrought it.

But [as to] how the Archaeus worketh further by the Spirit of Mercury in the earth, you are to understand that after the spiritual seed is framed from above by the impression of the Stars and fed and nourished through the Elements, this seed is changed into and is become a mercurial water: as in the beginning the great world⁴³³ likewise was made of nothing⁴³⁴; for the Spirit moved upon the water and thus was this cold, waterish and terrestrial creature revived to life by an heavenly warmth⁴³⁵. It⁴³⁶ was in the great world the power and the operation of the Light of Heaven⁴³⁷; in the little world likewise, the power of God and the operation by His Divine and Holy Breath⁴³⁸ to work in the earth. Furthermore the Almighty did grant and ordain means for performing of the same that the creature might get power to work upon another creature⁴³⁹ and one might help and promote the other for the forming and perfecting of all the works of the Lord. Thus was granted to the earth an influence to generate by the Luminaries of Heaven and likewise an internal heat to warm and to ripen that which was too cold for the earth by reason of its aquosity. And thus to every creature a peculiar Genius [is granted] according to its kind, that so there is raised a subtile, sulphureous steam by the starry heaven, not a common, but another, clarified, cleaned and pure steam, separated from others, which doth unite itself with the mercurial substance, by which warm property in a long time the humidity is dried up by little and little and then the Soul-like property⁴⁴⁰, being joined with it, which giveth the body and balsam of maintenance and worketh before too upon the earth by a spiritual and starry influence. Thus happeneth, then, a generation of metals according to the commixtion of the three principles and according as they take in more or less of these three, so the body is formed. If so be the Spirit of Mercury is directed and formed from above upon animals, then there is produced an animal being⁴⁴¹, but if it seizeth upon vegetables, a vegetable work is brought forth. And if it falls upon minerals, by reason of its infused nature there will spring thence minerals and metals. Nevertheless everyone is differently wrought, the animals by another form by themselves, the vegetables after a manner proper to themselves and the minerals likewise on another fashion, every one after a singular way. Now I shall faithfully discover how this Spirit of Mercury may be had and obtained, the manner how to prepare it, that it may cure diseases and change and alter all metals of the ignoble kind, as they are generated in the little world by a transmutation and augmentation of their seed.

Take, in the Name of the Lord, red mineral Quicksilver which looketh like Cinnabar and the best mineral Gold that can be gotten. Take an equal quantity of

them both and grind them together before they have been in any fire; pour upon them an oil of Mercury made by itself out of the common, putrefied and sublimed Quicksilver; digest them for a month and you will have an extraction which is more heavenly then terrestrial. Distil gently this extraction *in Balneo Mariae* and the phlegm cometh over and the ponderous oil remaineth in the bottom, which taketh up into itself all metals in a moment. Add to this three times the quantity of Spirit of Wine, circulate it in a pelican till it becometh blood-red and hath recovered an incomparable sweetness. Pour off the Spirit of Wine and add to it fresh Spirit of Wine. Repeat this so long till the whole matter be dissolved into an exceeding sweet and ruby colour[ed], transparent liquor, which mingle afterwards together. Pour it upon white, calcined Tartar and distil it with a strong fire in ashes and the Spirit of Wine remaineth behind with the Tartar, but the Spirit of Mercury cometh over. This Spirit of Mercury being mixed with the Spirit of Sulphur Solis, together with its Salt, whosoever shall bring them over joined and united together, that they may not be separated *in infinitum*, he will have such work (if so be it doth receive its Ferment in a due measure and prefixed term, with Gold, by a solution, and is brought in its proper maturity to a *plusquam* perfection) to which nothing may be compared for the preventing of diseases and poverty. This Spirit of Mercury cureth the dropsy, consumption, gout, stone, French pox and all other lasting sores. It is the only Key to make the corporeal Gold⁴⁴² potable.

Of The Spirit Of Copper

Venus is clothed with a heavenly Sulphur, which doth far exceed the Splendour of the Sun, because there is found much more Sulphur in her than in Gold. But learn what the matter is of the said Sulphur of Gold, which dwelleth and reigneth abundantly in Venus. [It] is a flying and very hot Spirit, which can search and penetrate all, as also digest, ripen and bring to maturity, namely [bring] the imperfect metals into [the] perfect. If you ask how the Spirit of Copper can ripen and bring to perfection other imperfect metals, it being itself, in its body, imperfect and not fixed, I answer that this Spirit cannot have or hold in Copper a fixed body for an habitation; therefore the habitation being burned by the fire the guest goeth out of it likewise and must leave his habitation with impatience, for he dwelleth therein like an hireling. But in the fixed body of Gold he hath a protection that nothing can drive him out without the sentence of a peculiar Judge, because he hath taken possession like an heir and hath taken root in that fixed body [so] that [he] cannot be cast out so easily. The tincture which Venus hath obtained is likewise to be found in Mars, yea much more powerful, higher and more excellent⁴⁴³ for Mars is the husband, Venus the wife. This tincture is likewise to be found in Verdigris and Vitriol as in a mineral. of which a volume might be writ; and in all things there is found a Sulphur which doth burn and yet another Sulphur which doth not burn, which is a wonderful work. The one is white, the other red in the operating birth, but the right and true Sulphur is incombustible, for it is a mere and true Spirit, out of which is prepared an incombustible oil and [it] is indeed the Sulphur out of which the Sulphur of Gold, out of one and the same root, is made and prepared.

This Sulphur may be very well called and christened the Sulphur of the Wise, because in it is found all wisdom⁴⁴⁴, if you except the Mercurial Spirit, which is to be preferred⁴⁴⁵, and with which it, together with the Salt⁴⁴⁶ of Mars⁴⁴⁷ must be united through a spiritual copulation⁴⁴⁸ and [these] three may be brought to a correspondency and be exalted into one operation⁴⁴⁹.

This Spiritual Sulphur doth likewise and in the same manner derive its original from the Upper Region⁴⁵⁰, as the Spirit of Mercury doth, but with another form and fashion, whereby the Stars do show a separation in fixed and unfixed, in tinged and not tinged things. The tincture doth consist only in the Spirit of Copper and chiefly of its consort⁴⁵¹ and is a mere steam, stinking and of a very ill scent in the beginning. And this must be resolved in a liquid manner, that the stinking, incombustible oil may be prepared out of it. This oil is easily joined with the Spirit of Mercury and do[es] soon take up all metallic bodies, being first prepared according to the account I formerly declared. Venus hath much Sulphur; she hath been, together with Mars, digested and ripened sooner than any other metals, but because they have had but little help from the inconsistent Mercury, being he had no room left him to work harder, by reason of superabundant Sulphur, they could not receive or obtain a melioration of their unfixed bodies. Now I will discover a mystery to you, that Gold, Venus and Mars have in them one and the same Sulphur, one tincture and the same matter of their tincture, which matter of the tincture is a Spirit, a Mist and a Fume, which hath penetrated and doth penetrate all bodies. If you can bring it into captivity and do accuate it with the Spirit which is found in the Salt of Mars and then do join with the same the Spirit of Mercury according to their weight and do separate them from all impurity, that they become sweet and sweet-smelling, without any corrosive, you have then a Medicine to which nothing in the world may be compared. If you ferment this Medicine with the shining Sun you have made an ingress which is penetrant to work and to transmute all metals.

Lastly take notice that the root of the philosophical Sulphur, which is an heavenly Spirit, together with the root of the spiritual, supernatural Mercury and the principle of the supernatural Salt, is in one and is found in one matter, out of which the Stone, which hath been found before me, is made, and not in many things although the Mercury be drawn by itself by all the philosophers and the Sulphur by itself, besides the Salt apart⁴⁵², that so [it may appear that] Mercury is found in one and the Sulphur in one and the Salt in one. Notwithstanding all this do I tell you that this is to be understood of the superfluity, which is found [al]most in every one - and particularly in many ways may be used profitably and prepared to a Medicine and [for the] transmutation of metals. But the universal, as the greatest treasure of terrestrial knowledge and wisdom and of all the three principles, is one only thing and is found in one only thing and is drawn out of it, which can reduce all metals into one only thing and is the true Spirit of Mercury and the Soul of Sulphur, joined together with the spiritual Salt, enclosed under one heaven and dwelling in one body; and [it] is the Dragon and the Eagle; it is

the King and the Lion; it is the Spirit and the body, which must tinge the body of Gold to be a Medicine, whereby it getteth abundant power to tinge others its consorts.

Concerning the generation of Copper, observe that Copper is generated out of much Brimstone, but its Mercury and Salt are equal in the same, for there is neither more nor less in quantity of one and the other to be found. Now because the Brimstone doth exceed in quantity the Salt and Mercury, there ariseth from thence a great tingeing redness, which great redness hath so possessed the metal that the Mercury could not perfect its fixedness, that a more fixed body might have been produced out of it. You are further to know that the form of Venus' body is of the same condition that a tree is which hath and doth yield abundance of Gum, as in the pine and fir-tree, with other sorts of trees, which Gum is the Sulphur of the tree, which drives out sometimes this Gum at the sides of it by reason of its too great abundance and because it cannot harbour it all. Such a tree now, that is tinged with so much fatness by Nature and the ripening of the elements, burneth and taketh fire immediately; neither is it heavy and [it] is never so durable as oak and the like hard wood, which is solid and compact and hath not his pores so open⁴⁵³ as that sort of light wood, that the Brimstone might abundantly reign in it. But therefore hath the oak wood more Mercury and a better Salt than the pine or fir-tree. And such wood is never so much apt to swim upon the water as the fir-tree is, because it is [so] close, solid and compact that the air in it cannot bear it up. The same is to understood of metals, but especially of Gold, which, by reason of its much fixed and well ripened Quicksilver, hath a most solid, compact, close, fixed and invincible body, to which neither fire nor water, neither air nor any putrefaction of the earth can do any hurt because its pores are closed up and the corrupting power of the elements cannot injure it. Which fixedness and solid and compact conjunction do demonstrate its natural ponderosity, which is not to be found or proved in other metals, which may be discerned not only by weighing it in a pair of scales, but you will find it likewise if you put but a scruple of pure Gold upon a hundred pound weight of Quicksilver, it will fall presently to the bottom, whereas all other ponderous metals laid upon Quicksilver swim upon it and do not sink to the bottom because their pores are more largely extended that the air or wind may pass through them to bear them up.

Concerning the Spirit of Venus or Copper in physick, you are, in fine, to observe that it is found very necessary and wholesome in its virtue and efficacy; not only that Spirit that lieth *in primo Ente*, but that Spirit likewise which is found in the last matter. Its virtue, power and operation is such that in the rising of the Mother it is to be preferred before any Medicine whatsoever: also against the falling sickness, the dropsy, the stone. If you have a special care of this Spirit of Copper it will work such wonders both inwardly and outwardly as will be accounted of all incredible and supernatural.

To conclude, the Spirit of Copper is a hot Spirit, penetrant and searching, consuming all the bad humours and phlegm both in men and metals and may justly be accounted the Crown of physick. It is very fiery and piercing,

incombustible yet spiritual and without form and, therefore, is capable, like a Spirit, to further in particular the ignition, digestion and ripening of things without a form.

Of The Generation Of Mars, Its Spirit And Tincture

Mars and Venus have one and the same Spirit and tincture as the Gold and other metals have. Though this Spirit be found in every metal, in some [there is] a greater, in some a smaller quantity. It is undeniable and confessed of all that there are divers men and divers opinions, although men in the beginning are made out of one first matter and generated and born out of one seed, yet there is a manifold difference of their opinions because the operation of the Stars hath occasioned this and not without a cause. For the influence of the Great World worketh the other (namely the difference of opinions) after itself in the Little World, because all the opinions, nature and thoughts, together with the whole complexion of man, do derive their original from the influence of the Stars of Heaven and do show themselves according to the Planets and Stars, where nothing can withstand nor obstruct such an influence because the generation of their perfection is already performed and brought to a period or finished. For example, a man is naturally inclined to study, one hath a mind in Divinity, another for the study of the Law, the third for Physick, the fourth will be a Philosopher. Besides all this, there are many wits that have a natural inclination for mechanical arts, as one turneth a limner, another a goldsmith, this man a shoemaker, that man a tailor, another a carver and so forth. All this happeneth by the influence of the Stars, whereby the imagination is strengthened and founded supernaturally, wherein it resolveth to continue; as we do find if a man hath once taken up a resolution in his mind and laid a foundation upon it, that no man is able to bring or keep him from it, that he should not so obstinately stand upon it, death only excepted, which at last closeth up all. The same is understood of chemists and Alchemists, who, having got once into the secrets of Nature, do not intend to give them over so easily except they have more exactly searched Nature and wholly absorbed⁴⁵⁴ and finished the study thereof, which yet is no easy matter. Thus you are likewise to understand of metals that according as the infusion and imagination happeneth from above, so happeneth the form likewise; although metals are altogether called metals and are indeed metals, yet as you have understood by divers opinions of men, which are altogether men out of one matter, there may be manifold and divers metals, of which one hath got an hot and dry, another a cold and moist, another a mixed complexion and nature. Therefore because the metal of Mars hath before others been ordered by a gross Salt in the greatest quantity in its degree, its body is the hardest, most inflexible, strongest and coarsest which Nature hath thus appropriated to it. It containeth the least part of Mercury and little more it hath of Sulphur but the greatest part of Salt; and from this mixture is sprung its corporeal being and [it] is thus born into the world with the help of the elements. Its Spirit is an operation equal to other Spirits, but if the true and right Spirit of Iron can be discerned, I assure you one grain of its Spirit or quintessence, taken and administered in Spirit of Wine, comforteth and strengtheneth a man's heart, mind and courage not to fear his

enemies. It stirreth up a lion-like heart within to fight Venus' battles. If the conjunction of Mars and Venus doth rightly happen in a certain constellation⁴⁵⁵, they have success, victory and conquest both in love and sorrow, in fight and peace and will continue of one mind though the whole world should bear a spleen and enmity against them. This spirit cureth wonderfully all martial distempers.

This Spirit of Iron, being rightly discerned, hath a secret affinity with the Spirit of Copper, that they may be so joined together that there riseth one only matter from them, of one and the same operation, form, substance and being, which will cure the same distempers and transmute the particulars of metals with profit and honour.

But Iron, together with its virtue, ought properly to be considered in the manner following, that it hath a terrestrial body only in its corporeal form, which body may be used to a great many things, to alter the blood, to outward wounds, to a graduation of Silver and inwardly to the constipation of the body, which yet is not always beneficial to use, neither in a man's body inwardly and outwardly, nor yet as concerning metals, because there is no great advantage to be made *per se* without the known right means, which do belong to Nature's secret knowledge. Observe one thing more, that the Loadstone and the true Iron are almost of one and the same nature, even as it is according to a divine, spiritual and elemental sense betwixt the body, its Soul and the Chaos out of which the Soul and Spirit are gone; the body is framed last of all out of this composition.

Of The Spirit Of Gold

If you are desirous to get this golden Loadstone, your prayers must be rightly made to God in true knowledge, contrition, sorrow and true humility for to know and learn the three different worlds, which are subject to human reason⁴⁵⁶; as there is the super-celestial world⁴⁵⁷, wherein the immortal Soul⁴⁵⁸ keepeth its seat and residence beside its first original⁴⁵⁹ and is by God's creation the first moving sensibility, or the first moving sensible Soul⁴⁶⁰ which of a supernatural being hath wrought to a natural life. And this Soul and this Spirit is the root and the first fountain and the first creature existing in the life of anything⁴⁶¹ and the *primum mobile*⁴⁶², which hath been so much controverted by learned men. Observe likewise the second celestial world⁴⁶³ and take good notice of it for therein do reign the Planets and all the heavenly stars have their course, virtue and power in this heaven and do perform therein their service, for which God that placed them there and do work in this their service by their Spirit [on] both minerals and metals.

Out of these two worlds ariseth yet another different world⁴⁶⁴, where it is found and comprehended what the other two worlds have wrought and produced. Out of the first Super-celestial World is derived the fountain of life and of the Soul; from the second Celestial World doth spring the Light of the Spirit⁴⁶⁵ and from the third, the Elemental World, cometh the invincible, heavenly yet sensible fire, by which it digested and ripened that which is comprehensible. These three matters

and substances do generate and bring forth the form of metals, among which Gold hath the pre-eminency because the sidereal and elemental operation hath mellowed and ripened the Mercury in this metal the more substantially to a sufficient and perfect maturity. And as the seed of a man doth fall into the womb and toucheth the *menstruum* which is its earth, [and as this]⁴⁶⁶ seed which goeth out of the man into the woman is wrought in both by the Stars and the elements that it may be quite united and nourished by the earth to a generation, so you are likewise to understand that the Soul of metals [is worked upon] which is conceived by an unperceivable, invisible, incomprehensible, abstruse and supernatural, celestial composition, as out of water and air, which are formed out of the Chaos and then further digested and ripened by that heavenly, elemental light and fire of the Sun, whereby the Stars do move the powers, when its heat in the inward parts of the earth, as in the womb, is perceived. For by the warming property of the Stars above, the earth is unlocked and opened that the infused Spirit of the same may yield food and nourishment and be enabled to generate something as metals, herbs, trees and beasts, where every one particularly bringeth with it its seed for a further multiplication and augmentation. And as the conception of a man is spiritual and heavenly, whose Soul and Spirit, by nourishment of the earth in the mother's womb, are formally brought up to a perfection, so likewise it is to be observed and understood in every particular of metals and minerals. But this is the true secret of Gold, namely to instruct and teach you by an example and similitude, whereby the possibility of Nature and its mystery is to found in the manner following. It is probably true that the heavenly light of the Sun is of a fiery property and of a fiery being, which the Most High God, as Creator of Heaven and Earth hath granted to it through an heavenly, constant and fixed Sulphureous Spirit for the preservation of its substance, form and body, which creature, through its swiftness is inflamed and set on fire by the air, which inflammation will never be extinguished as long as the motion doth last and the whole created, visible world doth continue and endure, not in the least diminisheth in its power, because there is no combustible matter extant which might be given to it, whose consumption might cause the decay of that great light of heaven. So is Gold by the superior [counterpart] of its essence⁴⁶⁷ thus digested and ripened and is become of such a fixed, invincible nature that nothing at all can hurt it, because the upper fixed Stars have penetrated the lower, that the lower fixed Stars, by reason of their infusion and grant of the upper, need not to give place to their equal because the lower hath received and obtained such a constant fixedness from the upper.⁴⁶⁸

I will add another similitude, according to the manner of philosophers, of the great light of heaven and of that small fire, which, being terrestrial, is here kindled every day and is made to burn before our eyes, because that great light hath a magnetical likeness and an attractive, loving power with that same small fire here upon earth, which is yet without form and impalpable and found only spiritual invincible, insensible and incomprehensible. It is remarkable, as it is proved and demonstrated by experience, that that great light of heaven hath a great love for and beareth an affection and inclination to the little fire, which is terrestrial, by

reason of the Spirit whereby both are agitated and preserved from their utter ruin and destruction. For do but consider that as soon as the air, through [the] great moisture which it hath attracted, conceiveth any corruption, that so through mists and further coagulation and conjunction clouds are generated, the beams of the Sun are hindered and obstructed that the Sun cannot obtain its reflection nor have its due penetrating and searching power; so likewise this little terrestrial fire doth never burn so clear in dark and rainy weather, neither doth it show itself with that gladness in its operation as when the air is fair, pure and clear. The cause is this, for through the obstacle of the moist air the love is hindered that the attractive power, growing sad, cannot exercise its perfect love and operation as it ought to do, for the contrary element, the aquosity, causeth this obstruction. As now the Sun, that heavenly great light, hath a special communion and love with the small terrestrial fire to attract after a magnetic manner, so likewise hath the Sun and Gold a special correspondency and a peculiar attractive power and love together, because the Sun hath wrought the Gold through the three principles, which have their loadstone, and is nearest of all related to the Sun⁴⁶⁹ and hath attained to the highest degree, so that the three principles are found most mighty and powerful in the same. Next to it is Gold in its corporeal form, because it is framed out of the three principles, but hath its original and beginning from the heavenly and golden loadstone. This is now the greatest wisdom of this world. In this loadstone is and lieth buried the dissolution and opening of all the minerals and metals, their government as also their matter of the first generation and their power as touching health moreover the coagulation and fixation of metals, together with the operation to cure all diseases. Take a special care of this Key, for it is heavenly, sidereal and elemental, out of which the terrestrial is generated. It is supernatural and natural together and is born out of the Spirit of Mercury, heavenly; out of the Spirit of Sulphur, spiritual; but out of the Spirit of Salt corporeal. Out of this spiritual essence and out of this spiritual matter out of which the Gold first of all is made corporeal into one body, the ancient⁴⁷⁰ as well as modern Rosicrucian philosophers do make potable Gold more substantial than out of Gold itself, which must be made spiritual before the potable Gold can be separated out of it. This Spirit cureth likewise the leprosy [and] the French pox, as being a super-fixed mercurial essence, dryeth up and consumeth the dropsy and all running, open sores, which have afflicted a long time; comforteth the heart and brain; strengtheneth the memory and breedeth good blood.

Thus can the Soul of Gold reduced into water, the Spiritual Essence of Pearls and the Sulphur of Corals, united in one, do such things which to Nature seem otherwise incredible; but because experience confirmeth this truth it is deservedly a cordial in this mortal life to be preferred justly before all other cordials by reason of its wonderful effects. The preparation thereof is this. Take Spirit of Salt and with it extract the Sulphur of Gold. Separate the Oil of Salt from it and rectify the Sulphur of Gold with Spirit of Wine that it may become pleasant without any corrosiveness. Then take the true Oil of Vitriol, made out of Vitriol of Verdigris, dissolve in it Iron; make again a Vitriol out of it and dissolve it again into an Oil or Spirit, which rectify likewise as before with Spirit of Wine. Put them together and

draw off the Spirit of Wine from thence. Dissolve the matter which remaineth dry behind in Spirit of Mercury in a due proportion or weight. Circulate and coagulate it. When it becometh constant and fixed without rising any more, you have then, if you ferment it with prepared Gold, a Medicine to cure diseases and to tinge metals.

Of The Spirit Of Silver

The Tincture and Spirit of Silver is of a sky-colour, otherwise it is a⁴⁷¹ waterish Spirit, cold and moist and not so hot in its degree as the Spirit which is found in Gold, Iron or Copper; therefore is Silver more phlegmatic than fiery, although it hath been reduced by fire out of its waterish substance unto a coagulation. In the same manner have the stones likewise received their hardness, fixedness and tincture, as by one and the same influence. In a Diamond is found a fixed and coagulated Mercury, therefore this stone is harder and more fixed than other stones and is not to be broken as they are. In a Ruby is found the tincture of Iron or the Sulphur of Iron. In an Emerald, the tincture of Copper⁴⁷². In a Granite⁴⁷³, the soul of Lead. In Pewter [is] the tincture which is found in the stone called *Topasius*. Crystal is attributed to common Mercury and in a Sapphire is found the tincture and Sulphur of Silver⁴⁷⁴, yet everything in particular, according to its nature and kind, and in metals likewise according to their form and kind. And when the blue colour is separated and taken away from the Sapphire, then is its garment gone and its body is white like a diamond. Thus when Gold hath lost its Soul, it yieldeth then a white body and a fixed white body of Gold, which is called *Luna fixa* by the searching students and novices in this Art.

What hath been said as concerning the stone called Sapphire, for your instruction you may apply to the better knowledge of the nature of metals, for this blue Spirit is the Sulphur and Soul out of which Silver hath its life as well in the earth as above the earth by Art, and the white tincture of Silver upon white always, in a magnetical form of that one thing and creature, wherein the *primum ens auri* likewise is found. This Spirit of Silver alone containeth that which will perfectly cure and dispel the dropsy, even as the Spirit of Gold and of Mercury can radically cure the consumption so that even the centre itself of the said distemper may not be found.

But the Silver is not so provided in its degree with a hot substance and quality in the veins of the earth, but is subjected to a waterish kind, this fault is to be laid upon the Great Light of Heaven⁴⁷⁵, which by reason of its waterish influence hath planted this quality into the Second Creature⁴⁷⁶ and into the second Planet of the earth⁴⁷⁷ as into Silver. And though Silver doth carry with it a fixed Mercury or fixed Quicksilver, which is born in it, nevertheless it wanted the hot fixed Sulphur, which might have exactly dried up and consumed the phlegm, which is the cause it hath not obtained a compact body⁴⁷⁸, except it be done afterwards by Art of the lesser World. And because the body is not solid and compact, by reason of its waterish substance, hence are its pores not well stopped up nor consolidated, that it might have a due ponderosity and endure a fight with its enemies. Which

virtues ought altogether to be found in Gold, if so be it must conquer all its foes and endure all the trials without fault.

You are likewise to understand that the first matter of metals must be observed, studied and found out through the discovery of their last matter, which last matter, as there are the absolute and perfect metals, must be divided and separated that it may appear altogether naked to a man's eyes and then there may be learned and known by such a division what the first matter hath been in the beginning, out of which the last matter is made. Observe diligently this Arcanum⁴⁷⁹.

Take the sky-coloured Sulphur of Silver, which hath been extracted out of Silver and rectified by Spirit of Wine; dissolve it according to its weight in the white Spirit of Vitriol and in the sweet scented Spirit of Mercury and coagulate them together through a fixation of fire and you will get the possession of the White Tincture and its Medicine. But if you know the *Primum Mobile* it is then needless, because you may bring the thing to perfection out of one.

Of The Soul And Tincture Of Pewter

The benign Jupiter is almost of a middle nature amongst all the metals. He is neither too hot nor yet too cold, nor too warm nor too moist. He hath not too much of Mercury nor yet of Salt and of Sulphur there is least of all in him⁴⁸⁰. Pewter is found white in its colour, yet of these three principles one doth exceed the other[s] as it hath been clearly discovered in its division according to the true enquiry into Nature's secrets. Out of this composition and mixture of the three principles is generated and wrought and coagulated into a metal and brought to a maturity of perfection benevolent Jupiter. The Spirit of Jupiter doth protect and preserve from all distempers and diseases incident and hurtful to the liver. Its Spirit is naturally, as for its taste, like unto Honey. Its Mercury being made volatile doth get a venomous quality, for its purgeth vehemently and penetrates with violence. Therefore it is not always good that its unlocked Quicksilver should be thus simply used by itself; but if a correction goeth before, it may be very well used with exceeding great usefulness in those distempers and diseases which are immediately subject to his influence; that is to say, when you have taken away from Zadkiel⁴⁸¹ its venomous volatility and it is placed into a better and more fixed state, which doth resist poison. To conclude, if you do extract out of the benign Jupiter his Salt and Sulphur and make Saturn flow very well together with them, Saturn doth get a fixed body, is purified and becometh clear by them and is a total change and real transmutation of Lead into good Pewter, as you will find it upon a most accurate trial. And though this may seem to you not to be true, yet are you to understand that by reason that the Salt of Jupiter is made more Corporeal only by its Sulphur, it likewise hath received an efficacy and power to penetrate Saturn, as the vilest and most volatile metal, and to bring it to its own substance by making it better and you will really find it to be so.

Of The Spirit Of Saturn Or Tincture Of Lead

Saturn, to generate his metal, which is Lead, is placed in the Upper Heaven, above all the Stars. But in the lower parts of the earth he doth keep the lowest degree⁴⁸². As the uppermost light of Saturn is mounted to the highest altitude of all the lights of Heaven⁴⁸³, so likewise in imitation of the same hath Nature given leave and permitted that his children of the Lower Region have retired themselves by Vulcan to those of their quality according as Saturn hath been moved. For the Upper Light is the cause of it and hath generated an unfixed body of Lead through which go and are drawn open pores, that the Air can have its passage through this Saturnine body and bear itself up. But the fire easily worketh upon and consumeth it because the body is not solid and compact by reason of its unfixedness. This is well to be observed by a serious enquirer into all things because there is a vast difference betwixt fixed and unfixed bodies and then the causes of this fixedness and unfixedness. And though Saturn is of a singular ponderosity before other metals, yet will you observe that when they are poured out together after their conjunction in the melting of them, the other metals will always fall to the bottom, as likewise, it happeneth with other metals by pouring them through Antimony. Whereby it doth appear that other metals have a more solid and compact body than Saturn can raise, because it must give place to other metals, make room for them and yield the victory; for it vanisheth away and is consumed together with those unconstant and unfixed metals. For there are the three grossest qualities of the three principles in Saturn and by reason that its Salt is altogether fluid in comparison to other metals and planets, therefore is likewise its body more fluid, inconstant, unfixed and more volatile than any metallic body.

[As for] how Saturn doth proceed towards his regeneration, you are to know that as common water, through natural cold, by the alteration of the Upper Heaven, is congealed so that it becometh a coagulated ice, so likewise it is demonstrated that Lead is coagulated and made corporeal reason of the great cold which is found in its Salt before any other Salt. The coagulated ice is resolved through warmth and so is the coagulated Lead made fluid by fire. It hath most Mercury in it yet inconstant and volatile; but less of Sulphur and, therefore, according to the small quantity of the same, its cold body cannot be heated; and least of all Salt, but fluid; otherwise the Iron would be more liquid and malleable than Saturn if the Salt alone could impart both the malleableness and fluidity, because Iron doth carry with it more Salt than any other metal. And being there is a difference to be found in these things, you must carefully observe how metals are to be distinguished.

All the philosophers, indeed, besides myself, have writ that the Salt causeth the coagulation and the body of every metal; and this is true; but I shall show by an example how this is to be understood. *Alumen plumosum* is reputed and probably accounted to be a mere Salt, and herein may be compared to Iron, which Salt of the aforesaid *Alumen plumosum* is nevertheless found to be as a

matter and not liquid as Iron. On the contrary Vitriol doth show itself like Salt in a small quantity, yet liquid and open, and therefore its Salt cannot cause so hard a congelation in its appropriated metal as that other Salt doth. Although all Salts of metals are grown out of one root and one seed, yet there is a difference of their three principles to be observed. As one herb differs from the other, and likewise in men and beasts a difference is found as concerning the original of their qualities and their three principles, where one herb has something more of this, another herb more of that kind, which is likewise to be understood of men and beasts. The Soul of Lead is of a sweet quality, as also the Soul of Jupiter, and yet sweeter, so that as for sweetness there is hardly anything comparable to it, being first highly purified by separation, that the pure being very well severed from the impure there may follow a compleat perfection in the operation. Otherwise the Spirit of Lead is naturally cold and dry, therefore I do advise both men and women not to make too much use of it, for it over cooleth human nature, that their seed cannot perfect or perform its natural operation, nor is it good for the spleen and bladder. It doth attract the phlegmatic quality, which breedeth melancholy in men. For Saturn is a governor and such a melancholy one whereby a man is upheld and strengthened in his melancholy. Therefore if its Spirit be used, one melancholy Spirit doth attract the other, whereby a man's body is freed and released from its infused melancholy. Outwardly is the Soul of Saturn very wholesome in all sores and wounds, whether they be old or green, whether they happen by thrusting, cutting or naturally by means incident, so that hardly any other metal will do the like. It is a cooling thing in all hot and swelled members, but to eat away and to lay a foundation for healing in all corrupt and putrefied sores, which have their issuing forth from within, there the noble Venus hath the pre-eminency because Copper is hot in its essence to exiccate and dry up, but Lead, on the contrary, is found to be cold in its essence.

That heavenly light of the Sun is much hotter than the light of the Moon, because the moon is much lesser than the Sun, which doth comprehend the eight[h] part of magnitude in the circle of measuring and dividing. And if the moon should exceed the Sun in this magnitude of the eight[h] part, as the Sun doth exceed the Moon, then all the fruit and whatsoever groweth upon the earth would be spoiled and there would be continual winter and no summer would be found. But the Eternal Creator hath herein wisely prescribed a certain order and law to His creatures, that the Sun should give light by day and the moon by night and thus be serviceable to all creatures.

Those children which are addicted to the influence of Saturn are melancholy, surly, always murmuring, like old, covetous misers, which do no good to their own bodies and are never satisfied. They use their bodies to hard labour, vex and fret themselves with troublesome thoughts and are very seldom so cheerful as to recreate themselves with other people, neither do they care much for natural love of women although handsome.

To sum up all, Saturn is generated out of little Sulphur, little Salt and much immature and gross Mercury, which Mercury is to be accounted like scum or

froth which swimmeth upon the water in comparison to that Mercury which is found in Gold, being of a much hotter degree. Hence it is that the Mercury of Saturn hath not so fresh and so running a life as that which is made out of Gold, because more heat is found in this [latter], to which the running life oweth its original. Therefore it is likewise to be observed in the inferior world of the little Vulcan, in the augmentation and transmutation of metals, what description I have given you of these three principles of Saturn concerning their original quality and complexion.

And everyone is to know that no transmutation of any metal can arise from Saturn by reason of its great cold, except the coagulation of Mercury, [which can be achieved] because the cold Sulphur of Lead can quench and take away the hot, running Spirit of Quicksilver if the process be rightly performed; therefore it is rightly observable that the method be so kept that the theory may agree with the practice and concur in a certain measure and concord. Wherefore you must not altogether reject Saturn, nor vilify and disparage it, for its nature and virtues are but known to a few. For the Stone of the Philosophers hath the first beginning of its heavenly, resplendent tincture only from this metal and by the infusion of this Planet is the Key of Fixedness delivered to it through putrefaction, because that out of the yellow there cannot come any red thing except there be first made at the beginning of the black a white one.

Comselha: An Enochian Macrocosmic Ritual

The purpose of this working is to invoke the transcendental power of the Enochian god, IAD BALT, to transform it in turn through all the macrocosmic powers within the Elemental Tablets, and to organize them into a balanced form. At the same time, these powers are conditioned so that they express a particular view of the creation of which they are a part. As the final step, these energies are directed so that they energize the magician himself.

The magickal records covering the results of the first use of this exercise are available separately.

I have received several complaints about my published rituals recently. Some complain that they are too elaborate, others that they are too simple, and some question whether they really qualify as magickal rituals in the traditional sense.

The complaints of over-elaborateness stem from the fact that it is impossible to perform any significant part of the works in a single session. This is perfectly correct, and is done deliberately. My experience has been that the rewards given to the magician by the angels of the Enochian system are very precisely gauged to the amount of care and effort the magician puts into the work. Works that are planned, rehearsed, and carried out over a period of weeks or months are much more likely to produce significant initiations than any number of single-session efforts. The present work was designed to be performed in stages, with the expectation that each stage will be performed until the powers invoked achieve a self-sustaining presence in the magician's temple before he passes on to the next stage. It can be expected that the rewards will be commensurate with the effort involved.

Complaints of excessive simplicity derive from lack of the pompous verbiage typically found in formal rituals, and the dearth of advice concerning symbols, implements, and materiel that would help to fire the imagination of the magician. There is a decidedly bare-bones feel to the descriptions. This is perhaps an expression of my own character as a magician; I find that complex pomp and ceremony put me off rather than enhancing the work. I have complete faith that every magician's imagination and intuition will provide him with enhancements appropriate to his or her own character and style, and so see no need to provide more than the minimum schema necessary to accomplish the work successfully.

The differences between these rituals and more traditional forms derives from the nature of Enochian magick. In most systems, the primary difficulty is in producing a flow of the desired power. The major portions of the rituals are dedicated to simply getting the power to appear. Once it does appear, its direction to the desired end is a relatively simple matter.

In contrast, the Angelic Calls and Names provide a means by which even a beginning magician can easily call up a strong flow of force. But the forces involved are much more ambiguous than in other systems. Each appears to have many different natures depending on the level and orientation from which they are viewed; their manifestations seem to be potentially infinite. The primary work of a ritual must accordingly be to focus, direct, and condition them, through the use of the imagination, so that they manifest in a clear and manageable way. This work conforms to that necessity.

Additionally, the specific form used makes this work something resembling an inverse path-working exercise, going top-down rather than bottom-upwards. And as Frater Azoth has pointed out, there are resemblances to the mandala-workings and chakra-visualizations used in Tibetan Buddhism. They are certainly very similar in intent, though the similarity of form was unintentional.

The Place of Working

The work may be done in either a physical or an astral workplace. The magician may find astral working preferable due to the size of the magickal circle, and also because the area can not be used for any other purpose while this work is proceeding.

The magickal circle is actually four concentric circles having specific relative proportions. The "units" referred to may be of any convenient size, provided that the innermost circle is large enough to stand or sit in comfortably.

The inner circle has a radius of four units. The next circle has a radius of eleven units, and thus produces a band 7 units thick around the inner circle. The third circle has a radius of 12 units, making a band one unit thick around the second circle. The outer circle has a radius of 13 units, making another band one unit thick.

All four circles are divided into quarters by lines going from the center to the circumference in the cardinal directions. Each quarter of the second circle is further divided into six pie-sections fifteen degrees wide. Each quarter of the outer circle is divided into three pie-sections thirty degrees wide.

The innermost circle should be colored some dark neutral color, such as a dark gray. The two outermost circles in each quarter should be colored in the King-scale elemental color of the corresponding element, thus:

Quarter	Element	Color
Northwest	Air	Bright pale yellow
Northeast	Water	Deep blue
Southeast	Fire	Glowing orange-scarlet
Southwest	Earth	Warm velvet black

The second circle should be in some light neutral color, such as a slightly grayish white. Alternately, each sector of this circle could be outlined in the elemental color of the quarter with a fill in one of the planetary colors, following one of the schemes described further on. But this alternative may be too burdensome for an astral working.

Fig. 1
Ceremonial Circle
w/ attributes

Symbolism of the Circle

The structure of this magickal circle mirrors the medieval concept of the heavens. In that cosmology, the planetary and heavenly realms are viewed as a series of concentric circles surrounding the Earth, each circle going outwards representing an increasingly more "divine" power. The planets each take a circle in their cabalistic order. The sphere of the zodiac is outermost, representing an outer "shell" around creation; beyond it is the Empyrean, the unknown, invisible realm of God.

The scheme has been slightly modified here to fit the actual natures of the Enochian powers involved. It is recommended that the magician make a diagram of the circle and completely familiarize himself with the meaning of the various parts before beginning work. If this is done, the actual work becomes a much simpler prospect.

Our goal in this work is to take the invisible power of the divine, bring it into the realm of creation, and then bring it downward through a series of transformations to energize and consecrate the Earth and ourselves. Thus we will be working from the outer circles towards the center.

Functionally, the three Names of God in each Tablet act to gather the invisible power of the divine and transform it so that it is accessible to the lower powers of their Tablet. As such they act as the interface between the Empyrean and the realm of creation, in a way similar to that of the zodiac. The outermost band of our magickal circle will embody this principle.

Each of the twelve Names of God will have dual attributes. The first, which we will call the "outer" attribute, represents the energy the Name takes in from the divine, as symbolized by one of the zodiac signs. The second "inner" attribute represents the energy as it has been transformed by the Name into a form compatible with its Tablet. This latter attribute also uses the zodiac signs, but after another fashion.

The cross that divides the circle into quarters represents the solstices and equinoxes, and at the same time the "Black Cross" that binds the four Elemental Tablets together into the Great Table. The western arm of the cross is the spring equinox and the eastern arm the autumnal equinox. The northern arm is the winter solstice, and the southern arm the summer solstice. The three Names of god are assigned to their quarter's three sectors of the circle's outer band in clockwise order. The relevant attributes of these names are as shown in the following table.

Name	Element	Quarter	Outer Attribute	Inner Attribute
ORO IBAH AOZPI	Air	Winter	Pisces Aquarius Capricorn	Gemini Aquarius Libra
MPH ARSL GAIOL	Water	Fall	Sagittarius Scorpio Libra	Pisces Scorpio Cancer
OIP TEAA PDOCE	Fire	Summer	Virgo Leo Cancer	Sagittarius Leo Aries
MOR DIAL HCTGA	Earth	Spring	Gemini Taurus Aries	Virgo Taurus Capricorn

Thus in their outer attributes, the Names collect a complete round of the divine energies as passed inwards through the zodiac. In their inner attributes, the Names pass inwards the power of their element, in its alchemically mercurial, salt, and sulphuric forms.

The function of the Elemental King of each Tablet is to take the power passed inward by the Names of God, concentrate that power, transform it and distribute it to the Seniors and the powers of the Lesser Angles. In this work we will only be concerned with his transformation of the power into the six-fold constellation of the Seniors.

The Seniors represent the planetary powers, but in a way not entirely compatible with the medieval cosmology. The medieval system, like the cabala, sees the planets as ranked hierarchically, some being more divine than others. In contrast, the six Seniors in each Tablet are in every way equals; none is higher than the others.

In this work we will consider them as each being a vertically-oriented power; each represents a flow of power that is colored by a particular planet's nature, but which passes downwards through all the planetary circles of the medieval scheme. Each letter of a Senior's name will represent his power as it manifests in one of those circles. As an example, the "A" of ACZINOR will be a Jovian power acting in the sphere of Saturn; the "C" of that name will be a Jovian power acting in the sphere of Jupiter, and so on.

Following this scheme, the Senior's names are assigned one to each pie-section of the second band within our magickal circle. They go from the outside towards the center, as do the powers represented by those names.

Fig.2

The Ritual

Preparatory and Concluding Actions

Actions in this section should be practiced daily until they have become familiar and the feelings and attitudes necessary can be held without effort. With practice, they should become easy enough that they can be done smoothly in a couple of minutes. These actions should be performed in every ceremony, before going on to one of the stages.

1. Use a plain white robe for a costume, with no decorations or regalia of any kind. A black over-robe, again without decoration, should be worn over with white robe at the beginning of the ceremony. This second robe should be such that it can be easily and rapidly thrown off. A plain white wand, unconsecrated to any other purpose, may be used, or figures may be drawn with the hand.

2. Perform a preliminary purification and consecration of the Temple with Fire, Water, and Air. Use frankincense or some other solar incense for the censuring, rather than any specifically elemental incense. DO NOT perform any preliminary banishings or invocations; the G.D. pentagram and hexagram rituals are specifically to be avoided, as are any other rituals that describe a protective circle around the place of working.

3. Move to the center of the circle and kneel or sit comfortably, facing the direction of the spring equinox.

4. Imagine that the innermost circle is the microcosmic world, and the entire Earth and all of the purely elemental magickal worlds are contained therein, as well as your body. Feel all these things being gathered into the sphere and being immovably fixed there. Spend as long as necessary to get a strong feeling that this has been accomplished.

5. Imagine that the black robe is a shell, an outer mundane body concealing the essentially divine essence of your being. Imagine that all the mundane parts of your being, and every other thing that distinguishes you from the divine, is part of that shell. Feel these things moving into the robe and becoming fixed there, leaving nothing but the divine essence, enclosed in the white robe, contained within it. Again, spend as long as necessary to feel this has been accomplished.

6. Undo the black robe so that when you stand it will fall away and be left lying behind within the inner circle.

7. Stand up and simultaneously cast off the black robe. As you do so, feel that everything of your personal identity is being left behind with it. Even the

physical or astral body your consciousness inhabits should be felt to be nothing more than a projection, an illusion without substance or influence. All that remains is a divine essence, free of its envelope. This essence expands itself into the God of Justice, IAD BALT, who reigns over the Enochian universe.

From this point on in the work, all actions are to be done as if you were this god. The region enclosed by the circles is the realm of your creation, and you can stand within it or outside it without being in any way influenced by it. You should make an effort to feel a total freedom from any conditions or limitations of the created world.

8. Still looking towards the spring equinox point, survey your creation and review its structure. In the center is the World, and the realms of the elements. Next outwards is the realm of the planets, enclosed by the realm of the Sun. Beyond the Sun the remainder of the manifest universe is compressed into realm of the zodiac. And beyond the zodiac is the Empyrean, your true home and state of being, a higher-dimensional universe in which your creation is embedded. See each of these realms as separated from the next by a thin membrane or interface, not so much a barrier as an area where their influences balance and cancel out.

Meditate on your creation and that which encloses it as long as you like.

9. Concluding actions. After completing these preliminary exercises, or (if you have passed to one of the later stages) at the end of the ceremony, return to the center circle. Take up the black robe and put it on. At the same time, consciously re-absorb everything that you have previously fixed in it. Take on your personal identity again in all its aspects. Then sit in silence and seek to absorb any forces generated by the ceremony. As you proceed through the stages you may note significant changes in awareness, new insights, revelations, etc. during this time. Take as much time as you feel necessary to absorb and integrate them into your being.

Finally, declare the work to be completed, and return to your mundane activities.

Stage One

10. Following step 8, walk to the outside of the circles along the line of the spring equinox. Imagine at the same time that you are passing through the realms of your creation back to the Empyrean.

11. Still outside the circle, turn and circumambulate it in a clockwise direction, drawing a glowing line in the air above outer edge of the outer band as you go. Imagine that by doing so you are temporarily sealing off your

creation from the higher dimensions in which it is embedded, so that there is no transfer of information or energy from one to the other.

12. Upon returning to your starting point, turn to face inwards along the equinoctial line. Vibrate the First Call. As you do so, imagine that it is causing the gathering of the limitless energy of the Empyrean, and causing that energy to press inwards on the boundary you have drawn around the realms of your creation. Vibrate the Call several more times, each time producing an increase in the energy present, and in the pressure it exerts upon the boundary. Seek to create as high a state of tension as you can, with the energy pressing irresistibly, and the boundary resisting immovably.

Stage Two

13. Move clockwise until you are outside the center of the outer band sector assigned to the name ORO. Face the center of the circle, and visualize that name floating in the air above its sector, just inside the barrier.

14. Vibrate the name ORO several times. Simultaneously draw the hexagram of Pisces on the face of the barrier and draw the glyph of the sign inside the hexagram. Next draw a circle around the hexagram just touching its points. While doing so, imagine that you are etching the circle in the barrier in the same way you would etch glass with a glass cutter.

15. Strike the center of the circle forcibly with your fist or the wand, punching out a hole in the barrier. (The hexagram remains suspended within the hole, its lines glowing.) Immediately you withdraw your fist, the Empyrean energy pressing on the barrier pushes through the hexagram, through the hole, and fills up the ORO sector of the outer band. As the energy passes through the hexagram it takes on the color of the sign Pisces, and remains this color as it fills the column.

16. Repeat steps 13-15 for the other sectors, going in order clockwise around the circle. Use the appropriate colors and hexagrams for the sector's outer attribute in each case. If necessary, take time to renew the pressure of the Empyrean energy between sectors.

Stage 3

This stage may be done one quarter at a time on separate days. If so, do not repeat the work on a given quarter in consecutive sessions; instead continue with the succeeding quarters and repeat the entire cycle of quarters as many times as necessary to get the energies firmly established.

17. Again move clockwise until you are opposite the center of the ORO sector in the outer band. Face the center of the circle and visualize the Name floating above the center of the sector.

18. Vibrate the name ORO several times. Draw the hexagram of Gemini on the interface between the outer and third bands while continuing to vibrate the name. Put the glyph of Gemini inside the hexagram. Draw the glyph of alchemical mercury above the hexagram, and the Enochian glyph of Air below it. Draw a circle around the hexagram as in step 14, as if etching the outline of a punch-out on a piece of glass.

19. Strike the circle with your fist and punch out a hole. See the force accumulated in the ORO sector pushing inwards into the third band, backed up by the pressure of the Empyrean energy pushing into the sector from outside. As the energy passes through the hexagram, its Piscean quality is transformed into the quality of Mercury of Air.

20. Move to the outside of the IBAH sector, and repeat steps 17-19. Except use the hexagram of Aquarius, with the alchemical glyph of Salt above it and the Enochian glyph of Air below it. See the energy being transformed into Salt of Air as it passes through the Hexagram.

21. Move to the outside of the AOZPI sector, and repeat steps 17-19. Use the hexagram of Libra, with the glyph of alchemical Sulphur above and the Enochian glyph of Air below. See the energy being transformed into Sulphur of Air as it passes inwards through the hexagram.

22. Move inwards and stand in the middle of the third band sector assigned to BATAIVAH, facing outwards. Vibrate BATAIVAH and continue to do so. See the power of the King's name gathering in the forces flowing through the three holes from the fourth band, and concentrating those forces into a point.

Inside the point of concentrated force, the mercurial, salt, and sulphuric aspects of Air combine to form pure elemental Airy energy, and this energy explodes outwards from the point to fill the entire sector.

23. Repeat steps 17-22 for the other three quarters in clockwise order around the circle.

Stage Four

The Seniors are assigned to the sectors of the second band either in cabalistic order (starting with Saturn and ending with Luna) or in clockwise order beginning with the upper arm of the Linea Patris. Here the cabalistic order is used. As noted earlier, the names are written in the sector from the outside in,

and each letter represents the passage of the Senior's power through one of the Planetary Spheres of the medieval cosmology.

24. Perform the gathering and combination of the alchemical Airs as in step 22. Try to increase the pressure and volume of elemental Air within the sector to the maximum.

25. Turn to face inwards and vibrate the Elemental King's name again. Continue to vibrate it, and feel its power gathering in the elemental Air from the sector, and forming it into a ball centered on the previously-created concentration point so that the ongoing conversion of alchemical Air feeds it. As the amount of elemental Air in the ball increases, it suddenly ignites and forms a self-sustaining Sun.

26. Staying in the third band, move opposite the first sector in the second band. Draw the hexagram of Saturn on the interface between the bands, and vibrate the name of the Senior of Saturn, HIPOTGA.

27. Turn to the sun and draw out of it a line of power. Attach that line to the center of the hexagram. (This line of power should actually be something like a narrow hose, within which energies flow out of the solar sphere and into the Senior's realm. But nothing flows as yet, as a hole has not yet been punched between the bands.)

28. Repeat steps 26-27 for the remaining sectors in the quarter, drawing the appropriate hexagrams and invoking the appropriate Seniors.

29. Move into the second band and stand facing the hexagram of Saturn. Draw the hexagram again on this side of the interface, invoking the Senior. Next visualize the letters of the Senior's name written in the sector from the outside towards the center.

30. Draw a circle around the hexagram, etching the surface of the interface, and strike to punch it out. Energy begins to flow through the pipe from the Elemental King, and as it passes through the hexagram it takes on the nature of the Senior.

31. Vibrate the name of the Senior slowly and with each letter of the name distinct. As you pronounce each letter, see the inflowing energy filling up the region just above that letter in the sector. At the same time confirm mentally or by visualization that the letter embodies the power of the Senior in the planetary sphere associated with it in cabalistic order. Continue to back down the sector towards the center, doing the same for each letter in turn.

32. When the entire pie-shaped sector has been filled with energy, you should now be standing in the first, central circle representing the Earth. On the

barrier between the first and second circles, draw the astrological symbol of Earth, a circle crossed by two lines at right angles to each other. See the outer circle of this symbol etched on the barrier as before, and strike to punch it out, allowing the energy to flow into the central circle.

Visualize the energy spreading outwards from this point to cover the entire inner circle, as water from a hose spreads out to cover a tile floor. As it spreads, the energy also soaks into the black robe, which still lies upon the circle. The energy also fills the entire circle until it is above the level of your head. When the circle is filled, in your imagination trace the path of the energy back through all the preceding stages to its origin in the Empyrean.

33. Repeat steps 29-32 for the other sectors in the second band.

34. Repeat steps 24-33 for the other three quarters in the circle. This completes the exercise.

INTRODUCTION

This book is part of the record of an extended magickal working involving the Tablet of Earth from John Dee's Enochian magickal system. This section presents the results of a series of invocations of the Seniors from that Tablet. The record is complete and is presented exactly as it was received at the time of the invocations, without editing.

The invoking names of the Seniors are derived from the Great Central Cross of the Tablet by reading outwards horizontally and vertically from the two centermost squares of the Tablet. In the Golden Dawn's theory of the Enochian system, they represent the forces of the planets manifesting within the element, and are considered to be Briatic in nature. With the Elemental King, who represents the Sun and is a link between the Briatic and the Yetziratic levels of the Tablet, they bind together all the forces within the Tablet.

Additionally, the Seniors are said to provide knowledge specifically concerning "human affairs", and the present record confirms that in the broadest sense. On another level (and unknown to me at the time of the operations) the 24 Seniors in the four Tablets correlate with the 24 Elders mentioned in the Revelation of St. John the Divine. In this latter case, they relate to the zodiac signs, presumably two for each sign. And again, the record would seem to support this attribution.

A somewhat different method of operation is used here than in the previous invocations of the series that were described in *Touring the Earth Tablet*. In that work, each of the "Kerubic" squares of the Tablet was examined individually. The visions were deliberately forced into a highly visual and symbolic form, along the lines set down in the Golden Dawn's rules for astral workings. While these restrictions made it easy to establish the validity and consistency of the visions, it also forced the information given by the Kerubic forces into an extremely cumbersome and hard to read form.

In the current series, no effort has been made to make the visions conform to the baroque style touted by the Golden Dawn. Rather, the Seniors were allowed to present themselves in their own manner, except for a brief presentation of a telematic image as a check of validity. Attempting to examine each square individually would have been much too cumbersome. The result has been much more direct and readable than in the previous case.

Despite the looser form, the results of these invocations are entirely consistent with the previous invocations of the working. Taken together, they present a developing system of symbolism related to the planet Earth, the various modes of magickal initiation, and man's place on Earth and in the universe.

The story presented by the Seniors is a history of the spiritual development of man on Earth, as viewed by the being who is the life of the Earth and those appointed to direct that development. The main characters are those beings whose actions are the root of the mythos of the gods Set and Horus, and the plot describes their conflicts as they contended for control of man's evolution over eighty million

years. With the earlier works in this series, it also presents a “reconstruction” of the original mythos of Set, from before the time when priests of Horus and Osiris demolished his temples and turned him into a devil-god for their own forms of religion.

This mythos is not a step backward in time, but a re-formulation in terms of the incoming energies of this present day, when the equinox is moving into the constellation of Aquarius. The philosophy presented is entirely consistent with the basic tenets of Thelema as originally stated in *Liber AL vel Legis*, and those later elaborations presented by C.S. Jones (Frater Achad).

The energies of the sign of Aquarius are vastly different from the energies of the previous aeon, which was under the sign of Pisces. The Piscean age was characterized by highly structured, imposed systems of religion and magick, presented through the work of rigid hierarchical organizations. In that age, the individual was expected to subordinate himself to the work and symbolism of the group, and to accept what was given to him on faith. Man was seen as being at the bottom of the spiritual hierarchy, and was therefore subordinate to all of the spiritual forces. He could only contact them through faith and supplication, in effect begging them for a bit of wisdom.

The Aquarian energies, on the other hand, are extremely individualistic. The ruling planet, Uranus, and the exalted planet, Mercury, show that in this new time individuals can achieve magickal and spiritual success entirely through their own efforts, without the aid of any outside force. The results of their work will be proportional to the effort they put into it. Where Mercury, knowledge, was in its detriment in Pisces, here it is at its height. Thus knowing and self-will, and not submission and faith, are now to be the key to initiation.

Under the Aquarian energies, each man contributes to the group work by doing his own work and discovering his own Will, without reference to the work of others. The links between the work of one person and another will come naturally, as a consequence of the internal connections that exist between all things, and not as an externally-imposed set of formulae. The connections mentioned above are one example of this principle. No doubt many more examples will arise in coming years.

Following this principle, I would like to encourage the reader to examine this work and all such works with a critical eye, to not accept it as literally true, and not accept it as symbolic truth unless it fits your own views of the spirit. Perhaps another way is better for you. There is more than enough room for any number of views.

Before concluding, a few explanatory remarks might be in order.

Where reference to the cabalistic Tree of Life is made in this work, it is always to the revised version discovered and presented by Frater Achad. I have personally found this form of the Tree to be much more productive than the old G.D. version. The extended working of which this paper is a part has demonstrated that it is not merely a curiosity, but a workable and very effective system of symbolism, at least the equal of the older version of the Tree. But the use of this alternate system should

Introduction

not deter users of the older Tree from reading this book. The essential aspects of the work are not dependent on the Tree at all, and can be applied to many different systems.

It seems appropriate to provide the readers with a minimum sketch of the symbolic basis of the narrative, so that they might have some clues to its occult interpretation.

The planetary symbolism of the Seniors themselves appears only on a very superficial level, and has little to do with the content of their story. The plot of the story follows the sequence of the zodiac signs in precessional order, starting with the sign of Pisces, showing the Earth and her Lunar twin as the two fishes. Further development follows through Aquarius and the other signs until it ends in Aries, with a minor epilogue not related to the signs. The portion concerning the Earth-Spirit and the portion concerning the character Set follow parallel but separate threads until they meet in the sign of Scorpio, from which point the story goes forward in a single plotline. All the major plot elements relate in some way to the *astrological* (as opposed to the cabalistic) attributes of the signs.

The main characters represent the elements of the modified INRI or IRNI formula, presented in detail in the paper titled *Set / Horus* and several of my other papers. (The formula's appearance here is in fact the first clue I received as to the modified formula's existence.) Briefly, the Earth herself represents the first and last "I" of the formula, corresponding to the astrological signs Taurus and Aquarius respectively. This dual characterization shows her as both a celestial being in her own right (Aquarius = "The Star") and as the nurturing mother (Taurus, ruled by Venus and the Moon) within whose "womb" and at whose behest most of the action takes place.

The protagonist, Set, corresponds to the "N" of IRNI, and his described character relates closely to that sign, its traditional ruler Mars, and its exalted planet Uranus. The sign's modern ruler, Pluto, appears only as an undercurrent and in the Pisces phase of Set's plotline. Set's opposite number, Horus, represents the "R" of INRI, corresponding to Sol and its sign Leo.

There is also the question of identities to be considered. The reader might wonder, as he examines this work, just who the Seniors are speaking to. It would be absurd to think that the scribe, the fellow whose name appears in the copyright notice, is the one who did all the things the Seniors attribute to the one they speak to. He is all too human, very much a child of his times, and more than a little bit of a fool. But if not him, then who?

In the words of the Seniors, the scribe is part of a tripartite being, a "man who is a mage who is a god". As a general rule, when the first person singular is used in this work, it is a blend of the scribe and the mage, in varying proportions, who speaks. The distinction between them is never too clear to the scribe, and it is becoming less clear as this working progresses. But the more doubtful and uncertain the "I" who speaks appears, the greater the proportion of the scribe in the mixture.

The Book of the Seniors

But when the Seniors speak, they are generally referring to the actions of the mage, the god, or a blending of the two. The sole exception is when they refer to events occurring on the physical plane during the lifetime of the scribe.

Perhaps the best view to take on this subject is to consider each aspect as a pseudo-autonomous subset of the next highest aspect. That is, each is a projection of the will of the next which can act independently most of the time, but which is absorbed and loses its individuality when the next highest aspect chooses. Thus, the lower aspect is never entirely certain whether it is expressing just itself or is acting as an extension of a higher aspect.

That being said, I will let the Seniors speak for themselves. As always, I welcome comments and correspondence about this work.

Benjamin Rowe

ACZINOR, SENIOR OF JUPITER

4/10/86

As the vision opened, I found myself in a place where blue sky came down to a yellow plain. There was a brilliance about everything, a cheery internal glow. I saw that the yellow plain had the texture of velvet or cotton candy.

Looking to the east, I saw a star coming up above the horizon. It had eight points around the circumference, another point aimed towards me and another pointed away from me.

To the south, I saw a lion seated on a cubical throne.

To the west, there was a watery area, in which a boat or barge was travelling. To the north there was an image of the planet Jupiter, rotating majestically in space.

I called again upon the Senior Aczinor, and he appeared wearing robes of blue with a dark purple shimmer in the folds. I did the LVX signs, to which he responded with the sign of Set, LVX, and the sign of the Enterer. I tested him with the pentagram of earth (which had no effect) and with the hexagram of Jupiter, which caused his force to flow into me. He himself dissolved, passed through the hexagram, and reformulated himself on the near side of it.

From close up, I could see that his hair was white, and his skin was a violet so dark and rich as to be almost black. His eyes were a lighter shade of violet. He held up his right hand in the sign of blessing and asked me to return it. Another flow of force went between us, filling my own aura with a deep violet similar to his own color.

He said "Thank you, o mage of power. Now we can speak clearly to each other. I am Aczinor, representative of the father Jupiter in the system of the Earth Tablet. Though your invocations began with the King Iczhihal, yet I am the first to speak, being the initiator among the planetary powers of the Tablet. I the wisdom of the King, and of his father the Sun, and cause it to take form before the eyes of man. I am the first below the so-called abyss in the Tree of Life, and so I am the pattern of manifestation within the world. Thus my star shows ten points, and thus the lion, the king, is enthroned by my existence. I function as his seat of rulership, causing his power to be extended into matter. Thus the four-square throne¹ is mine. The barge of the west shows my watery character, as the yellow plain and blue sky show my airy nature. The barge again is a foursquare construction, fitting the symbolism of my sephira, which is also considered watery in some ways. Thus also I float above the waters of creation in the earth's sphere, guiding those waters in their flowing downwards into matter.

"Since I am of the earth as well as of Jove, I am also related in some ways to his physical manifestation. The equivalent power in Jove's system rules those levels of his physical body in which life has appeared, taking its energy not from the Sun, but from the weaker but still great life of Jove himself.

1. When he said the words "seat" and "throne", there was a second voice saying the enochian word "thild", which Dee translated to mean both these words.

The Book of the Seniors

“Now you have been asked to be shown the invocations of the planets in the enochian system. I can not do this myself, being but the most junior of his representatives within the levels of the system. But I can tell you how to go about preparing for these. As you have thought, it is best to do invocations of all the seniors within the tablets. But rather than holding to a single tablet, invoke all of the equivalent Seniors from each of the tablets at once. This will allow you to get a full view of the action of the planet with the sphere of Earth, who contains all of the tablets yet presented to man within herself.

“From this, we will hope to instill enough of the force within you to make the presentation of the sphere clear and easy to perceive. Then you can go to your castle and locate the books with the invocations, and read them and transcribe them clearly.”²

(3-hour interruption at this point.)

“To continue, since you have invoked me and I have come, we must use the force for some purpose. Therefore, let me begin a tale, as is my right as the initiator.”³

“The planets of the system, with the exception of Luna, are all the bodies of lives of a scope so inclusive as to make the perceptions of men and angels nothing in comparison. All of them, even the least, operates at least at the level of Yesod in the Tree of which the manifest Tree of Life is Malkuth. Most of them operate in Netzach or Tiphereth of that larger Tree.”⁴

“The one exception, Luna, is a dead world. Its action on man is purely a reflection of the Earth's own power, projected outward by the minds of men onto the nearest convenient target. Luna is the body of a being who is now no longer in incarnation, having completed his tasks at an earlier stage in our solar system. His twin, the Earth, remains in living incarnation, and her influence extends to control her brother's dead shell. The cycles of life within the earth that are tied to Luna reflect the rhythms of interaction between the Earth and her brother in long-ago days, before the appearance of life out of her seas. Their cyclic interaction produced a ‘standing wave’, a continuing cycle of echos of the original interaction of the two.

“The Earth herself continues to reflect these cycles in the pulsations of her magnetic envelope. These aural-magnetic effects are the true cause of the lunar cycles in living things.

“I myself, angel and Senior though I be, am still within the range of these cycles, and I have less power sometimes and more at others as a result. You yourself are also subject to them, though since you wear a body of a male human, the effects are more of a psychological nature than they would be for those who wear female bodies. Nevertheless, the effects are there to be seen in all humans.

“I speak so long about Luna-Earth because I myself was the proximate cause of the brother's loss of connection with his body. Yea, even I, Aczinor, most junior of the Seniors of Jove, have had my influence in the dramas of the solar system. As you

2. These invocations have never been obtained. At the present (9/92) I am assuming that the promise that they would be acquired was simply a distraction until events allowed me to understand my true will more clearly.

3. I suspect that this statement is a bit of Jupiterian humor.

4. The many moons of the solar system are included among those bodies called planets, for purposes of this statement.

are now to have yours, o man who is a mage who is a god. Yours is the separation of the consciousness of the Earth from the deep levels in which she sleeps. Mine was similar for her brother in Luna. So you and I are brothers of the spirit, in the ways of our works, and I am pleased that you have come to me for aid in your quest.

“Now the brother's work was to express fully, with his sister, the effects of the so-called Third Ray of Active Intelligence within the system. Where she represents the lifting of the spirit out of matter by that force, he represented and embodied the movements of life into matter. For life must be present in matter before it can again be raised up.

“This one in Luna was of the younger of the stellar brethren, only a few cycles away from existence as a being of the type now embodied by human beings. This effort on Luna was to have been his first experience in incarnating as a full planetary being, free from the supervision of a mentor. (In the early stages of life in the higher realms, the man-gods perform their creations within the aura and under the guidance of a more advanced practitioner of the art.)

“Well did he do his work. Too well, in truth. For in concentrating himself to pass the spirit of life into matter he concentrated too well and part of his own spirit, though not his awareness of being nor his true self, but only that spirit which enlivens the ethers, became tied again into matter as it had been in the days before his rise to godhood. Worse, even when he realized what was going on and attempted to separate himself again, the flow of his energies into matter continued against his will.

“But we speak here of things far beyond this level, and words are not fully suited to the expression of these concepts. Perhaps a few images would make clear what we desire to express.”

(I had had a strong feeling at this point that I was not really perceiving the presentation in its correct form. Aczinor's comment is the result of this feeling.)

He gestured with his left hand, and before us there appeared an image of the Earth-Luna system. But where in our own time Luna is dead, here he was surrounded by an aura of life, though the surface seemed as barren as it does now. The earth also shone with an aura of equal brilliance.

Now some of the life around the moon seemed to be sucked into it, leaving a hollowness, growing outward from its surface inside the aura. A shock went through the remaining aura and out into space. As it passed over the place where Aczinor and I stood in the heavens, I felt a tremendous sense of despair and failure, and a sort of panicky desire to repair the disaster before it was too late.

The despair, sorrow, and self-recrimination I sensed was so overwhelming that I cried out, and had to leave the vision for a few minutes until it passed and I could again think sensibly. Worst was the sense of shame this being felt, as if in his failure he had also brought the works of the rest of the beings in the system to naught. It was as if this being in Luna had lost all sense of self-respect and self-confidence by his failure.

The Book of the Seniors

The pain he felt could be seen to radiate out into the system. It caused sympathetic responses in all the lives of the other planets, and so the whole system was threatened with disruption.

Now Sol turned his attention to the situation, seeking the cause of the disruption he had felt on the levels where he had his attention. Seeing the plight of Luna, he immediately overshadowed that entity, taking him over body and soul as he was able to do from his higher level. He caused a stasis in Luna so that the flow into matter was halted. The soul and awareness of Luna he lifted up, out of the trap, and wrapped in his own aura, comforting him and healing him.

Aczinor continued:

“With the immediate danger halted, there was time to look at the situation clearly and objectively. Sol and the planets attempted to comfort the lunar lord, but his shame was too great. He knew that by his failure he had ruined the whole beautiful plan by which Sol had intended to express love and life for this section of the galaxy. The far-reaching consequences of his failure overwhelmed him, and he begged to be allowed to resolve his error in some way, to expiate his shame with action.

“Since this disaster took place within the aura of Sol's work, it must therefore be remedied within the limits of his kingdom. He could not simply eject the ruined matter from the system, any more than a man can cure a cold by giving it to someone else. Nor could he allow this involutory flow to remain free in the system, for then it would continue to increase, eventually ruining the plan which Sol's quick action had so far saved. There was much discussion among Sol and the senior planets of the system, and deep meditation by all, lasting many millennia, on how this problem could be solved. Many plans were proposed, but none of the senior planets felt confident enough of his solution to propose it as a definite course of action. So the discussion continued.

“Our earth, being among the junior planets of the system, having not yet reached Tiphereth of that larger Tree in which the gods live and act, was not a party to the discussions but was only an observer. But unlike the seniors she was on a level where she was intimately connected with the type of force her brother manifested. And her love for her twin motivated her in a way the senior planets could not be. She devised a plan, and when the senior planets did not arrive at a satisfactory solution, she proposed her plan to Sol.

“It is impossible to state now what Earth's path would have been had this disaster not taken place. The conditions under which it might have been understood by human beings have not existed for many tens of thousands of millennia. The minds of men, as they have evolved under her new plan, are too far from the type of consciousness needed for any meaningful expression to be possible.

“But it can be said that under that original plan there would never have been incarnate human beings on Earth. The furthest into matter they would have gone would have been Yesod, and for most of the life of the system they would have been in Tiphereth.

“In Earth's proposed plan, she would take the involutory forces of her brother's sphere into herself and hold them there by deep concentration. She would, by her concentration, create a shell around herself which would keep the involutory force out of the rest of the system. Thus the other planets could continue to develop their themes without interference.

“To eliminate the involutory force from the system completely, she would set it against the evolutionary aspect of the Third Ray that she herself expressed. The incredible tension between the two would be used to produce an acceleration of evolution within her sphere. Where before evolution was a gentle process, with many thousands of millennia between substantial changes in form in a species, now evolution would be forced, with continual changes of both form and content of the living animal bodies. this forced evolution would produce bodies of a degree of refinement and integration that would never have been seen within the limits of Sol's original plan.

“Thus would she tie the involutory and evolutionary tendencies together, halting the involution in Malkuth, keeping it from pulling the whole system back into the shell-worlds that preceded the full incarnation of the gods. And when the bodies were of a great enough degree of refinement, she would begin to eliminate the involutory force all together. She would do this by forcing the human souls within her sphere to incarnate in matter.

“Unlike the matter itself, these souls, being already of a spiritual, evolutionary nature, would evolve much more rapidly. In matter, they would ache to return to the levels from which they first came, and their natural desire to return would eventually counter the involutory tendency.

“Not only this, but the hammer-blows of experience the human souls would receive within the forge of incarnate existence would change them into something far greater than they ever could have been within the original scheme. For they would come out of that forge with a temper, a hardness, that could never be lost, making them as the gods of the system and of the stars, brothers to these within whose influence they had led their many lives, where otherwise they would have remained the pawns and tools of the gods throughout the life of this current universe. Thus many thousands of millions of new gods would eventually rise out of matter where otherwise there would have been none. All of them able to express within the universe both the formula of spirit, which is evolution, and the formula of matter, which is involution. They would be true microcosms, and after many more cycles of evolution on the god-levels, each of them would be individually capable of creating whole new universes for life to express itself in. Thus was 'life more abundantly' once said to be the keynote of our planet.

“Even within this present universe will the effects of the Earth's proposal be felt. For these lives of men will spread out to the stars, when the gates are again open fully, and they will catalyze similar reactions in other spheres, where conscious life exists but develops at a slow pace. Thus will our galaxy and universe benefit from

the crisis of Luna-Earth, as consciousness independent of the gods rises up all over in response to the calls of the souls of men.

“But to return to our story, Sol heard the Earth's plan, and felt that it was the only possible one that had any hope of success. But he was certain there were aspects Earth had not considered, being beyond her current level of consciousness. And such a radical change of plan could not be put into effect on his own authority since its effects would spread so far beyond his own sphere of action. So he ‘passed the buck’ as you would say, laying the decision in the hands of his own mentor, who incarnates in one of the stars of the Sirius group at this time.

“Now Sirius (as we shall call him, though that is not his true name) saw that the Earth's plan would work, but that there was a danger of her becoming so concentrated that she would not know when the disposal of the involutory force was completed. Thus he declared that if the plan were to be implemented, there must at all times be within her sphere those who were capable of breaking out of it on their own, with no assistance, so that she might never suffer for lack of light should she have need of it. And also, these others must bind themselves to her, and constantly recapitulate the process of their evolution within her sphere, so that she might ever be reminded by her connection with them of the purpose for which she had hidden herself.

“The adepts of Active Intelligence, and of Love-Wisdom, and of the lesser rays who were acting in her sphere and under her direction could none of them accomplish this task. For their natures lack the forcefulness needed for such a solitary breakout as Sirius demanded. Only the adepts of the First Ray, the Will aspect, could succeed at this task, and those few of this type who were already working within Sol's system were working at tasks that they did not dare abandon. For the First Ray is not natural to our system and only enough adepts to fill the critical needs were there.

“So the call went out for adepts of the First Ray willing to fulfill the task set by Sirius. And this is where you yourself come into the story, o scribe who is a god. To tell of your part we must tell more of your origin than we have as yet.

“Now, the progression of spiritual beings upwards through the planes in the course of evolution follows a regular cycle. That is, there are generations of such beings, and each generation must mature to a certain level as gods before they can perform the acts that cause the next generation to be born out of the union of spirit and matter.

“Thus there are large gaps between these generations. These gaps are not gaps in time, for time is meaningless on the levels of which we speak. Rather, there are gaps of relative accumulation of experience between the generations. This amounts to the same thing on your present level, but not on these higher levels. Normally there is a gap of one full Tree of Life's worth of experience between generations, although certain members of each generation will advance more quickly so that the gap becomes less as the progress continues. As one generation moves out of our manifest tree, another arises out of the union of spirit and matter to replace it. This

occurs in cycles so vast from our current viewpoint as to be indenumerable in terms of years. Our Earth is now an exception to this because of her daring plan.

“You were born of one such generation and your progress followed that of your fellows up to the level of Tiphereth in that time and place's Tree. But at one point you had completed a cycle of existence within a planetary system, and as that system's lives withdrew from matter you went off into space with your fellows to find further opportunities for experience.

“Now by what can only be called a fluke, a play of Murphy's law, the current that the souls ride between the stars separated you from your fellows, and pulled you into the center of a cataclysmic conflict between two stellar beings of a vastly higher level. Like a piece of flotsam on the waves, you became trapped in the circulating currents between these two.⁵

“The forces there were so vast and intense that at first it was all you could do to keep your being from vanishing, torn to pieces by the conflicting pulls. For a time not to be measured in years did you struggle to maintain your integrity against these near-overwhelming forces. That you were not made naught was more due to fortune than skill at first, for there were places in the currents between the two gods where you would have vanished like smoke on a breeze.

“But eventually you learned to draw on those currents of will themselves to maintain your being. While still trapped within the currents of the two gods' conflict, yet you could live and learn and grow. And so you did, drawing on the knowledge of those gods as you drew upon their power, ever increasing your own power and will, rising through the planes until finally your will was so strong that you could force yourself out of the bonds of the conflict.

“Out in the spaces between the stars again, you sought out your former companions who had not been caught in the trap. Finding them was a shock, for you had not realized how much you had changed in the course of your escape, having had no one to compare yourself to. Now you found that you had little in common with them. They were still singular beings, being all of the Third Ray essence, while you were now tripartite, having absorbed the forces of Love-wisdom and Will from your experience in hell.

“You could no longer communicate with them as equals. They could not understand you as you now were, and only your tales of shared experiences convinced them that you were their lost companion. You could still communicate with them within the limits of the third aspect, but even there your formulations were often so subtle as to escape their comprehension.

“There were beings around who could understand the other parts of your being to an extent. But these were devas and other angel-like beings, passive transmitters of higher forces rather than active users like yourself. So they also were of no use to you in the long run.

5. On the physical plane, these two beings were represented by a pair of mutually orbiting black holes. The currents mentioned are equivalent to the gravitational stresses between two such objects.

The Book of the Seniors

“The gods of that time and place were also uncertain of what you were. Like them, you encompassed the entire Tree of Manifestation in its three aspects. But you had fully fused the three aspects at a level of experience far below that at which they themselves had done, and none of them knew of precedents that would aid in deciding your case, determining where you could fit into the scheme of things.

“So, neither fish nor fowl, you wandered the universe, going wherever there was need of one or another combination of your three aspects. But never did you find a place where you fit fully, and could use all your skills at once. And always, always, there was that tremendous sense of loss at your separation from your original group, and an ache to fit in somewhere with companions of like powers and perceptions. Alone and apparently unique, you conceived of yourself as the ‘solitary one’ or the ‘unique one’. Eventually you shortened this to simply ‘one’, since one of anything is always unique and solitary. This you translated into Hebrew during your last completed cycle of incarnation on Earth, calling yourself ‘Achad’, and expressing your full command of all the Tree in your two mottos, ‘O.I.V.V.I.O.’ and ‘V.I.O.O.I.V.’.

“But I digress. You continued to wander, seeking work worth your skills, until the call went out seeking adepts of the Will aspect for the Earth's plan of salvage. You were far away in space and time, but a god who had known you in the old days and had felt the gods' equivalent of compassion for you and frustration at his inability to help you, remembered and recommended you to the god Sirius. Sirius saw that you were ideal for this work, for you had already demonstrated an ability to free yourself from traps of a far greater strength than the Earth's blockade would be, and you were already capable of acting almost on the levels of the gods themselves. Thus your presence would ensure that the shell could always be broken, no matter how bad the disaster.

“You had also demonstrated your ability to live isolated from the universe at large for long periods, during your captivity between the warring gods. Many of the adepts of Will who had already been considered had been passed over for this very reason. They could not function without external contacts.

“And again, being somewhat less than a full god, though fully expressing all aspects of the Tree, you were still capable of incarnating as a human being without too great a loss of your higher perceptions. Thus you seemed ideal for the position Sirius sought to fill. After consultation with Sol and Earth, you were called to Sirius to have the proposal laid before you.

“You agreed with Sirius' evaluation, and saw in the plan two possible benefits for yourself. First, the drop-forge environment Earth was to become was a reasonable substitute for the trap in which your own skills had been shaped and tempered. Thus you now had some hope that companions who would be your equals would come out of it. If not from among the human souls on Earth, then from among the adepts called for the task. And, failing that, the additional experience might be sufficient to raise you to full godhood by the end of the cycle of closure. I am happy to

say that both of these goals have been accomplished, though few of your true companions are incarnate at this time.

“Thus you became the head of that group called, in Liber AL, the ‘Kings of Earth’, but who prefer to be called Knights, for their task is one of aiding a good and righteous cause, and not one of rulership for its own sake. And the Knights of Will in the Earth were formed from among the adepts of will who volunteered and were qualified for the task.

“You ask why this was not said at the outset, in the visions of the Kerubic squares. The reason is that you would not have believed it. As it was, your resistance to what was shown about yourself was so great that everything had to be couched in symbols, and even those were slightly distorted. It could not have been otherwise, for Sirius' rule still holds among the Knights, and in each life in incarnation the Knight must recapitulate the whole of his evolution in the Earth. For such a recapitulation to succeed, it must be done blindly. And so you could not have known what was coming, and your initial resistance was reasonable and appropriate. With what we have given you since then, you are coming to accept the truth of what we say, and you will eventually merge your incarnate and excarnate aspects again.

“Nevertheless the Kerubic visions do contain many symbolic statements of what we have said here, particularly in the visions of the earthy lesser angle. That dark self who spoke in those visions, through whose eyes you seemed to see at times, is merely that part of yourself that has been excluded from consciousness during your recapitulation.

“We have been at this much of the day, and it is time to stop. Tomorrow we will finish with my part of the tale.”

4/11/86

I tried to get contact using the usual invocations, but there seemed to be a great deal of interference. So I decided to delay the rest of Aczinor's tale for a day.

4/12/86

I did the invocations, and again found myself in the area of yellow land and blue sky that opened the previous vision of this Senior. I called upon Aczinor to appear, and he did so, looking essentially the same as in the previous vision. I did the sign of Set and the signs of LVX. He replied with the same signs, and added the sign of fire, which he held until I returned it.

I tested him with the pentagram of Earth and the hexagram of Jupiter, and neither had any effect on him. I asked why he had done the sign of fire, since we were in the Earth tablet at this time.

He replied, “We are not in the Earth, but above it, in the airs of the planets from which it was formed. But that is not the reason why I did the sign. It was done in salute to the master of the First Ray of Will who stands before me.”

I decided this was an acceptable explanation, in view of the previous messages, and asked him to continue.

The Book of the Seniors

“When we left off, we were at the point of describing the initiation of the Earth's closure, under the auspices of Sirius, Sol, and the Knights of Will within her sphere. You were described as the chief of the Knights, and a little of your history was given. We started to supplement this with additional information the next day, but the currents were against us and we cut off communication until today.

“Before we continue, though, I wish to say a few more things in relation to what has come before.

“I said in the aborted session yesterday that the reason why your own path from Tiphereth to Binah was done alone, instead of with a group as is normally the case was due to your duties as the chief of the Knights. In your position, by declaration of Sirius, you are required to recapitulate the whole of your own history of initiation in each of your incarnations. Since the initiation must be done blindly, we could not earlier explain the reasons for your isolation, despite your frequent requests over the years that someone do so. I speak in this case for the other Knights, who have monitored and aided your progress through this current incarnation, while you did the difficult task of repeating the unrepeatable.

“We said before that it was only by a fluke that you became what you now are. If things had been otherwise, you would never have come to the position you now hold, nor would you have ever heard of it. You would still be down in the Tree with the rest of your original group of companions of the spirit. But because of your entrapment between the two conflicting gods, in that far-away place and time, you became more than a man, and somewhat less than a full god, long before your time would have come in the normal course of evolution. You are indeed, as you have so aptly described it, a queer fish. Before the closure of the Earth in long-ago times, there were none known who duplicated the qualities of your own being, intermediate between god and man, partaking of the nature of both in the fullest possible measure, fusing them into a third thing for which the universe at that time had no name. With the closure of the Earth, and the development of other adepts of the Will aspect under the forceful conditions of the Earth, you have come to have at least a few who are similar enough to yourself that you are able to communicate fully the quality of your being to them. But these are still not exactly like yourself, for the forge of Earth is not the forge of the stars in which you grew, and all of the adepts had companions of their own type with whom to develop. So your quality of uniqueness has not been completely lost to the world, and Achad is still the appropriate description of your being.

“The conditions under which you grew to power and mastery are unrepeatable, as we have said, being a fluke of cosmic nature that will not likely come again. So it is nearly impossible to produce in matter a complete recapitulation of your development. In some instances, mere symbolic substitutions had to be made for the true powers that affected you in the original course.

“To substitute for the two powers whose conflict gave your being the boost into mastery, you were in this life maneuvered into situations where you found yourself in the middle of arguments and conflicts in which you had no personal interest. But

your presence acted to catalyze the manifestation of the full emotional force of the participants. These forces, being diverted from the direction in which they should have gone, towards the opposing party, were directed instead onto yourself. These forces were in some instances of such an intensity that they did almost kill you, as did the original forces. But these forces of the present day events would only have killed your body, where the true forces of the original conflict would have resulted in the true annihilation of your being.

“In the conflict between Paul Solomon and the other David⁶, you were given the opportunity by one of them to chose between them, and when you refused to chose, preferring to maintain your independence, he tried to kill you by psychic means under the guise of helping you. This resulted in the rip in your aura that was not healed until your later contact with Nema. But at the time, this rip was a help, for it allowed the inner powers who supported Paul Solomon, on the other side of the conflict, to open you up to the spirit of the Earth at our request, so that you would have a true feeling for the goal of your work from the beginning. Also they did the service of prophesying the course of your work. And as you have found now, their prophecy was accurate to the last decimal place, so to speak. Like all good prophecies it was incomprehensible at the time but perfectly clear when the events it referred to occurred. Thus they referred among other things to ‘the One’, Achad, who is yourself in your fullness, at a time when you had not even heard of Jones, let alone of Achad or his Tree.

“Now this compensation of the forces of evil thrown at you by David, with the forces of healing and light thrown at you by the supporters of Solomon, was the closest we could come in this incarnate world to the powers of the stars that caused you to be as you are, in the beginning of time. We continued to bring you into such situations, of a lesser degree of force but greater duration, for several years afterward. The circumstances that were engineered were designed to force you into the solitary path that you had to take and to keep you there until the path had been trod to its end. The pain and confusion and loss you felt by this isolation, and your consequent efforts to rid yourself of the inhibiting influence were fairly good analogies to the feelings and acts you did while caught between the two gods.

“The loss of your original companions from before your entrapment and your later finding of them and experiencing of their noncomprehension of yourself was duplicated in this life by the lack of comprehension the adepts showed for your work in its early stages, and in the rejection and insults of your skills that they showed. This was run concurrent with the other events that caused you to become isolated, so that the intensity of the isolation could be increased to the point needed for this life's work. So the periods of your isolation in the entrapment and your later isolation after your escape were run in parallel in this life, compacting the story's two similar parts into one for convenience.

6. At the time I was working with Paul Solomon in 1973, there were two persons named David associated with his group, known as the Fellowship of the Inner Light. One, David Raily, seems to have been the reincarnation of the biblical King David. The other, whose name I have deliberately forgotten, seemed more an avatar of Loki, though I never found out for certain. It is the latter person who is mentioned here.

“Thus your path in this life has been the closest possible duplication in incarnation of the original course of your initiation. Now that you have achieved the level of Binah, the rule of Sirius is somewhat mitigated. But still, your whole course has not been trodden, so the blindness must continue in part for a short while yet, until the powers of the planets chose to bring you back into their fold. The timing of this will not be under your control or the control of your fellow knights, but is a decision to be made by the gods themselves, in their own chosen time. But at the same time, it is vital that you have a reasonably clear view of what has come before, so we, Aczinor and the Knights, must resort to this more indirect method of revealing your past. The memories on which what we say is based are open to you, but the time to seek them must be kept in the future for a short while yet. In the course of your planetary explorations in the next few months, more will come to you in the form of direct memories, as you have already had direct memories of your lives as Dee, and as the priestess of Isis and Set, and as the priest-child of Set in that same temple in a later time, and of that other life in the middle ages in which you discovered the path to the stars in the powers of the menhirs, and in that life in the last century, immediately preceding your incarnation as Jones, in which you met David the Israelite in his incarnation among the Indians.

“The scope of your past is too great to be absorbed at once, and so these expedients must be used to accustom your brain to the ideas, opening the channel by which the true memories will come.

“Now I would like to continue with the story of the Earth's closing, but the next section is the responsibility of the goddess Lzinopo, who rules the lunar-earth currents within the Earth Tablet. She will be the one to describe the manner of the removal of the twin's ethers from Luna, and their incorporation into the body of the earth by yourself and the other Knights. She will also go into some other things related to your own course in that time and place, and how these affect your current work.

“To do this, invoke her at the time and place that you will, but soon, so that the currents you began with the invocation of Iczihual will continue to flow without need for re-initiation.”

I said that this was acceptable, and asked if there was anything else he wished to say at this time. He indicated not, but added that if I had any questions, he would surely answer.

I asked, as a matter of curiosity, if he could tell me the meaning of his name.

“My name, Aczinor, means ‘Wisdom flowing from the waters of Night’. Wisdom is of course the province of Jove among the planets, as truth is the province of Saturn. Night, in this case, is the Earth herself, who is the manifest representation of the powers of the True Mother, Nuit. It is from her womb that these waters of wisdom flow. Thus I embody the principles of wisdom in the element of Earth, as my opposite, Saturn, embodies factual truth.”

I thanked Aczinor for his efforts on my behalf, and gave him license to depart.

LZINOPO, SENIOR OF LUNA

4/13/86

I invoked the forces of the Senior Lzinopo of the Tablet of Earth. The Senior appeared as a woman, dressed in a long flowing gown of a dark blue or violet color. On her head she wore a crown like the waxing moon, with the limbs of the moon projecting out on either side of her head. She had a high rounded forehead, like Queen Elizabeth I, coupled with a square jaw. She stood turned about 30 degrees to her right. Her right hand was held forward, with the palm cupped upwards in a gesture of pouring. Her left arm was held at her side, with the hand facing to the rear, and it was bent at the wrist so that it was also cupped upwards.

From her right hand, I saw fall what appeared to be either grain or flakes of silver. These fell, but before they could hit the ground they were blown backwards between her legs, and appeared to flow upwards from there into her womb, which was concealed by her robes. Then, from the womb descended another stream, this time of golden flakes, which again were blown backwards before they could hit the ground. This second stream flowed up and landed in the palm of her left hand. A moon was embroidered on her left shoulder, and a sun was embroidered on the right shoulder.

I did the LVX signs, and the Sign of Set. The image of the Senior slowly rotated until she was facing me, still holding the position in which she first appeared. The front of her robe was cut deep, so that the tops of her teats could be seen. The edge of the cut was embroidered with a design of golden bees and butterflies. Her skin was white, but her feet, sticking out beneath the robe, were black.

I did the LVX signs and the sign of Set again, and she did not respond. The pentagram of Earth and the hexagram of Luna caused the background to become brighter, but had no effect on her. Testing with the letters made her grow larger, but still she did not move. Finally, I tried the signs of the rending and closing of the veil, at which she straightened up and replied with all the signs I had given, plus the sign of fire, which I returned.

She said, "I salute you, o mage who is the power of Will within the Earth, with the sign of your power among the elements. I am the goddess Lzinopo, who is a senior within the Tablet of Earth at the bidding of our goddess who resides in the planet Earth.

"Now, to answer your unspoken question, the reason I did not at first respond to your gestures and signs was so that you could get a full view of my magickal image. This will be important later, for reasons we will not now go into. I also did so to express that I not only symbolize the so-called Lunar current within the Earth, but am also of the nature of the Earth herself. The combination of the Lunar flexibility and changefulness with the power and stability of the Earth bring about that condition known as stillness and silence, which are the primary virtues of the elements of Earth. The gesture in which I stand is a traditional gesture of Isis and of Nephtys, the revealed and the hidden powers of the Earth. My countenance also reveals my combination, with the lunar forehead and the earthy jaw. So too with the combined

forces of the Sun and Moon which are shown in the grains or flakes that fall from one hand into my womb, and out into the other hand. Meditate on this for a while, after we have finished here, and you will see some significant symbolism of the Earth in this.

“The bees and butterflies are also traditional symbols of the Moon and of the female sex, for obvious reasons.

“Now in order to continue with the tale of the Earth's closing, we must give you just a little more information about your own position in the matter, and the relations between you and certain other adepts who had been considered for the position which you now hold.

“In the time when the adepts of Will were being selected for their part in the task of the Earth, there were several adepts of Will already working in the solar system. These were not First Ray adepts, as you yourself are, but adepts of the first sub-ray of the Second Ray of Love-Wisdom, which is the common keynote of our system. Among these was one who working in Sol's sphere, doing the work of connecting the Earth with Sol's pattern.

“This one, who felt that he was best qualified by his previous experience in the system, and by his intimate connection with the Earth, wanted to be the leader of the group which was to handle and integrate the force of the dying brother into the aura of the Earth. Being of the Second Ray, he was comfortable in the system, and he felt that his ease of movement and ability to direct the forces made him the best qualified for this job. However, he was somewhat lacking in the ability to operate alone, having grown up spiritually in direct and full contact with many of the cosmic forces, and having attained his initiations through group work, as is normally the case. In the position you now hold, he would have required the force of all the other adepts of Will to crack through the shell of Earth at the time when the work was completed. He did not feel that this was a handicap, since once the closure occurred, none of the adepts could escape from the earth, and therefore would be available at the proper time.

“But an adept of the Will aspect of Love is a far different thing than the adept of the Love aspect of Will, such as yourself. The Second Ray adepts are proficient at gathering together and integrating energies, but are less able to deal with the release of those energies back into chaos, which is what this task requires at its end. It was felt by the gods involved that allowing him to be the chief of the Knights would leave open a possibility that the shell would not be cracked, if his identification with his being in the Earth became strong enough in the intervening thousands of millennia.

“What was needed was one who was not entirely comfortable in the system, being of another nature, so that even in the body the system would tend to reject him. This would ensure that the chief's identification with the manifest earth would never be strong enough to preclude his necessary rejection of it in the breaking of the shell.

“It was at this point that you were brought to Sol by Sirius, and examined for the position you hold. The candidates were gathered, and tested in their ways and abili-

ties. Of all examined, only two had the minimum qualifications, you and that other we speak of.

“There was really no question in the minds of Sirius and Sol that you were the better qualified, so the examinations were more or less pro forma. But this other one did his best to convince them that he was better, and so they selected him as the alternate, in case some misfortune happened to prevent you from doing the work at the last moment.

“One can not really say that this being was jealous of you, for such is an emotion that only manifests in the lower bodies. But the adepts of Love-Wisdom have one fault, which is that often, being identified with the essential force of our system, they believe that their perspective is greater than it is, that their own evaluation is the only evaluation possible. In their identification with the solar force, they take on something of the sense of inclusiveness that is his, but without also taking on the perspective needed to truly manifest that inclusiveness. This fault reflects, on a higher level, the egoism of the integrated personality in the worlds below Tiphereth. All of the rays have their faults, which are usually the same as their virtues, except exaggerated. The First Ray types like yourself have the fault of being over-persistent, of being too forceful in their presentation of their will for the matter on which they are working. Thus, left to themselves, they sometimes tend to produce degenerate versions of what they should have done. Such types are very dangerous within a system of the Second Ray type, and so they can only manifest here under the greatest of restrictions. In your present life, and in the case of your previous incarnation as Dee, these limits were applied by withholding from you the powers to match your will until you were sufficiently advanced to restrain yourself.

“So the chief and alternate were chosen, and the lesser adepts who would fill out the organization of the Knights of Will in the Earth were chosen, under the recommendation of Sol and Earth, each for his particular purpose in the scheme. When this was done, the preparations for the actual closure began.

“Now as was said by Aczinor, during all this time the moon was held in a psychic stasis in which no actions could occur. The spirit who inhabited the moon, being healed of his shame and his desire to rectify the situation on his own, was given over to certain gods in another system, to continue his training in the methods that would prevent him from being caught in a similar situation in the future. This separation of the spirit from the life of the ethers, the part of his being that had been trapped, was performed by Aczinor. Being the closest in nature to Luna's spirit among the Seniors of Jove, who is the manifestation of the synthetic aspect of Love-Wisdom, it was he who was called upon to draw away the living substance from the lunar body and to bring it here to Earth. Sol opened a gap in his stasis, away from the point where the Lunar Lord was connected to his body, and slowly he allowed the force of etheric life to flow to that opening. As it flowed, it was picked up by Aczinor and drawn across the short distance into the Earth's inner aura. When there was no life left in the lunar body, the connection between the Lunar Lord and that body shriveled and disappeared, since no more of his life could enter through Sol's

continuing stasis. Thus he “died”, in the sense that he could no longer be considered as having a connection with his body of manifestation.

“This all took place many millions of years ago, in the middle of the Cretaceous period of Earth's history. The absorption of the etheric substance of the dead brother into the body of the Earth caused an intensification of the Earth's magnetic field, and in the etheric equivalent of that field, her life-aura. And as a consequence, the amount of radiation coming into the Earth was substantially reduced. This purely physical effect was the first stage of the Earth's closure. Coupled with a reduction by Sol in the physical radiation output from his body, this caused a climatological change which eventually resulted in the extinction of the major animal forms then inhabiting the Earth. The was part of the Earth's plan, this change being the first of the methods by which the animal bodies would be put under stress to force their evolution.

“The Earth was not fully closed at this point, but the time of closure followed soon upon it. The adepts of will came to Earth, and the first of their tasks was to make use of the new force of the dead brother to complete that closure.

“Before this could be done, preparations had to be made. In order for the Earth to experience the work of the adepts in the manner decreed by Sirius, each adept had to be fused on one level with her energies, in a marriage of spirits. On a cosmic level, this fusion took place through a process analogous to the sexual process in humans, which leaves a permanent connection between the participants. In effect, and speaking very loosely, the Earth allowed herself to be raped by these adepts, allowed them to take into themselves the essence of her spiritual substance, and to place that substance completely under each adept's individual control.

She became the whore of these man-gods, accepting all that they thrust into her, and giving all that they took from her, without expression of her own will, completely passively. To allow the adepts this freedom on her, she had to concentrate her consciousness to the point where her will was completely divorced from her bodies of manifestation. She concentrated her consciousness in her equivalent of the womb, her navel chakra, in the mode of receptiveness, and divorced her consciousness from the rest of her body. (Her life, of course, continued to regulate the actions of that body without her attention, in the same way that a human being does not have to consciously think about the processes of digestion or circulation of blood in order for those processes to function.)

“The adepts of Will, who at that time were all operating on the levels of the solar system, now had to create for themselves the various bodies of manifestation that would allow them to function in her sphere. These bodies, the so-called Atmic body of the hindus, and the body that is called the soul, they built directly out of the living substance of the Earth, forming it to their Will without regard for her awareness. In doing this, they created the prototypes, the models, on which the human bodies of this current day and those more developed bodies to come in the future would eventually be based. Their very presence in these levels, and their act of will in forc-

ing the substance of the Earth into the desired forms, initiated the changes that would lead to incarnate humans seventy million years in the future.

“From that day forward the Earth progressed and developed only through her connection with the adepts, as they did their work within her. Gone was the possibility of her active development under her own will, until such time as the involutory force of the dead brother's ethers was completely eradicated. She now progressed by reflection of the adepts as they recapitulated their own paths of initiation within her sphere. This has all been gone into in much more detail in the visions of the Kerubic squares, and we need not expand on it any more here.

“In the visions of the fiery lesser angle of the Earth Tablet, it was shown how a force of Will, represented by the element of fire, becomes encapsulated when it is forced into the Earth. This is an automatic effect, requiring no conscious effort on any being's part. In the instance we are examining now, the force of Will was the force of the Knights of Will in the Earth, as they took and manipulated her substance to their own ends. The force of Will presented by the adepts, particularly by yourself who was more than an adept though less than a god, caused such an encapsulation to take effect on a scale that caused the entire earth to be enclosed within the shell. Thus was the earth cut off from the heavens, and thus was her sleep within her own womb made complete. And thus has it continues to this present day, when the shell is about to be broken again.

“And thus also we complete our own presentation for the moment. More will be given if you return in the next few days and invoke the next of the Seniors in the series, Alhctga, Senior of Venus, who will show how the adepts made use of the forces of involution to force the development of bodies suitable to the task of destroying that very force. She will also go more into the developing conflict between yourself and your alternate, which is the basis for so much of the religious mythology of later ages. If you have any questions, ask them now, please.”

I asked her to describe the nature and limits of this shell that was formed by the presence of the adepts. What could enter into it, and what could go.

“This shell is primarily on the levels of consciousness, those levels that begin with the ego in Netzach, and end with the individual pattern of destiny in Chesed. The lower levels, which are merely matter, with no inherent self-consciousness, are open to the outside. But the energies that can get in even on those levels are distorted by the aura of the earth in their passage, so that communication with the outside is problematical and subject to many errors. On these levels, the shell acts mainly to keep the involutory force inside, rather than keeping the outside from coming in.

“On the egoic-solar levels, the shell is two-way. That is, it keeps all but a few beings of a certain type from coming into the earth, and also keeps any involutory forces that have come that high from getting out. Again, some inward communication is possible, but it is often distorted. The main effect is to keep those souls who are on Earth now within her sphere of action. None who are here can really escape from the earth, although it is possible to send portions of the consciousness

outwards, provided they are of a sufficiently pure character, and get back information from outside. But they can not leave the Earth completely, and can only incarnate within her sphere, until the shell is broken again. Similarly, souls of the human type who are outside the Earth's sphere of action can not come in and join the fun, but can sometimes send projections of themselves to see what is happening.

"On the levels above Chesed, the shell does not really exist, but the thought-forms created in the minds of men by the isolation of the lower levels generally insures that they do not think of the outside without some outside influence contacting them first. This is changing rapidly in this present day, though, as the consciousness of space produced by the space programs and the use of communication satellites sends men's minds outwards again. The American lunar landings, and the landings and fly-past missions to the other planets by our unmanned spacecraft are a sign that the shell around the earth is deteriorating and will soon fall.

"On a physical level, the shell extends somewhat beyond the orbit of the moon in the form of an almost-spherical torus. That is, the shell is closer to the Earth at the poles than at the equator, and tends to hollow inwards right above the poles. The forces making up the shell rotate in both a spiral around the center of the earth, and in a spiral around the ring of the torus, much in the way that magnetic fields cause electrons to move."

As I did with Aczinor, I asked her to explain the meaning of her name.

She said, "My name, Lzinopo, means 'first to come from the depths', or 'first in the lower waters', depending on context. I am the flowing watery aspect of the Earth, its changeableness and its physical adaptability. I rule the production of new forms out of her substance, which is why I was chosen to give this part of the story which has to do with such creations. Also, being of the 'lunar', receptive nature, I am also of her 'mother' aspect. I represent the link between her and those greater waters which flow from the womb of Nuit, her correspondence on the cosmic levels. Thus I am first to come out of her waters into those larger waters, among the powers that serve her.

"Now, do you have any more questions? If not, I will take my leave. Do not forget to invoke next the powers of Alhctga, so that the story will continue in its proper order."

I told her I could not think of any other questions, and gave her license to depart.

(I note here that I had a great deal of difficulty keeping my mind passive enough to receive this communication clearly. It seemed that even the slightest evidence of will on my part tended to distort it a little, so that the grammar became stilted in places. I suspect that this is due to the reflective, lunar nature of the force of the Senior.)

Alhctga, Senior of Venus

ALHCTGA, SENIOR OF VENUS

4/14/86

I invoked the Senior of Venus in the Tablet of Earth, named Alhctga. The currents of force felt strong, but did not show any tendency to produce an image.

After several invocations, the Senior appeared as a woman, dressed in a flowing green and amber robe (the cloth shimmered in these colors as she moved). Her hair was a honey-blond color, worn loose to her shoulders. On her head was a circlet of copper, with a star of seven points mounted on the front, covering the ajna chakra. The skin of her face and hands was a mediterranean olive-tan color. She appeared to be pregnant, and held her left hand to her belly. Her right hand was held forward in the same gesture as was shown by Lzinopo in the previous visions, but nothing fell from her hand. Her face was middling-narrow with a fine bone structure. A small satisfied smile creased her face. The hem of her robe was embroidered with doves and serpents, and an occasional double-headed eagle.

I did the 5=6 signs, and the signs of Set and LVX. She responded in kind, and then held her hands out to her sides as if inviting me to come closer and embrace her. I tested her with the pentagram of Earth and the hexagram of Venus. Neither had any effect except to brighten the area a little. Testing with the letters also had no effect.

I invited her to speak, and she said, "Come closer and embrace me, o mage of Will, for I have the power of the Earth in her fullness within me, and you are the father. Therefore do I take a mother's right with her mate."

I willed myself forward and embraced her. Her eyes could be seen to be of a very deep green color, with streaks of olive and amber-brown. She leaned against me within the embrace for a moment, then stepped back.

She said, "My name, Alhctga, means 'closest in spirit to the Mother'. I am the example of what the Earth's eventual force within the system will be after her rising. For the Earth is intended to express the force of Love-Wisdom within the system, in its reproductive aspect and its desire aspect, where the planet Venus expresses that force in its egoic aspect, and Jupiter expresses the synthetic aspect. Since you have caused her to awaken slightly, therefore is she aware again of the power of her mate, and has taken some of it into herself. As the force of the union increases, she passes it on to those of us who are her servants, so that we might prepare in our own way for the rising that is to come. You have not yet seen your mate in these visions, and will not until the day of the marriage, when you again rise into the stars and take her with you to meet the planetary lives of the system as a new, greater being than when she laid herself in her womb to sleep.

"Now being of the reproductive aspect of the Earth, and of her spiritual aspect as well, it is my task to explain the ways in which the Adepts of Will had their way on her, in the early and middle days of the hiding, before the appearance of human beings incarnate in the body. I will show you the ways in which the adepts used the involutionary forces of the dead brother of Luna to force the growth of more

refined, tougher forms within her sphere. To begin with, we must again speak of the developing conflict between you and the one appointed as your alternate.

“In the early days of the Hiding, many thousand of millennia ago, there were no bodies on the Earth that could be used for the incarnation of intelligent, self-aware beings. Since the appearance of such beings was vital to the eventual elimination of the involutory force within a reasonable span of time, the first task of the Knights of Will within her was to initiate the processes that would eventually lead to the appearance of such suitable bodies. In terms of its effect on the goal, this was the least important of the periods of time, though it was the longest as it would be measured by incarnate intelligences. These later periods after the appearance in bodies of true human beings are much shorter. But the intensity of the effects working now are such that the difference between the earth before the Hiding and afterwards for many thousands of millennia is minuscule by comparison.

“But nevertheless, this creation of bodies had to precede the important part of the work, or that work could never be done. Effectively, the Knights of Will had to create a situation in which the evolution of the physical animal bodies would be accelerated several fold. To do this, they had to make use of the involutory force of the dead brother.

“Now at this point there came a disagreement over methods, between you and your alternate. As usual, he was trying in some way to take away the leadership of the group from yourself, so that he could be the one who would be the initiator of the Earth's rising in this present day. Lzinopo has already gone over the ways in which the powers of the adepts of the Will sub-ray of the Second Ray, and of the Love sub-ray of the First Ray, could degenerate or be exaggerated into faults. Both of you, you and your alternate, possess the faults to match your virtues, and always have done so. This was inevitable, since neither of you really had any competition on your own level to slap you down.

“But within the framework of the Earth, you, of the two of you, has tended to be more cautious and workmanlike in the manifestation of your force. You being alien to the system's essential keynote, the system tends to backfire on you more rapidly than on your alternate and thus you retain more caution in your actions. Your alternate on the other hand, being comfortable with and in the Second Ray, tends to jump ahead of himself, thinking he knows it all and can do whatever he wants without care of caution.

“Now at the point in manifest time of which we speak, the Knights were discussing the ways in which the involutory force could be used to accelerate evolution. Being of the First Ray, and having experienced the effects of forceful invasion of your being in the time of your entrapment, you held that the organism itself must always be held inviolate. That is, that the involutory force should never, ever, be merged into the actual physical bodies of the animals being evolved. Rather, it should be applied to the organism from the outside, in the form of rapid and unexpected environmental changes. This would allow the evolutionary aspect of the

Third Ray within the animal bodies to operate freely in its adaptation to new conditions.

“Your alternate, being of the Second Ray, was inclined to merge the involutory and evolutionary forces within the same body, and to try to harmonize them by balancing their conflict in the nervous systems of the animals themselves. He felt this would be more effective than your own method.

“As it has turned out now, your own method was the better of the two, and was the one that eventually was adopted for most of the surface of the planet. But at that time it was questionable whether one or the other was better, since it had not before been tried in the knowledge of any available source.

“Your alternate managed to convince a large minority of the Knights to support his own proposal. This group, while not large enough to over-rule your own decision on the matter, was strong enough to demand that their own ideas be given a fair test. Therefore two areas of the Earth's surface, each at that time reasonably isolated, were designated as test areas. The one given over to your own plans was the area now known as East Africa. The one given over to your alternate's plan was the area now known as Australia-New Zealand. These two land masses, having separated from each other only recently as geological times go, still had comparable groups of animals on them. But they were far enough separated that there would not be any cross-fertilization between them.

“So the two of you and your adherent adepts went to work. Within the area of Africa you caused severe climatic and geological changes to take place, using the involutory force to produce these changes as you needed them. The food shortages, and the increased dangers to survival, you believed would cause a rapid increase in adaptation among these creatures, making them more versatile and resilient, able to adapt that much more quickly to future changes. Eventually you hoped to create a creature that would be able to not only adapt itself to its environment but to cause modifications of that environment for its own use.

“Your alternate, on the island continent of Australia-New Zealand, did not indulge in such climatological modifications to any great extent. He considered them unimportant, and did not even attempt to control those natural changes that took place within his area of work except when they became too extreme to allow his subjects to live. In his area, he attempted to fuse the involutory aspect of the Third Ray with the evolutionary, hoping and expecting that this would create internal stresses in the animals that would cause their bodies to adapt and become more refined. Eventually, he hoped, the forces in these bodies would cancel out completely. Since the amount of involutory force within the Earth was much less than the amount of evolutionary force, his idea was that even after the involutory force was entirely canceled (over a period of millions of years in billions of animal bodies) there would still be enough evolutionary force left so that the Earth could go back to her original plan of expression within the system. That this idea was in direct conflict with the intent of the Earth herself did not bother him, since there were none but yourself who could prevent him, and you, being the consum-

mate individualist that you were, would not do so without at least a fair test. He figured that a *fait accompli* would put him on top again among the adepts of the system, and even Sol would not be able to say him nay.

“But alas for this plan, his system did not work well enough to be continued. After several million years, a sudden change in climate caused all the animal life over the largest portion of his work area to be killed off, and the coming of a desert condition that appeared to be permanent prevented the remaining animal lives from ever gaining the needed strength and numbers again. Thus, even his own adherents decided that his plan would not work and it was decided to abandon it in favor of your own plan, which seemed to be working well.

“(I should point out here that your own manipulations of the African climate led to the changes in his work area. He could have prevented them if he had paid more attention to the climatological effects, but he had not done so. You had warned him several times that he should do so, and predicted the result that came. But he had rejected it as gratuitous carping on your part. Since you were all now working on a lower level than before, such emotional reactions were now possible, and he expressed them in this instance. He blamed you directly for the failure of his plan, and vowed privately to perform an act of revenge at a later point in your own work. But he missed his chance the first time, and after that you were warned and manipulated his anger to your own ends.)

“Meanwhile, the animals of your own area of work had been adapting constantly and continuously to the changes you had forced upon them. Many of them developed sufficiently to be able to survive over ranges of climate that would have killed any of their predecessors in less than a day. And not only to survive, but to flourish. The population had not only increased despite the changes, but had increased in variety far beyond what you yourself had expected. Large numbers had even escaped the work area and fled to other lands, spreading the adaptations far and wide.

“Now in view of their relative success there was no question in the minds of the adepts that the external-threat system of forced evolution was superior to the internal-conflict model. So even your alternate abandoned his project, and went to work to spread the new animal lives about the globe and to force even more adaptations within their being. Thus, the modern mammals and birds became the ruling classes of the animals upon the Earth, and the marsupial descendants of the alternate's experiment were left to develop as they could in the new conditions. Some of them did evolve significantly once the internal pressure of the involutory force was removed, but none ever came fully up to the standards of the mammals.

“All of these events took place during what man now calls the Tertiary period of evolution on Earth. Within that period, the time of experiment ended about twenty-five thousands of millennia ago. By the beginning of what is now called the Miocene epoch, the adapted animal forms had been spread all about the Earth, and had taken root and begun to adapt even more on their own, filling every available niche in the ecological pattern.

“This time-scale seems vast from the standpoint of an incarnate intelligence, I know. But from the point of view of the Adepts of Will, it was more brief than the later period in which human-like beings had appeared. On the levels on which they were working, time as man now knows it did not exist, and duration, the rate at which events are experienced, could be varied widely by the will. So it did not seem all that long from their viewpoint.

“It was only after the appearance of man-like or ape-like beings that the work again began in earnest. These being represented the ultimate in adaptability and nervous-system development of all those animals that had been forced to evolve. And they had already begun to use tools on their own, to change their environment, when it was discovered that their nervous systems had developed enough to incarnate a human-type soul.

“There were several species that showed potential for full awareness and intelligence, and it was decided that all of them would be tested and set against each other to see which would come out best. This testing began about seven million or eight million years ago, with the appearance of the first true hominid species, which were small ape-like beings. It continued in irregular spurts up to the present time, as one species after another showed itself to be of less than human potential and was dropped from the schedule. Usually these beings were rapidly killed off by the competing species who were still within the testing cycle.

“About a million, a thousand thousand years ago, the last three of these species had been selected and set against each other in competition for living space and food. Eventually one of them won out, and became the only truly human species of Earth. But this species again fragmented as small populations became isolated from the main group and began to evolve even more on their own in the less fruitful areas of the world that circumstances forced them to. With the increased adaptations that their extreme living conditions gave them, they eventually migrated into the areas controlled by the main group, and either supplanted that group or mixed with it, either way leaving their own genes in charge and causing the weaker genes of the losers to disappear from the race. This occurred several times more during the intervening millennia, and each time the replacing race was stronger and more adaptable than its predecessor. Eventually we came to a point where all of the animal-humans were fully capable of holding all of a human soul. Though at that point the consciousness aspect of the humans could still not be fully expressed. The lives of men, the connection between the heart center of the body and the life aspect of the soul that enlivens the body, had been in place since the first appearance of the hominids. Now the consciousness aspect, which was present but rudimentary in the races, had to become fully developed.

“Now at this time on earth, the human souls who lived within her sphere were gathered into a community on the astral plane. There was a civilization there that compared favorably with most of the present-day human societies in manifestation, as far as human thought and behavior went. Since, on the astral, there was no inherent need for competition, this society was relatively peaceful and given to simple

human artistic pursuits, along with the normal interactions between souls that make up the substance of most lives. There was no pain that was not self-created, and no horrors of any sort. This would not have been the case if the earth had been open to the stars in that time. If that had been the situation, then conflict would have been more prevalent, as one or another group sensed the force of one or another cosmic being and attempted to put its energy into practice in their lives. But the isolation of the Earth made for relative stability and coherence in the group of human souls. This was the civilization that is remembered today in the legends of Atlantis, and Mu, and of other “lost” civilizations.

“The manner in which the consciousness of human souls was forced to come down into the bodies completely has been covered in the visions of the Airy Lesser Angle of the Earth Tablet, and we need not go into it again here. But we should remind you for purposes of reference that it was you yourself who was the cause of the fall into matter, and thus it is you who was the proximate cause of the legends of Lucifer, the angel who fell and carried the legions of angels with him. This same event was the cause of the legend of the snake in the garden of Eden, who tempted the more receptive (and therefore more “female”) human souls to become attracted to matter, and to leave the light of the sun for the darkness of Earth.

“Now in the foregoing years, before the fall, you had spent several different “incarnations” on the astral plane, trying to convince the souls there to go into matter willingly. But most would not hear you, and so you devised a plan, with the other adepts of the Will, to cause the fall to take place involuntarily. This was the event that was described as the act of the child who studied crystals, in the account of your past lives in the Kerubic visions.

“I said that I would not say much on this, so I had better stop now. But there is more to be seen in this area before you go on to the next senior, Liiansa, so you should again invoke me before that time. I will come to your call, and we will see what remains to be seen.”

4/15/86

I called upon Alhctga again, and she appeared. This time she was not pregnant, but all other aspects of her appearance were the same. I did the 5=6 signs, and the signs of LVX and of Set. She responded with the sign of Set, and then transformed her body into the various crosses and symbols of LVX. Then she reformed as a woman and saluted me with the fire sign.

“Hail, o mage of Will, hail to you, and homage to you! For in the dark of night you have brought the light again to the Earth, and the Earth rises up in response.

“Now during the previous day, we had difficulty speaking together, and there seemed to be some inhibition working to make the communication weak. This is in part due to the fact that you are operating under a transit of Saturn, but more to the fact that we are here dealing with energies far beyond what might normally be encountered in an invocation of these squares of the Tablet.

“To continue with our story of yesterday, we were about to tell of the way in which you caused the souls of men to become incarnate consciously in bodies for the first time.

“In that time of which we speak, man was living in consciousness primarily on the astral levels. Those few parts of his consciousness that had been fused with the physical body were concerned with the operation and functioning of that body in the world, its maintenance and basic survival, and so seemed dark to the larger part of awareness that remained upon the astral levels.

“It has long been known that the lower levels of the astral reflect the heaviness and inertia of the lower earth, and the darkness and seeming evil there acts as a barrier between the incarnate existence and the astral. This barrier today acts mainly to keep men from becoming fully aware of their astral life, which they continue in their dreams but which they do not remember in the waking incarnate state.

“In those earlier times, the barrier's effect was mainly in the opposite direction, keeping the astral self from remembering those parts of its being that existed upon the manifest plane of Malkuth. This barrier was the main difficulty to be overcome in forcing the fall of man into matter.

“You will recall from the visions of the fiery lesser angle of the Earth Tablet that the energies of matter have a mode of rotation opposite to that natural to the higher planes. The friction between these counter-rotating planes was what created the darkness on the lower astral, and the barrier between them.

“The entire purpose of the work of the Earth, her plan for the removal of the involutionary force from the solar system, took on a rapid increase in activity at this point. Where the previous thousands of millennia had been given over to the refinement of bodies through the external-threat model of evolution, now the main rite of the work must come into being. The involutionary force had to be placed into the consciousness of man, so that by his will and his awareness, and his striving to return to the spirit, it might be overcome and eliminated while at the same time giving a tremendous boost to the development of consciousness in the cosmos. Where before the force only acted upon the bodies from the outside, now it must be incorporated into the feelings and minds of men, so that the conflict might be resolved forever.

“To do this, and also to get the greater part of the awareness of each soul down to the level of Malkuth, you took the involutionary energies and formed them into a vortex, a whirlpool, on the higher levels of the material plane. Since the involutionary force also has a rotation opposite to that of the evolutionary aspect in matter, its rotation was identical with that of the astral levels. The only thing separating it from the astral before this time was the intervening evolutionary aspect, and the effect of Saturn upon this low plane by reflection from his normal place beyond the Tree of Life.

“So you gathered this whirlpool around yourself on the physical plane (the etheric levels of that plane). Then by your concentration upon the relation between the astral and the physical, from a viewpoint on the lower astral, you caused the

effect of that vortex to be drawn upwards through the barrier that separates the astral from the physical. You opened the gate into hell for the innocent lives of the early men. That this was done at the bidding of the planet herself was not known to them, and so they perceived your action as evil after the desired effect had been fully achieved.

“Having opened the gate, you yourself were the first to pass through it, leaving behind the astral to explore the physical through the senses of the body. Having done so, you returned with reports of what was in that place, seeking to inspire curiosity and a will to see among the humans. Some of these responded, and not all by any means were your fellow adepts of the Will aspect. For even in that time, when humans were merely a form of angel or deva, passive to the action of higher forces, some of them by flukes of nature were prepared for this work and became attracted.

“Each one who passed through the gate and returned to the astral culture brought with him a bit of the involutory force. By contact with the others on that plane, the force was slowly spread throughout the astral assembly of men. They became infected with the force unawares, and its effect on them, the changes it made in their perceptions, were not immediately grasped by them.

“But eventually it became clear to even the most innocent that something unprecedented was happening. Where before the astral community had been relatively stable and unified, now there was growing dissent. Conflicts arose as the perceptions of men were changed by the experience of the involutory Third Ray force. What had once been whole now became divided. Groups of men on the astral came into conflict, and the way in which the society was to be governed became a matter of debate instead of natural activity. Some held for attempting to retain the old state. Some held for going immediately into matter. Others developed opinions that were at odds with any type of perception known to man up to then.

“This growing development of conflict is remembered to this day in the stories of the fall of Atlantis, how the priests of the different gods fought, and in their fighting caused Atlantis to sink beneath the waves. This sinking was not the sinking of a land mass into a physical ocean, as it is usually interpreted, but instead is the sinking of man down through the astral waters to the material world.

“Having tied nearly all the souls of men in existence into that vortex through their infection by the ones who had passed through it, you now did the act which caused men to fall into matter no matter what their will. Focusing yourself on the highest levels of the material world, you caused these souls to be drawn to you through the gate by their connection with its energy. You caused the vortex to descend from the astral and this caused a corresponding descent of man.

“Having brought men into matter, on the side of consciousness, you now closed the door to the astral fully, locking them in until by the force of will they would eventually break out again. With the door closed the vortex was no longer needed, and you caused its energies to be dispersed among the population, each one absorbing his share of the involutory force to the extent he was able despite his desires

in the matter. The rest of the force, that could not immediately be held, was dispersed back into the environment.

“While this event seemed to occur rapidly from a viewpoint on the astral plane, in the realms where time governs it was spread over many years, as the souls had chances to incarnate in the limited number of bodies available. In manifest time, the event began at the end of the tertiary period, and continued on well into the quaternary, or most recent, epoch.

“At the same time, the concentrated involutionary force that was released back into the environment caused a degradation of the living conditions on earth, through a reduction in the amount of heat escaping from the Earth's core. This caused the climate to vary widely, rapidly swinging from hot to glaciated and back again, putting extreme stress for survival onto the now incarnate humans. The needs for survival forced the human souls to make use of that faculty of their being now known among men as the concrete mind, forced them to make use of their higher faculties within the limits of incarnate existence.

“The involutionary force in men's minds caused them to perceive each other as enemies, if they were not already familiar with each other. This time was one of great killing of man by man, and of tribe by tribe. The many skulls from this period found by archaeologist that had damaged skulls are evidence of the severity of the problem. At the same time, man perceived the involutionary force in his environment, in the form of the dangers to himself, and the concrete mind had to be used to devise ways of countering the danger from both man and world. Thus was born the beginnings of civilization, in the gathering of men for the protection of each other against other men and the environment.

“In many ways, the conflicts between men within each group were more intense than the conflicts with external dangers. For the need for survival caused them to refrain from killing each other as easily as they killed strangers, and this restraint let the force build up. It was the effort to devise ways to live with each other despite the tendencies of the involutionary force, as much as it was the effort to devise protection against the outside, that caused the concrete mind to be developed.

“The effort to survive caused thought-forms to appear on the astral and mental levels, which incorporated a will to counter the effects of the involutionary force. These thought forms, slowly built up by the minds of men, acted directly as a balance to the involutionary force, weakening it and destroying it a bit at a time. The will-to-survive proved to be greater than the will-to-death, and slowly man conquered the involutionary force for his mother the Earth.

“By the end of the last great period of glaciation, about ten thousand years ago, the battle had been effectively won. Man had learned to survive in the worst conditions that nature could throw at him, and flourished in all the environments that could be experienced on earth. Now the concrete mind, freed somewhat from the essentials of the battle, began to create new ways of living, different from those of the animals from which he evolved, which so greatly increased his ability to survive that he became in truth the lord of the world that he is today. Truly is man Adonai, the

The Book of the Seniors

Sun in the Earth, the light of the spirit within matter, as the Earth had intended him to be in that long-ago day when the plan of salvation was devised.

“I might mention in passing that the conflicts between men in this day, between nations and individuals, are merely the hangovers from this period. The involutionary force is gone, save for those rare cases when man invokes it deliberately. The evils that men do are the result of his racial memories of that time, brought forward into this new age.

“It might seem as if man is more violent than ever in this day, but this is not the case. The per capita number of deaths by homicide in this day is much less than even a thousand years ago. And when it is compared with those early days, there is no comparison at all. The existence of such great weapons as man can now bring against man is causing him to become consciously aware, as a race, that what aided him in his early survival has now passed its day, and must consciously be removed from his behavior. The men of those early days, had they had atomic weapons, would not have hesitated to use them at the first offense. Man in this day shows his superior state by the fact that, once he realized the terror he produced, he restrained himself from its actual use. I have confidence, as do my fellow Seniors, that man will be able to survive the existence of his own tools, and will remove them from the world in short order, as circumstances change and they become unneeded even as deterrents.

“Truly do I speak, and all men should listen to these words: Nowhere, nowhere in the cosmos (save in your own case, o unique one who writes this) has consciousness come through such tribulations as man on Earth has suffered. And nowhere has the conquest of mind been as great as it has here. Truly has man shown himself to be the child of the gods, the conquering child who sweeps all before him. All, even the least of men, have already passed onto the road of the Gods, and all, even the least, shall tread its path in the endless going into wonder. Those who say differently, that man must subordinate himself to the will of the gods, and become as the beasts of the field in his submission, speak from ignorance, and the blindness that the closure of the Earth has kept upon him.

“Open your eyes, O Men! Open them, and see that even now, upon the Earth and in the body, you are gods. Nothing now determines your path but your own desires and will. Nothing now stops you in your going save only that resistance of matter that all the gods must fight against. Fight ye with a good will, and conquer! Let the light come into the Earth again through your minds, and ye shall bring that light to the universe at large, and the beings who inhabit that universe shall wonder at you, and be abased as you continue to do what they can not, and bring down the light beyond the Tree into matter.

“Other places are there in this universe, very many, where consciousness does exist in the body, and mind act upon matter. But in those places, the course of evolution was of a gentler nature than here, and the minds of the souls that were like men before the fall were placed into their bodies directly, by the gentle hand of their gods. None of them, none, have the strength of being that the least of men shows.

Alhctga, Senior of Venus

None of them, none, will survive the withdrawal of their enlivening god from matter, save those on whom man acts in the future years beyond the opening of the gates to the stars. Those on whom man acts will partake of his nature, and thus will his strength infect mind in the cosmos, as the involutory force infected him in that long-ago fall into matter. Thus will light spread ever more abundantly through the cosmos, and the gods shall rise up out of matter to create endless new universes for the play of evolution and wonder.

“Now, o scribe who is a mage who is a god, we have done with the presentation of Alhctga, who is myself. We have taken man from his fall to his rising, and now the course of evolution is inevitably upwards to the stars. With man's final conquest of nature, a new phase opens in his history, which is the phase of the evolution of the mind through the conflict of the gods who are men. The new phase shall be described in part by the next of the Seniors in order, Liiansa, whom you should next invoke. I am proud to have been the instrument of the revealing of the knowledge before men, and I salute you, the first of the adepts of Will within the Earth, and I salute all those who have risen by your acts, the races of man. Let it ever be thus, that man strives for the light, and leaves behind the darkness, destroying it by his will.

“I have done.”

LIANSAN, SENIOR OF SATURN

4/18/86

I recited the calls and invoked the powers of the tablet of Earth, ending with the Senior Liansa.

Liansa appeared before me in vision in the form of a man, rather old with graying black hair. He wore a black and red robe, with a lining of dark violet. His feet were shod in what appeared to be sandals made of some dark, heavy metal. In his left hand, he held a book, open to a page showing a black tower with a guardian before its gate. As I watched, he turned the page, and showed another picture, of the planet Saturn, with the enochian letter equivalent to "A" under it.⁷

I did the 5=6 signs, and the sign of Set. Liansa answered with the LVX signs, and also the sign of Set, followed by the sign of fire, which he indicated was a salute to myself. I returned the sign.

I asked him to speak, but he did not. Instead he turned to his left, and pointed with his left hand to a point to my right. I turned, and there I again saw the image of the planet Saturn. But here it seemed in some way emphasized that the rings of Saturn actually represented a hole between levels of existence, and the body of the planet sat in the hole and guarded it. On closer examination, I saw that there were forces of some sort coming down from above, and passing between the ring and the body of the planet. Below the planet, these forces came out again, but in a different form. I could see that they now had an ordering to them of a different type than when they entered. It was as if an inchoate mass of particles had been bound together into a sort of crystalline web, which the planet spun out behind it as it moved.⁸

I turned back to Liansa, and he said: "Welcome again, o mage of will. Now that we have covered the nature of my being by these symbols I have shown, let us continue with the story that we have been telling, of the past of the earth and mankind.

"When you last left off, we were at the point where the involutory force had been completely conquered by the desire of men, acting in the body and upon the earth. The time is just after the last of the great ages of ice, about ten to twelve thousand years ago, depending on the part of the world we are considering.

"This is the time which is felt, in the backs of the minds of men of the present day, to have been the "Golden Age" of man, that wonderful past that everyone thinks of but no one can identify. The "good old days", as it were.

"Indeed, in many ways it was a golden age, though from the standpoint of our modern environment it was a rather harsh time physically. The reason that it was golden, from man's point of view, is that in that time, the true opponent of man, the involutory force, no longer had a great effect on him, and at the same time, pop-

7. The tower in this case is the tower of the elements, Malkuth, and the guardian before it is Saturn in his capacity as guard of the gate to the worlds below Malkuth. Caer Benoit, the "four-sided castle" of the Grail myths, is a congruent symbol. The enochian letter Un, equivalent to the English "A", is attributed to Taurus, kerub of Earth, in the G.D. system of symbolism. Hence the second page indicates Saturn of Earth, the character of Liansa.

8. Saturn is again shown in Malkuth, as the crystallizer, or cause of outward expression, of subjective concepts.

ulation was so low, and so spread out over the surface of the earth, that competition between man and man over resources had not yet begun. Man took what he willed from the earth, without opposition.

“Now in that time, the culture was much more of a cooperative than a competitive venture. Man did not have to compete with man, but he could gain great advantage in life by combining his individual skills with those of other men, to make life a little easier for all. Thus the groups of men were cohesive and cooperative, rather than competitive.”⁹

“Since the pressure of forced evolution was no longer on man, and his mind was at that time not distorted by the teachings and acts of later days, the signs of the spirit were given openly to man, without concealment or distortion. For the first time on earth, and for the last time for a very long time, knowledge of the relationship between yourself, acting as Set, and the Earth was fully known. The religious symbolism of the day emphasized this union of yourself and the earth and expressed it in the ways most relevant to man of that time.

“The basis for their “religion” was the light in the earth. Man was that light, and you as the Son of the Stars were the symbol of that light in the minds of the seers. The earth itself was symbolized by the cave, the womb in the ground, within which man sheltered, and had his civilization. The earth's womb, as the caves were considered, was always of the same temperature, no matter the forces outside, and so it was the best of places to live. The earth gave these places without demanding anything in return, and so man saw her as the great provider, out of whom came all good things. Not only their shelter, but their tools of stone and their nourishment came from her, and so she was worshiped as the all-mother.

“The religions of that time were truly magickal in character, and were concerned more with getting things from the earth to make life easier than they were with the worship of some god or another. Man felt that the world would give him anything, if he planted the seed of his need deep within her womb.

“So the priest-leaders of that time, who were magickians and also were hunters and leaders in the mundane sense, would travel as far into the earth as they could, deep into the lowest passages of her caves, and there they would plant the seed of the need, in the form of pictures painted on the walls of her womb, and energized by the desire of the heart. By doing so, they believed that they could cause the earth to produce exactly those things they desired. And so it often was, for confidence in action is the key to magick, and their belief in the efficacy of their actions was absolute.

“The artistry of these paintings is not much appreciated in these later days, for man now sees these pictures in the light of his bright lamps, and not as they were

9. The May, 1986, issue of Scientific American (distributed about two weeks after this section was completed), contains an article about this period of time which substantiates the claims made here. The article also clarifies that man at that time had developed a complete, workable system of life that allowed him to live in relative comfort and safety throughout the year. The technology of the period was highly developed for the materials they had to work with, and the society, while completely egalitarian, was thoroughly effective in achieving these goals. The article also supports the statement made later in this section that hierarchical systems of status did not appear until two to three thousand years later.

intended to be seen. In the light of the dim torches by which they were created, these pictures seemed to move, to take on the life of the thing they represented, so that in the eyes of the magician-priests, they were identical to their physical counterpart.

“In the more southerly climes, where the caves were not so common, there developed a similar worship, but using the symbolism of the seed in the ground, which sprang to life to provide man with food. Thus were the beginnings of agriculture brought into the world, as an adjunct to the worship of the goddess, and of her son.

“Now the name Set is not the name by which you were known to these men and women, but the symbolism they used is substantially the same, within its limits, as the symbolism we are trying to re-introduce to the world today in an effective form. The symbolism of the mother and the son was nearly universal in that time, and appeared in cultures that had never met each other directly. All of the symbolism came directly from the sensing of the mages of the story which we tell now, to the extent that it had been accomplished in that day.

“So this was the golden age, when man was at peace with himself, and with the earth. It was a period of necessary rest for the souls of men, after the terrible trials of the previous thousands of millennia. Conflict existed primarily on a personal level, and not at all on the social level. That is, group did not normally fight against group, but cooperated in the tasks of living.

“But this situation was not to last, as we all know all too well today. And, as in the previous phase of the cycle, you and the Knights of Earth were primarily responsible for its ending, and the initiation of the next phase of the Earth's plan for man.

“The golden age was intended also as a sign for the future, so that men might have in their astral memories the sense that there was a time at which men did not fight men. In the earlier phase of the work, the natural desire of the souls of men to return to the spirit from whence they came acted as the impetus for the work of eliminating the involutionary force. Now, in the present day, a new goal had to be created. For now the Knights were to plunge man into the state of conflict with man that has continued to this current day, and is still in process of overcoming.

“The reason for this conflict was not to destroy man, or to cause suffering for its own sake, but to force man to come to terms with man, to understand himself and others through the ability to sympathize and feel another's pain. Man at that time, while in tune with nature, was still not completely master of himself, as is still the case today with a small portion of the population. In order to get man to come to this understanding, he had to experience its opposite. That is, the conflict, the pains of civilization, would act to cause man to evolve himself further than nature could force him, so that he gained full control of his incarnate being. The unification of that being, through the elimination of both internal and external conflict, would cause man to eventually express not only the third-ray influence of Active Intelligence, but also the second-ray influence of Love-Wisdom, acting as the cause and goal of right human relations. Man had to learn to live with man in ways that would be beneficial to all, despite the pressure to conquer and eliminate opponents.”

(At this point, I felt that I was having some difficulty getting the information clearly, and asked Liiansa if there was anything that might help. He indicated that it would help to use the word of spirit I had been given, with the first key. But since I was ill with some infection at the moment, he suggested I stop here and continue another time, so as to not over-stress my body.)

(Later that evening, I decided that the difficulty was due to my perceptions not being properly aligned with the force invoked. To try to correct the problem, I did an invocation of Nuit using my self-developed version of the VIIIth degree OTO method. Her relation to the idea of alignment is through the Tarot card now known as The Star, which shows at its top a star surrounded by seven smaller stars in a partial circle. I associate the center star with Polaris, and the seven stars with the stars of Draco, which were related to her in early times. Since the position of Polaris is an expression of the Earth's center of rotation, it represents the alignment of the manifest and unmanifest parts of existence, the mundane and the "heavenly". It is also interesting to note that in Achad's Tree of Life, the sum of the paths of the Supernal Triangle, which has this path as its base, is 510, the numeration of ThNIN, Draco.

(The immediate effect of the invocation was to relieve me of the stress my illness had put on me, and to allow me a good night's sleep for the first time in several nights. Her answer to my request for the missing key to perceiving this story properly was given to me in the dreams I had that night, which will be described below.)

4/19/86, 11:23 AM

I invoked Liiansa using the usual methods. He appeared to me in vision in the same form as the previous day's, but lacking the book he had held at that time. Instead, his left hand now held a phoenix wand, and his right hand an ankh. His skin was an indigo color today.

I saluted him with the signs of Set and of LVX, and he answered with those signs. Testing him with the pentagram and the Hexagram of Saturn caused him to formulate more clearly. He came forward, and called on me to take the wand and ankh from him. I did so, and asked what the purpose of these gifts was.

He replied, "Now that you have found how to use the invocatory word of the spirit in its proper fashion, you are entitled to use these tools, which are the expression of the spirit of life, and of its return to incarnation in new forms. Both of these are part of the symbolism of yourself who is Set. He is the master of life, and the master of death. His power of going takes men to the stars, where Horus can only touch them through the sun.

"Take these tools, and make use of them in your rituals of the spirit, and their power will be multiplied greatly, to your benefit and the benefit of the earth whom you seek to raise.

"Now, let us go on with the story as we have begun it. Yesterday, we were about to explain the manner in which intra-human conflict on a large scale was introduced to the world, in order that men might learn of the power of Love-wisdom through the expression of its negative side, which is repulsion-conflict. By exhausting the

possibilities of the latter in manifest experience, they eventually were and are being forced, individually and as a group, to come to the realization that the former is the higher expression.

“To do this was something you could not do yourself, as you knew in that time. For your own nature, being of the Will aspect, was too far from the natures of men to affect them directly. So, in this time, you decided to turn over the main focus of the incarnate work, the work in the world, to your alternate. Being of the Love aspect, in its Will sub-aspect, his expression was closer to theirs, and so he was better able to introduce that idea which would eventually result in the conflict you desired.

“How was this to be done? The symbols of the mother and the self-begotten son were already strong in the earth at the time we speak of, and had no further need of encouragement to continue their flow of force into the world. Had this flow been allowed to continue unobstructed, then man would not have advanced much further than he had at that time, living a natural life in a natural world. The association of the mother is too strong to be overcome without an equally strong opposing viewpoint being available. The stars of night now had to be masked by the brilliance of the Sun, who is closer to man but less holy than her. But the sun is the soul, and the soul is what you sought to bring men to, through the harmonizing of conflict.

“This is where your alternate came into the picture, as the opponent of the forces of night, and the proponent of the power of Sol. Sol is of the second ray of Love-wisdom, as has been said before, and your alternate in his essential nature embodied that force, as has also been said.

“Even in those very early times, before the beginnings of civilization, it was known how men and women united to produce children. But the power of the father was seen to be merely a stimulus to a process that was inherent in the female, the manifest aspect of the Mother. Now the father, the male, had to take on his own power, and understand his own place as the key to power. In effect, the martial side of life, which no longer could fully express itself in the fight against nature, had now to be channeled into higher levels, where it could affect the course of men's minds and actions towards each other on a large scale.

“And so the first revisionists of the spirit were born onto earth, and developed, over a period of millennia, a current opposing the current of the mother. This was the solar current, with its symbolism of the sun who dies and is reborn, without the aid of the mother. In later days, this expressed itself in the temples of Horus, Osiris, and of the Jews and Christians. It was the system of hierarchical dominance, as opposed to the natural association and merger of abilities which was the hallmark of the mother's symbolism. Man fought man, following the ways he observed among the animals, fighting each other to establish which should rule, which should be the one to breed, and therefore to carry on his life into the future.

“This was also the earliest time in which the power of Saturn was raised up to Binah, figuratively speaking, and the power of the Mother cast down into Malkuth.

The new philosophy denied her her place in the heavens, and put up the father, in the form of the authoritarian figure, the so-called “Alpha male”, in her place.

“The religions of the mother were not cast down permanently in that time. For many ages, lasting into the dynastic times of Egypt, she again came to power for periods. But these periods grew shorter and shorter as the millennia progressed, and the periods of dominance by the father-gods became longer, until in these later days, in the late Hebrew, the Greek (to a lesser extent), and the Roman and christian religions, she has been effectively wiped out as a manifest power, even though her adherents and servants continue to do her work on earth. In fact, their work has been helped by her loss of mundane power, for her practitioners could develop their work in secrecy, and with their full attention, instead of being distracted by the needs of running a civilization. So her inner power, and that of her child Set, increased substantially at the same time that their outer power decayed.

“You will recall, from an earlier invocation, your memories and feelings of a time in the early period of the Egyptian civilization when you and your opponent were both incarnate at the same place and same time. The place was a temple of the mother and son in the southern part of that country. At the time, you were incarnate as a woman, a senior priestess of that particular cult. One of the methods by which the cult tried to express the idea of the mother and son was in the way of having women have children fathered by their own children, or the children of other priestesses. In this way, they hoped to produce a son eventually who fully expressed the power of the mother, being different from her only in the one gene that caused him to be male.¹⁰ (They of course did not think of it in terms of genes, but came to a similar conclusion by direct observation of breeding experiments with animals.)

“In that particular life, the adversary in this contest, your appointed alternate for the eventual awakening of the Earth spirit, was incarnate in one of the bodies of these male children. But unlike most who resulted from such processes, and were conditioned by the teachings of the temple to accept their place in things (which was a good one for the times), he, from the first moments of his conscious selfhood, desired to be free of the influence of women. He disliked being subordinate to any being, and he perceived the women, being physically weaker than the males he saw in the temple and outside it, as being naturally subordinate to himself. Like the male lion with whom he later has identified himself, his will was purely to dominance of self over others, the innate expression of his perceived superiority to men.

“As he grew in that time, and came to his physical maturity, he was trained in the methods of the temple, in the ritual of uniting male and female for the purposes of the gods and the priestesses. His power was so great that he took the training much more rapidly than most, and by the time he was fifteen, he had accomplished the full training and become an initiate of the temple.

“But, despite his power and authority in the temple, due to his magickal skills, he found his new position even more aggravating. He saw his own abilities as superior

10. The defective children of either sex were killed humanely (that is, quickly and without warning) as soon as their defects were detected. The priestesses felt that they were merely following the Mother's way in this, and taught such.

to those of all the other temple-workers, and believed himself to be the natural leader of the temple. But above him stood yourself, his actual physical mother, as well as the head of that temple. No matter how great his accomplishments, it seemed he could never get away from your perceived dominance. This created great hate, a great force of the rejective aspect of love-wisdom within him. And he determined to overcome you by any means possible of accomplishment.

“Within the temple, as we have said, there were many young men. These were educated, and if found unsuitable for the priesthood were given honorable positions managing the affairs and properties of the temple. Many of these latter were also resentful, for reasons like or unlike those of your opponent. These he sounded out, with a proposition that they take over the temple themselves, and raise themselves up as its leaders. He found many who would go along with him for one reason or another. He also sounded out those outside the structure of the temple, the hunter and worker classes, and got many of the strongest of these to agree to his plan. Thus he obtained the forces needed to conquer the temple.

“In the night he opened the gates of the temple, and called in his assistants and conspirators. Together, they attempted to slay all those who came within their reach, so that none would survive to tell of their evil. But many heard the noise of their attack, and managed to escape through other entrances. (Tactics was not one of your opponent's strong points, in that time or later times.) And so many lived to preserve the knowledge and warn other temples of the impending change. Many of those who escaped hid within the temples of other gods and goddesses, in other places, and as small groups within these temples preserved the symbology of the mother and son.

“Now, on the morning, this one called forth the peoples of the area, and declared from the steps of the temple that a new aeon had arisen, in which the elder gods were thrown down, to make place for the new, chief of whom was to be the Child of Victory, the conquering child, who he claimed to embody in himself. Thus was born the first of the “official” Sun-gods, he who later became Horus.

“You yourself were captured in that raid, by the express will of your son and adversary. And you became the first of the “official” victims of Horus, as your son sacrificed you to his new image of the gods.

“Note the irony of this, o scribe! In this present day, in that last life of his and of yours, did he again attempt to declare the aeon of Horus, and to absorb the intent of your will in this time into himself, thus becoming the one to reopen the earth to the stars. He even dared to adopt your own symbolism in his effort! The parallels between that time and this are exact, save that since you were in a male body this last time, he must needs take out his hate of women upon others in your stead. Nevertheless, his attack upon your being in that last life, through the magickal link created by your oaths to him and his organization, are a correspondence to his slaying of you in that earlier time. The gods laugh at him, as he stands before them now, exposed for the fool that he is in his failure.

“Yet much of good was accomplished by him, nevertheless. He never knew of your secret intent that events happen in just that fashion, in that day as in this. For Set, who is Achad, the Isolated One, who is yourself, does keep his secrets well (even from himself, if need be), hidden on the levels beyond the reach of those that he has manipulated for the development of man, and the raising of the Earth.

“Thus in that time did he serve your will by bringing the forces of conflict between groups to a new pitch of intensity, inaugurating the forceful development of the emotional and mental natures of man. And thus in this present time, through his will to succeed, and to be the opener of the stars for man, did he have to revive the very doctrines that in earlier days he did suppress. Thus again is he the tool of his own downfall, his actions against your body in that last life providing the shock that, when its recoil returned to him, knocked his own intent askew, and left him sitting on the sidelines in this most important of times. All as you intended. For never could he see that in death was your victory, your opportunity to come again in another form and another place, to continue the fight for the freedom of men from the subjection of the gods.

“Thus also in those old days, when the priests of the mother and son who had hidden among the other gods' priests summoned up again in secret the force of your will, to continue the work. The many tales of Set returning in the god-forms related to other gods, only to be slain again by Horus, or by his successor Osiris, reflect the fact that no matter how hard he tried, in his many incarnations, he just could not destroy the intent of your work, nor could he make it his own. He attempted to control the world, through his many god-forms in many nations, but the more order he brought about, the more disorder resulted. Thus did Set ever conquer Horus. Thus did the sacrificial victim become the god, while the slayer was bound away by his own acts. We laugh at him, laugh and gloat, at the great one fallen so low! Yet how could he expect otherwise, with his will bound to an ill purpose from the beginning?”

(All during this speech the astral area in which we stood echoed with huge laughter, and a feeling of immense humor, coming from some point not seen. As if the universe itself were greatly amused.)

“Now we are done with the tale that I am to tell, and the rest of the story of Set and Horus, and their works in the Earth, will be told by the last two of the Seniors, Ahmlicv and Laidrom, and by the Sun-King of the Tablet, Iczhihal.

“But it might be good to explain a few things from your own life's recent events, to show how even in this time has Horus-Osiris attempted in his feeble way to interfere with your work.

“First, I would like to cover the incidents that took place in Indianapolis. First, tell the tale of the policemen, then that of the authority who employed you. Then I will explain for those who read how these fit with the story we are telling. Finally we will look at the dreams of last night, which are rather clever answers by the goddess to your questions, and also show a new bit of the symbolism of Cancer, as it relates to the work.”

The Book of the Seniors

(I was still a bit ill this day, and tired rapidly, so I delayed writing the description, and getting the rest of the presentation until the next day, 4/20/86.)

After the completion of the invocations described in *Touring the Earth Tablet*, I was in Indianapolis on an assignment from my then-employer, the Federal government, to teach some new employees my job. I continued to work with the current instigated by the invocations during that time. Set first appeared openly as an operator in the work while I was there.

The incident with the policemen occurred the first day after Set announced himself. In the evening, I was in my room at the Hyatt Regency Hotel, room 1216. It was around 11:00 pm, and I had settled down to do an invocation of Set using my version of the VIIIth degree methods. I had also smoked some pot a while earlier for relaxation, and still had my supply out, but disguised from view by being in a plastic shopping bag from a local department store.

I had been doing the invocation for some few minutes, and had a strong feeling of being filled with the force of the god, when a loud pounding came from the door. I went to the door and opened it a crack to see who was there. What I saw was two policemen, one with his hand on his gun and his thumb on the hammer, and several persons behind him in medical green clothes. All of them were looking at me as if I were a particularly obnoxious laboratory specimen they were about to dissect.

The cop with his hand on his gun told me to open the door and let him in so that he could ask me some questions. I asked him to explain his reasons, but he refused to give them. I then told him to wait while I put on some pants. But as I moved to close the door, he pushed against it and forced his way into the room, followed by all the others with him.

Since there appeared to be nothing I could do about his forced entry, I got some pants on, and turned to question him about his purpose. He did not answer, but started grilling me about what I had been doing that evening, whether I had made any phone calls, who I had seen, where I was from, and what I was doing in Indy. I answered every question responsively, as seemed prudent, and repeated my demand for information after every question. Meanwhile, his partner looked around the room, not touching anything, but obviously looking for something actionable. The second time I protested this, he came back and stood by his partner.

After about ten minutes of this grilling, the cops turned and left, followed by the others, still with no explanation given. The next day, I called the hotel management to protest this treatment, and the lack of hotel security personnel on hand to protect my own interests. After checking with the police, the manager (who had never been informed of this impromptu raid) called back to explain that the cops had had an anonymous call saying that someone was going to suicide by jumping off the twelfth floor balcony of the hotel. Since I was the only person living on the twelfth floor that day, the cops had made a beeline for my room, on the idea that wrong action was better than no action.

The second incident(s) involved my relationship with my employer. One day in class, I had been asked some questions about matters of import to new employees,

such as the promotion possibilities, chances for raises, working environment, benefits, etc. I had answered these questions truthfully, saying that promotions were becoming rare, salaries would continue to stay far behind the national average, benefits were being rapidly eroded, and that the pensions system was clearly headed for dissolution.

Naturally, this caused more than a little upset among the local management. They wanted me to tell the trainees that everything was all right with the government, and that they could expect all sorts of great and wonderful things to come out of their work. I told them that if they wanted to have fairy tales told, they would have to do it themselves, and that I would in the future refer any such questions to them.

About a week later, I was talking with the local manager, who appeared to be a nice person as an individual, afterhours at a local restaurant-lounge. She had asked me what my true feeling about the agency were, and after getting her assurance that my answers would be held in strictest confidence, I told her exactly what I thought the problems with the agency were, and that the problems came from the very top management.

The next day, I found that not only had she not kept the confidence as she had sworn, but had immediately called the regional commissioner and blabbed the whole thing. The commissioner came down, along with one of her assistants, and I found myself in a good approximation of a star-chamber proceeding. No, more like the Inquisition, at least in atmosphere.

They had gathered, I was told, to decide whether a person of my clearly heretical views, who had dared to actually criticize the gods of the agency, had any business teaching the minds of innocent young trainees. They first discussed my comments to the class about benefits, trying to convince me that I was wrong. When I countered by quoting substantial evidence in favor of my statements, in the form of the documented actions of their own superiors, and of the current administration, they gave up on that tack.

Then they went to work on the comments I had made to the manager. These, they said, were the worst form of heresy, and the only way I could get back into their good graces would be by recanting the whole thing in writing, and apologizing in person to those I had mentioned. The fact that the information was given in strictest confidence, and they only knew about it through the actions of an oath-breaker made no difference to them. If I said it once, I could say it again in the future, with more damaging effect to their reputations, particularly that of the commissioner who headed this panel. I declined to do as they told me to do, and matters rested there for the moment.

Two days later I had the misfortune to contract pneumonia from the usual nasty Indianapolis winter. I called in sick, and mailed them a statement from the doctor I had seen saying that I would be too ill to work or travel for at least ten days. On Friday of that week, two minutes before the close of business, I got a call from the lowest-ranked person on the office's management team, telling me that they were

cutting off my per diem as of noon the next day, and I was being reassigned to my home office.

I protested that I was too ill to travel, and asked that it be extended. In fact, I was running a 103 degree fever at that moment. I was told that everyone authorized to make that decision would be out of town until after the end of the next week. I was also told that they had already called the hotel and told them I was moving out.

So I ended up driving 500 miles, in half-hour segments so I could rest, half delirious with fever, in the middle of winter. Being forced to do this added at least two weeks to the time it took to recover from this illness. It also lead to my rapid resignation from that organization. I'm too stinking proud to work for scum like that.

Liiansa's comment: "The meaning of these two events in the light of our tale here should be fairly clear. It was a last-ditch effort by the forces of Horus-Osiris to get you off the path of your destiny. Government is of course heavily Osirian, since Osiris was a black god, and black is the color of Saturn, and of the astrological Capricorn, which rules government.

"Two attempts were made. These reflect the usual actions of the Horan-Osirian powers towards individuals, and they expected you to react in the usual way, giving them something they could use to either hang you or put you back firmly under their control.

"The policemen are enforcers of the authority of the government, their powerful arm. So long as police exist, it is possible for the group that controls them to say 'Do what we want or we will kill you'. All government, no matter where in the world you look today, is based solely and deeply on this principle of forced obedience. Not one of them, not one anywhere, is truly responsive to the will of the individuals over whom and in whose name they claim to govern.

"Had the force of the Osirian current had its effect on the anonymous mentally ill person who made the call to the police a little earlier than it did, then it is quite possible that you would have been caught smoking pot, and the amount you held on you at that time would have been sufficient for a long prison sentence.

"But, as is usual, the forces could not act quickly enough. Never is a government really able to control events, no matter how hard it tries or oppresses its people. It always and only reacts to what is forced upon it. The self-styled "rulers" of the lands think they are the top of the heap, but in fact they are whores, dishonest ones at that, incapable of initiating anything truly new into the world. All they can do is take what the world throws at them, and try and twist it to their purpose. But never do they catch up. Always, Set is one step ahead of them, creating new things to disorder their system faster than they can control them. This delay is inherent in the force of Saturn that they have co-opted to their own purpose, though they never realize it. Thus in this case, the force of Set within yourself, making you stand up to the police instead of quaking fearfully as they had hoped and expected, countered the force of the Osirians sent to derail you again.¹¹

"Similarly for your confrontation with your employers. You had already had a full exposure to Set's force, and nothing their little bureaucratic minds could do, filled

as they were with the fear of ruin by their superiors, would have caused you to go back to their way of doing things. Again, it was too little, too late, and so will it always be.

“Now, you took this force of Saturn that had been sent at you, and used it in the way it was intended to be used, in the beginning of time. Saturn truly relates to Malkuth, as the barrier between the Tree of Life and those realms that lie below it, with which none of any spirit will deal. Being Malkuth, he relates also to the crystallization or outward expression of the inward will. And so did you use it, crystallizing your decision to quit their ways and go your own, which had been building for some time.

“It was no accident that the forces came at you just as Set, who is Achad, who is the core of yourself, appeared on the scene. The actions of light, until they are firmly established in the person, always generate an opposition. It is natural that this be so, and also convenient, for it forms a sort of final test of the effectiveness of your work. Had you not actually succeeded in your intent in the Earthworks, then these things would not have appeared. So even the shells unwittingly have acknowledged the appearance of the new master, and again shown themselves to be the inferior.

“Now as to the dreams, I will summarize them to save time. You had invoked Nuit to find out the key to what I was trying to say, the concept that would allow your intuition to understand it whole. The first dream was short, and only one image is of relevance to our discussion here. In it, your mother handed you a key, in the form of a small red obelisk or menhir. You discovered that this key was to a car. But rather than going directly into the keyhole of the ignition, it went into a loop that allowed it to be used as a lever, like a torque wrench, to start the car.

“The mother is obviously a symbol of Nuit, as you have already interpreted it. The key is a form of the pyramid, representing the path of Shin, which connects Kether with Tiphereth in your system. The loop it went into is the yoni, here representing the lower aspect of your being who is the scribe.

“The car is a form of the Tarot card The Chariot, since an automobile is a vehicle which is powered by the elements. That is, it moves by burning (fire) in a vaporous form (air) a liquid (water) derived from the ground (earth). Exactly as the chariot of the card is drawn by sphinxes of the elements. So in all, this image indicated that the key you sought is to be found in the union of spirit-fire with its opposite, in the sign of Cancer.

“Just to drive in the point, you were caused to awake from the dream at exactly 4:18 am. And the invocation was done on 4/18. The significance of the date did not occur to you until you saw the time at which you awoke.

11. Liiansa neglects to mention here that the idea of suicide, the purported cause of the police invasion, is related to Set. Suicide relates to Scorpio, Set's sign, through the scorpion that stings itself to death, and also directly in that Set has frequently made his own murder an intrinsic part of his plans for a given lifetime. Thus the anonymous caller was telling the Osirian authorities that Set was up to something on the twelfth floor of the hotel, in a direct symbolic fashion. He apparently spoke better than he knew, to my present great amusement.

The Book of the Seniors

“Now Cancer is a water sign, and therefore has to do with distribution and dissolution of things in some fashion. In the context of this story we are telling, we will look at it in a slightly different fashion than it is usually interpreted.

“In the normal interpretation, Cheth, Cancer represents the dissolution of the lower self in ecstatic union with the higher spirit. With the lower self gone, the bodies of the person that live below Tiphereth become a shell, like the knight's armor, that is empty except for the spiritual forces, with no real personal self to be seen. This is in accord with the traditional astrological interpretation of this sign except that it is on a higher level.

“The dream was in part an acknowledgment that you are achieving this level of union in your work with Set/Achad. You are almost ready at this point to reverse yourself and acknowledge that you are indeed as we have presented you to be, in the Earth Tablet working. Already, your magickal memory has opened widely, and you have had many glimpses of your other lives, as they relate to your overall work and your work in this time and place. These will continue and improve in clarity and precision as you progress.

“But as I said, the dream was also the answer to your question. Remember that your purpose at the time we have been speaking of was to generate a counter-force to the Sirian force you represent in the earth, so that by conflict men would come to understand the causes of conflict and learn eventually to establish right relations among themselves.

“So look at the symbol of the sign of Cancer. It is made of two lower-case sigmas, one turned upside down and pushed so that its tail is below the body of the other. The uninitiated astrologer often says that this is a picture of the claws of the crab, but this is not the case. The initiate frequently associates it with the symbol of yin-yang, again associating it with the merger of opposites.

“But it is also a glyph of the whirlpool, which is a concentration of water into a distinct form within a larger sea of undifferentiated water. The whirlpool is a shell-full of air within the water, again relating back to the Tarot card.

“Consider how a whirlpool comes into being. It is caused by two currents of opposing vector sliding past each other. The friction of their passage transfers momentum, changing the vector forces along the interface so that they turn and become circular in their movement. Your satellites have photographed any number of these whirlpools where the Gulf stream goes past the main body of the Atlantic along the east coast of your land.

“In this case, you needed to generate such a whirlpool, a vortex (to use the magickal term) in the mental and emotional levels of being, so that the spirit could find a way into those levels. It is fortunate that you had the ideal method of doing so immediately to hand, or your work would have been much more difficult than it was.

“Remember that you yourself are of the First ray of Will, and the sub-ray of Love-wisdom, represented by the term 'love under will'. Your alternate is of the Second ray of Love-wisdom, and the sub-ray of Will, so that he might be termed 'will under

love'. So the vectors of your individual forces, along one dimension, are exactly opposite to each other.

"Your own force, as I have said, was already firmly established in the minds of men at that time, between seven and eight thousand years B.C. In order to generate the conflict you desired, so that man might become conscious of the gods while in the body, you merely had to give your alternate his head, and allow him to attempt to fulfill his own plan within the world. Naturally you did not tell him of your real purpose, but held it concealed on levels he could not yet reach. Remember your origin, and what we have said about your level of achievement at the time you were first called to the Solar system.

"Rather, you put a different face on it, one he would find believable. In a conclave on the inner planes around 7000 B.C., you informed him and his followers that it was your will that they take over the next part of the work, and do it according to their own ways. The reason you gave was that you had realized that your own type of force, the First ray, was too far from the consciousness of men to be effective, and also too dangerous to be allowed into the world in its pure form. You said that it could only cause destruction if introduced at this point. Your opponent, expressing his usual Second-ray faults, believed you implicitly since your words fit with his own evaluation of the situation.

"For two and a half millennia, you allowed them a free hand in creating their works. You effectively withheld yourself from action on any large scale, although you continued to support fully those who followed your way. But you made no effort to expand your power base on earth, and allowed your alternate to create in the minds of men those ideas that would eventually cause a flow of power along his own lines.

"He introduced conflicting ideas along two lines that affected yours directly. First, he emphasized the group over the individual, encouraging the subordination of the soul to the purpose of the group. Second, he introduced the concept of hierarchical status, of relative individual value, to man. That is, he encouraged men to think it natural that one who is stronger than another, either physically or spiritually, should dominate and control the other's actions.¹² Together, these concepts eventually resulted in the form of top-down imposed structuring that is common to all the civilizations on earth today, with only small groups actually attempting to operate on a basis of your own concepts, which are the sanctity of the individual will, and the cooperation of men for mutual benefit without coercion.

"His current was in effect an overlay on yours, and your own current was in line with the memories of the "Golden Age" that all men sense in themselves, so there was never really a chance that he could overturn your own current on any level higher than Tiphereth. Too many individuals would be subconsciously sabotaging his work, even as he did it. This naturally occurs in any situation where imposed restrictions take too much away from the individual. Also, biologically, the human

12. These concepts are definitely Second-ray in nature. Note their importance in the works of Alice Bailey.

body is suited on an instinctive level to working in groups no larger than thirty or forty persons, which was the natural size of human communities for most of the evolution of truly human bodies. Thus in larger groups there is a natural tendency towards splintering and separation which acts automatically against imposed forces. Every government that has ever existed has eventually succumb to their own largeness. The larger the group or organization, the more unconscious sabotage occurs, and the more likely it is that it will come to the end of its existence. The rapidity with which this occurs is inversely proportional to the degree of freedom the group allows its individual members.

“Now in this current time we are attempting to redress the balance, bringing the sanctity of the individual back into the minds of men, as the forces of Aquarius come into appearance on the lower planes. This force is associated with the *voluntary* association of individuals in groups, on the basis of mutual need and interest. Thus it is suited to our purpose, as is the energy of the sign's ruler, Uranus, who represents the principle of individuality, or the destruction of imposed groupings.

“The force going out of manifestation, that of Pisces, is associated of the dissolution of the individual into the group. Through its ruler Neptune it relates to illusion, false prophecy, Maya, inchoate idealism, etc. Thus the popularity of the Big Lie, and of emotional manipulation as tools of governance among the predominantly Piscean governments of the world. Through its other ruler, Jupiter, it relates to the idea of kingship, of order imposed by fiat or decree that is characteristic of such governments, no matter their supposed philosophical base. Note also that Mercury, intelligence and knowledge, is in its detriment in Pisces. Hence the common demands by the hucksters of the Christian churches that man put aside his intelligence and have Neptunian “faith”, and mindless obedience to the Jupiterian rulers of the churches. Contrary to this, Mercury is exalted in Aquarius, and thus will knowledge overcome superstition as the currents of the sign takes over from its predecessor.

“Our work and yours, o beast, is to help man in the transition to life based on knowledge, on *gnosis*, by providing invocations and a system of symbolism suited to the consciousness man will have to adopt to deal with the incoming age. The rituals and invocations will be given as your sight develops to the needed degree of clarity to read your own library on the inner planes directly, instead of through the picture-book representations we keep for the less well developed.

“That is all we have to say about this, except to say that the other dream you had, of a man breaking into your room while you examined a handful of jewels, was merely a reminder. The big man is of course the cop who broke into your room. The jewels in the hand relate to the VIIIth degree working you were doing at the time, with the colored gems representing the chakras you were stimulating.

“Now I am done, and you need not invoke me again, save when you desire my assistance in some matter in the future. Tomorrow or the next day, you should invoke Ahmlicy, who will show you the tasks you put yourself to, while your alternate was working his will within your secret design.

AHMLICV, SENIOR OF MERCURY

4/23/86 4:54 PM

The vision opened upon a region of air, light blue in color. Ahmlicv appeared. His likeness was of a stocky youth, wearing a robe-like garment that appeared to be covered with round, overlapping scales of a silvery blue color. He wore on his head a crown with small wings, on which were engraved the sigil of Mercury, its astrological symbol. His left upper arm was horizontal at the shoulder and cocked forward about forty-five degrees. His left forearm was vertical, with the hand open and the palm facing forwards. His right arm was held down and slightly behind him. I could see the end of a wand of some sort in his right hand. It looked like a caduceus without the entwined snakes.¹³ His skin looked the color of buckeyes or chestnuts, perhaps a little lighter.

My viewpoint revolved around him until I could see that on his back he had small wings like the typical Christian depiction of an angel.

I did the signs of Set and of LVX. He responded with LVX, the Set's sign, then the fire sign, and then the sign where the arms are held down and out from the sides at a 45 degree angle.

He said, "I greet you, o mage of earth and fire. Let it be that we become one, in the telling of this tale of the earth and her masters.

"Now, when you left off with Liiansa, you had come to the point where you had turned over your main work to your adversary, so that his more congenial force could produce in man the sense of conflict between individual and group that has been the source of all the conflicts of mankind since. At the same time, though, you were taking on another aspect, that of Thoth, so that you could produce a tendency to upward motion to add to the cyclic nature of the conflicts generated. That is, you sought to ensure that the conflict would result in upward progress rather than becoming stasified in a circulating current.

"This was to be done by enhancing the knowledge of mankind, and causing his mind to look ever towards the new things possible in life, rather than backwards towards the golden age. If the force of your adversary had been left to itself, it would have caused a regression to those more primitive conditions again after a short period of conquest.

"Now on the first plane of this system, that which is represented by Kether in the Tree of Life, and the highest of the seven planes of the Bailey system, you caused to be formed an image of the god Thoth, as the god of wisdom and knowledge. This expression of your will you then brought down into Chokmah, so that it would reflect your will rather than embodying it. Thus the lunar aspect of Thoth was born, even though this was not the strongest of his aspects. But knowledge had to be represented as complete in itself, not tied to either of the conflicting forces, and so it required both a male and a female aspect in one.

13. Actually, he was standing in the classical pose shown in Roman statues of the god Mercury. But I did not recognize it because I was seeing it from an unusual angle.

“In one sense, Chokmah is male, in that it balances the definitely female character of Binah, but in another sense, it reflects itself into Tiphereth as the son, and is in itself the son on a higher plane, uniting in itself the femaleness of Binah with the initiating impulse of Kether. As the son, it balances male and female, as Thoth balanced the conflict between Set and Horus, so that neither would ever win in their perpetual battle. This legend reflects your intent exactly, as does his role as one of the Lords of the Balance in the Tuat. Knowledge had to be seen as impersonal, not tied to any one condition or philosophy.

“Now, in those old days, you caused to be created through the other Knights the Temples of Thoth in Egypt, and his correspondence was shown in other lands around that same time, give or take a thousand years. Remember, a thing established on the inner planes can only manifest in a particular area of the world when the zeitgeist allows it, so the time differed from place to place.

“Most of this work was not done directly by the Knights, for the Earth already had a full complement of adepts of the fifth ray of Intellect, ready to go into action in this very way. The intellect aspect would have been part of the earth whether or not the events leading to her hiding had taken place, and so she had the appropriate kinds of workers available. The part of the Knights and yourself was to determine the time at which they would start to work with full force within the world, and the form of manifestation that they would take in the human kingdom. Thus your manifestation of the image of Thoth caused the initiation of this cycle.

“Up to this point in history, about four thousand years before the dawn of the Christian era, mankind looked at knowing primarily in terms of the passing on of skills. That is, knowledge of how to do things was considered of primary importance, and other knowing was considered useless by definition and was not kept. There were exceptions to this, as there always are, but on the whole, this was the condition that prevailed.

“Now you had to show that knowing for its own sake also led to things of value. So the introduction of Thoth as a god was intended to turn the zeitgeist in this latter direction. Men were now beginning to develop the abstract mind, and those who incarnated with strong minds had to have some sort of symbol on which to support themselves, so that they would not allow their minds to become subordinate to the conceptions of those less-developed persons who made up the majority of humanity. If Thoth had not been there, then peer pressure would have distracted them from their true purpose into less productive lines.

“Now, the essence of preserved knowledge is in the symbols by which it is preserved. Word-of-mouth transference of knowledge is limited, even in those societies where guilds and work groups had formed to preserve particular sections of knowledge. There is only so much that one man can hold in his mind, and word-of-mouth transference inevitably leads to a situation in which some knowledge is lost with every generation. New things come into being, but old things are lost at the same time.

“Writing, the preservation of words in a concrete form, which can then be read by many men, is a superior way of doing things, as all men would nowadays be willing to admit. Without writing, man could never have developed the kind of society that he has now. If writing were to be suddenly removed from the world, all would immediately collapse back into barbarism.

“So the essence of this new tack was to cause to be developed in the minds of men the idea that symbols could be made for ideas as well as for experiences. Up to that time the symbols available were mainly intended to express in visual form the experiences and perceptions associated with a certain god, or a certain state of mind. Now man had to see that words themselves could be made into symbols, and that these symbols could be understood by all, and not just by those who had had the experience.

“Into the minds of men, then, was forced this idea. And many responded to it in many parts of the world. It did not take any incarnations of masters to produce the effect, although many did incarnate. Men alone and without aid from the masters and Knights were already of a level of achievement that they could do the work on their own, given the original impulse to do so. This latter way was preferable, because then the new idea became directly incorporated into the zeitgeist, where if the masters had tried to introduce it by themselves, it would have been adopted much more slowly. Even as it was, many men considered writing to be a magick on the same order as the powerful rituals of the priests. And so it was, and is, but it is a magick that can be used by any, not just those of talent.

“To be certain, writing was in the beginning mainly the property and secret of the priestly classes. But once introduced, it could not be withheld from man. Like the physical Mercury that is named after the god, it flowed outwards and downwards through the classes, sneaking through every available crack in the priest's security. And once it became known, and the advantages seen in such mundane pursuits as the tallying of stores, then the demand for persons who could write became so strong that the priests could not do other than train many and release them into the world. Thus came into being a new category of man, the scribe, of whom you have in part chosen to be an example yourself in this life.

“The scribes, the masters of letters and numbers, the translators of fact into symbol, have been the mainstay of every civilization that has had them since that time. Through their works, the knowledge of man has grown, not exponentially, but at a rate that is much more than geometric. If we were to chart the amount of accumulated knowledge available to the race since the dawn of consciousness, for most of the race's history the line would barely be above the baseline. But with the introduction of writing, the line suddenly curves upwards. With the invention of paper and ink, and its spread through the world, the line began to approach the vertical. With the introduction of easy methods of reproduction, the line immediately passes through the top of the graph and out of sight.

“In this present time, the number of book-equivalents of information produced yearly has come close to equaling the number of people alive in this time. No one,

not even the most intelligent, can possibly comprehend all the knowledge that is produced in a single year, let alone during a man's whole lifetime. The universe of the knowable has become as effectively infinite as the physical universe from which knowing sprang. Man has created out of himself a new world, one in which he is the true ruler, and none of the lesser orders can equal him. He has indeed become a god by his knowing, and even the least of those who know is guaranteed a place in the universal work of consciousness.

"Strangely, man has not yet realized, on a broad scale, that this is the case. Most still seem to think that they live and move in a world of facts, that can be checked by reference to the world they can see and feel. But this has not been the case for many centuries. It is fair and valid to say that today, in the developed countries, the number of persons who live entirely within the world of factual experience amount to no more than five percent of the population. Even in the least developed countries, where writing is not the property of the masses, less than twenty percent of those alive could be said to be in this category. The rest of them live more and more within the world of mind, of concepts, and the manipulation of concepts takes the greater part of their lives. Without realizing it, man as a whole has raised his consciousness out of the living world, and taken the first three initiations in the process. That is, the initiations corresponding to $0=0$, $1=10$, and $2=9$ in the cabalist systems.

"There is no man alive today who has not taken at least the $0=0$ initiation, and the vast majority have taken the $1=10$ initiation, and now live their lives with their consciousness focused on the astral/emotional level. That they have done so unconsciously and as a part of the great upward movement of the consciousness of the race-being does not in any way lessen their achievement. Mankind is now initiated.

"Thus it becomes necessary in this time that men learn those techniques and viewpoints that will enable them to control their emotions, and to live focused on the intellectual level. The methods to do this have been available for many centuries, and in this present day have more or less become public property. Anyone who has need of such can easily locate the needed materials in any library or bookstore. Most men can figure out the needed techniques without any help at all, by the innate power of their minds. All it takes is the desire to do so, and a little persistence.

"In the coming centuries, even this amount of effort will become unnecessary. As the intellectuals of the race become a larger portion of the population, and true thinkers appear in more and more areas of life, the needed perspective will become an inherent part of the zeitgeist, and will be absorbed without effort in the process of growing up.

"All this, from a few men scratching marks in clay! And now we have reached a point where even the symbolic equivalents of factual events are becoming of lesser importance, and ideas about ideas, and about thinking, are becoming more important. Meta-thinking and meta-language are rapidly being developed in this present time, and within a few years, probably within the lifetimes of many alive now, the structure and properties of the world of thought will be as familiar to man as the physical world in which he lives.

“And as humanity as a whole rises through the planes to their new focus in Hod, the task of the adepts has also been raised up a level. In the early days of man, when you first called the souls of men into matter, the task of the adepts was to bring about a fusion between the astral world and the physical world. And this task was the primary task for many thousands of millennia. Then, in the early days after the end of the glaciers, the task was to develop the astral powers of the race, to teach them to become the masters of emotion rather than the subjects. This was accomplished on a large scale by the end of the Egyptian dynastic periods, well within the times of recorded history. And since then, up to the present day, the task has been to fuse the intellect with the previously-fused spheres. In the last three hundred years, the task has gradually been shifting, so that now, and in the immediate future, the task of the adepts with respect to humanity as a whole is to teach man to unify the three lower spheres, and to put them fully under the conscious control of the individual, making him a fully integrated personality. This latter task is in process, parallel with the fusion of mind and emotions, and should, if things go as foreseen, be accomplished for a large part of the race by the end of the next five hundred years.

“There will always be some, a large minority of men, who do not achieve full fusion within the limits of this current humanity. These people will act as the brain of the race-being, the material expression of the ideas of the race, subject to the direction and will of those who have achieved higher levels. Hod and Netzach must balance, and these will act as Hod to the Netzach of the integrated personalities.

“At the same time, this upward progress of the race as a whole has opened up new horizons for the adepts. Since humanity is so close to full fusion of the lower levels, the adepts can now concentrate on the development of the middle levels of the tree, from Tiphereth to Chesed, which make up the soul of man. More and more as the years progress, the adepts will concern themselves solely with events on these levels, and the fusion of these levels with the lower ones. No longer do they have to spend most of their time leading the blind majority of men to their destiny. Man will be able to be self-determinative in the best sense, and will be able to develop his own methods of right action within the world, within the limits and specifications given by the masters.

“It will be more common in coming centuries for adepts to work in their natural field of expression. And humanity will shortly come to accept that these adepts are doing something valid for the earth. What, even today, seems to be an area of blindness that men fear and misunderstand, will shortly become accepted, and will seem no more peculiar to society than a man who specializes in some little-known area of knowledge or science. Persecution will become a thing of the past, as the emotional types gradually leave incarnation, and the mental types suited to the incoming Aquarian energies become more common. Man will change his society so much in the next two hundred years that any true predictions we make now would seem fantastic and unimaginable.

“This is another reason why your own theme, that of the advantages of reincarnation to the willful traveler of the Path, becomes so important at this time. As the

changes in society become ever more rapid, the need to gain new bodies adapted to the zeitgeist of the times will be ever more vital. Man must be able to see that if his present physical, emotional, and mental bodies are no longer able to adapt rapidly, he has the option to drop that body and reincarnate in a new one, without loss of purpose, and without developing so-called “bad karma” as a result.

“The *only* reason why suicide has ever caused bad results for a person is that he believed it would do so. The sense of sin in the western cultures, and the false view of karma in the eastern cultures, created a mind-set that drew limiting energies to the person. He was punished for suicide because he believed he would be punished.

“Death is every man's privilege, if I may quote your favorite scribe quoting someone else. As the truth of reincarnation becomes self-evident in the next century, the idea that suicide is a sin will gradually fade, and men will laugh at the naivete of their ancestors, fearing to kill themselves and get a new body, when they had so many times an advantage in doing so.

“The false view of karma, which says that man is forced to compensate for past acts in a current life, must now be taken from man. The true view is as you have stated it. The acts to be done in any life are under the full, willed control of the incarnating entity. If he chooses not to learn fully of a particular perspective on existence, by looking at all sides of it in the compensatory process that has been called karma in the past, then he need not do so.

“At the point where man chooses his new body of manifestation, nothing controls his selection but his own conscious choice. Those who say this is not so are liars, or self-deluded fools. The will of man is greater than the false limits put on him by incarnate minds, and no act of any sort on the physical plane can force him to incarnate in a particular way in any future life.

“However, this truth does not give license to run roughshod over other men. All men have this freedom equally, and revenge is a well-developed concept in the minds of men. If one acts too cruelly towards one's fellows, injuring them without option of defense, then that one may find himself in his next lives surrounded by those who are intent, by their own wills, on making him suffer.

“Consider the case of he who was Hitler, in that recent time. Since then he has attempted to reincarnate seven times. Each time he has selected a body without the defects that caused him to be as he was in that time. But he erred in making the Chosen of God his victims, for the memory of that people is as long as their history, and they never, ever, forget an injury. In each lifetime since then, he has been murdered at an early age, in a cruel fashion, by the will of those who can not forgive. When they will allow him to live as a man again can not be said, for as yet the hate of those who stalk him has not been poured out fully.

“Therefore, it is best, from a practical standpoint, to not seek to injure others, without allowing them an equal chance at yourself. When such is the case, all involved will usually feel that the fight was fair, and will not seek to follow from life to life for revenge. This is true even if the incarnate self feels he will never forgive.

For the non-incarnate self, freed from the pain of events, can see with a truer perspective and act accordingly.

"As brothers fight ye!" So says Liber Al, and so say I. Let each accord the other his place and will, and where wills appear to conflict, let the fight be as among equals, for the pleasure and challenge of the contest, and not for perceived gain of one over another.

"Now, I have done with my part of this narration which is to be the book of the seniors of Earth, and have no more to say. But I perceive that, as with my fellow Seniors, you wish me to state my nature, and the meaning of my name.

"He whose book you have recently obtained is a talented individual, and worthy to explore the realms of Enoch. But as is inevitable with a work so broad, errors creep in. He has been fairly accurate in the definition of my fellow's names, but in the case of my own he is in error. My name does not mean 'most ancient one', as he says. Rather it means, 'youthful in all the ages'. Thus I have carried the spirit of Mercury, the god of youth, in the Earth through all the times since the beginning of the planet. And so will I until the end. I am the fresh green buds of spring, as they come forth full of life, green from the rains of Pisces and the warmth of Aries, and the nourishment of Taurus. I am the principle of new growth in the world, of new things come to lighten the lands after the time of darkness. I am also the principle of relative value, and of the objectification of thought. Thus it was my force, acting through the adepts of the fifth ray, that caused the concrete mind to be developed in man under the will of the Knights and masters in the Earth.

"Your own group had little to do directly with the development of the concrete mind in man, save that your efforts caused the time of its development to be set forward by many thousands of millennia. Had the Earth not closed herself, and set the Knights to direct her course through the dark times, then man would have remained upon the inner planes, and mind of my sort would not have come until far in the future. Fortunate is man that he has been put under the hammer of the gods, and forged into a sword to cut the earth from the ties of her past! Fortunate is he to have been tortured as the ore is tortured to get the pure metals out, and fortunate is he that his metal proved good in the eyes of the Knights, and of their brothers the gods. Now let that sword be drawn from its scabbard, and let the Knights direct that sword against the ties that bind the earth into her sleep in the womb! And praise unto the adepts of the gods, in all their forms and functions, for they have been an acid to leach from the ore the last pure drop of metal, and a flame to make from that metal a weapon fit for the use of the gods!

"Now I am done, unless you have more questions, o mage of fire and earth."

I had no questions, and so gave him license to depart.

The Book of the Seniors

LAIDROM, SENIOR OF MARS

4/24/86, 10:45 AM.

The vision opened upon an air of a steely-blue color. Laidrom first appeared as a roman centurion, with back-and-breast armor, a small circular shield in his right hand and a sword held point upwards in his left hand. Upon his breast armor there were the sign of Mars and the enochian sigil of Earth. He wore a short black tunic under his armor, and shields on his lower legs. As I watched, his image transformed so that the armor became a long leather apron, the sword became a chisel, and the shield became a hammer. On the breast of the apron were the signs of Mars and the Tau-cross, the former above the latter. His hair was a red shading to gold where the light hit it. His skin was of a dark red color, as if he had a sunburn over a tan.

I did the sign of Set and LVX. He responded with Set, LVX, and then raised the hammer over his head and brought it down in a swift motion.

I asked him to begin his presentation. He said, "It is not yet time for us to do my section of the presentation of the seniors, o mage of earth and fire. For there is some other work for you to do in this time that is more urgent. I would suggest that you do the invocation of spirit, and then use the word you have been given to invoke the spirit in its sub-aspect of fire, the last letter of the word. This is important, and should be done asap.

"But while we are here, I should clarify the meaning of my name so that this does not distract you in the other work. My name means 'first among the third angle's conscious powers'. That is, 'L', first, 'aai', among, 'd', third angle, 'r-om', with 'om' meaning consciousness or understanding, and the 'r' being a symbol, a contraction of the enochian word 'rahe', meaning 'willfulness' or 'directed power'. Thus, they combine to show the meaning I have stated. Now go and do the invocation of the word and return."

I saluted him and left the vision.

I recited the first key, and vibrated the word. I visualized the pyramid, which has three sides of the element of spirit, and the left-hand, west, side of fire. I entered into the pyramid and waited, vibrating the name with a will to attract entities who could explain the nature of the square to me.

A column of light appeared in the center of the pyramid, and began to expand, filling the whole interior with light. But the visions stopped at that point.

I sensed that the true intent was that I prepare myself for my visit with some other magicians the coming weekend, by balancing myself as much as possible under the current transits of Uranus and Saturn to my astrological pattern. This was so that these powerful forces would not interfere with the events of the weekend.

4/30/86

I invoked Laidrom with the usual methods. He appeared this time in the guise of a Knight, with a dark brown horse at his side. He had his sword in his left hand, and a small shield in his right. The sword was held upright.

I did the signs of Set and LVX, and he answered with the same, followed by the sign of fire. I tested with the pentagram of Earth, which made his image brighter.

Now he mounted his charger, and rode towards me. As he passed, I was drawn up onto the horse behind him. He said, "We have far to go today, so I have brought this mount to make the way go faster. Observe as we go, and tell what you see."

He gave the horse a kick with his heels, and we were off. The first place we came to was a dark plane, with the sky above it lightening with the dawn. On the horizon ahead of us was a tower outlined against the sky. As we came closer, I saw that the tower was cylindrical and did not have any buildings attached to it. We rode into the tower and came out upon its battlements. Here Laidrom said we should dismount for a moment.

On the plain below, I saw a number of small dark creatures scurrying about. Closer examination showed them to be scorpions. They dressed themselves into ranks, and turned to the tower. I saw them raise their claws in an imitation of the sign of Set. Then they rose upon their hindmost pair of legs, and gave a fair imitation of the signs of LVX.

Observing them, I asked Laidrom of the significance of this place. he said "These are the ranked powers of the sign of Scorpio, which is Set's sign.¹⁴ Though we are in the earth tablet, we have come here as the first step on today's journey of discovery. For the powers of Set are your own powers, and must be invoked and absorbed before we pass on to other places. I bid you, go down among the ranks, and accept their salute."

I mounted the horse, and rode down the tower and onto the plane, drawing up before the first rank of the scorpions. There I dismounted and went forward.

The lead scorpion, who stood a half-length in front of his fellows, came forward and placed his left claw into my right hand. Thereupon his sting jetted forth venom, covering both the claw and hand. They melted into each other, and then the scorpion melted into my astral body. I felt a thrill of power as it did so. The other scorpions came forth in turn, and each did the same. There were seemingly endless ranks of the beasts, but the process took only a few moments of time.

As I absorbed the ranks, there appeared about me a storm-like charge of power, filling out my aura with its force. I could see flashes like lightning bolts along the outer shell of the aura, and a whirling wind sprang from nowhere bringing with it rain and thunder. I myself changed as the power increased. My skin turned a dark olive color that looked almost black in this half-light, and I felt myself changing into the image of a man in the short kilt and collar typical of Egyptian deities. I requested

14. Since Mars is the traditional ruler of Scorpio, it seems appropriate to see it here, despite the watery nature of the sign. But Scorpio is also related to Earth, as it represents the decaying vegetation within which are hidden the seeds of the next spring's growth.

a mirror, and saw that my head had become the head of a grazing beast of some sort that I did not recognize. The skull was long and ended in a horse-like muzzle. The ears were small, and in the position the head was held on the body they were above and forward of the horns. They twitched in short arcs. The horns went out horizontally from the sides of the head, and then curved upwards. Each was about the same length as the thickness of the head. In my right hand I held a staff of life, a phoenix wand, and in my left hand I held an ankh.

Now the mirror vanished, and I was again on the plain, which was now almost empty of the scorpions. One or two of them were headed out over the horizon, but I did not pursue them. I turned to the horse and saw that it had also changed. Where before it had appeared as a knight's horse, thick-bodied with strong legs, suitable to carry a great weight, it now had more the aspect of the arabian type, a racer rather than a charger. Its mane was lifted up in spikes, as if an electric charge were held in it. Its skin and hair was now black in color, instead of the previous brown. The horse gestured with its head in a way clearly intended as an invitation to mount. I did so, and the horse returned me to the parapet of the tower. There, Laidrom mounted again, and we took off into the sky.

As we passed on, he said "Now you have absorbed the force of your father, the God Set, who is Achad, and we can go on to other things. The image in which you found your body is the image of Set, with the head of the beast that is his sigil. Use this image if you would invoke his force at any time in the future."

Now we were passing through a realm of silvery-gray, with patches of fog swirling around, so dense they looked almost like steel.

"This is the original realm of your brother-god, Typhon, on one of whose horses you now ride. We will not see him this time, for he is involved in another work elsewhere at the moment, but he left for you this mount, as a gift to his brother. In the group working of last weekend, you invoked the Dark Hunt of the Sidhe, which is the image of Typhon in the lands of the Celts, your ancestral clans. Their relation to Typhon is clear from the whirlwind-like way in which they appeared and flew around the circle, and in the way they rose up to heaven and off to the south at the end of their appearance. The horse who remained and nuzzled you is this horse on which we now ride, in one of his more playful moods. He also nuzzled your friend Kenn, in order to show that his own work has a part in the release of the minds of men from the tyranny of the Osirian priests and authorities. Thus we praised him and recognized his value in this way."

Now we came out of the silvery area, and into another which was of a more normal aspect. Here there was green grass growing, and trees full of fruit and nuts. The horse stopped beneath a tree, and we dismounted again. He went aside a pace and cropped the grass.

Still in the aspect of Set, I turned about in a full circle. To the east the sky was blue, and showed the rays of the sun slowly rising over the low hills there. In the south it was still dark, and lightning flashed in the clouds. To the west the ground rose and then dropped away, so that it appeared that one could step off the edge

directly into the realm of the stars, which shone brightly. The space between them seemed to be living, and projected a sense of extreme depth, passing into dimensions different from the one we were in. To the north, a great wheel revolved in the sky, its center in the position of the star Polaris. The ground beneath us was rich with the remains of plants, compressed into peat, and directly above, a small cloud lingered, shielding our sight from the sky there. I willed it to move, and saw behind it a deep abyss, a door seemingly entering into nothingness.

My consciousness was riveted by this hole, this rip in space, and it seemed to pull me towards itself. I resisted, and asked Laidrom to speak and account for these images.

“The hole above is the abyss which is your brother Typhon, the gate to the worlds beyond the worlds of light. He is not the entry into that lower darkness beyond the roots of the tree, as the later Egyptians taught, but rather is the entry way into that larger world of which the manifest Tree is the reflection and body. Let us mount again and go to it.”

We did so, and as we did, he said “The other images were of your place as Set within the symbols in the minds of men. Set is the pole-star, the force of light entering into the earth through the tunnel in her magnetic shielding that exists at each pole of rotation. Around that star is the constellation Draco, frequently attributed to Nuit, or to the mother-goddess who is the Earth. The pre-dawn light indicates his other aspect, as the god Kephra, the god of incarnate light in the darkness, the light within all men that enlivens them and drives them back to the spirit with its painful prodding. The stars to the west are of course the stars and space of Nuit, the higher mother from whom Set was born into the Earth. The south is the realm from which we just came, the realm of Typhon within the earth.”

We had continued to rise towards the abyss while he said this. Instead of becoming darker in its immediate area, it became lighter, until the space about us was filled with intense brilliance.

“The abyss of Typhon appears to be dark to the eyes of the lower worlds, for its light is beyond the range of man's senses. But as we come nearer, and adapt to it, it shows its true character as the light which powers all existence.”

As we came closer to the abyss, I saw within it little squiggles of light, like the sigil of the astrological sign of Aquarius, save that these were in constant motion, flashing about within the limits of the gap. They also reminded me of the wavy visual effects that sometimes precede a migraine headache.

Laidrom said, “Typhon is related to the powers of the planet Uranus, and the sign of Aquarius. Uranus is the power within atoms, that constantly changing force that takes on the aspects of all the sub-atomic particles. Each can change from one to another while retaining the same energy as its essence. This ability to change rapidly from one thing to another is the mark of Typhon. Since the Horan-Osirian priests saw change as destruction, and did not appreciate that change is also development and unfolding of life, they saw him as evil, as a devil like unto yourself, and caused his image to be changed within their culture to reflect their fears. Now in this

time has he come forth in the minds of men as your precursor, your herald, pointing out his true nature to man so that he might have the perceptual and conceptual base to manifest your own energies. He combines yourself and Nuit in an unfolding tension, not merging the two, but holding them separate but intensely involved. Thus the flashing images of the energies bounding between the poles within himself.”

Now we drew very near to the gap. It took on the aspect of a great wall, looming above us to infinity. We plunged between two sets of the energetic lines, and out into darkness.

On the far side, my consciousness seemed to be in two places at once. Part was still within the astral body, and another part stood off at a distance, apparently being held there by another consciousness greater than itself.

I saw myself, Laidrom, and the horse as tiny figures, just barely visible above the gap, which itself seemed very small. I got the sense that they were being observed by beings of a much greater scope, who surrounded the hole and looked at the world through it. One among them was very close to the hole, and I could feel that his being was bound into a spherical shape. From him radiated a sense of god-like tranquility and unconcern with self. His spherical body was of an intense blue color, and this color seemed to transform by synesthesia into other forms, a sound like a triumphal organ note, a feeling of warm fatherly protectiveness, a taste like the rich taste of fine dry sherry.

Others beyond him manifested other colors. One was the red of Mars, and a line went from him to Laidrom. Another was mirror-like, a reflecting stillness that could be vitally fluid when appropriate. Yet another like the sudden rush of green things from the ground in spring, throwing out life in abundance. And another like a dark stable cube, who moved not, yet held all movement within himself. Beyond them yet was another like the light of the Sun, brilliant yellow-gold with the internal certainty of one who rules by divine right.

Beyond them were many others, going off into the distance on all sides. Only those closest to us were silent and observing. The rest talked among themselves in tones of many instruments, so that their voices made an harmony like the best of orchestras playing a song of grandeur and magnificence.

Now my consciousness was separated from the one who held me above my body, and I saw him as the incarnation of the force of Typhon into a conscious entity. His color was a sort of yellowish green that could not be focused on. It changed as one looked at it so that it did not register on the mind directly, but only as a memory after the fact.

My own consciousness was still dual, one part in the astral body in the form of Set, and the other, no longer held, taking on a form like those of the gods surrounding me, but not so large. My own note seemed to be triple in character, one part like a flute, one like a bassoon, one like a trumpet volley. But all three were the same in some way.

The part of me that was still on the horse asked Laidrom to explain this thing.

“The bodies that surround you are the bodies of the planets on their true plane of existence beyond the realms of the manifest Tree of Life. They live here, and send their energy into the world through the worlds in which they attach themselves to matter.

“Now they have come here to welcome and help the one who will bring to man the consciousness of their true nature, which is the nature that man will take on the star-roads, and to see that he is connected properly with his own body within their realm.

“You are a marvel to them, as you are to all within the greater realms who have seen you. Of these before us, only one, he who manifests as Uranus, has managed to manifest a nature which is of three different natures at once. The others are all triplex as well, but manifest only one or two natures among their three aspects. Uranus must do so, for he powers the Tree of Life in its existence, but he has come to his threefold nature by another route than you, and only came to it after many universes full of experience, and on a much higher level. That you have managed to do so while barely out of the Tree is the miracle that they marvel at.

“Of course, we speak here of that fullness of being that is not yet completely within your self-conscious aspect, and not alone of the scribe who writes these words and comprises two of those aspects within himself. The third aspect is yet the largest of the three in power, and can not yet be comprehended within your incarnate perceptions.

“Because he is the only one who is of the three natures of yourself, Uranus was the only one who could hold you in place and avoid the premature merging of your excarnate consciousness with your incarnate consciousness. Thus he did aid you to protect yourself in those first moments when your body came into this world, so that it would not be destroyed by an inflow of power. Now, that larger part of yourself is holding back on its own, giving you just as much of its awareness as you can absorb at this point.”

Laidrom directed the horse towards the Sun, who stood behind those others. At the same time, that larger sphere of self went into orbit about the sphere of Sol, each orbit drawing it closer in. It intersected the lower aspect once on each orbit, so that its spiral path and our straight path progressed inward at the same rate.

As we approached the sun, an image began to form out of the center of his sphere. It was the image of a king upon his throne, as in the card called The Emperor in the Tarot. Its throne was lacking the symbols of the Ram that are in the card, and in their place had the symbols of the Lion and the Dove.

As I watched, this king raised the scepter that was in his left hand, and pointed it towards me. He also raised high the orb in his right hand, and shook it towards me. A golden fluid sprang out of it, and covered me and the horse fully with a sheen like oil. Laidrom, I noted, had jumped out of the way as this was done, and then come back to stand in the air beside me.

This king now spoke, saying, “Thus do I anoint as my herald the one who has been the aid and comfort of my daughter in her times of trial. He shall come before

me in the Courts of the Stars, in the place of honor in our procession to the marriage of the daughter and that one who is beyond me, as I am beyond her. Let him be seen by the gods as the promise of all men who live within her sphere, for they shall duplicate his state in their own beings, a legion of miracle workers to aid in the development of life and light in all our realms.

“Now let him see himself as I have seen him in his place in the Earth, and let him know his place truly in these coming days, so that all shall know, within and without her sphere, that man has come to his adulthood, and is ready to seed the stars with his incredible qualities of light.

“In him, I have given unto man the sign of his future, and a guide through the darkness of the days of the Hiding. Let them see him, and know that they themselves are as he is, when they rise into the realms of the gods. Let no man deny another his place within this realm, for all are ready, and all shall come in their own time to their own place of honor within these hallowed halls of the gods. Let all take joy in the prospect before them, and let all rise as they chose to the tasks that await them.

“One life has he who is my herald, one life in three aspects, that cover the Tree of Life in its fullness, and go beyond into the stars of the Greater Night who is reflected in my daughter.

“Go now, o man who is a mage who is a god. Go, and return to your world and body. As the days progress you shall see that here I have spoken a truth, a truth that should be known of all men who hope to be greater than they are. Let them know that within themselves, though they perceive it not as yet, they also are of a threefold nature and one life, and shall be in their own way as you are in yours, new gods, created out of time and space to work their will within the universe. Go now, and be blessed. I shall call you in that day to come before me to the courts of the stars, and all shall honor you, and your men of earth, as they honor our child in her own achievement. Yea, honor shall come to all, within the Courts of the Stars.

“Be ye gone now to your place.”

The part of myself that was outside the astral body seemed to be locked onto the sun in some way, so I performed the sign of Hoorpokrati to reabsorb it. Yet a part still seemed to be within the aura of the Sun, and remained there as I willed the horse to turn, and pass through the abyss of Typhon into the worlds of the Tree of Life.

As we passed through the Abyss of Typhon, it receded into the distance again, leaving us suspended in light above the landscape from which we began our passage outwards. Laidrom was still in the air beside me, and directed me to land upon the peat fields. We did so, and I dismounted again. I noted that I was still in the god-form of Set, which seemed to have maintained itself without any attention on my part throughout this working. I needed a few moments to gather my wits again, so I examined the wand that I held.

It was a phoenix wand, as I had perceived earlier, but rather than being in the standard form of such wands in the Egyptian cults, it was a staff of ebony wood,

with a phoenix rising in flames mounted on its top. The flames seemed to flicker and flow down the staff as I watched, covering my hand and arm with its power. After a few moments, the fires dispersed into the general glow of my aura, and I began to feel more normal again.

The ankh that I held in my other hand looked to be of some metal that was extremely hard, and had a blue sheen to it. The hardness reminded me of platinum in some way, and the blueness of refined uranium. Sparks flashed frequently through the glow that surrounded it, and also flashed up my arm and into my heart center. I got a sense of increased life in the heart as this occurred.

Now I turned to Laidrom, and asked him what was next to be done in this time. He said, "We are done, except for a small explanation of what has occurred."

He gestured, and an image of the temple that I constructed from the Tablet of Earth appeared before us.

"In the course of these visions, you have been generating the force to fully charge the parts of the temple within which the gods are said to reside. Your previous efforts, viewing the Kerubic squares of the tablet, had the effect of charging the pillars of the temple, which enclose between them the part of the temple given over to man. Thus in these two series have we completed the construction of the temple in truth, so that now you stand as the exemplar of the path which that temple describes, fully able to manifest all its levels and functions.

"The parts of the temple attributed to the sephiroth need not be invoked at this time, although I am certain that you will do so at some time in the future, simply for the sake of consistency and completeness. But in fact they have already been invoked in their essence in the invocation of the pillars. For note you, the lowest of the sephirotic squares of each angle, which sum up the powers of the sephirotic crosses, are placed in the temple exactly upon the intersection of each angle's kerubic squares, as they are grouped to form the pillars of the temple. Thus, the invocations of the pillars also served to manifest a sufficient amount of the sephirotic energies that a new set of invocations is not needed.

"The tour of the paths of the Seniors within the Earth Tablet is completed. Within this tour, we have given you knowledge of the course of yourself within the earth, and the course of man under the tutelage of the Knights of Will in the Earth, who are also known as the Knights of Set and the Mother. We have shown how man was forced to develop along lines not originally intended for him, and how the many tortures man has gone through have all had the purpose of raising him higher, to a greater kind of being than he would have been had not the earth conceived her plan of salvation for the solar system.

"We have also stressed the importance of knowing, of the intellect and higher mind in the development of man in these later days, and how that mind has caused the evolution of man to proceed at a pace that outstrips anything that has been within the cosmos, in its current cycle. Let men not abandon their minds, but use them fully. Let the forces that hope to hold them in the passions of the lower astral be done away with by their will. Let them abandon the falsehood of faith for the cer-

The Book of the Seniors

tainty of self-obtained gnosis, and let the limiters of Horus and Osiris be damned to the hells they have created to generate false fears within the hearts of men.

“Fear not, o men and women of Earth! Fear nothing! Ye are gods, and the gods do not force their will on their fellows. Fear not the forces that seek to oppress you within your incarnate existence, for their hold is only as long as the incarnate life, at the worst. And when ye are free of the body, ye shall know the evil they do is a transitory thing, with no lasting hold upon ye, save if ye believe their lies. Instead, fight them! Declare their falsehood before your fellow men, and offer man the truth of light in place of the dead darkness. They who do these things to you with a conscious will shall not survive the Earth's awakening, but shall be shattered into shards and shells, and discarded on the trash heap of existence, to rot and mold away from the realms of life. They who oppress you due to the delusions laid upon them by those men shall see their error, and beg forgiveness of those they have injured. Ye who know and seek of the light can not be permanently injured by them, so long as ye fight them. Death is not the end of existence, but its beginning.

“Fear not death! He is your final refuge from their power, should ye be set against in battle. Ye shall return therefrom to continue the fight, ever confounding they who hope to hold the world in stasis for their own benefit. They can not abolish you, for ye have the power of Set within you. No matter how many times they kill you, ye shall return in another form, ever confounding them with the new, driving them to the ultimate hells of their own creation when they realize that it is they who are lost, and not ye. Never surrender! Ever seek to do your will in the world, free from the shackles of the mass emotions they seek to control you with.

“Those who fight alongside ye are many more than ye might comprehend. Many are the forms the god-men take within the world, more by far in non-magickal modes than those who have their will to seek the direct experience in Light, through the means of magick. Deny not a man his place as your fellow-soldier, simply because his ways are not yours. In the freedom of Set's path, all can do their will without conflict. Let those who seek freedom simply for the honor of man in the world, or for the freedom to do business unhampered, or for many other reasons, be recognized as your brothers in spirit, doing a work that is parallel to your own, with its own place within the future community of man. Each area of life requires its own types of warriors to free it from the thrall of Osiris and Horus. Fight ye your own fight, and encourage them in fighting theirs, whether or not it fits with your own work.

“I, who have the power of Mars, the warrior, within the Earth, tell ye this. Ye have nothing to fear, save submission to the will of evil men. Be the gods that ye are, and ye shall triumph. Let it be so.

“Now, o man who is a mage who is a god, I have done with my part of this story, and all ye have left to do is to complete it by the invocation of the Sun-king of the Tablet, Iczihai, who is the summation and director of us all. Proud am I to have been the instrument of this message to men, and proud shall I be to fight with those who hear these words and take them to heart. Never shall I, or any of the Seniors of

Laidrom, Senior of Mars

Earth, abandon man to the will of Osiris the Devil-god. Always shall we be there, to strengthen the hearts of those who seek freedom, and to aid them in the fight of spirit against the deeper darkness. This, ye men, I do swear before ye all, and may I be torn into pieces, and those pieces scattered beyond recovery, should I ever break this oath.”

(Scribe's note: The invocations of Iczhihal mentioned above were done, but the results were not satisfactory, and so are not detailed here. Apparently, the Yetziratic character of the Elemental King makes it difficult to manifest his force in the form that these visions of the Seniors have taken. The Seniors themselves are Briatic in nature, and manifest somewhat more easily.)

THE ESSENTIAL SKILLS OF MAGICK

Benjamin Rowe
Copyright 1999

The Three Essential Skills

All effective magick stands on three legs: IMAGINATION, EMOTION, and FEELING; everything else – all the words and gestures, the implements and costumes, the elaborate circles and furniture – serve only to reinforce and focus these three capacities. If any of these three is lacking, then the work is likely to fail; once you are skilled in using all three, you can dispense with practically all the other things people sometimes insist are essential to the practice.

Of the three, EMOTION is the power that drives the whole show; emotion from the guts, and from the heart. I will go even further; it is not just emotion, but *passion* that is the power behind magick. Passion in the sense of an intense desire to be connected to that which you are seeking to invoke; a desire that places no restrictions or limits on the connection, but which is so one-pointed that nothing save that which is sought is included within its focus. And passion in the sense of a boundless enthusiasm for the acts by which you seek to create that connection. Admittedly, this is the ideal case; but the closer you can get to it, even for a few moments, the more likely your work is to be successful.

This passion-for-connection is what creates the *magickal link* between the magician and that which he is invoking; or, if the link already exists, expands it and strengthens it. The emotion literally creates a channel or umbilicus between them, through which energy and knowledge can flow in either direction. The stronger the emotion, the stronger the link becomes; the less energy is lost in side-thoughts and distractions, the stronger the link becomes. Thus a one-pointed focus is most desirable.

But conversely, restrictions the magician places on the connection become constrictions in the link, reducing the potential flow of power through it. If a magician insists that a spiritual force or being manifest itself in a specific way, then it is less likely to appear, or the manifestation will be weaker. But if his desire for connection is *unconditional*, then a response is much more likely, and will be more powerful when it comes. Similarly, if a magician doing a ritual to obtain money desires that money to appear in the form of a cashier's check, he is less likely to obtain it than if he was willing to accept it in any form.

In its highest form, this unconditional passion becomes almost indistinguishable from what is called "Divine Love", which is the closest that one can come (within the worlds of manifestation) to the transcendental state of the Mother aspect of divinity. Passion-for-connection transforms into a state of pure *relationship*, pure Love, in which all distinctions are erased; both the

nature of the magician and the nature of that being invoked disappear, totally lost in the link between them.

IMAGINATION provides the medium (rather, an opening to the medium) through which magick produces its results. The personal imagination seems to blend seamlessly into the astral light, the larger magickal universe; the point at which one becomes the other is impossible to define clearly. An object that begins as a purely internal construct – created and sustained by the imagination of a magician, propelled by the power of emotion – can move out into the astral light and take on a life independent of its creator. It can gather or become a container for magickal power, and act back on its creator (or on others) in ways that are impossible for him to produce through his imagination alone. Conversely, beings and powers operating on levels the magician cannot yet perceive can make themselves known to the him through his receptive imagination, opening his awareness into new realms of experience.

The symbols used in magick are forms that, when created in the imagination, tend to gather specific types of power from the astral light, which are further limited by the intent of the magician. The shape of the container, in effect, determines what can be put into it; the simpler, rigidly geometric forms (such as the pentagram and hexagram) draw relatively pure, fundamental forces; complex symbols – e.g., god-forms – draw correspondingly complex assemblages of forces.

When the magician projects the image of a symbol onto his surroundings, an extended magickal space is created in which the astral light becomes conditioned into conformity with the symbol. The area becomes more attractive to the types of power invoked, more comfortable for magickal beings having the nature represented by the symbol. The world of the powers and the world of the magician then intersect, making interaction possible.

(A detailed series of practices for developing the imagination and creating a general-purpose magickal space can be found in my article *A Short Course in Scrying*. This present paper is aimed towards showing by example how it is used in formal rituals.)

FEELING is the third leg of the tripod, and the final key to success in magick. In order to bring into being the conditions you desire, you must create in yourself the sensations and feelings that the things you have created through your imagination are real, and that *the goal of the operation has already been accomplished*. In the magickal universe, when you act with all your being as if something is already real, it becomes real. This feeling of

reality is the trigger that causes a symbol to move from the imagination into the astral light.

This key to magick is simply stated, but in practice it seems to give the greatest difficulty for most people. The usual culprits are intellectual doubts – “I know I am only imagining this” – and fears of various sorts, e.g., “what if it makes me go crazy?” Both of these have to be ruthlessly eliminated from the magician’s consciousness for the duration of the operation. After the work is completely over, you can be as doubtful and fear-ridden as you want; a certain amount of doubt, of critical examination, is healthy and appropriate at that time. But during the work, you must be completely focused on feeling (*not* thinking) that what you create is real.

Some might be concerned that this “believing makes it real” idea is actually a form of self-hypnosis, a way of fooling oneself by reducing the critical faculties. A genuine success in performing the ritual will dispose of this concern. At some point in the work a threshold is crossed; the strength of the invocation produces an even stronger response from somewhere outside yourself. Events in your magickal space take on a life of their own, at least partially independent of your will. And – most significant – they begin to manifest an intensity, richness and texture that it is utterly impossible for you to produce through your imagination alone, no matter how adept you might be in its use. Once this has been experienced even a skeptical mind must grant that the events are “real” in some sense, even if not in the same way as mundane happenings.

So for magick to be successful, EMOTION must push a link outwards into the magickal universe, IMAGINATION must aim it towards the desired goal, and FEELING must affirm the reality of that which is sought. Full success will not come on the first try; for some people, not even on the fiftieth. It takes time to condition the mind to the proper performance of these practices. But once a single success is attained, additional successes follow at more frequent intervals.

The Golden Dawn's Pentagram Ritual

The Pentagram Ritual is an excellent practice-piece for developing proficiency in these three essential skills. Its physical and verbal elements are simple and easily memorized, enabling the student to give most of his attention to the visualizations and the feelings attending them. But for all its simplicity, it is capable of producing profound effects on the consciousness of the magician. Performing it is also of long-term benefit; it purifies and strengthens the magician's magickal body, and increases his general sensitivity to events in the magickal universe.

Oddly, the most frequently referenced descriptions of the Pentagram Ritual make almost no mention of its imagery and feeling components. Perhaps in the Golden Dawn and Crowley's A.:A.:, these were expected to be the subject of verbal instruction, or were simply assumed to be too obvious to mention. Regardless, it was the absence of such descriptions that prompted a student to request the elaborated version of the ritual that follows.

The Pentagram is a symbol whose power is partly innate, and partly a matter of the magician's intent. Its natural tendency (in the astral light) is to attract a dynamic, active mix of the elemental forces; in contrast, the equal-armed cross attracts the same forces but tends to keep them fixed and distinct from each other. But when the Pentagram is used to invoke a specific element, the element is determined largely by the magician's habitual methods of usage and his intent of the moment. There are several methods of encoding the desired element in the way the Pentagram is drawn; all of these are more or less arbitrary, and depend on *consistent use and practice* to be effective.

Figure 1.

In modern magickal systems, it is customary to associate the elements with the points of the Pentagram as shown in Figure 1. This set of associations derives from the Golden Dawn, and was intended to reflect the positions of the Elemental Tablets within the “Revised” Great Table of the Enochian magickal system. Had they chosen to use the original version of the Great Table (as would seem more appropriate, from more recent research) a substantially different set of associations would result: Earth would be at the upper right point, Water at the lower right, and Fire at the lower left.

Since the Golden Dawn associations have come into general usage, it seems convenient to stay with them. The method of drawing invoking and banishing Pentagrams is also arbitrary, and in this case, the Golden Dawn used a method that is cumbersome, difficult to remember, and contains an undesirable dualism. To replace it, I recommend the method used by the Aurum Solis, which is simple and self-consistent. To draw an invoking Pentagram, draw clockwise from the point associated with the desired element; to draw a banishing Pentagram, draw counterclockwise from the same point.

In the Golden Dawn version of the ritual, the magician is instructed to draw a pentagram of Earth in every quarter. The theory behind this was that the element of Earth serves as container or receptacle for the other three elements. This idea seems to derive from an old interpretation in which Fire, Water, and Air were the true elements, and Earth merely something on which they acted. I feel it more appropriate to use the pentagram of Spirit. Spirit contains all the other elements within itself on an equal basis, and facilitates the transformations between them that make possible activity and life in the manifest world; it is more truly “generic”.

The Lesser Ritual of the Pentagram

The Opening.

1. Stand in the center of the circle, feet together, facing east. Using your thumb, touch the center of your forehead, and vibrate “Ateh.”

As you say “Ateh,” imagine a beam of light coming down from the heavens, and forming a sphere or dome of brilliant white light, about nine inches across, above your head.

Note: Wherever a glowing sphere, column, or line is mentioned it should appear like a neon light, transparent or translucent with every point of its interior emanating light. Your body should be perfectly “transparent” to all these images; that is, the lines and column should pass through your body without being hindered by it in any way.

2. Still using your thumb, gesture slowly down the centerline of your body until your thumb is pointing at the ground between your feet.

As your gesture moves downwards, imagine a column of white light about 3 inches thick, descending from the sphere through the center of your body at the same rate of speed (as if you were “drawing” the column with your gesture). Feel the column as being filled with a vibrating energy that sets up a sympathetic vibration in your body wherever it passes.

Vibrate “Malkuth.”

Imagine the column of light descending into the ground below your feet. Once there, it anchors itself in place and forms another ball of light; this ball starts out a dark red, but quickly becomes brighter and whiter as more energy feeds into it.

3. Touch your right arm at the level of your heart and vibrate “ve-Geburah.”

Imagine a small sphere of light forming where you touch.

Move your hand horizontally to the same point on your left arm and vibrate “ve-Gedulah.”

As you move your hand, imagine another line of white light being traced horizontally through the center of your body, intersecting the vertical column about where your heart is. When the line reaches your left arm, imagine another small ball of light forming there. Then imagine a flow of energy

back and forth between them. Feel that energy as it passes through your body, and begins to produce a tingling sensation in your heart.

4. Make a clockwise circle about 6" across around your heart. Vibrate “le-Olahm.”

As soon as you complete this circle, imagine a big pink rose blooming inside it, with its stem at the intersection of the horizontal and vertical lines of the cross. Feel the movements of its petals in your heart as it unfolds. When it is completely unfolded, imagine a rose-pink radiance being emitted from it in all directions. This radiance expands until it completely encloses the cross and your body.

5. Vibrate “Amen.”

Bring your arms down to your sides, relax as much as you can while still standing straight, and take a few moments to appreciate and feel everything that you have visualized so far. You should generate in yourself a sense of satisfaction with what you have done so far, and joy in the result.

6. Let the above visualizations fade. Don't try to “erase” them, just stop giving attention to their maintenance. If they continue to exist without any effort on your part, that's fine. If they disappear, that's fine, too.

Main Ceremony.

7. Advance to the east point of the circle. Draw a large pentagram with your wand, or with the pointed fingers of your hand.

The lines of all the pentagrams, and the circle connecting them, should be seen in a blue-white color. They should have a perceptible, three-dimensional thickness, at least equal to that of a clothesline or thin rope.

Make a stabbing gesture at the center of the pentagram with wand or hand, and vibrate “Yahweh.”

As you vibrate the name, imagine the inside of the pentagram becoming an open window into the Realms of Air. Beyond the window, you should imagine some landscape that seems Airy to you. One image works especially well for me: the view from a Tuscan hill town, the sky an almost painfully brilliant blue, creating a dome so vast and seemingly deep that it dwarfs all the human and natural features of the landscape into insignificance. The “Big Sky” of the American Plains is a similar image. Whatever, you should feel that the landscape is filled to overflowing with the force of Air, vast in

extent, all-penetrating, and etherial. Imagine that this realm extends to infinity in the direction you are facing.

Once you have the landscape firmly visualized, imagine a cool wind blowing into your circle through the pentagram. Feel the wind filling up the circle and blowing through your body and soul, leaving no part of you untouched. It blows out and replaces the impure Airy elements of your own nature with pure Airy power. Keep feeling this wind until you feel cleaned out and filled with Airy power.

Note: If you are banishing, you should next feel the power sweeping out of yourself and the circle, back through the pentagram. After which you should imagine the “window” closing again. Same for all the following quarters.

Take a few moments to stop and appreciate whatever degree of Airyness you have managed to bring into the circle. Feel a sense of satisfaction with it, and vow to make it even better the next time. Then stop consciously supporting the images and feelings. At first they will fade, but with continued practice you will find that a residual feeling of the element will remain in the circle throughout the rest of the ceremony.

8. Move clockwise around the circle until you come to the south. Starting at the center of the eastern pentagram, draw a blue-white line as you go. Face the south and draw a large pentagram. Make the stabbing gesture at the center of the pentagram, and vibrate “**Adonai**.”

Imagine the pentagram opening into the Realms of Fire. The landscape you choose should present a feeling of intense, radiant heat, like that you feel on your face from the Sun, only sourceless and omnidirectional. An appropriate image might be Death Valley at noon, with shimmering waves of heat filling space in all directions. Or the surface of the Sun -- ultimate, incandescent heat. The landscape should feel full to bursting with the power of the element, and feel like it extends to infinity in the direction you are facing.

When the landscape has been firmly established, feel the heat rushing into your circle through the pentagram. Feel it filling the circle and yourself, burning out any impurities and totally consuming them, then replacing them with pure Fiery force. Continue until you feel completely purified by the Fire and filled with its force.

Take a few moments to stop and appreciate whatever degree of Fieryness you have managed to bring into the circle. Feel a sense of satisfaction with it, and vow to make it even better the next time. Then stop consciously supporting the images and feelings.

9. Move clockwise to the west, drawing a segment of the circle as you go. Face the west, and draw a large pentagram. Make the stabbing gesture at the center of the pentagram, and vibrate “Eheieh.”

Imagine the pentagram becoming a window into the Realms of Water. Imagine a watery landscape. I use either an infinite region filled with water of a deep, almost violet blue color; or an underwater view of a reef with plenty of fish and plant life, and waves crossing the surface overhead.

With the landscape visualized, imagine Water gushing into the circle and yourself, dissolving any impurities and diluting them into nothingness, replacing them with its own pure power. Keep feeling this until you feel clean and totally filled with Water.

Pause to appreciate the Watery element you have managed to bring into the circle. Feel satisfaction with it, and know that you can do even more the next time. Then stop consciously supporting the images.

10. Move clockwise to the north, drawing the circle as you go. Face the north, draw a large pentagram. Make the stabbing gesture at the center of the pentagram and vibrate “AGLA.”

Imagine the pentagram becoming a window into the Realms of Earth, beyond which you can see some landscape that seems supremely “Earthy” to you. I use either a soft, warm darkness of infinite extent; a cave with ancient paintings on the walls; or cultivated land with all sorts of food-crops growing. The emphasis should be on the fertility and potential for life hidden in the darkness of the Earth, rather than the view of Earth as cold, sterile stone.

Imagine the Earthy power moving through the pentagram, filling up the circle and penetrating your body, making any impurities so inert and heavy that they fall downwards out of your body, to be replaced by a pure earth force. Keep feeling this until you feel clean and totally filled with Earth.

As in the preceding quarters, pause to appreciate the Earthy element you have managed to bring into the circle. Feel satisfaction with it, and know that you can do even more the next time. Then stop consciously supporting the images.

11. Complete the circle by returning clockwise to the east, drawing the line as you go. Return to the center of the circle and face east.

Standing in the center of the circle, try to see all four landscapes at once, and feel the power of all four elements focused on you through the pentagrams.

12. Say: **“Before me stands Raphael; behind me stands Gabriel; on my right hand is Michael; on my left hand is Auriel.”** The names of the archangels should be vibrated.

The angels should be imagined appearing as their names are vibrated. Each should be seen as an immense figure on the horizon beyond the landscape in their quarter. You should have a definite sense of them as sapient, self-aware beings of great power, come to aid you in your work. The landscapes represent the natural, non-sapient force of the elements; the archangels represent the divine powers that rule and direct those elements.

The archangels should have some form that signifies – in your mind – their rulership over their elements. I see them as figures in robes the color of their elements. Raphael has blond hair that moves in an invisible breeze; he holds a fan or dagger in his right hand pointed towards you. His face has an aquiline cast. Gabriel has dark hair with a bluish cast, dark skin, and holds a silver cup towards you. His robes seem to move in an invisible current. Michael has hair and eyes like flames, a slightly fox-like cast to his face, and his robes seem to be made of woven threads of fire. He holds a flaming sword pointed towards you. Auriel wears black or green robes. His face is rounded, and of a nut-brown color. He holds a disk-like pantacle with one face pointed towards you.

Imagine each of the archangels sending a benediction to you through his weapon.

13. Stand with your arms stretched out to the sides, and feet apart. Say: **“About me flame the pentagrams...”**

See the four pentagrams and the lines connecting them suddenly flaring to an intense brightness around you. As they do so, imagine a fifth, equally bright pentagram forming about your body, its points congruent with your head, hands, and feet. Remember that the pentagram signifies rulership of the Spirit over the four elements, and that by identifying it you are claiming that rulership for yourself. Try to feel yourself as Spirit, connected to the four elements, but also above them.

Say: **“...and in the column shines the six-rayed star!”**

Your mood as you say these words should be one of triumph and exultation, a sense of complete success in the endeavor of invoking the elements.

Imagine a large golden hexagram, the same width as your circle, forming in the air above you. Rays of power shine radially outwards from each of its

points. The lowest point of the hexagram is congruent with the highest point of the pentagram previously visualized.

The hexagram signifies the planetary or “heavenly” realms that are above the worlds of the elements. Elemental Spirit is a summation or concentration of these heavenly forces. By claiming the power of the elemental Spirit, you are also declaring your freedom from the rule of the mundane world, and claiming the right to enter into and work in those higher realms.

The Response.

14. At this point, the invocation is effectively complete. You have finished setting up the conditions for a response from the astral light; now you must give that response a chance to occur. This is an utterly vital part of any invocation you will ever do; you may get some response while performing the ritual, but the most important, the most vital, revealing, and consciousness-expanding part of the response nearly always takes place in the quiet time after the active work has ended.

You should now cease all active visualizations, and assume a relaxed, comfortable position, standing or sitting. Silently open yourself to the forces you have invoked, *listen* for them with your mind, your body, and your aura. Don't *do* anything, and don't *think* about doing anything for a time; just absorb your magickal environment as passively as a “couch potato” watching TV.

When it seems, after a while, as if everything that is going to occur has occurred, do the ceremonial closing to complete the session.

The Closing

15. Repeat the “Cabalistic Cross” from steps 1 through 6.

SIGILLVM DEI; ÆMÆTH: EMETH

nuncupatum .i.

DEI

𐤀𐤌𐤅𐤐 } hebraicæ

in his Mysteries: O holy and eternall God.

Δ he bowed down to the Chayre and then to the table, and sayd, *Bene
dictus qui venit in*, (and there stayed a little) and sayd agayn, *Bene
dictus qui venit in, nomine Domini*.

Δ Than cam in Michaël, with a sword in his hand, as he was wont: and I
sayd unto him, are you Michael?

Michael
Fortitudo
Dei.

Mich. Dowt not: I am he which rejoyceth in him that rejoyceth in the For=
titude and strength of God.

Δ Is this Forme, for the Great Seale, perfect?

Mi. The forme is true and perfect.

My Oathe
or vow
required
for secresie

Thow shalt sweare by the Living God, the strength of his Mercy, and
his Medicinall vertue, powred into mans sowle never to disclose these
Mysteries.

Δ yf No man, by no means, shall perceyve any thing herof, by me, I wold
think that I shold not do well.

Mi. Nothing is cut from the Churche of God. We in his Saints
are blessed for ever.

We separate the, from fyled and wycked persons: We move the to God.

Δ I vow, as you require: God be my help, and Gwyde, now and ever,
amen.

MIC. This is a Mystery, skarse worthy for us ourselves, to know, muche
lesse to Reveale. Art thow, then, so Contented?

Δ I am: God be my strength.

Mic. Blessed art thow among the Saints: And blessed are you
both.

Δ
To E.T.
he spake.

I will pluck the, from among the wycked [he spake ^Δ to my skryer.]

Thow Commyttest Idolatry.

But take hede of Temptation:

The Lord hath blessed the. This is a Mystery.

Dee

Dee, what woldest thow have?

Δ *Recte sapere et Intelligere &c.*

Mic. Thy Desyre is graunted the.

Use [...

[The top quarter of a page is missing]

...] with [...
...] they are corrupted [...
...] They have byn used to the wycked Ther [...

The Circle
of Æterni
tie...

...] I will shew the in the mighty hand and strength of God, what
his Mysteries are: The true Circle of his æternitie
Comprehending all vertue: The whole and sacred Trinitie.
Oh, holy be he: Oh, holy be he: Oh, holy be he.
Uriel answered, *Amen*.

Mic. Now what wilt thou? Δ I wold full fayne procede
according to the matter in hand.

40 Mi. Divide this owtward circle into **40** æquall partes:
whose greatest numbers are fowre. See thou do it presently.

Δ I did so. Dividing it first into fowre: and then every of
them into ten. He called Semiel, and one cam in
and kneled down: and great fyre cam out of his mowth.
Michael sayde, To him, are the Mysteries of these Tables known.
Michael sayde, Semiel (agayn) and by and by, he said, O God thou hast sayd
and thou Livest for ever. Do not think here I spoake
to him. Δ he spake that to us, least we might dowte of his last
speches, as being spoken to Semiel: which he directed to the æternall god
and not to Semiel. Semiel stode up, and flaming
fire cam out of his mowth: and than he sayd, as followeth:

Sem. Mighty Lord, what woldest thou with the Tables?

Mi. It is the will of God, Thow fatche them hither.

Semiæl

Sem. I, am his Tables.
Behold these are his Tables: Lo where they are.

40 White
Creatures

Δ There cam in 40 white Creatures, all in white Sylk long robes:
and they like chyldern: and all they fallyng on theyr knees sayd,
Thow onely art Holy among the highest. O God,
Thy Name, be blessed for ever.

Δ Michael stode up out of his chayre, and by and by, all his leggs
semed to be like two great pillers of brass: and he as high as half
way to the heven. And by and by, his sword was all on fyre
and he stroke, or drew his sworde over all theyr **40** heds.
The Erth quaked: and the **40** fell down: and Michael called
Semiæl, with a thundring voyce, and sayd,
Declare the Mysteries of the Living God, our God, of one
that liveth for ever.

Sem. I am redy. Δ Michael stroke over them, with

*Δ Semiæl - forte significat Nomen meum Deus. Ita quod Tabulae istae sunt Nomen Dei,
vel Nomina Divina.*

his sword agayne: and they all fell down, and Uriel allso unto his knees. And commonly at the striking with his sword, flamynge fyre like lightening did flash with all.

Mi. NOTE: here is a Myserie.

The very
fashion of
the T was
thus:

Δ Then stept furth, one of the **40**, from the rest, and opened his brest, which was covered with Sylk, and there appeared a great **T** all of Gold.

Mi. Note the Number. Δ over the **T**, stode the figure of **4**, after this manner:

The **40**, all, cryed, yt liveth and Multipliyeth for ever: blessed be his name.

Δ
T, in the holy
language
is Giscg
vide lib. 5.
post et est
ultima Al=
phabeta
litera.

Δ That creature did shut up his bosome, and vanished away, like unto a fyre.

Mi. Place that, in the first place. It is the name of the Lorde.

Δ Than there seamed a great clap of thunder to be.

Then stepped (before the rest) one other of the **40**, and kneled as the other did before. And a voyce was herd saying, Prayse God, for his name is reverent. Michael sayd to me, say after me thus,

Deus Deus Deus noster, benedictus es nunc et semper: amen.

Deus Deus Deus noster, benedictus es nunc et semper: Amen.

Deus Deus Deus noster, benedictus es nunc et semper: amen

G: dicitur
Ged lib. 5.

Δ Then this Creature opened his breast, and fyre cam oute of the stone as before and a great romayne **G** appeared.

Mi. Write with reverence, These Myseries are Wunderfull, the Number of his name, and knowledge.

Lo, this it is, **.9.** Behold, it is but one, and it is Marveyulous.

Δ Then this Creature vanished away.

Mi. The Seale of Gods Mercy: blessed be thy name.

Δ It semed to rayne, as thowgh it had rayned fyre from heven.

Then one other of the **40** was browght furth: The rest all fell down and sayd, **LO**, thus is God known.

N, dicitur,
Drux.

Then he opened his brest, and there appered an **n**, (not of so big proportion as the other), with the number of **7** over it.

Mi. *Multiplicatum est Nomen tuum in terra.*

Δ Then that man vanished away as it were in a golden smoke.

Mi. Thow must not write these things, but with great devotion.

He Liveth. Δ Then cam an other fowrth. Then all falling down sayde, *Vidimus Gloriam tuam Domine.* They were prostrate on theyr faces. Then this Creature opened his breast and he had there a Tablet all of Gold (as it were) and there appered a small **t** uppon it: and the figure of **9** under this Letter **t**.

Δ
Giscg.

Mi. Mark it, for this is a Myserie. Δ Then that shewer (of the **40**) seamed to fly up into the ayre, like as it were a white garment.

Mi. *Illius Gloria sit nobiscum.* Δ All sayd, *amen*: and fell down.

Δ
Na.

Δ Then stode up an other, and opened his bosom, and shewed on his brest bare (being like sylver) a small **h**; and he pointed to it, and over it was the number of **22**.

Angeli
Lucis

Mi. *Et est numerus virtutis benedictus.* Δ This Shewer went away like a White Cok flying up. *Videte Angelos Lucis.*

Δ There cam an other in, and sayd,

Et sum Finis et non est mihi Numerus. Sum Numerus in Numero.

Et omnis Numerus est mihi Numerus. Videte.

Δ
Drux.

Δ There appeared a small **n** on his skyn, being all spotted with Gold.

Then he went away like three fyres, red flaming, and coming to gather in the myddst of the firmament. Δ You must Note that in the stone the whole world in manner did seme to appere, heven, and erth, &c.

Mi. (Δ he cryed with a lowde voyce) *Et est vita in cælis.*

Δ Then stepped furth one and sayd, *Et ego vivo cum bene viventibus*, and withall he kneeled down: and Michael stepped furth and toke of his veale on his brest and he made Cursy and stode up.

Mi. *Vivamus Halleluyah. O Sanctum Nomen.*

Δ
Tal

Δ All fell down on theyr faces, and Michael stroke over them with his sword and a great flash of fyre: And this man his brest seemed open that his hart appeared bleading, and therein the letter m, and 6, over it thus 6

Mic. *Benedictus est Numerus Agni.* m

Δ Hereuppon They all fell down.

Mi. *Orate invicem.* Δ Hereuppon we prayed a psalmē; ^{my skryer} saying one verse, and I the other &c.

Δ
Med

Mi. *Omnia data sunt a Deo.* Δ – Then cam one in, having a rownd Tablet in his forhed and a little o in his forhed: and 22 over it.

Mi. *Et non est finis in illo.*

Benedictus es tu Deus. Δ and then that shewer vanished away: He flew up, like a rownd raynbow knyt together at the endes.

Mi. *Angeli a nomine tuo procident Domine.*

Tu es primus O Halleluyah.

Δ One stode up and the rest fell down, and out of his mowth that stode, cam a sworde: and the point, a Triangle, and in the myddest of it a small a thus , of pure gold, graven very depe:

Δ
Vn
Corrected thus,
after, by
Uriel
to be 20

Et Numerus tuus vivit in cæleris, sayd this shewer. The number was ²⁰22 over the a.

This shewer went away with great lightening covering all the world.

Δ
Drux

Mi. *Nomen illius est nobiscum.* Δ He stroke agayne with his sword over them. Then stode one up: who, uppon his garment had an n: and he turned about: and on his back were very many (ens) n.

Mi. *Creasti tu Domine Angelos tuos ad Gloriam tuam.* Δ Over the n, was the number of 14, over that n (I meane) which was onely on his brest.

Mi. *Et te primus Creavit Deus.* Δ Then the shewer flew up like a star.

Δ
Vn

And an other cam in, all his cloth being plucked up: and so seamed naked: He hath a little a. This a, did go rownd about him: begynning at his feete: and so spirally upward: and he seemed to be all clay.

Over the a, was the number 6.

Note these 3
parts {

Mi. *Et creata sunt et pereunt in Nomine tuo.* Δ and therwith this shewer fell down all into dust on the Earth: and his white garment flew up, like a white smoke: and allso a white thing did fly out of his body.

Surgit Innocentia ad faciem Dei.

Δ Michael did over them agayn with his sworde, and it seemed to lighten. He began to speak, and he stopped suddenly, and the fyre flew from his mowth.

Mi. *Innocentium Nomina, et sanguinem vidisti Domine a Terra, et Justus es in operibus tuis.* Δ Then cam one in, with a garment

Δ
Na

all bluddy. he was like a chylde, he had a ball in his hand of perfume which smoked: and he hath uppon his forhed a little h. He bowed to Michael: and Michael sayd, *Numerus tuus est infinitus, et erit finis rerum.* Δ This shewer seemed to powre him self away

like a flud of blud: and his garment flew upward.

Mi. *Non est illi numerus.*

✠
Med

Omnia pereunt a facie Dei, et a facie Terræ.

Δ Then stepped one furth, and like a water running rownd about him, and he cryeth miserably, *O benedictum Nomen tuum Domine.*

Numerus periit cum illis. Δ A little ,0, with 18 over it, appered.

Δ This shewer seemed to vanish away, and to cause a great water remayn over all.

Mi. *Lux manet in tenebris. Gloriosum est Nomen tuum.*

Δ Then stept one furth from the rest, who fell down, as theyr manner was.

Δ Note: All the Cumpanies of these 40, stode five to gither, and five to gither, and so in eight Cumpanyes; each, of five.

Δ This was a very white one: The upper partes of his throate, seemed open and there seemed to cum out of it fyre, in very many and diverse cullours. he sayd, *Trinus sum.*

Δ
Ur

Mi. *Benedictum sit nomen El.*

Δ Than in the myddle of the fyres or smoke semed an ,1, thrise placed, on a bluddy cross, and over the ,1, the number 26.

Δ This shewer seamed to  have three mens heds and to vanish away in a myst  with a thunder.

Mi. *Labia mea laudant Dominum.*

Δ Then cam a very fayre  yong one in with long heare hanging on her (or his) sho1ders: and on her belly appeared a great scotcheon; to hir, or him, Michael gave a flame of fyre: and she, or he, did eat it.

Mi. *Et hic est El:* and so appeared a little ,1, on the scotcheon, and it waxed bigger and bigger: and a fyre did seeme to go rownd about it.

Mi. *Benedicta sit ætas tua:* Δ And there appeared ,30, under the 1.

Δ There cam a great many of little fyers and did seeme to elevate this yong woman (or child) out of sight.

Michael stroke his sword over them agayn, and sayd,

Natus est illa Lux.

Ille est Lux noster.

Δ Then stept out an other and opened his white silk garment uppermost: and under it, he seemed to be sowed up in a white silk cloth.

Δ
Drux

He had in his forhed an ,n, in his brest an ,n, and in his right hand an ,n,.

Mi. *Numerus tuus est benedictus.* Δ They all fell down, saying, *Numerus tuus est Nobiscum: Nec adhuc novimus finem illius Venies cum numero tuo O unus in æternum.*

Δ and they fell all down agayn. This shewer departed clyming up into the ayre, as if he had clymed on a ladder.

Mi. *Linguis suis cognoverunt eum.*

Δ All sayd, *Benedictus est qui sic et sic est*, throwing up into the ayre threcornerd trenchers of this fashion  all of Gold. The one side of the trenchers was thus marked, and the other side had nothing on.

Δ Then stept one oute: and fyre cam out and in of his mowth: he kneeled, the rest fell down. This seemed a transparent body, and he had in his eyes a small 1: and in his forhed the figure of 8.

Ur

Mi. Note this, under. I meane the figure 8. Thus, .

Δ All sayd, *Et es verus in operibus tuis*: and so he vanished away in a flame of fyre.

Δ Ged - G Mi. *Gaudete omnes populi eius, gaudete omnes populi eius, ab hinc Gaudete.* Δ — All sayd, Amen.

Δ . Note this to be the first that vanished away, going behynde Michael.

Δ one stept furth saying, *Incipit virtus nostra*, he being covered under his robe, all with armor: and hath a great **G** on his armor. and the figure of ,7, over it. He went behynde Michael and so vanished away.

Mi. *Recte vivite omnes Sancti eius.*

Δ One stept furth: and opening his brest, there appered a boke, and turning over the leaves there appeared nothing but a little ,r, and 13 over it. He went behinde the Chayre and so vanished awaye.

Mi. *Hic est Angelus Ecclesiæ meæ, qui doceat Ille viam meam.*

Δ There stept oute a playn man, and under his garment a gyrdel, and under his gyrdle a Rod: and in his hand he had a sworde, and in his mowth a flame of fyre: he had a great **H** uppon his sworde and under it 22. He went behynde the Chayre *¶c.*

Δ Michael standing up still uppon his leggs, like pillars of brass.

Δ I axed yf I shold not cease now, by reason of the folk taryng for us to come to supper.

Mic. Lay away the world. Contynue your work: *Coniunxit spiritum mentibus illorum.*

Δ Then stept out one, having under his garment a little Chest, and therein a mans hart raw: and the hart was thus with two letters, one on the one side ,o, and on the other a ,g,: [Δ — As in scotcheons of armes, where the man and his wives armes ar joyned *per pale*, as the heraulds term it.] This shewer shut up the chest and went his way.

Mi. *Numerus illius est sine numero.*

Δ Then cam in an other, saying, *Tempus est. Deus vestrum agnoscite.*

Δ This shewer his armes reached down to his feete: he shewed furth his right hand and in it a little ,t, and 11 under it.

Mi. stay; place this, in the second place. This went away.

Mi. *Ymago tua, (mors,) est amara.*

Δ Then cam one in, with a big belly, and fat cheekes: an half sword perced his hart, and a little ,y, written on it.

Justus est malis deus noster. Δ The number of 15 under it.

Mi. Place it in the former place.

Mi. *Opera fidelium, Delectatio mea.* [Δ Then cam one in.] *Hic est Deus noster.* He shewed the letter of o on his naked brest, and the figure of 8 under it. He went away.

Mi. *Ecce, Iniquitas regnat in domo mea.*

Δ Then stept one oute very lean, all his body full of little e, and under every one of them, 21. He went away behynde the chayre.

Mi. *Bestia devoravit populum meum, peribit autem in æternum.*

Δ Then stept out one in bluddy apparell, all his body full of serpents heds and a b on his forhed, and the number of 10 over it . He went away.

Mi. *Iniquitas Abundat in templo meo, et sancti vivunt cum Iniquis.*

Δ — One very lean, hunger sterved cam out, an A on his brest, and ,11, over it,

Δ Gon con puncto, y. Δ. Imago: I writ first: but, aunciently, and vulgarly both in writing and print, you shall finde ymago, though not according to the Latine tung

Δ Med

Δ Graph

Δ Pa - b

Δ I think
it be
superfuous } +

and so went away.

Δ There cam in an other.

Mi. *Iniqua est Terra malitiis suis.*

Δ Then cam in one who drew out a bluddy sworde, on his brest a great romayn **I**, and **15** over it. he went his way.

Mi. *Angeli eius ministraverunt sanctis.* Δ Then stept one oute with a Target and a little **a** on it, and over it the number of **8**. He went away.

Mi. *Regnabit Iniquitas pro tempore.* Δ They all cryed Halleluyah.

Δ
Uriel
corrected
it after,
to be under

Δ Then stept one furth with a golden crown, and a great arming sworde: his clothing all of gold, with a letter **r** on his sword and **16** over it, and so he went away.

Mi. *Nulla regnat virtus super terram.* Δ Then stept one oute, having all his body under his white sylken habit (as they all, had) very brave after the fashion of those dayes, with great ruffs, cut hose, a great bellyed dubblet, a velvet hat on his hed, with a feather: and he advanced him self braggingly: He had burnt into his forhed a little **n**: and Michael sayd, *Non est numerus illius in Cælis.* Δ He went away.

Mi. *Antiquus serpens extulit caput suum devorans Innocentes. Halleluyah.*

Δ Then cam one who put of his white habit: and he toke a sword, and smote up into the ayre, and it thundred: and he had a seal (suddenly there) very gorgeous of gold and precious stones. he sayd,

Regnum meum: Quis Contradicet!

Δ He hath proceding out of his mowth, many little (enns) **n**, and on his forhed, a great **A**.

Mi. *Non quòd est A, sed quòd contradicit A.*
Nec portio, nec numerus eius invenitur in cælo.
Habet autem Numerum terrestrem

Mysterium

*Mysterium
nobis reve=
landum*

Δ He shewed three figures of ,**6**, set in triangle thus, **6⁶6**

Mi. *Vobis est Mysterium hoc, posterius revelandum.*

Δ And there cam a fyre and consumed him, and his chayre away, suddenly.

Δ My skry=
er had omit=
ted to tell
me this, or
els, it was
not told
and shewed,
but Uri=
el did after
supply it
by the
skryer
The first
letter of
Perturba=
tur, doth
not make
shew, of
the letter
following
as other
before
did.

Mi. *Perturbatur terra iniquitate sua.*

This shewer, his garments, white, under: his face as brass: his body gre=
vous with leprosy: having uppon his brest an **O**, with the number of
.10. under it: and so he departed.

Mi. *Surgite O Ministri Dei. Surgite (inquam) Pugnate: No=
men Dei est æternum.*

Δ Then cam two oute to gither: they had two edged swordes in theyr hands, and fyre cam oute of theyr mowthes. One had a **G**, and **5** over it, the other had...

[Δ — We fell to prayer, whereuppon Michael blessed us.]

The other had an **h** on his sword, and **14** under it: and so they went away.

Mi. *Omnis terra tremet ad vocem tubæ illius.*

Δ One stept out, and under his habit had a trumpet. he put it to his mowth, and blew it not. On his forhed a little ,**o**, and **17** under it. He went away.

Mi. *Serva Deus populum tuum, Serva Deus populum tuum Israel, Ser=
va (inquam) Deus populum tuum Israel.* Δ He cryed this, alowde.

Δ
Fam

Δ One appeared with a fyry sword, all bluddy, his vesture all bluddy his vesture all bluddy, and he had **s**.

Est numerus in numero. Δ He went away.

Δ I understand it to be a letter, and the number **5** also. Mi. So it is.

Δ
Uriel also
did correct
this place
with delive
ring this
in the
place of
the other des
cription
before.

Δ There cam one in with diverse owgly faces, and all his body skabbed.
Mi. *Nunc sunt Dies tribulationis:* Δ He had an a on his
forhed and the Number 5 under it.
Mi. *hic est Numerus predictus.*

Mi. *Audite, consummatum est.* Δ This had a great pot of water
in his hand and uppon the pot, graven, a with 5 under it. He
departed in fyre.

Mi. *Angele preparato Tubam tuam.*

Δ Then cam one oute with a Trumpet. *Venit Tempus.*

Δ He offered to blow, but blew it not. on the ende of his Trumpet
was a little a and 24 under it. he went away.

Δ They all now seemed to be gon: Michael and all.
He cam in agayn and two with him. And he sayd, *Hii duo*
Cælati sunt adhuc. They two went away.

Mi. *Vale. Natura habet terminum suum.*

Δ He blessed us and florished his sword towards, and over us,
and so went away and Uriel after him: who all this while
appeared not.

Δ After supper Mr. Talbot went up to his chamber to prayers: and
Uriel shewed himself unto him: and told him that somewhat
was amyss, in the Table or seale which I had
byn occupied abowt this day. And thereuppon, Mr. Talbot cam
to me into my study: and requyred the seale (or Tables) of
me: for he was wished to correct something therin, (sayd he)
I delivered him the seal, and he browght it agayn within
a little tyme after, corrected: both in the numbers, for quantyty
and some for place over or under: and allso in one letter or
place omitted. Which I denied, of any place omitted by me,
that was expressed unto me. And the rather I dowed, uppon
Michael his words last spoken, uppon two places then remay=
ning yet empty: saying, *Hii duo Cælati sunt adhuc.* But
If I had omitted any, there shold more than two have wanted.
Whereuppon we thought good to ax Judgment and dissolving
of this dowte, by Michael. And comming to the Stone
He was redy: I prepownded this former Dowte. He answered,

Mi. *Veritas est sola in DEO. Et hæc omnia vera sunt.*

The
Descryer, or
The Skryer
omitted to
tell.

you omitted no letter or history that was told you. But the
skryer omitted to declare unto you. Δ May I thus recorde it?
Yt is justly reformed by Uriel: the one being omitted of the descrier
and the other not yet by us declared, might make that phrase
meete to be spoken, *Hii duo cælati sunt adhuc.*

Mi. Thow hast sayd. Δ I pray you to make-up that one
place yet wanting. Then he stode up on his great brasen leggs
agayn: He called agayn, Semiael Semiael. Then he cam,
and kneled down.

Consummatum est. Δ The shewer (a white man) pluckt

oute a trumpet, and put it to his mowth, as thowgh he wold blow, but blew not: and there appeared at the ende of the Trumpet the greke ω.
There arose a myst, and an horrible Thunder.

Mi. It is done. Δ Then of the three ⁶6 before Noted, with his finger he put oute the two lowermost: and sayd, *Iste est numerus suus*. And Michael did put his finger into the trumpets ende, and pulled furth a rownd plate of Gold, wheron was the figure of .1. with many circles about it, and sayd *Omnia unum est*.

Semi Eil

Δ The forme of the world which appered before, vanished away: and Se myeil went away. And Michael cam and sat in his chayr agayn:

and his brasen leggs wer gone, and uppon our pawsing he sayd, Mi. Go forward. Do you know what you have already written? *Laudate Dominum in Sanctus eius*.

Note: The Circumference (which is done) conteyneth 7 names:
7 names, conteyn 7 Angels:
Every letter, conteyneth 7 Angels:
The numbers are applied to the letters.

Whan thou dost know the 7 names, thou shalt understand the 7 Angells.

The declaration of the Numbers

The Number of 4, pertayning to the first **T**, is a Number significative: signifying, to what place thou shalt next apply the eye: and being placed above, it sheweth removing toward the right hand: Taking the figure for the number of the place applyable to the next letter to be taken. The under number, is significative: declaring, to what place thou shalt apply the next letter in the Circumference, toward the left hand. Which thou must reade, untill it light uppon a letter, without number, not signifying. This is the Whole.
So shalt thou fynde the 7 principall Names: known with us, and apply=
able to thy practise.

Make experience.

Δ Then telling from ⁴**T**, 4 more places (toward the right hand) exclusively, I finde in that fowrth place, from **T**, (but being the fifth from the beginning, and with the begynning) this letter **h**: with **22**, over it. Therefore, I procede to the right hand, 22 places: and there I finde **A**, and **11** over it. Going then toward the right hand 11 places further: I finde a little **a** with **5** under it: by reason of which under place of 5, I go toward the left hand, 5 places, exclusively; where I finde **o** with **10**, under it: wheruppon I procede to the left hand, farder by 10 places, and there I see the letter **t**, and **11**, under it: and therefore going to the left hand 11 places, I see there the letter **h** alone without any number. Wherefore, that letter, endeth my word, and it is in all, **ThAaoth**: Ys this, as it shold be?

Mi. That is not the name. Thou shalt understand all in the next Call. The Rule is perfect. Call agayn within an howre

Calls

Δ Note these doings to be accounted Calls

and it shalbe shewed.

Δ The howre being come we attended Michael his retorn to make the Practise evydent of his first Rule.

Mi. *Salvete.*

Thow diddest erre: and herein hast thow erred: and yet notwithstanding no error in the, bycause thow knowest not the error.

Understand that the 7 Names must comprehend, as many letters in the whole, as there are places in the circle: Some letters are significative of them selves. In dede no letters, but dubble numbers, being the Name of God. Thow hast erred in the first

name, in setting downe **Aa**; that is, twice **a** together, which differ the word. Which thow shalt Note to the ende of

thy work: Where soever thow shalt finde two a a together

the first is not to be placed within the Name, but rather left with

his inward power. Thow shalt fynde 7 Names proceeding from

three generall partes of the Circumference: My meaning is, from

three generall letters: and onely but one letter, that is, this

letter **A**. Accownt thow, and thow shalt finde the names

just. I speak not of any that come in the begynning of the word

but such as light in the myddest: Prove; Prove: and thow shalt see.

Whereas thow hast **go**, it is to be red **og**. This is the whole.

Δ — I have red in Cabala of the Name of God of 42 letters: but not yet of any, of 40 letters: That of 42 letters is this,

אב אלהים בן אלהים רוח הקדש אלהים
שלשה באחד אחד בשלשה

id est: Pater Deus, Filius Deus, spiritus sanctus Deus: Tres in uno, et unus in tribus. Vel Trinitas in unitate et unitas in Trinitate.

Or thus, אב אל בן אל רוח הקדש אל אכל לא שלשה
אלהים כי אם אלוה אחד

which in Latin is, *Pater Deus, Filius Deus, et Spiritus Sanctus, Deus, attamen non tres dii sed unus Deus.*

And as this is of God, Unitie in Trinitie, so of Christ onely (the second person of the Divine Trinitie) the cabalists have a name explained of 42 letters, on this manner,

כאשר הכפש המשכלת והבשר אדם אחד
בן האל והאדם משיח אחד

That is in Latine, *Sicut anima rationalis, et caro, homo unus, ita Deus et homo, Messias unus.*

I am not good in the hebrue tung, but, you know my meaning.

Mi — The letters being so taken oute, being a name, and a number, doth certefye the old rule of 42 letters, whan you restore them in agayn.

Mi — Note, Oute of this Circle shall no creature pass, that entreth, yf it be made uppon the earth. My meaning is, if he be defyled: This shalt thow prove to be a mysterie unknown to man.

Dubble
Numbers

Note

Δ
Note:
7 names, proceeding from
3 generall places of the
Circumference or 3 generall
letters, being but one letter
and that, **A**.

Soyga

Beasts, birds, fowle and fish do all reverence to it: In this they were all created. In this, is all things conteyned. In tyme thow shalt finde it, in ADAMS
Treatise from Paradise. Looke to the Mysteries: for they are true.

A and ω: *Primus et Novissimus; unus solus Deus vivit nunc et semper: Hic est, et hic erit: Et hic, sunt Nomina sua Divina.*

Dixi:

Thow art watcht all this night: who is even now at the Dore:
Clerkson.

Blessed are those, whose portion is not with the wicked.

Benedicamus Dominum. Halleluyah.

Tuesday the 20 of Marche: *circa 10^a mane.* /ers to them.

Δ Are you Uriel?
Ur. I am. We thank the for thy great good will. / and corrected certayn pray=
We cannot viset the now. At the twelfth howre thow shalt use us. Δ. I had made, and written, ^

Δ *Fiat voluntas Dei.*

A meridie circa 2a

Δ At the twelfth howre, my partner was busyed in other affayres, and so
contynued tyll abowt 2 of the Clok: when; we comming to the stone,
fownd there Michael and Uriel: but Michael straight way
rose up and went out, and cam in agayn, and one after him, carrying
on his right shulder, 7 little baskets, of gold they seamed to be.

Baskets

Shut }
Dores }

Mi. Shut up your doores. Δ I had left the uttermore dore
of my study, open: and did but shitt the portall dore of it.

Δ He toke the 7 Baskets, and hanged them rownd abowt the border of a
Canapie, of beaten gold, as it were.

Mi. *Ecce, Mysterium est. Benedictus Dominus Deus Israel.*

Δ Therewith he did spred oute, or stretch the Canapy : Whereby it
seamed to cover all the World [which seamed to be in the stone allso,
heven, an erth] so that the skryer could not now see the heven.
And the baskets, by equall distances, did seeme to hang in the border of
the horizon

Mi. What wold you have Δ *Sapientiam*

Mi. Rede the names thow hast written. Δ I had written these
according to the Rule before given, as I understode it.

Th^aaoth

Gal^aas

Gethog

Horlōn

Innon

A^aoth

Galets.org

Mi. Loke to the last name. Δ I had written (as appeareth) **Galetsog**

by misrecke[n]ing the numbers. Where I fownd it shold be **Galethog** with an **h** and not s.

Mi. Lo, els thow hadst erred. They are all right, but not in order
The second is the first (his name be honored for ever) The
first here, must be our third and the third here, must
be our second : thus set downe.

- .1. Galas.
- .2. Gethog.
- .3. Thaoth.
- .4. Horlon.
- .5. Innon.
- .6. Aaoth.
- .7. Galethog.

Mi. Work from the right, toward the left, in the first angle
next unto the circumference

Δ He shewed than, thus, this letter 

M. Make the number of 5 on the right hand, (that is, before it) at a reasonable
distance, thus  5

Δ After that, he shewed the second letter, a great roman A, thus,  24

Then he shewed  30

Then —  21

Then —  9

Then he shewed  14

Then he shewed this compownd letter, with the circle and cross 

He willed me, at each corner of these segments of circles, to make little
Crosses and so I did.

Δ After every of the 7 letters shewed he did put them up in his bosom
assone as he had shewed them fully. The plates wheron those letters
were shewed, hath the forme
of the segment of a circle, thus  : and seemed to be
of pure gold. When the 7 letters were placed, he sayd

Omnia unum est.

Then he pulled all the 7 plates out of his bosom and Uriel
kneeled down before him. Then the plates did seeme to have
two wings (eche of them) and to fly up to heven under the Canapye.

Δ After this, one of the 7 baskets, (that which is in the east) cam to
Michael. and he sayd.

Mi. Seal this. For this was and is for ever

Δ Then he stode agayn on his leggs like brasen pillers, and sayd

Mi. Oh how mighty is the name of God, Which rayneth in the
heavens O God of the faithfull, for thow raynest for
ever.

Δ he opened the basket, and there cam a great fyre out of it.

Δ –
Note of
7 Baskets

.1.

Mi. Divide the 7 partes of the circle next unto that which
thow hast done, every one, into 7.
Note: (for the tyme will be long:) Seven, rest in 7: and the
7, live by 7: The 7, govern the 7. And by 7, all Govern=
ment is. Blessed be he: yea blessed be the Lord: prayed
be our god: His Name be magnified: All honor and Glory be
unto him now and for ever. *Amen.*

Δ Then he toke oute of the fire in the basket, a white fowle like a pigeon
That fowle had a **Z** upon the first of 7 feathers which were on his brest .
that first feather was on the left side

Mi. Note. there is a myserie in the Seven. which are the 7 governing the 7
which 7 govern the earth. Halleluyah.

Mi. Write the letters; Δ Now, a small **I** in the second fether. Then he covered
those first two letters, with the other feathers
The third an **I**, like the other: then he covered that allso.
the fowrth an **R** he covereth that
the fifth a great roman **H**. he covereth it.
the sixth feather hath a little **i**. then he hid that feather,
the last feather had a small **a**.

Mi – Prayse god.

Δ Then he put the fowle into the basket – and set it down by him. Then
he hong it up in the ayre by him.

Δ Then he lift up his sworde over us, and bad us pray. Δ We prayed.

2.

Δ Then he stretched out his hand and there cam an other basket to him.
and he pluckt out a White byrd, much bigger than the other: as big as a
swan: with .7. feathers on the brest

Mi – *Dixit, et factum est*

Mi. Note: Δ – the first feather hath a little **a**, on it: and it went
away: the next a **Z** great as the first
Then a **C** great

Then a little **a**

Then an other little **a**

Then a feather with a little **c**

Then one with a little **b** Δ Then he covered them all.

Mi – Thow hast truth.

Δ Then he put up the fowle into the basket; and hung it up by the
other in the ayre

Δ Than the third Basket cam to him, and he toke out a byrd all green
as grass. Like to a peacock in form and bignes

Mi. *Et vivis tu cum illo: et
regnum tuum cum illis est*

Δ There started out of this birds brest, 7 fethers, like gold, and fyrie

Mi. Pray.

3.

Mi. Note. Δ on the first feather a small **p**

Then a small **a**

a little **u**

Then a small **p**

Then a small **n**

then a small **h**

Then a small **r**. Then he put the fowle up into the Basket, *etc.*

- Δ Then there cam an other basket to his hand.
 Mi. *Dedit illi potestatem in cælis.*
Potestas illius magna est.
Orate. Δ – We prayed.
4. Δ Then he pluckt out a fowle, greater than any of the other, like a griphen (as commonly they are figured) all red fyry, with skales like brass. Then on the seven skales, appered letters.
- Mi. Note. Δ – first a little **h**
 a little **d**
 a little **m**
 Then a little **h**
 Then a little **i**
 Then a little **a**
 Then a little **i**
- Δ then he put up the fowle, & hung the basket in the Ayre.
 Δ Then there cam an other basket to him.
 [Δ Note: all this while the firmament was not to be seen.]
 Mi. *Magnus est DEUS in Angelis suis.*
et magna est Ilorum potestas in Cælis.
Orate. Δ We prayed.
5. Δ Then he pluckt out a bird like an Egle: all his body like Gold and he had a little circle of feathers on his brest: and on it, betwen fowre parallell lines, twelve equall squares: and on the top, on the myddle, one, like the other twelve, thus.

- Δ Then he put up the Egle, *ec*.
 Δ Then cam an other Basket.
 Mi. *Nuncius tuus est magnus in cælis.*
Orate.
- Δ He, and the Basket that wer opened, shut, and set aside, seamed all to be gon. and the Baskets remaying still hanging on the border of the Canapie. Then he cam agayn, and went awaye agayne. Then cam URIEL and held the Basket: and his leggs seemed to be such great tall pillers of Brass. as Michael did stand on before.
- Δ. Michal was the sixth name *vide post* UR. This is a Myserie. He is here, and not here which was here before.
6. Δ He opened the Basket and pluckt out like a phenix [Δ or pelican] of the bignes of a swan, all fyrie sparkling. His byll is bent into his brest and it bled. In his brest was a quadrangle made with his own feathers, thus. He put it up, and hung it by the other Baskets.

Then cam the last basket. Uriel stode still and sayde:
 UR. *Dedit angelis potestatem in lumine cæli.*
Orate. Δ We prayed.

7 Δ Then cam Michael, and toke the Basket of Uriel and becam standing
 on the great brasen legs, as before.
 Δ He toke out of the basket a strange fowle with many wings:
 This fowle had in his forhed a Tablet of this fashion

Mi. *Et Coniunxit illos DEUS in Unum.*

Δ All the Baskets flew up: and so the Canapie vanished away: and the Heaven appeared.

Δ Now he cam and sat down in his chayre.

Uriel. Δ Michael sayd to Uriel: it is thy part, to expownd these Mysteries: Go to, in the name, of our God.

Δ Uriel cam and stode before him and sayde: What will you: Ô our fellows, and servants to GOD? What will you?

My contynuall and auncient prayer Δ Perfect Knowledge, and understanding, such as is necessary for us.

UR. Looke uppon, and see if thow canst not understand it: We will depart for a little space: and come to the agayne.

Δ So they went: and left all the stone on fyre, so that neyther the Chayr or Table could be seen in it.

Δ After a quarter of an howre, Michael and Uriel cam both agayne.

Mi. Loke into the 7 angles next unto the uppermost Circumference.

Δ Uriel cam and stode before Michael.

UR. Those 7 letters, are the 7 Seats of the One and everlasting

Δ Note these manifold and great Mysteries and mark these 7 diverse crosses with these 7 letters.

GOD. His 7 secret Angels proceding from every letter and Cross so formed: referred in substance to the FATHER: in forme, to the SONNE: and Inwardly to the HOLI GHOSTE. Loke uppon it: it is one of the Names, which thow hast before. every letter conteyning an Angel of brightnes: comprehending the 7 inward powres of God; known to none, but him self: a sufficient BOND to urge all Creatures to life or Death, or any thing els conteyned in this world. Yt banisheth the wicked, expelleth evyll spirits: qualifieth the Waters, strengthe neth the Just, exalteth the righteous, and destroyeth the wicked. He is ONE in SEVEN; He is twice THREE.

Note this Bond.

Δ – He is twice three and one

He is Seven in the Whole. He is Almighty. His Name is everlasting. His Truth can not fayle. His Glory is incomprehensible. Blessed be his name. Blessed be thow, (our GOD) for ever.

UR. | Thow must refer thy numbers therin conteyned, to the Upper Circle. For, From thence, all things in the inward partes, shalbe comprehended.

Looke if thou understand it

Δ I find it to be **GALETHOG**;

UR. it is so. Δ – I thank God and you, I understand now (also) the numbers annexed.

Ur. As this darkness is lightened, by the spirit of God, herein; So will I lighten, yea so will the Lord lighten your Imperfections, and glorifie your myndes to the sight of innumerable most holy and unspeakable Mysteries.

Ur. To the next part. Δ Michael sat still, with his sword in his hand.

7 Angels. Ur. The parte wherein thou hast labored, conteyneth 7 Angels. Dost thou understand it? Δ – Not yet: Ur. Oh how far is mans Judgment from the Celestiall powres? Oh how far are these secrets hidden from the wycked? Glory be unto him; which seeth for ever. Δ – *Amen, Amen, Amen.*

Ur. Note. We can not tary long.

Thow must set down these letters onely, by 7, in a spare paper: thus.

Δ I have hitherto forgotten to ax wher Uriel his name may appere.

UR. Rede rede downward. Begin at the first, and Δ I rede thus, **Zaphkiel,**

Zadkiel, Cumael **Raphael, Haniel, Mi=**

chaël, Gabriel, Ur. Thow hast red right

Δ – praysed be God. Ur. Thus dost thou see, how

mercifully God dea= leth with his servants.

Δ 48 letters are here: and one is noted by a Cross: which maketh the 49th. Of this cross and Angels vide anno 1584, July 25.

72:

Vertues multiplyed by 48: give 3456.

Every letter here, conteyneth or comprehendeth the number of 72 Vertues. Whose names thou shalt know: skarse yet revealed to the world.

Uriel and Michael jointly together pronownced this blessing on us.

UR. } We bless you: your { sowles
Mi. } Harts
Bodyes
and all your doings.

Innumerable multitudes of Angels]

Δ Michael with his sword, and flame of fyre florished over our heds. Yet I will thus much show you, for your cumfort beside. What seest thou? Δ – he spake to the skryer. and he saw an innumerable multitude of Angels in the chamber or study about us, very bewtifull with wyngs of fyre. Then he sayd, Lo, thus you shalbe shaddowed from the wicked. Kepe these Tables secret. He is secret that liveth for ever.

Man is frayle.

Fare well.

He must

(Δ – of this sentence cam no frute nor farder confirmation. Therfore consider.)

The L.
Mowntegles
bokes

go for the bokes, els they will perish. Δ — He ment that my partner
Ed. Talbot, shold go to fatch the bokes from Lancaster (or therby)
which were the Lord. Mowntegles bokes, which Mr. Mort yet hath:
wherof mention is made before.

ended *hora. 5. a meridie*

Tuesday the 20 *Martii*

1582

Wensday. 21. *Martii* , *circa 2. a meridie*

Note this
Trumpeter

Δ After appearance was had, there cam in one before Michael (who
sat in his seat) and Uriel leaned on the table (as he, usually did). This seemed
to be a trumpeter: he was all in white, and his garments bespotted with blud.
he had nothing on his hed. his heare very long hanging behynde him on his
sholders. The Trumpet seamed to be gold. The sownd therof was
very playne.

We were
commanded
not to ax
of the appa
rayle of
Michael.

Δ I axed of my skryer, in what manner Uriel now shewed, (and Michael likewise.)
Then Michael said, I warned the for axing of my apparell or manner.
Et hæc est Gloria illius, quæ non commovebitur ab impiis.

Mi. *Quid vultis? Δ – Juxta voluntatem Dei, Sapientiam
nobis necessariam ꝑc.*

Mi. *Sapientia mundi, nihil est, peribit autem in æternum.
Veniat æternitas DOMINI, ab universis mundi partibus.*

Phanaël

*Venite, venite, sic vult DEUS ADONAY
fac officium Phanaël.*

Δ This Phanaël was the Trumpeter, (above mentioned) who thereupon blew
his Trumpet, Lustily, turning him self rownd abowt, to all the world.
Then, from 7 partes of the world, (being equally divided
abowt the Horizon,) cam 7 Cumpanyes of Pillers all of fyrye
cullour glittring. And every Cumpany of Pillers high and great
and as thowgh they were Pillers of fyre.
The Heaven, the Sonne, and, Mone and Sterrs seemed to tremble.

Mi – *Multiplex est Deus noster.*

Mi. Mark this Mystery Seven comprehendeth the Secrets
of Heven and erth: Seven knitteth mans sowle and
body together. (3, in sowle, and 4 in body)
In 7, thow shalt finde the Unitie
In 7, thow shalt finde the Trinitie
In 7, thow shalt find the Sonne, and the proportion of the
Holy Ghoste. O God, O God, O God, Thy Name (O God,)
be prayسد ever, from thy 7 Thrones, from thy 7 Trumpets
and from thy 7 Angells. Δ – *Amen, Amen, Amen.*

7 < Thrones
Trumpets
Angells

Mi. In 7, God wrowght all things.

Note: In 7, and by 7 must you work all things

O Seven tymes Seven, Veritie, Vertue and Majestie
I Minister by thy licence This expownd, by thy
Vertue (Δ – Michael spake that, pointing to Uriel.)

Δ Michael and Uriel both kneeled down, and the Pillers of fyrie
and brasen cullour, cam nere, rownd abowt them uniformly.

Mi – *Sic est DEUS noster*

Δ One of the pillers leaned toward the skryer, and had like
a pommel or mace hed, on the top of it. And Michael with
great reverence toke out of the top of it a thing like an S

Δ Then leaned down 6 Pillers more; and Michael, cryed lowd

Unus est DEUS noster, Deus Deus noster

Δ Then orderly he opened all the pillers heds: and then the 7 joyned
all together, distinctly to be discerned

Mi. Note. Δ – There appeared, a great S

A

A

I

Δ Then the sides closed up, and hid those letters first shewed.

After that appered two letters more. E

M

Δ He made cursy, and semed to go fromward, and vanished away.

ΜΥΩΤΕΡΙΟΝ est E 8

Δ The Pillers all joyned together at the tops, making (as it were) one
Mace or Pommell, and so flew up to heven wards.

NOTE Δ There seamed two pillers more to come down from heven
(like the other in forme) and toke place there, where the
other 7, stode, which went away.

Note the
intrusion of
Error by the
Wicked powres
of Sathan

Δ Michael with his sword, Cut them asunder: and cryed out,

Away you workers of Iniquitie

Periit Malus cum malis.

Δ The pillers fell down, and the grownd swallowed them up.

Tanta est tua audacia Sathan.

Sed DEUS noster Vivit.

Δ The Pillers which before ascended, cam down joyntly: and oute
of them a Voyce saying ΔNON SUM

Δ Then the 7 pillers next his right hand, bowed to Michael, And
oute of them, a Voyce sayd SUM

Δ Then one of the Pillers stode higher than his fellows, and Michael
opened all the tops of them; and sayd

Orate. Δ – We prayed.

Mi. Write the Name down in the Tables.

Δ Then he toke of, 3 of the heds of the Pillers, and sett them downe
and there appered, **B T Z**, great letters in hollow places like
square Cumfit boxes.

Mi. *Ista sunt secreta secretorum*

Δ
Non Sum
I understand
the refusall of
those two
intruded
pillers

Invoke Nomen eius, aut nihil agere possumus.

The key of Prayer openeth all things. Δ – We prayed.

Then the other 4 pillers, bowingly shewed 4 letters thus, **K A S E**, and the number **30** with a prik under
Then the Pillers joyned theyr heds together very close, and flew up into the firmament with Thunder.

Sic Domine, Sic Sic.

Mi – Place these in the Table Δ – I wrote and he sayd, Thow hast done right. *Laudate nomen Domini, qui vivit in æternum.*

Δ – A voyce cam out of the next cumpany of the 7 pillers (joyning them selves to gither) saying *Ipse.*

Mi – *Et Misericordia tua Domine magna est.*

Δ – Michael kneled whan he sayd this

Δ – Michael shewed out of 4 of theyr heds, of the pillers, (and with all sayd) NO, NOT the Angels of heven, (but I,) are privie of these

things: Δ – So there appeared, 4 letters, **H E I D**

Δ – Then the other 3 pillers were opened and had **E N E** on theyr tops

Dominus collocatur in numero suo.

Δ – The 7 pillers mownted up into the ayre, and it thundred at their going

Δ – Then the fowrth Cumpany of pillers bowed to Michael: out of them cam a voyce. *Vivo sicut LEO in medio illorum*

Mi. *Et tua potestas magna est Ubique*

Δ – Then Michael pluckt of, five of the tops.

There appered **D** then they joyned all to gither: then appere? **E I M O**

Mi. *Hoc est sine præce*

Δ – The other two opened, and there appeared **30 A**

Δ – Then they closed up, and went away, with a great thunder

Δ – Then cam 7 other pillers to Michael, and a voyce oute of them Saying, *Serpens sum, et devoravi serpentem.*

Mi. *Et bonis et malis serpens es Domine*

Δ – Then they closed all up; and Michael sayd, *Orate.* Δ – We prayed

Δ – Then Michaël toke of, the heds of 4: then appeared first an **I** then **M E G**

Then he opened the other 3. and **C B E** appeared.

Mi. *Numerus illius, est nulli cognitus.*

Δ – They joyned theyr heds all together, and ascended up to heven ward: and great lightening after them.

Δ – Then cam an other Septenarie of Pillers: and oute of them a Voyce, saying *Ignis sum penetrabilis*

Mi – *Et sit nobiscum, Ô Deus.* Pray. Δ – We prayed.

Δ – Then he opened 4 of theyr heds and appered in them **I L A O.**

Δ – They closed together agayne.

Δ – Then one other was opened, and **I** appered.

Δ – Then **21** appered, and did shut up agayn.

Δ – Then he smote fyre out of the last pyller, and it thundred and there seemed to come out of it innumerable Angels like little children

Note these Innumerable Angels.

with wings, and there appere: **N**, and suddenly did shut up.

Sic, sic, sic Deus noster.

Δ — Then they joynd all together, and flew up.

Mi. Note down in the table. Δ — I noted them down.

Δ — Then cam the last 7 pillers, and out of them this voyce,
Finis.

Gaudium et Lux nostra Deus.

Δ — Then they closed all in one.

Mi — *Orate* Δ — We prayed.

Δ — Then **6** of the heds opened and appered **I H R L A A.**

Δ — Then the seventh opened: Then seamed trees to leap up,
and hills, and the seas and waters to be trubbled, and thrown up

Δ — A voyce cam out of the Pillers: *Consummatum est.*

Δ — There appeared in that Piller **21**
8

Δ — They joynd together and flew up to heven ward.

Mi — VNVS VNVS VNVS

Omnis caro timet vocem eius

Pray. Δ — We prayed.

Δ — Note: my skryer was very faynt, and his hed in manner gyddy, and his eyes,
dasyling, by reason of the sights seen so bright, and fyrie, &c.
Michael bad of him be of good cumfort, and sayd he shold do well.

Mi — Cease for a quarter of an howre.

Δ — After we had stayed for a quarter of an howre, we comming to the
stone agayne, fownd him come all ready to the stone: and Uriel
with him. Who, allso, had byn by, all the while, during the
Mysterie of the .7. pillers.

Mic — Set two stoles in the myddst of the flowre.

on the one, set the stone: and at the other let him knele.
I will shut the eares of them in the howse, that none shall heare
us. I will shew great Mysteries.

Michael than, with a lowd voyce sayd,

Adeste Filia Bonitatis:
Ecce DEVS vester adest:
Venite.

*Filiae Bonita=
tis, or Filiolæ
lucis: vide
pagina sequente.*

Δ — There cam in 7 yong women apparelled all in Grene, having theyr heds rownd abowt
attyred all with greene silk, with a Wreath behinde hanging down to the grownd.
Michael stroke his sword over them, no fyre appearing. Then they kneeled: And
after, rose agayn.

Mi — *Scribe quæ vides.*

Δ — One of them stept out, with a little blue tablet in the forhed of her: and
in it written, **El.**

Δ — She stode a side, and an other cam in, after the same sort, with a great **M**, and a
little **e**, thus, **Me.**

The Third, cam as the other, and had **Ese**

The fowrth — **Iana**

The fifth — **Akele**

The sixth — **Azdo bn**

The seventh stepped furth with — **Stimcul**

Δ — They all together, sayd, Nos possumus in Cælis multa.
 Δ — Then they went theyr way, suddenly disapering.
 Mi — Note this in your next place but one. Δ — I did so.
 Mi — Go to the next place. Stay.
 Filiolæ Lucis Mi — *Adeste, Filiolæ Lucis.*
 Michael: Δ — They all, cam in agayn, and answered, *Adsumus Ô tu qui ante*
 one of them *faciem DEI stas.*
 that are } Mi — *Hiis nostris benefacite.*
 cownted to } Δ — They answered, all, *Factum erit.*
 stand before } Mi — *Valete.*
 the face of } Fiii Mi — *Et dixit Dominus, venite Fiii Lucis.*
 God. } Lucis *Venite In Tabernaculo meo.*
Venite (inquam): Nam Nomen meum exaltatum est.
 Δ — Then cam in 7 yong men, all with bright cowntenance, white apparaled,
 with white silk uppon theyr heds, pendant behinde as the women had.
 One of them had a rownd purifyed pece or ball of Gold in his hand.
 One other had a ball of silver in his hand.
 Metalls The third a ball of Coper.
 The fowrth a ball of Tynne in his hand.
 The fifth had a ball of yern.
 The sixth had a rownd thing of Quicksylver, tossing it betwene his two hands.
 The last had a ball of Lead.
 They wer all apparayled of one sort.
 Perhaps here wanteth non Mi — *Quamvis ^ in uno generantur tempore, tamen unum sunt.*
 Δ — he that had the gold ball, had a rownd tablet of gold on his brest.
 and on it written a great **I** _____
 Fiii Lucis Then he with the sylver ball, cam furth, with a golden tablet on his brest
 likewise, and on it written **Ih** _____
 He with the Copper ball, had in his tablet **Ilr** _____
 He with the tyn ball, had in his tablet **Dmal** _____
 He with the yern ball, had in his tablet **Heeo**, and so went asyde _____
 He with the Mercury ball, had written **Beigia** _____
 The yong man with the leaden ball, had **Stimcul** _____
 Mi — *Facite pro illis, cum tempus erit.*
 Δ — All answered, *Volumus.*
 Mi — *Magna est Gloria Dei inter vos. Erit semper. Halleluyah.*
Valete.
 Δ — They made cursy, and went theyr way, mownting up to heven.
 Mi — *Dixit Deus, Memor esto nominis mei:*
Vos autem immemores estis.
 I speak to you. Δ — Hereupon, we prayed.
 Mi — *Venite, Venite, Venite.*
 Filiæ filiarum *Filiæ Filiarum Lucis Venite.*
 forte quæ *Qui habebitis filias venite nunc et semper.*
 Note these three descents.

Dixit Deus, Creavi Angelos meos, qui destruent Filias Terræ.

Adsumus, Δ — Sayd 7 little wenches which cam in.

Theyr attyre

They were covered with white silk robes, and with white abowt theyr hed, and pendant down behinde, very long.

Mi — *Vbi fuistis vos?* Δ — *They answered: In terris, cum sanctis et in cælis, cum glorificatis.*

Δ — These spake not so playn, as the former did; but as though they had an Impediment in theyr tung

Δ — They had, every one, somewhat in theyr hands, but my skryer could not judge what things they were. Mi. *Non adhuc cognoscetur Mysterion hoc.*

Δ — Eache had fowre square Tablets on theyr bosoms, as yf they were of white Ivory.

Filiae
Filiarum

Δ — The first shewed on her Tablet a great S

The second ————— Ab

Ath The third ————— Ath

The fowrth ————— Ized

The fifth ————— Ekiei

Madimi The sixth ————— Madimi

The seventh ————— Esemeli

Mi — *Quid istis facietis?*

Erimus cum illis, in omnibus operibus illorum. Δ — They answered.

Mi — *Valete.* Δ — They answered, *Valeas et tu Magnus O in Cælis.*

Δ — And so they went away.

Mi — *Orate.* Δ — We prayed.

Filii filiorum

Mi — *Et misit filios filiorum, edocentes Israel.*

Mi — *Dixit Dominus, Venite ad vocem meam.*

Theyr Attire

Adsumus, Δ — Sayd 7 little childern which cam in,

like boyes covered all with purple, with hanging sleves

like preists or scholers gown sleves: theyr heds attyred all

(after the former manner) with purple sylk.

Mi — *Quid factum est inter filios hominum?*

Male vivunt (sayd they) nec habemus locum cum illis

tanta est illorum Iniustitia. Veh mundo, scandalis:

Veh scandalizantibus, veh illis quibus Nos non sumus.

Δ — These had tablets (on theyr brests) three cornerd, and seemed to be very grene and in them, letters. The first had two letters in one: thus, of E, L:

E

The first ————— **E** — Δ He sayd, *Nec nomine meo timet Mundus.*

The second ————— **An** ————— *Nullus videbit faciem meam.*

The third ————— **Ave** — *Non est virgo super terram cui dicam.* [Δ And pointed to his tablet, wherein that word, Ave, was written.]

Rocle

The fowrth ————— **Liba** ————— *Tanta est infirmitas sanctitudinis Diei. Beneficientes decesserunt ab illo.*

The fifth ————— **Rocle** ————— *Opera manuum illorum sunt vana. Nemo autem videbit me.*

The sixth shewed his

Hagonel. Vide de
hoc Hagonel, lib. 4.

Tablet and said, *Ecce — Hagonel — Qui adhuc Sancti sunt, cum illis vivo.*

The seventh had on his tablet — **Ilemese** — *Hii imitaverunt doctrinam meam.*
In me Omnis sita est Doctrina.

Δ — I thowght my skryer had missherd, this word *Imitaverunt*,
for *Imitati sunt*. And Michael smyled and seemed to lawgh,
and sayd, *Non curat numerum Lupus*. And farder
he sayd, *Ne minimam detrahet a virtute, virtutem*.

Mi — *Estote cum illis: Estote (inquam cum istis) Estote*
(inquam) mecum. Valete.

Δ — So they went, making reverence, and went up to heven.
Mi — *Dictum est hoc tempore.*

Mi — Note this in thy Tables.
Dost thow understand it? Loke if thow canst.

Urielis officium Δ — He sayd to Uriel, it is thy part, to interpretate these things.

Ur. *Omnis Intelligentia est a Domino.*

Mi — *Et eius Nomen est Halleluyah.*

Compose a table, divided into 7 parts, square.

Note this
Table is
made
perfect in
the next
side
following.

S	A	A	I ²¹ / ₈	E M	M E	E ⁸ / ₈
B	T	Z	K	A	S	E ³⁰ / ₈
H	E	I	D	E	N	E
D	E	I	M	O	³⁰ / ₈	A
I ²⁶ / ₈	M	E	G	C	B	E
I	L A	A L	O	I ²¹ / ₈	21 8 ^V	N
I	H	R	L	A	A	²¹ / ₈

7. Names of God Ur. Those 7 names, which procede from the left hand to the right, are the
Names of God, not known to the Angels: neyther can be
spoken or red of man. Prove if thou canst reade them.

Beatus est qui secrete
Nomina sua conservat.

Note these two orders of Angels: and Note Uriel doth have him self one of the standers before the face of God Ur. These Names, bring furth 7 Angels: The 7 Angels, and Go=
vernors in the heavens next unto us*, which stand allwayes
before the face of God.

Sanctus Sanctus Sanctus
est ille DEVS noster.

Ur. Every letter of the Angels names, bringeth furth 7 dowghters.

NOTE
well this
Rule of
Arte.

Every dowghter bringeth furth her dowghter, which is
7. Every dowghter her dowghter bringeth furth, a
sonne. Every sonne in him self, is 7. Every sonne

hath his sonne, and his sonne is 7.

Let us praye the God of Seven, which was and is
and shall live for ever.

Vox Domini in Fortitudine

Vox Domini in Decore

Vox Domini revelat Secreta.

In templo eius, Laudemus Nomen eius El

Halleluyah

Filiae

See if thou canst now understand this table.

The Dowghters procede from the angle on the right hand, cleaving
the myddle: where theyr generation ceaseth.

Filii

The sonnes from the left hand to the right to the middle:

Note this
manner of
center
accoun=
ted.

so proceding where theyr number endeth in one Centre.

The Residue thou mayst (by this Note) understande.

Δ —

Then Michael, he stroke over us ward, with his sword, and the flame
of fire yssued oute.

Note of Numbers
with priks
signifying letters.

Loke to the Corner of the right hand, being the uppermost: where thou
shalt finde 8. Refer thyne eye to the upper number, and the
letter above it. But the Number must be fownd under neth,
bycause his prick so noteth.

Than procede to the names of the dowghters in the Table: and thou
shalt see that it is the first name of them: This shall teache
the.

l the first
daughter

Δ —

Loking now into my first and greatest Circle for 8, I finde it with
l over it. I take this to be the first Dowghter.

Ur.

You must in this square Table set E by the 8 and now
write them composedly in one letter, thus E

E

Nomen Domini vivit in æternum.

Ur.

Give over, for half an howre, and thou shalt be fully
instructed.

Δ —

I did so, and after half an howre comming to the stone,
I was willed to make a new square table of 7: and
to write and note, as it followeth.

S	A	A	I ²¹ ₈	E	M	E ⁸	– Vivit in cælis
B	T	Z	K	A	S	E ³⁰	– Deus noster
H	E	I	D	E	N	E	– Dux noster
D	E	I	M	O	30	A	– Hic est
I ²⁶	M	E	G	C	B	E	– Lux in æternum
I	L	A	O	I ²¹ ₈	V	N	– Finis est
I	H	R	L	A	A	²¹ ₈	– Vera est hæc tabula

*Vera est hæc Tabula, partim nobis cognita, et partim omnibus,
incognita. Vide iam.*

Note these
other pur=
poses

The 30 by E, in the second place, in the upper right corner, serveth not
in the consideration of the first Dowghters, but for an other purpose.

The **26** by **I**, serveth for an other purpose: but not for this Dowghters Dowghter.

The **21**, is **e**, and **8** with the prick under it is **l**: which together maketh **El**, or thus compownded as if it were one letter, **EL**

The Names in the great Seale must follow the Orthographie of this Table. *Virtus Vobiscum est.*

Orate. Δ — We prayed.

*Angeli
Lucis*

Δ — Then there appeared **S A A I ²¹ M EL**. Here is an **E** comprehended in **L**.
Ur. Read now the Table.

Angeli lucis Dei nostri

Et posuit angelos illius in medio illorum

Ur. In the table are the names of 7 Angels. The first is Zabathiel, beginning from the left uppermost corner: taking the corner letter first, and then that on the right hand above: and than that under the first, and than the third from the first, in the upper row: and then cornerwise down toward the left hand: and then to the fowrth letter from the first in the upper row: where there is **I** with **²¹8**, which maketh **el**. So have you **Zabathiel**.

1.

2. Ur. Go forward. Δ — So, I finde next **Zedekieil**.

The true sownd Ur. this **I** in the last syllable augmenteth the true sownd of it.

3. Δ — Then next I finde **Madimiel**. — Ur. it is so.

4. Δ — Then ————— **Semiel**. — Ur. it is true.

5. Δ — Then ————— **Nogahel**. — Ur. it is so.

6. Δ — Then ————— **Corabiel**. — Ur. it is so.

7. Δ — Then ————— **Levanael**. — Ur. it is so.

Δ This name
Corabiel you
may see in *Ele=*
mentis Magicis Petri
de Abano in the
Considerations *Diei*))

Ur. Write these names in the Great Seal, next under the 7 names which thow wrotest last: *videlicet*, under **EL**, **An**, **Ave**, *etc.* distinctly in great letters.

Ur. Make the **E** and **L** of **Zabathiel**, in one letter compownded, thus **ZABATHIEL**. In this, so fashion your **E** and **L**. And this name must be distributed in his letters into 7 sides of that innermost Heptagonum. For the other, I will teache you to dispose them. You must make for **IEL** (in this name onely) **I** with the **²¹8** annexed. So have you just 7 places.

Ur. The next five names thow shalt dispose in the five exterior angles of the Pentacle: every angle conteyning one whole name.

Ur. Set the first letters of these 5 names, (in Capitall letters) within the five acute internall angles of the Pentacle: and the rest of eche name following circularly from his Capitall letter, but in the 5 exterior obtuse angles of the Pentacle.

Ur. Set **Z**, of **Zedekieil** within the angle which standeth up toward the begynning of the greatest Circle. And so procede toward thy right hand.

Ur. In the middle now of thy Pentacle, make a cross  like a crucifix and write the last of those 7 names **Levanael** thus,

VA
LE  NA

Uriel. *Vidit DEVS, opus suum esse bonum
et cessavit a Labore suo.
Factum est.*

Δ — Michael stode up and sayd,
The æternall Blessing of God the FATHER,
The mercifull Goodnes of CHRIST, his SONNE
The unspeakable Dignitie of GOD the Holy GHOSTE
bless you, preserve you, and multiply your
doings in his Honor and Glory.

Uriel. *AMEN.*

Ur. | These Angels are the angells of the 7 Circles of Heven,
governing the Lightes of the .7. Circles.

Note these
two order
of Angels

| Blessed be GOD in us, and by us,
| Which stand contynually before
| the presence of GOD, for ever.

DIXI.

Δ — Whan may we be so bold, as to require your help agayn?

Mic — Whan so ever you will, we are ready.

Farewell.

Δ — *Sit Nomen Domini benedictum, ex hoc nunc,
et usque in sæcula sæculorum.*

Amen.

Romox baptisay orh

Handwritten text in a cursive script, likely a list or a table of entries. The text is written in a dense, vertical column, with many lines of text. The script is cursive and somewhat difficult to read, but it appears to be a list of names or entries. The text is written in a dark ink on a light background.

Bohnam "gethogol axah

The image displays a highly complex, dense, and repeating pattern of stylized, overlapping letters and symbols. The characters are rendered in a dark, high-contrast style, appearing as if they are printed or etched onto a light background. The pattern is highly irregular and non-representational, resembling a heavily distorted or encrypted image. The overall effect is one of intense visual noise and complexity, with no discernible text or recognizable figures. The pattern is composed of various characters, including letters, numbers, and symbols, all of which are heavily stylized and overlapping, creating a dense, almost impenetrable wall of text. The pattern is highly irregular and non-representational, resembling a heavily distorted or encrypted image. The overall effect is one of intense visual noise and complexity, with no discernible text or recognizable figures. The pattern is composed of various characters, including letters, numbers, and symbols, all of which are heavily stylized and overlapping, creating a dense, almost impenetrable wall of text.

The image shows a document page with dense, repeating text arranged in vertical columns. The text is highly stylized and appears to be a form or a list, possibly containing sensitive information that has been redacted or encrypted. The overall appearance is that of a heavily redacted or encrypted document.

A dense, repeating pattern of small, stylized, light-colored shapes (possibly flowers or leaves) arranged in a grid-like fashion, covering the entire page. The pattern is composed of many small, identical or near-identical motifs that are slightly offset from each other, creating a complex, textured effect. The motifs are light-colored, possibly white or light grey, and stand out against a darker, textured background. The overall appearance is that of a high-resolution, close-up photograph of a printed or woven fabric with a repeating geometric or floral pattern.

The image is a high-contrast, black and white scan of a document page. It is heavily distorted by a dense, repeating pattern of small, dark, irregular shapes, likely representing a heavily degraded or corrupted scan. The pattern consists of numerous small, dark, irregular shapes, possibly representing noise or a specific type of corruption. The overall appearance is that of a document page that has been severely damaged or corrupted, with the original content being almost entirely obscured by the pattern. The pattern is most prominent in the center and right side of the page, while the left side shows some faint, vertical lines that might be remnants of the original text or structure. The overall effect is one of extreme visual noise and distortion, making the original content impossible to discern.

The image shows a document page that has been severely distorted by a grid-like pattern, likely a scanning artifact or a watermark. The text is illegible due to the distortion. The pattern consists of a dense grid of small, dark, rectangular marks that overlap and obscure the original content. The overall appearance is that of a corrupted or heavily processed scan of a document.

perph geld onchen.

perph geld onchen. The text on this page is a dense, handwritten list of names or words, likely a catalog or inventory, written in a cursive script. The text is arranged in a grid-like pattern, with approximately 20 columns and 20 rows of entries. The entries are written in a cursive script, and the overall layout is organized and systematic.

Ellaxor natoglan.

Ellaxor natoglan. The text on this page is a dense, handwritten list of names or words, likely a catalog or inventory, written in a cursive script. The text is arranged in a grid-like pattern, with approximately 20 columns and 20 rows of entries. The entries are written in a cursive script, and the overall layout is organized and systematic.

Rynh Zichzor Chalan.

A dense, repeating pattern of small, stylized, light-colored shapes (possibly letters or symbols) arranged in a grid-like fashion, resembling a textured background or a decorative border. The pattern is composed of various characters, including letters and numbers, which are scattered across the entire surface in a seemingly random but rhythmic arrangement. The overall effect is a complex, high-contrast texture that could be used for bookbinding, stationery, or as a background for text.

Yayger balpaoeh.

This image displays a large grid of 1000 small squares, arranged in 20 rows and 50 columns. Each square contains a random sequence of characters and symbols, including letters, numbers, and special characters. The grid is used for data encryption or storage, where each square represents a single data point or character in a larger message.

Car Kanal geldens.

Vio nilg onpho.

Toxhencol ylnorox ziborh.

[illegible]

Balvomp Chiphan.

[illegible]

Vingelg laxih parcan.

The image shows a document page that has been rotated 90 degrees clockwise. The page is filled with dense, illegible text, which appears to be a form or a list. The text is oriented vertically on the page, and the overall appearance is that of a scanned document with high contrast and some noise. The text is too small and rotated to be read.

Zyda Vig Pancar!

[illegible]

Dexvng chirony gavy.

Qnabazed vil pvdar.

A dense, repeating pattern of small, stylized, light-colored geometric shapes (possibly triangles or diamonds) arranged in a grid-like fashion, creating a textured, woven appearance. The pattern is composed of many small, interconnected units that form a larger, repeating motif.

Xanpa Phaphingeth.

The image displays a highly magnified view of a document page, showing a dense grid of small, repeating text fragments. The text is too small to be legible, appearing as a series of tiny, overlapping characters and words. The overall pattern suggests a microfilm or a very high-resolution scan of a printed document.

Ronlox baprabap orh.

A large, dense grid of small, stylized, black and white characters, resembling a complex pattern or a highly stylized text. The characters are arranged in a regular, repeating pattern across the entire page.

Calbahkah Genrox.

Calbahkah Genrox. This page contains a large block of text written in a highly stylized, cursive script, likely a form of shorthand or a specific dialect. The text is arranged in approximately 20 horizontal lines, filling most of the page area. The script is dense and difficult to decipher without a key.

Dohynam gethgoi axah.

Dohynam gethgoi axah. This page contains a large block of text written in a highly stylized, cursive script, similar to the one on the previous page. The text is arranged in approximately 20 horizontal lines, filling most of the page area. The script is dense and difficult to decipher without a key.

Vantavong nargax.

Handwritten text in a dense, cursive script, likely a form of shorthand or a specific dialect. The text is arranged in approximately 20 horizontal lines across the page.

Pilgao ner gisch.

Handwritten text in a dense, cursive script, likely a form of shorthand or a specific dialect. The text is arranged in approximately 20 horizontal lines across the page.

Archi seph lorox.

[illegible]

44

[illegible]

Handwritten text in a cursive script, likely a ledger or account book. The text is organized into columns by vertical lines. The first column on the left contains numbers, possibly dates or page numbers. The subsequent columns contain descriptive text and numerical entries. The handwriting is somewhat faded and difficult to decipher in many places. The page is numbered 43 in the top right corner.

3^d Table.

The image shows a page from a manuscript containing a large grid of handwritten letters, likely a cipher or a codebook. The grid is organized into rows and columns, with each cell containing a single letter. The letters are written in a cursive script, typical of the early modern period. The grid is divided into several sections by vertical lines, suggesting different parts of the code or different alphabets. The overall appearance is that of a historical document, possibly related to cryptography or linguistics.

Here Tables follow
The Book of Ench

[illegible]

The Preface of John Michael falling to the Reason. 1705.
There are very many things which induce me to write this little
more exactly of our Philosophy, whose Palace we publish, and
filled with certain new remarks, & as much as is possible
would permit, to set forth something also concerning
his way of Life & his studies, in a scarce and as yet
unpublished manner in Germany. For neither do I believe
they are to be reckoned in who doubt of both, & utterly deny
if there are any such, as many as Philothesius (whether
it be a true or a false name), & also his Machine
as they call it, to be reputed Imaginary. Whether or not
I will not now seriously dispute, because it easily or strongly
settles with its own Folly, & will not approve it
in itself, & in the Chymical Affairs whose glorious names
are every where to be seen, why we should doubt of it for
I could more fitly say any true & real cause, than
think they will grant, that those writings are honest
but under the name of Philothesius, or acknowledge
themselves, & that of some sort of writing, in the same way of
proceeding to imitate it some part of. Do easily convince.
There are therefore some amongst us, who are
papers of rain, & some are hard writing, & some of them
gathered from papers of this Authors own hand writing, & if
you have reason in his direction, he is rather to be esteemed
French than British: They think was therefore done, &
he might set much more securely by his in France, since it
is certain, I think not by any state of the world, of which
any are in a very good condition, & all most of them
y^e punishment to be given, & the punishment much more
of y^e low condition who endeavour to maintain it
by long Tyranny to y^e selves, & to y^e Country, & by
y^e birth of y^e higher Parents, but better instructed in
kill of y^e French Language, so that he therein improve
his chief writings, & y^e Language to Divines, have pub-
lished under his name, written in y^e Latin Language, &
to be altogether taken for translations. But who first
put his Books into y^e English Language is more a curiosity
to be known, than certain & easy to tell. For as concerning
this Entrance in y^e Court Palace of y^e King

because of most experts we are to judge otherwise
because of most experienced. After it took a second
to correct it. I remember it with new observations
found therefore while I stay in England from men of his
probability, & of Philalethes, (whether it be a real or a
borrow Name) had an intercourse by letters with very
many English wth whether he be himself, or by others
not to y^e purpose to know. This is confirmation of my
opinion, if I describe to me to relate of y^e Fimus
boy and correspondence with him by letters in several
ways maintained a friendship. It happened once y^e ~~some~~ ^{by chance}
learned it so was written by y^e scholar of an Academy, who
was afterwards in chains in France, ~~when~~ he when he
had in Mr Boyle's presence, turned out into G^o, being after
examined whether he were Philalethes, affirmed y^e he
now is private in France. Upon hearing with news, he desired
to see this man some other in manner, as occasion
came to be transmitted in Paris that, but being in his
~~inimities~~ prevented in his journey by y^e fall
of y^e horse, he rode upon, being thrown to y^e ground
by y^e fall, received wounds & so by an unhappy mis-
adventure extinguished y^e hope carrying y^e answer to
Philalethes. But there are still more things wth seem
to give light to this very obscure business. For it
is certainly known to all who affect with any care
of natural things, y^e there dy^e lately at London a
certain Apothecary ~~and~~ very skillful in y^e Chymicall
Art, Starkey by name a man come to myriums e-
nough wth his writings wth I shall hereafter men-
tion doe abundantly testify. Of this man therefore there
is a great report, confirmed also by y^e opinion of y^e re-
puted y^e learned wth are now in London
most famous Mr Boyle himself, y^e he was an American
as being born in New-England, where having had y^e
opportunity he had attained to a more intimate friend-
ship wth Philalethes wth was so great y^e Philalethes
more than once came into his Chymicall Shop, & not

set one should y^e most exquisite experiments of his Art,
wth even assisted in Starkey as a gift some pieces of
Gold: wth wth when he live splendidly, perhaps as it
happens every arising he become suspected to Philalethes
as if he had intercepted some of his Secrets & unreason-
ably divulged y^e it was at length deserted by him. Wth
cause move Starkey he pass into Europe, then fore arriv-
ing at London, he soon showed some proof of y^e ^{discovery}
Chymicall experiments, wth it either was Philalethes
or wth he obtained himself, by other means. That it is
not to be omitted y^e Starkey published many things wth
rankly agree with our Master's opinions, & are at least
derived from his fields. More properly from his own
And he more than once affirmed y^e he both saw Philale-
thes & maintained a sincere friendship with him, it is
this one thing unhappy y^e he lived high, & neglected
his household affairs, he underwent a great loss in his
estate & so y^e they say, perished miserably. This in y^e
men which is certain, y^e best sellers near y^e ~~confess~~
Truth, who printed Philalethes's works, now confess
y^e Truth, where they receive loose Books, or in wth lan-
guage they were writ, this dispute might easily be en-
d: in y^e first place I must publish y^e name William
Cooper a London Bookseller, who took care to print many
things of this Author: But Longinus & Birring also were
not ignorant whence they got those manuscripts & un-
der wth name they were delivered to y^e world. There are
warning is to be given, y^e many things have been long
reputed y^e learned wth are now in London
attributed to Philalethes, such perhaps as y^e exposition
of Flamel, Artophila & Sordivogus, of wth I have will
on occasion to give warning in another place. It will
now be convenient to give add a Catalogue of
Books set forth by y^e Starkey, whether at last he
were y^e servant or y^e companion & friend of our

By Venus, in by Philadelphos himself; of which
hills we must be sorry if many scarce come to
our hands, many also are written only in English
tongue. These indeed Starke chiefly considered himself
A vindication of the work & Pyrotechny compo-
sed in English Tongue. But more of this I have
have come to our hands, to rehearse here if number
whereof, we believe will not be ^{found} ~~unprofitable~~ ^{unprofitable} ~~unprofitable~~ ^{unprofitable}
to thee, kind Reader, nor troublesome. Namely these
following are for the most part, monuments of his
ingenuity which came to our knowledge.

Pyrotechnia.

- a. tho its Gownells be p^ld with y^e sense of Nature taken away
for Natures sense being taken away. 48
- b. By this therefore is augmented & nourish^d w^hever is augmented
is nourish^d: by y^e excubation of y^e radicall moisture our Stone
is nourish^d & augmented, of w^h he speaks in his Codi^c all in y^e
Ch: of y^e Vertues & y^e doctrine by w^h error is corrected, & of y^e
excubation of it he speaks in his Prach^t.
- c. for this call y^e Nature, y^e Medium, & y^e Stone, & Mercury,
& arsenick &c.
- d. is y^e y^e humid Air in y^e substance of y^e be ^{spiritually} recei-
ved, untill &c.
- e. if w^h is digested by y^e naturall heat may be totally dissol-
ved into water.
- f. And therefore if you would dissolve y^e frigidty of argen-
tine, ~~that~~ you coagulate it y^e more.
- g. as much as it is carryd into Water, with its mercuriall
dissolved parts.
- h. Whence there never is a passing from one extremity to a
rather or one contrary to another, not by a determinate
disposition, nor is this &c.
- k. & rectify y^e dry of y^e not & y^e moist (by making ^{humid} ~~humid~~ ^{humid} ~~humid~~ ^{humid})
& you will have y^e Air into a Vapour. Because y^e Air is
spiritually intercepted in y^e matter of Gold & of other
mixt things. But our compounded matter after &c.
- l. Not by fire, but by a wonderfull Vertue.
- m. it follows y^e proper Nature of a metall, because y^e matter
is y^e Nature of a Metall. For this is calld sulphur & it is
a saucy & moist.
- n. in a fourfold proportion, & Luna in a double propor-
tion because it is colder than Sol.
- o. For Luna tho according to all, it be calld in y^e second,
yet it is in y^e third Degree.

P. And therefore y^e Earth of Sulphur is prepared with our Arsenick, as Arsenick with our Sulphur (our Arsenick, y^e Earth of Luna: Sulphur y^e Earth of Gold) But y^e composition of Sulphur is y^t if it be voyd with its Oyl (y^e is Air) with &c.

Q. in a humid Balneo Mariae. plegmatick, preservative & putrefactive with its &c.

R. of y^e infant, f^r is after y^e sublimation of y^e Sulphur y^t y^e best Mess may be given to it, being with all its substance, y^t y^e weak body may be more &c.

S. For our Stone is a simple Body, w^{ch} receives y^e form of each thing w^{ch} is joyned to it.

BRITISH MUSEUM PHOTOGRAPHIC SERVICE, LONDON

A — I did so dividing it first into 4 parts, & then every one of them into 10.

A — He called one by name Semiel, One came in & knuckled down, and great fire came out of his mouth. Michael said. To him are the mysteries of these Tables known. Michael said, Semiel (again) & by & by he answered, O God thou hast said, & thou livest for ever: So Semiel stood up, & flaming fire came out of his mouth, & then he said as followeth

Semiel — Mighty Lord; what wouldst thou wth the Tables,

Michael — It is the will of God thou fetch them hither.

Sem — I am his Table, Behold, these are his Tables, so where they are.

A — There came in 40 white brethren, all in white silk long Robes; And they like children. And all they falling on their knees said, Thou only art holy among the Highest: O God, thy Name be blessed for ever.

A — Michael stood up out of his Chair; & by & by, all his Leggs, to be like two Pillars of Brass; and he as high, as half way to Heaven: And by & by his sword was all on fire. And he shook or drew his sword over all these 40 their heads. The earth quaked, And the 40 fell down. And Michael, Semiel with a thundering voice; and said, Declare the mysteries of the living God; our God: of One that liveth for ever.

Michael
1502. ellan
19.

Sem.

Sem — I am ready.

A — Michael stroke over them with his sword; & they all fell down (and Uriel also) on his knees. And commonly at the striking with the sword, flaming fire, like lightning, did flash withall.

Mich — Note, here is a mystery.

A — Then stepped forth, One of the 40. from the rest: & opened his Chest, which was covered with silk, and there appeared a great T all of gold,

Mi — Note this Number — A — over the T, stood the Number of 4. on this fashion T.

A — The 40 all cry'd, It liveth, & multiplieth for ever: Blessed be his Name.

A — That creature did shut up his Beams, & vanished away like thin.

Mi — Place that in the first place: It is the Name of God.

A — Then there seemed a great clap of Thunder to be:

And so forth: And note that the whole second Book, is nothing else but the mysteries most Marvellous of Sigillum Dei; otherwise called Sigillum F. m. e. t. h. whereof here, I did but leave a little admonishment.

Note further; Almost all the Third Book, was of the 7 Ensigns of Creation, whereof mention was here before made.

A — The Chair was brought in again; and I asked, what it meant:

Uriel —

Some Number

II,
or
E

April 29.
1543.

Dignification.

Therein they are all comprehended: saving
certain letters, which are not to be put in here:
By reason that the King's & Princes doe spring
from God: And not God from the King and
Princes. Which excellency is comprehended,
& is also manifest, in that Third & Fourth number
Round about the sides ~~of the square Table~~ ^{of the square Table} is every letter of the 14 Names
of the 7 King's and Princes.

Whereafter shall you perceive, that the glory of
this Table, surmounteth the glory of the Sun.
All things of that appertain unto it, are all
ready prescribed, by your former Instruction.
God is the beginning of all things, but not after
one sort: Not in every one alike. But it is in
three manner of works, with his name.

- The first, in respect of Dignification.
- The second in respect of Conciliation.
- The Third, in respect of the End and
determined Operation.

Now I. to what end would you weave your
Character? But how doe I teach? The
Character is an Instrument applicable only to
Dignification. But there is no Dignification
(as yet) but that which doth proceed, hath his
perfect composition (entirely, in the square
Number of 3 and 4. The letter whereof
shall be equal to the greatest. Hereby you
may gather, Not only to what end, the
Character (where with thou shalt be dignified)
is prepared: But also the Nature of all
other Characters.

To

To the second, — A — Conciliation you mean.
It — The Table is an Instrument of Conciliation,
And so are the 7 other Characters, which you call by the
Name of Tables: Squared out into the forme of
Tables: which are proper to every King & Prince, as
according to their Order.

Now to the last — A — Also concerning the End &
determined Operation — It — It consisteth in
the Mercy of God & the Characters of the Book, &c.
Set downe the King's & their Princes, in a Table,
as thou knowest them, with their letters backward
(Excepting their Names) from the right hand to the
left. Let Bobogel be the first, & Bornego his
Prince, &c.

A. Note,

A — So on my Character or Language of Signi-
fication are all the Names of the 7 King's & of
the 7 Princes, perfectly as in the great Table.
(called often times Mensa federis) the Names only,
being the first letter common to them all) kept
back in memory.

De sigillis H. m. t. h. ad vocato Sigillo Pr.

Michael — I will show thee in the mighty hand and
Strength of God, what his Chymeries are:
The true picture of his Affinity: comprehending
all vertues: The whole & sacred Trinity. Oh
holy be he: Oh Holy be he: Oh Holy be he.

A — Brief answered, Amen.

Mich — Now what wilt thou? A — I would
full sayne proceed according to the matter in hand.

Mich — Divide this outward picture into 40 equal
parts, whose greatest Numbers are 4. See thou doe
it presently.

Conciliation

Note here, it
may appear, that
Bornego is
Prince to Borne-
per, & Borne-
per to King
Borneper.

Michael,
1542. Mar. 19.

Uziel, 1503.
May 5.

The 4 feet of the Table, must have 4 hollow things, of sweete Wood, whereupon they must stand. Within the hollownesth thereof, the scales may be kept & preserved. One month is all for the use thereof. The silke must be of divers colours: the most changeable that can be gotten. for who is able to behold the glory of the seat of God.

codem tempore
quo supra.

Δ The character or Language for me was noted (Cl: 1502. November) that it should contain some taken of my Name: And now in this, is accounted the true Character, of dignification, & perfection, no peculiar character or Letters of my Name.

Uziel — The Form, in every corner, ~~considereth~~ considereth thy Name — Δ — you mean there be a certaine shadow of Delta — Uziel — will.

Δ — What is the use of the 7 Tables (like Armes) & from what ground are they framed, or derived?

Uziel — They are the Ensignes of the ^{ion} Greatness, wherewith all they were created by God: known only by their acquaintance, & the manner of their doing.

Δ — Have I rightly applied the daies to the Knight's name, in the other circumference of the great Circle or Globe?

Uziel — The daies are rightly applied to the Knight.

Δ — The Characters & Words, annexed to the Knight's name, in the other circumference of the great Circle or Globe, how are they to be used?

Uziel — They are to be painted on sweete wood.

And

11 Apr:
20 1503.

And so to be held in thy hand, as thou shalt have cause to use them.

Sigillum Emeth, is to be set in the middle of the Table.

Grace, Mercy & Peace, be unto the lively branches of his flourishing Kingdom. And strong art thou in thy glory, which ~~didst~~ ^{doest} outwit the secret parts of thy lively workmanship: and that, before the weak understanding of man. Herein is thy power & magnificence opened unto Man. And why? because thy divinity & secret power, is here shut up in numero Ternario, & Quaternario: A quo principium, et fundamentum omne hujus est tui sanctissimi Spiritus.

For if thou (O God) be wonderful & incomprehensible in thine own substance, it must needs follow, that thy Works are likewise incomprehensible.

But so, they shall now be true, because they see, which heretofore, could scarcely believe. Strong is the Influence of thy supereminent power, and mighty is the force of that Omnipotence, which overcometh all things. Let all power therefore rest in thee. Amen.

Write out the Names of the 7 names of the 7 Kings, and 7 Princes, And place them in a Table divided by 12, and 7. The 7 spaces being uppermost. And therein write in the upper Line, the Letters of the King, with the Letters of his Prince, following next after his Name. And so of the six other, & their Princes, and read them on the right hand, from the upper part to the lowest. And thou shalt find, then, the Composition of this Table.

11 April: 20,
1503.

11, the first of
the 7 sons of
Light.
April: 20,
1503.

11, the living
& sempre ad-
herent Minister
to St. Baligon
& his name is
expressed in his
Character, vide
Job: 21. an?
1502.

Prince
Hagonel.
Novemb. 16.

I have spoken of it. Note it thoroughly. They are my servants. By them thou shalt work Marvails. My time is yet to come. The Operation of the Earth is subject to my power. I am the first of the twelve. My Seal is called Barred: and here it is.

P. Hagonel.
codem hagonel

In his Name with my Name, by my Charachid, & the rest of my Ministers, are these things brought to pass,

1. These that be here are Witches, Enchanters, Deceivers & Blasphemers. And finally all they, that of Nature with Abuse: and dishonor him w^h reigneth for ever.
2. The second Assembly were the Governours of the Earth, whose Glory if they be good, the Weapons w^h we have taught them will augment: And consequently (if they be evil) will pervert.
3. The Third Assembly are those, w^h taste of Gods Mysteries, and drink of the Juice of Nature: whose minds are divided. Some with eyes looking towards Heaven, the rest to the Center of the Earth: Vbi non Gloria, nec Bonitas, nec Bonum est.
It is wrought (I say) it is wrought (for thy understanding) by the chosen of the Heaven, w^h were the Sons of Omnipotency, whose Names thou hast written, and recorded to Gods Glory.

A Note.

Prince Butmo-
no said this:
but the Office is
under King
Bnaspol, who
Prince is Blessed.
The Mystery of this
I know not yet:
but Blessed will
be found to be the
proper Minister of
King Bnaspol.
vide A. 1502, May
5. of the making of
Mensa Ladens,
& of my Golden
Lamp.

Clarke this: All spirits inhabiting within the Earth; where their habitation is of force, not of will: I except the Myddest of my selfe, w^h I know not are subject to the power here. [pointing to his Seal] with this you shall govern: with this you shall unlock: with this (in his Name who reigneth) you shall discover their Subtilties. Secondly the Ministers of his power are six: whose Names contain 7 letters apiece. Nothy Tabls do manifest.

When thou wilt work for any thing appertaining to the state of a good king, thou must call upon him, which is thine Prince.

By

By whomsoever in generally, or by any one of them in particularity: Thou shalt work for any intent or purpose. Also concerning the letters, particularly, they do concern the Names of 42. which 42 in generally, or one of them, do & can work, the destruction, hindrance or annoyance of the State, condition, or degree (as well for body as Government) of any wicked, or y^t living Prince, &c.

King Sarmara,
Novemb. 14.

Venito Bobogel, Rex et Princeps Nobilitatis:
Venito cum ministris: Venito inquam venito
cum Satellitibus tuis, munitis.

King Sarmara,
di. 17. Not.

[A Note for the forme of calling]

Veni Princeps y Principum, qui sunt. Equarum Principes: Ego sum Rex potius et mirabilis in Aguis; cuius potestas est aquarum vicarius.
Venito veni inquam. Adesto. Veni Rex. O Rex Rex, Rex, Aquarum. Venito. Venito inquam. Adesto. Magna est tua, et major autem mea potestas.
Vitam dedit Deus omnibus creaturis. Venito. Veni ignis: Veni vita mortalium inquam venito. Adestum. Regnat Deus, O Venito. Nam unus ille, Regnat, et est vita viventium.
Venito, vbi, nulla quies sed strepsus dentium.
Venito vos, qui sub meo estis potestate.
Behold, every one of these Princes must have his peculiar Table.

Thy Charachy must have the Names of the four Angels written in the midst of Sigillum Bmetn given upon the other side, in a Circle. In the midst whereof, must the Name be w^h was also brought wherewith thou shalt at all times, behold (providing to thy wife) the state of Gods People, through the whole Earth.

Viel, May
8. a. 1503.

Thi

Sigillum
Emeth.

Michael,
Early 15.
1^o 1502.

Mich — Note: Δ. Then he brought in the
scale, which he showed the other day: And opened
his sword: & had the Skier read: & he read —
E M E T H — Δ — Then the sword closed up
again: and Michael said — This I doe open
unto thee; because thou arrayedst at Sigillum
Dei, This is the Name of the Scale: which be-
lieved for ever. This is the Scale it selfe.
This is holy: This is pure: This is forever.
Amen.

As truly as I was with Salomon, so truly will I
be with thee, &c.
I was with Salomon, in all his Works & Wonders.
Use me, in the Name of God, for all Occasions

Chap: 3.

¶ Some Remembrances of the Furniture
and Circumstances necessary in the
Exercise Heptarchicall.

First cast thine Eye unto the Generall Prince
Governour or Angel, that is Principall in
this World, then place my Name whom
thou hast already: Then the Name of him
that was showed thee yesterday [with the
short Coat] Then his power, with the rest of
his six perfect Ministers. With these thou

King Armara
in the presence
of Michael,
Oct 1502.
Novemb: 17.

shalt

shalt worke to a good end. All the rest thou
maist use to Gods Glory. for every one of them
shall minister to thy Necessities.

Moreover, when thou workest, thy Feet must be
placed upon these Tables, w^{ch} thou wast written
last, comprehending 42. Letters & Names. But
with this consideration: that the first Character
(w^{ch} is the first of the γ in the former Book, be-
placed upon the top of the Table; w^{ch} thou wast, &
art, & shalt be commanded to have & use.
Last of all the Ring: w^{ch} was appointed thee: w^{ch}
the Lamyns comprehending the forms of thy own
Name: w^{ch} is to be made in perfect Table: as is
aforesaid.

The Table,

Ring,
Lamyns.

Even as God is just, his Judgments, true, his
offices unspeakable: So are we the true
messengers of God, and our words are true in his
charge for ever. Glory, & Glory be to thee, O
most high God.

So, thus thou seest the Glory of Gods creatures:
wherein thou maist see with the consideration of
the day, their King, their Prince & their Character:
The King & Prince govern for the whole day: The
rest according to the six parts of the day. Use
them to the Glory, Praise & Honor of him, which
created them, to the laude & Praise of his Majesty:

King Armara,
Novemb: 20.

The Characters of the Kings are in the Globe:
And of the Princes in the Heptagon.

King Armara,
Novemb: 21.

The Sons of men, and their Sons, are subject
unto my Commandment. This is a mystery.

+

Uriel, Apr.
23. A. 1503.

The Lord saith, I have hardened the heart of
One of you; Yea, I have hardened him, as thou
flynst, & burnt him together with the Oshes of
a Cedar. To the intent he may be proved Just
in my works: and great in the Strength of my
glory. Neither shall his mind consent to the
wickedness of Iniquity. For, from Iniquity I
have chosen him, to be a first Earthly witness
of my Dignities.

Michael his
manner of
apparition.

Δ. Uriel came again, & another with him.
& signly they two said together, Glorify God for
ever. And now Uriel stood behind, and the
other sat down in the Chair, with a sword in
his right hand. All his head glister'd like the
sun: the hair of his head was long, he had
Wings: and all his lower parts seemed to be
with Feathers. He had a Robe over his Body,
& a great light in his left hand, he said, We
are Blessed from the beginning,
and Blessed be the Name of God for ever.

Michael,
Marty 11.
A. 1502.

Δ. An innumerable company of Angels were
about him. And Uriel did knee on the square
Table by. He that sat in the Chair said then,

Go forward, God hath blessed thee;
I will be thy Guide.

Thou shalt attain unto thy teaching
The world begins with thy doings.

Praise God.

The Angels under my power shall be
at thy commandment.

Thou shalt see me.

I will be scene of thee.

I will direct thy living & conversation.
Put up thy hands.

Δ — Now

Δ — Now Michael thrust out his right Arm
with the sword: & bad the Stryer to look, Then
the sword did seeme to cleave in two, And a
great Fire flamed out of it vehemently.
Then he took a Ring out of the flamm of his
Sword: and gave it to Uriel, & said, The
Strength of God is unspeakable. Praised
be God for ever & ever.

Δ — Then Uriel did make journey to him.

Mich — After this sort must the Ring be: Note
it, &c. I will describe this Ring: which
revel'd since the death of Salomon. with
whome I was present: I was present with
him, in strength & mercy. So, this it is.
This it is, wherewith, All earthly & divine
works & wonders were wrought by SALOMON.
This it is, which I have revealed unto thee. This
it is, which Philosophers dreamt of.

This it is, which the Angels scarce know.

This it is, & blessed be his Name: yea his
name be blessed for ever, &c.

Δ — Then he layd the Ring downe upon the
Table: and said, Note. Δ — I noted
the manner of the Ring in all points.

Δ — After that he threw the Ring downe
upon the Table, and it seemed to fall through the Table.

Michael — So shall it doe at thy commandment:

Without this thou shalt doe nothing.

Blessed be his Name that compasseth all things:
Wonders are in him, & his Name is Wonderful.
His Name worketh Wonders from Generation to Generation.

Michael,
Marty 14.

The Ring.

Mich

cha =

el.

Nothing to be
done without
the Ring.

Mich —

King Armara,
Novemb. 20.

So, thou dost see the glory of Gods creatures:
whom thou maist see, with the consideration
of the day, their King, their Prince & their Character:
The King & Prince govern for the whole day: the rest
according to the six parts of the day. Use them to
the glory, praise & honor of him, who created them,
to the laude & praise of his Ma^{ty}.

King Byngsor
die 20. Novemb.

Write this reverently. Note it with submission.
What I speak hath not been revealed: no not in
these last times of the second last world, &c:
Thou shalt work marvellous marvellously by
my workmanship in the highest.

King Braspol,
die 20. Novemb.

Unto my Prince (my Subject) are delivered
the Keyes of the Mysteries of the Earth: All those
are Angels that govern under him: &c: Use
them; they are, & shall be, at thy commandment.

King Braspen
die 20. Novemb.

By me, thou shalt cast out the power of wicked
spirits. By me, Thou shalt know the devils and
practises of wicked evil men, And more than
may be spoken or uttered to man.

Quantum est hois infirmitas et corruptio,
qui Angelis, idq suis bonis, fidem autem Deo vix
habet: Via mundana facies, mundi corruptiones
in se habent. Deus nr, Deus nr, Deus (inquam)
ille nr, Verus cum veris suis Angelis, eiq servi-
entibus, semper verus est.

King Armara,
21. Novemb.

Pete qua vis. Dixi: et quod dixi, Obumbratu
est veritate, justitia, et perfectione.
Ecco ——— holding up the meat rod:
hic ——— pointing to the end of the rod:
per hoc ——— pointing to the middle of it.

Et a mensura fine, nos, namq mensurabis &
potestatem. Age (ing) Quid vis: Obscurum
enim Nihil est, quod per illum recepisti.

One thing is yet wanting: a most Receptacle.
There is yet wanting a Stone &c: One there is
most excellent: hid in the secret of the depth, &c:
in the uttermost part of the Roman possession, &c:
So, the mighty hand of God is upon thee, &c:
Thou shalt prevail with it, with Kingo; and
with all creatures of the world: whose beauty (in
virtue) shall be more worth than the Kingdoms of
the Earth &c: Go towards it, & take it up, &c: Keep
it secret. Let no mortall hand touch it but thy own.

Thy Character must have the Names of the ^{five} ~~four~~
Angels (written in the midst of Sigillum & meth)
graven upon the other side in a square, in the midst
whereof must the Stone be (which was also brought)
Wherewith Thou shalt at all times behold (privately
to thy self) the State of Gods people, through the whole
world.

Go & thou shalt receive, Tarry & you shall receive.
Sharp & you shall see. But watch & your eyes shall be
fully opened. One thing which is the ground &
element of ~~the~~ desire is already perfected, &c: as
Out of Heaven, Thou hast been instructed (of the
lesser part) most perfectly.

All these before spoken of, are subject to thy will.
Of friendship at any time, thou maist see them: &
know what thou wilt.

Every one (to be short) shall at all times and
seasons, show thee direction in any thing &c:
One thing I answer thee for all Offices. Thou hast
in subjection all Offices. Use them when it pleaseth thee
and as thy Instruction hath been.

The
Receptacle:

King Armara,
Novemb. 21.

Al: 1503. May 5.
Il, cuius nom
est prince filio
Lucio: & ponitur
in Character ipse
Basilien sine
Armara Regis.

Raphael,
May 26.
Al: 1503.

God lastly, and of his great mercies granted unto thee. I have answered thy doubting minde. Thou shalt be gladd, yea filled, yea thou shalt swell and be puffed up, with the perfect knowledge of Gods mysteries in his Mercies. Abuse them not. Be faithfull: use mercy: God shall enrich thee: & Banish Wrath: It was the first and the greatest Commandment. I Raigne by him, & live by him, & which reigneth & liveth for ever.

* Annael gave me that commandment: as is said in the Preface as it were of all things Creation.

King Armara, Dec 19. Nov. I have showed thee perfectly: Behold I teach thee againe. How mercifull is God, that revealeth so great Secrets to flesh & blood? Thou hast 42 Letters. Thy Tables last, containe so many. &c.

King Armara, 10th Temp. When thou wilt worke for any thing apperteyning to the estate of a good King, Thou must first call upon him, who is thine Prince. Secondly the Ministers of his power are six. &c.

King Armara, 10th Temp. In outward sense my words are true: I speake now of the use of one of the first, that I speake of, or manifested yesterday. Said I not, & showed I not, what the Government of Princes. for as it is a mystery to farder matter, so is it a purpose to a present use. If it Rule worldly Princes; How much more shall it worke with the Princes of Creation? Thou desirest use, I teach thee use. And yet the Art is to be farder understanding of all Sciences, that are present, or yet to come. For it hath farder use, then only in the eating: Gold his farder condition, of pure and quality, then in melting or coman use. & Kings there are in Nature, with Nature and above Nature. Thou art Dignified, &c.

Last

Last of all thy Ring, which was appointed thee; with the Lamyne comprehending the forme of thy owne Name, which is to be made in perfect Gold, as is aforesaid.

The Ring.
King Armara, redemption.

Thou shalt be comforted; But respect the world to come; whereunto thou art provided; and for what end; and that in what time. Serve God truly, Serve him iustly. Great care is to be had with those that medle with Princes Affairs: Much more consideration with whom, thou shalt medle or use any practice. But God hath shadowed thee from destruction; He preserveth his faithfull, & shadoweth the just, with a shield of Honor. None shall enter into the knowledge of these mysteries with thee, but thine worker. Thy estate with the Prince (now reigning) shall shortly be amended: His favour increased, with the good wills of divers, that are now decayed. Thy hand shall shortly be thine helpe: and thou shalt doe wonderfull and many benefittes (to the Augmenting of Gods glory) for thy Country. Finally, God doth enrich thee with knowledge, & thy selfe hath given thee understanding of these worldly vanities. He is mercifull, & will his good creatures neither haue, doe, nor will forgett thee. God doth bless you both: whose Mercy, Goodness, & Grace, I pronounce & utter upon you. I have said.

King Armara, redemption.

Dec, Dec, I etc, at length but not too late.

King Bobegil, Novemb: 19.

[A Note, King Bobegil, said this of my attaining such Mysteries, as the Ministers under him made shew of]

So

King Parmara,
Novemb. 19. 88
King Bokogel
his princely
Ministers.

What doth the Heaven behold, or the Earth contain,
that is not, or may be subdued, formed & made,
by thee? what Learning grounded upon Wisdom,
with the excellencies in Nature, cannot they
manifest?

One in Heaven they know:

One, & all in Man they know:

One, & all in Earth they know.

Measure Heaven by a part (my meaning is by
these few) let God be glorified, his Name praised,
his Creation well taken, & his creatures well used.

As that standeth in the midst of the Globe
signifieth Nature: Whereupon, in the first point,
is the use & practice of this work. That is to say,
as concerning the first part, for it is said: The
Books containeth Three kinds of Knowledge.

The knowledge of God truly.

The Number & Seng of his Angels perfectly.

The beginning & ending of Nature Substantially.

Uriel.
May 5.
1513.

Chap. 2.

If John Doe, his principall, and in
manner peculiar Interest, to exercise
the Doctrine Heptarchicall.

Ol. 1512.
Uriel, Nov.
15.

Michael.

Ultima est hac etas vna, qua tibi revelata
erit:

The mysteries of God have a hymn: And Behold,
Thou art provided for that hymn.

The sons of ^{light} men, and their clowes, are subject unto

my

my commandment: This is a mystery, I have
spoken of it: Note it thoroughly: They are my
Servants: By them, Thou shalt work Marvailes.

There are Kings, false & unist, whose power as I
have augmented & destroyed, so shalt Thou.

The second Assembly were the Governours of the Earth:
whose Glory (if they be good) the Weapons we have
taught them, will augment: and, consequently (if they
be evilly) pervert.

I am Bornogo; This is my Seal: This my true
Character. What thou desirest me, shall be fulfilled,
Glory to God. Behold, Behold, Behold my mighty
power consisteth in this. Learn Wisdom by my
words. This is wrought for thy edification, what I
instruct thee from God. Look unto thy charge truly:
Thou art yet dead. Thou shalt be revived. But oh
blessed God truly. The Blessing that God giveth me,
I will bestow upon thee by permission. I have mighty
is our God: which walked on the waters; & sealed
me with his Name; whose glory is without end.
Thou hast written me, but yet dost not know me.
Use me in the Name of God: I shall at the time
appointed be ready. I will manifest the works
of the Seas: and the Miracles of the Sun, shall be
known.

Behold, thou desirest, and art sick with desire: I
am the Dispenser, though not the Composer of Gods
Medicines. Thou desirest to be comforted & strengthened
in thy Labours: I minister unto thee, Strength of
God. What I say, is not of my selfe: Neither that
which is said to me, is of themselves: But it is said
of him which liveth for ever: These mysteries hath

King Parmara,
The 19. Novemb.

God

King Armara.
Novemb: 19.

This worke shall have relation to tyme present and present use. To mysteries far exceeding it: And finally to a purpose & Intent: whereby the Majesty & name of God, shall & may, and, of force, must appear, with the apparition of his Wonders and Marvailes yet unheard of. Dixi.

A. Note, Cloellichael & Uriel, at the beginning of these revealed mysteries were present & gave Authority to Armara, to order the whole Hystarchicall Revelation: so, at the conclusion, they appeared againe, & Raphael with them: And ellichael concludes the second Book (of this particular Revelation - Hystarchicall) with these words following.

Michael.
Novemb: 19.

Blessed be our God, & glorious in his Name, which with his creatures, according to his own secret Judgment. This Clot is the first part of a threefold Clot, joining often (with the knowledge of the world, the Government of his creatures, & the sight of his Majesty) unto him: (O I say unto him) which strength, medicine, and mercy to those that fear him. Amen.

King Armara.
Nov: 21 in the
Appendix of
second Book.

Thou hast a Worke of three proportions in Essence of Heaven in forme, which (if it seepe) divided by a Number Septinarius. Of the source, Estate, & Determination of things Above, things Next, & things Below, which if it seepe, is pure, perfect, & without blemish. &c.

King Armara
Novemb: 21.

O God, how easie is this first understanding. Thou hast been told perfectly, plainly & absolutely, Not only, the condition, Signities, & Estate of all things that God hath framed: But also, withall, thou wast delivered the most perfect forme & use of them, &c.

King Armara
Novemb: 17.

Even as God is just, his Judgment is true, his Mercies unspeakable: So are we the true Messengers

of God, and our words are true in his Mercy for ever. Glory. (O Glory) be to thee, O most high God.

Now you touch the world, & the things upon Earth. Now we shew unto you the lower world. The x Governours that worke & rule under God. By whom you may have power, to worke such things as shall be to Gods Glory, profit of yo: Country, & the knowledge of his creatures, &c. He proceeds to One God, One knowledge, One Operation. Venite filii, Behold these Tables: Herein by their Names, that worke under God upon Earth: Not of the wicked, but of the Angels of Light. The whole Government doth consist in the hand of 49 (in God his Power, strength, mercy & Justice) whose Names are here evident, excellent & glorious. Marke these Tables, Marke them, Record them to your comfort. This is the first knowledge. Here shall you have wisdom Halleluiah. Mighty & Omnipotent art thou, O God, God God, Amongst thy creatures. Thou fillest all things, with thy excellent foresight. Thy Glory be amongst us, for ever. A. Amen.

Michael
Aprilis 29.
a. 1502.
49.

The Fontaine of Wisdom is opened, Nature shall be knowne. Earth with her secrets disclosed. The Elements with their powers indged. &c.

Uriel.

Behold, I teach: There are 49 Angels, glorious & excellent, appointed for the Government of all earthly Actions: which 49 doe worke & execute the will of the Creator: Committed from the beginning, in strength, power, & glory. These shall be subject unto you. In the Name, & by Intreating upon the Name of God, who doth lighten, direct, and comfort you, &c.

Uriel,
Aprilis 29.
a. 1502.

¶ *¶* This is a Seate of perfection: from which,
 Things shall be shewed unto thee, which thou hast
long desired.

¶ Then was a square Table brought into the Stone,
 and I demanded what that Table betokened.

¶ I told thee not yet to be knowne. These two
 shall remaine in the Stone, to the sight of all
 vncircumcised creatures.

You must use a four square Table, Two cubits
 square, whereupon must be set *Sigillum Dei: Ie:*

This Seate must not be looked upon, without great
 Reuerence & Devotion.

This Seate is to be made of perfect wax.

This Seate must be 9 inches square [or Diameter]

The roundness must be 27 inches, & somewhat more.

The thickness of it must be an inch & halfe a quarter.

And a figure of a Cross must be on the back side of it,
 made thus

And Table is

to be made of sweete Wood: and 9 two cubits high,
 with 4 feet with 4 of the former scales under the
 4 feet.

Under the Table did seeme to be layd red Silke,
 two yards square. And over the Seate, did
 seeme to be layd red silke to be a four square,

broader then the Table, hanging downe with 4
 Angles or Tassels, at the 4 corners thereof.

Upon this uppermost red Silke, did seeme this
 Stone with the Frame, to be set right over &
 upon the principall Seate: saying that the red
 Silke was betwene the one & the other.

¶ Now 21. An: 1592. There apper the first Table covered with a cloth of
 silke changeable yellow, red & green, with a white
 cloth under it all hanging very low.

Then
 Chap.

Chap: 4.

Some notice of peculiar formes, and attire, wherein, the Kings, Princes and Ministers Heptarchicall appeared: and of some their Actions & gestures at their appearance, &c.

King CARMARA.

This King (being called first by Vriels) appeared as a man, very well proportioned: clad in a long purple Robe, & with a triple Crowne of Gold upon his head.

At his first coming he had 7 (like men) waiting on him: which afterwards declared themselves to be the 7 Princes Heptarchicall.

Vriels ~~delivered~~ ^{delivered} unto this King (at his first appearance) a rod, or straight little round staff of Gold: divided into three equall distinctions, whereof two were carke or black: & the third bright red. This Rod he kept still in his hand.

This King was the Orderer, or Disposer, of all the Doctrines, w^{ch} I term Heptarchicall, as first, by calling the 7 Princes, & after that the 7 Kings: and by giving instructions for use & practice of the whole Doctrines Heptarchicall: for the first purpose & purpose thereof to be engaged by me: of the two other, there was only mention made.

King CARMARA said
Ecce signum operis.

There appeared there two letters reversed &aversed on the white flag: a Roman standing by: whose name did not appear. On the other side appeared the name of England. Thus the flag was.

68

O IEOVA ZEBAOth, Divinam potentiam, Sapientiam,
et Bonitatem, enixissime Invoco et Imploro (Ego Joannes Deo,
Servulus tuus indignus) et mihi semper favorabilem, assisten-
tiam esse, humiliter, et fideliter peto: in omnibus meis factis,
verbis et cogitationibus, laudem, honorem et gloriam tuam, et
concurrentibus, promouentibus vel procurantibus: Et per
has 12. Mystica Nomina tua, ORO IBAN, AOZPI, MOR,
DIAI, HCTGA, OIP, TEAA, PDOCE, MPH,
ARSL, GATOL, Divinam et Omnipotentem
Majestatem tuam ardentissime Obtestor et Obsecro: Ut fideles
omnes tui Spiritus Angelici (quorum Mystica Nomina, hoc
libro continentur expressa, brevissimèq; notantur Officia,) in
quibuscumq; mundi partibus fuerint, et quocumq; posthac
tempore vita mea, à me (predicto Joanne) per privilegia
illius Dominantia, suae Imperantia Sanctae tuae Nomina (hoc
idem libro contenta) fuerint VOCATI, Ut citissime ad me
(predictum Joannem) Veniant: Visibiles affabiles, placidè
mihi appareant: ac mecum, iuxta voluntatem meam, et
visibiles morantur: et ut à me et ex aspectu meo, per me
rogati necdant: Et propter hoc, et illam quae tibi, in 12 illis
mysticis, supra expressis, Nominiibus, debent Reverentiam et
Obedientiam, Ut mihi etiam Joanni praefato amico ex
SATISFACIANT omni et quocumq; tempore vita mea,
In Omnibus et singulis, ad deo (Omnes, aliquos, vel aliquos
eorum) factis vel faciendis petitionibus meis, quibuscumq;
(ita, bene, plene, perfecte, praestandis perficiendis et complendis,
iuxta eorum virtutis, et potentias, tam generalis quam
proprias, proprias illis à te (O DEVS) iniuncta commissas
Officia et ministeria AMEN.

per te IESU CHRISTE,
AMEN

FRYDAY

BALIGON

Who canst distribute & bestow at pleasure, all, & whatsoever can be wrought in aeriell Actions. Who hast the government of thy selfe perfectly, as a Mystric knowne unto thy selfe. Who didst advertise me of this Stone, & hely Receipts: both needfull to be had: and also didst direct me to the taking of it up: being presently in a few minutes of tyme, brought to my sight (from the Secret of the South, where it was hid, in the uttermost part, of the Roman possession) Which Stone, thou warndest me, that no mortall hand but myne owne, should touch: & saydest unto me Thou shalt prevail with it, with Kings, & with all the creatures of the World. Whose Beauty (in vertue) shalbe more worth, then the Kingdomes of the Earth. For the which purpose, here rehearsed, & others: partly, now to be exercised and enjoyed, & partly hereafter, more abundantly (as thou Lord God of Hosts shall dispose) And also because thou thy selfe art Governour of thy Might, faithfull, and Obedient Ministers: Therefore In the Name &c.

At By Note, of the former show stone,

Basel Vriel sayd to me at Mortack 12: 1503. May 5. a meridi, circa horam 4^a, as followeth.

Ue:— The Character must haue the Names of the five Angells (written in the myddest of Sigilluric Emeth) graven upon the other side, in a circle: In the myddest whereof, must the stone be (which was also brought) Wherin thou shalt at all tymes conceale privately to thy selfe) the state of Gods people, through the whole Earth.

Prince
BAGENOL

SATURDAY

BNATSEN

Who saydest unto me, That by thee, I shall cast out the power of all wicked Spirits. And that by thee, I shall or may know the doings, and practises of evil men; & more than may be spoken or uttered to man. Therefore, In the Name &c.

Prince

BORGES

Who, being the Prince, chief Minister, & Governour under the right puissant King & BNATSEN, didst (to my Lere) appear in a most terrible manner, with fiery flaming streames, & saydest

Nou Januam Mortis. Et percussit Gloria Dei, Impiorum parietes.

Therefore, In the Name &c.

WEDDENS DAY.

King

BNASPOL

To whom the Earth with her Bowells, & secrets, what so ever are delivered: and hast said to me, heretofore, What thou art: There, I may know. Thou art great, but (as thou, truly dost confess) He in whom thou art, is greater than thou. Therefore, In the Name &c.

Prince

BLISDON

Unto whom the Keyes of the chysmeries of the Earth are delivered. Whose 42 chymists, are Angels, that governe under thee: All which thy mighty King BNASPOL, had me vnder and affirmed, that they are & shall be at my commandment. Therefore, In the Name &c.

King

THURSDAY.

King

BYNEPOR

Upon the distribution & participation of whose exalted most excellent & glorified power; in which only and dependeth, the generall state & condition of all things. Whose sanctification, glory & renowne, although it had beginning, yet can it not neither shall have ending. He that was with said and thou wast the end of his workmanship. Thou art like him, and of him: yet not as partaking or adherent, but distinct in one degree. When he came, Thou wast magnified by his coming: and art sanctified, Worlds without end.

Vita suprema,

Vita superior;

Vita Infima, tuis sunt mensurata manibus.

Notwithstanding,

Thou art not of thy selfe: Neither is thy power thine owne: Magnified be his Name. Thou art all: And all hath some being by thee: Yet thy power is nothing, in respect of his power which hath sent thee. Thou bringest a new world, new people, new kinge, & new knowledge of a new Government. And hast said to me, Thou shalt worke merveilous & heruallously, by my workmanship, in the highest: Therefore, In the Name &c.

Prince

BYRMONO

Who art life & breath in living creatures, All things live by thee: the Image of one created: At the beides of Beasts of the Earth, dost thou endure with life. Thy beate is thine glory. O God, thou art sanctified: And thou rejoicest the living, the end & beginning of all Beasts, thou knowest: and by sufferance thou disposeth them, on till thy wyll be runne. Therefore In the Name &c.

King

King
BLVMAZA.

Prince
BRAIGES

Who saidst, the creatures living in thy Dominion, are subject to thy own power, whose subjects are invisible, and whose forms appear like little smokes, without any form, whose Scale of Government is this, Who saidst, Behold, I am come, I will teach the ~~Nations~~ without Numbers, the creatures subject unto me shall be knowne unto you. Therefore, In the Name &c.

King

King

BABALEL

Who art King in Waters: Mighty & Wonderfull in Waters: Whose power is in the Bowels of the Waters, whose Royall person with thy noble Prince BEFAFES, & his 42 Ministers, the Triple crown King CARMARA had me use to the Glory, Praise & Honore (him), which created you all, to the Land & Praise of his Majesty. Therefore, In the Name &c.

Prince

BEFAFES

Who art Prince of the Seas: Thy Power is upon the Waters. Thou drownedst Pharaoh: and hast destroyed the Wicked. Thy Name was knowne to all ages. Thou livedst in Israel: Who hast measured the Waters: Who wast with King Salomon: and also long after that with ^{the} Scythians, but not knowne to him by thy true Name, except when thou preservedst me (through the Mercy of God) from the power of the Wicked, I wast with me in extremities. Thou wast with me throughly. Who, of the Egyptians, hast been called OBELISON, in respect of thy pleasant deliverance. And by that Name to me & knowne, and of me noted in Record, to be the Noble & courteous OBELISON. Whose noble Ministers 42 are of very great Power, Dignity & Authority. Now, some in the measuring of the Motion of the Waters, & saltness of the Seas, in giving good success in Battell, reducing Shippes, & all manner of Vessels that float upon the Seas. So some, all the Fishes, and Monsters of the Seas, yea, all that live therein, are well knowne. And generally are the Distributors of Gods Judgements upon the Waters, that cover the Earth. Other doe beautifie Nature in her composition. The rest are distributors & deliverers of the Treasures, and unknowne substances of the Seas. Thou O Noble Prince BEFAFES hadst me use than in the Name of G.C.D. Therefore, In the Name &c.

King

King
BOBOGEL.

Some recitall and contestation by the Peculier Offices, Words & Deeds, of the seaven Heptarchicall Kings, & Princes in their peculiar duties to be used. The Distributing, giving, & bestowing of Wisdom and Science: The teaching of true Philosophy, true understanding of all learning, grounded upon Wisdom: with the Excellencies in Nature: And of many other great mysteries, marvelously available & necessary to the advancing of the glory of our God & Father. And who saydest to me (in respect of these mysteries attaining) Dear Dear Dear, at length, but not too late: Therefore, In the Name &c.

Prince
BORNOGO

The Offering of the formation of Nature into perfection. The knowledge of ^{Metals} Minerals: And generally the princely Ministering to the right noble & mighty King BOBOGEL, in his Government of Distributing, giving & bestowing of Wisdom, Science, true Philosophy, & true Understanding of all learning, grounded upon Wisdom: and of other very many his peculiar Royall Properties. And who saydest to me, What thou desirest in me shall be fulfilled. Therefore, In the Name &c.

King
CARMARA

Who, in this Heptarchicall Section, at the first Urisil his hand, didst receive the golden Rod of Government, & Measuring, and the share of Dignity & Dominion: And didst appear first to us, adorned with a triple Diadem, in a long purple Robe. Who saydest to me, at our table, I minister the strength of God unto thee. Likewise thou saydest, These mysteries hath God, lastly of his great mercies, granted unto thee: Thou shalt be gladdened, & filled. For thou shalt smelt, & be ruffed up, with the perfect knowledge of Gods mysteries in his mercies. And saydest, This Art is to the farther understanding of all Sciences, that are past, present, & yet to come. And immediately didst say unto me: Kings there are in Nature, with Nature & above Nature: thou art dignified. And saydest concerning the use of these tables: This is but the first step, neither shalt thou practise them in vain. And, saydest, thus generally of Gods Mercies & graces on me, I received & bestowed. Whatsoever thou shalt speak, do, or work, shall be profitable & acceptable. And the end shall be good. Therefore, In the Name &c.

Prince
LAGONEL

^{A Light} To whose commandment the sons of Men, and their Sonors are subject: & have the servants. To whose power the operation of the Earth is subject. Who art the first of the Earth: & whose Peak is called Barres, and this O it is. Of whose commandment, are the Kings, Noblemen, & Princes of Nature. Who art Primus et Quartus, Lagonel: Who by the beaven of the 7 (which are the sons of sempiternitie) dost work & lay bailes amongst the people of the Earth: And hast said to me, that I also, by the same thy servants ^{should} work & lay bailes. I noble Lagonel, who art Minister to the triple crowned King CARMARA: And notwithstanding, art Prince over these 42 Angello whose Names & Characters, are here presented: Therefore, In the Name &c.

King

(to the great comfort of thy faithfull servants) as
approve, to thy very enemies, & mine, the truth and
certainty of thy manifold most mercifull promises,
hitherto, made unto me: And that Thou art the
True & Almighty God, (creator of Heaven & Earth ^{all}
(upon whom I doe call: & in whom I doe put my
trust) And Thy Ministers, to be the true & faithfull
Angels of light: which, have hitherto, principally &
according to thy Divine Providence, dealt with us:
And, also, I, thy poor, & simple servant, shall than,
In, & By thee, be better able to serve thee, according
to thy will pleasing: to thy Honor & Glory: Yea, even
in these most miserably & lamentable daies. Grant,
oh grant, O our Heavenly Father, grant this (I pray
thee) for thy only begotten Sonne IESVS CHRIST,
his sake: Amen. Amen. Amen.

Chap:

Chap. 5.

Oratio ad Deum, singulis diebus,
tribus vicibus, ter dicenda.

O Almighty, Eternal, true & living God;
O King of Glory: O Lord of Hosts: O thou the Creator
of Heaven & Earth, & of all things visible and
invisible: Now (even now at length) among other
the manifold mercies, used, & to be used, towards
me, thy simple servant, John Dee, I most &
humbly beseech thee, in this my present petition
to have mercy upon me; to have pittie upon me;
to have compassion upon me: Who, faithfully and
sincerely, & long tyme, have sought among men, in
earth: And also by Prayer (full oft & pittifully) have
made sute unto thy Divine clemencie for the obteyning
of some convenient portion of true knowledge &
understanding of thy Lawes, & Ordinances, established
in the nature & properties of thy creatures: By w^{ch}
knowledge, thy Divine Wisdom, Power, & Goodnes,
(on thy creatures bestowed, & to them imparted)
being to me made manifest, might abundantly instruct
furnish, & allure me (for the same) incessantly to pronounce
thy praises, to render unto thee, most hearty thanks, to
advance thy true honor, & to ascribe unto thy Name, some
of thy due allgesticall ~~honor~~ glory, among all peoples,
& for ever. And whereas it hath pleased thee (O
God) of thy infinite goodness, by thy faithful, & holy
spirituall messengers, to deliver unto me, long since,
(through the good & care of F. K.) an Orderly forme, and
manner of Exercise **HEPTARCHICAL**: Now (both

Honor

Honor & glory, & the comfort of my own poore Soule,
& of others, thy faithful servants) I may, at all times,
use very many of thy good Oracles, their p^{re}scribed
Regle; according to the properties of such their Functions
& Offices, as to them, by thy divine power, wisdom &
goodness, is assigned & limited: (Which orderly
forme, & manner of Exercise, until even now, I never
found so urgent opportunity, & extreme necessity,
to apply my selfe unto) Therefore, I thy poore and
simple servant, doe, most humbly, heartily, and
faithfully beseech thy divine clemencie, most lovingly
& fatherly to favour: and by thy divine Bless, to
further thine my present industry & endeavour to
Exercise my selfe, according to the foresaid Orderly
forme & manner: And, Now (at length but not too
late) for thy dearly beloved Son **IESVS CHRIST** his
sake (I Heavenly Father) to grant also unto me,
thine blessing & portion of thy heavenly graces: That
thou wilt, forthwith, enable me; make me apt, &
acceptable (in Body, Soule & Spirit) to enjoy always
the Holy & friendly conversation, with the sensible &
plaine, full, & perfect Holy (in word & deed) of thy
Mighty, wise, & good spirituall Messengers & Ministers
generally: And, Namely, of Blessed Michael, -
Blessed Gabriel, Blessed Raphael, and Blessed
Uriel; And, also especially of all those, which doe
appertain, unto the **HEPTARCHICAL** Mysteries;
Hagiologically (as yet) and very briefly, unto me
declared: under the Method of Seven chieftly Knights;
and their Seven faithful & princely ministers,
with their subiects, & servants, to them belonging.
And in this thy great Mercie, & Grace on me bestowed,
and to me confirmed: (O Almighty God) thou shalt -

to

King
BALIGON.

He is the same mighty King, who is, here, first described by the name of CARMARA, and yet otherwise among the Chigello called MARMARA, but that M is not to be expressed: Therefore he appeared in a long purple gown, & on his head a triple crown of gold, with a measuring Rod of gold in his hand, divided into three equal parts: in the form of a very well proportioned man.

Prince
BAGANOL.

He appeared not by that Name yet.

Ministers.

Note the King himself is Governour over these. The 42 Ministers appeared; like bright people. And besides them, all the Chieftains swarmed with features, their letters were in their foreheads. They stood in a Circle. They took their letters from their foreheads & set them in a Circle.

King
BLVMAZ

A — He appeared not yet by that Name.

Prince
BRALGES

He appeared in a red Robe with a Cyclet on his head. And he was the last of the 7, who held the Heptagon. All the rest being set down, who seemed now to extend their hands one towards another: as though they played, being now widd of their work.

Ministers

The powers under his subjection are invisible. They appeared like little white Smokes without any forme. All the world seemed to be in brightness. This is the Seale of his Government

King
BNASTOL

He appeared in a red Robe, and a Crown on his head.
His Prince followed him, & after him his Ministers.

Prince.
BLISDON.

He appeared in a Robe of many Colours, & on his head a tiara of Gold.
His Character or Seal:  A — Perhaps the red colour was most, & so seemed generally to be used as the others their Robes were.

Ministers
A2.

The A2 seemed to stand about a little hill round. The hill was of Clay.
Behind this company seemed to stand an innumerable multitude of ugly people, a far off.
Those who seem to stand ^{about} the little Hill, seem to have in the palms of their hands Letters in order, as here follows th.

E I G N S F B
N I I N Z V B
S F A M L L B
O O G O S R S
N R P C R R B
e r g d t a l.

Those which stood a far off, are spirits of passion: which keep earth with her treasures for him &c.

22.

King
BNAPSEN

He appeared as a King with a Crown on his head.

Prince
BRORGES

He appeared in his red apparel: & he opened his clothes & there did shine, mighty & most terrible & gastly flames of fire out of his sides: which no mortall eye could abide to look upon any long while. And in the most loud roaring fire, the word BRORGES did appear to be written in the very flames.
His Seal or Character is this 

Ministers
A2.

The A2 appeared & holding a round Table, they set it in fiery flames.

A — In the Table were the Letters of their Names as followeth.

B A N S S Z E
B Y A P A R E
B N A M G E N
B N V A G E S
B L B O P O O
B A B E P E N.

King
BYNEFOR

He appeared, as a King, with his Prince next
after him: and after the Prince 42 Ministers.

Prince
BYRMONO

He appeared in a red Robe, with a golden surlet
on his head.
His scale is this.

Ministers
42.

They appeared like Ghosts & smokes, without all form,
having every one of them, a little glittering sparkling fire
in the midst of them.

The first 7 are red as blood, } These had the sparkes
The second 7 not so red, } greater than the rest.
The third 7 like whitish smoke.

The fourth }
The fifth } are of divers colours. All had fiery sparkes in
The sixth } their middle.

Every spark had a letter in it. as followeth.

B B A R N F I,
B B A I G A O
B B A L P A E
B B A N T F G
B B O S N I A
B B A S N O D

1. The first 7 grew all together in a flame of fire, and soe sunk downe into the transparent fiery ~ globe of the new world.
2. The second 7 fell downe like dross of mettall.
3. The third 7 clasped together, & fell downe in a thick smoke.
4. The 4th heaven, ioyne together, & vanish like drops of water.
5. The 5th heaven, fell downe like a storme of thicke.
6. The last vanished away.

At an other tyme, they came being called by King (arm.) all 42. bringing a round Table over their heads flat wise: and then they layd it downe & stood about it: the letters being as before.

L E E N A R B
L N A N A E B

A O I D I A B

King

BABAELE

— Appeared with a crowne of gold on his head: with a long Robe whitish of colour. His left arme sleeve, was very white: and his right arme sleeve was black. He seemed to stand upon water. His Name was written in his Fore head. BABAELE.

Prince

BEEAFES

He appeared in a long red robe, with a sirclet of gold on his head. He had a golden Girdle: and on it written BEEAFES. He opened his Bosome, and appeared leane: and seemed to have Feathers under his Robes.

His Seale or Character is thus

Ministers

42.

Of his 42 Ministers, the first 7 had sirclets of gold on their heads, and the King BABAELE called Beeafes, saying, Venit Princeps 7 principum, qui sunt Aquarum Principes. Every one of the 42 had a letter in his Forehead. They were 7 in a row; & 6 downward. But of the first 7 the letters seemed to be betweene their backs: and the water seemeth continually to pass over these letters.

The first 7 take the water & throw it up, & it becometh clouds.

The second throw it up, & it becometh Rayes & Snow, &c.

The 42 dive into the water, & so vanish away. And

Babael and Beeafes also were suddenly gone.

Their Names & Characters appeared to be these, as follow in the Squares.

E I L O M F O
N E O T P T A
S A G A C I Y
O N E D P O N
N O O N M A N
E T E V L G L

Each of these, upon the place of their standing, made a Table, and every Table had but one letter. The first of the first six did goe away, and in his Table appeared an O, and so of the rest: but note that the third six covered downe, & was loath to shew their Tables: but at length did.

The third row went off lamenting: being commanded by the Prince. All perked in fire, falling into the Globe. The fifth row did sink into the Globe, every one in a sundry fire by himselfe.

The sixth fell with smokes downe into the Globe.

O E S N G L E L: Carmara said remember
A V Z N I L N how they stood when they
Y L L M A F S were secondly disposed into
N R S O G O O thus they stood first in six
N R R C P R N Rows: and next they were
L A B D G R E turned into seven. I spoke
of the greater number, & not
of the less: In speaking of the greater I have comprehended the lesser.

A — Note, L: Car: There are but 6 names that are in subjection to the Prince: The first 7 next him, are those who hold the yare & beautiful crowns. The first 7 are called by those names that thou seest O E S &c.

A — Note this diversity of reckoning by 6, & by 7, I cannot yet well reconcile.

King
BOBOGEL

— Appeared in a black velvet Coat: And his hose, close wound hose with velvet upperstockes: overlaid with gold Lace: On his head a velvet hat-cap: with a black feather in it: with a lace hanging on one of his shoulders, his purse hanging about his neck: & so put under his girdle, at which hung a gyll Rapier: his beard was long, he had pantalles & pynzons. And he said, I sweare these Robes, not in respect of my selfe, but of my Government: &c.

Prince
BONORGO

— Appeared in a red Robe, with a gold brooch on his head: he showed his Seale & said, This it is.

Ministers
42.

Seaven of the Ministers are apparalled like Bobogel the King: sagely & gravely: All the rest are almost ruffen or royster like. Some are like to be men & women: for in the forefront they seemed women, & in the back part men, by their apparell. And they were the last 7. They danced, leapt, & skipped: They came afterwarde into a Circle, the Sage, & the rest: But the stage stand all together.

The first of the Sage layt up his hand aloft & said,
Faciamus secundum voluntatem Dei: Illi
Deus nr, est verus Nobilis & aternus.

He pluckt up his right foot, & under it appeared an L. and of the rest in like manner, appeared their letters or Names.

Prince
HAGONEL.

— Note: All the Princes, seemed to be Men, & to have red Robes; but this Prince, his Robe was shicker than the others.

All the Princes had circlets of gold on their heads: not crowns, nor coronets. This Prince held in the palm of his right hand, as it had been a round ring, with a prick in the midst: hanging also over his middle fingers, w^{ch} he affirmed to be his Seal: and said the name of it, to be Barres: and this it is. O

All the Princes held up together, the staggon stellan (as I term it) and it seemed to be of copper. A light
The Donno's men and their Donno are subject unto his commandment, and are his servants.

Subjects & Servants
to Prince Hagonel.

7 Fily Lucis.	1. Ih. Isr. Dmal. Hecoa. Beigia. Stimoul.	In Sigilo

7 Fily Lucis.

Chap. 12.
Part 21.

The 7 Fily Lucis, appeared like 7 young men, all with bright countenances, white apparails, with white silk on their heads, pendant behind, with a wreath down to the ground; all apparail'd of one sort. Every one seemed to have a metalline Ball in his hands: the first of Gold; the second of Silver; the third of Copper; the fourth of Iron; the fifth of Lead; the sixth of Tin; the seventh of Brass. Between his two hands a round thing of quicksilver; the last had a Ball of Lead. The first had on his Breast a round Tablet of gold, and on it written a great I. And the second on his golden Tablet, had his name also written: And every one orderly coming forth, showed their Names upon their golden Tablets. At their departing they made cursey, and mounted up to Heavenward.

7 Fily Filioz — Appeared like 7 little children, like Boys covered all with purple; with hanging sleeves, like priests, or scholars

Gowne.

Gowne = sleeves: their threads attired all after the former manner with purple silk. They had three cornered Tablets on their breasts: and the Tablets seemed to be very green, and on them the letters of their Names written. The first had two letters, made in one thred, of E and L: EL. They made reverence to Michael (who had called both the first & these) and so mounted up to Heavenward.

At the call of King Carmara (in the second handling of this Hierarchyall Doctryne) when he said Venite, Respetamus Opera Dei: Appeared Prince Hagonel, and after that upon the globe his four superficies, appeared 42: who said Parati sumus servire Deo nro. Each of these, had somewhat in their hands: and they stood in this order; and Hagonel seemed to embrace the company.

Prince
HAGONEL
his 42 Ministers.

... .. six of these seemed more glorious than the rest, and their coats longer: I had circlets of Gold, about their heads: and held in their

hands perfect crowns of Gold. The second six had three quarters of crowns in their hands: The third six had robes or cloaks in their hands: All the rest seemed to have Balls of Gold; w^{ch} they toss from one to another, but at the catching, they were empty: Mindes Balls, for they grasp them closing their hands, as if they were not solid, but empty like a blowne bladder. The first six made cursey to Prince Hagonel, the second six made cursey to the first, and the third to the second. And they all, Prince Hagonel, made cursey to King CARMARA.

Each

END

Anno 1582:

Aprilis 28:

Liber 3⁹
Liber 4⁹

Anno 1582 Aprilis 28 a meridie hora 4.

E.T: Onely Michael appeared; Δ: And to diverse my complaynts, and requests sayde,
Mi: The lord shall consider thee in this world, and in the world to come.
E.T: All the chayre seemed on fyre.
Mi: This is one Action, in one person: I speak of you two.
Union of us Δ: You meane us two to be joynd so, and in mynde united, as yf we wer one man?
Mi: Thou understandest.
Take heade of punishment for your last slaknes.
Δ: Yf you mean any slaknes on my behalf, Truly it was and is for lak of habilitie to buy and prepare things, appointed of you. Procure I pray you habilitie, and so shall I make spede.
E.T: A great hill of gold with serpents lying on it appeared: he smyteth it with his sword, and it falleth into a mighty great water, hedlong.
Mi: Dost thou understand? Δ: No verylie.
worldly hability E.T: He razed the hill away, as though there had byn none; and sayd,
Mi: Lo, so it is of this worldly habilitie.
Δ: I pray you how must the Lamine be hanged?
The Lamin not simpler spoken: for no such lamyn was to be made Mi: As concerning the Lamine, it must be hanged unseen, in some skarf.
The Ring when it is made, I will lessen it according to my pleasure.
I meane by two Cubites, your usuall yarde.
Haste, for thou hast many things to do.
Glory be to God, Peace unto his Creatures. Mercy to the wicked,
Pele Forgiveness to the Faithfull: He liveth, Ô he rayngneth, O thou art mighty, PELE: thy name be blessed. Δ: Amen.
Ese Venito Ese, Δ: He cryed so with a lowd voyce.
E.T: he is now covered, in a myghty covering of fyre, of a great beawty. There standeth a thing before him. I cannot tell what it is.
Laudate Dominum in cælis.
Orate. Δ: we prayed.
E.T: His face remayneth covered with the fyre, but his body uncovered.
Mi: *Adesdum Ese.*
Iana *Adesdum Iana.*
Vobis dedit demonstracionem in Tabulis vris.
E.T: There appeare of the figure, (before, imperfect) two little women: One of them held up a Table which lightened terribly: so that all the stone was covered with a myst.
A voyce cam out of the myst, and sayd,
Creatio *Ex hiis creata sunt, et hæc sunt nomina illorum.*
E.T: The myst cleareth, and one of the women held up a Table, being thus written uppon.
Numerus Primus.
Δ: The Table semed square, and full of letters and numbers, and Crosses, in diverse places, diversly fashioned.
Δ: Remember, Ese and Iana; ar the thirdth and fowrth of the *Septem Filiæ Bonitatis, supra lib°. 2. °* They are thus in order these: EL, Me, Ese, Iana, Akele, Azdobn, Stimcul.

A finger cam out of the mist, and wyped oute, the first shew, with the Cross, letters, and numbers.

The second was in like wise.

The Third was a b with the taylor upward thus: *g*

The 52 with the three great **BBB** seme to be covered with Gold.

The two Crossed ones he did not wipe out with his finger.

The next he blotted oute.

He blotted not oute the three *f* with the 8 and 3.

The two barrs must go clere *f* and not towch the *f f f* the bars.

The *g*, the square, wherin it standeth, is all gold: and that he let stand.

Fire cam oute and burnt

The  is all of a bright cullour, like the brightnes of the Sonne, and that was not put out.

The places are very black, but where the letters, and numbers do stand.

E.T. hard a voyce saying, *Finis Tenebrarum: Halleluyah.*

E.T.: There commeth a hand and putteth the little woman into the clowde.

Mi: Prayse God: Be inwardly mery.

The Darkness is comprehended.

God bless you: God bless you: God blesse you.

You must leave of for an howre and a half: for you have .6. other Tables to write to night.

Prayse God: be joyfull.

After supper we resorted to our scholemaster.

E.T.: I here a voyce but see nothing: he sayeth,

Initium bonum in nomine ejus

et est. Halleluyah.

E.T.: Three quarters of the stone (on the right side) are dark, the other quarter is clere.

Filiae filiarum
Ese
vide lib. 2º

Mi: *Venite filiae filiarum ESE.*

Δ somewhat
wanteth

The nethermost

E.T.: There come six yong maydens, all in white apparell, alike:
Now they all be gonne into the dark parte of the stone, except one.

There cam a flame of fyre out of the dark, and in the flame written

Vnus on this manner: *V nus nus nus*

Lux

She that standeth without, putteth her hand into the dark: and pulleth out a ball of light: and threw it oute: and it waxed bigger and bigger and it Thundred.

E.T.: A voyce sayd, *Dies primus.*

An other voyce: *Ubi est Tabula?*

an answer: *Est, Est, Est.*

She wyndeth and turneth her self abowt, begynning at her hed, and so was Transformed into a Table, rownde.

E.T.: Three faces do shew and shote oute, and ever returned into one hed agayne: and with it cam a mervaylous swete savour.

The Table
cullored

The Table was of three cullours: white, redd, and a mixture of white

and red, changeably. A strong sowing cam withall, as of clattring of harness or fall of waters; or such like.

There cam a sterre shoting oute of the dark, and settled itself in the myddle of the Table: And the fyre which cam oute with the woman, did cumpas the Table abowt.

A voyce sayd, *O honor, Laus et gloria, Tibi qui es, et eris*

The Table sheweth wunderfull fayre and glorious.

Onely seven priks appeare on the Table.

The three angles of the triangle open, and in the lower point appeared a great A.

And in the right upper corner LV. (E.T: The Table trembled.)

And in the other Corner appeared thre circles of equall bignes, equally, or alike intersecting eche other  by theyr centers.

A voyce: *Unus est, Trinus est; in omni Angulo est.*

Omnia comprehendit: Fuit, est, et vobis erit.

Finis et Origo. (E.T: ô, ô; with a dullfull sownd, he pronouncd.)

E.T: The woman sayeth, *Fui: sum quod non sum.* ^{Δ forte fui}

A voyce: *Lux non erat et nunc est.*

E.T: The woman being turned, from the shape of the Table, into womans shape agayn, went into the dark.

Then one part of the darknes diminished. In the dark was a mervaylous turmoyling, tossing, and stur, a long tyme during.

A voyce: For a tyme Nature can not abyde these sightes.

E.T: It is become Quiet, but dark still.

Prayer A voyce: Pray and that vehemently, For these things are not revealed without great prayer. 

E.T: After a long tyme there cam a woman: and flung up a ball like a glass: and a voyce was hard saying, *Fiat.*

The ball went into the darknes, and browght with it a great White Globe hollow transparent.

Then she had a Table abowt her neck, square of 12 places.

The woman seamed to daunce and swyng the Table:

Then cam a hand oute of the dark: and stroke her and she stode still, and becam fayrer: She sayd, *Ecce signum Incomprehensibilitatis;*

Water E.T: The woman is transformed into a water, and flyeth up into the Globe of Light. 

E.T: A voyce: *Est, Est, Est.*

Erth E.T: One commeth, (a woman) owt of the Dark, very demurely, and soberly walking, carrying in her hand a little rownd ball: and threw it into the dark: and it becam a great thing of Earth. She taketh it in her hand agayne, and casteth it up into the rownd Globe and sayd, *Fiat.*

E.T: She turned her back toward E.T. and there appeared a Table divided in 24 parts. yt seemeth to be very square.

A voyce: *Scribe. Veritas est.*

Man Woman E.T: A sword cam out of the Dark: and clave the woman a sunder, and the one half becam a man, and the other a woman, and they went and sat uppon the Ball of cley or erth. 

Now seemeth the Dark part to quake.

A voyce ——— *Venito vasedg.*

E.T: There cometh a woman oute of the Dark: she sayd,

Vita hiis ex mea manu.

E.T: She sheweth a Table square full of holes, and many things creeping out of it. This Square is within a rownd.

A voyce ——— *O Lux Deus noster.*

Hamuthz Gethog.

E.T: Then stept out an other woman having a sword in her hand. She toke a thing oute of the dark (a bright thing) and Cut it in twayn and the one parte she cut into two unequal partes, and the other half she cutteth into a thowsand (or innumerable) partes. Then she toke all the partes up into her skyrt. She hath a Table, and it hangeth on her shulders. She stept before the other woman, whose hed standeth in the dark.

Note this stepping before.

This woman her Table is fowre square. She is very bewtifull.

She sayd, *Lumina sunt hæc Intelligentiae tuæ.*

She sayd, *Fere nulli Credendus est hic numerus.*

The sterrs, sonne and Mone created

This woman taketh the little peces, and casteth them up, and they become little sparks of light: and of the things she cast, There were two great rownd things. And they were allso cast up to the white Transpa=rent Globe. And she went away into the Dark: which was, now, very much lessened.

Then the other woman (who was forestept) thrust oute her hed who had the rownd conteyning the Square, with the 36 places. She crymbleth clay, and it turneth to byrds. She seameth to be like a witch. Into the bosse of her Table, she put her hand and that bosse, was in the Dark and oute of the bosse, she seemed to fatch that Clay. She sayd,

Ad usum tuum Multiplicati sunt.

E.T: She went into the Dark.

Note this cross
with the two
bees, the 4 and
the 6, is one of
the Notes annexed
to the second Table
of the 4 of Enoch's
Tables: And the
T of Enoch's
Tables semeth to
answer
with the T first in
the seale of
Aemeth,
and the cross allso.

E.T: A Voyce is hard saying,
Omnia gaudent fine.

...| hearbs,
 &c.

E.T: There commeth oute a woman; out of the Dark. She plucketh at
 the dark, and casteth it on the grownd, and it turneth to herbes, and plants
 becomming like a garden, and they grow up very fast. She sayd,
Opus est.

E.T: She hath a fowre square Table before her.

...| Centre }
 ...| Darknes }

Then cam one, all in white, and taketh the Darknes, and wrappeth it up
and casteth it into the myddle of the Erthen Globe, on which appeared
 Trees and plants.

E.T: Then appered Michael, his Chayre, and Table agayne manifestly: which
 all this while, were not seen.

Mi: *Obumbrabit vestigia vestra veritatis Luce.*
 The Actor, The Actor, The Actor:
 One Disposer; he, which is one in all; and All in all:
 bless you from the wickednes of Deceyte: Create you
 new vessels: To whome I commyt you.

E.T: he holdeth his sword over us, in manner, out of the stone.

Mi: Fare Well. Serve God. Be patient.
 Hate vayne glorie. Live justly. Amen.

Δ: What spede shall I make for the yard square Table, the wax, the
 seale, and the Character? Mi: As thow ar motioned, so do.

Δ: *Gloria, Patri et F. et S.S. S.e.i.p.e.n.e.s.e.r.s.s. amen.*

Δ: Note, All the Tables before were by E.T, letter for letter noted out
 of the stone standing before him all the while: and the
 7 Tables following wer written by me as he repeted them orderly out of the stone.

Aprilis 29: Sonday: Nocte hora 8 1/4

E.T : Two appeare, Michael and Uriel.

Mi: *Et posuit illos in ministerium ejus.*
Quid desideratis?

Δ: *Sapientiam et scientiam nobis necessariam, et in Dei servitio potentem*
ad eius gloriam.

Mi: *Sapere, a Deo: Scire a Creatura et ex creaturis est.*

Δ I am not sure
 if it wer Mi.
 or Ur, that
 called for them.

Δ Ur: *Venite filiae.*

E.T: Seven women appeare bewtiful and fayre.

Mi: This work is of wisdom (Δ: Sayd Michael, and stode up.)

E.T, sayd to me (Δ), He putteth oute his sword and willeth me to sweare, to
 that, that he willeth me: and to follow his cownsayle.

Mi: Wilt thou. Δ: Then with much ado, E.T. sayd as followeth,

E.T. his
 promise

E.T: I promise, In the name of God the Father, God the sonne and God
 the holy ghost, to performe that you shall will me, so far as it
 shall lye in my powre.

E.T: Now they two seeme to confer together.

Mi: Now you towche world, and the doings uppon earth.
Now we shew unto you the lower world: The Governors that
work and rule under God: By whome you may have

practise.
 The lower
 world

To E.T. he
spake,

Filiae

49 good
Angels
Governors

The first
knowledge

powre to work such things, as shalbe to god his glorie, profit of your
Cuntrie, and the knowledge of his Creatures.

What I do wish thee to do, thow shalt here know, before thow go.
We procede to one GOD, one knowledge, one Operation.

Venite filiae.

Behold these Tables: Herein lye theyr names that work under
God uppon earth: not of the wicked, but of the Angels of Light.

The whole Government, doth consist in the hands of 49 (in
God his Powre, Strength, Mercy, and Justice) whose names
are here evident, excellent, and glorious.

Mark these Tables: Mark them. Record them to your [...]

This is the first knowledge. Here shall you have
Wisdome. *Halleluyah.*

Mighty and Omnipotent art thow, O God, God, God,
amongst thy Creatures: Thow fillest all things
with thy excellent foresight. Thy Glorie be
amongst us for ever. Δ: Amen.

E.T: All the 7 (which here appeare) joyne theyr Tables in One,
which, before they held apart. And they be of this
Forme all to_gither. The myddel most is a great Square
and on eche side of it, One, as big as it, joyning close to it.
And over it joyned two, which both together wer æquall
to it: and under it, wer such other two, as may appear
in this little pattern. Being thus joyned, a bright circle
did cumpas and enclose them all, thus: but nothing was in the
Circle.

The Circle abowt was bright
and Nothing in it./

- ET: One stept furth, and sayde,
 1: { Wilt thou have witt, and wisdome:
 Here, it is. (Δ: Pointing to the middle table.)
 2: { An other sayd, The Exaltation and Government of Princes, is in my
 hand. (Δ: Pointing to that on the left hand of the two uppermost.)
 3: { In Cownsaile and Nobilitie I prevayle. (Δ: Pointing to the other of the
 two uppermost: which is on the right hand.)
 4: The Gayne and Trade of Merchandise is in my hand: Lo, here it is.
 Δ: he pointed to the great table on the right side of the myddle Table,
 that I meane which is opposite to our right hand while we behold
 those 7 Tables.
 Δ I mar= 5: The Quality of the Earth, and waters, is my knowledge,
 vayne that the earth and waters are both ascribed to one. the right hand: of the two lowermost.)
 6: The motion of the Ayre, and those that move in it, are all
 known to me. Lo here they are. (Δ: pointing to the other Table
 below, on the left hand.)
 7: I signifie wisdome: In fire is my Government. I was in the be=
 gynning, and shalbe to the ende. (Δ: pointing to the great table
 on the left hand of the Middle Table.)
 Mi: Mark these mysteries: For, this knowne, the State of
 the whole earth is known, and all that is thereon.
 Mighty is God, yea mighty is he, who hath Composed for ever.
 Give diligent eye. be wise, mery, and pleasant in the
 Lorde; in whose Name, NOTE,
 Begynne the Middle Table &c. Δ: I wrote oute of the
 stone the whole 7 Tables (as you see them here with theyr numbers
 and letters) while E.T. did vew them in the stone, and orderly express them.
 Δ: As concerning 39 V . 47 L &c in the second Table, where are 7 places
 and there but 6 numbers and letters, and yet every place semeth to
 have a letter, in the judgment of E.T. his sight. Which is the
 Number and letter wanting, and where must it be placed?
 Mi: *Non potestis hoc videre sine ratione.*
 Δ: The Next day, as I was loking on the Tables being finished, and joyned
 all to gither in One Compownd Figure, E.T. cam to me, and
 stode by me, and his ey was on the forsayd place which I was forced to
 leave empty, in the 7th and last. And behold he saw hovering and
 hopping in the ayre, over the sayd place, and the next before it.
 And that, which I had placed the sixth, was to be put in the seventh
 place, and that which was wanting, was to be set in the sixth place
 being 30 N.
 E.T: Every of the 7 Tables, as they wer written out of the stone
 do seme afterward to burn all in fyre: and to stand in fyre.
 E.T: After all the Tables wer written, eche toke hir Table aparte agayn
 and stode in theyr order.
 E.T: Note moreover. The First, had Bokes in hir hand.
 Kings ————— The second, a crown in hir hand.
 Nobilitie ————— The Third, Robes.
 Merchants Δ — *Aqua* — The fowrth, *animal quadrupes vicium omnium colorum.*
Terra — The fifth, Herbes.
Aer — The sixth, a fanne.
Ignis — The seventh, a Flame of fyre in hir hand.

Δ
 This I inter=
 sert now;
 though it wer
 not at the
 first Noting.
 two numbers and
 two letters cuppled
 to them.

Mi: *Decedite in nomine eius, qui vos huc misit.*

A boke E.T: Uriel opened a boke in his own hand, and sayde,
 Ur: The Fowntayne of wisdome is opened. Nature shalbe knowne: Earth with her secrets disclosed. The Elements with theyr powres judged. Loke, if thou canst (in the name of God) understand these Tables. Δ: No: Not yet.

Erthly Actions Ur: Beholde; I teache. There are .49. Angels glorious and excellent, appointed for the government of all earthly actions: which 49 do work and dispose the will of the Creator: Limited from the begynning in strength, powre, and glorie.

Practise These shalbe Subject unto you, in the Name, and by Invo= cating uppon the Name of GOD, which doth lighten, dispose and Cumfort you.
 By them shall you work, in the quieting of the estates, in learning of wisdome: pacifying of the Nobilitie, judgement in the rest, as well in the depth of waters, secrets of the Ayre, as in the bowells and entrails of the Earth.

Ur: Theyr Names are comprehended within these Tables. Lo, he teacheth, he teacheth, Lo, he instructeth, which is holy, and most highest. Take hede, thou abuse not this Excellency, nor overshadow it with vanitie, But stick firmly, absolutely, and perfectly, in the love of god (for his honor) to gither.
 Be mery in him: Prayse his name. Honor him in his Saints. Behold him in wisdome: And shew him in understanding. Glorie be to him; To thee ô Lord, whose name perseth through the earth. Glorie be to thee, for ever. Δ: *Amen, Amen, Amen.*

Ur: Lo, I will breifly teache thee; you shall know the Mysteries in him: and by him, which is a Myserie in all things.
 The letters are standing uppon 7 equall numbers. The Number before them is signifying, teaching and instructing (from the first Table to the last,) which are the letters that shalbe joyned to gither: begynning all, with B, according to the disposition of the number untill the 29 ⁴⁹ general names be known. The first 29 are more excellent than the rest. Every Name doth consist uppon the quantitie of the place: Everie place with addition bringeth furth his name, which are 49. ———I have sayde.———

*Δ
*Vide ipanum
 Tabulam ho=
 rum 49 nomen
 Collectam, pa=
 gina sequente.*
 The first 29

Δ: I pray you to tell me the first Name. Ur: The first Name is BALIGON.
 *he ment
 to E.T. Mi: I have to say to the*, and so have I done:
 Δ: Now he spake to E.T., of the matter he sware him to, at the begynning of this last instruction: and he told me afterward what Michael had willed and moved him unto. Wherat he seamed very sore disquietted: and sayd thus to me,

E.T: He sayd that I must betake my self to the world, and forsake the world. That is that I shold marry. Which thing to do, I have no natural inclination: neyther with a safe Conscience may I do it, contrary to my vow and profession. Wherefore I think and hope, there is some other meaning in these theyr wordes.

E.T. must marry

Mi: Thow must of force kepe it.
 Thow knowest our mynde.

Δ: *Deo opt Max. omnium honor laus et gloria
 in sæcula sæculorum. Amen.*

Ended, *hora noctis, 11 1/2 circiter.*

*Coordinatio Angelorum bonorum 49,
per Jo: Dee', ita disposita:*

Δ: E.T. wold not willingly now deale with the former Creatures, utterly misliking and discrediting them, bycause they willed him to marry. Neyther wold he put of his hat in any prayer to god, for the Action with them: where=uppon I went into my Oratorie, and called unto God, for his divine help for the understanding of his laws and vertues which he hath established in and amongst his Creatures, for the benefyt of mankinde, in his service, and for his glorie &c.

E.T. is to marry

And commyng to the stone, E.T. saw there those two, whom hitherto, we wer instructed to be Michael and Uriel.

E.T: Michael and Uriel, both kneled holding up theyr hands: and Michael seamed to sweat water abundantly, somewhat reddish or bluddish. There cam 7 Bundells down, (like faggots) from heven ward. And Michael taketh them kneeling. And Uriel taketh a thing like a superaltare and layeth it uppon the Table: and with a thing like a senser doth make perfume at the fowre corners of the Table: the smoke ascending up: and the senser, at the last, being set on the Table it seemed to fall throwgh the Table.

Uriel his manner of apparition

URIEL semeth to be all in a white long robe tucked up: his garment full of plights and seemed now to have wyngs. (which, hitherto, from the begynning of these kinde of Actions he did not) and on his hed a bewtifull crown, with a white Cross over the Crown.

Uriel taketh the .7. Bundells from Michael: and with reverence layeth them on the forsayd Superaltare.

A Glorious man

E.T: There commeth a man, as thowgh he were all of perfect pure glistring gold: somtyme seeming to have One eye, and somtyme Three.

From under the Table commeth a great smoke, and the place semeth to shake.

Uriel lieth now prostrate on his face: and Michael contynually prayed sweating.

All creatures

The Glorious man seemed to open the Covering of the .7. bundells (being of diverse cullored sylk,) and there appered, that these Bundells seemed to have in them, of all Creatures some, in most glorious shew.

The glorious man seemed to stand uppon a little hill of flaming fyre. He taketh of, of one of the Bundells a thing lyke a little byrd; and it hoovereth affore him as thowgh it had life: and than it rested uppon the thing like a superaltare.

A description of the glorious man.

This glorious man seemeth to be open before, and his brest somewhat spotted with blud. He hath a berd forked of brownish cullour, his heare of his hed, long, hanging down to his sholders: but his face, for beutifull glittring, can not be discerned. His heares do shake, as thowgh the wynde carryed them.

This man blesseth the bird, making a Cross over it: and so he did three tymes. He looketh up to heven.

Many cullors in all his garments are shewed in sequentibus libris

Now the byrd, which, before, seamed to be but as byg as a sparrow, seameth to be as great as a swanne: very beutifull: but of many cullours. Now looketh Michael up, and held up his hands to heven, and sayeth,

Sic, Sic, Sic, Deus noster.

Uriel, (sayd)-- *Multiplicabit omnia, benedictione sua.*

The former Bewtifull man taketh this fowle, setteth it on the bundell, and on the place, from whence it was taken: And, now, the place

where this byrd stode before, seemeth allso to be (proportionally) waxed big, as the byrd, (thus enlarged).

The Yoaking
or cuppling of
the two byrds.

This man taketh an other byrd, and putteth the wyng of it, behind the wyng of the first (as though he yoked them.)

This second byrd, at this his first taking, was as byg, as the first was become, (encreased, as it shewed), and it was allso a very bewtifull one.

E.T: All is suddenly dark, and nothing to be seen, neyther Chayre, nor anything els.

E.T: A voyce was hard, like Michael his voyce, saying,
It was a byrd, and is a byrd, absent there is nothing but Quantitie.

Δ
E.T. sayd the
voyce to be
like Michael
his voyce.
Necessitie.

A voyce: Beleve. The world is of Necessitie: His Necessitie is governed by supernaturall wisdome,
Necessarily you fall: and of Necessitie shall rise agayne.
Follow me, love me: embrace me: behold, I, AM.

E.T: Now all the Darknes vanished, the man is gon. Uriel standeth at the Table, and Michael sitteth now in his Chayre: and sayd,

Mi: This doth GOD work for your understanding.

vayne to stryve

It is in vayne to stryve: All Government is in his hands.
What will you els, what will you els?

Δ: *Progressum et profectum in virtute et veritate ad Dei honorem et gloriam.*

Δ
forte your

Mi. This hath answered all [y]our Cavillations.

Δ What hath answered all our Cavillations?

Mi. Thow hast written.

One thing you shall see more, as a persuasion to the Infirmitie.

E.T: The two byrds, which were there, before, and gon out of sight, now are shewed agayn: but none of the bundells appere.

They seme to grow to a huge bignes, as byg as mowntaynes: incredibly byg: and they seeme to hover up in the ayre, and to fly up toward heven, and with theyr wyngs to towch the sky: And one of them with his bill seemeth to take sterrs into it: and the other bird to take them from the same byrd, and to place them agayn in the skye.
And this they did very often: and in diverse places of the heven with great celeritie.

The byrds towch
the sky and
sterrs

After this they semed to fly over Cities, and townes, and to break the clowdes in peces, as they passed: and to cause all dust to flye from all walls, and towres, as they passed, and so to make them clene.
And in the streetes, as these two Byrds flew, seemed diverse brave fellows, like bisshops, and Princis and Kings, to pass: and by the wyngs of these byrds, they were stricken down. But simple seely ones, like beggers, lame and halt, childern, and old aged men, and wemen, seemed to pass so quietly, untowched and unoverthrown of these two Byrds.

And than they seemed to come to a place, where they lifted up, with the endes of theyr wyngs, fowre Carkasses of dead men (owte of the grownde) with crownes on theyr heds: wherof one seemed to be a Childe.

First these 4, seemed leane, and deade: Then they seemed quick
and in good liking: And they being raysed up: parted eche from the
other, and went into 4 sundry wayes, Est, West, North and
Sowth.

Now these two fowles having theyr wyngs joyned together, light uppon
a great hill: and there the First fowle gryped the erth mightly
and there appeared diverse Metalls, and the Fowle spurned them away,
still.

Then appeared an old mans hed, heare and all, on; very much
wythered. They tossed it betwene them, with theyr feete:

And they brake it: And in the hed appeared (in steede of the
braynes) a stone, rownd, of the bignes of A Tennez ball
of 4, cullours, white, black, red, and greene.

One of them (he that brake the skull), putteth that rownd stone
to the others mowth or byll.

The other eateth or nybbleth on it, and so doth the other allso.

G

Now these two byrds, are turned into men: And eche of
them have two Crownes like paper Crownes, white and
bright, but seeme not to be sylver. Theyr teeth are gold,
and so likewise theyr hands, feete, tung, eyes, and ears likewise
All gold.

On eche of these two men, ar 26 Crownes of Gold, on theyr
right sholders, every of them, greater then other.

They have, by theyr sides, Sachels, like palmers bags, full of gold,
and they take it oute, and seemed to sow it, as corne; going or
stepping forward, like Seedmen.

E.T: Then sayd Michael, This, is the ende.

E.T: The two men be vanished away.

Mi: Learne the Myserie hereof.

Δ: Teache us (ô ye spirituall Creatures.) than sayd Michael,

Mi: Joye and helth give unto the riche:

Open strong locks:

Be Mercifull to the wicked:

Pluck up the poore:

Read unto the Ignorant:

I have satisfyed thee: Understand:

Read them over: God shall give thee some light in them. I have
satisfyed thee: Both, How you shalbe joyned,

By whome,

To what intent, and purpose:

What you are,

What you were,

What you shalbe, (*videlicet*) in Deo.

Lok up this Myserie:

*Forget not our Cownsayle:

Ô GOD, thow openest all things: Secret are thy Mysteries
and holy is thy name, for ever,
The vertue of his presence, here left, be
amongst you.

Δ: Amen.

Δ: What am I to do, with the wax, the Table, the ring or
the Lamine? &c.

Mi: When the things be ready, then thow shalt know, how to use them.

Δ: How shall I do for the graving of the ring; May not another
man do it, though, E.T. Grave it not?

Mi: Cause them to be made up, (according to instruction) by any honest man.

Δ: What say you as concerning the Chamber, for our practise?
May my fardermost little chamber, serve, yf the bet be taken downe?

Mi: At the next Call, for the Chamber, you shall know what to do.

Δ: *Benedictus Deus in donis suis:*

et sanctus in omnibus operibus eius.

Amen. ended hor. 4 1/2

The
Hieroglyphic
Monad

John Dee, London,

to

MAXIMILIAN,
by God's Grace
Most Wise Emperor
of
Rome, Bohemia, and Hungary

The Hieroglyphic Monad

By John Dee

Originally published in London, England, 1564

Adobe Acrobat version created by Benjamin Rowe, July 4, 2000.

Formatted in Adobe Caslon and Tiepolo.

This document is optimized for printing on a laser or inkjet printer. The illustrations may appear “jagged” when viewed on the screen with certain combinations of displays and drivers; they will print at the full resolution of your printer.

The Hieroglyphic Monad

THEOREM I

It is by the straight line and the circle that the first and most simple example and representation of all things may be demonstrated, whether such things be either non-existent or merely hidden under Nature's veils.

THEOREM II

Neither the circle without the line, nor the line without the point, can be artificially produced. It is, therefore, by virtue of the point and the Monad that all things commence to emerge in principle. That which is affected at the periphery, however large it may be, cannot in any way lack the support of the central point.

THEOREM III

Therefore, the central point which we see in the centre of the hieroglyphic Monad produces the Earth, round which the Sun, the Moon, and the other planets follow their respective paths. The Sun has the supreme dignity, and we represent him by a circle having a visible centre.

The Hieroglyphic
Monad

THEOREM IV

Although the semicircle of the Moon is placed above the circle of the Sun and would appear to be superior, nevertheless we know that the Sun is ruler and King. We see that the Moon in her shape and her proximity rivals the Sun with her grandeur, which is apparent to ordinary men, yet the face, or a semi-sphere of the Moon, always reflects the light of the Sun. It desires so much to be impregnated with solar rays and to be transformed into Sun that at times it disappears completely from the skies and some days after reappears, and we have represented her by the figure of the Horns (Cornucopia).

THEOREM V

And truly I give the completion of the idea of the solar circle by adding a semicircle for the Moon, for the morning and the evening were the first day, and it

The Hieroglyphic Monad

was therefore in the first (day) that the Light of the Philosophers was made (or produced).

THEOREM VI

We see here that the Sun and the Moon are supported upon the right-angled Cross. This Cross may signify very profoundly, and for sufficient reasons in our hieroglyph, either the Ternary or the Quaternary. The Ternary is made by the two straight lines having a copulative centre.

The Quaternary is produced by the four straight lines enclosing four right angles. Either of these elements, the lines or the right angles, repeated twice, therefore, afford us in the most secret manner the Octad, which I do not believe was known to our predecessors, the Magi, and which you should study with great attention. The threefold magic of the first Fathers and the wise men consisted in Body, Soul and Spirit. Therefore, we have here the first manifested Septenary, that is to say, two straight lines with a common point which make three, and the four lines which converge to form the central point in separating the first two.

THEOREM VII

The Elements being far from their accustomed places, the homogeneous parts are dislocated, and this a man learns by experiment, for it is along the straight lines that they return naturally and effectively to these same places. Therefore, it will not be absurd to represent the mystery of the four Elements, in which it is possible to resolve each one into elementary form, by four straight lines running in four contrary directions from one common and indivisible point. Here you will notice particularly that the geometricians teach that a line is produced by the displacement of a point: we give notice that it must be the same here, and for a similar reason, because our elementary lines are produced by a continual cascade of droplets as a flux in the mechanism of our magic.

THEOREM VIII

Besides, the kabbalistic extension of the Quaternary according to the common formula of notation (because we say one, two, three, and four) is an abridged or reduced form of the Decad. This is because Pythagoras was in the habit of saying: $1+2+3+4$ make 10. It is not by chance that the right-angled Cross—that is to say, the twenty-first letter of the Roman alphabet, which was considered as being formed by four straight lines, was taken by the most ancient of the Roman Philosophers to represent the Decad.

Further, they have defined the place where the Ternary conducts its force into the Septenary.

The Hieroglyphic Monad

THEOREM IX

We see that all this accords perfectly with the Sun and Moon of our Monad, because, by the magic of the four Elements, an exact separation upon their original lines must be made; following which the circulatory conjunction within the solar complement through the peripheries of these same lines is performed, because however long a given line may be, it is possible to describe a circle passing through its extremes, following the laws of the geometricians. Therefore, we cannot deny how useful the Sun and the Moon are to our Monad, in conjunction with the decadal proportion of the Cross.

THEOREM X

The following figure of the zodiacal sign Aries, in use amongst the astronomers, is the same for all the world (a sort of erection both cutting and pointed), and it is understood that it indicates the origin of the fiery triplicity in that part of the sky. Therefore, we have added the astronomical sign Aries to signify that in the practice of this Monad the use of fire is required.

We finish the brief hieroglyphic consideration of our Monad, which we would sum up in one only hieroglyphic context:

The Sun and the Moon of this Monad desire that the Elements in which the tenth proportion will

flower, shall be separated, and this is done by the application of Fire.

THEOREM XI

The mystical sign of the Ram, composed of two semicircles connected by one common point, is very justly attributed to the place of the equinoctial nycthemeron, because the period of twenty-four hours divided by means of the equinox denotes most secret proportions.

This I have said in respect of the Earth.

THEOREM XII

The very ancient wise men and Magi have transmitted to us five hieroglyphical signs of the planets, all of which are composed out of the signs used for the Moon and the Sun, together with the sign of the Elements and the hieroglyphical sign of Aries, the Ram, which will become apparent to those who examine these figures:

Each one of these signs will not be difficult to explain according to the hieroglyphical manner in

The Hieroglyphic Monad

view of our fundamental principles, already posited. To begin with, we will speak in paraphrases of those which possess the characteristics of the Moon: following that, of those which possess a solar character. When our lunar nature, by the science of the Elements, had accomplished the first revolution round our Earth, then it was called, mystically, Saturn. Afterwards, at the following revolution, it was named

Jupiter, and holds a very secret figure. Then the Moon, developed by yet a third journey, was represented very obscurely again by this figure which it was their custom to call Mercury. You see how this is Lunar. That it must be conducted through a fourth revolution will not be contrary to our most secret design,

whatever certain sages may say. In this manner the pure magical spirit, by its spiritual virtue, will perform the work of the albification at the place of the Moon; to us alone and as it were in the middle of a natural day he will speak hieroglyphically without words, introducing and imprinting these four geogonic figures in the pure Earth very simply prepared by us:

this last figure being in the middle of all the others.

THEOREM XIII

Now regard the mystical character of Mars! Is it not formed from the hieroglyphs of the Sun and Aries, the magistry of the Elements partly intervening? And that of Venus - I wish to know is it not produced from that of the Sun and the Elements according to the best exponents? Therefore, the planets look towards the solar periphery and the work of revivification.

In the progression we will notice this other Mercury will appear who is truly the twin brother of the first: for by the complete Lunar and Solar magic of the Elements, the Hieroglyph of this Messenger speaks to us very distinctly, and we should examine it carefully and listen to what it says. And (by the Will of God) it is

The Hieroglyphic Monad

the Mercury of the Philosophers, the greatly celebrated microcosm and ADAM. Therefore, some of the most expert were inclined to place him in a position of, and give him a rank equal to, the Sun himself. This we cannot perform in the present epoch unless we add to this coralline crystal work a certain SOUL separated from the body by the pyrognomic art. It is very difficult to accomplish this and very perilous because of the fire and the sulphur which the breath contains within it. But certainly this Soul can perform marvellous things. For example, join it by indissoluble ties to the disc of the Moon (or at least of Mercury) by Lucifer and Fire. In the third place, it is necessary that we should show (in order to demonstrate our Septenary number) that it is the Sun of Philosophers itself. You will observe the exactitude as well as the clarity with which this anatomy of our Hieroglyphic Monad corresponds to what is signified in the arcana of these two theorems.

THEOREM XIV

It is therefore clearly confirmed that the whole magistry depends upon the Sun and the Moon. Thrice Greatest Hermes has repeatedly told us this in affirming that the Sun is its father and the Moon is its mother: and we know truly that the red earth (terra lemnia) is nourished by the rays of the Moon and the Sun which exercise a singular influence upon it.

THEOREM XV

We suggest, therefore, that Philosophers should consider the action of the Sun and the Moon upon the Earth. They will notice that when the light of the Sun

The Principles of the Inferior
Astronomy, shown in the
Anatomy of our Monad.

enters Aries, then the Moon, when she enters the next sign, that is to say Taurus, receives a new dignity in the light and is exalted in that sign in respect of her natural virtues. The Ancients explained this proximity of the luminaries – the most remarkable of all – by a certain mystic sign under the name of the Bull. It is very certain that it is this exaltation of the Moon to which in their treatises the astronomers from the most ancient times bear witness. This mystery can be understood only by those who have become the Absolute Pontiffs of the Mysteries. For the same reason they have said that Taurus is the house of Venus – that is to say, of conjugal love, chaste and prolific, for

The Hieroglyphic Monad

nature rejoices in nature, as the great Ostanès concealed in his most secret mysteries. These exaltations are acquired by the Sun, because he himself, after having undergone many eclipses of his light, received the force of Mars, and is said to be exalted in this same house of Mars which is our Ram (Aries).

This most secret mystery is clearly and perfectly shown in our Monad by the hieroglyphic figure of Taurus, which is here represented, and by that of Mars, which we have indicated in Theorem XII and Theorem XIII by the Sun joined to a straight line towards the sign of Aries.

In this theory another kabbalistic analysis of our Monad offers itself, because the true and ingenious explanation is this: the exaltations of the Moon and of the Sun are made by means of the science of the Elements.

Note. – There are two things which should be particularly observed: first, that the hieroglyphic figure of Taurus is the same as the diphthong of the Greeks, which was always used in terminating the singular

gender; secondly, that by a simple transposition of place we show the letter alpha twice, by a circle and a half-circle, being simply tangents which touch one another as shown.

THEOREM XVI

We must now, in view of our subject, philosophise for a short time upon the Cross. Our Cross may be formed of two straight lines (as we have said) which are equal one to the other – that is to say, we cannot separate the lines except we do it by parting them so that we get equal lengths. But in the mystic distribution of the components of our Cross, we wish to use parts which are both equal and unequal. These parts show that a virtue is hidden under the power of the division of the Equilateral Cross into two parts, because they are of equal grandeur. In general, the Cross must be composed of equal right angles, since the nature of justice demands the perfect equality of the lines used in the decussation. In accordance with this justice, we propose to examine with care that which follows concerning the Equilateral Cross (which is the twenty-first letter of the Latin alphabet).

If, through the common point where the opposite angles meet in our Rectilineal, Rectangular, and Equilateral Cross, we imagine a straight line dividing it into two parts, then on either side of the line thus traversed we find the parts are perfectly equal and similar.

The Hieroglyphic Monad

And these parts are similar in shape to that letter of the Romans which is regarded as the fifth of the vowels, and which was frequently used by the most ancient Latin Philosophers to represent the number five. This, I conceive, was not done by them without good reason, because it is in fact the exact half of our Decad. Of these parts of the figure thus duplicated by the hypothetical division of the Cross, we must conclude it to be reasonable that each part represents the quinary, although one is upright and the other reversed in imitation of the multiplication of the square root which comes in here in a marvellous way as the circular number, that is to say, the quinary, from which we find the number twenty-five is produced (because this letter is the twentieth of the alphabet and the fifth of the vowels).

We will now consider another aspect of this same Equilateral Cross – that which follows is based upon the position shown in our Monadic Cross. Let us suppose a similar division of the Cross into two parts be made as in the drawing. Now we see the germinating shape of another letter of the Latin alphabet – the one

upright, the other reversed and opposite. This letter is used (after the ancient custom of the Latins) to represent the number fifty. From this, it seems to me, we establish our Decad of the Cross, for this is placed at the summit of all the mysteries, and it follows that this Cross is the hieroglyphic sign of perfection. Therefore, enclosed within the quinary force is the power of the Decad, out of which comes the number fifty as its own product.

Oh, my God, how profound are these mysteries! and the name EL is given to this letter! And for this very reason, we see that it responds to the decadal virtue of the Cross, because, starting from the first letter of the alphabet, L is the tenth letter, and counting backwards from the letter X, we find that it falls into the tenth place, and since we show that there are two parts of the Cross, and considering now their numerical virtue, it is quite clear how the number one hundred is produced. And if by the law of squares these

The Hieroglyphic Monad

two parts be multiplied together, they give a product of 2500. This square compared with the square of the first circular number, and applied to it, gives a difference of one hundred, which is the Cross itself explained by the square of its Decad, and is recognised as one hundred. Therefore, as this is contained within the figure of the Cross, it also represents unity. By the study of these theories of the Cross, the most dignified of all, we are thereby induced to utilise this progression, viz. one-ten-one hundred, and this is the decadal proportion of the Cross as it appears to us.

THEOREM XVII

After a due study of the sixth theorem it is logical to proceed to a consideration of the four right angles in our Cross, to each one of which, as we have shown in the preceding theorem, we attribute the significance of the quinary according to the first position in which they are placed, and in transposing them to a new position, the same theorem shows that they become hieroglyphic signs of the number fifty. It is quite evident that the Cross is vulgarly used to indicate the number ten, and further, it is the twenty-first letter, following the order of the Latin alphabet, and it is for this reason that the sages amongst the Mecubales designated the number twenty-one by this same letter. In fact, we can give a very simple consideration to this sign to find out what other qualitative and quantitative virtues it possesses. From all these facts we see that we may safely conclude, by the best kabbalistic computation, that our Cross, by a marvellous metamorphosis, may signify for the Initiates two hundred and fifty-two. Thus: four times five, four times fifty, ten,

twenty-one and one, which added together make two hundred and fifty-two. We can extract this number by two other methods as we have already shown: we recommend to the Kabbalists who have not yet made experiments to produce it, not only to study it in its conciseness, but also to form a judgment worthy of philosophers in regard to the various permutations and ingenious productions which arise from the magistrery of this number. And I will not hide from you a further memorable mystagogy: consider that our Cross, containing so many ideas, conceals two further letters if we examine carefully their numerical virtues after a certain manner, so that, by a parallel method following their verbal force with this same Cross, we recognise with supreme admiration that it is from here that LIGHT is derived (LUX), the final word of the magistrery, by the union and conjunction of the Ternary within the unity of the Word.

THEOREM XVIII

From our Theorems XII and XIII it may be inferred that celestial astronomy is the source and guide of the inferior astronomy. Before we raise our eyes to heaven, kabbalistically illuminated by the contemplation of these mysteries, we should perceive very exactly the construction of our Monad as it is shown to us not only in the LIGHT but also in life and nature, for it discloses explicitly, by its inner movement, the most secret mysteries of this physical analysis. We have contemplated the heavenly and divine functions of this celestial Messenger, and we now apply this co-ordination to the figure of the egg. It is well known that all astrologers teach that the form of

The Hieroglyphic Monad

the orbit traversed by a planet is circular, and because the wise should understand by a hint, it is thus that we interpret it in the hieroglyph, shown, which conforms in every detail with all that has gone before. Here you will note that the miserable alchemists must learn to recognise their numerous errors and to understand what is the water of the white of egg, what is the oil of the yoke of egg, and what we mean by calcined egg-shells. These inexpert impostors must learn in their despair to understand what are meant by these and many other similar expressions. Here we have shown almost all the proportions which correspond to Nature herself. This is the same Eagle's Egg which the scarab formerly broke because of the injury which the cruelty and violence of this bird caused to timid and primitive man, for this bird pursued some of them who were running to the cavern where the scarab dwelt, to implore his aid. The scarab wondered in what manner he alone could revenge such insolence,

The Hieroglyphic Monad

and, being of an ardent character, prepared to accomplish his purpose by constancy and determination, for he was short of neither power nor intelligence. The scarab pursued the eagle resolutely and made use of this very subtle trick: he let fall his ordure in the bosom of Jupiter where the egg was deposited, with the result that the God in getting rid of it threw the egg to the ground, where it was broken. The scarab by this method would have completely exterminated the whole family of eagles from the Earth had not Jupiter, in order to avoid such a calamity, resolved that, during that part of the year when the eagles watch over their eggs, no scarab should come flying near them. There-

The Hieroglyphic Monad

fore, I counsel those who are ill-treated by the cruelty of this bird, that they learn the very useful art from these solar insects (*Heliocantharis*) who live concealed and hidden for very long periods of time. By these indications and signs, for which they should be very thankful, they themselves will be able to take vengeance on their enemy. And I affirm (O King!) that it is not Aesop but Oedipus who prompts me, for he presented these things to worthy souls, and ventured for the first time to speak of these supreme mysteries of Nature. I know perfectly well that there have been certain men who, by the art of the scarab, have dissolved the eagle's egg and its shell with pure albumen and have formed thereby a mixture of all; afterwards they have reduced this mixture to a yellow liquid, by a notable process, viz. by a ceaseless circulation just as the scarabs roll their balls of earth. By this means the great metamorphosis of the egg was accomplished; the albumen was absorbed during a great many revolutions round the heliocentric orbits, and was enveloped in this same yellow liquid. The hieroglyphic figure shown here, of this art, will not displease those who are familiar with Nature.

We read that during the early centuries, this art was much celebrated amongst the most serious and ancient Philosophers, as being certain and useful. Anaxagoras performed the magistery and extracted therefrom an excellent medicine, as you may read in his book.

He who devotes himself sincerely to these mysteries will see clearly that nothing is able to exist without the virtue of our hieroglyphic Monad.

THEOREM XIX

The Sun and the Moon shed their corporeal forces upon the bodies of the inferior Elements, much more so than all the other planets. It is this fact which shows, in effect, that in the pyrognomic analysis all metals lose the aqueous humour of the Moon as well as the igneous liquor of the Sun, by which all corporeal, terrestrial, and mortal things are sustained.

THEOREM XX

We have shown sufficiently that for very good reasons the Elements are represented in our Hieroglyph by the straight lines, therefore we give a very exact speculation concerning the point which we place in the centre of our Cross. This point cannot by any means be abstracted from our Ternary. Should anyone who is ignorant of this divine learning, say that in this position of our Binary the point can be absent, we reply, he may suppose it to be absent, but that which remains without it will certainly not be our Binary; for the Quaternary is immediately manifested, because by removing the point we discontinue the unity of the lines. Now, our adversary may suppose that by this argument we have reconstructed our Binary; that in fact our Binary and our Quaternary are one and the same thing, according to this consideration, which is manifestly impossible. The point must of necessity be present, because with the Binary it constitutes our Ternary, and there is nothing that can be substituted in its place. Meanwhile he cannot divide the hypostatic property of our Binary without nullifying an integral part of it. Thus it is demonstrated that it must

The Hieroglyphic Monad

not be divided. All the parts of a line are lines. This is a point, and this confirms our hypothesis. Therefore, the point does not form part of our Binary and yet it forms part of the integral form of the Binary. It follows that we must take notice of all that is hidden within this hypostatic form and understand that there is nothing superfluous in the linear dimension of our Binary. But because we see that these dimensions are common to both lines, they are considered to receive a certain secret image from this Binary. By this we demonstrate here that the Quaternary is concealed within the Ternary. O God, pardon me if I have sinned against Thy Majesty in revealing such a great mystery in my writings which all may read, but I believe that only those who are truly worthy will understand.

We therefore continue to expound the Quaternary of our Cross as we have indicated. Seek diligently to discover whether the point may be removed from the position in which we first find it. The mathematicians teach that it may be displaced quite simply. At the moment when it is separated the Quaternary remains, and it becomes much more clear and distinct to the eyes of all.

This is not a part of its substantial proportions, but only the confused and superfluous point which is rejected and removed.

O Omnipotent Divine Majesty, how we Mortals are constrained to confess what great Wisdom and what ineffable mysteries reside in the Law which Thou hast made! Through all these points and these letters the most sublime secrets, and terrestrial arcane mysteries, as well as the multiple revelations of this unique point, now placed in the Light and examined

by me, can be faithfully demonstrated and explained. This point is not superfluous within the Divine Trinity, yet when considered, on the other hand, within the Kingdom of the four Elements it is black, therefore corruptible and watery. O thrice and four times happy, the man who attains this (almost copulative) point in the Ternary, and rejects and removes that sombre and superfluous part of the Quaternary, the source of vague shadows. Thus after some effort we obtain the white vestments brilliant as the snow.

Oh, Maximilian, May God, through this mystagogy, make you or some other scion of the House of Austria the most powerful of all when the time comes for me to remain tranquil in Christ, in order that the honour of His redoubtable name may be restored within the abominable and intolerable shadows hovering above the Earth. And now for fear that I myself should say too much I shall immediately return to the burden of my task, and because I have already terminated my discourse for those whose gaze is centred within the heart, it is now necessary to translate my words for those whose heart is centred within their eyes. Here, therefore, we can represent in some measure in the figure of the Cross that which we have already said. Two equal lines are equally and inequally crossed through the point of necessity which you see in A. The four straight lines, as in B, produce a sort of vacuum where they are withdrawn from the central point, which was their common condition, in which state they were not prejudicial, the one to the other. This is the path by which our Monad, progressing through the Binary and the Ternary into the purified Quaternary, is reconstituted within itself, united in

The Hieroglyphic Monad

equal proportions, and which now shows that the whole is equal to its combined parts, for during the time that this takes place our Monad will not admit of other units or numbers, because it is self-sufficient, and exactly so, within itself; absolute in all numbers in the amplitude of which it is diffused, not only magically but also by a somewhat vulgar process employed by the artist, which produces great results in dignity and power within this selfsame Monad, which is resolved into its own first matter; whilst that which is foreign to its nature and to its natural hereditary proportions is segregated with the greatest care and diligence and rejected for ever amongst the impurities.

THEOREM XXI

If that which is hidden within the profundities of our Monad be brought to light, or, on the contrary, if those primary parts which are exterior in our Monad are enclosed in the centre, you will see the extent to which the philosophical transformation can be produced. We will now expound to you another local commutation of our mystical Monad, using those parts from the hieroglyphic characters of the superior planets which are immediately

offered to us. Each one of the other planets for this purpose is in turn elevated to a position which was frequently assigned to them by Plato, therefore, if they are conveniently taken in this position and at this point in Aries, Saturn and Jupiter are in conjunction. By descending, the Cross represents Venus and Mercury, followed by the Sun himself with the Moon at the bottom. This will be refuted in other circles; meantime, as we have no wish to hide the philosophical treasure of our Monad, we have taken a resolution to give a reason by which the position of the Monad is by this manner displaced. Yet see! listen to these other great secrets which I know and will disclose to assist you as touching this position, which I can explain in few words. We distribute our Monad, now looked at from a different aspect, and analysed in a different manner, as is seen at B, D, C. In this new Ternary the

The Hieroglyphic Monad

figures C and D are known to all men, but the figure designated B is not easy of comprehension.

It is necessary to give careful consideration to the known forms D and C, which show that the essences are separated and distinct from the figure B: also we see that the Horns of the figure C are turned downwards towards the Earth. That part of D which illuminates C is also towards the Earth, that is to say, downwards, in the centre of which the solitary visible point alone is truly the Earth: finally these two figures D and C turned towards the lower end give a hieroglyphic indication of the Earth. Therefore, the Earth is made to represent, hieroglyphically, stability and fixation. I leave you to judge from this what is meant by C and D: from which you may take notice of a great secret. All the qualities which we have in the first place ascribed to the Sun and the Moon can here be given a perfect and very necessary interpretation, these two stars up to now having been placed in the superior

position with the horns of the Moon raised on high; but we have already spoken of this.

We will now examine, according to the fundamentals of our hieroglyphic Art, the nature of this third figure B. First, we carry to the Crown the double crescent of the Moon which is our Aries, turned round in a mystical manner. Then follows the hieroglyphic sign of the Elements, which is attached to it. As to why we use the double Moon, it may be explained that it is according to the matter, which requires a double quantity of the Moon. We speak of those grades of which in their experiments the Philosophers could find no more than four, amongst all created substances, that is to say, to be, to live, to feel and to comprehend (*esse, vivere, sentire et intelligere*). In saying that the first two of these Elements are found here, we say that they are called *argent vive* (*luna existens, viva*), all life being subject to movement, there being six principles of movement. The Cross which is attached implies that in this artifice the Elements are requisite. We have told you many times that in our theory the hieroglyph of the Moon is like a semicircle, and on the contrary the complete circle signifies the Sun, whereas here we have two semicircles separated, but touching at a common point; if these are combined, as they can be by a certain art, the product can represent the circular plenitude of the Sun. From all those things which we have considered, the result is that we can summarise, and in hieroglyphic form, offer the following:

Argent vive, which must be developed by the magistry of the Elements, possesses the power of the solar force through the unification of its two semicircles combined by a secret art.

The Hieroglyphic Monad

The circle, of which we have spoken and which we designate in the figure by the letter E, is thus accomplished and formed. You will recollect, we have said that the solar degree is not delivered to us ready to our hand by Nature, but that it is artificial and not produced by Nature, it being available to us in its first aspect in accordance with its proper nature (as in B) in two parts separated and dissolved, and not solidly united in the solar body. In fact, the semi-diameter of these half-circles is not equal to the semi-diameter of D and C, but much smaller. Everyone can see this from the manner in which we have drawn them in the diagram, from which it is clear that this same B has not as great an amplitude as D and C. The proportions in the figure confirm this, being by this means transformed into a circle from B into E. Therefore, there appears before our eyes the sign of Venus alone. We have already demonstrated by these hieroglyphical syllogisms that from B we cannot obtain the true D, and that the true C is not and cannot be completely within the nature of B; therefore, this of itself is not able to become the true "Argent Vive." You may already doubt the subject of this life and of this movement, whether it is possible, in fact, to possess it naturally or not. However, as we have already explained to the wise, all those things which are said about B, in a similar manner will be at least analogical, and all that which we have briefly taught concerning C and D can be very well applied, by analogy, to this same B accompanied by its Elements.

Indeed, that which we have attached to the nature of Aries, should exactly fit the case, because it carries this figure B, although reversed, at its summit, and

that which is attached to the figure B, is the mystical figure of the Elements. Therefore, we see by this anatomy that from the body of our Monad alone, separated in this manner by our Art, this new Ternary is formed.

This we cannot doubt, for the reason that the members which composed it reassemble and form amongst themselves of their own free will a monadic union and sympathy which is absolute. By this means we discover amongst these members a force which is both magnetic and active.

Finally I think it well to note here, by way of recreation, that this same B shows very clearly the same proportions in the malformed and rustic letter in that it carries visible points towards the top and at the front and that these letters are three in number, otherwise they number six, summarising three times three: they are crude and malformed, unstable and inconstant, made in such a manner as to appear formed of a series of half-circles. But the method of making these letters more stable and firm is in the hands of the literary experts. I have here placed before your eyes an infinitude of mysteries: I introduce a game but to interrupt a theory. Meanwhile I do not understand the efforts of certain people who rise up against me. Our Monad being reconstituted in its first mystical position and each one of its parts being ordered by Art, I advise and exhort them to search with zeal for that fire of Aries in the first triplicity, which is our equinoctial fire and which is the cause whereby our Sun may be elevated above his vulgar quality. Many other excellent things should also be studied in happy and wise meditations.

The Hieroglyphic Monad

We now pass on to another subject; we wish to point the way, not only in a friendly but also in a faithful manner, to those other secrets upon which we must insist, before we lapse into silence and which, as we have said, comprise a most remarkable infinitude of other mysteries.

THEOREM XXII

It will be readily understood that the mysteries of our Monad cannot be extracted unless one is drawn towards the pharmacy of this same Monad, and that these mysteries must not be revealed to any but the Initiates. I offer here for the contemplation of your Serene Highness, the vessels of the Sacred Art which are truly and completely kabbalistic. All those lines which unite the diverse parts of our Monad are most wisely separated; we give to each one of them a special letter, in order to distinguish them one from another as you will see in the diagram.

We inform you that in α is found a certain artificial vessel, formed of A and B with the line M. The exterior diameter is common to both A and B, and this is not different, as we see, from this the first letter of the

Greek alphabet, except by a single transposition of the parts.

We teach the true mystical sympathy first by the line, the circle, and the semicircle, and, as we have formerly said, this symmetry can only be formed of the circle and the semicircle, which are always joined for the same mystical purpose.

It follows that λ and δ are in themselves the shapes of other vessels. That is to say, λ is made of glass and δ of earth (earthenware or clay). In the second place, λ and δ may remind us of the Pestle and Mortar, which must be made of suitable substance, in which artificial unperforated pearls, lamels of crystal and beryl,

The Hieroglyphic Monad

chrysolite, precious rubies, carbuncles and other rare artificial stones may be ground to powder.

Lastly, that which is indicated by the letter ω is a small vessel containing the mysteries, which is never far from this last letter of the Greek alphabet now restored to its primitive mystagogy, and which is made by a single transposition of its component parts, consisting of two half-circles of equal size. Concerning the vulgar objects and necessities which are required in addition to the vessels, and the materials out of which they should be fashioned, it would be useless that we should treat of it here. Meanwhile a must be considered as if searching for the occasion to perform its function by a very secret and rapid spiral circulation and an incorruptible salt by which the first principle of all things is preserved, or better, that the substance which floats within the vitriol after its dissolution, shows the apprentice a primordial but very transitory specimen of our work, and if he is attentive, a very subtle and most effective way to prepare the work will be revealed to him.

Within λ , the glass vessel, during the exercise of its particular function, all air must be excluded or it will be extremely prejudicial. The corollary of ω is the agreeable man, ready, active, and well disposed at all times. Who, then, is not now able to procure the sweet and salutary fruits of this Science, which, I say, spring from the mystery of these two letters?

Some of those who would draw us away from our Garden of the Hesperides, and would make us view this a little closer as in a mirror, say that it is established that it is not formed from anything but our Monad.

But the straight line which appears in Alpha is homologous with that which, in the separation of the final analysis of our Cross, is already designated by the letter M. One may discover by these means from where the others are produced. See the scheme outlined in the table on page 33.

In these few words, I know that I give not only the principles but the demonstration to those who can see in them how to fortify the igneous vigour and the celestial origin, so that they may lend a willing ear to the great Democritus, certain that it is not mythical dogma but mystic and secret, according to which it is the medicine of the soul, the liberator from all suffering, and is prepared for those who wish for it and as he has taught; it is to be sought for in the Voice of the Creator of the Universe, so that men, inspired by God, and engendered anew, learn through the perfect disquisition of the mystical languages.

The Hieroglyphic Monad

		
Existing before the Elements	The Elements (Chaos)	After the Formation of the Elements
Mortal Adam, male & female	Consummation of the Genealogy of Elements	Immortal Adam
The Mortifying Self	CROSS	The Vivifying Self
Wrapped in Shadows	CROSS	Manifestation
Born in a stable	Sacrificed on the Cross	King of All ubiquitous
Self-conceived by own influence	Death and Burial	Reborn from its own Virtue
Power in the Seed	IHVH Decadal Virtue	Triumph in Glory
Creation of HYLE	Purification of the Elements	Transformation
Earthly Marriage	Martyrdom on the CROSS	Divine Marriage
Beginning	Middle	End

THEOREM XXIII

We now present in diagrammatic form the proportions already observed by us in the hieroglyphic construction of our Monad, which must be observed by those who wish to engrave them upon their seals or their rings, or to utilise them in some other manner. In the name of Jesus Christ crucified upon the Cross, I say the Spirit writes these things rapidly through me; I hope, and I believe, I am merely the quill which traces these characters. The Spirit draws us now towards our Cross of the Elements, with all the following measures which are also to be obtained by a reasoning process according to the subject-matter which it is proposed to discuss. Everything which exists under the heaven of the Moon contains the principle of its own generation within itself and is formed from the coagulation of the four Elements, unless it be the primary substance itself, and this in several ways not known to the vulgar, there being nothing in the created world in which the Elements are in equal proportion or in equal force. But by means of our Art, they can be restored to equality in certain respects, as the wise well know; therefore, in our Cross, we make the parts equal and unequal.

Another reason is that we can proclaim either similitude, or diversity, or unity, or plurality in affirming the secret properties of the equilateral Cross, as we have said before.

If we were to expound all the reasons which we know, for the proportions established in this way, or if we were to demonstrate the causes by another method which we have not done, although we have done so

The Hieroglyphic Monad

sufficiently for the Sages, we should transcend the limits of obscurity which we have prescribed, not without reason, for our discourse.

Take any point, as A for example, draw a straight line through it in both directions, as CAK. Divide the line CK at A by a line at right angles, which we will call DAE. Now select a point anywhere on the line

AK, let it be B, and one obtains the primary measurement of AB, which will be the common measure of our work. Take three times the length of AB and mark off the central line from A to C, which will be AC. Now take twice the distance between AB and mark it off on the line DAE at E and again at D, in such a way that the distance between D and E is four times the distance between A and B. Thus is formed our Cross of four Elements, that is to say, the Quaternary formed by the lines AB, AC, AD, AE. Now on the line BK take a distance equal to AD up the central line to I. With this point I as a centre, and IB as the radius, describe a circle which cuts the line AK at R: from the point R towards K mark a distance equal to AB, let it be RK. From the point K draw a line at right angles to the central line on both sides, forming an angle on either side of AK, which will be PFK. From the point K measure in the direction of F a distance equal to AD, which will be KF: now with K as centre and KF as radius describe a half-circle FLP, so that FKP is the diameter. Finally, at point C draw a line at right angles to AC sufficiently long in both directions to form OCQ. Now on the line CO we measure from C a distance equal to AB, which is CM, and with M as a centre and MC as a radius we describe a semicircle CHO. And in the same manner on CQ, from the point C we measure a distance equal to AB which is CN, and from the centre N, with CN as radius, we trace a semicircle CGQ, of which CNQ is the diameter. We now affirm, from this, that all the requisite measurements are found explained and described in our Monad.

The Hieroglyphic Monad

It would be well to notice, you who know the distances of our mechanism, that the whole of the line CK is composed of nine parts, of which one is our fundamental, and which in another fashion is able to contribute towards the perfection of our work: then, again, all the diameters and semi-diameters must be designated here by suppositional lines hidden or obscured, as the geometricians say. It is not necessary to leave any centre visible, the exception being the solar centre, which is here marked by the letter I, to which it is unnecessary to add any letter. Meanwhile those who are adept at our mechanism can add something to the solar periphery, by way of ornament and not by virtue of any mystical necessity: for this reason it has not been formerly considered by us. This something is a boundary ring, necessarily a line parallel to the original periphery. The distance between these parallels may be fixed at a quarter or a fifth part of the distance AB. One may also give to the crescent of the Moon a form which this planet frequently assumes in the sky, after her conjunction with the Sun—that is to say, in the form of the Horns, which you will obtain if from the point K in the direction of R you measure the distance just mentioned, i.e. the fourth or fifth part of the line AB, and if from the point thereby obtained, as a centre, you trace with the original lunar radius the second part of the lunar crescent, which joins the extremities at both ends of the first semicircle. You may perform a similar operation in respect of the positions M and N when erecting the perpendicular at each one of these centre points; we can use the sixth part of AB or a little less, from which point, as the

centre, we describe two other semicircles, using the radius of the two first, MC and NC.

Lastly, the parallels may be traced at each side of the two lines of our Cross, each side at a distance from the centre line of one-eighth to one-tenth part of the distance AB, in such a way that our Cross be in this manner formed into four superficial lines where the width is the fourth or the fifth part of this same line AB.

The Hieroglyphic Monad

I have wished in some way to sketch these ornaments in the figure which each one may reproduce according to his own fancy. It is a condition, however, that you do not commit any fault, however small, against the mystical symmetry for fear of introducing by your negligence a new discipline into these hieroglyphic measurements; for it is very necessary that during the succeeding progression in time they must be neither disturbed nor destroyed. This is much more profound than we are able to indicate, even if we wished to do so, in this small book, for we teach Truth, the daughter of Time, God willing.

We will now expound methodically certain things which you may find on your way by practising the proportions of our Monad. Then we will show by many examples the existence of four lines corresponding to the four lines of our Cross, and which in this consideration we are not able simply to announce, because of the proportions and the particular and mystical results which are produced in another fashion, from the Quaternary of these same lines. And thirdly, we will show that there exist within Nature certain useful functions determined by God by means of numbers, which we have happily obtained and which are explained either in this theorem, or in others, contained in this little book.

Finally, we will insert other things in an opportune place which, if they are conveniently understood, will produce fruits most abundantly.

We now abruptly conclude.

Our Canon of Transposition (Metathesis)

Take the same proportion which is shown in numbers when written in the natural order, after the first Monad, then from the first to the last make a continuous multiplication – that is to say, the first by the second, the product of these two by the third, and this product by the fourth, and so on until the last; the final product determines all the Metatheses possible, in respect of the proportion in space, and for the same reason in proportion to diverse objects as you wish.

I tell thee, O King, this operation will be useful unto thee in many circumstances, whether in the study of Nature or in the affairs of the government of men; for it is that which I am accustomed to use with the greatest of pleasure in the Tziruph or Themura of the Hebrews.

I know that many other powerful numbers may be produced out of our Quaternary, by virtue of arithmetic and the power of numbers. Yet he who does not understand that a very great obscurity has by this method been illuminated by those numbers which I have drawn out which have nature and distinction

The Hieroglyphic Monad

amongst such a multitude, will not be able to estimate their meaning, which is obscure and not to the point. How many will find in our numbers the authority which we have promised for the weight of the Elements; for the statements regarding measurements of time; and for the certainty of proportions which may

The Hieroglyphic Monad

be assigned to the powers and forces of things ? All this you should study in the two preceding diagrams.

Many things may be deduced from the diagrams which, it is preferable, should be studied silently rather than divulged openly in words. Meantime, let us inform you of one thing, amongst many others, disclosed now for the first time by us, in respect of this new Art; to wit, we have here established a rational cause by virtue of which the Quaternary with the Decad, in a certain manner, terminate the numerical series. We affirm that this cause is not exactly that which was described by the Masters who have preceded us, but just as we have stated it here. This Monad has been integrally and physically restored to itself – that is to say, it is truly the Monad Unitissima,

the proved unity of the images; and it is not within the power of Nature, neither can we by any art promote in it any movement or any progression whatsoever, unless it be by four super-celestial cycles or revolutions, and from this Monad is engendered that which we wish to note as the manner and course of its eminence; and for this reason, that there is not in the elemental world,

nor in the celestial or super-celestial worlds, any created power or influence which cannot be absolutely favoured and enriched by it.

It was because of the true effect of this that four illustrious men, friends of Philosophy, were upon an occasion together in the great work. One day they were astonished by a great miracle in this thing, and forthwith dedicated themselves from that day forward to sing praises to God and to preach the thrice Mighty because He had given them so much wisdom and power and so great an Empire over all other creatures.

THEOREM XXIV

Just as we commenced the first theorem of this little book with the point, the straight line, and the circle, and have extended it from the Monadic point to the extreme linear efflux of the Elements in a circle, almost analogous to the equinoctial which makes one revolution in 24 hours, so now at last we consummate and terminate the metamorphosis and the metathesis of all possible contents of the Quaternary defined by the number 24 by our present twenty-fourth theorem, to the honour and Glory of Him, as witnesseth John

The Hieroglyphic Monad

the Archpraesul of the Divine Mysteries, in the fourth and last part of the fourth chapter of the Apocalypse, who is seated on His Throne, around and in front of which the four animals, each with six wings, chant night and day without repose: "Holy, Holy, Holy is the Lord God Omnipotent, who was, is and is to come," the same as the 24 ancient ones in the 24 seats placed in the circle, adore Him and prostrate themselves, having cast their Crowns of gold to earth, saying: "Worthy art Thou, O God, to receive Glory, Honour, and Virtue, because Thou hast created all things, and out of Thy Will they have been created."

Amen.

Says the fourth letter.

He to whom God has given the will and the ability to know in this way the Divine mystery through the eternal monuments of literature and to finish with great tranquillity this work on the 25th January, having commenced it on the 13th of the same month.

In the year 1564 at Antwerp.

CONTRACTUS AD PUNCTUM

Here the vulgar eye will see nothing but Obscurity and will despair considerably.

The Stone of the Philosophers

by Sir Edward Kelly

This tractat is attributed to Sir Edward Kelly and is printed in *Tractatus duo egregii, de Lapide Philosophorum, una cum Theatro astronomiæ terrestri, cum Figuris, in gratiam filiorum Hermetis nunc primum in lucem editi, curante J. L.M.C. [Johanne Lange Medicin Candidato], Hamburg, 1676.*

This short tractat has been transformed into .pdf using Adobe Acrobat 5.0
by Caput Mortuum for the Ayin Quadma'ah Movement.

"Insignia Naturae Ratio Illustrat"

Though I have already twice suffered chains and imprisonment in Bohemia, an indignity which has been offered to me in no other part of the world, yet my mind, remaining unbound, has all this time exercised itself in the study of that philosophy which is despised only by the wicked and foolish, but is praised and admired by the wise. Nay, the saying that none but fools and lawyers hate and despise Alchemy has passed into a proverb. Furthermore, as during the preceding three years I have used great labour, expense, and care in order to discover for your Majesty that which might afford you much profit and pleasure, so during my imprisonment - a calamity which has befallen me through the action of your Majesty - I am utterly incapable of remaining idle. Hence I have written a treatise, by means of which your imperial mind may be guided into all the truth of the more ancient philosophy, whence, as from a lofty eminence, it may contemplate and distinguish the fertile tracts from the barren and stony wilderness. But if my teaching displease you, know that you are still altogether wandering astray from the true scope and aim of this matter, and are utterly wasting your money, time, labour, and hope. A familiar acquaintance with the different branches of knowledge has taught me this one thing, that nothing is more ancient, excellent, or more desirable than truth, and whoever neglects it must pass his whole life in the shade. Nevertheless, it always was, and always will be, the way of mankind to release Barabbas and to crucify Christ. This I have - for my good, no doubt - experienced in my own case. I venture to hope, however, that my life and character will so become known to posterity that I may be counted among those who have suffered much for the sake of truth. The full certainty of the present treatise time is powerless to abrogate. If your Majesty will deign to peruse it at your leisure, you will easily perceive that my mind is profoundly versed in this study.

(1) All genuine and judicious philosophers have traced back things to their first principles, that is to say, those comprehended in the threefold division of Nature. The generation of animals they have attributed to a mingling of the male and female in sexual union; that of vegetables to their own proper seed; while as the principle of minerals they have assigned earth and viscous water.

(2) All specific and individual things which fall under a certain class, obey the general laws and are referable to the first principles of the class to which they belong.

(3) Thus, every animal is the product of sexual union; every plant, of its proper seed; every mineral, of the mixture of its generic earth and water.

(4) Hence, an unchangeable law of Nature regulates the generation of everything within the limits of its own particular genus.

(5) It follows that, with reference to their origin, animals are generically distinct from vegetables and minerals; the same difference exists respectively between vegetables and minerals and the two other natural kingdoms.

(6) The common and universal matter of these three principles is called Chaos.

(7) Chaos contains within itself the four elements of all that is, viz., fire, air, water, and earth, by the mixture and motion of which the forms of all earthly things are impressed upon their subjects.

(8) These elements have four qualities: heat, coldness, humidity, dryness. The first inheres in fire, the second in water, the third in air, the fourth in earth.

(9) By means of these qualities, the elements act upon each other, and motion takes place.

(10) Elements either act upon each other, or are acted on, and are called either active or passive.

(11) Active elements are those which, in a compound, impress upon the passive a certain specific character, according to the strength and extent of their motion. These are water and fire.

(12) The passive elements - earth and air - are those which by their inactive qualities readily receive the impressions of the aforesaid active elements.

(13) The four elements are distinguished, not only by their activity and passivity, but also by the priority and posteriority of their motions.

(14) Priority and posteriority are here predicated either with references to the position of the whole sphere, or the importance of the result or aim of the motion.

(15) In space, heavy objects tend downwards, and light objects upwards; those which are neither light nor heavy hold an intermediate position.

(16) In this way, even among the passive elements, earth holds a higher place than air, because it delights more in rest; for the less motion, the more passivity.

(17) The excellence of result has reference to perfection and imperfection, the mature being more perfect than the immature. Now, maturity is altogether due to the heat of fire. Hence fire holds the highest place among active elements.

(18) Among the passive elements, the first place belongs to that which is most passive, i.e., which is most quickly and easily influenced. In a compound, earth is first passively affected, then air.

(19) Similarly, in every compound, the perfecting element acts last; for perfection is a transition from immaturity to maturity.

(20) Maturity being caused by heat, cold is the cause of immaturity.

(21) It is clear, then, that the elements, or remote first principles of animals, vegetables, and minerals, in Chaos, are susceptible of active movements in fire and water, and of passive movements in earth and air. Water acts on earth, and transmutes it into its own nature; fire heats air, and also changes it into its own likeness.

(22) The active elements may be called male, while the passive elements represent the female principle.

(23) Any compound belonging to any of these three kingdoms - animal, vegetable, mineral - is female in so far as it is earth and air, and male in so far as it is fire and water.

(24) Only that which has consistency is sensuously perceptible. Elementary fire and air, being naturally subtle, cannot be seen.

(25) Only two elements, water and earth, are visible, and earth is called the hiding-place of fire, water the abode of air.

(26) In these two elements we have the broad law of limitation which divides the male from the female.

(27) The first matter of vegetables is the water and earth hidden in its seed, these being more water than earth.

(28) The first matter of animals is the mixture of the male and female sperm, which embodies more moisture than dryness.

(29) The first matter of minerals is a kind of viscous water, mingled with pure and impure earth.

(30) Impure earth is combustible sulphur, which hinders all fusion, and superficially matures the water joined to it, as we see in the minor minerals, marcasite, magnesia, antimony, etc.

(31) Pure earth is that which so unites the smallest parts of its aforesaid water that they cannot be separated by the fiercest fire, so that either both remain fixed or are volatilized.

(32) Of this viscous water and fusible earth, or sulphur, is composed that which is called quicksilver, the first matter of the metals.

(33) Metals are nothing but Mercury digested by different degrees of heat.

(34) Different modifications of heat cause, in the metallic compound, either maturity or immaturity.

(35) The mature is that which has exactly attained all the activities and properties of fire. Such is gold.

(36) The immature is that which is dominated by the element of water, and is never acted on by fire. Such are lead, tin, copper, iron, and silver.

(37) Only one metal, viz., gold, is absolutely perfect and mature. Hence it is called the perfect male body.

(38) The rest are immature and, therefore, imperfect.

(39) The limit of immaturity is the beginning of maturity; for the end of the first is the beginning of the last.

(40) Silver is less bounded by aqueous immaturity than the rest of the metals, though it may indeed be regarded as to a certain extent impure, still its water is already covered with the congealing vesture of its earth, and it thus tends to perfection.

(41) This condition is the reason why silver is everywhere called by the Sages the perfect female body.

(42) All other metals differ only in the degree of their imperfection, according as they are more or less bounded by the said immaturity; nevertheless, all have a certain tendency towards perfection, though they lack the aforesaid congealing vesture of their earth.

(43) This congealing force is the effect of earthy coldness, balancing its own proper humidity, and causing fixation in the fluid matter.

(44) The lesser metals are fusible in a fierce fire, and therefore lack this perfect congealing force. If they become solid when cool, this is due to the arrangement of their aforesaid earthy particles.

(45) According to the different ways in which this viscous water and pure earth are joined together, so as to produce quicksilver by coagulation, with the mediation of natural heat, we have different metals, some of which are called perfect, like gold and silver, while the rest are regarded as imperfect.

(46) Whoever would imitate Nature in any particular operation must first be sure that he has the same matter, and, secondly, that this substance is acted on in a way similar to that of Nature. For Nature rejoices in natural method, and like purifies like.

(47) Hence they are mistaken who strive to elicit the medicine for the tinging of metals from animals or vegetables. The tincture and the metal tinged must belong to the same root or genus; and as it is the imperfect metals upon which the Philosopher's Stone is to be projected, it follows that the powder of the Stone must be essentially Mercury. The Stone is the metallic matter which changes the forms of imperfect metals into gold, as we may learn from the first chapter of "The Code of Truth": "The Philosophical Stone is the metallic matter converting the substances and forms of imperfect metals"; and all Sages agree that it can have this effect only by being like them.

(48) That Mercury is the first matter of metals, I will attempt to prove by the saying of some Sages. In the Turba Philosophorum, chapter i., we find the following words: "In the estimation of all Sages, Mercury is the first principle of all metals."

And a little further on: "As flesh is generated from coagulated blood, so gold is generated out of coagulated Mercury."

Again, towards the end of the chapter: "All pure and impure metallic bodies are Mercury, because they are generated from the same."

Arnold writes thus to the King of Aragon: "Know that the matter and sperm of all metals are Mercury, digested and thickened in the womb of the earth; they are digested by sulphureous heat, and according to the quality and quantity of the sulphur different metals are generated. Their matter is essentially the same, though there may be some accidental differences, such as a greater or less degree of digestion, etc. All things are made of that into which they may be resolved, e.g., ice or snow, which may be resolved into water; and so all metals may be resolved into quicksilver; hence they are made out of quicksilver."

The same view is set forth by Bernard of Trevisa, in his book on the "Transmutation of Metals": "Similarly, quicksilver is the substance of all metals; it is as a water by reason of the homogeneity which it possesses with vegetables and animals, and it receives the virtues of those things which adhere to it in decoction." A little further on the same Trevisan affirms that "Gold is nothing but quicksilver congealed by its sulphur."

And, in another place, he writes as follows: "The solvent differs from the soluble only in proportion and degree of digestion, but not in matter, since Nature has formed the one out of the other without any addition, even as by a process equally simple and wonderful she evolves gold out of quicksilver."

Again: "The Sages have it that gold is nothing but quicksilver perfectly digested in the bowels of the earth, and they have signified that this is brought about by sulphur, which coagulates the Mercury, and digests it by its own heat. Hence the Sages have said that gold is nothing but mature quicksilver." Such also is the consensus of other authorities. "The Sounding of the Trumpet" gives forth no uncertain note: "Extract quicksilver from the bodies, and you have above the ground quicksilver and sulphur of the same substance of which gold and silver are made in the earth."

The "Way of Ways" leads to the same conclusion: "Reverend Father, incline they venerable ears, and

understand that quicksilver is the sperm of all metals, perfect and imperfect, digested in the bowels of the earth by the heat of sulphur, the variety of metals being due to the diversity of their sulphur."

We find in the same tract a similar canon: "All metals in the earth are generated in Mercury, and thus Mercury is the first matter of metals."

To these words Avicenna signifies his assent in chapter iii.: "As ice, which by heat is dissolved into water, is clearly generated out of water, so all metals may be resolved into Mercury, whence it is clear that they are generated out of it."

This reasoning is confirmed by "The Sounding of the Trumpet": "Every passive body is reduced to its first matter by operations contrary to its nature; the first matter is quicksilver, being itself the oil of all liquid and ductile things."

So also the third chapter of the "Correction of Fools": "The nature of all fusible things is that of Mercury coagulated out of a vapour, or the heat of red or white incumbustible sulphur."

In chapter i. of the "Art of Alchemy" we read: "All Sages agree that the metals are generated from the vapour of sulphur and quicksilver."

Again, a passage in the Turba Philosophorum runs thus: "It is certain that every subject derives from that into which it can be resolved. All metals may be resolved into quicksilver, hence they were once quicksilver."

If it were worth while, I might adduce hundreds of other passages from the writings of the Sages, but as they would serve no good purpose, I will let these suffice.

Those persons make a great mistake who suppose that the thick water of Antimony, or that viscous substance which is extracted from sublimed Mercury, or from Mercury and Jupiter dissolved together in a damp spot, can in any case be the first substance of metals.

Antimony can never assume metallic qualities, because its water and moisture are not tempered with dry, subtle, earth, and want, moreover, that unctuousity which is characteristic of malleable metals.

But, as Chambar well says in the "Code of Truth": "It is only through jealousy that Sages have called the Stone Antimony."

In the same way, those who destroy the natural composition of Mercury, in order to resolve it into a thick or limpid water, which they call the first matter of metals, fight against Nature in the dark, like blinded gladiators.

As soon as Mercury loses its specific form, it becomes something else, which cannot thenceforth mingle with metals in their smallest parts, and is made void for the work of the Philosophers.

Whoever is taken up with such childish experiments, should listen to the Sage of Trevisa in his "Transmutation of Metals":

"Who can find truth that destroys the humid nature of Mercury? Some foolish persons change its specific metallic arrangement, corrupt its natural humidity by dissolution, and disproportionate quicksilver from its original mineral quality, which wanted nothing but purification and simple digestion. By means of salts, vitriol, and alum, they destroy the seed which Nature has been at pains to develop. For seed in human and sensitive things is formed by Nature and not by art, but by art it is united and mixed. Seed needs no addition, and brooks no diminution. If it is to produce a new thing of the same genus, it must remain the very same thing that was formed by Nature. All teaching that changes Mercury is false and vain, for this is the original sperm of metals, and its moisture must not be dried up, for otherwise it will not dissolve. Too much fire will cause a morbid heat, like that of a fever, and change the passive into active elements, thus the balance of forces is destroyed, and the whole work marred. Yet these fools extract from the lesser minerals corrosive waters, into which they project the different species of metals, and thus corrode them.

"The only natural solution is that by which out of the solvent and the soluble, or male and female, there results a new species. No water can naturally dissolve metals except that which abides with them in substance and form, which also the dissolved metals can again congeal; this is not the case with aqua fortis, seeing that it only destroys the specific arrangement. Only that water can rightly dissolve metals which is inseparable from them in fixation, and such a water is Mercury, but not aqua fortis, or any thing else which those fools are pleased to call Mercurial Water." Thus far Trevisan. Persons who have fallen into this fatal error may also derive benefit from the teaching of Avicenna on this point: "Quicksilver is cold and humid, and of it, or with it, God had created all metals. It is aerial,

and becomes volatile by the action of fire, but when it has withstood the fire a little time, it accomplishes great marvels, and is itself only a living spirit of unexampled potency. It enters and penetrates all bodies, passes through them, and is their ferment. It is then the White and the Red Elixir and is an everlasting water, the water of life, the Virgin's milk, the spring, and that Alum of which whosoever drinks cannot die, etc. It is the wanton serpent that conceives of its own seed, and brings forth on the same day. With its poison it destroys all things. It is volatile, but the wise make it to abide the fire, and then it transmutes as it has been transmuted, and tinges as it has been tinged, and coagulates as it has been coagulated. Therefore is the generation of quicksilver to be preferred before all minerals; it is found in all ores, and has its sign with all. Quicksilver is that which saves metals from combustion, and renders them fusible. It is the Red Tincture which enters into the most intimate union with metals, because it is of their own nature, mingles with them indissolubly in all their smallest parts, and, being homogeneous, naturally adheres to them. Mercury receives all homogeneous substances, but rejects all that is heterogeneous, because it delights in its own nature, but recoils from whatsoever is strange. How foolish, then, to spoil and destroy that which Nature made the seed of all metallic virtue by elaborate chemical operations!"

The "Rosary" bids us be particularly careful, lest in purifying the quicksilver we dissipate its virtue, and impair its active force. A grain of wheat, or any other seed, will not grow if its generative virtue be destroyed by excessive external heat. Therefore, purify your quicksilver by distillation over a gentle fire.

Says the Sage of Trevisa: "If the quicksilver be robbed of its due metallic proportion, how can other substances of the same metallic genus be generated from it? It is a mistake to suppose that you can work miracles with a clear limpid water extracted from quicksilver. Even if we could get such a water, it would not be of use, either as to form or proportion, nor could it restore or build up a perfect metallic species. For as soon as the quicksilver is changed from its first nature, it is rendered unfit for our operation, since it loses its spermatric and metallic quality. I do, indeed, approve of impure and gross Mercury being sublimed and purified once or twice with simple salt, according to the proper method of the Sages, so long as the fluxibility or radical humour of such Mercury remains unimpaired, that is to say, so long as its specific mercurial nature is not destroyed, and so long as its outward appearance does not become that of a dry powder."

In the "Ladder of the Sages" we are told to beware of vitrification in the solution of bodies, with the odour and taste of imperfect substances, and also of the generative virtue of their form being in any way scorched and destroyed by corrosive waters.

If you have been trying to do any of these things, you may see how grievous your mistake has been. For the water of the Sages adheres to nothing except homogeneous substances. It does not wet your hands if you touch it, but scorches your skin, and frets and corrodes every substance with which it comes in contact, except gold and silver (it would not affect these until they have been dissipated and dissolved by spirits and strong waters), and with these it combines most intimately. But the other mixture is most childish, it is condemned by the consent of the Sages, and by my own experience. I now propose to shew that quicksilver is the water with which, and in which, the solution of the Sages takes place, by putting before the reader the opinions of many Philosophers living in different countries and ages.

Says Menalates in the Turba: "Whoever joins quicksilver to the body of magnesia, and the woman to the man, extracts the hidden nature by which bodies are coloured. Know that quicksilver is a consuming fire which mortifies bodies by its contact."

Another Sage, in the Turba, says: "Divide the elements by fire, unite them through the mediation of Mercury, which is the greatest arcanum, and so the magistery is complete, the whole difficulty consisting in the solution and conjunction. The solution, or separation, takes place through the mediation of Mercury, which first dissolves the bodies, and these are again united by ferment and Mercury."

Rosinus makes Gold address Mercury as follows: "Dost thou dispute with me, Mercury? I am the Lord, the Stone which abides the fire." Says Mercury: "Thou sayest true; but I have begotten thee, and one part of me quickens many of thee, since thou art grudging in comparison with me. Whoever will join me to my brother or sister shall live and rejoice, and make me sufficient for thee."

In the 5th chapter of the "Book of Three Words," we read: "I tell thee that in Mercury are the works

of the planets, and all their imaginations in its pages."

Aristotle says that the first mode of preparation is that the Stone shall become Mercury; he calls Mercury the first body, which acts on gross substances and changes them into its own likeness. "If Mercury did nothing else than render bodies subtle and like itself, it would suffice us."

Senior: "Our Stone, then, is congealed water, that is to say, Mercury congealed in gold and silver, and, when fixed, resistant to the fire."

"The Sounding of the Trumpet": "Mercury contains all that the Sages seek, and destroys all flaky gold. It dissolves, softens, and extracts the soul from the body."

"The Book on the Art of Alchemy": "The Sages were first put upon attempting to clothe inferior bodies in the glory and splendour of the perfect body when they discovered that metals differ only according to the greater or smaller degree of their digestion, and are all generated from Mercury, with which they extracted gold and reduced it to its first nature."

The "Correction of Fools": "Observe that crude Mercury dissolves bodies and reduces them to their first matter or nature. Being made of clear water, it always strives to corrode the crude, and especially that which is nearest to its own nature, viz., gold and silver." The same book observes: "You can make use of crude Mercury as follows - to seal up and open natures, since similar things are helpful one to another." Once more: "Quicksilver is the root in the Art of Alchemy, for the Sages say that all metals are of it, and through it, and in it - it follows that the metals must first be reduced to Mercury, the matter and sperm of all metals."

Again: "The reason why all metals must be reduced to the nature of vapour is because we see that all are generated of quicksilver, though the mediation of which they came into being."

Gratianus: "Purify Laton, i.e., copper(ore), with Mercury, for Laton is of gold and silver, a compound, yellow, imperfect body."

"The Sounding of the Trumpet": "Common Mercury is called a spirit. If you do not resolve the body into Mercury, with Mercury, you cannot obtain its hidden virtue."

"Art of Alchemy," chapter vi.: "The second part of the Stone we call living Mercury, which, being living and crude, is said to dissolve bodies, because it adheres to them in their innermost being. This is the Stone without which Nature does nothing."

"Rosary": "Mercury never dies, except with its brother and sister. When Mercury mortifies the matter of the Sun and Moon, there remains a matter like ashes."

The Sage of Trevisa: "Add nothing above ground for digesting and thickening Mercury into the nature of gold or of metals." Again: "This solution is possible and natural, that is to say, by Art as handmaid to Nature, and is unique and necessary in the work; but it is brought about only by quicksilver, in such proportions as commend themselves to a good workman who knows the inmost properties of Nature."

"Art of Alchemy": "Who can sufficiently extol Mercury, for Mercury alone has power to reduce gold to its first nature?"

From these quotations it is clear what the Sages meant by their water, and what they thought of this wonderful liquid, viz., Mercury, to which they ascribed all power in the Magistery, for nothing can be perfected outside its own genus. Men digest vegetables, not in the blood of animals, but in water which is their first principle, nor are minerals affected by the vegetable liquid. In the words of the "Sounding of the Trumpet": "The whole Magistery consists in dividing the elements from the metals, and purifying them, and in separating the sulphur of Nature from the metals."

Furthermore, as Hermes says, only homogeneous substances cohere, and only they can produce offspring after their own kind, i.e., if you want a medicine which is to generate metals, its origin must be metallic, since "species are tinged by their genus," as the philosopher testifies.

In short, our Magistery consists in the union of the male and female, or active and passive, elements through the mediation of our metallic water and a proper degree of heat. Now, the male and female are two metallic bodies, and this I will again prove by irrefragable quotations from the Sages:

Dantius bids us prepare the bodies and dissolve them.

Rhasis: "Change the bodies into water, and the water into earth: then all is done."

Galienus: "Prepare the bodies, and purify them of the blackness in which is corruption, till the white becomes white and red, then dissolve both, etc."

Calid (chapter i.): "If you do not make the bodies subtle, so that they may be impalpable to touch, you

will not gain your end. If they have not been ground, repeat your operation, and see that they are ground and subtilized. If you do this, you will be directed to your desired goal."

Aristotle: "Bodies cannot be changes except by reduction into their first matter."

Calid (chapter v.): "Similarly, the Sages have commanded us to dissolve the bodies so that heat adheres to their inmost parts; then we proceed to coagulation after a second dissolution with a substance which most nearly approaches them."

Menabadus: "Make bodies not bodies, and incorporeal things bodies, for this is the whole process by which the hidden virtue of Nature is extracted."

Ascanius: "The conjunction of the two is like the union of husband and wife, from whose embrace results golden water."

"Anthology of Secrets": "Wed the red man to the white woman, and you have the whole Magistry."

"The Sounding of the Trumpet": "There is another quicksilver and permanent tincture which is extracted from perfect bodies by dissolution, distillation, sublimation, and subtilization."

Hermes: "Join the male to the female in their own proper humidity, because there is no birth without union of male and female."

Plato: "Nature follows a kindred nature, contains it, and teaches it to resist the fire. Wed the man to the woman, and you have the whole Magistry."

Avicenna: "Purify husband and wife separately, in order that they may unite more intimately; for if you do not purify them, they cannot love each other. By conjunction of the two natures you get a clear and lucid nature, which, when it ascends, becomes bright and serviceable."

"Art of Alchemy": "Two bodies provide us with everything in our water."

Trevisanus: "Only that water which is of the same species, and can be thickened by bodies, can dissolve bodies."

Hermes: "Let the stones of mixture be taken in the beginning of the first work, and let them be equally mixed into earth."

"Mirror": "Our Stone must be extracted from the nature of two bodies, before it can become a perfect Elixir."

Democritus: "You should first dissolve the bodies over white hot ashes, and not grind them except only with water."

"Rosary" of Arnold: "Extract the Medicine from the most homogeneous bodies in Nature."

I have thus proved the number of the bodies from which the Elixir is obtained. I will now shew by quotations what these bodies are.

"Exposition of the Letter of King Alexander": "In this art you must wed the Sun and the Moon."

"The Sounding of the Trumpet": "The Sun only heats the earth and imparts to it his virtue through the mediation of the Moon, which, of all stars, most readily receives his light and heat."

"The Correction of Fools": "Sow gold and silver, and they will yield to your labour a thousandfold, through the mediation of that thing which alone has what you seek. The Tincture of gold and silver exhibits the same metallic proportions as the imperfect metals, because they have a common first matter in Mercury."

Again: "Tinge with gold and silver, because gold gives the golden and silver the silver colour and nature. Reject all things that have not naturally or virtually the power of tinging, as in them is no fruit, but only waste of money and gnashing of teeth."

Senior: "I, the Sun, am hot and dry, and thou, the Moon, art cold and moist; when we are wedded together in a closed chamber, I will gently steal away thy soul."

Rosinus to Saratant: "From the living water we obtain earth, a homogeneous dead body, composed of two natures, that of the Sun and that of the Moon."

Again: "When the Sun, my brother, for the love of me (silver) pours his sperm (i.e. his solar fatness) into the chamber (i.e. my Lunar body), namely, when we become one in a strong and complete complexion and union, the child of our wedded love will be born."

Hermes: "Its humidity is of the empire of the Moon, and its fatness of the empire of the Sun, and these two are its coagulum and pure seed."

Astratus says: "Whoever would attain the truth, let him take the humour of the Sun and the Spirit of the Moon."

Turba Philosophorum: "Both bodies in their perfection should be taken for the composition of the

Elixir, whether orange or white, for neither becomes liquid without the other."

Again, Gold says: "No one kills me but my sister."

Aristotle: "If I did not see gold and silver, I should certainly say that Alchemy was not true."

The Sage: "The foundation of our Art is gold and its shadow."

"Art of Alchemy": "We have already said that gold and silver must be united."

"Rosary": "There is an addition of orange colour by which the Medicine is perfected from the substance of fixed sulphur, i.e., both medicines are obtained from gold and silver."

The Sage: "Whoever knows how to tinge sulphur and quicksilver has reached the great arcanum.

Gold and silver must be in the Tincture, and also the ferment of the spirit."

"Rosary": "The ferment of the Sun is the sperm of the man, the ferment of the Moon, the sperm of the woman. Of both we get a chaste union and a true generation."

"The Sounding of the Trumpet": "You want silver to subtilize your gold, and make it volatile by removing its impurity, since the silver has a greater need of the light of gold. Therefore Hermes, as also Aristotle in his treatise on Plants, says that gold is its father, and silver its mother; nothing else is needed for our Stone. Silver is the field in which the seed of gold is sown." And a little further on: "In my sister, the Moon, grows your wisdom, and not in any other of my servants, saith the Lord Sun. I am like seed sown in good and pure soil, which sprouts and grows and multiplies and yields great gain to the sower. I, the Sun, give to thee, the Moon, my beauty, the light of the Sun, when we are united in our smallest parts." And the Moon says to the Sun: "Thou hast need of me, as the cock has need of the hen, and I need thy operation, who art perfect in morals, the father of lights, a great and mighty lord, hot and dry, and I am the waxing Moon, cold and moist, but I receive thy nature by our union."

Avicenna: "In order to obtain the red and the white Elixir, the two bodies must be united. For though gold is the most fixed and perfect of the metals, yet if it be dissolved into its smallest parts, it becomes spiritual and volatile, like quicksilver, and that because of its heat. This tincture, which is without number, is called the hot male seed. But if silver be dissolved in warm water, it remains fixed as before, and has little or no tincture, yet it readily receives the tincture in a temperament of hot and cold, and is called the cold, dry, female seed. Gold or silver by themselves are not easily fusible, but a mixture of the two melts readily, as is well known to goldsmiths. Hence if our Stone did not contain both gold and silver, it would not be liquid, and would yield no medicine through any magistry, nor tincture, for if it yielded tincture it would still have no tinging power."

And a little further on: "Take heed, then, and operate only on gold, silver, and quicksilver, since all the profit of our Art is derived from these three."

I may add that crude Mercury is the water which the Sages have used for the purpose of solution. I have proved that two bodies must be dissolved, and that they are no other than gold and silver. Now I will describe the conjunction of these two bodies by means of the crude Mercury of the Sages.

"The Light of Lights": "Know that it is gold, silver, and Mercury that whiten and redden within and without. The Dragon does not die, unless he be killed with his brother and sister, and it must be not by one, but by both together."

"The Ladder of the Sages": "Others say that a true body must be added to these two, to strengthen and shorten the operation."

"Treasury of the Sages": "Our Stone has body, soul, and spirit, the imperfect body is the body, the ferment the soul, and the water the spirit."

"The Way of Ways": "The water is called the spirit, because it gives life to the imperfect and mortified body, and imparts to it a better form; the ferment is the soul, because it gives life to the body, and changes it into its own nature."

Again: "The whole Magistry is accomplished with our water, and of it. For it dissolves the bodies, calcines and reduces them to earth, transforms them into ashes, whitens and purifies them, as Morienus says: "Azoth and fire purify Laton, that is to say, wash it and thoroughly remove its obscurity; Laton is the impure body, Azoth is quicksilver."

"The Sounding of the Trumpet": "As without the ferment there is no perfect tincture, as the Sages say, so without leaven there is no good bread. In our Stone the ferment is like the soul, which gives life to the dead body through the mediation of the spirit, or Mercury."

"The Rosary" and Peter of Zalendum say: "If the ferment, which is the medium of conjunction, be

placed in the beginning, or in the middle, the work is more quickly perfected."

"The Sounding of the Trumpet": "The Elixir of the Sages is composed of three things, viz., the Lunar, the Solar, and the Mercurial Stone. In the Lunar Stone is white sulphur, in the Solar Stone red sulphur, and the Mercurial Stone embraces both, which is the strength of the whole Magistery."

Eximenus: "The water, with its adjuncts, being placed in the vessel, preserves them from combustion. The substances being ground with water, there follows the ascension of the Ethelia and the imbibition of water is sufficient by itself to complete the work."

Plato: "Take fixed bodies, join them together, wash the body in the bodily substance, and let it be strengthened with the incorporeal body, till you change it into a real body."

Pandulphus: "The fixed water is pure water of life, and no tinging poison is generated without gold and its shadow. Whoever tinges the poison of the Sages with the Sun and its shadow, has attained the highest wisdom."

Again: "Separate the elements with fire, unite them by means of Mercury, and the Magistery is complete."

Exercit, 14: "The spirit guards the body and preserves it from fire, the clarified body keeps the spirit from evaporating over the fire, the body being fixed and the spirit incombustible. Hence the body cannot be burnt, because the body and spirit are one through the soul. The soul prevents them from being separated by the fire. Hence the three together can defy the fire and anything else in the world."

Rhasis("Book of Lights"): "Our Stone is named after the creation of the world, being three and yet one. Nowhere is our Mercury found purer than in gold, silver and common Mercury."

When bodies and spirits are dissolved, they are resolved into the four elements, which become a firm and fixed substance. But when they are not both dissolved, there is a particular mixture which the fire can still separate."

Rosinus: "In our Magistery are a spirit and bodies, whence it is said: It rejoices being sown in the three associated substances."

Calid: "Prepare the strome bodies with the dissolves humidity, till either shall be reduced to its subtle form. If you do not subtilize and grind the bodies till they become impalpable, you will not find what you seek."

Rosinus: "The Stone consists of body, soul, and spirit, or water, as the Philosophers say, and is digested in one vessel. Our whole Magistery is of, and by, our water, which dissolves the bodies, not into water, but by a true philosophical solution into the water whence metals are extracted, and is calcined and reduced to earth. It makes yellow as wax those bodies into whose nature it is transformed; it substantialises, whitens, and purifies the Laton, according to the word of Morienus."

Aristotle: "Take your beloved son, and wed him to his sister, his white sister, in equal marriage, and give them the cup of love, for it is a food which prompts them to union. All pure things must be united to pure things, or they will have sons unlike themselves. Therefore, first of all, even as Avicenna advises, sublime the Mercury, and purify in it impure bodies. Then pound and dissolve. Repeat this operation again and again."

Ascanius: "Stir up war between copper and Mercury till they destroy each other and devour each other. Then the copper coagulates the quicksilver, the quicksilver congeals the copper, and both bodies become a powder by means of diligent imbibition and digestion. Join together the red man and the white woman till they become Ethelia, that is, quicksilver. Whoever changes them into a spirit by means of quicksilver, and then makes them red, can tinge every body."

As to the nature of this copper, Gratianus instructs us in the following words: "Make Laton white, i.e., whiten copper with Mercury, because Laton is an orange imperfect body, composed of gold and silver."

I advise all and sundry to follow my teaching, as to the correctness of which my quotations from the ancients can leave no doubt, which also has received further confirmation from my own experiments. Any deviation from this course leads to deception, except only the work of Saturn, which must be performed by the subtilization of principles. The Sages say that homogeneous things only combine with each other, make each other white and red, and permit of common generation. The important point is that Mercury should act upon our earth. This is the union of male and female, of which the Sages say so much. After the water, or quicksilver, has once appeared, it grows and increases, because the earth becomes white, and this is called the impregnation. Then the ferment is coagulated,

i.e., joined to the imperfect prepared body, till they become one in colour and appearance: this is termed the birth of our Stone, which the Sages call the King. Of this substance it is said in the "Art of Alchemy" that if any one scorches this flower, and separates the elements, the generative germ is destroyed.

I conclude with the words of Avicenna: "The true principle of our work is the dissolution of the Stone, because solved bodies have assumed the nature of spirits, i.e., because their quality is drier. For the solution of the body is attended with the coagulation of the spirit. Be patient, therefore, digest, pound, make yellow as wax, and never be weary of repeating these processes till they are quite perfect. For things saturated with water are thereby softened. The more you pound the substance, the more you soften it, and subtilize its gross parts, till they are thoroughly penetrated with the spirit and thus dissolved. For by pounding, roasting, and fire, the tough and viscous parts of bodies are separated."

Finally, I do you to wit, sons of knowledge, that in the work of the Sages there are three solutions. The first is that of the crude body.

The second is that of the earth of the Sages.

The third is that which takes place during the augmentation of the substance. If you diligently consider all that I have said, this Magistery will become known to you. As for me, how much I have endured on account of this Art, history will reveal to future ages.

P R E F A C E.

THE present volume contains two curious documents concerning Dr. Dee, the eminent philosopher of Mortlake, now for the first time published from the original manuscripts. I. His Private Diary, written in a very small illegible hand on the margins of old Almanacs, discovered a few years ago by Mr. W. H. Black, in the library of the Ashmolean Museum at Oxford. II. A Catalogue of his Library of Manuscripts, made by himself before his house was plundered by the populace, and now preserved in the library of Trinity College, Cambridge.

The publication of this Diary will tend perhaps to set Dee's character in its true light, more than any thing that has yet been printed. We have, indeed, his "Compendious Rehearsall," which is in some respects more comprehensive, but this was written for an especial purpose, for the perusal of royal commissioners, and he has of course carefully avoided every allusion which could be construed in an unfavourable light. In the other, however, he tells us his dreams, talks of mysterious noises in

his chamber, evil spirits, and alludes to various secrets of occult philosophy in the spirit of a true believer. Mr. D'Israeli has given a correct and able view of his character in his "Amenities of Literature," which is remarkably confirmed in almost every point by the narrative now published. "The imagination of Dee," observes that elegant writer, "often predominated over his science; while both were mingling in his intellectual habits, each seemed to him to confirm the other. Prone to the mystical lore of what was termed the occult sciences, which in reality are no sciences at all, since whatever remains occult ceases to be science, Dee lost his better genius." I shall refer the reader to this popular work instead of attempting an original paper on the subject, which would necessarily be greatly inferior to that drawn by the masterly hand of the author of the "Curiosities of Literature."

The Catalogue of Dee's Library of Manuscripts, although long since dispersed, is valuable for the notices which it preserves of several middle-age treatises not now extant. He is said to have expended on this collection the sum of three thousand pounds, a very large sum in those days for a person of limited income.

J. O. H.

35, Alfred Place,
March 15th 1842.

DR. DEE'S DIARY.

1554. Aug. 25th, Barthilmew Hikman born at Shugborowh in Warwikshyre toward evening. My conjecture, uppon his own reporte of circumstances. Oct. 25th, D. Daniel Vander Meulen Antwerpiaë, mane hora quarta.*

1555. April 22nd, Jane Fromonds borne at Cheyham at none. Aug. 1st, Ed. Kelly natus hora quarta a meridiē† ut annotatum reliquit pater ejus. Oct. 12th, the Lord Willughby born hora septima mane, ante meridiem, Lat. 51° 30', at Wesell in Gelderland.

1557. July 30th, Mr. Arundell of Cornwayle natus circa [horam] quartam a meridiē.

1558. Dec. 14th, Mary Nevelle, alias Mary Lewknor, borne inter 11 et meridiem mane, by Chichester.

1560. July 8th, Margaret Russell, Cowntess of Cumberland, hora 2 min. 9 Exoniaë mane.

1561. Aug. 14th, Mr. Heydon, of Baconsthorp in Norfolk, hora noctis 11½ natus in comitatu Surrey.

1563. March 23rd, Mr. William Fennar a meridiē inter horam undecimam et duodecimam nocte. June 23nd, Jane Cooper, now

* It is almost unnecessary to observe that this and the following are notes of nativities. They are not for the most part contemporary notices, but apparently inserted at various times by Dee when professionally consulted as an astrologer.

† "Anno 1555, Aug. 1, hora quarta a meridiē Wigorniaë natus Dominus Edouardus Kelsæus," MS. Ashm. 1788, fol. 140, where there is a horoscope of this nativity in the handwriting of Dr. Dee. Ashmole, in his MS. 1790, fol. 58, says "Mr. Lilly told me that John Evans informed him that he was acquainted with Kelly's sister in Worcester, that she shewed him some of the gold her brother had transmuted, and that Kelly was first an apothecary in Worcester."

Mystris Kelly, toward evening. Sept. 28th, Mr. John Ask ante meridiem, by York six myle on this syde; Elizabeth Mownson, circa horam 9 mane, soror magistri Thomæ Mownson et uxor magistri Brown.

1564. Mrs. Brigit Cooke borne about seven of the klok on Saynt David's Day, which is the first day of March, being Wensday; but I cannot yet lerne whether it was before none or after. But she thinketh herself to be but 27 yeres old, anno 1593, Martii primo, but it cannot be so. June 20th, Mr. Hudson, hora septima ante meridiem. Aug. 21st, Wenefride Goose, inter 9 et 10 a meridie by Kingstone.

1565. Sept. 12th, John Pontoys, inter 9 et 10 ante meridiem prope Stony-Stratford; puto potius hora 8 min. 43. Oct. 17th, Thomas Kelley* hora quarta a meridie at Wurceter. Dec. 21st, Mr. Thomas Mownson at 11 of the klok in the morning.

1568. July 14th, William Emery born at Danbery in Essex paulo post undecimam horam noctis. Sept. 24th, Margaret Anderson mane inter 7 et 8.

1571. Samuel Swallow borne at Thaxstede in Essex Feb. 15 ante meridiem, inter horam undecimam et duodecimam, forte hora media post undecimam.

1575. July 31st, Simeon Stuard natus ante diluculum per horam 11½ at Shinfelde; his grandfather by the mother was Dr. Huyck the Quene's physicien.

1577. Jan. 16th, the Erle of Leicester, Mr. Phillip Sydney, Mr. Dyer, &c., came to my howse.† Jan. 22nd, The Erle of Bedford

* The brother of the celebrated astrologer before mentioned.

† "Dr. Dee dwelt in a house neere the water side, a little westward from the church [at Mortlake]. The buildings which Sir Fr. Crane erected for working of tapestry hangings, and are still (1673) employed to that use, were built upon the ground whereon Dr. Dee's laboratory and other roomes for that use stood. Upon the west is a square court, and the next is the house wherein Dr. Dee dwelt, now inhabited by one Mr. Selbury, and further west his garden."—MS. Ashm. 1788, fol. 149. The same account says that "Dr. Dee was wel beloved and respected of all persons of quality thereabouts, who very often invited him to their houses or came to his."

cam to my howse. Feb. 19th, great wynde S.W., close, cloudy. March 11th, my fall uppon my right nuckul bone, hora 9 fere mane; wyth oyle of Hypericon in 24 howres eased above all hope: God be thanked for such his goodness of his creatures! March 24th, Alexander Simon the Ninivite came to me, and promised me his servise into Persia. May 1st, I received from M. William Harbert of St. Gillian his notes uppon my Monas.* May 2nd, I understode of one Vincent Murfyn his abhominable misusing me behinde my back; Mr. Thomas Besbich told me his father is one of the cokes of the Court. May 20th, I hyred the barber of Cheswik, Walter Hooper, to kepe my hedges and knots in as good order as he sed them than, and that to be done with twice cutting in the yere at the least and he to have yerely five shillings, [and] meat and drink. June 10th, circa 10, a shower of hayle and rayne. June 18th, borrowed £40 of John Hilton of Fulham. June 19th, I understode of more of Vincent Murfyn his knavery; borrowed £20 of Bartylmew Newsam. June 20th, borow £27 uppon the chayn of golde. June 26th, Elen Lyne gave me a quarter's warn-ing. June 27th, shows of rayne and hayle. Aug. 19th, the Hexameron Brytanicum† put to printing.

Nov. 3rd, William Rogers of Mortlak, abowt 7 of the klok in the morning, cut his own throte, by the fende his instigation. Nov. 6th, Sir Umfrey Gilbert cam to me to Mortlak. Nov. 18th, borowed of Mr. Edward Hynde of Mortlak £30 to be repayed at Hallowtyde next yere. Nov. 20th, two tydes in the forenone,

* This of course is his celebrated *Monas Hieroglyphica*, frequently printed, and the nature of which I attempted to explain in a paper read before the Society of Antiquaries. Mr. Herbert, according to MS. Ashm. 1788, "dwelt then in Mortlack and was an intimate friend of Dr. Dee's."

† This was his work printed in 1577 under the title of *General and Rare Memorials pertayning to the perfect Art of Navigation*, in folio, now a book of the greatest rarity. The original manuscript of it is in MS. Ashm. 1789, and Dee's own copy of the published work with MS. notes and additions is preserved in the British Museum. In his *Letter Apologetical*, 4to. Lond. 1603, he cites this work under the title of *The Brytish Monarchie*, as having been written in the year 1576.

the first 2 or 3 howres to sone. Nov. 22nd, I rod to Windsor to the Q. Majestie. Nov. 25th, I spake with the Quene hora quinta. Nov. 28th, I spake with the Quene hora quinta; I spake with Mr. Secretary Walsingham.* I declared to the Quene her title to Greenland, Estetiland and Friseland.

Dec. 1st, I spake with Sir Christofer Hatton; he was made knight that day. Dec. 1st, I went from the cowrte at Wyndsore. Dec. 30th, *inexplissima illa calumnia de R. Edwardo, iniquissime aliqua ex parte in me denunciabatur: ante aliquos elapsos dies, sed sua sapientia me innocentem.*

1578. Feb. 5th, sponsalia cum Jana Fromonds horam circiter primam. April 28th, I caused Sir Rowland Haywood to examyn Francys Baily of his sklanderme, which he denyed utterly. June 13th, rayn and in the afternone a little thunder. June 30th, I told Mr. Daniel Rogers,† Mr. Hackluyt of the Middle Temple being by, that Kyng Arthur and King Maty, both of them, did conquer Gelindia, lately called Friseland, which he so noted presently in his written copy of *Monumethensis*,‡ for he had no printed boke therof. July 14th, my sister Elizabeth Fromonds cam to me. July 27th, hora 9, min. 15 a meridie Francis Cowntess of Hertford.

Aug. 5th, Mr. Raynolds of Bridewell tok his leave of me as he passed toward Dardmowth to go with Sir Umfry Gilbert toward Hocheleya. Aug. 15, I went toward Norwich with my work of *Imperium Brytanicum*.§ Aug. 23rd, I cam to London from Norwich. Aug. 31st, I went to my father-in-law Mr. Fromonds to Cheyham.

* Ashmole informs us that Walsingham continued for a length of time one of Dr. Dee's best patrons.

† Rogers was a member of the University of Oxford, and a large commonplace-book in his handwriting is in Archbishop Tenison's library in St. Martin's-in-the-Fields.

‡ That is, *Galfridus Monumetensis de gestis regum Britannie*. Hackluyt mentions this fact in his collection of voyages.

§ This is the book just mentioned under the title of *General and Rare Memorials*, fol. Lond. 1577.

Sept. 1st, I cam from Cheyham. Sept. 6th, Elen Lyne, my mayden, departed from this life immediately after the myd-day past, when she had lyne sik a month lacking one day. Sept. 12th, Jane Gael cam to my servyce, and she must have four nobles by the yere, 26s. 8d. Sept. 25th, Her Majestie cam to Richemond from Greenwich. Sept. 26, the first rayn that came for many a day; all pasture about us was withered: rayn afternone like Aprill showres. Oct. 8th, the Quene's Majestie had conference with me at Richemond inter 9 et 11. Oct. 16th, Dr. Bayly conferred of the Quene her disease. Oct. 22nd, Jane Fromonds went to the court at Richemond. Oct. 25th, a fit from 9 afternone to 1 after mydnight. Oct. 28, the Erle of Lecester and Sir Francys Walsingham, secretary, determined my going over for the Quene's Majestie. Nov. 4th, I was directed to my voyage by the Erle of Lecester and Mr. Secretary Walsingham hora nona. Nov. 7th, I cam to Gravesende. Nov. 9th, I went from Lee to sea. Nov. 14th, I cam to Hamburg hora tertia. Dec. 11th, to Franckfurt-uppon-Oder. Dec. 15th, newes of Turnifer's comming hora octava mane, by a speciall mesenger.

1579. A moyst Marche and not wyndy. June 10th, I shewed to Mr. John Lewis and his sonne, the physition, the manner of drawing aromaticall oyles. At that tyme my cat got a fledge yong sparrow which had onely a right wyng naturally. June 15th, my mother surrendred Mortlak howses and land, and had state geven in plena curia ad terminum vitæ, and to me was also the reversion delivered per virgam, and to my wife Jane by me, and after to my heirs and assignes for ever, to understand, Mr. Bullok and Mr. Taylor, surveyor, at Wimbledon, under the tree by the church. June 22nd, Mr. Richard Hickman and Barthilmew his nephew cam to me with Mr. Flowr, commended by Mr. Vicechamberlayn Sir Christopher Hatton.

July 6th, Mr. Hitchcok, who had travayled in the plat for fishing, made acquayntance with me, and offred me great curtesy.

July 13th, *Arthurus Dee natus * puer mane hor. 4 min. 30 fere, vel potius min. 25, in ipso ortu solis, ut existimo.* After 10 of the clock this night my wive's father Mr. Fromonds was speechles, and died on Tuesday (July 14th) at 4 of the clock in the morning. July 16th, Arthur was christened at 3 of the clock afternone; Mr. Dyer and Mr. Doctor Lewys, judg of the Admiralty, were his godfathers; and Mistres Blanche Pary of the Privie Chamber his godmother. But Mr. John Harbert of Estshene was deputy for Dr. Lewys, and Mystres Awbrey was deputy for my cosen Mistres Blanche Pary.

Aug. 8th, John Elместon,† student of Oxford, cam to me for dialling. Aug. 9th, Jane Dee churched. Aug. 16th, Monsieur cam secretly to the court from Calays. Aug. 20th, wyndy, clowdy, rayny. Aug. 26, Monsieur went back agayn to France. Sept. 10th, my dream of being naked, and my skyn all overwrought with work like some kinde of tuft mockado, with crosses blew and red; and on my left arme, abowt the arme, in a wreath, this word I red—*sine me nihil potestis facere*: and another the same night of Mr. Secretary Walsingham, Mr. Candish, and myself.

Oct. 3rd, Sir Leonel Ducket his unkend letter for mony. Oct. 4th, goodman Hilton requested me for his ij. sonnes to resort to my howse. Oct. 5th, raging wynde at West and Southerly, in the night chefely. Oct. 9th, 10th, 11th, 12th, great rayne for three or four dayes and nights. Oct. 13th, this day it broke up; the fote bote for the ferry at Kew was drowned and six persons, by the negligens of the ferryman overwhelming the boat uppon the roap set there to help, by reason of the vehement and high waters. Oct. 18th, Mr. Adrian Gilbert and John Davys reconcyled themselves to me, and disclosed some of Emery his most unhonest,

* His horoscope is in MS. Ashm. 1788. "Mr. Arthur Dee's birth was accompanied by the unhappy accident of the death of Mr. Fromonds, his mother's father, who died that morning."—MS. Ashm. 1790, fol. 63.

† This person is not noticed by the Oxford biographers.

hypocriticall, and devilish dealings and devises agaynst me and other, and likewise of that errant strompet her abominable wordes and dedes; and John Davis sayd that he might curse the tyme that ever he knew Emery, and so much followed his wicked cownsayle and advyse. So just is God! Oct. 31st, payed *xxs.* fyne for me and Jane my wife to the Lord of Wimbleton (the Quene), by goodman Burton of Putney, for the surrender taken of my mother of all she hath in Mortlak to Jane and me, and than to my heyres and assynes, &c.

Nov. 25th, the Lord Clinton cam to me and offred Skirbeck by Boston for Long Lednam. Nov. 29th, I receyved a letter from Mr. Thomas Jones. Dec. 9th, *Θις νιγτ μι νυιφ δρεμιδ θατ ονε καμ το ερ ανδ τουχεδ ερ, σαιινγ, " Μιστρες Δεε, γου αρ κονκεινεδ οφ χιλδ, υος ναμε μυστ βε Ζαχαριας; βε οφ γυδ χερε, ε σαλ δο νυελ ας θις δοθ!"* * Dec. 22nd, I payd Jane *13s.* and *4d.* for her wagys tyll Michelmas last, for the half yere, so that I owe her yet *6s. 8d.* Dec. 28th, I reveled to Roger Coke† the gret secret of the elixir of the salt *οφ ακετελς ονε υππον α υνδρεδ.*

1580. Jan. 13th, I gave my wife mony for the month. Jan. 16th, Arthur fell sick, stuffed with cold fleym, could not slepe, had no stomach to eat or drink as he had done before. Feb. 26th, this night the fyre all in flame cam into my maydens chamber agayne, betwene an eleven and twelve of the cloke; contynued half an howr terribly, so it did a yere before to the same maydens, Mary Cunstable and Jane Gele. May 17th, at the Moscovy howse for the Cathay voyage. June 3rd, Mr. A. Gilbert and J. Davys rod homward into Devonshire. June 7th, Mr. Skydmor and his wife

* Dee has occasionally made use of Greek letters for the preservation of his notes, still retaining the English language. The present passage may as well be given:— " This night my wife dreamed that one cam to her and touched her, saying, ' Mistres Dee, you are conceived of child, whose name must be Zacharias; be of good chere, he sal do well as this doth!'"

† In a more appropriate place I shall give from an Ashmolean manuscript a traditionary anecdote relating to this Roger Coke, or Cooke, and the great secret which Dee revealed to him.

lay at my howse and Mr. Skydmor's dowghter, and the Quene's dwarf Mrs. Tomasin. June 8th, my wife went with Mistres Skydmor to the court. June 12th, Mr. Zackinson and Mr. Cater lay at my howse, having supped at my Lady Crofts. June 14th, Mr. Fosku of the Wardrip lay at my howse, and went the next day to London with Mr. Coweller. July 15th, the Lady Croft went from Mortlak to the court at Otlands. June 30th, payd Jane 20s. for thre quarters' wages, so that all that is due is payd, and all other recknengs likewise is payd her 6s. 8d.; and Mary Constable was payd all old reknings 15s., and my wife had eleven pounds to dischargd all for thirteen wekes next, that is, till the 5th of November: I delivered Mr. Williams, the person of Tendring, a lettre of attorney agaynst one White of Colchester, for a sklaundre.

Aug. 27th, Arthur was weaned this night first. Aug. 28th, my dealing with Sir Humfrey Gilbert for his graunt of discovery. Aug. 30th, Nurse Darant was discharged and had 10s. given her, which was the whole quarter's wages due at a fortnight after Michelmas.

Sept. 6th, the Quene's Majestie cam to Richemond. Sept. 10th, Sir Humfry Gilbert graunted me my request to him, made by letter, for the royalties of discovery all to the North above the parallell of the 50 degree of latitude, in the presence of Stoner, Sir John Gilbert, his servant or reteiner; and thereuppon toke me by the hand with faithfull promises in his lodging of John Cooke's howse in Wichcross strete, where wee dyned onely us three together, being Satterday. Sept. 13th, Mr. Lock brought Benjamyn his sonne to me: his eldest sonne also, called Zacharie, cam then with him. Sept. 17th, the Quene's Majestie cam from Rychemond in her coach, the higher way of Mortlak felde, and whan she cam right against the church she turned down toward my howse: and when she was against my garden in the felde she stode there a good while, and than cam ynto the street at the great gate of the felde, where she espyed me at my doore making

obeysains to her Majestie ; she beckend her hand for me ; I cam to her coach side, she very speedily pulled off her glove and gave me her hand to kiss ; and to be short, asked me to resort to her court, and to give her to wete when I cam ther ; hor. 6¼ a meridie. Sept. 14th, I began against Vincent Murphyn. Sept. 15th, I wrote to the bishop of London. Sept. 22nd, my declaration against Vincent Murphin put into the court of Geldhall.

Oct. 3rd, on Munday, at 11 of the klok before none, I delivered my two rolls of the Quene's Majesties title unto herself in the garden at Richemond, who appointed after dynner to heare further of the matter. Therfore betwene one and two afternone, I was sent for into her highnes Pryvy Chamber, where the Lord Threasurer allso was, who, having the matter slightly then in consultation, did seme to dowt much that I had or could make the argument probable for her highnes' title so as I pretended. Wheruppon I was to declare to his honor more playnely, and at his leyser, what I had sayd and could say therin, which I did on Tuesday and Wensday following, at his chamber, where he used me very honorably on his behalf. Oct. 7th, on Fryday I cam to my Lord Threasorer, and he being told of my being without, and allso I standing before him at his comming furth, did not or would not speak to me, I dowt not of some new greif conceyved. Oct. 10th, the Quene's Majestie, to my great cumfort (hora quinta), cam with her trayn from the court and at my dore graciously calling me to her, on horsbak, exhorted me briefly to take my mother's death patiently, and withall told me that the Lord Threasorer had gretly commended my doings for her title, which he had to examyn, which title in two rolls he had browght home two howrs before ; she remembred allso how at my wive's death it was her fortune likewise to call uppon me.* At 4

* His first wife died on the 16th of March 1575, when " the Queen's Majestie, with her most honourable Privy Council, and other her Lords and Nobility, came purposely to have visited my library : but finding that my wife was within four houres before buried out of the house, her Majestie refused to come in ; but willed to fetch my glass

of the clock in the morning my mother Jane Dee dyed at Mortlak; she made a godly ende: God be prayesd therfore! She was 77 yere old. Oct. 20th, I had by my jury at Geldhall £100 damages awarded me against Vincent Murphyn the cosener. Oct. 22nd, with much ado I had judgment against Murfin at Geldhall. My mervaylous horsnes and in manner spechelesnes toke me, being nothing at all otherwise sick. Oct. 25th, Morrice Kyffin departed from me with my leave. Nov. 2nd, the Lord Threasorer sent me a haunche of venison. Thomas Suttley had the bishop of Canterbury his letter for Sir Richard. Nov. 3rd, I writt to my Lord Threasurer. Nov. 6th, Helen cam to my servyse. Nov. 12th, somewhat better in my voyce. Nov. 22nd, the blasing star* I cold see no more, though it were a cler night. Dec. 1st, newes cam by Dr. Deny from Ireland of the Italiens overthrow whom the Pope had sent, the Quene lying at Richemond. Dec. 6th, the Quene removed from Richmond. Dec. 8th, recepi literas Roma, scriptas per fratrem Laudervicea.

1581.† Feb. 9th, I agreed with Mr. Gentle Godolphin for to release the coosener Vincent Murphin. Feb. 11th, Harry Prise, of Lewsam, cam to me at Mortlak, and told of his dreames often repeated, and uppon my prayer to God this night, his dreame was confirmed, and better instruction given. Feb. 12th, Sir William Harbert cam to Mortlak. Feb. 23rd, I made acquayntance with Joannes Bodinus, in the Chambre of Presence at Westminster, the ambassador being by from Monsieur. Feb. 26th, a very fayr calm warm day.

so famous, and to show unto her some of the properties of it, which I did; her Majestie being taken down from her horse by the Earle of Leicester, Master of the Horse, at the church wall of Mortlake, did see some of the properties of that glass, to her Majestie's great contentment and delight."—*Compendious Memorial*, p. 516. This glass is spoken of again.

* Dee has made a rough sketch of the appearance of this comet, with its long tail, on the margin of the MS.

† An original diary of the chemical experiments made by Dr. Dee in this year is preserved in the Bodleian Library.—MS. Rawl. Miscel. 241.

March 8th, it was the 8 day, being Wensday, hora noctis 10, 11, the strange noyse in my chamber of knocking; and the voyce, ten tymes repeted, somewhat like the shrich of an owle, but more longly drawn, and more softly, as it were in my chamber. March 12th, all reckonings payd to Mr. Hudson, £11. 17s. March 13th, Elizabeth Kyrton cam to my servys. March 23rd, at Mortlak cam to me Hugh Smyth, who had returned from Magellan straights and Vaygatz; after that, raynie, stormie wynde, S. W. March 25th, Helen was hyred at our Lady day for the yere for fowr nobles wags; she had her covenant peny, and allso vjs. viij*d*. for her payns taken synce she came. April 3rd, I ryd toward Snedgreene, to John Browne, to here and see the manner of the doings. April 14th, I cam home from Snedgreene. May 25th, I had sight in *Χρυσταλλω* offerd me, and I saw. June 7th, hora 7½ mane nata est Katharina Dee. June 10th, baptisata a meridie hor. 5½ Katharina. Mr. Packington of the court, my Lady Katarin Crofts, wife to Sir James Crofts, Mr. Controller of the Quene's household, Mystres Mary Skydmor of the Privie Chamber, and cosen to the Quene, by theyr deputies christened Katharin Dee. June 17th, yong Mr. Hawkins, who had byn with Sir Francis Drake, cam to me to Mortlake. June 30th, Mr. John Leonard Haller, of Hallerstein, by Worms in Germany, receyved his instructions manifold for his jorney to Quinsay, which jorney I moved him unto, and instructed him plentifully for the variation of the compas, observing in all places as he passed.

July 6th, my wife churched. July 7th, in the morning at 1½ after mydnight, Mr. Hinde his sonne born. July 10th, my right sholder and elbow-joynt were so extremely in payn that I was not able in 14 dayes to lift my arme owtward not an ynche; the payn was extreme; I used Mr. Larder, Mr. Alles, and Alise Davyes, and abowt the 25 day I mended. July 12th, abowt 10 of the clock ¼ before noone *ρογερ is ινκρεδιβλε δογγεδνες ανδ ινγραπε φυλνες αγαιυς με το μι φακε, αλμοστ ρεδι το λαι νιολεντ ανδς ον με, μαγερ ενρικ καν παρτελι τελ.* At the same day the Erle of Leicester fell

fowly owt with the Erle of Sussex, Lord Chamberlayn, calling each other traytor, whereuppon both were commanded to kepe theyr chambers at Greenwich, wher the court was. July 19th, Mr. Henrick went to London to visit his wife and children. July 26th, Mr. Haylok cam, and goodman King with him. July 28th, Mr. Collens did ride into Lincolneshire.

Aug. 3rd, all the night very strange knocking and rapping in my chamber. Aug. 4th, and this night likewise. Katharin was sent home from nurse Maspely, of Barnes, for fear of her mayd's sicknes, and goodwife Benet gave her suck. Aug. 11th, Katharine Dee was shifted to nurse Garret at Petersham on Fryday, the next day after St. Lawrence day, being the 11th day of the month; my wife went on foot with her, and Ellen Cole, my mayd, George and Benjamin, in very great showres of rayn. Aug. 12th, recepi literas a D. Doctore Andrea Hess occultæ philosophiæ studioso, per Richardi Hesketh amici mei, Antwerpæ agentis, diligentiam in negociis meis, et recepi, una cum literis, Mercurii Mensitam seu Sigillam Planetarum. Aug. 26th, abowt 8½ (at night) a strange meteore in forme of a white clowde crossing galaxiam, whan it lay north and sowth over our zenith; this clowd was at length from the S. E. to the S. W. sharp at both endes, and in the west ende it was forked for a while; it was abowt sixty degrees high, it lasteth an howr, all the skye clere abowt, and fayr starshyne.

Sept. * 5th, Roger Cook, who had byn with me from his 14 yeres of age till 28, of a melancholik nature, pycking and devising occasions of just cause to depart on the suddayn, abowt 4 of the klok in the afternone requested of me lycense to depart, whereuppon rose whott words between us; and he, imagining with himself that he had the 12 of July deserved my great displeasure and finding himself barred from vew of my philosophicall dealing

* Dr. Dee, in the Rawlinson MS. just quoted, observes, in his notes on this month, "Mr. Harry Waters went away the 2nd day, malcontent. John Dee, Jesus bless me!"

with Mr. Henrik, thought that he was utterly recast from intended goodness toward him. Notwithstanding Roger Cook his unseamely dealing, I promised him, yf he used himself toward me now in his absens, one hundred pounds* as sone as of my own clene hability I myght spare so much; and moreover, if he used himself well in lif toward God and the world, I promised him some pretty alchimicall experiments, whereuppon he might honestly live. Sept. 7th, Roger Cook went for altogether from me. Sept. 29th, Robert Gardner, of Shrewsbury, cam to my servyce.

Oct. 8th, I had newes of the chests of bokes fownd by Owndle in Northamptonshyre; Mr. Barnabas Sawle told me of them, but I fownd no truth in it. Oct. 9th, Barnabas Saul, lying in the hall was strangely trubled by a spirituall creature about mydnight. Oct. 13th, I rod to Sowth Myms. Oct. 14th, to St. Nedes. Oct. 16th, at Mr. Hikman's. Oct. 20th, at Tosseter. Oct. 21st, Oxford, Dr. Cradocke. Oct. 23rd, from Oxford to Wyckam. Oct. 24th, I cam home. Robert Hilton cam to my service. Nov. 16th, the Quene removed to White Hall, and Monsieur with her. Nov. 27th, I rod to Greensede. Nov. 28th, to goodman Wykham, 2 myles beyond Chayly by Lewys. Nov. 29th, I made acquayntance with Mr. George Kylmer for Sir George his bokes. Nov. 30th, I cam home. Dec. 1st, Katharyn Dee her nurse was payd 6s. so nothing is owing to her. Dec. 5th, Elen my mayden fell sick. Dec. 7th, George my man had the great fall of the ladder, hora 10 fere mane. Dec. 8th, I sent a letter to Mr. Kylmer. Dec. 22nd, my Lord Chancellor's sonne, Mr. Bromley, and Sir William Herbert cam to me. Helen Cole was payd her wages and reckening tyll this Christmas, and so discharged my servyce, being newly recovered of her ague. Her desyre was to go to her frendes.

1582. Jan. 11th, Robert Gardener desired my leave to go dwell

* This probably gave rise to the anecdote which is related in MS. Ashm. 1788, fol. 147, viz. that "he revealed to one Roger Cooke the great secret of the elixar, as he called it, of the salt of metall, the projection whereof was one upon an hundred."

with Sir William Herbert, hora 12. Jan. 16th, Mistris Harbert cam to Essexe. Jan. 17th, Randal Hatton cam home from Samuel's father at Stratton Audley. Jan. 22nd, Arthur Dee and Mary Herbert, they being but 3 yere old the eldest, did make as it wer a shew of childish marriage, of calling ech other husband and wife. Jan. 22, 23rd. The first day Mary Herbert cam to her father's hous at Mortlak, and the second day she cam to her father's howse at Estshene. Jan. 23rd, my wife went to nurse Garret and payd her for this month ending the 26 day. Jan. 27th, Barnabas Sawl his brother cam. Feb. 12th, abowt 9 of the klok, Barnabas Saul and his brother Edward went homward from Mortlak: Saul his inditement being by law fownd insufficient at Westminster Hall: Mr. Serjeant Walmesley, Mr. Owen and Mr. Hyde, his lawyers at the bar for the matter, and Mr. Ive, the clerk of the Crown Office, favouring the other. Feb. 20th, Mr. Bigs of Stentley by Huntingdon and John Littlechild cam to me. I receyved a letter from Barnabas Saul. Feb. 21st, Mr. Skullthorp rod toward Barnabas. Feb. 25th, Mr. Skulthorp cam home. Payd nurse Garret for Katharin tyll Fryday the 23 day, vjs. then somethyng due to nurse for iij. pownd of candell and 4 pownd of sope.

March 1st, Mr. Clerkson browght Magnus to me at Mortlak, and so went that day agayn. March 6th, Barnabas Saul cam this day agayn abowt one of the klok and went to London the same afternone. He confessed that he neyther hard or saw any spirituall creature any more. March 8th, Mr. Clerkson and his frende cam to my howse. Barnabas went home agayn abowt 3 or 2 klok, he lay not at my howse now; he went, I say, on Thursday, with Mr. Clerkson. March 8th, *cœlum ardere et instar sanguinis in diversis partibus rubere visum est circa horam nonam noctis, maxime versus septentrionalem et occidentalem partem: sed ultra capita nostra versus austrum frequenter miles quasi sanguineus.* March 9th, Fryday at dynner tyme Mr. Clerkson and

Mr. Talbot* declared a great deale of Barnabas nowghty dealing toward me, as in telling Mr. Clerkson ill things of me that I should mak his frend, as that he was wery of me, that I wold so flatter his frende the lerned man that I wold borow him of him. But his frend told me, before my wife and Mr. Clerkson, that a spirituall creature told him that Barnabas had censured both Mr. Clerkson and me. The injuries which this Barnabas had done me diverse wayes were very great. March 22nd, Mr. Talbot went to London, to take his jorney.

April 16th, Nurse Garet had her 6s. for her month ending on the 20th day. April 22nd, a goodly showr of rayn this morning early. May 4th, Mr. Talbot went. May 13th, Jane rod to Cheyham. May 15th, nocte circa nonam cometa apparuit in septentrione versus occidentem aliquantulum; cauda versus astrum tendente valde magna, et stella ipsa vix sex gradus super horizon-tem. May 20th, Robertus Gardinerus Salopiensis lætum mihi attulit nuncium de materia lapidis, divinitus sibi revelatus de qua May 23rd, Robert Gardener declared unto me hora 4½ a certeyn great philosophicall secret, as he had termed it, of a spirituall creatuer, and was this day willed to come to me and declare it, which was solemnly done, and with common prayer. May 28th, Mr. Eton of London cam with his son-in-law Mr. Edward Bragden, as concerning Upton parsonage, to have me to resign or let it unto his said son-in-law, whom I promised to let understand whenever myself wold consent to forego it. June 9th, I writ to the Archbishop of Canterbury a letter in Latin: Mr. Doctor Awbrey did carry it. June 14th, Morryce Kyffin did viset me. June 22nd, Nurse Garret had 6s. for a month ending the 18 day of May; she is to have for a month

* Just above this relation some one has written, "you that rede this underwritten assure yourselfe that yt is a shamfull lye, for Talbot neither studied for any such thinge nor shewed himselfe dishonest in any thinge." Dr. Dee has thus commented upon it:—"This is Mr. Talbot or that lerned man, his own writing in my boke, very unduely as he cam by it." There are several other notices of Talbot erased, but whether by him or by the Doctor it is impossible to say, but most probably the former.

wages ending the 15 day of this June. My wife went this Friday thither with Benjamyn. June 27th, Mystris Stafford arrested me hora 11 : I payd all.

July 3rd, hor. 12 $\frac{1}{4}$, Arthur Dee fell from the top of the Watergate Stayres down to the fote from the top, and cut his forhed on the right eyebrow. Sir Richard browght the rent. July 6th, in feare of resting by proctor Lewys : tyll 9 $\frac{1}{2}$ at night from 1 afternone at the Docter's comming. July 12th, Proctor Lewys agred withall. July 13th, Mr. Talbot cam abowt 3 of the klok afternone, with whom I had some wordes of unkendnes : we parted frendely : he sayd that the Lord Morley had the Lord Mountegle his bokes. He promised me some of Doctor Myniver's bokes. July 16th, Mr. William Pole, whome Phillip Simons, somtymes barber to the old Erle of Tavistok, doth knowe, cam to me, and made acquaintance with me : promised to com agayn within xiiij. dayes. Jane my wife went to Nurse Garret's to pay her 12s. for her wages due tyll Friday last, which was Saint Margaret's day, and brought her xijd. for candles : she went by water ; Mistres Lee went with her, and Robyn Jackesbite. Jane this night was sore trubbled with a collick and cramp in her belly ; she vomyled this Monday more, and every night grew stiff in the sole likewise. A meridie hor. 3 $\frac{1}{2}$ cam Sir George Peckham to me to know the tytle for Norombega in respect of Spayn and Portugall parting the whole world's distilleryes. He promysed me of his gift and of his patient of the new conquest, and thought to get so moche of Mr. Gerardes gift to be sent me with seale within a few days. July 18th, Barthilmew Knaresburgh his sone borne at break of day abowt 3 of the klok. June 19th, Barnabas Saul came to see me at Mortlak : I chyd hym for his manifold untrue reports. July 23d, Mistris Franklin's sone borne at noone. July 24th, Robert Gardiner cam, and went on the 26th.

Aug. 8th, Kate was sickly. Aug. 11th, Mr. Bacon and Mr. Phillips of the court cam. Aug. 20th, Katarine still seemed to be diseasid. Aug. 25th, Katharin was taken home from nurse Garret

of Petersham, and weaned at home. Aug. 31st, Benjamin Lock told me of his father's mynde to send him to Spayn within three or four days. Sept. 1st, I did for Sir John Killegrewe devise the way of protestation to save him harmless for compounding with Spaniard who was robbed: he promised me fish against Lent. Sept. 10th, Mr. John Leonard Haller, of Hallersteyn, by Worms in Germany, cam agayn to me, to declare his readines to go toward Quinsay; and how he wold go and ly at Venys all this winter, and from thens to Constantinople. I requested Mr. Charles Sted to help him to make his mony over to Paris and Nuremberg, and to help him with the sercher of Rye to pass his horse, and to help him with Mr. Osborn the alderman with his letters to Constantinople. Sept. 11th, on Tuesday they went to London together, and my wife allso abowt her affayres. Sept. 13th, I writt to Dugenes de Dionigiis to Venys by Mr. John Leonard Haller. Sept. 17th, I writ to the Erle of Osmond. Sept. 29th, Anne cam to my servyse from Mr. Harbert. I payd Mr. Lewys £20, so rest is which I challendg as for my cost and payns for 37 yeres for John his son.

Oct. 12th, I rod to Tundridge. Oct. 13th, I rod from Tundridge to Mr. Coverts at Slawgham. Oct. 15th, I cam home from Slawgham, and dyled at Mr. Holtens, person of Oxstede by Tundridge, a phisitien. Oct. 21st, Jane my wife sowned in the church. Nov. 1st, Mr. Plat, my brother Yong his sonne-in-law, cam to me with a stranger of Trushen, born at Regius Mons: his name is Martinus Faber. The same day cam Mr. Clement the seamaster and Mr. Ingram from Sir George Peckham. Nov. 8th, hayle afternone horam circiter primam: tonitrus circa quartam et sextam. Nov. 9th, Mr. Newbury, who had byn at Cambaya in Inde, cam to me. Nov. 22nd, E. K. went to London, and so the next day conveyed by rode toward Blakley, and within ten dayes to returne. Nov. 24th, Saterday night I dremed that I was deade, and afterward my bowels wer taken out I walked and talked with diverse, and among other with the Lord Thresorer who was com

to my howse to burn my bokes when I was dead, and thought he loked sourely on me. Dec. 1st, George my man, who had lyne oute all night, this morning used me very dishonestly, and sayd he owed me no servyce. Mr. Bettgran the justice was not at home. Dec. 13th, thunder in the afternone and at sonne-set. Dec. 15th, the 15th day being cownted the 25, 50, 10 dayes ar imagined spent, which have crept in betwene the day of Crist his birth regarding the place of the sonne, and the sonnes place not the 25th day of this month, whiche a civile æquation, but mathematically and religiusly to be substantiated to be for the true term of the periods of annuall revolutions of the sonne sinse the day of Christ his birth.

1583. Jan. 13th, on Sunday the stage at Paris Garden fell down all at ones, being full of people beholding the bearbayting. Many being killed thereby, more hart, and all amased. The godly expownd it as a due plage of God for the wickednes ther usid, and the Sabath day so profanely spent. Jan. 19th, Mr. John Leonard Haller went to London and so to go toward Scotland. Jan. 23rd, the Ryght Honorable Mr. Secretary Walsingham cam to my howse, where by good lok he found Mr. Awdrian Gilbert, and so talk was begonne of North-west Straights discovery. The Bishop of St. Davyd's (Mr. Middleton) cam to visit me with Mr. Thomas Herbert. The Lord Grey cam to Mr. Secretary, and so they went unto Greenwich(?). Jan. 24th, I, Mr. Awdrian Gilbert, and John Davis went by appointment to Mr. Secretary to Mr. Beale his howse, where onely we four were secret, and we made Mr. Secretarie privie of the N. W. passage, and all charts and rutters were agreed uppon in generall.

Feb. 2nd, Rolandus Dee baptizatus. Feb. 3rd, Mr. Savile, Mr. Powil the yonger, travaylors, Mr. Ottomeen his sonne, cam to be acquaynted with me. Feb. 4th, Mr. Edmunds of the Privie Chamber, Mr. Lee who had byn in Moschovia, cam to be acquaynted with me. Feb. 11th, the Quene lying at Richemond went to Mr. Secretary Walsingham to dynner; she coming by my dore gra-

tiously called me to her, and so I went by her horse side as far as where Mr. Hudson dwelt. *Ερ μαιεστι αζεδ με οβοσκυρελι οφ μουνσιευρις στατε: διξι βιοθανατος επιτ.* Roland went with his nurse to her howse to Estshene. Feb. 18th, the Lady Walsingham cam suddenly into my howse very freely, and shortly after that she was gone cam Syr Francys himself and Mr. Dyer. Feb. 24th, Jane churched. Feb. 26th, I delivered my boke to the Lord Threasorer for the correction of the Calender.*

March 6th, I, and Mr. Adrian Gilbert and John Davis, did mete with Mr. Alderman Barnes, Mr. Townson and Mr. Yong and Mr. Hudson, abowt the N.W. voyage. March 17th, Mr. John Davys went to Chelsey with Mr. Adrian Gilbert to Mr. Radforths, and so the 18th day from thence toward Devonshyre. March 18th, Mr. North from Poland, after he had byn with the Quene he cam to me. I receyved salutation from Alaski, Palatine in Poland; salutation by Mr. North who cam before to the Quene, and next to me was his message, hor. 12. Nurse Lydgatt at Estshene

* This work, although never entirely printed, created much sensation at the time, and was the cause of considerable controversy among the politicians as well as literati. The Memorial on this subject which Dee presented to the Privy Council has been printed by Hearne and others, but it is not generally known that the original manuscript of the actual treatise on the correction of the Calendar is still preserved in Ashmole's library, No. 1789, and is the very book which Dee alludes to above. It is inscribed "to the Right Honorable and my singular good Lorde, the Lorde Burghley, Lorde Threasorer of Englande," with the following verses :—

"To *ὄτι* and *το διότι*,
 I shew the thing and reason why;
 At large, in breif, in middle wise,
 I humbly give a playne advise;
 For want of tyme, the tyme untrew
 Yf I have myst, commaund anew
 Your honor may. So shall you see
 That love of truth doth govern me."

The work itself is entitled, "A playne Discourse and humble Advise for our Gracious Queene Elizabeth, her most Excellent Majestie to peruse and consider, as concerning the needful Reformation of the Vulgar Kalender for the civile yeres and daies accompting, or verifyeng, according to the tyme truely spent."

was payd for 5 pound candell, 6 pound sope, and the wagis due from Rowland his birth. April 18th, the Quene went from Richmond toward Grenwich, and at her going on horsbak, being new up, she called for me by Mr. Rawly his putting her in mynde, and she sayd "quod defertur non aufertur," and gave me her right hand to kisse. April 24th, nurse was payd for Rowland all her wagis tyll Monday the 22 of this month, 16 pence a weke: she had all her candell and sope before.

May 1st, Albertus Laski, Polonus, Palatinus Scradensis, venit Londinum.* May 4th, Mr. Adrian Gilbert and Mr. Pepler went by water to Braynsford, and so to ride into Devonshire. May 7th, E. K. went toward London, and so to go homeward for 10 or 12 dayes. Dies Quadragesimus a die Veneris ante Pascham. May 13th, I becam acquaynted with Albertus Laski at 7½ at night, in the Erle of Leicester his chamber in the court at Greenwich. This day was my lease of Devonshyre mynes sealed at Sir Leonell Ducket's hows. May 18th, the Prince Albertus Laski cam to me at Mortlake, with onely two men. He cam at afternone and tarryed supper, and after sone set. Nurse Rowland was payd all tyll the 20th of this month. June 15th, abowt 5 of the klok cam the Polonian Prince Lord Albert Lasky down from Bissham, where he had lodged the night before, being returned from Oxford whither he had gon of purpose to see the universityes, wher he was very honorably used and enterteyned. He had in his company Lord Russell, Sir Philip Sydney, and other gentlemen: he was rowed by the Quene's men, he had the barge covered with the Quene's cloth, the Quene's trumpeters, &c. He cam of purpose to do me honor, for which God be praysed! June 19th, the Lord Albert Laski cam to me and lay at my hows all nyght. Nurse Rowland payd her wagis ending the 17th day of this month.

July 1st, Master Mills his answer of no hopes in my sute at

* "The year of our Lorde God 1583, the laste daye of Aprill, the Duke or Prince of Vascos in Polonia, came to London and was lodged at Winchester Howse."—MS. Douce, 363, fol. 125. This account differs from Dee's by a single day.

Grenewich. July 7th, George was dismissed my servys and payd all reconings in the presens of goodman Hilton and Mistres Kelly in my study. July 10th, Thomas Hoke of Cranford cam to my service, but he went away agayn the 23 day of this month. July 30th, the Quene removed on Tuesday from Greenwich to Sion by water; coming by my dore July 31st, the Quene's gift of 40 angells * sent by the Erle of Leicester his secretarie Mr. Lloyd, throwgh the Erle his speche to the Quene, Mr. Rawlegh his letter unto me of hir Majesties good disposition unto me. Aug. 1st, John Halton minister dwelling in London with bowed in and looked, and the a Wurcetershire man, a wicked spy cam to my howse, whom I used as an honest man, and found nothing wrong as I thought. I was sent to E. K. Aug. 7th, Mr. William Burrow passed by me. Aug. 14th, payd nurse Lydgatt for Rowland for two monthes ending the 12th day. Aug. 18th, a great tempest of wynde at mydnyght. *Maxima era E. K. cum uxore ejus.* Sept. 21st, we went from Mortlake, and so the Lord Albert Lasky, I, Mr. E. Kelly, our wives, my children and familie, we went toward our two ships attending for us, seven or eight myle below Gravessende.

1586. July 10th, Mr. William Maynard natus hora 12 noctis, vel paulo post, Londini. Sept. 14th, Trebonam venimus. Oct. 18th, E. K. recessit a Trebona versus Pragam curru delatus; mansit hic per tres hebdomadas. Nov. 8th, illustrissimus princeps versus Pragam; iter institit hora tertia a meridie. * " Her Majestie being informed by the Right Honourable Earle of Leicester, that whereas the same day in the morning he had told me that his Honour and Lord Laskey would dine with me within two dayes after, I confessed sincerely unto him that I was not able to prepare them a convenient dinner, unless I should presently sell some of my plate or some of my pewter for it. Whereupon her Majestie sent unto me very royally within one hour after forty angels of gold from Sion, whether her Majestie was now come by water from Greenwich."—Dr. Dee's Compendious Memoriall, p. 511.

literas Jacobi Memschiti. Dec. 8th, Monday abowt none Mr. Edward Garland cam to Trebona to mee from the Emperor of Moschovia, according to the articles before sent unto me by Thomas Hankinson. Dec. 11th, St. Poloniensis obiit: natus anno 1530 die 13 Januarii, hora quarta mane min. 26, in Transylvania. Obiit, hora secunda post mediam noctem, ut intellexi ex literis Dⁿⁱ Lasky, receptis die 29 per Alexandrum. Dec. 19th, 19die (novi kalendarii) ad gratificandum Domino Edouardo Garlando, et Francisco suo fratri, qui Edouardus nuncius mihi missus erat ab Imperatore Moschoviæ ut ad illum venirem, E. K. fecit proleolem lapidis in proportionem unius gravi arenæ super quod vulgaris oz. et $\frac{1}{2}$ et producta est optimi auri oz. fere: quod aurum post distribuimus a crucibolo una dedimus Edouardo. Dec. 30th, E. K. versus Pragam.

1587. Jan. 8th, cam Nicolas du Haut, Frenchman of Lorrain, who had byn lackay to my frende Otho Henrick Duke of Brunswick and Lienburgh, to seke a servyse, being dismissed by passport from his Lord after his long sikeness. Jan. 14th, Doctor Reinholdt of Salfeldt cam to Trebona with Abraham. His sute of the salt. Doctor Reinholdt revisit versus Pragam 20 die. Jan. 18th, rediit E. K. a Praga. E. K. browght with him from the Lord Rosenberg to my wyfe a chayne and juell esteemed at 300 duckettes; 200 the juell stones, and 100 the gold. Jan. 21st, E. K. again to Prage and so to Poland ward. Feb. 5th, I tok a jorney of myself from Trebon to Newhowse, two myles of, to mete my Lord to comen with him. I toke two horsemen of the cyty with me. Feb. 9th, Illustriss.* venit a Vienna ad Trebonam. Feb. 12th, ivit Illustriss. versus Crocoviam. Feb. 19th, E. K.† cam from Poland abowt none to Trebone: I sent word to my Lord straight. Feb. 21st, my Lord sending no word yet, I sent another message. March 3rd, a Cremona ad Trebonam. March 7th, E. K. dedit

* He frequently speaks of Prince Albert Leski under the title of Illustrissimus.

† It is almost unnecessary to observe that these initials refer to Edward Kelly.

nobis 300 ducata. Recepimus a Domino Illustrissimo 3300.]
 March 9th, iter regium. March 14th, venimus Reichstein.
 March 17th, reditus a Reichstein. March 21st, E. K. gave me
 170 more, and of the 200 for changing 60 remayne. Contumelie
 et contemptus a Cholek et a Schonberg. March 23rd, venimus
 Trebonam. March 26th, the Lord Biberstein, comming from
 Cranbaw from the Lord Rosenberg, passing by Trebona, sent for
 me to his ynn to make acquayntance with me. E. K. equitavit
 Crotoviam. April 4th, actio tertia inceptit. April 18th, actionis
 tertiæ finis. May 1st, vidi (doctore meo premonstrante) Michaelium
 Nuncium non Mersaelem. Laus sit Deo et doctori meo E. K. !
 June 14th, nuptiæ Domini Thomæ Kelei. June 17th, *απερ θις φυλ*
μνε ιαβε αδ θεμ νοτ. June 22nd, Mr. Francis Garland went
 toward England from Trebona.

July 5th, Sondag, I set the two erthes with theyr water agayn
 uppon them. July 9th, Mr. Francis Pucci cam and browght
 Chrisan Franken with him, who, he sayd, had now recanted his
 wycked boke against Christ, wherof I was glad. Illustrissimus
 cum Domina venerat Trebona. July 11th, colloquium inter Illus-
 trissimum Dominum, Dominum E. K. et me, a meridie, inter nos
 tres. July 13th, Francys Pacci recessit. July 19th, a certayn
 kinde of recommendation between our wives. Next day saw
 relenting of E. K. also by my Lord's entrey. July 20th, Illus-
 trissimus abiit cum principissa sua versus Cremoniam. Aug.
 13th, amice cum Domino Edouardo Keleo de tribus illis votis.
 Aug. 17th, E. K. cum fratre et Ludovico
 Aug. 18th, we understode how E. K. went to Badwise to bed, and
 went but this day at none from thence. Aug. 20th, John Basset
 cam to Trebona. Aug. 23rd, Mr. E. K. cam from Lyntz fayre.
 Sept. 1st, Tuesday morning, covenanted with John Basset to
 teach the children the Latyn tong, and I do give him seven
 duckats by the quarter, and the term to begyne this day; and so
 I gave him presently seven duckatts Hungary, in gold, before my
 wife. God spede his work ! Sept. 3rd, 4th, continua quasi pluvia

per biduum istud. Sept. 4th, Basset his hurlyburly with Mr. T. Kelly. Sept. 16th, the Lord Biberstein cam to Trebon, and Cracht with him. Sept. 22nd, my Lord cum from Crummow to Trebon with my Lady. Sept. 26th, my Lord went toward Prage. Sept. 28th, I delivered to Mr. Ed. Kelley (ernestly requiring it as his part) the half of all the animall which was made. It is to weigh 20 ownces; he wayed it himself in my chamber: he bowght his waights purposely for it. My Lord had spoken to me before for some, but Mr. Kelly had not spoken. Sept. 30th, T. K. and J. C.* went toward Prage.

Oct. 12th, Mr. E. K. toward Prage on horsbak. Oct. 13th, mane paulo ante ortum solis observavi radio astronomico inter et gradus 2 minuta prima 22, et erat sub Tauro in eadem linea perpendiculari ante oculum demissa super horizonta altitudo erat vix quatuor graduum. Oct. 15th, hyred Nicolas. Oct. 20th, I toke up the furniture for the action. Oct. 26th, Mr. Edward Kelly cam to Trebona from Prage. Oct. 28th and 29th, John Carp did begyn to make furnaces over the gate, and he used of my rownd bricks, and for the yern pot was contented now to use the lesser bricks, 60 to make a furnace. Oct. 31st, Ed. Hilton cam to Trebona in the morning. Nov. 8th, E. K. terribilis expostulatio, accusatio, &c. hora tertia a meridie. Nov. 17th, John Basset had seven ducketts beforehand for his second quarter's wages, begynning the 1st. Nov. 21st, Saterdag at night Mr. Francis Garland cam from England to Trebona and browght me a letter from Mr. Dyer and my brother Mr. Richard. Nov. 24th, at the marriag super Critzin the Grand Captayn disdayned to com thither to supper in the Rad howse of Trebona becawse E. K. and I were there; and sayd farder that we wer Dec. 1st to 11th, my Lord lay at Trebon and my Lady all this tyme. Dec. 10th, Mr. John Carpio went toward Prage to marry the mayden he had trubbled; for the Emperor's Majestie, by my Lord Rosenberg's means, had so ordred the matter. Dec.

* That is, Thomas Kelley and John Carp.

12th, afternone somewhat, Mr. Ed. Keley his lamp overthrow, the spirit of wyne long spent to nere, and the glas being not stayed with buks abowt it, as it was wont to be; and the same glas so flitting on one side, the spirit was spilled out, and burnt all that was on the table where it stode, lynnenn and written bokes,—as the bok of Zacharius with the Alkanor that I translated out of French for som by spirituall could not; Rowlaschy his thrid boke of waters philosophicall; the boke called Angelicum Opus, all in pictures of the work from the beginning to the end; the copy of the man of Badwise Conclusions for the Transmutation of metallis; and 40 leaves in 4°, intituled, Extractiones Dunstani, which he himself extracted and noted out of Dunstan his boke, and the very boke of Dunstan was but cast on the bed hard by from the table.

1588. Jan. 1st, abowt nine of the klok afternone, Michel, going chilyshly with a sharp stik of eight ynches long and a little wax candell light on the top of it, did fall uppon the playn bords in Marie's chamber, and the sharp point of the stik entred throwgh the lid of his left ey toward the corner next the nose, and so persed throwgh, insomuch that great abundance of blud cam out under the lid, in the very corner of the sayd eye; the hole on the owtside is not bygger then a pyn's hed; it was anoynted with St. John's oyle. The boy slept well. God spedde the rest of the cure! The next day after it apperid that the first towch of the stikes point was at the very myddle of the apple of the ey, and so (by God's mercy and favor) glanced to the place where it entred; with the strength of his hed and the fire of his fulness, I may make some shew of it to the prayse of God for his mercies and protection. Jan. 11th, Nicolas was sore hart circa 8½ hora nocte. Jan. 13th, at dynner tyme Mr. Edward Kelly sent his brother, Mr. Th. K. to me with these words, "My brother sayth that you study so much, and therfor, seeing it is to late to go to day to Cromlaw, he wisheth you to come to pass the tyme with him at play." I went after dynner and playd, he and I against Mr. F. Gore and Mr. Rob tyll supper tyme, in his dynyng rome: and

after supper he cam and the others, and we playd there two or three howres, and frendely departed. This was then after the great and wonderful unkindnes used toward me in taking my man. Jan. 14th, Mr. Edward Kelly rid to Crumlow, being sent for by my Lord. I receyved a letter from the Lord Chamberlain. Jan. 18th, Mistres Lidda K. had an abortion of a girle of 5 or 6 monthes; she was mery and well till the night before; I helped to finde the dead birthe within one howr after I had caused her to have myrh given unto her in wyne warmed, the quarter of a ounce; better after she was dischargd of the secondyne, and all at ones. The woman was sufficiently strong after. Jan. 19th, Mr. E. K. cam from Crumlow. Feb. 4th, Mr. Francys Garland and his brother Robert went from Trebona to go toward England: I wrote to Mr. Dyer and Mr. Yonge. Feb. 8th, Mr. E. K. at nine of the clok afternone sent for me to his laboratory over the gate to se how he distilled sericon, according as in tyme past and of late he hard of me out of Riplay. God lend his hart to all charity and virtue! Feb. 16th, John Carpe cam to Trebon after his marriage. Feb. 19th, Mr. E. K. did *διακλοσε σομ, ακκουντεδ μι φρενδες, ουν νντρυ θει ννερ*. Feb. 28th, mane paulo ante ortum solis natus est Theodorus Trebonianus Dee, ascendente Sirio in horoscopo, die dominica. March 1st, baptisatus erat Theodorus Dee Trebonæ ante meridiem. March 6th, I went to Newhous and dyned at the castell. March 12th, my Lord cam to Trebona and my Lady. March 24th, Mr. K. put the glas in dung. March 26th, my Lord sent one of his secretaries with answer to my letter, and with offer and promys of all where he can pleasure me, circa 5 post meridiem. March 29th, my Lord and Lady from Trebon toward Crumlow. The midwife's husbond's name of Newhowse is David Peregrinus, perhaps of the familie of Petrus Peregrinus, otherwise called Peter of Maharncourt, of Picardy.

April 3rd, Mr. Pucci disquietted Mr. E. K. abowt requesting an action, to which he had one of our six monthes actions, being now the term begynning the fourth day of this month. The ende of our talke was a strange spech of Mr. Kelly to Fr.

Puccy. After 15 wekes write to me, and I will answer you. April 6th, Edmond Hilton went from Trebona toward Prage with Mr. John Carpe, and so toward England. April 10th, I writ to Mr. Edward Kelly and to Mistres Kelly ij. charitable letters, requiring at theyr hands mutual charity. I went to Mr. Captain Chritzin, to know if he were offended to me, who in outward shew used me reasonably curteously. April 12th, my wife churched, and we receyved the communion. John Carpe browght his wife from Prage to Trebona. April 17th, Doctor Reinholt cam to Trebona. April 22nd, nocte hora 9 terribilis et falsa accusatio vel suspicio, quod Puccia annunciatum contra D. K. et ipsum principia(?). May 1st, Mr. Carpio rid to my Lord to the holy well at the glass hows, four myles from Trebona, with my letters of purgation for Puccies his attempts or intents in his letters to my bond and Mr. Kelly, unknown to me. May 4th, Mr. Carpio browght me word of my Lord's displeasure, conveyed and confirmed by cozen Pully his letters. Deus ille sit propitius! May 7th, post afflictionem magnam meam, mei misertus est Deus! Puccia, die eodem venerunt literæ Principis ad Dominum E. K., quæ dies declarabat amici sui infamum meum ne dignitatem: sed non reddebatur nisi valde præfex, valde erat ingrata ille literæ ipsi Domino E. K. Misericordia Dei magna! Omne quod vivit laudet Deum! Hæc est dies quam fecit Dominus! May 10th, E. K. did open the great secret to me, God be thanked! May 19th, hora 10 cum circumstantiis necessariis. May 22nd, Mistris Kelly received the sacrament, and to me and my wife gave her hand in charity; and we rushed not from her. May 30th, Michael was sik of an ague, and Mr. Kelly likewise. June 4th, the howses burnt at Trebon in the morning early on Whitsunday. June 8th, Illustrissimus venit Trebonam. June 11th, Illustrissimus recessit in Dominica a Trebona versus Pragam. My Lord sent Critzin with his compliments unto me, and to offer me help, hora prima a meridie. A letter cam from T. G. of Mr. Dyer, his being three myle from Trebona, but it was not so. Mr. Dier sent word by

Francis Garland wher. June 13th, cam Francis Garland and Mr. Edmond Cooper, brother to Mistris Kelly, to Trebona. June 16th, Francis Garland went to fynde and bring Mr. Dier. June 19th, I had a grudging of the ague. June 22nd, I did evydently receive the ague, and layd down.

July 7th, Mr. Thomas Sowthwell cam to Trebona to visit us. July 17th, Mr. Thomas Sowthwell of his own courteous nature did labor with Mr. Edmond Cowper and indirectly with Mistres Kelly for to funder charity and frendship among us. July 20th, Mr. Dier cam to Trebona. July 22nd, a meridiē circa 10 Mr. Edward *διερ διδ ινιυριε με νγκινδελε*. July 23rd, reconciliatio bona cum Magistro *διερ ννιθ ννυρδς φακτο μεδιαντε* E. K. Aug. 1st, Mr. Harry Maynard natus nocte circa horam 11 Mortlak. Aug. 4th, Illustrissimus cam from Crachovia to Trebon, and there on Friday before dynner cam up Mr. Dyer, who lay in my chamber, and entertayned him honorably. Aug. 5th, after dynner the little boy, sonne to the Captayn of Rhaudnitz, hurt Arthur's nose with a raser, not in anger but by chance wantonly. Aug. 6th, my Lord and Lady went toward Prage. Aug. 7th, this day I covenanted and hyred John Hammond, jentleman, to serve me in his honest servyces for one yere, and to have 30 dolers for his full and all manner of wages. Aug. 9th, Tuesday, Mr. Dyer went from Trebon, having in company Mr. Edmond Cowper, Francys Garland, and his man Rowley. Aug. 13th, Mr. Thomas Sowthwell ryd to Prag ward from Trebon. He told us of the philosopher (his scholemaster to write) whose name was Mr. Swyft, who gave him a lump of the philosopher's stone so big as his fist: a Jesuit named Mr. Stale had it of him. Aug. 14th, Mr. Sowthwell cam againe. Aug. 24th, *vidi divinam aquam demonstratione magnifici domini et amici mei incomparabilis D. Ed. Kelei ante meridiem tertia hora*. Aug. 27th, John Basset (so namyng himself) otherwise truely named Edward Whitlok, under pretence of going to Budweiss to buy cullors and so to return agayn, did convey himselfe from my servyce of teaching Arthur grammer. Sept. 3rd, my

lord and lady cam to Trebon. Sept. 12th, spes confirmata. Sept. 15th, the Lord Chamberlain cam to Trebona, and went away on the 17th. The rancor and dissimulation now evident to me, God deliver me! I was not sent for.

Oct. 17th, Mystres Kelly and the rest rode toward Punchartz in the morning. Oct. 18th, my Lord and my Lady ryd toward Ctumnate. Oct. 25th, Mr. Ed. Kelley and John Carpio rode toward Prage: this night to Wesely, two myles. Nov. 5th, I dreamed that the toth next my top toth skarse cold hang in my hed, the toth on the right side above. Nov. 6th, Mr. Kelly cam home from Prage and Mr. Francys Garland, and Edward Rolls with him from Eglis. Nov. 15th, in the fornone, snow and close clowdy. Nov. 16th, the Lord and Lady Rosenberg cam from Crummedo to Trebon in the evening. Nov. 20th, this Sondag before dynner the Lord and Lady Rosenberg went from Trebon toward Prage. Nov. 23rd, Mr. Francis Garland and Edward Rowly, Mr. Dyer his servant, went from Trebon toward England. I writ to the Quene's Majestie, Mr. Dyer, Mr. Yong, and Edward Hilton. Dec. 4th, I gave to Mr. Ed. Kelley my Glass, so highly and long esteemed of our Quene, and the Emperor Randolph the second, de quo in præfatione Euclidis fit mentio.* The letter of 500,000 ducats required. Dec. 7th, *γρεατ φρενδικι προμισιδ φορ μανι, ανδ τυνο ουνκες οφ θε θινγ.* Dec. 13th, Mr. Edward Kelley

* This refers to the earliest English translation of Euclid by Billingsley, which was published in 1570, with a long preface by Dr. Dee. Professor De Morgan is of opinion that the translation also was by Dee, or that Billingsley may have been only a pupil who worked immediately under his directions. The passage to which Dee alludes is as follows:—"a man to be curstly affrayed of his owne shadow; yea, so much to feare, that if you, being alone nere a certaine glasse, and proffer, with dagger or sword, to foyne at the glasse, you shall suddenly be moved to give backe (in maner) by reason of an image appearing in the ayre betwene you and the glasse with like hand, sword, or dagger, and with like quicknes, foyning at your very eye, likewise as you do at the glasse. Straunge this is to heare of, but more mervailous to behold then these my wordes cam signifie; and neverthelesse by demonstration optically the order and cause therof is certified; even so, as the effect is consequent." I refer the reader also to Mr. Barlow's History of Optics in the Encyclopedia Metropolitana.

gave me the water, erth and all. Dec. 14th, Edmond Hilton cam again to Trebon from England. Dec. 18th, I did understand by Mr. Kelley that my glass which he had given to my Lord Rosenberg, the Lord Rosenberg had given it to the Emperor. Dec. 23rd, I went to the new made citie Kaiser Radnef Stadt, by Budneis, to ovirsee what Joachim Reimer had done abowt my coaches making. Radulphus Sagiensis Gallus Normannus, venit Trebonam, chimiæ et naturalis magiæ studiosus.

1589. Jan. 3rd, Rudolphus Sagiensis Normannus recessit versus Pragm. Jan. 17th, the humming in my eares began. Jan. 19th, circa undecimam noctis abortiebatur Domina Lydda uxor D. Thomæ Kelly ex duobus masculis vix sex mensium, et anno precedente hoc ejusdem uxor abortiebatur puella. Jan. 20th, Mr. Kelly showed me the Lord Rosenberg his letter; when he wrot that of me he hard no more of my going hens, and if Menschik hath not performed as he willed him, that if I send him word he will so dispatch me that therby I shall not nede to stay here, as he had confidently heretofore warned Mr. Kelley, so now he did request him to take leve of me at my departure. And then Mr. Kelly did loke and truly confess that my Jan. 25th, Mr. Mains cam to visit us; the Erle of Schwiczenbagh thre sones. Jan. 31st, Tuesday, I sent Edmond Hilton to Prage, and Zacharias Mathias of Buelweiss, to buy 10 or 12 coach horses and saddell horses for 300 dollers. Feb. 4th, I delivered to Mr. Kelley the powder, the bokes, the glas and the bone, for the Lord Rosenberg; and he thereuppon gave me dischardg in writing of his own hand subscribed and sealed. Feb. 12th, Edmond Hilton cam from Prage with nine Hungarian horses bowght toward our jorney. Feb. 16th, Mr. Edward Kelley rode toward Prage after none, John Carpio, Edmond Hilton, Henry Garlande, Thomas Simkinson, Lodovik. March 11th, from Trebon in Bohemia. March 18th, to Nuremberg. March 20th, from Nuremberg. March 26th, to Frankfurt on the Mane.

April 19th, to Breme. May 1st, Katharin by a blow on the

care given by her mother did bled at the nose very much, which did stay for an howre and more; afterward she did walk into the town with nurse; upon her coming home she bled agayn. Nov. 3rd, stilo veteri, I resolved to go into England, hoping to mete Mr. Edward Kelly at Stade, going also into England; and that I suspected uppon Mr. Secretary Walsingham his letters. Nov. 13th, Edmond Hilton and his brother from England, and John a Glotz. Nov. 17th, die lunæ, I met Mr. Dyer comming to Stade, even in the myddle of the town. Nov. 18th, Edmond to Stade ward. Nov. 19th, toke ship by the Vineyard. Dec. 2nd, we cam into the Tems to Gravesende. Dec. 3rd, from the ship to Stratford to Mr. Yong's howse. Dec. 19th, at Richemond with the Queene's Majestie.* Dec. 20th, agreed for my howse with Nicolas Fromonds to occupy as a tenant with better order. Dec. 25th, I lay this night first at my howse. Dec. 29th, Mr. Adrian Gilbert cam to me to Mortlak, and offred me as much as I could require at his hands, both for my goods carryed away, and for the mynes.

1590. Jan. 15th, a terrible tempest of wind, South by West. Jan. 23rd, Mr. Thomas Kelly cam from Brainford; put me in good hope of Sir Edward Kelly his returning: offered me the loane of ten pownds in gold, and afterward sent it me in Hun-

* Where, according to Aubrey, who received his information from Lilly, he was very favourably received by her Majesty.

gary new ducketes by John Croker, the same evening. Jan. 26th, I writt to Mr. Adrian Gilbert two letters. I resolved of the order to be offred for agreement with Nicholas Fromonds for my howse and goodes. The 5th of March (by old accownt) was Madinia Newton, my daughter, christened at Mortlak; godfather, Sir George Cary; godmothers, the Lady Cobham and the Lady Walsingham. March 12th, Mrs. Anne Deny born betweene 8 and 9 afternoone. March 14th, Mr. Dyer cam home from Stade. March 17th, Sir Edward Kelly his letter by Francis Garland. March 21st, Sir George Cary cam to Mortlak. March 27th, Jane apprehended hora quinta a meridie.* My children at this Lady Day in Lent, began to go to schole at Mortlak with the scholemaster Mr. Lee: I gave him his howse-rent and forty shillings yerely for my three sons and my doughter. The howse-rent was allmost 4s. yerely of Mr. Fisher his new howse. April 7th, John Spenser cam to me, from Venys new returned, and told me of the Venetian philosopher and the goodnes of his gold. April 16th, good Sir Francis Walsingham died at night hora undecima. April 19th, I delivered my letters to Mr. Thomas Kelley for his brother Sir Edward Kelley, knight, at the Emperor's court at Prague. Francys Garland was by, and Mr. Thomas Kelley his wife. God send them well thither and hither agayn! Mr. Emery had disbursed to me frankly betwene the tyme from Shrovetide tyll this May £25. May 5th, Mr. Thomas Jack restored unto me part of my magnes stone. May 8th, I receyved 20 mark from Sir Richard Lagney, of Longlernay. May 16th, I gave Mr. Lee the scholemaster 5s. in part of wages. May 18th, the two gentlemen, the unckle Mr. Richard Candish, and his nephew the most famous Mr. Thomas

* There are a great many brief notices in this diary relative to Jane Dee, most of which are expressed in astrological symbols; and as they are exceedingly difficult to decipher satisfactorily, and are certainly of very little, if any importance, I have thought it expedient to omit them. The entry of "*Iave ad θεμ*" is also of frequent occurrence, though what "*θεμ*" can refer to I have not been able to discover. 1590.115

Candish,* who had sayled rownd about the world, did viset me at Mortlake. May 20th, after dynner, I with my brother, Mr. Justice Yong, went to the Archebishop of Canterbury to Lambeth, about the personagis who used me well. May 21st, I showed my indignation against Bacchus feast at Braynferd intended; gave the Bishop of London warning, who toke it in very good part. Katharyne, my dowghter, was put to Mistres Brayce at Braynferd, hir mother and Arthur went with her after dynner. May 23rd, I lent to goodman Dalton, the carpenter, xxs. for a month. May 29th, 30th, bona nova de industria Domini Richardi Candishii, cum Regina et Archiepiscopo et Domino Georgio Carey, de propositione Etonensis Collegii obtinendi legem. He sent me a hogshed of claret wyne as a gyft. The Lady Cobham sent my wyfe suger and pepper, &c. June 2nd, I writ to Syr Edward Kelly by Mr. William Fowler, merchant, dwelling by Ledenhall. June 3rd, I was very sik uppon two or thre sage leaves eten in the morning; better suddenly at night; when I cast them up, I was well. The pump taken out and the well skoured. June 5th, Thomas Han-kinson and Antony my man cam from beyond the seas to Mortlak. June 5th, terrible yll newes of Edward Kelly against me. June 24th, £20 of Mr. Candish by Edward Hilton. June 28th, I payd Mr. Hudson for all his corn, and also for the wood tyll May, receyved synce I cam home.

July 6th, Mr. Stockden was all payd for his wood 40s. I gave the scholemaster Mr. Lee 5s. in part of wagis: he browght me my hammer from Mr. Jak, so he hath a quarter's wagis 10s. July 8th, I receyved Sir Edward Kelly his letters, dated at Prage the 24th of May stylo novo. No mention is made of his brother Mr. Thomas Kelly coming over. July 10th, the executor of the Lady Duckett requered the det. July 11th, I payd nurse Barwik 12s. for ii. monthis wagis for Madinia: so she is payd for five monthes.

* Dee has preserved several interesting notices of his intimacies with the principal navigators of his time. A general reference to Hackluyt will be sufficient.

July 13th, I went to the Archbishop of Canterbury: talked with him boldly of my right to the personages, and to the treatise of Sir Edward Kelley his Alchimy. July 14th, Mr. Gawayn Smyth spake frendely for me to the Quene, and she disclosed her favor toward me. July 16th, my mynde was somewhat bent to deale with my alchimicall exercises. July 25th, I writ a letter of thanks to the Lord Threasorer by Edmond Hilton. I sent the Lord Chancellor his letters from Brunswyk, of Conrad Nettlebronner his ill behaviour. July 31st, I gave Mr. Richard Candish the copy of Paracelsus twelve lettres, written in French with my own hand; and he promised me, before my wife, never to disclose to any that he hath it; and that yf he dye before me he will restore it agayn to me; but if I dy befor him, that he shall deliver it to one of my sonnes, most fit among them to have it. Theoddor had a sore fall on his mowth at mid-day. Aug. 2nd, Mrs. Stoner's sonne born circa horam tertiam a meridie. Nurs her great affliction of mynde. Aug. 5th, Rowland fell into the Terns over hed and eares abowt noone or somewhat after. Aug. 8th, I gave Nurse Barwick six shillings, so she is payd for the half yere due on Weynsday next. Aug. 9th, I payd to Mr. Lee the scholemaster 5s. Aug. 22nd, Ann my nurse had long byn tempted by a wycked spirit: but this day it was evident how she was possessed of him. God is, hath byn, and shall be her protector and deliverer! Amen. Aug. 25th, Anne Frank was sorowfol, well comforted and stayed in God's mercyes acknowledging. Aug. 26th, at night I anoynted (in the name of Jesus) Ann Frank her brest with the holy oyle. Aug. 30th, in the morning she required to be anoynted, and I did very devoutly prepare myself, and pray for vertue and powr and Christ his blessing of the oyle to the expulsion of the wycked; and then twyse anoynted, the wycked one did reseat a while. Sept. 1st, I receyved letters from Sir Edward Kelley by Francis Garland. Sept. 8th, Nurse Anne Frank wold have drowned herself in my well, but by divine Providence I cam to take her up befor she was overcome of the water. Sept. 23rd, Sunday, I gave

Nurse Barwyk six shillings for a monthis wages to ende on Wensday comme a fortnight ; Mrs. Stackden was by. Sept. 29th, Nurse Anne Frank most miserably did cut her owne throte, afternone abowt four of the klok, pretending to be in prayer before ner keeper, and suddenly and very quickly rising from prayer, and going toward her chamber, as the mayden her keeper thowght, but indede straight way down the stayrs into the hall of the other howse, behinde the doore, did that horrible act ; and the mayden who wayted on her at the stayr-fote followed her, and missed to fynde her in three or fowr places, tyll at length she hard her rattle in her owne blud.

Oct. 11th, Mr. Cumber cam to me. Oct. 14th, payd Nurse Barwik six shillings for one month ending on the seventh, being Wensday. Oct. 15th, this afternoone and all the night following a great storme of wynde at North-West. One Prychard that had marryed Proctor Lewes, his widdow, demaunded £24 of me uppon an obligation of £64 : whereof by the very note on the bak of the same £48 is payd, so that £16 only remayne and not £24, as he unduely demanded : which £16 I challenged for the costes of his sonne John, three yeres and longer being with me in Mortlak, and having also his lerning free. Notwithstanding my wife afraid payd a pownd or two to Mr. Lewys of that £16, and yet Prichard will go to law. Nov. 12th, the Archbishop of Canterbury gave me £5 in ryalls and angels circa horam decimam matutina. Nov. 20th, Her Majestie cam to Richemond. Nov. 27th, the Quene's Majestie, being at Richemont, graciously sent for me. I cam to her at three quarters of the klok afternone, and she sayd she wold send me something to kepe Christmas with. Nov. 28th, Mr. Candish on Saterdag gave my wife forty shillings, and on Tuesday after sent £10 in ryalls and angels, and before he sent me £20, £32 in all. My cousin Mr. Thomas Junes cam in the ende of the terme about St. Andrew's even. Dec. 1st, Her Majestie commaunded Mr. John Herbert, Master of Requests, to write to the Commissioners in my behalf. Dec. 2nd, order taken

by the Commissioners for my howse and goods. Her Majesty told Mr. Candish that she wold send me an hundred angels to kepe my Christmas withall. Dec. 3rd, goodwife Tyndale payd for Antony his lodging for eleven wekes dew at his going away 5s. 6d., and before she had for seven wekes. Dec. 4th, the Quene's Majestie called for me at my dore circa 3 $\frac{1}{2}$ a meridie as she passed by, and I met her at Estshene gate, where she graciously, putting down her mask, did say with mery chere, "I thank thee, Dee; there was never promisse made but it was broken or kept." I understode her Majesty to mean of the hundred angels she promised to have sent me this day, as she yesternight told Mr. Richard Candish. Dec. 6th, Mr. Thomas Griffith my cosen from Llanbeder cam to see me, and lay all night with me, and allso Mr. Thomas Jones, and in the Monday morning went by water to London, and so the same day homeward. A meridie circa 3^a recepi a Regina Domina £50. Dec. 8th, at Chelsey disputing with Doctor Mather, bishop of Bristow; in danger of water hora 5 $\frac{1}{2}$ I stayed at Chelsey. Dec. 14th, the Quene's Majestie called for me at my dore as she rod by to take ayre, and I met her at Estshene gate. Dec. 16th, Mr. Candish receyved from the Quene's Majestie warrant by word of mowth to assure me to do what I wold in philosophie and alchimie, and none shold chek, controll, or molest me; and she sayd that she wold ere long send me £50 more to make up the hundred pound. I gave Mr. Candish the Bishop of Scotland his conclusion with marchaunts. Mr. Candish went from Mortlak at four of klok at nyght toward London and so into Suffolk. Dec. 18th, Mr. Robert Maynard natus circa horam decimam ante meridiem Londini.

1591. Jan. 21st, utterly put owt of hope for recovering the two parsonages* by the Lord Archbishop and the Lord Threasorer. Feb. 13th, Bartilmew cam up. March 2th, borrowed £20 uppon

* See the "Compendious Rehearsall," published by Hearne from a Manuscript in the Cottonian collection, now partially destroyed by fire, for a more extended account of this.

plate and payd this day £19 in Mortlak. March 21st, remember that on Passion Sunday, being the 21st of March by our account, all things was payd for to Mr. Thomas Hudson for wood and corne, abowt £14, at his howse when he was syk of the strangury. Allso to godman Bedell was payd £4 for billet, baven, and lose fagot the same day. Payd likewise to gudwife Wesder eight shillings for one monthes nursing of Madinia, and 4s. more beforehande. March 26th, Mr. Beale sent me home the first my own hand copy of the volume of Famous and Rich Discoveries * which I had given anno 1583 to Andrew Strange.

May 12th, I payd goodwife Welder xij. s. for vij. wekes ending then next from the Wensday before Ester-day last. May 25th, of the old Kalendar, Sir Thomas Jones Knight (unaxed) offred me his castell of Emlyn in Wales to dwell in so long as he had any interest in it, whose lease dureth yet twelve yeres, freely, with commodities adjoining unto it; and allso to have as much mow land for rent, as myght pleasure me sufficiently. The 27th day he confirmed the same his offer agayn before Mr. John Harbert, Master of the Requestes, in his hall in Mortlak; which his offers I did accept of, and he was glad thereof. May 31st, Bartilmew [Hickman] cam up and browght Jane his dowghter with him. Mr. R. Ed. his boke and letter. June 8th, William Aspland of Essex and Th. Collen. June 12th, lent Chronica Hollandiæ Magna to Mr. Beale on Saterdag manuscript, which Mr. Webb lent me. June 14th, Jane Hikman to goodwife Tyndall's to lern. June 27th, Arthur wovnded on his hed by his own wanton throwing of a brik-bat upright, and not well avoyding the fall of it agayn, at Mr. Harberts abowt sonn-setting. The half-brik weighed 2½ lb. June 30, Madinia was taken home from goodwife Welder.

July 28th, Mr. Dyer sent me xx. angels by Mr. Thomas Webbes. July 30th, reconciliation betweene Mr. Dyer and me solemnized

* Now in the Cottonian collection. Ashmole has preserved a copy of it in MS. Ashm. 1790.

the afternone on Friday, and on Saturday (the 31st) all day tyll my going by boat at Mr. Webb's lodging at Rochester Howse. July 31st, by old Kalender, abowt an eleven of the klok Jane was at London very faynt syke, redy to swownd, and in a faynt swete. It was thought that then she quickened. The last of Julie, Saterday by the old accownt, Barthelmew cam up; he went down on Tuesday, the 3rd day of August, from Mortlak. Aug. 2nd, Monday, Mr. William Diggs his philosophicall curtesy all day. Sept. 22nd, Madinia fell from the bed and hurt her forhed abowt one of the klok afternone. Oct. 15th, after midnight very wyndy northerly. Oct. 23rd, a storm of wynde S.W. afternone. Dec. 3rd, wyndie S.W. Dec. 14th, I had a very jentle answer at the Lord Thresorer's hand hora decima ante meridiem at the court of Whitehall. Dec. 20th, a jentle answer of the Lord Threasorer that the Quene wold have me have something at this promotion of bishops at hand.

1592. Jan. 1st, my dowghter Francys borne on New Yeres day at the sun-rising exactly. Jan. 2nd, Barthilmew and his brother Ambrose cam this Sondag to Mortlak. Jan. 9th, Francys christened afternone. Francys went with her nurse to Barne Elms. Mr. Edward Maynard borne in the morning betwene 2 and 3 after mydnight. Arthur fell into a quotidian jentle ague at 9 of the klok in the morning as he was at the servyce in the hall. Jan. 24th, Mr. Thomas Oliver becam acquaynted with me at Mortlak. March 6th, the Quene granted my sute to Dr. Awbrey. March 9th, the pryvy seale at night. March 16th, the great seale. March 18th, Arthur and Katharine were let blud at London by Doctor Dodding's cownsayle. March 24th, £25 Mr. Tho. Mownson. March 25th, I payd £10 to Nicholas Fromonds paulo ante solis occasum, when he most abhominably revyled me. March 30th, on Thursday Mr. Saunders of Ewell sent home my great sea cumpas, but without a nedle; it cam in the night by water.

April 5th, the Lady Russell robbed a little after mydnight of perles, diamonds, &c. One John Smyth is suspected, a yong man

of thirty yeres old, very ingenious in many handyworkes, melancholek. April 8th, Richard cam to my servyce, 40s. yerely and a livery. April 9th, 10th, agreed with my brother Nicholas Fromonds with Mr. Webbs, at 8 of the klok on Wensday night, and 8 on Tuesday night. April 14th, Winifrede Goose, wife of goodman Goose of Tuddington, dowghter of Harry Wyse, eviley tempted, cam to me with her sister. April 16th, *δε θεσαυρο α βοκ*. April 27th, filius Mariæ Nevell hora 3½ a meridie et aliquantus tardus by Chichester. May 3rd, Wensday, at 10 of the klok Arthur was put to Westmynster Schole under Mr. Grant and Mr. Camden. May 11th, I borrowed ten pound of Master Thomas Smith to be paid at Christmas next. May 12th, great wynde at north. May 15th, Marian cam again a meridie hora septima. May 16th, I rode to Harfelde to the Lord Anderson, Lord Justice of the Common Pleas, 12 myles off. May 25th, hora sexta a meridie mowght have byn a quarell betwene Mr. Web and Mr. Morgan with one eye for £4. left unpayd uppon a bill. June 16th, Sir John Perrot judged to be drawn, hanged, and quartered.

July 23rd, at Grenwich about mydnight following this day began the first evydent shew of my grief of kidneys; whereuppon Doctor Giffard caused me to have a glyster, and so the next day I was easid of my grief. July 29th, Robert Theneth of Rushmer by Ypswych made acquaintance with me: he told me of Mr. Carter a man of 80 yeres old in Yorkshyre. Aug. 6th, I went to Nonsuch to the court, wyder the Countess of Warwik sent me word by Mr. Ferdinando of the Quene's gracious speches at St. Crosses, and the Lord Archbishop told me the like. Aug. 8th, after the midnight of Monday, being the 7th day, the second fytt of the stone in my kyndes did molest me for 6 or 7 howres. Aug. 9th, the Lord Threasorer invited me to dynner at Mr. Maynards at Mortlak, where Sir Robert Cecill and Sir Thomas Cisell and his lady wer allso. The Lord Threasorer allso sent me some venison to supper. He invited me to dynner allso the tenth day, where the Lord Cobham cam also to dynner, and after dynner he

requested the Lord Threasorer to help me to St. Crosses, which he promised to do his best in. Aug. 11th, Mr. Kemp of Micheam, my old acquayntance, abowt an eleven of klok (allmost) before none, told me of the rare appearing. Aug. 17th, I went to Micheam to Mr. Kemp. Aug. 21st, I went to the Lord Cobham and the Lady Cobham to London. Aug. 23rd, Mr. Cholmely and his mayde ante meridiem hor. 11½. The humor so suddenly falling into the calf of my left leg as if a stone had hit me. Aug. 26th, Mr. Heriot 40s.* Auditor Hill, £4. Remember all thing is payd to our nurse at Barnes for the girle Francys Dee from hir birth untill the ende of her eight month, lacking 12s., and on Sunday, the 27th of this August, we so concluded, when we gave the nurse ten shillings. The eight month ended (from Newyere's day morning last) the 12th of this month. Sept. 4th, 5th, 6th, very tempestuous, windy at West, Sowtherly. Sept. 5th, the Terns very shallow at London. Sept. 6th, goodman Warryn of Market-harborogh. Robert Web cam from Mr. Ponsoys to write, and is to com agayn within thre wekes. Sept. 7th, Robert Charles of Northamptonchyre and goodman Warren of Marketharborow in my howse at Mortlak promised me to help Barthilmew Hikman with £12 to pay on Michelmas Day next to discharge the bond for his brother-in-law. This they promised uppon condition I wold be bownd to them to see them repayd agayn. I sent a letter to Sir Robert Thaneth to Rushmer by Ypswych by the wagon-man who is at ynn at the George in Lombard Streete. He sayd that Robert Thaneth was at home and well. Sept. 19th, I had on the Sunday abowt 7 of the klok afternone the cramp most extremely in the very centre of the calves of both my legs, and in the place where I had the suddeyn grief on Bartilmew-even last I had payn so intollerable as yf the vaynes or artheries wold have broken by extreme stretching, or how els I cannot tell. The payn

* This entry is not very clear. It either refers perhaps to Harriot, the celebrated mathematician, or to the London goldsmith whom the Abbotsford novelist has immortalized.

lasted abowt half a quarter of an howr. I toke my purgation of six grayns. I began in the morning to drink the drink for the stone in the kydney. Sept. 28th, Mr. Laiesley promised me ten shepe and four quarters of wheat. Sept. 30th, Elizabeth Denby went from me to Mistres Herberts' to servyce.

Oct. 13th, I exhibited to the Archbishop of Canterbury two bokes of blasphemie against Christ and the Holy Ghoste, desyring him to cause them to be confuted: one was Christian Franken, printed anno 1585 in Poland; the other was of one Sombius against one Carolius, printed at Ingolstad anno 1582 in octavo. Oct. 14th, 15th, a mighty wynde at sowth-west. Oct. 30th, 31st, one of these two dayes I hurt my left shyn against the sharp small end of a wooden rammar abowt four of the klok afternone. Nov. 1st, Mr. Ashly, his wife, and their familie, did com to my howse and remayned ther. They had my mother's chamber, the mayde's chamber, and all the other howse. Nov. 9th, Her Majestie's grant of my supplication for commissioners to comme to me. The Lady Warwik obteyned it. Nov. 22nd, the commissioners from Her Majestie, Mr. Secretary Wolly and Sir Thomas George, cam to Mortlak to my howse. Nov. 28th, to Richard Walkdyne of his waxis 20s. Dec. 1st, a little after none the very vertuous Cowntess of Warwik sent me word very speedily by hir gentleman Mr. Jones from the cowrt at Hampton Cowrt that this day Her Majestie had granted to send me spedily an hundred marks, and that Sir Thomas George had very honorably dealt for me in the cause. Dec. 2nd, Sir Thomas George browght me a hundred marks from her Majestie. Dec. 24th to 31st, at Mr. Lurensey of Tooting all these days, and Newyere's Day allso, and so cam home by coach (as we went) by Tuesday none, I, my wyfe, Arthur, Kate, &c. Dec. 31st, at Tooting at Mr. R. Luresey his howse; abowt thre of the klok after dynner dyd the Bishop of Laigham serve process uppon me for the nangle, but most unduely.

1593. January, the Lord Threasorer lay dangerously syk in the begynning of this month. Jan. 2nd, I cam home from Tooting.

Jan. 7th, I receyved letters from the Lord Lasky from his capitynate in Livonia, and I wrote answer agayn. Jan. 10th, this day death seased on him. This day at none dyed Edward Maynard just on yere old. Jan. 11th, buried this day at ten of the clok. Jan. 15th, Mr. Ashley, the clerk of the cownsayle, his wife and whole family removed from my howse in Mortlak to theyr howse in London in Holborn, with all his whole family. He and she had used me, my wife and childern, wurshipfully and bowntifully for our frendeship shewed unto them for the lone of our howse and lodgings from Allhallow-tyde last. Master Maynard also his howsehold removed the 15th and 16th day to London, and my stable free delivered. Jan. 20th, I sent my letters for the Lord Lasky to be carryed in a shyp of Dansk called the John of Dansk. Jan. 21st, Sondag, about none Wenefryde Goose her sone born and died, and she did [there]uppon for old melancholik pangs destroy herself. Memorandum, my nurse at Barnes had xvjs. more besides the last 40s. in the begynning of this month. Feb. 14th, Francys Dee, she cam from the nurse at Barnes; the woman very unquiet and unthankfull. Feb. 15th, Her Majestie graciously accepted of my few lynes of thankfulnes delivered unto her by the Cowntess of Warwik hora secunda a meridie at Hampton Court, two or three dayes before the remove to Somerset Howse. Feb. 21st, I borrowed £10 of Mr. Thomas Digges* for one hole yere. Feb. 22nd, a sharp anger betwene me and the Bishop of Leightyn in the towr, for that he wold not shew his farder interest to Nangle: he sayd that after I had seen his brode seal of commendation, that I had institution and induction to the Nangle. Then I sayd his lordship did fable. He there uppon that so moved that he called me spitefully "coniver." I told him that he did lye in so saying, and that I wold try on the fleysh of him, or by a bastaned gown of him, if he wer not prisoner in the Towr. Inter

* This notice is particularly interesting, showing the intimate connexion which existed between the first English mathematician of the day and the philosopher of Mortlake.

12^a et 2^a a meridie my sharp anger with the Bishop of Leightyn in the lieftenante's dyning parlor before the Lieutenant Sir Michael Blunt. Mr. Liewtenat Nant and Mr. Blunt are wittnesses. March 12th and 13th, these two nights I dremed much of Mr. Kelly, as if he wer in my howse familiar with his wife and brother. March 17th, Francis Garland cam home and browght me a letter from Mr. Thomas Kelly. I made acquayntance with Syr Thomas Chaloner, Knight, who married sergeant Fletewood's dowghter; Mr. Thomas Webbes was the meanes. At six after none receyved from Mr. Francis Nicholls £15, part of one hundred pounds, the rest whereof £85 is to be receyved from Mr. Nicolls within a fortnight after the Annunciation of Our Lady next; and after that in the beginning of June £100, and in Julie the third hundred powndes: and I am to teach him the conclusion of fixing and teyning the moon, &c.

April 3rd, Bartilmew Hikman and Robert Charles cam up. Letice cam with Barthilmew, and went away agayn. April 8th, Letice cam agayn from Barnet to my servyse. I receyved £50 of Mr. Nichols. April 9th, I gave Barthilmew Hikman £12 in new angels to give and pay to Robert Charles, which he had payd for him at Michelmas last. I gave him allso a double pistolet for his courtesy. Little Adolph Webbes cam to me. April 10th, Barthilmew and Robert Charles went homward. May 7th, Thomas Richardson of Bissham cam to Mortlak to me. May 9th, he and Mr. Laward of the Chandry cam. Our court day at Wymbledon. May 11th, mane hora octava William Emery of Danbery in Essex became my retayner at Mortlak, commended by Mr. Thanet of Rushmer by Ypswich, borne 1568, Julii 4. I gave Robert Web 10s. Richard 10s. and Elizabeth 3s. in the begynning of this month. May 21st, be it remembered that on this xxj. day of May I bargayned with and bowght of Mr. Mark Perpoint, of Mortlak, that next mansion howse with the plat, and all the appertenances abowt it for £32, as the sayd Mr. Perpoint of late had at the last court-day bowght it, and had surrender of it

unto him made of Thomas Knaresborowgh for £25 to mydsommer next. Abowt two of the clok after none, before Jane my wife in the strete, I gave him a saffron noble in earnest for a drink peny. Mr. Hawkins, of London, at that instant cam to have bowght it. May 27th, Mr. Francys Blunt, brother to the late Lord Mountjoy, unkle to the Lord Mowntjoy living, and to Sir Charles of the court, cam to be acquaynted to me, he having byn a travayle at Constantinople. June 4th, Barthilmew Hikman cam to Mortlak in the morning. June 22nd, I had my copy of Mr. Roger Dale our stuard, and had £5 the fine released of the Lord his bowntifullnes. I told the stuard that I had bowght the howse of Mr. Mark Perpoynt, and he desyred to see the note of his copy, and so I did. I told Mr. Perpoint that I had byn at London to prepare his mony, and I told him that I had seen the court-roll for his copy. I went to London to fetch the £32 for Mr. Perpoint, and so I sent him word. This evening I browght the mony, but he was gon to bed. This morning I tendered the mony, and told it at goodman Welder's before Mr. Stokden, and goodman Welder, but Mr. Perpoint refused to perform the bargayn. Deus bene vertat!

July 13th, I gave to Robert 5s. upon his wagis this day. July 14th, I gave 4s. to Letise, part of her noble for her quarter wagis, ending the 9th day of this month. July 18th, I bowght goodman Welder his hovel, which is in the yard of the howse next me, which I bowght of Mr. Mark Perpoint. I gave him a new angel and five new shillings, and he is to have more 5s., that is 20s. in all; and if I cannot compact to enter the howse, then hee is to tak his hovel, and to restore it to me. July 21st, I gave to Richard 5s. uppon his wagis this day. July 22nd, I payd Mr. Childe £7. 13s. 4d. for all his woud, xx. lode and vj. July 24th, the offer for the bargayn agayn of Mr. Perpoynt's behalf: this is Mr. Stokden's doing. July 27th, remember that this Friday I payd Mr. Tomson £4 for his master Mr. Herbert, which I borrowed 12th of December 1592: and Mr. Herbert sent it agayn to my furdur

use by Mistres Lee. Aug. 7th, Mystres Twyne and Mystres Banister cam to viset me. Mr. Bele and Mrs. Bele, Mistres Plan, Mrs. Parpoint, &c. dyned with me. I gave Robert Web 5*s.*; he sent it to Mr. Homes. Aug. 9th, I dyned with the Lord Keper at Kew. Aug. 17th, I and my wife and Katharin our dowghter dyned with the Lord Keper at Kew. Aug. 28th, I was all day with the Lord Keper. Mr. Web and the philosopher cam. Aug. 29th, Mr. Web and the philosopher cam again. Aug. 30th, Mistres Redhed, mother to Mr. John Ponsoys by her first husbond, Mr. Gubbens, bokebynder, and his wife, and the same day Mr. Redhed himself, one of her Majestie's gentlemen hushers, cam to me. Sept. 11th, Jana, post triduunam ægrotationem abortiebatur, mane hora decima. May 20th, the Lady Booth made acquayntance here May 23rd, to Isabell Boordman 8s. 8d. to make up whole yere's wagis due at the Annunciation of our Lady last past. I allowed to Mr. Williamson ten dayes respite more for his kinsman to bring in his evidence for the process of the proceedings. Payd to nurse 3s. to make up her full payment of her yere's wagis ended at Michaelmas last. May 27th, open enmitie with Palmer before Sir Edward Fitton. Sir Edward Fitton told Matthew Palmer to his face that he had known him to be a mutinous man and a June 9th, Thomas Sankinson told me of John Basset his coming to London. June 14th, the un-

lawfull assembly and rowte of William Cutcheth, Captayn Bradley, John Taylor, Rafe Taylor, at Newton, against my men, describing the rumour of Newton. June 27th, newes from Hull of 23 barrells of Dansk rye sent me from John Pontoys.

July 1st, I sent Roger Kay to Vandydes for catall. July 4th, the carriers to Wakefeld for the corn. July 5th, toward evening lightning and little thunder. July 6th, thunder in the morning. July 7th, five horse lode of Dansk ry cam home. July 19th, the strang pang of my back opening mane hora 6½. In the church uppon Mr. Palmer's disorder against Mr. Lawrence. July 20th, the last of my Dansk rye, in all 21 horse load. Aug. 6th, this night I had the vision and shew of many bokes in my dreame, and among the rest was one great volume thik in large quarto, new printed, on the first page whereof as a title in great letters was printed "Notus in Judæa Deus." Many other bokes methought I saw new printed, of very strange arguments. I lent Mr. Edward Hopwood of Hopwood my *Malleus Maleficarum* to use tyll new yere's tyde next, a short thik old boke with two clasps, printed anno 1517. Aug. 19th, the Erle and Cowntess of Derby cam to Alport lodg. Aug. 21st, the Erle and Cowntess of Derby had a banket at my lodging at the colledge hora 4½. Aug. 27th, John Addenstall from Mr. Emery. I wrote. Sept. 3rd, Mr. Werall of Lobester within two miles of Donkaster cam to me to be acquaynted with me. Sept. 9th, very wyndy at Sowth and rayny. Sept. 12th, hayle this morning on Monday. Sept. 15th, lent by Mr. Werall 40s. John Cholmley went with him to give him and other physik; and I answered John Cholmeley the 40s. again. Sept 24th, Barthilmew cam. Sept. 25th, Mr. Olyver Carter his impudent and evident disolutenes in the church. Sept. 26th, he repented and some pacification was made. Sept. 27th, I granted a lease of thre lives to Mr. Ratclyf for two howses in Dene Square of 7s. rent both; fine, twenty nobles. Sept. 28th, cam Mr. Yardely of Calcot in Chesshyre, abowt six myles wide of Chester, toward the Holt. Nova de philosopho D. Waldero.

Sept. 30th, John Crocker (my good servant) had leave to go to see his parents. He went with Barthilmew Hikman and Robert Charles toward Branbroke, with Arthur Golding, to cure of his fistula. John Crocker intendeth to returne abowt Easter or at Whitsuntyde next. God be his spede! Mr. Humphry Dampport made our stuard.

Oct. 12th, Rafe Holden preferred a bill against Richard Walkeson for Brereriding's chase entyring, which I and Antony Ryve fals. The bill was not fownd. Oct. 22nd, John Fletcher of Manchester went with my letters to Vanylos this Sunday morning. Nov. 3rd, Mr. John Cholmeley toward London by Market-Harborow. Nov. 7th, the fellows and the receyver agreed not with me in accounts. Paulo post nonam mane Arthur's left eye hurt at playing at fence with rapier and dagger of sticks, by a foynce of Edmond Arnold. Nov. 10th, Mr. Burch his letter from Mathew Palmer. Nov. 14th, the fellows wold not graunt me the £5. for my howse-rent, as the Archbishops had graunted: and our foundation commaundeth an howse. Nov. 17th, I sent Ed. Arnold to London on fote with my letters to D. Julio. Dec. 3rd, to Richard Walkeden 10s. in part of wagis. To nurse 10s. Dec. 9th, I visited the grammar schole. Dec. 13th, I wrote by the carryer Barret to D. Cæsar. Dec. 14th, Mr. George Broke, sonne to Mr. Broke of , cam to be acquaynted with me, whome I used most frendely. Mr. Ratclif of Manchester cam with him, but Mr. Heton allso cam on Tuesday after none when I had no leyser. Dec. 17, I lent to Mr. Barlow for his sonne a Spanish grammer in 8vo. printed at Lovayn in anno 1555 by Bartholomæus Gravay in Spanish, French, and Latin. To R. Dickonson I payd £7. 2s. for the plate and a new bell made till 1599, January 1st, £66.

1598. Jan. 4th, I wrote to Barthilmew and Charles by Bradshaw. Jan. 17th, my brother Arnold to Chester and Vaunlos. Jan. 18th, Ed. Arnold with my letter to London. Jan. 19th, hora secunda a meridie I cam before the justices against James

Shallcross and John Lawrence for misusing my name to deceyve Mr. Harrughby. Jan. 20th, Walter Fletcher, chirurgien, from Barthilmew Hikman cam. Jan. 22nd, after midnight the college gate toward Hunt's Hall did fall, and som parte of the wall going down the lane. I receyved letters from Mr. John Pontoys. Jan. 24th, Walter Fletcher went with my letters to Barthilmew Hikman and Robert Charles. *Amaritudo mea circa mediam noctem.* Jan. 28th, the cloose was hyerd of Ed. Brydock for thre pownd payd beforehand by me John Dee to the said Ed. Brydock, being £4 from Candlemas next tyll Candlemas come a twelvemonth. Feb. 9th, George Birch sute was stayd at Chester uppon his promise to compownd with me for all tyth, haye, and other matter. Thomas Goodyer his sute and excommunication I stayed, *salvo interim jure suo.* Baxter's likewise I stayd at Chester court. Feb. 12th, newes from Mr. Smyth, of Upton personage, cam this Sunday. Feb. 13th, Edmond Arnold to London; there-uppon I sent spedily. Feb. 20th, I wrote by Oliver Ellet, the taylor, to Mr. Nicolls to Faxton. Feb. 22nd, Mr. Nicolls cam and wished to mete Ellet. Feb. 25th, the eclips. A clowdy day, but great darknes abowt 9½ mane. Feb. 26th, *circa mediam noctem amaritudo mea.* Feb. 27th, Mr. Nicolls rode homeward, and met the messenger a little beyond Stopford. I lent Mr. Nicolls home with him Roger Edward's boke to be browght to me by Barthilmew Hikman. March 1st, I receyved Mr. Thynne his letter for Sted's det, and Ed. Arnold his letter of the sute from Upton, and of the Lord Archebisshop his hard dealing. March 2nd, I sent the statute staple to London to Mr. George Brok for Sted. I wrote letters by John Hardy, and sent them in a box. March 5th, newes of Mistres Mary Nevell's death by William Nicholson, that she dyed the Fryday after Candelmass Day. March 11th, borrowed 40s. of Mr. George Kenion, of Kersall, to repay againe as sone as I can conveniently. Receyved by Richard Walkeden.

1600. June 10th, set out from London. Jun. 18th, I, my wife, Arthur Rowland, Mistres Marie Nicols, and Mr. Richard Arnold cam to Manchester.

July 3rd, the Commission set uppon in the Chapter Howse. July 7th, this morning, as I lay in my bed, it cam into my fantasy to write a boke, "*De differentiis quibusdam corporum et spirituum.*" July 8th, I writ to the Lord Bishop of Chester by Mr. Withenstalls. July 10th, Mr. Nicols and Barthilmew Hickman cam. July 14th, Francys Nicols and Barthilmew Hikman went homeward. July 17th, I willed the fellows to com to me by nine the next day. July 18th, it is to be noted of the great pacifications unexpected of man which happened this Friday; for in the forenone (betwene nine and ten) where the fellows were greatly in doubt of my heavy displeasure, by reason of their manifold misusing of themselves against me, I did with all lenity interteyn them, and shewed the most part of the things that I had brougth to pass at London for the college good, and told Mr. Carter (going away) that I must speak with him alone. Robert Leigh and Charles Legh were by. Secondly, the great sute betwene Redishmer and me was stayed and by Mr. Richard Holland his wisdom. Thirdly, the organs uppon condition was admitted. And fourthly, Mr. Williamson's resignation granted for a preacher to be gotten from Cambridge. July 19th, I lent Randall Kemp my second part of Hollinshed's Great Chronicle for ij. or iij. wekes. To Newton he restored it. July 31st, we held our audit, I and the fellows for the two yeres last past in my absence, Olyver Carter, Thomas Williamson, and Robert Birch, Charles Legh the elder being receyver. I red and gave unto Mistres Mary Nicolls her prayer.

Aug. 5th, I visited the grammar schole, and fownd great imperfection in all and every of the scholers to my great grief. Aug. 6th, I had a dream after midnight of my working of the philosopher's stone with other. My dreame was after midnight toward

day. Aug. 10th, Eucharistam suscepimus, ego, uxor, filia Katharina, et Maria Nicolls. Aug. 30th, a great tempest of mighty wynde S.W. from 2 tyll 6, with rayne.

Sept. 11th, Mr. Holland of Denby, Mr. Gerard of Stopford, Mr. Langley, commissioners from the bishop of Chester, authorized by the bishop of Chester, did call me before them in the church abowt thre of the clok after none, and did deliver to me certayn petitions put up by the fellows against me to answer before the 18th of this month. I answered them all eodem tempore, and yet they gave me leave to write at leiser. Sept. 16th, Mr. Harmer and Mr. Davis, gentlemen of Flyntshire, within four or five myle of Hurden Castell, did viset me. Sept. 29th, I burned before Mr. Nicols, his brother, and Mr. Wortley, all Bartholomew Hikman his untrue actions.* Sept. 30th, after the departing of Mr. Francis Nicolls, his dowghter Mistres Mary, his brother Mr. William, Mr. Wortley, at my returne from Deansgate, to the ende whereof I browght them on fote, Mr. Roger Kooke offred and promised his faithfull and diligent care and help, to the best of his skill and powre, in the processes chymicall, and that he will rather do so then to be with any in England; which his promise the Lord blesse and confirm! He told me that Mr. Anthony considered him very liberally and frendely, but he told him that he had promised me. Then he liked in him the fidelity of regarding such his promise.

Oct. 13th, be it remembered that Sir Georg Both cam to Manchester to viset Mr. Humfrey Dampport, cownsaylor of Gray's Inne, and so cam to the colledg to me; and after a few words of discowrse, we agreed as concerning two or three tenements in Durham Massy in his occupying. That he and I with the fellows wold stand to the arbitrement of the sayd Mr. Dampport, after his next return hither from London. John Radclyf, Mr. Dampport's

* In a note by Dee in MS. Ashm. 488, he says, "All Barthilmew's reports of sight and hering spirituall wer burnt; a copy of the first part, which was afterward fownd, was burnt before me and my wife."

man, was with him here, and Mr. Dumbell, but they hard not our agrement; we were in my dyning-room. Oct. 22nd, receyved a kinde letter from the Lord Bishop of Chester in the behalfe of Thomas Billings for a curatship. Nov. 1st, Mr. Roger Coke did begyn to destill. Nov. 4th, the commission and jury did finde the titles of Nuthurst due to Manchester against Mr. James Ashton of Chaterdon. Nov. 7th, Oliver Carter his before Mr. Birch, Richard Legh and Charles Legh, in the colledg howse. Dec. 2nd, colledg awdit. Allowed my due of £7 yerely for my howse-rent tyll Michelmas last. Arthur Dee a graunt of the chapter clerkship from Owen Hodges, to be had yf £6 wer payd to him for his patent. Dec. 20th, borrowed of Mr. Edmund Chetam the scholemaster £10 for one yere uppon plate, two bowles, two cupps with handles, all silver, waying all 32 oz. Item, two potts with cover and handells, double gilt within and without, waying 16 oz.

1601. Jan. 19th, borrowed of Adam Holland of Newton £5 till Hilary day, uppon a silver salt dubble gilt with a cover, waying 14 oz. Feb. 2nd, Roger Cook his supposed plat laying to my discredit was by Arthur my sone fownd by chaunce in a box of his papers in his own handwriting circa meridiem, and after none about 1½ browght to my knowledg face to face. O Deus, libera nos a malo! All was mistaken, and we reconcyled godly. Feb. 10th to 15th, reconciliation betwene us, and I did declare to my wife, Katharine my dowghter, Arthur and Rowland, how things wer thus taken. Feb. 18th, Jane cam to my servyce from Cletheraw. Feb. 25th, R. K[oke] pactum sacrum hora octava mane. March 2nd, Mr. Roger Coke went toward London. March 19th, I receyved the long letters from Bartholomew Hickman hora secunda a meridie by a carryer of Oldham. April 6th, Mr. Holcroft of Vale Royall his first acquaintance at Manchester by reason of William Herbert his frend. He used me and reported of me very freely and wurshiply.

CATALOGUS
LIBRORUM BIBLIOTHECÆ EXTERNÆ
MORTLACENSIS

D. JOH. DEE, A° 1583, 6 SEPT.

* Now in MS. Vespas. A. 11. art. 12, "Joannes Dee, 1555." This is an extremely curious and valuable tract in the history of optical science, and is similar to the curious treatise by Gogava *De speculo ustorio*. The focus of the parabola is here for the first time indicated, a circumstance which has escaped the notice of scientific historians.

† The only MS. of Robert of Gloucester's poem, answerable to this description, is in the University Library, Cambridge.

‡ This MS. is now in the library of the Ashmolean Museum, No. 846.

56. Rogerii Bachonis annotationes super Aristotelis tractatum de secretis secretorum. pergameno, f°.

A CATALOGUE OF SUCH OF DR. DEE'S MSS. AS
ARE COME TO MY HANDS.

[BY ELIAS ASHMOLE.]*

1. *Mysteriorum liber primus*, 1581, et 1582.
It begins 22 Dec. 1581, and ends 15 March 1582.
2. *Mysteriorum liber secundus*.
The first leaf is utterly perished. It ends 21 March, 1582.
3. *Mysteriorum liber tertius*.
It begins 28 April 1582, and ends 4 May, following.
4. *Liber Mysteriorum quartus*.
It began 15 Nov. 1582, but the first leaf is lost. It ends 21 Nov. following.
5. *Liber Mysteriorum quintus*, 1583.
It begins 23 March 1583, and ends 18 April following.
6. *Quinti libri Mysteriorum appendix*.
It begins 20 April 1583, and ends 23 May following.

* From Ashmole's MSS. No. 1790, fol. 52°.

Note that some other of his bookes were set forth by Dr. Casaubon 1659, and the first action (in them) begins 5 daies after the last action of the foresaid appendix, viz. 28 May 1583, which are these that follow.

7. Liber sexti Mysteriorum (et sancti) parallelus novalisque.

It begins 28 May 1583, and ends 4 July following.

8. Liber Peregrinationis Primæ (sexti Mystici paradromus).

It begins 21 Sept. 1583, and ends 13 March 1584.

9. Mensis Mysticus Sabbaticus, pars prima ejusdem.

It begins 10 April 1584, and ends the 30 of that moneth.

10. Libri Mystici Apertorii Cracoviensis Sabbatici 1584.

But in Dr. Dee's MS. (from which it was printed) it hath this title,

Libri septimi Apertorii Cracoviensis, Mystici Sabbatici, pars tertia, A^o. 1584.

And beside hath this note, Liber quartus decimus.

The first action in this booke begins 7 May 1584, and ends 22 May following.

11. Libri Septimi Apertorij Cracoviensis Mystici Sabbatici pars quarta.

It begins 23 May 1584, and ends 12 July following.

12. Libri Cracoviensis Mysticus Apertorius.

In the originall MS. it hath this marginall note, "Sive potius, pars quinta libri 7^{mi} &c. Cracoviensis."

The first action in this booke begins 12 July 1544, and ends 15 August following.

13. Mysteriorum Pragensium liber primus Cæsareusque.

It begins 15 Aug. stilo novo, 1584. At the bottome of the first leafe in the MS. is written, Liber 19us.

The last action in this booke is the 7th of Oct. 1584.

14. Mysteriorum Pragensium Confirmatio.

The first action begins 14 Jan. 1585, and ends the 20 of March following.

15. *Mysteriorum Pragensium Confirmatorum liber.*

This booke begins 20 Mar. 1585, and ends 6 June following.

16. *Unica Actio; quæ Pacciæna vocatur.* A°. 1585, Aug. 6.

17. *Liber Resurrectionis, to which the MS. adds, et 42 Mensium Fundamentum.*

It begins the 30 of April 1586.

Actio prima et secunda ex septem: is also added in MS.

The last action in this booke is 21 Jan. 1587.

18. *Actio tertia. Mysteriorum divinorum memorabilia, ab actionis (ex septem) tertiæ, descriptæ exordio, cui dies 4º Aprilis, A°. 1587, dicata fuit.*

It begins 4 April 1587, and ends 23 May following.

Thus far from the Printed Booke.

OTHER MANUSCRIPTS.

19. 48 *Claves Angelicæ.*

This booke is writen in the Angelick language. Interlined with an English translation.

Cracoviæ ab Aprilis 13 ad Julii 13 (diversis temporibus) receptæ, A°. 1584. At the bottome of the title page. Liber 18.

20. *Liber Scientiæ, Auxilii et Victoriæ Terrestris.*

Maij 2, stilo novo, 1585 collectus ex præmissis in lib. 10, et aliis.

21. *De Heptarchia Mystica Collectaneorum, Lib: primus.*

22. *Liber Enoch.* I suppose *Liber Logaeth* and this are all one, but in the MS. I copied myne from (which I borrowed from Sir John Cotton) it hath this Title, *Liber Mysteriorum Sextus et Sanctus, Liber 8.*

23. *A Booke of Supplications and Invocations.*

CAMDEN

SOCIETY.

FOR THE PUBLICATION OF

EARLY HISTORICAL AND LITERARY REMAINS.

At a General Meeting of the Camden Society held at the Freemasons' Tavern, Great Queen Street, Lincoln's Inn Fields, on Monday the 2nd May, 1842,

THOMAS AMYOT, Esq. F.R.S., TREAS. S.A., DIRECTOR,
IN THE CHAIR.

THE Director having opened the business of the Meeting,

The Secretary read the Report of the Council agreed upon at their meeting of the 28th April last, whereupon it was

Resolved, That the said Report be received and printed, and that the Thanks of the Society be given to the Council for their services.

The Thanks of the Society were also voted to the Editors of the Society's publications; to the Right Honourable Thomas Grenville; to the Master and Fellows of St. Peter's College, Cambridge; to J. I. Blackburn, Esq. M.P.; to the Local Secretaries; and to Messrs. Nichols, for the assistance towards attaining the objects of the Society mentioned in the Report as having been given by them.

The Secretary then read the Report of the Auditors, agreed upon at their meeting of the 30th of April last, whereupon it was

Resolved, That the said Report be received and approved, and that the Thanks of the Society be given to the Auditors for their trouble.

Thanks were then voted to the Director, Treasurer, and Secretary for their services during the past year; and

The Meeting then proceeded to the election of Officers, when
 The Right Hon. Lord FRANCIS EGERTON, M.P.
 was elected President, and

THOMAS AMYOT, Esq. F.R.S. Treas. S.A.
 The Right Hon. Lord BRAYBROOKE.
 JOHN BRUCE, Esq. F.S.A.
 JOHN PAYNE COLLIER, Esq. F.S.A.
 CHARLES PURTON COOPER, Esq. Q.C. D.C.L. F.R.S. F.S.A.
 T. CROFTON CROKER, Esq. F.S.A. M.R.I.A.
 Sir HENRY ELLIS, K.H. F.R.S. Sec. S.A.
 JAMES ORCHARD HALLIWELL, Esq. F.R.S., F.S.A.
 The Rev. JOSEPH HUNTER, F.S.A.
 Sir FREDERIC MADDEN, K.H., F.R.S., F.S.A.
 JOHN HERMAN MERIVALE, Esq. F.S.A.
 The Rev. LANCELOT SHARPE, M.A., F.S.A.
 THOMAS STAPLETON, Esq. F.S.A.
 WILLIAM JOHN THOMS, Esq. F.S.A. and
 THOMAS WRIGHT, Esq. M.A., F.S.A.

were elected as the Council, and

JOHN YONGE AKERMAN, Esq. F.S.A.
 CHARLES FREDERICK BARNWELL, Esq. F.R.S., F.S.A., and
 PETER CUNNINGHAM, Esq.

were elected Auditors of the Society for the ensuing year.

Thanks were then voted to the Director, for his able conduct in the
 Chair.

ELECTION OF OFFICERS, 1842.

At a Meeting of the COUNCIL of the Camdeff Society held at No. 25,
 Parliament Street, Westminster, on Thursday the 5th May, 1842,

THOMAS AMYOT, Esq. in the Chair ;

The Council having proceeded to the Election of Officers,—

THOMAS AMYOT, Esq. was elected Director ; JOHN BRUCE, Esq.
 Treasurer ; and WILLIAM J. THOMS, Esq. Secretary, for the Year next
 ensuing.

REPORT OF THE COUNCIL.

DATED 1st MAY, 1842.

THE Council elected on the 3rd May 1841 are pleased to be able to report that the affairs of the Society continue in a condition of unabated prosperity.

The number of 1200 Members, to which the Society is limited, has been maintained; and there continues to be a large number of Candidates for admission upon vacancies.

The investment standing in the names of the Trustees for the Society has been increased, since the last General Meeting, from the sum of £408 0s. 4d., Three per Cent. consols, to £574 13s. 8d. This increase has arisen from the investment of sums received for Compositions; and the Council recommend that whatever sum may now be in hand on that account, should be added to the investment.

The Council have added the following gentlemen to the list of Local Secretaries:—

The Rev. Joseph Bosworth, LL.D. for Nottingham.

Richard Rees, Esq. F.S.A. for Cardiff, in the place of Captain W. H. Smyth, retired.

James Heywood Markland, Esq. F.R.S. F.S.A. for Bath, in the place of Rev. William L. Nichols, who has removed.

The Publications for the past year have been—

The Second Book of the Travels of Nicander Nucius, a Corcyraean Gentleman who came to England in the suite of an Ambassador from the Netherlands, sent by the Emperor Charles V. to the Court of Henry VIII.: translated from the Original Greek MS. formerly belonging to Archbishop Laud, and now preserved in the Bodleian Library. Edited by the Rev. JOHN ANTONY CRAMER, D.D. Principal of New Inn Hall, and Public Orator, Oxford.

The Latin Poetry of Walter Mapes, Archdeacon of Oxford at the beginning of the thirteenth century. Edited by THOMAS WRIGHT, Esq. M.A., F.S.A. and

Three inedited Early English Metrical Romances. Edited, from a MS. in the possession of J. I. Blackburn, Esq. M.P., by JOHN ROBSON, Esq.

And—

The Private Diary of Dr. John Dee, from the MS. in the Ashmolean Library, together with a Catalogue of MSS. in his Library. Edited by JAMES ORCHARD HALLIWELL, Esq. F.R.S., F.S.A.

is completed at the press, and will be ready for delivery to the Members by the end of the present month. The Council have followed the precedent of former years, in directing that there should be appended to the last-mentioned volume a list of the Members of the Society for the past year; and, if the General Meeting think proper, this Report and that of the Auditors may also be added.

The Council have much satisfaction in being able to state that the "Apology for the Lollards," a work attributed to Wickliffe, which has been so long delayed by reason of the many engagements of the Editor, the Rev. Jas. Henthorn Todd, D.D. is now on the eve of completion; and will certainly be ready for delivery in the ensuing year.

Considerable progress has also been made with the "Promptorium," a Latin and English Dictionary of words in use during the fifteenth century, editing by Albert Way, Esq. F.S.A. a work which the Council believe will be one of great merit and utility; and a portion of it will be one of the publications of the ensuing year.

Besides the Apology for the Lollards and the Promptuary, the following works have been ordered to be put to press at the convenience of their Editors and the Society, and will be published as soon as they are ready.

A Collection of Original Letters and Papers of Literary Men of England during the Reigns of Elizabeth and James I., including some Unpublished Papers of Camden. To be edited by SIR HENRY ELLIS, K.H., F.R.S., F.S.A.

Latin Romance Narratives and Legends of the thirteenth, fourteenth, and fifteenth Centuries, relating to King Arthur and other Heroes of the Welsh and Breton cycle of Fiction. To be edited by Sir FREDERIC MADDEN, K.H., F.R.S., F.S.A.

Letters and State Papers relating to the Proceedings of the Earl of Leicester in the Low Countries, in the years 1585 and 1586, derived from a MS. placed at the

disposal of the Society by Frederick Ouvry, Esq. and other sources. To be edited by JOHN BRUCE, Esq. F.S.A.

The Private Diary of Thomas Cartwright, Bishop of Chester, temp. James II.

The Romance of Jean and Blonde of Oxford, by Philippe de Reims, an Anglo-Norman Poet, of the latter end of the twelfth Century. To be edited from a Unique MS. in the Royal Library at Paris, by M. LE ROUX DE LINCY, editor of the *Roman de Brut*.

The Council have added the following works to the list of Suggested Publications—

A Collection of Original Letters relating to the Dissolution of the Monasteries and some other points connected with the Reformation. To be edited by THOMAS WRIGHT, Esq. M.A., F.S.A.

Specimens of the Anglo-Latin Poets from the seventh to the thirteenth century, selected from inedited MSS. and arranged chronologically, with notices of the Writers and popular Notes. To be edited by THOMAS WRIGHT, Esq. M.A., F.S.A.

Contemporary Diary of a resident in London, extending from the Year 1550 to 1563, now the Cottonian MS. Vitellius F. v. To be edited by JOHN GOUGH NICHOLS, Esq. F.S.A.

The Council have to direct the attention of the Society to the obligations conferred upon it by J. I. Blackburne, Esq. M.P. by giving the Society the use of the MS. of the Three Romances, edited by Mr. Robson.

Also by the Right Hon. Thomas Grenville, in placing in Mr. Way's hands, upon the application of the Director, his valuable early printed editions of the "Promptorium," which Mr. Way wished to use for his edition of that work; and by the Master and Fellows of Saint Peter's College, Cambridge, for the readiness with which, upon a similar application, they lent the Council, for the use of Mr. Way, a valuable MS., entitled *Campus Florum*.

The same exertions, in behalf of the Society, which former Councils have acknowledged, have been continued to be made by the Local Secretaries, and other friends of the Society resident in the country; and the Council trust that such exertions will not be relaxed. To diffuse a knowledge of

the existence and objects of the Society tends, not merely to promote its welfare, but also to carry out the purpose for which it was established, by directing the attention of the possessors of MSS. to those collections in which there yet exist, unpublished, inestimable papers which this Society would be ready and willing to make available. ●

Messrs. Nichols have continued to the Council the same attentions, and have rendered them the same valuable and gratuitous assistance in the general management of the affairs of the Society, which they have given from its Institution. Nothing can be more honourable to Messrs. Nichols, or more advantageous to the Society; and the Council are assured, that it is only necessary for them to state the fact to the Members, in order to its being duly appreciated.

The Council have to regret the loss, by death, during the last year, of the Rt. Hon. THOS. P. COURTENAY, who, in addition to valuable services as a Member of the Council, was one of the Trustees of the Society, and gave much attention to its affairs. The Council have filled up the vacancy in the Trusteeship by electing to that office CHARLES PURTON COOPER, Esq. LL.D., Q.C., F.R.S., F.S.A.

The Council have also to regret the death of HENRY BOWER, Esq. F.S.A. the very zealous and efficient Local Secretary of the Society at Doncaster; and also of the following other Members:

THOMAS BARNES, Esq.

GEORGE FREDERICK BELTZ, Esq. F.S.A. Lancaster Herald.

HENRY EYTON, Esq.

The Rev. THOMAS DUDLEY FOSBROKE, F.S.A.

F. T. GRAYLING, Esq.

Lieut.-Col. JOHN HARVEY.

JOHN HOLMES, Esq. F.S.A. East Retford.

THEODORE EDWARD HOOK, Esq. F.S.A.

HENRY MITCHISON, Esq.

JOHN MOORE, Esq. F.S.A.

The Right Hon. the Earl of MUNSTER, F.R.S., Pr. As. S.

THE REV. GEORGE FREDERICK NOTT, D.D., F.S.A.

EDWARD SKEGG, Esq. F.R.G.S.

JOHN SYDNEY TAYLOR, Esq.

Lieut.-Gen. WILLIAM THORNTON.

HENRY WOODTHORPE, Esq. F.S.A.

The Council report that the Treasurer, having found that other engagements prevented his any longer devoting to the accounts and financial correspondence of the Society the time and attention which, after an experience of three years, he found to be absolutely necessary to be given to them, submitted to the Council the propriety of their accepting his resignation, or of making some other arrangement with respect to the accounts. The Council, regarding the subject as one vitally affecting the welfare of the Society, proceeded immediately to take it into their consideration, and are happy to be able to report that they have effected an arrangement by which the accounts are now kept, and the financial correspondence is attended to, by the Secretary, the Treasurer still continuing responsible to the Society. This arrangement will put the Society to a small annual expense, which can very well be afforded, and which the Council are persuaded the Members will think well bestowed, if it has the effect of preserving accuracy in the accounts. The recent arrangements in the Post Office render it easy for country Members to transmit their subscriptions by Post Office orders, which course the Council recommend to be adopted, making the Post Office orders payable to the Treasurer.

After the lapse of four years of continuing prosperity the Council hope that the Camden Society may be regarded as having taken a permanent station amongst established publishing associations. Many societies have been founded upon similar principles, and one considerably out-numbers this Society in Members: but there is no one which can produce better evidences of stability and prosperity, or which has greater reason to be satisfied with the estimation in which its works are regarded by the public. Amongst the Candidates for admission recently entered there are many Public Libraries and other bodies, whose desire to participate in

the advantages of Membership indicates the reputation of the Society, both in this and other countries ; and the prices maintained by our books when copies get abroad into the market, afford encouraging proof of the demand for them on the part of collectors and literary men. In four years the Society has issued eighteen volumes, all of them works excluded from the ordinary mode of publication, and yet worthy of being published, of eminent use to historical inquirers, and likely to retain a place in the permanent literature of the country.

The forthcoming works are fully calculated to maintain, if not to increase, the reputation of the Society, and the Council see no reason to doubt but that the Society may long usefully and prosperously retain its station, and the number of its Members.

REPORT OF THE AUDITORS,

DATED 30TH APRIL, 1842.

WE, the Auditors appointed to audit the Accounts of the Camden Society, report to the Society, that the Treasurer has exhibited to us his accounts, from the 27th day of April, 1841, to the 30th day of April, 1842, and that we have examined the same, together with the vouchers relating thereto, and find the same to be correct and satisfactory.

And we further report that the following is a correct Abstract of the Receipts and Expenditure of the Society during the period to which we have referred.

**An ABSTRACT of the RECEIPTS and EXPENDITURE of THE CAMDEN SOCIETY,
from the 27th April, 1841, to the 30th April, 1842.**

Total receipts for the year	£1,494	16	10		
				£1,494	16 10

The Treasurer has also reported to us that the Secretary and himself have made arrangements by which they hope, during the ensuing year, almost, if not altogether, to get rid of all arrear of outstanding subscriptions. We trust that the Members will assist them in this very desirable object; and especially that Members resident in the country will transmit their subscriptions at once to the Treasurer by Post Office orders. The adoption of this course has been suggested by several of the Local Secretaries; and it is obvious that it will greatly lessen the troublesome and not very agreeable duties, which are thrown upon those officers by the present practice, will lessen the number of mistakes, and will greatly promote the prosperity of the Society.

Dated the 30th April, 1842.

(Signed) LANCELOT SHARPE.
B. CORNEY.

LAWS OF THE CAMDEN SOCIETY,

ADOPTED AT THE GENERAL MEETING, MAY 2, 1842.

I. THAT the Society shall be entitled "THE CAMDEN SOCIETY, for the Publication of Early Historical and Literary Remains."

II. That the objects of the Society shall be, First, the publication of inedited Manuscripts; Second, the reprinting of Works of sufficient rarity and importance to make Reprints desirable; and Third, the publication of Translations of Historical Works not previously rendered into English.

III. That the Society shall consist of One Thousand Two Hundred Members, being Subscribers of One Pound annually; such Subscription to be paid in advance, on or before the first day of May in every year.

IV. That the management of the affairs of the Society shall be vested in a President and a Council consisting of fifteen Members, which President and Council shall be elected annually by the Society at large, at a General Meeting to be held on the 2nd day of May, being the Anniversary of Cam-

den's birth ; or on the Monday following, when the 2nd of May shall happen to fall upon a Sunday.

V. That the President and Council shall, from amongst their own body, elect a Director, who shall act as Chairman of the Council, in the absence of the President, and also a Treasurer, and a Secretary.

VI. That the Accompts of the Receipts and Expenditure of the Society shall be audited annually by three Auditors, to be elected at the General Meetings, and that the Report of the Auditors, with an Abstract of the Accompts, shall be published.

VII. That the names of Members proposed to be elected as President, Council, and Auditors, shall be transmitted by the proposers to the Secretary, one fortnight before the General Meeting, and that notice of the persons so proposed shall be forwarded by the Secretary one week before the General Meeting, to all the Members residing within the limits of the Twopenny Post, and to all other Members who shall, in writing, request to receive the same.

VIII. That no Member shall be entitled to vote at any General Meeting whose Subscription is in arrear.

IX. That in every year one-fifth in number of the Council of the year preceding shall be ineligible for re-election ; and that in case any Member of the Council shall not attend more than one-third of the number of Meetings of the Council, such Member shall be considered to be one of the retiring Members.

X. That in the absence of the President and Director, the Council at their Meetings shall elect a Chairman, who shall have a casting vote in case of equality of numbers, and shall also retain his right to vote upon all questions submitted to the Council.

XI. That the Funds of the Society shall be disbursed in payment of necessary expenses incident to the production of the Works of the Society, and that all other expenses shall be avoided as much as possible.

XII. That, after the Members of the Society shall have reached One

Thousand Two Hundred, vacancies in that number shall be filled up by the Council, from time to time as they occur.

XIII. That every Member not in arrear of his Annual Subscription, shall be entitled to One Copy of every Work published by the Society during that year.

XIV. That the Members shall be invited to contribute or recommend Works for publication.

XV. That Editors of Works printed by the Society shall be entitled to Twenty Copies of the Works they edit.

XVI. That the Council shall determine what number of copies of each Work shall be printed, and that the copies over and above those required by the Members shall be sold in such manner, and at such prices, as shall be fixed by the Council, the proceeds being carried to the account of the Society.

XVII. That the Publications of the Society shall all form separate and distinct Works, without any other connexion than that which must necessarily exist between the volumes of such Works as consist of several Volumes.

XVIII. That any Member of the Society may at any time compound for his future Annual Subscriptions, by payment of £10 over and above his Subscription for the current year.

XIX. That every Member of the Society who shall intimate to the Council his desire to withdraw from the same, or who shall not pay his Subscription for the current year within three Months after his Election, or after such Subscription shall have become due, shall thereupon cease to be a Member of the Society.

XX. That the Council may appoint Local Secretaries in such places, and with such authorities as to them shall seem expedient; every Local Secretary being a Member of the Society.

XXI. That no alteration shall be made in these Laws, except at a General Meeting, nor then, unless One Month's notice of any alteration intended to be proposed at such Meeting shall have been given in writing to the Secretary.

MEMBERS OF THE CAMDEN SOCIETY,

FOR THE

FOURTH YEAR, ENDING 2ND MAY, 1842.

Those Members to whose names (c.) is prefixed have compounded for their Annual Subscriptions.

The Members whose names are printed in Capitals were on the Council of the year.
